It is maintained by Stucken and Winckler that features of the Tammuz, Adonis, and Osiris myths *have attached themselves to certain legendary Israelitish* heroes. Thus Abram and Sarai, brother and sister, as well as husband and wife, also Amnon and Tamar, suggest comparison with Tammuz and Ištar[1] (see Stucken, *Astralmythen*, 11; Wi. *GI* 2 23, 227 *f.* cp 105 *f.*, and TAMAR, 2). The story of Joseph devoured by a wild beast, also the detail about Moses in the ark of bulrushes (see, however, MOSES, § 3), suggest respectively the Adonis and the Osiris myth. David, the beautiful young shepherd, also reminds one of Tammuz or Adonis. Many critics may be inclined to admit that the details here mentioned (Winckler has much more to mention besides) are of mythic origin; but to connect them *directly* with the Babylonian myth of Dûzu seems to be at present a somewhat bold hypothesis. That the mourning for Jephthah's daughter is *analogous* to the Tammuz wailing is, however, beyond the possibility of doubt (see col. 2362). T. K. C.

TANACH (תַּעְנָךְ), Josh. 21 25 AV, RV TAANACH.

TANHUMETH (תַּנְחוּמֶת; cp the Talm. pr. name Tanḥum), father of SERAIAH [*q.v.*] (2 K. 25 23: θανεμαθ [B], -μαν [A], θανεεμμαθ [L]; Jer. 40 8; θαναεμαιθ [B], θαναεμεθ [AQ], ναθ- [ℵ]).

The name, though possibly (cp Nahum in *OS*) early explained as 'comfort' (cp § 62; pointed so as to exclude a woman's name?), may, according to analogies (*e.g.* Rehum, connected with Jeraḥme'el), come from an ethnic of the Negeb (cp NAHAMANI). In 2 K. Seraiah b. Tanhumeth is called a Netophathite; but the present writer takes Naphtuḥite to be meant (cp NETOPHAH)—*i.e.*, he belonged, like (probably) his companions, to the Negeb. In Jer. the designation is *apparently* given to certain 'sons of EPHAI' (*q.v.*). But בני עופי (as Kt.) is a corrupt duplication of נטופתי. Cp *Crit. Bib.* on Jer. 40 1 5, where it is argued that Gedaliah's Mizpah may have been Zarephath in the Negeb. T. K. C.

TANIS (τανεως [BA]) Judith 1 10. See ZOAN.

TANNER, TANNING. See LEATHER.

TAPESTRY (מַרְבַדִּים, *marbaddîm*), RV 'Carpets,' AV 'coverings,' RVmg. 'cushions,' of tapestry are mentioned in Pr. 7 16 31 22†. See EMBROIDERY, WEAVING.

TAPHATH (טָפַת, § 78), 'daughter of Solomon,' wife of one of the king's prefects (see BEN-ABINADAB), 1 K. 4 11 (ταβληθει [B], ·θλει [Bab. vid.], ταβααθ [L], ταφατα [A]). Probably, however, it was a Salmæan (*i.e.*, Arabian) woman who is meant; point שַׁלְמָה. So in *v.* 15. Her name was perhaps Naphtuḥith (cp § 78); and her husband's prefecture may have comprised all נפתוח ערב, Naphtoaḥ-arāb. See *Crit. Bib.*; also SALMAH. T. K. C.

TAPHON [AV] or TEPHON [RV] τεφων [Aℵ], τεφω [V], τοχοας [Jos. *Ant.* xiii. 1 3, § 15], *Cepho* [Vet. Lat.], Syr. ܬܦܘܣ). One of the 'strong cities' in Judæa fortified by Bacchides; 1 Macc. 9 50. The name is a corruption either of Tappuah (cp Josh. 16 8 𝔊B), in which case BETH-TAPPUAH (*q.v.*) may be meant, or of NETOPHAH (*q.v.*). The latter view (Grä. *Gesch.*(4) iii. 18, n. 5) is geographically possible, but is phonetically perhaps rather less natural.

TAPPUAH (תַּפּוּחַ; § 103, cp APPLE and FRUIT, § 12).

1. A place grouped with Zanoah, En-gannim, and Enam among the towns of the lowland of Judah (Josh. 15 34), and connected apparently with Hebron (1 Ch. 2 43). (In Josh. *ιλουθωθ*[1] [B?], *αδιαθαειμ*[1] [A], *θαφφουα* [L]; in 1 Ch. *θαπους* [B], *θαφφου* [A], *φεθρουθ* [L]). Perhaps, however, 'Tappuah and Enam' should rather be 'and Tappuah [of] Enam,' and the same place may be referred to in Gen. 38 14 (read 'at Tappuah of Enaim') and in Josh. 15 9 18 15 (read for 'unto the fountain of the waters of NEPHTOAH,' 'unto Nephtoah, or Tappuah, [of] Enam'). In all these passages there is most probably a geographical confusion due to the redactors—*i.e.* the place originally intended was in the Negeb (cp SOCOH, ZANOAH, ZORAH). Very possibly, too, Tappūah is a popular distortion of Nephtoah or Naphtoah, the name the present writer supposes to underlie the difficult 'Naphtuḥim' in Gen. 10 13. See MIZRAIM, § 2*b*, where Gen. 10 13 *f.* is explained in the light of the theory that מצרים is very often not Miṣraim, 'Egypt,' but Miṣrim, the Muṣri on the N. Arabian border of Palestine.

2. A place which appears once (see below) at a critical point of the history of Israel, situated on the border between Ephraim and Manasseh (see KANAH), Josh. 16 8 17 8. In 17 7 it is called EN-TAPPUAH, and *in the next verse we are told that the land or district of* Tappuah belonged to Manasseh, but Tappuah itself to the b'ne Ephraim. This is inserted to account for the expression in *v.* 7, 'and (then) the border goes along southward to the inhabitants (= the district) of En-tappuah.' Conder (*Hdbk.* 263) identifies En-Tappuah or Tappuah with a spring near *Yāsūf*, at the head of a branch of the *Wādy Kānah*, S. of Shechem and of Michmethath. Robinson, however, and formerly Conder (*PEFQ*, 1877, p. 48), connected it with *Kh. 'Aṭūf*, and Guérin (*Sam.* 1 259) with *'Ain el-Fāri'ah*, both NE. of Nāblus. In each case the identification depends on the situation assigned to the torrent KANAH. Probably enough there was a northern Tappuah; but the name (a distortion of Naphtoah) comes from the Negeb. It is historically unsafe to suppose that the northern Tappuah was the city so cruelly treated by Menahem in his hour of victory, 2 K. 15 16 (see TIPHSAḤ).

(𝔊 *ταφου, πηγὴν θαφθωθ* [*ναφεθ*, a, b, mg.], *θαφεθ* [B]; *εφφουε, πηγὴν θαθφωθ, θαφθωθ* [A]; *θαπφουε, πηγὴν ναφθωθ*, [*θαφωθ*] [L]). *Dillmann holds that the Ephraimite Tappuah was the* royal city of Josh. 12 17 (*αταφουτ* [B], *θαφφου* [A], *θαπφου* [L]). With the preceding name Bethel, the list of cities passes into central Palestine. The present writer thinks, however, that Josh. 12 7 *f.* has been recast by the redactor, and that the royal cities are really in the Jerahmeelite Negeb (cp SHIMRON-MERON, TIRZAH). T. K. C.

TARAH, RV **Terah** (תֶּרַח; ταραθ [BL], θ- [A] εκαραθ, εκθ. [F, the preposition εκ dittographed]), a stage in the wandering in the wilderness; Nu. 33 27 *f.* See WANDERING, WILDERNESS OF.

Probably *a mutilation of Jeraḥmeel (cp* TERAH*)* [Che.]. Cp MAKHELOTH, TAHATH, MOSERAH.

TARALAH (תַּרְאֲלָה; θαρεηλα [B], θαραλα [A], θε. [L]; *therela, therama* [*OS*(2) 31 2 156 31; cp 261 25]),

schmar agrees with this, and finds in *v.* 17 a contemptuous reference to the sacrifices of the 'high places,' which gave forth to Yahwè no 'sweet savour.' Most see a reference to the *Baresma*, or bundle of branches of flowering trees, held by worshippers of the solar fire in the Parsee religion (see *Vendidad* 19 64, Spiegel, *Eran. Alterth.* 3 571). Cp a Cyprian parallel in Ohnefalsch-Richter, *Kypros*, 137 *ff.* Clermont-Ganneau (*Études d'archéol. orientale*, 28 [1880]) supposes some rite in the mysteries of Adonis. This would require us to transfer the last clause of *v.* 17 to the end of *v.* 14.

[1] Though strictly the sister of Tammuz was Bilili.

[1] See ADITHAIM.

apparently a Benjamite place-name (Josh. 18 27), but really, like *ha-eleph* in *v.* 28, a corruption of יִרפּאל, IRPEEL (*q.v.*), or of ירחמאל, of which ירפאל may be a corruption (Che.). See ELEPH.

TAREA (תַּאְרֵעַ [Bä.], תַּאְרֵעַ [Gi.] in 1 Ch. 8 35; but תַּחְרֵעַ [Bä.], תַּחְרֵעַ [Gi.], EV TAHREA in 9 41†; θερεε, θαραχ [B and ℵ in 9 41], θαρεε, θαρα [A], θαραα [L]), a descendant of Saul mentioned in a genealogy of BENJAMIN (*q.v.*, § 9, ii. *β*), 1 Ch. 8 35 = 9 41.

TARES (ζιζανια, Mt. 13 25 *ff.*). The Greek word, which does *not* occur in 𝔊, is plainly of Semitic origin. Its Syriac form *zīznā* is (as Lagarde says, *Sem.* 63) equivalent to *zinzan*, and so derived from √זן, which in Ar. means 'to be dry.' A kindred word is Ar. (and Pers.?) *zawān*, which denotes the seed of *dawsar*—*i.e.*, darnel. ζιζάνιον is, according to Suidas, ἡ ἐν τῷ σίτῳ αἶρα; the medicinal effects of αἶρα are described in Diosc. 2 122.

From the statements in Mishna and Talmud (see Löw, 133 *f.*) we learn that זונים, the post-biblical Hebrew equivalent of ζιζάνια, denoted plants closely resembling wheat, alongside of which they grew, and were indeed sometimes regarded as a degenerate form of wheat produced under unfavourable conditions from the same seeds. In view of these and other statements, it is generally agreed that the plant intended is *Lolium temulentum*, or darnel (Tristram, *NHB* 487, where there is a good account of the plant).

It is not improbable that 'darnel' has been associated with 'white crops,' especially wheat, from the earliest times. With imperfect methods of cleaning the seed-grain, the seed would be sown with that of the wheat. It grows to about the same height, and would naturally be regarded as a degenerate form. Darnel was long regarded as poisonous (cp Hooker, *Student's Flora*, 454); this, however, is now attributed to the ergot with which it is peculiarly prone to be affected. Its rarity in England, where it is only a 'weed of cultivation,' is due to greater care in the sowing. A native of Europe and N. Asia, it occurs throughout the Mediterranean basin. N. M.—W. T. T.-D.

TARGET. (1) צִנָּה, *ṣinnāh*, 1 K. 10 16; see SHIELD, 1. (2) כִּידוֹן, *kīdōn*, 1 S. 17 6. See JAVELIN, 1, 5; SWORD.

TARGUMS. See ARAMAIC LANGUAGE, § 6; TEXT AND VERSIONS, § 65.

TARPELITES (טַרְפְּלָיֵא, Ezra 4 9†; ταραφαλλαιοι [B], ταρφ. [AL]; ܛܪܦܠܝܐ), according to most recent writers not an ethnic name, but miswritten for טַפְסְרָיֵא, 'tablet-writers' (from Ass. *dup-sarru*); cp Schr. *COT* on Jer. 51 27, but see SCRIBE. Cp also APHARSITES.

TARSHISH (תַּרְשִׁישׁ; θαρσ[ε]ις [BℵA, etc.]—everywhere except Is. 2 16 [see below] and 23 1 6 10 14 [καρχηδων (BℵQT), χαρκ. (B* once, ℵ* twice)] where Qmg. twice has θαρσεις as the reading of Aq. Symm. Theod., and Ezek. 27 12 25 [καρχηδονιοι or χαρκ. (BAQ—A *v.* 25 adding θαρσος)] 38 13 [καρχηδονιοι (B); χαλκηδονος (A), θαρσεις (Qmg. vid.)]; thrice spelled **Tharshish** in AV [1 K. 10 22 *bis*, 22 48]). A son of Javan, Gen. 10 4 1 Ch. 1 7 (where mis-written תרשישה, under the influence of אלישה).

1. Biblical references.

In a relatively early passage (Is. 2 16) we find the phrase 'Tarshish ships'[1] as a synonym for large, sea-going vessels. We also find the phrase in 1 K. 10 22[2] (twice; 𝔊 ναῦς ἐκ θ. the second time), 22 49[3] Is. 60 9 Ps. 48 7 [8], and Ezek. 27 25. The information given us respecting Tarshish may be very briefly summed up. According to Jer. 10 9 (later than Jeremiah), silver was brought from it, and elsewhere, besides silver, iron, tin, and lead are specified among its riches (Ezek. 27 12; cp 38 13). It is mentioned with the *iyyīm* (אִיִּים) or 'coast-lands' (Is. 23 6 66 19 [with other countries], Ps. 72 10). Jonah, when fleeing from the presence of Yahwè, set sail for Tarshish from Joppa (Jon. 1 3 4 2; cp 2 Ch. 9 21 *bis* [πλοῖα ἐκ θ. once], 20 36 *f.*—where Tarshish ships have become, through the author's misunderstanding, 'ships that go to Tarshish').

The identification of the locality is difficult. Most scholars since Bochart have thought of Tartessus

2. Where? Tartessus?

(Ταρτησσός; but Polyb. iii. 24 2, Ταρσήιον) in S. Spain. This was the ancient and, as far as known to the OT writers, the remotest goal of Phœnician commerce (see GEOGRAPHY, § 12*b*). Herodotus (4 152) indeed places Tartessus beyond the Pillars of Hercules; cp Strabo 3 151; Plin. iii. 3 8. Elsewhere (2 148) Strabo, with whom Pausanias (iv. 19 3) agrees, makes Tartessus the name of the River Bætis (Guadalquivir), and also of a city in the delta of this river, the surrounding territory being called Tartessis. Diodorus (5 35 *ff.*) as well as Strabo speaks of the silver, iron, tin, and lead of Tartessus. The exact site seems not determinable, nor is it clear that the Hebrews knew it. Cp SILVER.

[The name Tartessus was extended to the whole of S. Spain. 'As far as the *terminus* Tartesiorum' is found in Avienus (462), and in the second treaty between Carthage and Rome we read that the Romans are forbidden Μαστίας Ταρσηίου μὴ λῄζεσθαι ἐπέκεινα (Polyb. iii. 24 3)—*i.e.*, they are not to go beyond the city of Mastia in the land called Tarseion = Tarshish. See E. Meyer, *GA* 2 687 (§ 425).]

What is likely is, that Tarshish is a Semitised form of the native name.

𝔊 in Ezek. and Is. 23 renders 'Tarshish' by 'Carthage.' In its ordinary sense this name is of

3. Carthage?

course unsuitable. But when the Carthaginians brought the Phœnician settlement of Mastia (see § 1, end) in the land of Tarseion (Tarshish?) under their rule, they made it a Ḳart-ḥadašt (= Carthage), so that 𝔊's rendering in a new sense appears to be defensible (Wi. *AOF* 1 445 *f.*).

Tarsus in Cilicia is the identification adopted by Josephus and Jerome, and in modern times by Baron

4. Tarsus?

Bunsen, Sayce,[1] and—for Gen. 10 4—by A. H. Keane (who takes 'a son of Javan' to mean 'an Asiatic Greek'; cp *The Gold of Ophir*, 92 *ff.*). The objections to this are (1) that the recorded foundation of TARSUS [*q.v.*] does not go back far enough, and (2) that its name, as given on coins and in Assyrian inscriptions, has *z* instead of *s*.

Le Page Renouf (*PSBA* 16 104-108 138-141) advocates the claims of the Phœnician coast, so that the phrase

5. Phœnicia?

'Tarshish ships' would be equivalent to 'Phœnician ships.' This is in accordance with W. M. Müller's explanation of the Egyptian phrase 'Kefto ships' as = 'ships built in the Kefto style,' *As. u. Eur.* 349, n. 2 (cp CAPHTOR). But plausible as this interpretation of 'ships of Tarshish' may be, the sense 'Phœnicia' for 'Tarshish' has not been made out. It would appear as if this learned Egyptologist had read the text of Is. 23 10 too unsuspiciously. Of course, too, the sense 'Phœnicia' for 'Tarshish' cannot easily be made to agree with the biblical references (apart from the phrase mentioned) to the city or district of Tarshish.

Knobel (*Gen.*(2)) and Franz Delitzsch (*Gen.*(5)) separate the Tarshish of Gen. 10 4 from that of other passages,

6. Tyrseni?

and suppose it to mean the Tyrseni—*i.e.*, the Etruscans. This we may at once venture to reject; if Tyrseni are meant, it must be those of the Ægean (cp TIRAS). These famous sea-rovers appear in the Egyptian inscriptions as Tur(u)ša,[2]

[1] 𝔊, however, does not support the rendering 'Tarshish ships'; θαλάσσης in πᾶν πλοῖον θαλάσσης [BℵA, etc.] is an erroneous *transliteration*; for another case of this see Dan. 10 6 (θαλασσης [8 7] = θαρσεις [Theod.]; cp Vg.'s *maris* in Ezek. 1 16). In Talm. Jer. *Meg.* 74*a*, תרשיש = θαλάσσιος (Levy).

[2] Regarded as a redactional insertion (see Kittel, Benzinger). The Hebrew has אֳנִי ת׳ (collective).

[3] Stade, Kittel, and Benzinger agree that (following 𝔊) we should read here אניה and האניה (singular). Note נשברה (Kt.), 'was broken.' 𝔊B omits תרשיש whilst 𝔊A and 𝔊L have respectively in their insertion after 1 K. 16 28 ναῦν εἰς θ. and ναῦν . . . εἰς θ.

[1] In *Exp. T*, 1902, p. 179.

[2] 'It is safe to recognise in the Turuša, expressly mentioned by Rameses III. as a maritime people, Tyrsenian pirates who appear in the old Greek tradition—by no means the Etruscans' (E. Meyer, *GA* 1 313, § 260).

and if they are referred to at all in Gen. 10 4, it would be best to read there, not 'Tarshish,' but 'Turus' or 'Turuš.' If we take this step, it becomes possible that the phrase 'ships of Tarshish' may have been originally 'ships of Turuš' (תּוּרַשׁ?). In this case the expression would be very old, and be a monument of the times when 'ships of the Turuš' were no unfrequent sights. Later, Turuš might very possibly be confounded with the Tars implied in the Greek form Ταρσήιον = Tartessus (see § 2).

It has hitherto been assumed in this article that the Hebrew text of the passages referred to is on the whole correct, though the doubtfulness of Gen. 10 4 and Is. 23 10 has been alluded to. Now, however, we must proceed further, and take into account the fact that there is much corruption in the Hebrew text of the OT, and specially in the readings of the proper names. As a preliminary, we must separate the inquiry as to the signification of *ŏniyyôth Taršîš* (אניות תרשיש: EV 'ships of Tarshish') from that as to the meaning of תרשיש, where it stands alone, partly because most critics (*e.g.*, Stade, *GVI* 1 533, note) agree that 'Tarshish-ships' means 'ships of the largest dimensions,'[1] and partly because a close examination of the passages where the phrase אניות ת' occurs appears to show that the text is corrupt, 'ships' being, according to the text here adopted, nowhere referred to except in 1 K. 10 22 22 48 and 2 Ch. 9 21. Confining our attention in the first instance to these three passages, and more especially to those in Kings as primary, we are struck by the improbability of the language employed (as the text represents). In 1 K. 10 22 we have 'a navy of Tarshish with the navy of Hiram'; in 22 48, 'ships of T. to go to Ophir for gold.' If we knew nothing about a place supposed to have been called Tarshish, should we not suppose that תרשיש represented something connected with naval architecture or management? Should this consideration seem to warrant emendation, no better one presents itself, perhaps, than מָשׁוֹט (Ezek. 27 29)—*i.e.*, the phrase 'ships of Tarshish' means, not our 'East-Indiamen,' but 'galleys with oars.' In Is. 33 21 we actually find almost the very phrase here taken as the original of א' ת', viz., אֳנִי שַׁיִט (EV 'galley with oars').

7. The N. Arabian Asshur?

Turning to the remaining passages in which the phrase 'ships of T.' is supposed to occur, we are struck by finding that here too there is frequently the appearance of corruption. In the passage which, if correctly read, is the earliest authority for this phrase (Is. 2 16), we cannot possibly avoid reading, at the end of the list of objects 'high and lifted up,' in lieu of 'ships of T.,' 'palaces of Asshur' (∥ 'dwellings of Jerahmeel'[2]); cp Am. 3 9, where, as Winckler has already seen,[3] 'Ashdod' should be 'Asshur.' Similarly in Ezek. 27 25 Is. 60 9 and Ps. 48 8, 'ships of Tarshish' should probably be 'tribes (אֻמּוֹת) of Asshur'. In all the other passages where this word occurs (the harmonising must be due to an early editor), תרשיש (Tarshish) should probably be emended into אַשְׁחוּר (Ashḥur) or אַשּׁוּר (Asshur); an interesting proof of this is suggested by Ezek. 38 13.[4] By 'Asshur' is meant, of course, not the famous rival of Babylonia, but a N. Arabian district of somewhat uncertain extent, also known perhaps as Geshur (see GESHUR, 2). That the Chronicler in the third century B.C. read תרשיש, and supposed it to be a comparatively distant maritime region, is no obstacle to the theory here maintained, whilst an objection drawn from Gen. 10 4 (Tarshish, a son of Javan) would imply that we possessed the Table of Nations in its original form (see TIRAS, § 2). See *Crit. Bib.*

F. B., § 1 *f.*; T. K. C., §§ 3-7.

[1] See, however, Benzinger's note on 1 K. 10 22.

[2] The Jerahmeelites also appear to be referred to in Is. 2 20 (see MOLE).

[3] *Alttest. Unt.* 185, where, however, Winckler supposes a reference to Assyria.

[4] We there find שְׁבָא וּדְדָן וְסֹחֲרֵי תַרְשִׁישׁ, where סחרי almost certainly represents אשחור, and at once suggests that the following word תר' (which has no ו) is a corrupt dittogram of the same N. Arabian name. Certainly 'Tartessus' does not suit at all.

TARSHISH (תַּרְשִׁישׁ). 1. One of the 'seven (?) princes' at the court of Ahasuerus (Esth. 1 14 MT). On the σαρσαθαῖος (σαρέσθεος) of 𝔊^{BℵAL β}, see SHETHAR. If the underlying story of the Jewish deliverance is N. Arabian (see PURIM, 3), 'Tarshish' probably comes from 'Asshur' or Ashḥur. See TARSHISH (above), and cp SHETHAR-BOZNAI.

2. b. Bilhan, of BENJAMIN (§ 9, ii. [*a*]), 1 Ch. 7 10 (ραμεσσαι [B], θαρσεις [AL]). Here, at any rate, 'Asshur' or Ashḥur is the underlying original.

'JEDIAEL,' the branch of Benjamin to which 'Bilhan' belongs, certainly comes from 'Jeraḥmeel'; so also probably does 'Bilhan' itself. Of Bilhan's sons, Je'ush (son of Aholibamah = Jeraḥmeel, Gen. 36 5) comes from 'Ishmael,' 'Benjamin' from 'Ben-jeraḥmeel,' EHUD (probably) from אבחר = בחרים (Baḥurim) = ירחמאל, 'Chena'anah' from 'Cheniah' (cp Coniah) = קיני ('Kenite'), 'Zethan' from Ṣarephath and 'Ahishahar' from 'Ashḥur' (see SHEHARIAH).[1] It will be understood that the ethnics may early have become corrupted, and that the corruptions may soon have attained an independent existence, and have become further corrupted. T. K. C.

TARSHISH, STONE OF (אֶבֶן תַּרְשִׁישׁ), Ezek. 10 9, RVmg. The text of EV has here 'the appearance of the wheels was as the colour (עַיִן) of a beryl stone'; the mg. gives a needful warning (cp TOPAZ) against trusting this too implicitly. More commonly, however, 'stone' (*ĕben*) is omitted, and the stone referred to is simply called in MT 'tarshish,' in EV 'beryl.' Thus in Ezek. 1 16 (nearly = 10 9*b*) EV has 'like unto the colour of a beryl' (כְּעֵין תַּרְשִׁישׁ), and in Cant. 5 14, 'set with beryl' (מְמֻלָּאִים בַּתַּרְשִׁישׁ). 'Beryl,' however, lacks justification (see BERYL), and in Cant. *l.c.* RVmg. suggests 'topaz' (see TOPAZ, end), whilst in Ezek. 28 13 AVmg. offers us 'chrysolite,' thus, as it were, connecting the Old and the New Testaments (see Rev. 21 20).

1. Occurrences.

'Chrysolite' rests on the authority of 𝔊, which, supported by Jos. (*Ant.* iii. 7 5 *BJ* v. 5 7), Aq. Ezek. 1 16 10 9 Dan. 10 6, and Vg. (except Ezek. 1 16 Cant. 5 14), thrice (Ex. 28 20 39 13 [36 20] Ezek. 28 13) renders תרשיש by χρυσόλιθος(ν). It should be added, however, that in Ezek. 10 9 𝔊 gives λίθος ἄνθρακος (אבן ת'), and that in Ezek. 1 16 Cant. 5 14 it is content to transliterate θαρσεις (cp Symm., Theod. Dan. 10 6 and Theod. Ezek. 10 9); also that Symm. in Ex. 28 20 Ezek. 1 16 10 9 Cant. 5 14 gives ὑάκινθος (cp Vg. Cant. 5 14, and see JACINTH); and that 𝔊 in Dan. 10 6 gives θάλασσα (cp Vg. Ezek. 1 15, and see TARSHISH).

The modern chrysolite is, of course, excluded. There remain the 'hyacinthus'—*i.e.*, the sapphire of the moderns (see JACINTH)—and the topaz, which Pliny's description of the chrysolite as 'aureo fulgore tralucens' (*HN* 37 42 *f.*) has led some (*HWB*(2), 334*b*, Del., Kraetzschmar) to identify with the chrysolite of the ancients (see, however, CHRYSOLITE). For the hyacinthus no plausible case can be made out. The chrysolite or topaz (?) has found some favour because Pliny speaks of a large chrysolite from Spain, and Tarshish is generally placed in southern Spain. But Pliny also states that chrysolites were found in Arabia, and it seems likely (1) that the Hebrews would have obtained precious stones chiefly from Arabia, and consequently (2) that if the name of the stone under consideration were derived from a country, the country would be some part of Arabia. Luther's identification of 'tarshish' with the turquoise would therefore be plausible if the name 'tarshish' could be traced to some ancient name of the Wady Maghâra in the Sinaitic Peninsula, where the turquoise-mines were worked. But the mere similarity of names is of course valueless, and the Sinaitic turquoises so quickly lose their colour[2] that they can hardly have been much in requisition. We must, therefore, look farther for a clue to the meaning of 'tarshish.'

2. Identifications.

Let us then, as we have done already in the case of the

[1] Cp 1 S. 6 19, where the original of 𝔊's text (note [οἱ] υἱοὶ Ἰεχονίου) must have run, וַיִּחַר אַף לִבְנֵי הַקֵּינִי בְּאַנְשֵׁי בֵּית כּוּשָׁם, 'and the Kenites were angry with the men of Beth-cusham. Cp SHIMSHAI.

[2] Ebers, *Durch Gosen*, 137.

TARSUS

פִּטְדָה, *piṭdāh* (see TOPAZ), turn to the Assyrian lexicon.

3. The Assyrian êlmêšu? It is well known that to the Assyrians the precious stone *par excellence* was that called *êlmêšu* (etymologically identical with Heb. *ḥallāmiš;* see FLINT), which is hardly the diamond (Del. *Prol.* 85; *Ass. HWB s.v.*), but may perhaps be the white sapphire.

Here are two Assyrian passages given by Delitzsch in which the name occurs: 'Like a ring of êlmêšu may I be precious in thine eyes,' and 'a carriage whose wheels were of gold and êlmêšu' (cp Ezek. 1 16). It is, at any rate, possible that the 'tarshish-stone' should rather be the 'ḥalmiš-stone,'[1] and that the inferred Hebrew form חַלְמִישׁ (Ass. *êlmêšu*) is equivalent to the attested form *ḥašmal* in Ezek. 1 4 27 8 2 (cp AMBER, § 1).

Probably enough the ḥalmiš-stone is referred to again in Job 28 18*a*, where *rāmōth wĕ-gābīš* (ראמות וגביש) should perhaps be חלמִישׁ וארמ[י],[2] and in *v.* 19, where חלמיש should be read for כוש (see TOPAZ).

There is also, however, the possibility that [אבן] תרשיש or 'Tarshish [stone],' is a corruption of אֶבֶן אַשּׁוּרִית, 'Asshurite stone' or א' אַשְׁחוּר 'stone of Ashḥur' (cp TARSHISH, § 7). T. K. C.

TARSUS (ταρсοс, Acts 9 30 11 25 22 3; Ethnic, ταρсεγс, 2 Macc. 4 30 Acts 9 11 21 39).

Ταρσός (Attic, ταρρός) = 'wing,' or 'feather.' The town was said to have derived its name from a feather which fell from the wing of Pegasus (cp Juv. *Sat.* 3 118); but that was a legend based upon an etymological fancy. It is the תרז of late coins (with Aramaic inscriptions), and is mentioned under the name Tarzi by Shalmaneser (Black Obelisk Inscr. *l.* 138; Scheil, *RP*(2), 447; Wi. *GBA*, 196, 256) in the ninth century. For stories of its origin, see Ammianus, xiv. 8 3, and Strabo, 673, and on the name cp Jensen, *Hittiter u. Armenier* 1898, pp. 62 *f.*, 160 *ff.* [The Heracles of Tarsus was the Cilician god Sandan. Dio Chrys. calls him the ἀρχηγός of the Tarsians (2 23), and he may be identified with the Baal of Tarsus named on coins. He was worshipped by the periodical erection of 'a very fair pyre' (*ibid.*), a rite presumably analogous to that described in the *De Dea Syria*, ch. 49—WRS. See *RS*(2), 377, where Is. 30 33 is compared. On Sandan, WRS refers to K. O. Müller in *Rhein Mus.* 1829, and E. Meyer in *ZDMG*, 1877, pp. 736 *f.* On the identification, sometimes proposed, of Tarsus with Tarshish, see TARSHISH.]

1. Site and history. Tarsus the chief town of CILICIA [*q.v.*] was situated on the right bank of the ancient Cydnus in the wide and fertile plain between Mt. Taurus and the sea, thus commanding the passes leading from Cilicia into Lycaonia or Cappadocia. Almost necessarily also the route through Mt. Amanus into Syria involved passage by Tarsus. The city thus at an early date attained importance. Xenophon (who uses the plural form, Ταρσοί)[3] speaks of it, in 401 B.C., as a great and prosperous city (πόλιν μεγάλην καὶ εὐδαίμονα), the residence of Syennesis the king of Cilicia (*Anab.* 1 2 23). In the time of Alexander the Great it was the residence of a Persian satrap, who fled on his approach, so that the city surrendered without resistance. Alexander nearly died here from a fever aggravated by bathing in the icy waters of the Cydnus (Arrian, *Anab.* 2 4; cp Paus. viii. 28 3). After Alexander's death Tarsus usually belonged to the Syrian empire, and under the Seleucid kings Antiochus VII. to Antiochus IX. was one of the royal mints. For a short time under Antiochus IV. (175-164 B.C.) it bore the name 'Antioch on the Cydnus' (Ἀντιόχεια πρὸς τῷ Κύδνῳ; *Antiochia ad Cydnum*) as we find from the coins (see Head, *Hist. Numm.* 612 *f.*). For a time it was in the possession of the Ptolemies.

Coming down to Roman times, we find that in the Civil War Tarsus took the side of Cæsar, though it was to Pompeius that she owed her liberation from the sway of eastern rulers. Cæsar in consequence honoured the city with a visit, and its name was changed to Juliopolis (Cæs. *Bell. Alex.* 66; cp Dio Cass. 47 26). For this attachment Cassius ordered it to be plundered; but, on the other hand, Antonius rewarded it with municipal freedom and exemption from taxes (*i.e.*, it became a *civitas libera et immunis*). But none the less it was the seat of a *conventus*—*i.e.*, periodical assizes (cp Acts 19 38) were held within it by the Roman governor (Cic. *Ep. ad Att.* v. 16 4, etc.), though in strict theory a 'free city' was outside the province and the governor's jurisdiction (see further, with reference to Tarsus, Philostr. *V. Apoll.* 1 12, ἐν Ταρσοῖς δὲ ἄρα ἀγορὰν ἦγεν; and Momms.-Marq. *Röm. Staatsverw.* 1 80 n. 3).[1] Like Thessalonica, the legal position of which was similar, Tarsus was the headquarters of the Roman governor.

The freedom (*libertas*, αὐτονομία) or self-government which Tarsus enjoyed is expressly attributed to Antonius (App. *Bell. Civ.* 5 7). It was at Tarsus that Antonius received Cleopatra in 38 B.C. when she sailed up the Cydnus in the character of Aphrodite (Plut. *Ant.* 25 *f.*). But others attribute the status to the bounty of Augustus (Lucian, *Macrob.* 21; cp Dio Chrysos. 2 36 R, κἀκεῖνος [*i.e.*, Augustus] ὑμῖν παρέσχε χώραν νόμους τιμὴν ἐξουσίαν τοῦ ποταμοῦ τῆς θαλάσσης τῆς καθ' αὐτούς, thus summing up municipal independence, freedom from taxation and control of internal sources of revenue). Probably Augustus confirmed in this respect the action of his rival. Note that it by no means followed that Paul's possession of *Roman* citizenship (Acts 22 28) was a consequence of the autonomy enjoyed by Tarsus. The citizenship of Tarsus possessed by all Tarsians who came within the prescribed conditions, could never carry with it *Roman* citizenship (cp Ramsay, *St. Paul the Traveller*, 30 *f.*).

2. NT references. It is not easy to estimate the influence exerted upon the intellectual life of Paul by the peculiar surroundings and circumstances in which he was placed at Tarsus. Tarsus was indeed renowned as a place of education under the early Empire. Strabo (673) even ranks Tarsus above the other two great 'University cities' of his time for love of learning. It was the home of eminent Stoics, like Athenodorus the tutor of Augustus, and Nestor, who taught Tiberius (Strabo, 674). A remarkable feature was that this zeal for learning was not an extraneous characteristic, but was due to natives of the city itself (Strabo, *l.c.*), so that Tarsus rather sent teachers to the rest of the world, then received students therefrom. It would doubtless be very satisfactory to have been able to trace in Paul's writings (as, *e.g.*, in the case of the writer of Lk. and Acts) some tinge of Hellenic culture, some echo from the lecture-rooms of Tarsus; but the attempt must be abandoned. The three references to Hellenic literature (Acts 17 28 1 Cor. 15 32 Tit. 1 12) by no means bear out this imagination, but are merely floating sentiments of a popular character. Passages like 1 Cor. 1 20 or Col. 2 8 would hardly favour the probability of finding a tinge of classical culture or philosophy in Paul. Even the speech in Athens, if its historicity is to be accepted as beyond dispute, cannot on an unbiassed view be made to support the somewhat extravagant claims made on Paul's behalf by some modern commentators. Seeing that Paul's teacher Gamaliel was inclined to encourage Greek studies, the fact that so little trace of such can be found in Paul is itself an argument against attaching undue weight to the Hellenic influences which surrounded his early life[2] (see ATHENS).

This verdict, on the other hand, by no means implies the denial of the formative influences of Tarsian life upon Paul. In a city which was in contact, both in the philosophic schools and in its harbour, with both the eastern and the western world; which entered intimately into the general life of the Roman provincial organisation to which it belonged, but also retained the vestiges of that vigorous municipal life which was so characteristically Greek—in such a town Paul could not fail to gain that

[1] *I.e.*, ח and ת, ל and ר, ם and ש (cp old Hebrew script) have been confounded.

[2] So, at least, if ת in ראמות represents ל in חלמיש. Otherwise ראמות may spring from ראמי, which became first ראמו and then ראמו׳ (with stroke of abbreviation). There is no inducement to make ראמות come from רעמתי (the 'Ra'amathite stone').

[3] Pausanias calls it Ταρσεῖς. Other forms are Τερσός, or Θαρσός.

[1] On the constitution of Tarsus under the Romans, see the details given in Dio Chrysos. 2 43 R.

[2] [WRS, *EB*(9), 23 67 *b*, presumes that Paul 'formed no higher opinion of the culture of Tarsus than did his contemporary Apollonius of Tyana, whose testimony as to the character of the citizens (*Vit. Ap.* 1 7) is confirmed by Dio Chrysostom.' He thinks that 'sensuous Eastern religion had more attraction for the inhabitants than the grave philosophy of the Porch.']

familiarity with cosmopolitan ideas, that knowledge of the working of complex organisations, and that grasp of Roman ideas and methods, which runs through his life and work. In short, it is the Roman, rather than the Greek, that we find in Paul.

After his conversion, Tarsus became once more Paul's home when he was obliged to quit Jerusalem (Acts 9 30). Here he remained until brought by Barnabas to Antioch (Acts 11 25). This period of residence and preaching in Tarsus and other Cilician towns (cp Gal. 1 21) extended over several years. Doubtless Tarsus was again visited on the second missionary tour (Acts 15 41); for the Roman road ran from Tarsus through the 'Cilician Gates,' in Mt. Taurus, giving access to Lycaonia (cp Acts 16 1). Similarly, on the third missionary tour, Acts 18 23 conceals a visit to Tarsus, on which occasion, so far as the record goes, Paul looked for the last time upon the busy quays and market-squares of his native town.

Tarsus is now *Tersus*. The ruins of the old town are concealed 15 or 20 feet deep in the silt of the river and no systematic excavation has yet been made. See Murray's *Hdbk. to AM* 184 *f.* The chief coin-type resembles that of Antioch, being the Tyche of Tarsus seated, with the river Cydnus swimming at her feet. The imperial coinage shows great variety of subject. Among the titles are Μητρόπολις, Ἐλευθέρα, Νεώκορος, and Πρώτη μεγίστη καλλίστη γράμματι βουλῆς. W. J. W.

TARTAK (תַּרְתָּק; θαρθακ [BAL]), the god of the people of Avvah (imported into Samaria), 2 K. 17 31. Perhaps Tartaḫu, the 'lance-star' of the Babylonians (cp תרתח, 'lance,' Job 41 21; MT תותח), identified by Jensen[1] with Antares, and by Hommel[2] with Procyon, and regarded by the Babylonians as the star of the god Ninib. By a textual error[3] תרתק became נבחז, or (perhaps better, see NIBHAZ) נבחן, and by another error, similar to that which has duplicated the deity of Sepharvaim, made its way into the text, and was even in one form of the text (see 𝔊[L])[4] assigned to the people of the imaginary city of HENA [*q.v.*] in order to leave Nibhaz for the Avvites.

If, however (cp SUCCOTH-BENOTH), the colonists of שמרון, Shimron, came from the non-Israelite Negeb, both Nibhaz (Nibharu?) may be a corruption of Jerahmeel and Tartak of Terah (a distorted form of Jerah = Jerahmeel (see *Crit. Bib.*). T. K. C.

TARTAN (תַּרְתָּן; in 2 K. θανθαν [B], θαρθ. [A], τανθ. [L]; in Is. τανaθαν [Bℵ[c. a, d. a, al] Q*], ναθαν [ℵ*A], θαρθᾶ [Q[mg.]]; *Tharthan*) is an exact reading of the familiar Assyrian title, *tartânu*, *turtânu*, *tartan*, which occurs in 2 K. 18 17, and Is. 20 1.

In Assyrian historical times, the Tartan was the commander-in-chief of the army, and ranked next to the king. The office seems to have been duplicated, and there was a *tartânu imni* or 'tartan of the right,' as well as a *tartânu šumêli* or 'tartan of the left.' In later times the title became territorial; we read of a tartan of Ḳummuḫ, or Commagene. The title is also applied to the commanders of foreign armies; thus Sargon speaks of the Tartan Muṣurai, or Egyptian Tartan. The Tartan of 720 B.C. was probably called Ašur-iska-danin; in 694 B.C., Abda', and in 686 B.C. Bêl-êmurâni, held the title. It does not seem to have been in use among the Babylonians. C. H. W. J.

TARTARUS, a term for 'hell' (so EV text) in RV[mg.] of 2 Pet. 2 4. The Greek, however, has ταρταρώσας = εἰς Τάρταρον ῥίψας. Sextus Empiricus (about 200 A.D.), speaking of the expulsion of Kronos by Zeus, has κατεταρτάρωσε.

Τάρταρος occurs twice in Job, viz. (*a*) in 40 15 [20], where, however, τετράποσιν ἐν τῷ ταρτάρῳ must be an error for τετ. ἐν τῷ ἀγρῷ (so Grabe, ap. Schleusner), the initial ταρ being dittographic, and τ (T) miswritten for γ (Γ), and (*b*), in 41 23 [24], where τὸν δὲ τάρταρον τῆς ἀβύσσου may represent קרקע תהום 'the bottom of the abyss' (see OINTMENT, 3, with n. 1).

[1] *Kosmol.* 49 *ff.*; cp 150 53.
[2] *Exp. T* 9 331; *GBA* 666.
[3] The error may have been partly due to a reminiscence of Nergal (נרגל); נבחז springs out of נרחז.
[4] καὶ ἄνδρες αιωνειμ ἐποίησαν τὴν θαρθακ καὶ οἱ ευαῖοι ἐποίησαν τὴν εβλαιεζερ.

Upon Job 41 23 [24], among other passages, is based the theory that BEHEMOTH AND LEVIATHAN [*q.v.*] belong primarily to mythological zoology. Leviathan is in fact a reflection of Tiâmat, the chaos-dragon (cp DRAGON, § 7), and, according to one form of the creation-myth, was cast into the abyss under ward. But Tartaros was not properly a watery abyss; it had, according to the Greek myth, 'a gate of brass and a threshold of bronze.' The essential parts of the conception are depth of situation and (of course) darkness. Tartaros was 'as far beneath Hades as heaven is high above the earth' (*Il.* 8 13 *ff.*; cp Hes. *Theog.* 807), and the Titans are even described as 'below Tartaros' (τοὺς ὑποταρταρίους), *Il.* 14 279. Analogous to the fate of Kronos and the Titans was the fate of the fallen angels, who, according to 2 Pet. 2 4, were 'committed to pits of darkness' (σιροῖς ζόφου[1]), having been 'hurled into Tartaros.' The allusion may be to the passage on the punishment of AZAZEL [*q.v.*] in Enoch 10, where the vigorous Greek version (Syncellus) gives, ἔμβαλε αὐτὸν εἰς τὸ σκότος . . . καὶ ἐπικάλυψον αὐτῷ σκότος. For a more remote parallel see Rev. 20 2. See ABYSS; ESCHATOLOGY, § 89. T. K. C., § 5.

TASK, TASKMASTER, TASKWORK. See TAXATION, § 5.

TASSELS (צִיצִת), Nu. 15 38 RV[mg.], EV FRINGES.

TATAM (τατaμ [BL], -μι [A]), Josh. 15 59, 𝔊 Between KULON and SORES.

TATNAI, or rather (RV) **TATTENAI** (תַּתְּנַי; τανθαναιος [L]; Ezra 5 3 θανaναι [B], θαθθ. [A], 5 6 θανθανας [B], θαθθανας [A], 6 6 Δωσετε [BA]; *v.* 13, τανθαναι [B], θαθθαναι [A]), the 'governor of the region beyond the river' (see GOVERNMENT, § 25, Ezra 5 3 6 6), called in 1 Esd. SISINNES (*q.v.*). We shall assume here that the present form of the text is original (see, however, *Crit. Bib.*, where this and other names are disputed). According to Meissner (*ZATW*, 1897, p. 191 *f.*), this Persian official is mentioned in neo-Babylonian contracts. Here, in texts of the first and third years of the reign of Darius, is mentioned a certain Uš-ta-an-ni or Uš-ta-nu, satrap of Babylon and Syria. The dates agree, and also the titles (פחת עבר נהרא, *piḫat ebir nāri*). The name corresponds to old Pers. Vištana, and appears in a Greek form as Βισθάνης (Arr. iii. 19 4), Ἱστάνης (Arr. vii. 6 4), and Ὑστάνης (Herod. 7 77). On the other hand, it is a much easier transition to תתני from old Pers. Thithina (a form assumed by Marq. *Fund.* 52, and E. Meyer, *Entst. des. Jud.* 32) than from old Pers. Vištana, for we have, on Meissner's hypothesis, to suppose that תתני was corrupted from ושתני. According to Arrian, however (vii. 6 4), there were two contemporary persons named respectively Sisines and Histanes. May not the document from which the name of the Syrian satrap in Ezra and Nehemiah is derived have confounded the two names? As to the historicity of what is told us of Tattenai and Shetharbozenai, we must draw a distinction between the narrative and the inserted documents on which the narrative is supposed to be based. According to Wellhausen (*GGA* 1897, no. 2), the official correspondence is but an invention for dramatic effect. Sisines (Tatnai), for instance, attempted to get the building of the temple interrupted, and failed. But the Jewish writers had no access to official archives. The same view is taken by Kosters (*Herstel*, 29). Marquart, however (*Fund.* 49), thinks that the 'kernel' of the decree of Darius may be genuine, whilst Meyer (*Entst. des Jud.* 41-53) maintains that the documents are almost entirely genuine, and the narrative therefore in the highest

[1] Cp Jude 6, ὑπὸ ζόφον, 'under darkness' (cp Enoch 10 5, above). The reading σειραῖς ('chains') is not accepted by editors (see *Var. Bible*), though both Jude 6 and the foundation-passage in Enoch speak of bonds.

degree trustworthy. The only passage in the documents to which this scholar takes exception is Ezra 6 12*a*, which is certainly not the language appropriate to an imperial decree. This criticism seems hardly keen enough. Even the name Sisines, on which Meyer relies so much, is very doubtful, and Kosters' and Wellhausen's criticisms are not altogether baseless. Cp EZRA-NEHEMIAH, § 6. T. K. C.

TAXATION[1] AND TRIBUTE

The modern sheikh (§ 1).	Tithe (§ 9 *f.*).
Religious dues (§ 2).	Firstlings (§§ 11-13).
Monarchical idea (§ 3).	Levitical cities (§ 14).
Political taxation (§§ 4-7).	Expenses of worship (§ 15).
Sanctuary dues (§ 8).	Priests' revenue (§§ 16-18).

1. The modern sheikh. The nomads of the Arabian desert know nothing of tax or tribute, either to their sheikhs or to Allah; so far indeed from finding a source of revenue in their people, the sheikhs are under obligation to spend their own private fortune for the public good. It is expected of a sheikh that he entertain strangers and visitors better and more sumptuously than an ordinary member of the tribe possibly can; his duty is to support the poor and to share what he has with his friends (Burckhardt, *Notes on the Bedouins*, 1830). Often enough it happens that, even with a rich sheikh, this ends in poverty; but a reckless hospitality always brings high repute. The means for such hospitality have to be found in war and pillage. The Syrian towns and villages on the borders of the settled land have to pay their regular 'brotherhood' (*ḫuwwe*) to the Bedouins. By ancient custom a special share of the booty taken in war falls to the commander; he has the first choice, and in old Arabia was entitled to a fourth of the whole. In ancient Israel the practice was similar. The only due, if we may so call it, falling to the chief is a larger share of the spoil; Gideon, for example, receives the golden 'crescents' of the Midianites (Judg. 8 24; cp 5 30). David sends his share in the spoil (*šālāl*, שָׁלָל, τῶν σκύλων[2]) from the Amalekite raid in presents to his friends in Judah (1 S. 30 26 *f.*).

2. Religious dues. The offerings also which were presented to the god did not originally come under the category of dues which were demanded and had to be paid. When a beast from the flock or herd was slaughtered, there was no question of a definite tax or tribute; it was a case of voluntary giving. Indeed in the most ancient Semitic ritual the notion of giving to a deity at all has no place, or at best only a very subordinate one; the root-idea being that the blood poured out and the sacrificial meal are fitted to renew and strengthen sacramentally the mystic bond in which the deity and his worshippers are united (on this subject cp SACRIFICE).

A solitary exception would seem to be found in the paschal offering. Following Wellhausen (*Prol.*(4)) and Robertson Smith (*Rel. Sem.*(2), 463 *f.*), most recent scholars explain it as an offering of the firstborn of the flock. If this be right, its character as a due payable to the deity can hardly be denied; and it is certain that the paschal offering was, in the later period at least, so regarded. Robertson Smith, indeed (*loc. cit.*), seeks the original explanation of this sacrifice of firstlings in another region of thought; the exact parallel to the sacrifice of the firstlings of cattle he finds, not in the yearly offering of the first-fruits of the field generally, but in the law of Lev. 19 23 *ff.*, according to which the fruits of a newly planted field for the first three years may not be eaten. 'The characteristic feature of this ordinance, from which its original meaning must be deduced, is the taboo on the produce of the first three years, not the offering at the temple paid in the fourth year.' This same conception of a taboo is what he finds underlying the sacrifice of the firstlings of the flock. That which is taboo has supernatural attributes which forbid its being appropriated to common uses. This character of taboo attached, he thinks, in the oldest times, in a certain measure to all domestic animals, and naturally therefore in an intensified degree to the firstborn. It is, however, hardly necessary to have recourse to this line of explanation. Certainly no other instance of an offering of firstlings besides the passover can be adduced for the earliest Hebrew period before the settlement in Canaan. And the passover itself, as is shown in more detail elsewhere (FEASTS, § 2, PASSOVER, §§ 9-11) was not originally, or before the settlement, a sacrifice of the firstborn. The passover ritual points clearly to the contrary, and shows that under this sacrifice lay the same fundamental ideas as under all the other sacrifices, namely, that the blood of the victim was to renew the communion with the deity, and thereby, in this particular instance, be a powerful protective against pestilence and the like. It was only in the course of the subsequent development that the passover was brought into connection with the sacrifice of the firstborn, or sought to be explained as such.

As already said, the sacrifice of the firstborn cannot be proved, in the Hebrew domain, for the oldest period; all the probabilities point rather to the other conclusion—that it was a secondary development; out of the custom of offering the first-fruits of the field arose the other of offering those of the flock and of the herd, and here accordingly we have only the extension to animals and men of the deity's original claim to be presented annually with the first-fruits of the field.

The entire conception of sacrifice as being a tribute due to God is in Hebrew religion subsequent to the settlement in Palestine, and on internal evidence must be regarded as impossible in the earlier time, for it had its origin in the complete revolution in the idea of God which followed upon the settlement. The tribal and national god became thereby a territorial god, and thus came into the position which the Canaanites had assigned to their Baal; he himself became the 'baal,' that is, 'lord' of the land,—in the sense, especially, that he was lord of the soil, and that the produce of the soil was regarded as his gift (see BAAL). This whole view of the deity as the bestower of all the gifts of nature is, it is obvious, possible only for an agricultural people. As soon as this view had become the prevailing one, however, the next step was exceedingly simple, nay, it was inevitable; thanks were offered to the deity for the gifts of the soil, and he was acknowledged as the giver by having the firstlings and the best of the fruits of the earth returned to him in sacrifice. The Canaanites had already come to this view of their offerings, and the Israelites took it over from them, as we see very specially in their adoption of the originally Canaanite yearly festivals. All these festivals are agricultural in character: they are intimately associated with harvest, and the idea they express is that the harvest is sanctified by the festal offering.

3. Monarchical idea. In the further development in Israel a new thought came to be added. Once the monarchy had become established, the monarchical idea was applied to Yahwè also, and he was thought of as the supreme king of his people (cp MESSIAH, MOLECH). But among the rights of kings one of the first was that of levying tax and tribute; and, as we shall see later, it was exercised very

1 The verb *he'ĕrīk* (הֶעֱרִיךְ) is rendered 'tax' in 2 K. 23 35 EV; in Lev. 27 8 12 'value,' and 27 14 'estimate.' The subst. *'ērek* (עֵרֶךְ) is 'taxation' in 2 K. 23 35; it occurs frequently in P (Lev. 27 3 Nu. 18 18, etc.), where RV regularly has 'estimation.' For the 'raiser of taxes,' Dan. 11 20, *nōgēś* (נֹגֵשׂ), cp EXACTOR.

On the 'taxing, RV 'enrolment' (ἀπογραφή), of Lk. 2 2 Acts 5 37, cp QUIRINIUS, JUDAS, 10. The verb ἀπογράφεσθαι occurs in Lk. 2 1 3 5 Heb. 12 23; ἀπογράφειν in 1 Esd. 8 30 (𝔊L, in 𝔊BA ἀπὸ γραφῆς, see Swete).

2 *šālāl* is also προνομή, *e.g.*, in Nu. 31 32, and ἁρπαγή [BℵA] in Is. 10 2. For other terms used see SPOIL.

TAXATION AND TRIBUTE

early (David, Solomon); cp GOVERNMENT, § 19. A main duty of subjects was and is the payment of the king's dues; this principle was applied to the deity and to his worship in sacrifice, as soon as he came to be regarded as the king of his people. How nearly related are the two things—secular taxation and sacred tribute—is instructively shown by the instance quoted by Robertson Smith (*Rel. Sem.*(2), 246); at Tyre tithes were paid to Melkarth as 'king of the city.' The same thing is seen in the motives assigned for sacrifice by the later Hebrews. The offerings brought voluntarily to the altar are regarded as a tribute to the deity on quite the same footing as the presents voluntarily brought to an earthly king. To the sacrifices offered during the Hebrew monarchy equally apply the words of Homer:

δῶρα θεοὺς πείθει, δῶρ' αἰδοίους βασιλῆας.

One does not come into the king's presence empty-handed (Judg. 3 17 *f.* 1 S. 10 27), but, if one has aught to ask, brings a gift of homage; so, in like manner, when one 'seeks the face' of God (Mal. 1 8). Precisely similar is the ancient Greek conception of sacrifice as being the tribute and homage due to the divinity on whom a man is dependent (Nägelsbach, *Homerische Theologie*, 186). In the last resort, the offering comes to be expressly called 'a gift' to the deity; *minḥah* (Gen. 4 3 *f.* 1 S. 2 17, and often) or *ḳorbān*.

Such in general is the course of the development. As to the development in detail of taxation and tribute

4. Political taxation: Saul.

as political institutions the deficiency of our sources leaves us very much in the dark. Under Saul we hear nothing of special dues levied by him; he had no capital and no special court, but lived on his ancestral holding at Gibeah. Nor had he any state officials to govern the land under his orders and receive their pay from him. We may take it for granted as self-evident that, in accordance with ancient custom, he claimed and received his special share of the spoils of war, as we are expressly told that David at a later time did (2 S. 8 11 12 30). We hear of gifts of homage, as, for example, when he was elected to be king (1 S. 10 27), or when his favour was specially sought (1 S. 16 20). It is easily conceivable that this source of income, added to the revenue derived from his property at Gibeah, may have been amply sufficient for the modest requirements of his throne. At any rate, it is not safe to draw from what is said in 1 S. 17 25 strict inferences as to the existence of certain specified exactions in Saul's day. The passage promises freedom from taxation to the slayer of the giant and to his house, thus presupposing the existence of fixed taxes. But this is evidence only for the much later period of the author, or editor, to whom it appeared self-evident that such must have arisen as soon as a monarchy had come into being. The same observation applies to the so-called 'manner' or constitution of the monarchy as set forth to the people by Samuel (1 S. 8 10 *ff.*, esp. *v.* 15), where also taxes, and, in particular, tithes of the field and the vineyard are mentioned.

Under David, and still more under Solomon, we see the system growing. Under David, in addition to

5. David, Solomon.

the king's share of booty (2 S. 1 10 12 30), prominence is given to the tribute received from subjugated peoples (1 K. 5 1 [4 21] 2 K. 3 4), and the voluntary gifts of subjects still continued to come in (1 K. 10 25). We may, nevertheless, conjecture with some degree of probability that David's numbering of the people (2 S. 24 1 *f.*) was connected with the levying of taxes, and was intended to be used in regulating their incidence and the exaction of military service. The duties of the 'governors' (נְצִבִים, *nĕṣībīm*, EV 'garrisons,' 2 S. 8 14) also, whom he set over conquered territory, must essentially have consisted in the collection of tribute. We are expressly told, at all events, that this was the object of Solomon's division of the kingdom into districts. If the text (1 K. 4 7-19) is correct, it would seem that the king's own tribe (Judah) was exempt from dues and imposts (but see GOVERNMENT, § 19). However this may be, the purpose of the division is given with substantial correctness in the text as it stands (see special articles on the names of the 'officers'). The statement that each 'officer' (or 'prefect') had to provide victuals for the king and his household for a month in the year may owe its form to a desire to show the glory of Solomon's court; but in substance the narrative is undoubtedly correct: the chief object of the division into districts had reference to taxation, and in connection with this to the 'task work' or personal service which was exacted (1 K. 5 25). We also hear that Solomon levied toll on the caravans travelling by the trade-routes through the kingdom (1 K. 10 15). The complaint made by the people after his death leaves the impression that his system of taxes, besides being grievous in itself, was objected to as something new and unaccustomed.

We find hardly any other references to regular taxes in pre-exilic times; but the 'king's mowings' are men-

6. Later kings.

tioned in Am. 7 1 (see GOVERNMENT, § 19; MOWINGS; and, on the text, LOCUSTS). From the fact that in post-exilic times tithe appears from the first as an established institution, we may perhaps infer that it was of pre-exilic origin. The narrator of 1 S. 8 14 *f* regards it as an ancient institution. With this would harmonise the fact that Am. 4 4 knows of a tithe paid to the sanctuary. For the rest, in the ideal state as constructed by Ezekiel we find no such thing as taxes; the prince maintains his court and officers out of the revenue of the princely domains. He gives the princely domain to his officers in fief. This also is an arrangement which we may unhesitatingly presume to have existed in the earlier times (1 S. 8 12). A property-tax was imposed only for extraordinary emergencies, not regularly (2 K. 23 35). See GOVERNMENT, § 20.

In post-exilic times a heavy tribute was exacted, of course, by all the overlords of the country. Unfortu-

7. Post-exilic.

nately we are without information as to the nature of the taxes or how they were levied. On the latter point, however, it is practically self-evident that the Persian rulers, like the Syrian and Roman after them, availed themselves of the local Jewish administrations for assessment and collection. The land as such paid, doubtless, a definite composition as tribute. Moreover, when it had a governor of its own, the community had also to pay for his support, as well as make a contribution towards that of the resident Persian official in Samaria under whom it was placed. That these burdens were not trifling can be seen from such a passage as Neh. 5 14: the governor drew 40 shekels a day besides what the 'rulers' and their subordinates extorted from the people. If we find a Nehemiah in public discourse to the people characterising this as severely oppressive and taking merit and credit to himself for having drawn nothing from the people, but on the contrary, having met all charges out of his own private means, we may safely conclude that the pressure of these dues was not regarded as light.

Besides these direct taxes were the indirect ones levied by the Persian court: rents, customs, tolls, etc. (Ezra 4 13 20 7 24); unfortunately, we are very insufficiently informed as to the meaning of the various technical expressions here.[1]

Over and above these were the requirements of the internal administration, and even if these may on the

[1] [Of the three terms in Ezra 4 13 20 7 24 (Bibl. Aram.), *mindāh* (מִנְדָּה, AV 'toll,' RV 'tribute') is quite general, a tax for every one (Ass. *mandattu*), *bĕlō* (בְּלוֹ, AV 'tribute,' so RV 'custom'), lit. what is brought (Ass. *biltu* = √יבל), and *hălāk* (הֲלָךְ, AV 'custom'), a 'toll' (so RV) exacted of travellers. From the Ass., also, comes Aram. *maksa*, 'toll,' and *mākĕsā*, 'toll-gatherer' (publican).]

TAXATION AND TRIBUTE

whole have been relatively light, nevertheless the maintenance of the temple, of the sacrificial system, and of the priests and Levites, must have cost considerable sums. The voluntary gifts of worshippers were not enough, and soon (under Ezra; cp Neh. 10 33 *f.*) a fixed poll-tax, besides other payments in kind, had to be established (see below, § 15). On other accounts, also, heavy demands were from time to time made on the community, as, for example, for temple restoration and wall-building; in the latter connection also in the form of *corvée*, even if in both cases, as it would seem, the voluntary character of the service was formally retained.

The priests and Levites, and the whole personnel of the temple, were declared wholly exempt from taxation by decree of the king of Persia to Ezra (Ezra 7 24). On the rest of the people the burden of taxation pressed all the more heavily as the community, broadly speaking, was a poor one. Thus, in Nehemiah's time, the complaint was raised by many that in order to pay their taxes they had been compelled to borrow money and mortgage their property, thus coming into great straits (Neh. 5 4 *f.*).

Nor did matters improve after Alexander, in the days of the Seleucids and Ptolemies. The principal burden was the poll tax (Jos. *Ant.* xii. 4 1) of which we learn more particularly from (Ps.-) Aristotle (*Oeconom.* ii. 1 4) that in the Syrian kingdom, as distinguished from the Egyptian-Roman, it was, strictly speaking, a kind of trade-tax, a percentage that varied according to the nature of the work and the means of the individual, not a personal tax, uniform and unchanging.[1]

In addition to this there were now also other taxes, presumably indirect, which Josephus (*Ant.* xii. 3 3) refers to but does not name. A characteristic example of the manner in which new dues arose out of voluntary gifts is seen in the crown tax which grew out of the voluntary gift to the sovereign of a golden crown of honour. The priesthood of Jerusalem were exempted from all such dues and tribute from the time of Antiochus the Great (Jos. *Ant.* xii. 3 3).

The method of collecting was by farming to the highest bidder (Jos. *Ant.* xii. 4 1 *ff.* 5 1 Macc. 11 28 13 15) and, indeed, according to the same authority (*loc. cit.*), the taxes of each individual city were let from year to year. Elsewhere it appears that there were also farmers-general of taxes for the whole land (see below). This system was widely spread throughout the whole of antiquity, and was adopted also under the Roman Empire. Even at present it is in the Turkish Empire the usual method of raising certain dues. The advantages and disadvantages of the system can easily be seen in actual operation there. That it is the least favourable of all for the taxed needs no showing; at all times the farmers have known how to enrich themselves at the expense of the taxed, since any surplus naturally falls to them.

A classical instance, in fact, is one that comes to us from Judæa. A certain Joseph b. Tobia, who, it ought to be mentioned, had the reputation of being very lenient with his own countrymen, had acquired the taxing rights under Euergetes and Philopator by bidding twice as much as any other competitor, and paid the (for those times) enormous yearly sum of 16,000 talents, nevertheless accumulating vast wealth during his twenty-two years' tenure.

The question of immunity from taxes played a great part, naturally, from the Maccabæan period onwards, in all the dealings between the Jewish leaders and their Syrian overlords; it was more or less identical with the entire question of dependence or independence. Jonathan was able to secure immunity from Demetrius II. (1 Macc. 11 34-37; see ISRAEL, § 26), but this privilege does not seem to have been long maintained, for at a later date Simon had to demand it anew for all time to come (cp ISRAEL, § 78). We are unable to say, it must be added, how great a relief, if any, this meant for the subjects concerned. Fundamentally, it meant nothing more than a change in the taxing authority; the continued wars in any case were enormously costly.

When the country became tributary to the Romans (Jos. *Ant.* xiv. 4 4 *BJ* i. 7 6) they at once took in hand the system of taxation. Gabinius divided the country into five districts—probably taxation areas after their usual practice in subject provinces (Schürer, *GJV* (3), 1 340; cp ISRAEL, § 85)—in which the local authorities were at the same time the leviers of taxes. Here also Cæsar showed his friendly disposition towards the Jews by respecting the sabbatical year as regarded taxation. The Roman census and the Roman system of taxation as a whole do not seem, however, to have been introduced for some considerable time, the raising of the taxes being left in the hands of the native authorities. Herod the Great, at least, paid sometimes (whether always is doubtful) a definite tribute to the Romans, but as regarded the raising of this sum he could exercise independent authority as *rex socius*. Thus, he could remit taxes wholly or in part (Jos. *Ant.* xv. 10 4 xvi. 2 5 xvii. 2 1). We nowhere hear of a Roman tax during his reign (cp ISRAEL, § 87, end). The situation changed when, after the time of Herod and Archelaus, the land was administered by procurators; the Roman taxes, including the personal tax of the census, were now introduced. The new division of the land into eleven toparchies, like that formerly made by Gabinius (see above) doubtless had reference primarily to taxation. The procurators levied these taxes through native commissions. The indirect taxes were now also farmed to the publicans (see PUBLICAN). From the NT (Lk. 19 1 and elsewhere; cp Jos. *BJ* ii. 14 4) we learn that these were mostly Jews; intelligibly enough, they were not popular: in the NT 'publican' and 'sinner' are virtually synonymous (cp ISRAEL, § 90).

On the whole subject of Roman taxation see Schürer, *GJV* (3), 1 508 *ff.* and the copious literature there referred to; cp QUIRINIUS, § 2 *f.*

8. Sanctuary dues.

Sanctuary dues fall under two categories: (1) the regular offerings at the sanctuary prescribed by custom or by law; (2) the occasional gifts which the priests received for their services on each sacrificial occasion.

As for the first of these two classes, it has been already observed that in the old times no other dues were known beyond the offerings themselves, as also that it was only in a secondary way that the offerings assumed the character of dues. To this class of dues, in the strict sense of the word—that is to say, regular offerings definitely fixed by custom or law, as distinguished from free gifts presented on all or any of the various occasions of public or private life—belong the offerings of the first-fruits of the ground and of the firstlings of cattle. To both these Yahwè from an early date set up, so to say, a legal claim.

Even in the oldest decalogue (Ex. 34 26 J) it is made a legal injunction that the Israelites are to bring to Yahwè 'the best, the first-fruits of thy ground' (רֵאשִׁית בִּכּוּרֵי אַדְמָתְךָ, *πρωτογενήματα*).[1] The Book of the Covenant (Ex. 22 29 [28]) has the ordinance: 'thou shalt not delay (to offer) thine abundance and the best of thy winepress'; the exact meaning of the expression is doubtful,[2] but the idea of first-fruits is not directly con-

[1] It has been recently maintained by Willrich (*Judaica*, 1900, pp. 52-58) that under the Seleucids the poll-tax was still a thing unknown, that it was not introduced until the time of Augustus. As against this, see the evidence marshalled in Schürer, *GJV* (3), 1 229 *f.*

[1] *Bikkūrīm* being always a relative idea, it makes little material difference whether we translate 'the best, that is to say, the first-fruits of the ground,' or 'the best of the first-fruits of the ground.' Still, as in *v.* 22 (cp 23 16) the harvest festival is designated as the feast of first-fruits, the expression *bikkūrīm* ought, doubtless, to be taken as referring to the first-fruits that are offered and not to the first-fruits generally, and thus equivalent to *rēšîth*.

[2] On the meaning of מְלֵאָתְךָ וְדִמְעֲךָ see the commentaries. 𝔊 has **ἀπαρχὰς ἅλωνος καὶ ληνοῦ**, thus taking it to mean the first-fruits. Doubtless it was led to this rendering by the parallel clause: 'thy firstborn son shalt thou give unto me,' etc.

tained in the words themselves at any rate, and neither is the injunction in substance quite the same as that of the old decalogue. There only the first-fruits of the field are spoken of, whilst here, in all probability, oil and wine also are intended; there an offering to God at the harvest festival is intended, here no such fixed date is given. Most probably the two laws were intended to run concurrently; alongside of the precept to offer the first-fruits of the harvest at the harvest festival stood the other injunction not to be niggardly towards Yahwè with the fulness wherewith he had blessed floor and press.

Nothing is said as to the amounts of such offerings. Apart from the offerings definitely provided for in the ritual of the old feasts, it is clear that the amount of first-fruits to be offered was left to the free will of the individual offerer. In particular, JE has no hint that at that early date it was already the custom to give to God the tenth part of the produce. Not until D is this expressly laid down by law. As the taxes and tributes payable to the king were, throughout, of older date than those payable to the temple, so also the tithe was first of all exacted by the state, and not till afterwards took its place among the dues of the sanctuary.

Indeed, in the time of the old decalogue and of the book of the covenant there is as yet no word of dues at all in the strictest sense of the word, but only of definite offerings fixed by custom. Men offered the first-fruits to Yahwè in sacrifice, and in the sacrificial meal became Yahwè's guests. This custom is presupposed in D as still maintaining its ancient standing (see below). Accordingly we have not in D, as in later times, to do with a tax designed to fill the temple treasury, to defray the cost of the temple worship, and the like. The maintenance of the temple in Jerusalem, and of the regular worship there, was the king's affair; the priests derived their income from the offerings that were brought (see below, § 16), and thus there was no occasion for levying on behalf of the temple any regular dues over and above such voluntary offerings as might be made at the sanctuary (cp 2 K. 12 5 *ff.*). Further, in bringing his first-fruits the idea in the mind of the pious Israelite in early times was not at all that Yahwè had a claim to the fruits as being the giver of them; his action was dictated by the consideration that his whole harvest, and all the bread which he enjoyed from year to year, was pure and hallowed only if some part of it had been received by Yahwè. It is one of the heavy punishments with which the nation is threatened by Hosea, that in its exile Israel shall have only 'bread of mourners' to eat, bread that is unclean, inasmuch as no portion of it can be brought into the house of Yahwè (Hos. 9 4).

9. Tithe. The sanctuary tithe is first met with in Am. 4 4, which passage shows that in the northern kingdom it was customary, in the yearly pilgrimages to the sanctuary, in addition to the daily offering to bring tithes on the third day. The narrative of E, dating from somewhere about the same period, tells of Jacob's vow to pay the tithe at the sanctuary at Bethel (Gen. 28 22).

D makes it quite evident that the tithe intended simply means the first-fruits, of which the proportion, roughly speaking, of a tenth had been gradually fixed by custom. For in Deuteronomy (14 22 *ff.*) it is enjoined that the produce of the field (corn, wine, oil) is to be tithed; but, exactly as in the earlier time (see above, § 8), in such a manner that this tithe is not to be paid, so to say, into the sanctuary, but simply to be laid out in a sacrificial meal at the sanctuary. Should the distance from Jerusalem, however, be so great as to make it impossible to carry thither the tithe in kind, then (*v.* 25 *f.*) 'thou shalt turn the tithe into money and carry the money with thee and go to the place which Yahwè will choose, and there thou shalt bestow the money for whatever thou desirest, oxen or sheep, or wine or strong drink, or whatsoever thy soul asketh of thee, and thou shalt eat it there before Yahwè thy God, and rejoice, thou and thy household and the Levite that is within thy gates.' Now, this tenth is actually called the first-fruit (*rēšîth*, רֵאשִׁית) in Dt. 26 2, and is accompanied by a further regulation as regards ritual, which may very well have been in accordance with ancient custom, although the text itself appears to be a later addition (see Steuernagel, *ad loc.*): the regulation, namely, that the Israelite who makes the offering is to put a small portion of the tithe into a basket, and set it down before the altar of Yahwè, and in doing so to make use of a prescribed form of prayer.

10. Third year tithe. Along with these general regulations regarding the tithe D gives also a special one for the tithe of every third year (14 28 *f.*); every third year the entire tithe is to be expended at home on the poor and indigent, in which category the Levite also is included in D, no part of it being applied to a sacrificial meal in the sanctuary. In devoting the tithe to this purpose, also, a special prayer is to be used, which is given in Dt. 26 12 *ff.* This tithe constitutes one of the main sources of income of the rural priesthood (see below, § 17). This shows that by 'the third year' we are to understand not a fixed date holding good for the whole country, but a relative one, falling differently in different places or with different families, yet always in such a way that every year some portion of the Israelite nation was paying its 'tithe of the third year' for the poor and similar objects. It is a debatable question whether by this tenth of the third year we are to understand a second tithe every third year over and above the yearly tithe that has already been spoken of. The precept was interpreted in this sense by 𝔊, which gives 'the second tithe' (τὸ δεύτερον ἐπιδέκατον) for שנת המעשר, 'in the year of tithing,' in Dt. 26 12, and the same view is taken by some modern scholars (*e.g.*, Steuernagel). For various reasons, however, it seems highly improbable. In the first place, we should have expected in the text of the law some kind of explicit indication that quite another tithe than the preceding—a second tithe, in fact—is being spoken of; but of this there is no hint. Moreover, the imposition of a due of two-tenths of the whole produce of the field over and above the various payments exigible by the state would be something quite unusual and unheard of, and not at all in harmony with the general spirit of Deuteronomy. It is not permissible to evade this argument by answering that the yearly tithe paid in Jerusalem was not a tenth reckoned with any precision. The exact opposite would seem to be the fact, if it is remembered that the 'renewal' in D, as contrasted with the old law, consisted precisely in this, that for a sacrificial offering to be made at discretion was substituted an offering of which the amount was precisely determined by law, and that amount fixed at one-tenth of the total produce.

A later decision in Dt. 18 4 further enacts that the priest has a claim to the best of the corn, the wine, and the oil, as well as of the sheep-shearing; over and above the tithe the *rēšîth* also. This again is not in the spirit of D, which regards the *rēšîth* and the tithe as identical (see above, § 8). We have here again an expression of the growing claims of the priests, who in other directions also were dissatisfied with the revenues assigned to them by D (see below, § 13).

11. Firstlings. The course of the development of the offering of the firstlings ran parallel with that of the offering of first-fruits. For its origin, see above, § 2. The law of the older decalogue in Ex. 34 19 *f.* runs, 'every firstborn is mine, and all the cattle that is male, the firstlings of ox and sheep. But the firstling of an ass thou shalt redeem with a sheep, or, if thou wilt not redeem it, then thou shalt break its neck. All the firstborn of thy sons thou shalt redeem.' The expression *péter réḥem* (פֶּטֶר רֶחֶם) means the first offspring

of the mother, not the earliest of the animals born year after year (cp WRS *Rel. Sem.* 462 *f.*). Here, accordingly, even at this early date the demand is extended to human beings and to animals that cannot be offered in sacrifice. This is, in point of fact, however, quite secondary; the original precept had reference only to sacrificial animals. For it may be taken as certain that genuine Yahwism was always opposed to human sacrifices, and therefore that in the law of the redemption of the human firstborn we are to see not a toning down of an ancient custom which had demanded human sacrifice, but only an expedient for extending the precept relating to firstlings so as to include men and non-sacrificial animals. We should also take note of the parallelism with the first-fruits of the ground, and consider how opposed to such sacrifices is the entire character of the sacrificial system in ancient Israel so far as we know it. Literary analysis also shows that the words in question are secondary. In the original ten short words (see DECALOGUE, col. 1050) the precept probably ran, 'every first birth is mine'—a law which, as matter of course, applied only to animals capable of being offered. See further, FIRSTBORN; SACRIFICE, § 3; also ISAAC, § 4.

In the Book of the Covenant also, Ex. 22 29 [28], the claim to the human firstborn is made; but here, too, the originality of the clause is highly questionable. To begin with, the position of the firstborn of men—between the fruits of the field and offerings from the herd—is remarkable. Moreover, it would be unnatural to understand the requirement literally; it must be supplemented by the precept of redemption; but this highly important point is not mentioned, although in view of the inclination occasionally shown by the people to offer human sacrifices, it could hardly be omitted as too self-evident. With reference to offerings of the firstborn there is added the further detail that the animals are to be sacrificed on the eighth day after birth.

We know not at what date it was that the law relating to human firstborn first became general. The deuteronomistic passage in Ex. 13 11 *f.* presupposes it as a settled custom. D itself (Dt. 14 23 15 19) has nothing to say on the subject; D plainly has no intention of laying down a complete law about offerings of firstborn, but only of settling points where traditional custom had necessarily to be departed from in consequence of the centralisation of worship. The chief stress accordingly is laid upon the injunction that this offering is to be made year by year at the place which Yahwè will choose. This, but still more the further command not to do any work with the firstling of cattle or to shear the firstling of the flock (Dt. 15 20 [19]), shows that, according to the intention of D, the animal was not to be offered exactly on the eighth day after birth. That the offering of the firstborn was to be made precisely at the Passover feast is nowhere expressly laid down; but the connection into which the two are brought in the narrative of the exodus (Ex. 13 11 *ff.*) shows that their union had already been accomplished at the time when that account was written (cp PASSOVER). Since blemished animals could not be offered in sacrifice it is enjoined that they are to be consumed as ordinary food under the same conditions as those applied to ordinary slaughtering in D (Dt. 15 21 *ff.*). Substitution, or redemption of such animals, is not required; but this does not exclude the possibility that the custom nevertheless existed, since D, as already remarked, does not start with the intention of giving a complete law on this subject. From all these considerations it is plain that here also there is no question of a 'due' in the strict sense of that word, but only of an offering. Like the first-fruits so also ought the firstlings to be set apart for a sacrificial meal in which of course the priest has his usual share (see below, § 16).

12. In D.

It is on this last point that P makes a characteristic change affecting principle; all offerings of firstlings are now, for the first time, converted into simple dues payable to the priests, the fixed offerings become mere taxes. Even Ezekiel (44 30) had demanded for the priests the first of all firstlings of everything (רֵאשִׁית כָּל־בִּכּוּרֵי כֹל). But the Priestly Code claims not merely a portion but the whole of the firstlings for the priests; all the first-fruits of corn, wine, and oil are handed over by Yahwè to the priests (Nu. 18 12 *ff.*). The entire tithe belongs to the Levites, who, in turn, have to make over their tenth part of this to the priests (Nu. 18 20 *ff.*). The firstlings of clean beasts are offered in kind; after their blood has been sprinkled on the altar and the fat burnt, the flesh falls to the priests. The firstborn of unclean beasts, and of man, must be redeemed. The redemption money belongs to the priest (Nu. 18 15 *ff.*, cp Neh. 10 37). The amount of the redemption money is in the case of human firstborn fixed at five shekels (Nu. 18 16; cp Dillmann, *in loc.*). In the case of unclean beasts the estimated value is to be paid with addition of a fifth (Lev. 27 26 *f.*; certainly secondary).

13. In P.

Apart from this change in the scope of the law, P shows a quite extraordinary advance in the amount of such payments. The firstborn is given to the priests; but the Passover remains unaffected by this. In the case of fruits of the earth the payment of the *rēšīth* is retained as well as that of the tithes already enjoined in D (see above, § 9; Nu. 18 12 20 *ff.*), and, besides the 'best' of the winepress and the threshing floor, there is demanded payment of the first-fruits (*bikkūrīm*, בִּכּוּרִים) of all that grows in the field. What we are to understand by this expression is not quite certain. The most probable interpretation still is that which takes it as referring to the fruits that have come earliest to maturity (Nu. 18 13, EV 'first-ripe'; cp the commentaries). Over and above all this we find in Nu. 15 17 *ff.* the further demand that the first of the עֲרִיסָה, *'ărīsāh* ('dough' [EV]? 'coarse meal' [RVmg.]? 'kneading trough'? see FOOD, § 1 *a*), a cake, must also be given. In accordance with this the post-exilic community drew a distinction between *rēšīth* and *bikkūrīm*, and paid on both. In Neh. 10 36-38 the entire community comes under a solemn obligation to bring the *bikkūrīm* of all fruits of the tilled land and of all trees to the temple, and moreover to pay to the priests the *rēšīth* of the wine and oil and tree fruits, and also of the *'ărīsāh*—all this to be, along with the tithe, the portion of the Levites (cp Neh. 12 44 13 5 2 Ch. 31 5 12). Finally, Lev. 19 23 enjoins that the fruit of newly-planted trees must not be eaten within the first three years, and that in the fourth year the entire yield must be given to Yahwè—that is, to the priests.

Nor is even this enough; the decision preserved in Lev. 27 32 *f.* includes cattle also in the tithe; the offerer in rendering this tithe must not select the animals: each tenth head at the counting belongs to Yahwè. If, however, it should so chance that one animal has been changed for another, both shall belong to the sanctuary. Even in Neh. 10 37-39 (cp 12 44-47 13 5 12) there is no allusion to any such law. It must, therefore, have come into existence at a later date.

In real life such a tithing of cattle is impracticable. But the legal theorist did not concern himself about any such consideration as that; he was able, therefore, to put the copestone on his system by that extraordinary enactment which assigns to the tribe of Levi forty-eight cities, each having a territory of 2000 cubits square (cp LEVITES, § 6). The impossibility of carrying out such a theory is demonstrated by any map of Palestine. But nothing can better reveal the spirit underlying such legislation than the fact that the lawgiver in the same breath in which he assigns these forty-eight cities to the Levites alleges, as a reason for the dues he is imposing, that the Levites had received no inheritance in land like the other tribes.

14. Levitical cities.

Another point deserves notice: in Ezekiel the people

already pay their dues as a tax to the prince, who, however, has laid upon him in return the responsibility for the expenses of the public worship (Ezek. 45 13 *ff.*). In P it is the priests who receive these taxes; but they keep them to themselves: the support of the regular cultus is not their concern. On the contrary, a further tax has to be levied for that purpose; a poll tax of half a shekel has to be exacted (Ex. 30 11 *ff.*). With the spread of the Persian monetary system the third of a shekel found its way into Palestine, and accordingly in Neh. 10 32 [33] we find the temple tax fixed at that amount. The coinage of the Maccabees reverted to the older type, and thus in the time of Jesus we find the temple tax again fixed at half a shekel (Mt. 17 24 27; cp Benzinger, *HA* 193).

15. Expenses of worship.

As to the manner in which priestly service was paid in the early period we know very little. At first the priest was not so much a sacrificer as a guardian of the image and giver of oracles whose business it was to impart Yahwè's *tōrāh* or oracle to those who consulted him (see PRIESTS). It may with safety be assumed that the priest received payment for communicating the oracle, precisely as did seers such as Samuel, Ahijah, and the like (1 S. 9 7 *f.* 1 K. 14 2 *f.*). When a sacrificer came to the sanctuary and arranged a sacrificial meal, he naturally invited the priest to it, or gave him some portion of the flesh for such service as he had rendered. But these gifts were voluntary, and regulated not by law but by custom.[1] The priests' right to a definite share is not recognised; this is proved by the story of the sons of Eli (1 S. 2 13 *ff.*), who demand a tribute of flesh, and even take it by force instead of accepting what is voluntarily given, but in doing so show themselves to be 'sons of Belial,' heedless of law and priestly duty, thus bringing the offering of Yahwè into contempt.

16. Priests' revenue.

It is clear that at the greater sanctuaries, and particularly at Jerusalem, a fixed practice gradually established itself in regard to this, with the result that a definite share of the offering and certain other perquisites fell to the lot of the priests. As early as in David's time, we learn that the shewbread loaves in the sanctuary were the priests' perquisite, although they could also be eaten by ceremonially pure laymen (1 S. 21 3 *ff.*). With regard to a considerably later period we find that the fines paid to the sanctuary for various (presumably ceremonial) offences also fell to the priests (2 K. 12 16 [17]). On the other hand, the income from voluntary gifts and votive offerings was to be applied to the maintenance of the temple; the control of this money was taken from the priests because they applied the whole of it to their own uses (2 K. 12 4 [5] *ff.*). This was by royal ordinance; possibly tradition had previously sanctioned such an application of the revenues. Finally, we gather from 2 K. 23 9 that the unleavened bread, or meal offering, with which no sacrificial meal was associated, fell to the priests.

17. In D.

The priestly revenues are legally regulated for the first time in D. It is not impossible that the practice in Jerusalem lies at the basis of its provisions. In any case the legislation had a very special motive for thus disposing of the questions involved. For by the centralisation of the worship the priests of the high places and rural altars were made penniless. To remedy this, D gives the Levites the right to discharge priestly functions in the sanctuary at Jerusalem, and to share in the temple revenues (Dt. 18 6 *f.*). But if all priests were thus relegated to the sanctuary at Jerusalem it is easy to see that the dues for offerings there required to be strictly regulated and perhaps also raised. The right of the priests as towards the people who sacrificed in the temple now became definite (Dt. 18 3); the shoulder, the two cheeks, and the maw of every animal sacrificed belonged to the priests. That such a provision was wholly inadequate in view of the increased number of clergy and the diminished number of offerings in consequence of the centralisation, was seen by the Deuteronomist himself. The rural priests, accordingly, are bidden to look specially to the sacrificial meals set on foot by the offerers; but at the same time details as to this are left to the charitable disposition of the worshippers (Dt. 12 12 18 *f.*). For the tithe of the third year (Dt. 14 28 *f.* 26 12 *ff.*) and for the *rēšith* assigned in a subsequent decision to the priests (Dt. 18 4), see above, § 9 *f.*

[1] 1 S. 2 28, where 'all the offerings of the children of Israel made by fire are assigned to the priests, is of post-deuteronomic origin; cp Dt. 18 1.

18. Later.

These dues to the priests increased in amount also, like the other dues, in process of time. In Ezekiel (44 28 *ff.*), besides the minḥah, the sin-offering, the guilt-offering, and 'every devoted thing' are handed over to the priesthood. According to P the priests receive, in addition to the dues mentioned above (first-fruits, etc.), 'the most holy things'—*i.e.*, the minḥah, the sin-offering, and the guilt-offering in so far as these are not burnt; they may be eaten only by males of the family of Aaron, and that only 'in the holy place'; what is left over must be burnt (Nu. 18 8 *f.* Lev. 10 12 *f.*, cp Ex. 29 32 *ff.*). So also with the shewbread (Lev. 24 9). Of the burnt-offering, the skin of the animal sacrificed belongs to the priest (Lev. 7 8; this may perhaps have been an ancient custom), of the peace-offerings the right thigh and the breast (Lev. 7 34 Ex. 29 27 *f.*), and, besides, one cake of each meal-offering, of whatever kind, offered along with these (Lev. 7 13). With the breast of the peace-offering which belongs to the priest is performed the peculiar ceremony of waving; that is to say, the priest swings it upon his hands towards the altar and back again, a symbolical representation of the idea that this portion is presented to Yahwè as a gift, but by him delivered over to his servant (Lev. 7 30-34 9 21 10 14 Nu. 6 20). The thigh pertaining to the priests is always designated as 'the heave thigh' (Lev. 7 34). This expression presumably does not refer to any special ceremony analogous to that of waving, but is intended to denote that the part in question is 'lifted up' from the offering as the priests' perquisite (cp SACRIFICE, §§ 14, 21 *a*, 29 *a*). The last-named portions of the burnt-offerings and peace-offerings may be consumed by the male and female members of the priests' families alike, and in any clean place—and thus, without the sanctuary (Lev. 10 14 *f.* Nu. 18 9). The slaves also of the priest may eat of it; but not (for example) daughters married to 'strangers'—*i.e.*, to men who are not priests. And if a 'stranger'—say, for example, a hired servant of the priest—'unwittingly' eat of it, he shall pay to the priest the value of the holy thing with an added fifth (Lev. 22 10 *ff.*).

With further detail as regards the rights of priests it is laid down that the guilt-offering and the sin-offering, as well as the skin of the burnt-offering, shall belong to the officiating priest (Lev. 5 7 *f.*); of the meal-offering he is entitled to all that is 'baked in the oven or dressed in the frying-pan and in the baking-pan'; the rest shall belong to the priesthood as a whole (Lev. 7 9 *f.*); of peace-offerings the wave breast seems to have pertained to the priesthood in general, whilst the acting priest received the shoulder and the cakes (Lev. 7 31; cp 7 33 14).

The more detailed regulations of post-biblical times will be found collected in a series of tractates in the Mishna: *Tĕrūmōth*, *Ma'ăśērōth*, *Ma'ăśēr shēnī*, *Challā*, *'Orlā*, *Bikkūrīm*, *Shĕḳālīm*, *Bĕkōrōth*. See, further, Wellh. *Prol.*(4), 149 *ff.* and *passim*; the archæological text-books of De Wette, Ewald, Keil, Schegg, Benzinger, Nowack, and the articles 'Erstgeburt' and 'Erstlingsopfer' in *PRE*, Winer, Schenkel, and Riehm. I. B.

TEACHER.[1] In the earliest stage of the Christian Church the two most striking figures are those of the apostle and the prophet. In several important passages a third figure is found in their company, that of the teacher (διδάσκαλος).

[1] In the OT Hab. 2 18, etc., the word is מוֹרֶה; for later terms see EDUCATION, §§ 15-17.

Thus in 1 Cor. 12 28, Paul declares that 'God hath set in the Church first apostles, secondly prophets, thirdly teachers. . .' In his enumeration of gifts in Rom. 12 6-8 we have the order 'prophecy,' 'ministry' (διακονίαν), 'he that teacheth,' 'he that exhorteth,' and so forth. And in Eph. 4 11, 'apostles,' 'prophets,' 'evangelists,' 'pastors (ποιμένας) and teachers' are among the gifts of Christ to his Church. In Acts 13 1 we read of 'prophets and teachers' as belonging to the church in Antioch.

These notices taken together suggest a class of men endowed with a spiritual gift for the instruction of the Church, and taking rank next after the apostles and the prophets. Their function probably consisted in a Christian exposition of the OT scriptures and an application of the Gospel to the needs of common life, and stood in contrast with the enthusiastic utterances of the prophets. The vagueness of the term 'teachers' might suggest that it included any who gave instruction, and that the word denoted a function rather than a permanent office. It is quite likely that this was so at first. The use of the word as a title, however, is assured by the evidence of the *Didaché*, where, although teachers are far less prominent than prophets, they are joined with them as a cognate class, and honour is claimed for 'the bishops and deacons' on the ground that 'they too minister the ministry of the prophets and teachers.'

In the African church the title remains to the beginning of the third century, and is found in conjunction with that of 'presbyter.' Thus we have in the *Passion of St. Perpetua* (ch. 13) a mention of 'Aspasius the presbyter-doctor' (cp Cypr. *ep.* 29). About the same time Origen as a layman at the head of the Christian school in Alexandria affords the most illustrious example of the exercise of the gift of teaching apart from the regular orders of the ministry.

Of these three grades of what was pre-eminently 'the ministry of the word,' in contradistinction to official administration, each in its turn ceased to exist as a separate order. The apostles are the first to disappear. The Twelve and Paul passed away by death, and in the next generation the title was already becoming sacred to them; the apostles of the *Didaché* are a survival, destined immediately to disappear. The prophets on the contrary are still in full power, at any rate in certain localities. Yet even they show premonitory symptoms of decay; and the failure of the Montanistic movement to re-establish them as a permanent order in the Church led to the final disappearance of prophecy as an institution. The teachers fulfilled a ministry which would naturally grow in importance as the authoritative voices of apostles and prophets were ceasing to be heard, and as the inroad of heresy increased the demand for the grace of true teaching. That they too ceased to be a distinct class in the Church was due to the fact that their duties were taken over more and more by the administrative order, which gathered round its chief representatives many of the functions and much of the prestige of apostles, prophets and teachers alike. Cp MINISTRY, § 39.

J. A. R.

TEBAH (טֶבַח; ταβεκ [AD], -χ [L]), a son of NAHOR by Reumah (a corruption of Jerahmeel), Gen. 22 24. The names in the Nahorite genealogy (*vv.* 20-24) make a southern (*i.e.*, N. Arabian) connection very plausible. Against this we must not quote 'Aram,' for 'Aram' (*i.e.*, Jerahmeel) is *primarily* a N. Arabian name. The brethren of 'Ṭebaḥ' are Gaham (rather, Naḥam, ג and נ being confounded), Taḥash (*i.e.*, Ḥushah = Cushah ?), and Maacah. Nor can we safely urge that BETAH in 2 S. 8 8 (which, if 𝔊 may be trusted, is miswritten for Ṭebaḥ) or Ṭibḥath in 1 Ch. 18 8 (for which Pesh. has טבח) was a city of Hadad-ezer, king of Zobah; for it is maintained elsewhere (ZOBAH) that the wars of David referred to were in the S., not in the N., and that for 'Hadad-ezer, ben Reḥob, king of Zobah,' the original narrative had 'Hadad, ben Reḥob[oth], king of Miṣṣur.' We can now for the first time, as it seems, give an altogether satisfactory explanation of 2 S. 8 8 and the ‖ 1 Ch. 18 8, as well as of 1 K. 7 45 *f.* (with ‖ in Ch.). Beṭaḥ turns out to be nearer the truth than Ṭebaḥ. The Sam. passage should run thus, 'And from Reḥoboth, the city of Hadad, king David took brass in great abundance,' while in the latter the name of the city should be 'Reḥoboth-jeraḥmeel.'[1] It would seem that there was more than one Jeraḥmeelite city called 'Jeraḥmeel,' at least if we are right in supposing that the city, whose capture by David is described in 2 S. 12 26 *ff.*, was not 'Rabbath' but 'Reḥoboth (of the Jeraḥmeelites).'

Had the redactor who is responsible for the present form of the narrative in 2 S. 8 3 *ff.* a conception such as is geographically possible of the geography of David's 'Aramæan' campaign? In order to answer in the affirmative we should have to emend 'from Beṭaḥ and from Berothai' (מִבֶּטַח וּמִבֵּרֹתַי) into 'from Ṭebaḥ and *from Ṭabbur*' (מִטֶּבַח וּמִטַּבּוּר). Ṭebaḥ might be the Tubiḫi of the Am. Tablets (127, 5, 14, etc.), the Dibḫu of the List of Thotmes III. (*RP*(2), 5 43; Sayce, *Acad.*, Feb. 21, '1891; WMM *As. u. Eur.* 173 396). In the 'Travels of an Egyptian' (*RP*(2), 109 111; Brugsch, *Gesch. Æg.* 340) Kadesh on the Orontes, Tubiḫi, Tiḫis (see THAHASH), and Dapuru appear as neighbouring places.

We now turn to 1 K. 7 45*b*-47, the difficulties of which neither Benzinger nor Kittel appear to have altogether removed; the help which the former scholar derives from 𝔊L is illusory. It should be noticed that the current rendering, 'of burnished brass,' for נחשת ממרט, puts an undue strain on the root-meaning of מרט. We cannot pause to investigate Is. 18 2 7 Ezek. 21 14-16 [9-11], but may suggest that even the RV must not be followed blindly. The key to 1 K. *l.c.* (and the ‖ 2 Ch. 4 16 *f.*) is furnished by 1 Ch. 18 8*b*, which shows that the original narrative of Hiram the artificer stated that the brass came from a city of Hadad, king of Miṣṣur. In short, the ממרט of K. and the מרוק of Ch. come respectively from מִבֶּטַח and מֵרְחֹבוֹת, and the second of these readings is the better. בככר and הירדן which follow are corrupt forms of a dittographed ירחמאל (see JORDAN, § 2 [2]).

The result is that 1 K. 7 46 2 Ch. 4 17 should run thus, 'Of brass from Reḥoboth-jeraḥmeel did Jeraḥmeel [*i.e.*, 'Hiram'; see HAMMELECH] cast them, in Maacath-aram, between Maacath and Zarephath' (cp SUCCOTH, ZARETHAN). An imaginary place 'Ṭebaḥ' has in fact usurped a part of the honour which rightly belongs to REHOBOTH [*q.v.*]. Cp the commentaries.

T. K. C.

TEBALIAH (טְבַלְיָהוּ, perhaps for Tobliyyahu, 'Yahwè is gracious to me,' § 38; ταβλαι [B], ταβελιας [A], ταβεηλ [L]), a Merarite doorkeeper (1 Ch. 26 11). But (in spite of 𝔊) the name should possibly be read טוֹבִיָּהוּ (perhaps from טבויהו misread טבליהו); cp TOBIJAH, 1, also TABEEL.[2]

S. A. C.

TEBETH (טֵבֵת), Esth. 2 16. See MONTH, § 2.

TEHAPHNEHES (תְּחַפְנְחֵס), Ezek. 30 18. See TAHPANHES.

TEHINNAH (תְּחִנָּה, as if 'supplication,' § 74; cp *OS* 166 6 θανα χαρις), father of IR-NAHASH, 1 Ch. 4 12† (θαιμαν [B], θανα [A], θεεννα [L]).

If RECAH (*q.v.*) is rightly corrected to Recab, Tehinnah should almost certainly be קִינָה, KINAH[3] (Josh. 15 22), *i.e.*, a settlement of the Kenites. See IR-NAHASH.

---

[1] In 2 S. *l.c.* בטח and ברתי are both fragmentary representations of רחבות (Reḥoboth), and in 1 Ch. *l.c.* טבחת ומכון represents רחבות ירחמאל (Reḥoboth-jeraḥmeel). For the latter emendation, cp probably קמון miswritten in Judg. 10 5 for ירחמאל. Note, however, that 𝔊BNAL's ἐκλεκτῶν implies בחרות, which is virtually רחבות, a correction of טבח; ומכון is not represented. Cp MEROM.

[2] According to Cheyne, the name is probably either from תֻּבָלִי, 'a man of TUBAL' (*q.v.*), or, if יהו is correct, from תבל ירחמאל, Tubal-jeraḥ[meel] (cp תובל קין, 'Tubal-ḳain'). Cp ZEDEKIAH, § 1.

[3] When ק had become ת, it was natural for a pious scribe to prefix ת, and so get the meaning 'supplication.'

Pesh. has, 'he begat Ja'azer,' for which reading there is no obvious reason. T. K. C.

TEIL TREE (אֵלָה), Is. 6 13 AV, RV TEREBINTH (*q.v.*).

TEKOA or **TEKOAH** (תְּקוֹעַ, תְּקוֹעָה,[1] hardly = 'settlement,' from √תקע, to strike [tent-pegs into the ground]; θεκωε[2]), gentilic **Tekoite** (תְּקוֹעִים[ו], θεκω(ε)ιτης[3]), 'woman of Tekoa' (תקועית, θεκωειτις [BA] -κουι. [L]), a city S. of Bethlehem, on the borders of the wilderness to which it gave name (מדבר תְּקוֹעַ, 2 Ch. 20 20, την ερημον θ., 1 Macc. 9 33). Assuming that the same place is always meant, we find it mentioned as the residence of a 'wise woman' who interceded for Absalom; as one of the towns fortified by Rehoboam; and as the birthplace of the prophet Amos (2 S. 14 2 1 Ch. 2 24 2 Ch. 20 20 Jer. 6 1 Am. 1 1). It is also mentioned in Josh. 15 59 𝔊[BAL] (*θεκω*) where it heads the list of eleven towns wanting in MT (Tekoa, Ephrathah which is Bethlehem, Peor [see under ETAM, 1], Etam, Kulon [*q.v.*], Tatam, Sores [see SEIR, 2], Karem [*q.v.*], Galem [*q.v.*], Bether [*q.v.*] and Manocho [see MANAHATH, 3]). It comes also into an obscure genealogy in 1 Ch. 4 5-8 where Tekoa (cp 1 Ch. 2 24) figures as son of ASSHUR and (if for COZ we ought to read Tekoa) as father of Anub and Zobebah, and the families of Aharhel[4] (ἀδελφοῦ Ρηχαβ) son of Harum (*i.e.*, Jearim; see 𝔊[BA]). Still assuming that there is only one Tekoa, we may identify it with the modern *Teḳû'a*, which lies six miles S. of Bethlehem, on an elevated hill, not steep, but broad at the top, and covered with ruins to the extent of four or five acres. These consist chiefly of the foundations of houses built of squared stones, some of which are bevelled. The middle of the space is occupied by the ruins of a Greek church. The site commands extensive prospects (cp AMOS, § 3), and towards the E. is bounded only by the level mountains of Moab. Before and during the Crusades Tekoa was well inhabited by Christians; but in 1138 A.D. it was sacked by a party of Turks from beyond the Jordan, and nothing further is known of it till the seventeenth century, when it lay desolate, as it has ever since done.

It is, however, by no means certain that all the references to 'Tekoa' mean the same place. In Jer. 6 1, for instance, a more southerly place is meant (see TEL-HARSHA). It is contended elsewhere (see PROPHET, §§ 26, 40; ZAPHON) that it is a Jeraḥmeelite invasion that is most probably apprehended; the places mentioned should be sought in the Negeb. Amos too was hardly a native of the Tekoa, S. of Bethlehem (see PROPHET, §§ 10, 35). And in 1 Ch. 4 4 *f.*, just as 'Beth-lehem' is not the place in Judah so called but Beth-jeraḥmeel in the Negeb, so 'Tekoa' is more southerly than the best known place of that name.

T. K. C.

TEL-ABIB (תֵּל אָבִיב[5]; μετεωρος, see below; [*ad*] *acervum novarum frugum*), the seat of a colony of Jewish exiles (Ezek. 3 15†). To a Hebrew ear the name meant 'Mound (hill) of ears of corn' (cp ABIB). As, however, Friedrich Delitzsch has pointed out,[6] if it

[1] The ending is hardly locative; תקועה in 2 S. 14 2 is probably a corruption of בֵּית מַעֲכָה 'Beth-maacah' (= Beth-jeraḥmeel, see SAUL, § 4), a 'wise woman' of which place is mentioned in connection with Joab in 2 S. 20 15 *f.* Very possibly too, we may explain תקוע itself as a primitive popular corruption of בית מַעֲכָה.

[2] The variants are: 2 S. 14 2 *θεκουε* [L], 1 Ch. 2 24 *θεκως* [A], 4 5 *θεκωμ'* [A], Jer. 6 1 Am. 1 1 *θεκουε*.

[3] The variants are: 2 S. 23 26 *θεκεϊ* [L], 1 Ch. 11 28 *ὁθεκω* [Bא], *ὁ θεκωι* [A], 27 9, *θεκωνειτης* [B], Neh 3 5 27 *θεκωειμ* [אAL], *-ειν* [B and א in *v.* 27], *θεκωῖται* [L *v.* 27].

[4] Surely אחרחל is one of the numerous distortions of ירחמאל. Grüneisen's pointing אַחַרְחֵל (*Ahnencultus*, 257), leads to no satisfactory explanation. Cp 𝔊[L], τῆς τοῦ αραιηλ ἀδελφοῦ ρηχαβ.

[5] 'Tel' (Ass. *til*[*l*]*u*), in ancient, as in modern times, formed the first part of the name of many Babylonian places situated near a mound of ruins of a previous settlement (cp תֵּל, Dt. 13 17 [16] Josh. 8 28). Cp TEL-HARSHA, TEL-MELAH, and TELASSAR (Tel-Asshur).

[6] *Calwer Bib.-Lexikon*(2), 901 *a*.

is a Babylonian place-name, the right form ought to be Tel-abub (*Til-abubi*). Abûbu ('flood-storm' or 'storm-flood'?) is the proper Assyrian word for the Deluge (see DELUGE, § 13, n. 1); Til-abubi, as a Babylonian name, might mean either a mound of ruins so ancient (cp חרבות עולם) that it was called a Deluge-mound, or one that had been produced by the rushing in (possible at any time) of a cyclone from the Persian Gulf. There is a common phrase in the Assyrian inscriptions, 'I made (or, destroyed) the city like a *til-abubi*.'[1]

If, however, the view advocated in PROPHET, § 27, is correct, and Ezekiel together with Jehoiachin and his fellow-exiles resided in N. Arabia, we must look out for another explanation. And it so happens that this view (the 'Jeraḥmeelite theory') supplies the only key to the manifold corruptions of the single passage in which Tel-abib occurs (see *Crit. Bib.*). The text of Ezek. 3 14 *f.* which results from the application of this key runs thus:[2]—

(14) 'And (the) spirit lifted me up and took me to Maacath of Jeraḥmeel, and the hand of Yahwè upon me was strong. (15) And I came to the company of exiles, to Tel-arab [Ishmael, by the river of Jeraḥmeel], and to Tel-asshur [Jeraḥmeel, Ishmael], and there for seven days I dwelt among them astonished.'

The text which underlies 𝔊 is only slightly different; *μετέωρος* = ירחמאל = רָם; *καὶ περιῆλθον* = ואסוב = ו[תל]אשור. Probably we may restore it thus in *v.* 15:

'And I came to the company of exiles, to Tel-jeraḥmeel and Tel-asshur [Ishmael, by the river of Jeraḥmeel, Ishmael].'

Thus, combining MT and 𝔊, we are led to suspect that Tel-arab and Tel-jeraḥmeel were two names for the same place. We know of a 'valley (גיא) of Jeraḥmeel' (see SALT, VALLEY OF) and also, probably, of a 'wādy' (נחל) of 'Arab.'[3] We also find a Tel-melaḥ or Tel-jeraḥmeel in Ezra-Neh. (see TEL-MELAH), and, as a probable equivalent of Tel-asshur, Tel-harsha or Tel-ashḥur (see TEL-HARSHA). Very possibly, however, a further result awaits us. תל, wherever it occurs in compound names, is simply a short way of writing תובל, TUBAL (*q.v.*). See *Crit. Bib.*

T. K. C.

TELAH (תֶּלַח, θαλεες [B], θαλε [A], θαλα [L]), mentioned in the list of the b'ne Ephraim (1 Ch. 7 25).

There are, however, several corrupt repetitions in this section (1 Ch. 7 20 *ff.*), and it is probable that תלח is a corruption of שותלח; cp Wellhausen, *Prol.*(4) 214. See EPHRAIM, § 12, SHUTHELAH.

TELAIM (טְלָאִים), 1 S. 15 4, and **Telam** (Heb. מֵעוֹלָם), 1 S. 27 8 RV[mg.]. See TELEM.

TELASSAR (תְּלַ[א]שָּׂר; θαεσθεν [B], θαλασσαρ [AL] in Ki., *ἐν χώρᾳ*, *θεεμα* [א* (sup ras ε 2° fort ο)], *-θ* [B], *θεμαν* [א[c]], *θαιμαδ* [A], *θαι* [*μα*]*θ* [O[vid]], *θαιμαν* [Q]; *thelassar*).

Telassar is named in 2 K. 19 12 (Is. 37 12) as the location of the 'children of Eden.' The places Gozan, Haran, and Rezeph named before Telassar follow an order from E. to W. This suggests that 'the children of Eden' once dwelt nearer to Palestine (Judah?) than Rezeph, which was W. of the Euphrates. The conquest of these cities is ascribed to the kings, 'my fathers,' who had preceded Sennacherib.

The identification of 'the children of Eden' with the Bît Adini of the Assyrian Inscriptions already made by Schrader (*KAT*(2), 327) has more or less difficulty (cp BETH-EDEN) according to the situation in which this widely scattered Aramaic folk are supposed to be located. The Bît Adini of the earlier times formed a powerful race inhabiting the district S. of Edessa, over Ḥaran between the Balîkh (on the E. of which lay Gozan) and the Euphrates. But it also included a wide strip on the W. bank of the Euphrates, in which lay many large cities. This country made strong resistance to Asur-nâṣir-pal (*KB* 1 64, 102, 104, 116), but was finally conquered by Shalmaneser II. (858 B.C.). Shalmaneser changed many of the city names, among others giving to Nappigi (Ṃabbûg, Bambyke) the name of Lita-Ašur (*KB* 1 132 156 162). There was also

[1] Del. *Ass. HWB*, *s.v.* 'abubu'; Schr. *KAT*(2) 234 (29), 262 (1).

[2] It will be understood that the words in [ ] are presumed to be glosses. Arabia, Ishmael, Jeraḥmeel, and Asshur were in fact, as, in the present writer's view, the phenomena of the Psalms abundantly show, practically synonymous to the later writers.

[3] In Am. 6 14 חמת is probably a corruption of Maacath (a Jeraḥmeelite name) and נַחַל הָעֲרָבָה of נ׳ עֲרָב = נ׳ עַרְבִים (so read) in Is. 15 7. See *Crit. Bib.*

a branch of the Aramaic Bît Dakkûri who lay E. of the Tigris in Babylonia. A third settlement of the Bît Adini is associated by Tiglath-pileser III. with Ḥaurān, 'Azaz, and Aribua, in Syria, which may possibly be the 'house of Eden' referred to in Amos 1 5 (Winckler, *AOF* 1 104). Whether the children of Eden had their home in Telassar and were now deported elsewhere, or whether they had been deported to Telassar will depend on the identifications adopted.

It is tempting to recognise in Telassar the Tîl-Aššuri of Tiglath-pileser III. (Tiele, *BAG* 231); and of Esarhaddon (*KB* 2 128 144). But these passages show that there were two different places of that name. The first was certainly in Babylonia; but there is no indication that the Bît Adini were settled there. The second was inhabited by an Aramaic people, the Bît Parnaki, and Esarhaddon says that the place had native names Miḥrânu and Pitânu. Miḥrânu suggests Tell Machrê, which would place it NE. of the Tigris (?). But unless the Bît Parnaki were a branch of the Bît Adini, there is nothing to connect this Tîl-Aššuri with 'the children of Eden.'

On the one hand, Tîl Aššuri may have been one of the names conferred by Shalmaneser on one of the conquered cities of Bît Adini, or Tel-Assar may be a corruption of Lita-Ašur, or of Tîl-bašerê a city in Shalmaneser's Bît Adini; or, on the other hand, the name Telassar may be derived from a totally different name, not yet recognised.

[The closing sentence of the preceding article opens the door for a renewed examination of the question from the point of view of SENNACHERIB, § 5. 'Rezeph' and 'the b'ne Eden in Telassar' are easily explicable if it is a king of the N. Arabian Ashḥur whose victories are referred to in 2 Ki. 19 12 (Is. 37 12). 'Eden' was a district of the Jeraḥmeelite Negeb (see PARADISE, § 7), and Tel-ashḥur is a very probable name, if we should not rather read Tubal-ashḥur. See TELHARSHA.—T. K. C.]

C. H. W. J.

TELEM (טֶלֶם), a city in the Negeb, mentioned between ZIPH and BEALOTH (Josh. 15 24; τελεμ [AL], μαιναμ [B?]). This may be the TELAIM (טְלָאִים), or perhaps rather טְלָאִם (Telam), where Saul mustered his warriors before fighting with the Amalekites. 1 S. 15 4 (MT assumes the article, בַּטּ׳; cp Vg. *quasi agnos*). Apparently there was an ancient clan called Telem, with which name the real or assumed personal names ṬELEM (טֶלֶם), ṬALMON (טַלְמוֹן), and even TALMAI (תַּלְמַי) should undoubtedly be grouped, and the importance of which may be estimated from the fact that 'Talmai' stands beside 'Sheshai' and 'Ahiman' (corruptions probably of 'Cushi' and 'Jeraḥmeel') as representing the primitive population of Kirjath-arba (rather K.-'arâb), otherwise called Hebron (rather Rehoboth). Observe too that 'Ṭalmon' occurs in 1 Ch. 9 17 beside 'Aḥiman' (Jeraḥmeel) as the name of a family of *šô'ărîm* (EV 'porters'), or rather *'aššûrîm*[1] (Asshurites), and that בעלת (Bealoth), beside which טלם (Ṭelem) occurs in Josh. 15 24, is probably miswritten for the ancient clan-name Tubal (see TUBAL-CAIN).

The place called Ṭelam must have been situated not very far from the נחל or wādy which separated the Judahite from the Amalekite territory. For the first movement of Saul was towards the cities (*v.* 5: 𝔊BL ἕως τῶν πόλεων) of Amalek on the other side (read ויעבר) of the wady (*v.* 5). Possibly there was near it a place called Gilgal (a popular corruption of Jeraḥmeel), for 𝔊BAL in 1 S. 15 4 gives 'in Gilgal' (ἐν Γαλγάλοις) instead of 'in Ṭelam.'[2] We can hardly venture to go further, and suppose that Ṭelam was regarded as itself the boundary between Judahite and Amalekite land. This supposition has indeed actually been made, and the text of 1 S. 15 7 (MT מחוילה) and 27 8 (MT מעולם) been emended accordingly.[1] This, however, implies inadequate criticism of the proper name חוילה (Ḥavilah), and the same objection may be made to Winckler, when he emends מחוילה in 15 7 into מֵעוֹלָם, in accordance with 27 8.[2]

A place called 'Olâm is highly problematical, and a better way out of the critical difficulty ought to be found. As is pointed out elsewhere (see SHUR), חוילה, like חכילה in 1 S. 23 19,[3] is miswritten for 'Jeraḥmeel.'

In 1 S. 27 8 γελαμ in γελαμψ(σ)ουρ of BA has been thought to represent Telam, which indeed a number of cursives attest. But τ may be a corruption of Γ. Klostermann ingeniously extracts נחל הבשר, 'the wady of BESOR' (*q.v.*). Cp *Exp. T* 10 239 [1899].

T. K. C.

1 See *Amer. Jour. of Theol.*, July 1901, p. 439.

2 It is also possible, however, that Γαλαλοις is a very early alteration of Τεχεμ, the better known place being substituted for the more obscure.

TELEM (טֶלֶם; τελημ [B], τελλημ [ℵAL]), a door-keeper, Ezra 10 24. In 1 Esd. 9 25 TOLBANES (τολβανης [BA]). See TELEM, 1; and cp TALMON.

TEL-HARSHA, RV for **Tel-haresha** [Neh.] and **Tel-harsa** [Ezra] (תֵּל חַרְשָׁא; Ezra θααρησα [B], θελαρ. [A], θελααρησσα [L]; Neh. αρησα [Bℵ], θελαρσα [A], θελλαρης [L]; 1 Esd., THELERSAS [EV], θελερσας [B], θελσας [A], θαλαα [και ρησα] [L]).

A place from which, according to the great post-exilic list, came certain families of doubtful origin (Ezra 2 59 = Neh. 7 61 = 1 Esd. 5 36†). The name in Hebrew might mean 'mound of the forest'; but *ḫuršu* (or *ḫursu*) in Assyrian means 'mountain-range,' whence Friedrich Delitzsch[4] proposes to explain as if *til ḫurši*, 'hill in the mountains.'

If, however, we adopt the theory (cp PROPHET, § 27) that the Israelites who returned from exile came chiefly from the Jeraḥmeelite region in N. Arabia (including the Negeb) we shall have to seek for some other explanation. In this case, חרשא will almost certainly be miswritten for אשחר—*i.e.*, Ashḥur. In 1 Ch. 2 24 Ashḥur is called the father of Tekoa, where 'Tekoa' is probably not the modern Teḳū'a, 2 hrs. S. of Benjamin, but some place farther south; cp Jer. 6 1, where 'Tekoa' is mentioned with 'Beth-haccerem,' or rather 'Beth-jeraḥmeel,' and both places are near the land of Zaphon (צפון), which apparently included Kadesh and the sacred mountain of Yahwè (see ZAPHON). On the possible identity of Tel-ashḥur with the so called Telassar, see TEL-MELAH.

T. K. C.

TEL-MELAH (תֵּל מֶלַח; θερμελεθ [B], θελμελεχ [L], μεχελ [A]), a place from which, according to the great post-exilic list, came certain families which could not prove their Israelitish origin, Ezra 2 59 = Neh. 7 61 (θερμελεθ [ℵ], θελμ. [B], θελμελεχ [AL]) = 1 Esd. 5 36 (THERMELETH [EV]; θερμελεθ [A], θελμελεΓ [L]). The name is generally supposed to be Babylonian, and since, in this case, the explanation 'hill of salt' is impossible, Friedrich Delitzsch (*Calwer Bib.-Lex.*(2) 901) would give the name as *Tîl-malaḫi*, 'sailors' hill,' on the analogy of TEL-ABIB (*q.v.*).

If, however, we follow the analogy of the names ניא מלח or ניא הַמֶּלַח, and עִיר הַמֶּלַח (see SALT, VALLEY OF, and SALT, CITY OF), Tel-melaḥ will mean 'hill of Jeraḥmeel,' and will become part of the evidence for the theory (cp PROPHET, § 27) that the Israelitish exiles who returned came mainly from the region called Jeraḥmeelite in N. Arabia (including the Negeb). The names with which Tel-melaḥ is grouped are Tel-ḥarsha and Cherub-addan-immer or 'Cherub, Addan (Ezra) or Addon (Neh.), and Immer' (וְאִמֵּר, Neh.). Two of these—viz., Cherub and Immer—at once become intelligible, if we may venture to set aside the prejudice of a Babylonian connection; both are of the same type as numerous corruptions of 'Jeraḥmeel.' Addan or Addon, too, is very possibly N. Arabian, and in spite of the initial א in Ezra-Neh., may be another form of עדן—*i.e.*, the N. Arabian 'Eden,' which is very possibly referred to (1) in the story of Paradise (see PARADISE, § 7), and (2) in the otherwise enigmatical phrases 'Beth-eden' (Amos 1 5) and 'the b'nē Eden who were in Telassar' (2 K. 19 12 = Is. 37 12). Probably we should read, for 'Cherub-addan-immer,' 'Eden of Jeraḥmeel' (עדן ירחמאל), 'cherub' and 'immer' being variants for the fuller and truer form Jeraḥmeel. TEL-HARSHA (*q.v.*) probably

1 H. P. Smith accepts מִטְּלָם in 27 8, but not in 15 7; Driver holds himself in suspense. We., Bu., and Ki. read מטילם, or מטלם, in both places. Löhr resists the temptation to change; Klost. retains MT in 15 7, but strikes out a new path in 27 8.

2 *Muṣri*, 2 (*MVG*, 1898, 4), 6.

3 Glaser needlessly emends חוילה in 1 S. into חכילה.

4 *Heb. Lang.* 16 *f.*; *Calwer Bib.-Lex.*(2) 901 ('Waldhügel' can hardly be right; cp *Ass. HWB* 293 *b*).

= Tel-ashhur, and notice again the significant phrase 'the b'nē Eden who were in Telassar,' where Telassar, the meaning of which is otherwise scarcely a soluble problem, is probably a corruption of Tel- or Tubal-ashhur. See TELASSAR (end).

T. K. C.

TEMA (תֵּימָא, and once תֵּמָא [Job 6 19]; θΑΙΜΑΝ [BℵAQΓL]), son of Ishmael (Gen. 25 15 θΗ. [DE]; 1 Ch. 1 30). The name appears as early as Jeremiah (25 23; θε. [ℵc.a] θωμεαν [ℵ*]), also in a prophetic fragment on Arabia ('land of Tema,' Is. 21 14). In both these passages it is associated with DEDAN (*q.v.*).[1] In Job 6 19 the 'caravans of Tema' (θαιμανων) are parallel to the 'companies of Sheba.' For its geographical position see ISHMAEL, § 4 [6]. In the cuneiform inscriptions of Tiglath-pileser III. its people are spoken of as (*alu*) *Te-mai*—*i.e.*, belonging to the city Tēma'u (cp Schrader, *KGF* 261 *ff.*; Del. *Par.* 301 *ff.*). Its modern name is *Taimā*. The explorations of Euting have brought to light some important Aramaic inscriptions, dating from before the Persian period, which testify to the existence of a highly developed culture among the ancient Arabs of Tema (see ARAMAIC LANGUAGE, § 2).

Special mention is made in one of them of the אלהי תימא, 'the gods of Tema,' one of the most important of whom bore the name צלם (*CIS*, 2 113 114), cp צלם שזב the name of one of his priests ('צלם saves,' a name perhaps ∥ to the biblical מְשֵׁיזַבְאֵל); see Baeth. *Beitr.* 80 *f.*, and cp ZALMUNNA.

TEMAH (תֶּמַח), the family name of a company of (post-exilic) Nethinim: Ezra 2 53 (θεμα[α] [BAL], AV THAMAH) = Neh. 7 55 (ημαθ [Bℵ], θημα [A], θεμαα [L], AV TAMAH) = 1 Esd. 5 32 THOMOI, RV THOMEI (θομθει [B], θομει [A], θεμαα [L]).

TEMAN (תֵּימָן, √ ימן, 'what is on the right hand'?—*i.e.*, 'south'; θαιμαν [BADQL], occasionally θεμ. in ℵADEQ: Vg. *Theman*, except Ezek. 25 13 Hab. 3 3, *Auster* and Ob. 9 *Meridies*; gentilic תֵּימָנִי, EV TEMANITE, in Job 22 1, תמ׳; θαιμαν(ε)ίτης, or θεμ.; occasionally θαιμανης, θεμανης, θεμανιτις [A Job 15; cp 42 17*d*]; *Themanites*).

Teman was originally the name of a clan and district (cp NAMES, § 55) of Edom, no doubt one of the oldest and most important, and is genealogically described as the eldest son of Esau's first-born son Eliphaz (Gen. 36 11 15 [θαμναν E] 1 Ch. 1 36). In Gen. 36 42 (1 Ch. 1 53) Teman is counted among the 'dukes' (*'allūph*), or clans (*'éleph*), of EDOM (*q.v.* § 4), not, however, heading the list. In the list of ancient Edomite kings we find a king called 'Husham, of the land of the Temanites (Gen. 36 34).' In Ezek. 25 13 the prophet threatens destruction to Edom 'from Teman even to Dedan.' Later writers use 'Teman' as a poetical synonym for 'Edom' (Amos 1 12 [on date, see AMOS, § 9], Ob. 9 [cp. Jer. 49 22], Jer. 49 20 Hab. 3 3 Bar. 3 22 *f.*); but in Jer. 49 7 we seem to find Teman recognised as the name of a district. 'Is wisdom no more in Teman?' must be taken in connection with the description of the oldest of Job's friends as 'the Temanite' (Job 2 11 etc.). 'Eliphaz the Edomite' would have been an insufficient description; 'Temanite' must refer to the district best known for proverbial wisdom. As to the locality intended by 'Teman,' Ezek. 25 13 (already quoted) entitles us to assume that Teman was in the N. (NE.), for the land of Dedan was certainly to the S. (SE.) of the land of Edom. (This suggests a comparison of the name with Jamin = Jerahmeel.) See Amos 1 12, where Bozrah is mentioned as the capital of Teman. Bozrah being situated in the district of Gebal (Ps. 83 8), northward from Petra, we may perhaps venture to regard the district of Teman as having much the same limits as the later district of Gebal[1] in spite of the fact that Teman and Bozrah in Amos 1 12 are the names, not merely of a district and its chief town, but of the land of Edom and its capital.

Cp Kautzsch. in Riehm, *HWB*², 1648; Buhl, *Edomiter*, 30 *f.*; Lury, *Edomiter*, 26. Trumbull (*Kadesh-barnea*, 117 *ff.*) takes a different view: Teman 'was probably the portion of Edom which lay directly S. or Teman-ward, of Canaan.' Trumbull even finds a trace of the old name in the Naḳb ('pass') *el-yemen*, which goes northward from Wādy Fiḳreh 'over against ancient Teman'; and in Josh. 15 1 he would render the closing words מִקְצֵה תֵימָן (RV 'at the uttermost part of the south') 'from the extremity of Teman' (so, too, the pioneer British critic Geddes). Greene too (*Heb. Migration*, 145) regards Teman as the southern part of Edom, now known as *eš-šera*, as distinguished from the northern (Gebalene), and including the Idumæan range as far N. as Mt. Hor. According to Eus. and Jer. (*OS* 260 96; 155 32), Thaiman was the name of a village distant 15 (Jer. says, 5) R. m. from Petra, and the seat of a garrison. T. K. C.

TEMENI (תֵּימְנִי [Baer], תֵּימְנִי [Gi.], and תֵּימָנִי; cp TEMAN), son of ASHUR, of the tribe of Judah; 1 Ch. 4 6 (θαιμαν [BA], -νει [L]). Probably miswritten for תִּמְנִי, Timni, the gentilic of Timnah. See TIMNAH i. T. K. C.

I. THE TEMPLE

1. Meaning. For the ancient Israelites, as for the ancient Semites in general, a 'temple' was the abode of a deity—a *bêth-'ēl* (בֵּית אֵל)—in the strictest meaning of the word, and not solely in the sense in which we also speak of Christian places of worship as houses of God. A temple in antiquity was not, in the first instance, a place of meeting for the worshippers of the deity; many ancient temples were accessible to none but the priests, and the altar—the place of worship in the fullest sense of the expression—was usually situated, not within, but without the building known as the temple. The temple, rightly considered, is the dwelling-house of the deity to whom it is consecrated, and whose presence is denoted by a statue, it may be, or some other sacred symbol. The erection of temples, accordingly, can always be regarded as already indicating advanced development of the religion concerned. For the temple is never the original dwelling-place of the deity. In the most primitive phase of religion, and particularly in the case of the oldest forms of Semitic religion, the deity was found, in the first instance, in certain natural objects and features which impressed

[1] Cp Gen. 25 3 𝔊 (θαιμαν [AD], θεμ. [E; om. L], brother of Dedan).

[1] GEBAL (*q.v.*) is a late name of Arabic origin.

the primitive worshipper (see NATURE-WORSHIP); high mountains, rocks of peculiar formation, wide-spreading trees, shady groves, springs of water and the like were regarded as seats of deity and places where his servants could meet with him, and bring him their gifts, though temple building of any sort there was none. Such natural objects, where human intervention and labour were unnecessary, are everywhere older than images and suchlike accessories. In the primitive Hebrew worship, in particular, temples played but a subordinate part. Ordinarily they were wholly superfluous. Sacrifice was offered under the open sky. The natural objects which were regarded as seats of deity required no protecting covering.[1] Often they had no need of an altar even; the sacred rock was itself an altar; cp Gen. 28, where Jacob anoints—that is, presents his offering of oil upon—the stone which sheltered the deity. At the sacred springs, wells, and caves the gifts of the worshippers are simply dropped in, as, *e.g.*, the well of Zemzem at Mecca (cp ALTAR, NATURE-WORSHIP).

The situation changed as soon as men began to make images of the deity. Wherever such an image had come into existence, there naturally arose also the need for a house to shelter it. In the case of a costly image, too, theft had to be guarded against (cp Judg. 17 *f.*); someone was required to watch and tend it; but here again we observe that, in principle and to begin with, nothing more is required than some simple housing, such as the worshipper is ordinarily in the way of constructing for himself. A modest apartment in the family dwelling-house sufficed, as the story of Micah's graven image shows (Judg. 17). Here again it is not a place of worship—a meeting-house for worshippers—that has to be provided, but simply a dwelling-place for the image, or, if you will, for the deity. Still less was any spacious apartment or stately palace required, because according to the ancient Hebrew conception the deity chose rather to have his dwelling in [thick] darkness. Even in Solomon's temple the apartment occupied by the deity, the so-called Holy of Holies, was quite small, plain and dark (see below, § 7 end).

2. Oldest Israelite temples.

In accordance with this is the fact that in the OT we read of temples only where there is an ephod. Micah had a house for his ephod (Judg. 17 5); at Dan this same ephod afterwards had a temple, as doubtless also had Gideon's ephod at Ophrah (Judg. 18 8 24 *ff.*). Similarly, at Nob there was a great temple with a numerous priesthood in connection with the famous oracular image there (1 S. 21). The sacred ark, the most sacred object in Israel, stands in this respect in the same category with the image as representing the deity. It, too, naturally requires to be housed; it cannot be left simply in the open. The house assigned to it was the same in kind as those its worshippers lived in. As long as these lived in tents, the ark also remained in a tent. After the settlement in Canaan, it received a house of stone at Shiloh. But even then it was not absolutely necessary that it should have a house of its own, entirely to itself. After the temple at Shiloh had been destroyed, no one for a long time thought of getting a new house built for the ark. After it had been brought back from Philistia it wandered about from place to place, finding a temporary resting-place now in the house of a prominent citizen, now in that of a royal official, until at last within the precints of David's palace it found shelter merely in a simple tent (see ARK OF THE COVENANT).

We know nothing in detail as to the arrangement of the oldest Israelite temples. We can only conjecture that they were built on the same model as those of the Canaanites, for here also the conquered were doubtless the teachers of the conquerors. The Canaanites at that period already had large temples of their own. The temple of El-Berith at Shechem was, we know, the place of refuge of the Shechemites in times of danger, and must therefore have been large and strongly built (Judg. 9 46 *f.*). At Gaza there was a great temple with a hall, the roof of which was

[1] The *ka'ba* of Mecca, even, is no *bēth-ēl* (house of God), 'household god,' no covering for the black stone worshipped there. The stone in question is, in fact, visible from without, let into the wall, and the entire *ka'ba* is merely an expansion of the stone; cp Wellh. *Heid.*(1) 3, 69, (2) 73.

supported by two pillars (Judg. 16 29). Here, too, it need hardly be pointed out, the fundamental idea was the same; the principal thing was the sanctuary, the apartment for the image or other sacred object; in connection with this there ultimately arose also another apartment or hall to which the worshippers of the god had access, and in which they had audience of him.

In what sense Solomon's temple can be spoken of as something new, may easily be judged from what has already been said. In their general arrangement and details temple and palace were alike wonders to Solomon's subjects, such as had never been seen before; but the conception of a temple of Yahwè was not in itself any novelty. Tradition assigns the original idea to David; according to our present books of Samuel, it was David who first thought of building a temple for the ark, inasmuch as it seemed unbefitting that he himself should be dwelling in a palace whilst the ark of Yahwè remained in a mere tent. Yahwè, however, the narrative goes on to say, would not suffer this. Not David was to build a house for Yahwè, but Yahwè was to build a house for David, by assuring the permanence of David's dynasty (2 S. 7). The Chronicler develops the idea further: David himself indeed cannot build the temple, but he can make everything ready for it; and this he does in such a manner that little is left for Solomon to do. The latter receives from David plans and models for this temple and all its furniture; the stone and timber are all hewn and prepared, the workmen engaged and trained, the gold and silver collected, the whole temple service organised (1 Ch. 22 *ff.*). All this, however, belongs to the latest strata of the narrative. There is no historical probability that David had thoughts of building a temple. Had it been otherwise, it is not easy to see what should have prevented him from carrying out the idea. But the conditions under which such a purpose might be formed were absent. When David was building his palace he had no need for a splendid sanctuary also in his citadel. The ark, of course, he wanted to have there; but the genuine old Israelite idea was that in view of its origin and significance the appropriate lodging for the ark was in a tent. This comes out quite clearly still in the words of Nathan when he asks (2 S. 7 5 *f.*; cp 1 Ch. 17 6):

3. Solomon's temple: David's preparations.

> Has Yahwè ever spoken a word to any of the judges of Israel saying, Why have ye not built me a house of cedar?
> I have not dwelt in an house since the day that I brought up the children of Israel out of Egypt, even to this day.

Such was the normal order of things. It is easy to understand, however, how after the temple of Jerusalem had acquired its importance, the people of a later time found it difficult to understand wherefore the pious David had not built the temple. The cause cannot have lain, for him, in religious indifference; and it was necessary to find another explanation. Hence the whole theory now before us.

In Solomon's case again we need not seek too exclusively for purely religious motives. It was by no means his intention, as tradition represents it to have been, to provide the Israelites with one solitary sanctuary, legitimate and central, and so to bring to an end the worship of the high places, and such-like practices. His motives were more political than religious. He was a splendour-loving prince to whom the old palace of David no longer seemed good enough, and who wished to have a new and magnificent residence similar to those of neighbouring sovereigns. In his complex of new buildings a fine house of cedar for the venerable and sacred ark was also included, since a simple tent seemed no longer to suffice for a royal sanctuary. It was a citadel-sanctuary for himself, not a temple for Israel that he built.

4. Solomon's motives.

Only thus can we understand the mistrust and even

antipathy with which large masses of the people regarded the work of Solomon. The citizens of the northern kingdom still adhered to the ancient sanctuaries and went on making pilgrimages to Beersheba and Gilgal, to Dan and Bethel, the places where their fathers of old had paid their devotions. In the southern kingdom, too, the 'innovation' was far from finding unanimous approval. Ultimately, indeed (in Deuteronomy), the prophets came to recognise the temple as the lesser evil when compared with the worship of the high places. Yet, at the bottom of their hearts they put it on a level with the other sanctuaries of Samaria or Shiloh (Jer. 7 12 Mic. 1 5). In fact, in religious circles the luxury of the temple of Solomon came under very severe censure as out of keeping with the true Israelite character (cp the law concerning the altar in the Book of the Covenant). To lift a tool upon an altar stone is to pollute it; so also to go up to it by steps is a desecration (Ex. 20 24 *f.*). A more pointed condemnation of the altar of Solomon, which was raised high after the fashion of heathen altars and covered with brass, can hardly be conceived (cp 2 K. 16 10 *ff.*).

On the site of Solomon's temple cp PALACE, JERUSALEM, § 19. We may regard it as settled that it stood on the eastern hill. The architectural history of the place shows that a sanctuary always stood there, within the limits of the present Ḥaram. The temple of Jupiter built there by Hadrian stood, as we have reason to believe, upon the site of the temple of Herod, which in its turn was only a reconstruction of the second (post-exilic) temple, and this again, of course, can only have been raised on the site of that of Solomon. It is only as regards the particular spot within the Ḥaram area that any dispute is at all possible. For example, Fergusson, Trupp, Lewin, W. R. Smith and others, have placed it in the south-western angle of the modern Ḥaram. This is, however, in view of the lie of the ground, quite impossible. The south-western angle of the Ḥaram, when strictly considered, lies not upon the eastern but upon the edge of the western hill. The temple, in that case, must be held to have stood on the steep slope of the hill towards the Tyropœon valley, entirely on artificial substructions. In fact, the southern half of the place cannot be thought of in this connection at all, for the site did not receive its great extension southwards until the time of Herod (see below, § 30).

5. Site of the temple.

W. R. Smith (*EB*(9), *s.v.* 'Temple') also starts from the assumption that the whole Herodian temple-complex lay in the SW. of the present Ḥaram. Now it is indisputable that the S. wall and the southern portion of the western wall of the Ḥaram are precisely those parts of the wall the external features of which betray a Herodian origin. Smith's contention, further, that the dimensions of the Herodian temple as given by Josephus, entirely exclude the sacred rock from the temple limits can hardly be maintained, as will presently be shown. Moreover, apart from any other consideration, his argument fails in view of the lie of the ground, as can very well be seen from his own map: between the SW. corner and the NW. corner of his temple area there is a difference of level of 50 ft.; between the SW. and NE. corner of his temple court, a similar difference of 90 ft. In other words: his temple stands entirely on the steep south-western slope of the hill, and numerous substructions would have been necessary in order to secure even the small area that was necessary; no less improbable is it that the temple should have stood on a level so considerably below the summit of the hill with the sacred rock where there was a fine level plateau.

On the other hand, considerations suggested by the history of religion speak very strongly in favour of the site of the present dome of the rock. In the East, from the remotest antiquity down even to the present day, sacred sites have always maintained themselves with unyielding tenacity through all religious changes. Thus there is a high degree of probability that what is to-day regarded as the centre of the whole, the sacred rock in the mosque of 'Omar, the second holiest site in all Islam, should from the first have been a particularly sacred point. The rock is doubtless to be regarded as the scene of the angelic appearance in 2 S. 24, which marked the place as a site of a sanctuary of Yahwè (cp Judg. 6 11 *f.* 13 19). The statement of the Chronicler that Solomon built his temple here at the threshing-floor of Ornan, has every probability in its favour. That the sanctity of the place goes back to a still earlier time is not unlikely.

In this case there arises only the question as to the place more precisely where the temple stood with reference to this sacred rock. Several scholars (Rosen, Schick, and others) have supposed that the rock was in the Holy of Holies and that the ark stood upon it. This is also an old Christian and Mohammedan tradition; that such a tradition was current among the Jews in NT times is evident from the Talmudic legend that in the Holy of Holies the place of the lost ark was taken by a stone called the 'foundation stone' (אבן שתיה, *Yōmā* 5 2). Further, this stone was identified with Jacob's stone at Bethel (cp Rashi on Gen. 28 and Breithaupt's notes). Both Mohammedans and Christians transferred these legends to the Ṣaḥra, which the former accordingly venerated as 'a gate of heaven' (Ibn 'Abd Rabbih, *'Iḳd*, 3 369). Mohammedan sources enable us to trace back this identification to the Moslem Jew Wahb ibn Monabbih, who enriched Islam with so many Jewish fables and died a century after Jerusalem was taken by the Arabs (Ṭabari 1 571 *f.*; Ibn al-Faḳīh 97 *f.*). Eutychius, on the other hand, who is the first Christian writer to apply the Jewish legend to the Moslem Saḥra, avers that the tradition was communicated to 'Omar by the Christian patriarch Sophronius on the taking of Jerusalem, and guided the caliph in the choice of a site for his mosque. This identification, however, is impossible, were it only by reason of the dimensions of the rock which is about 59 ft. [17.7 metres] long, 51¾ ft. [15.5 metres] broad, with a height above ground of 4 ft. 1¼ in. to 6½ ft. [1.25-2 metres]. The Holy of Holies, which was a cube of 20 cubits[1] was too small to contain it.[2] In other respects also the suggestion is attended with great difficulties on account of the conditions of space; the altar of burnt-offering would have to be moved considerably to the E. of the rock, thus leaving very little room for the court which was to accommodate the worshippers—unless great substructions on the E. be assumed, which is inadmissible (see PALACE, § 4).

In a word, there is everything in favour of, and nothing against, the theory that this rock was the site of Solomon's altar of burnt-offering (§ 18). This would fit in with the view that it was here the angel stood at the theophany. Further, on the rock there has been discovered a channel which may perhaps have served to carry off the blood (cp also Ebers and Guthe, *Palästina*, 1 66). This channel was connected with a hollow under the stone. Further examination has not been hitherto permitted; but it is extremely probable that this hollow is really a cistern connected with the general system of conduits (cp CONDUITS, § 3). If in accordance with what has been said we may regard this rock as being the site of Solomon's altar of burnt-offering, then the temple, properly so called, lay to the westward of this, and its site is determined with tolerable accuracy.

On the text of the description of Solomon's temple, cp what is said elsewhere with reference to the description of his PALACE, § 2. In the present case, also, after the many later additions have been separated out, we arrive at no clear account. Much that would be of importance is wanting; perhaps its disappearance is in some measure due to the frequent redactions. How manifold these were can be seen in the Commentaries (*e.g.*, Benzinger, *Könige*, 16 *f.*). For a reconstruction of the buildings some help can be obtained from the description of Ezekiel's temple (40 *ff.*). True, his temple is primarily a work of the imagination; but, on the other hand, his description, broadly speaking, agrees with 1 K. 6. That, as a former priest, he was familiar with the first temple may be taken for granted; there is also an *à priori* probability that in his description he would follow the lines of the old temple. Such changes as he does introduce are on the one hand occasioned by his desire for a scrupulous symmetry in the plan of his temple, and partly by his determination to remove the dwelling

6. The main buildings.

1 [It is assumed throughout this article that the longer cubit of 20.67 in. is meant; see WEIGHTS AND MEASURES, § 1.]

2 The threshing-floor of Ornan cannot have been on the rock, which has an irregular, not level, surface.

of the prince from the temple hill. The features that may be traced to the working of his free fantasy are in particular the specifications regarding the courts and the buildings contained in them. In matters where these points do not come into question we shall for the most part be safe in transferring his data without hesitation to the earlier temple.

The temple-complex fell into two divisions—the main building, the 'house of God' properly so called, and the subsidiary buildings by which it was surrounded.

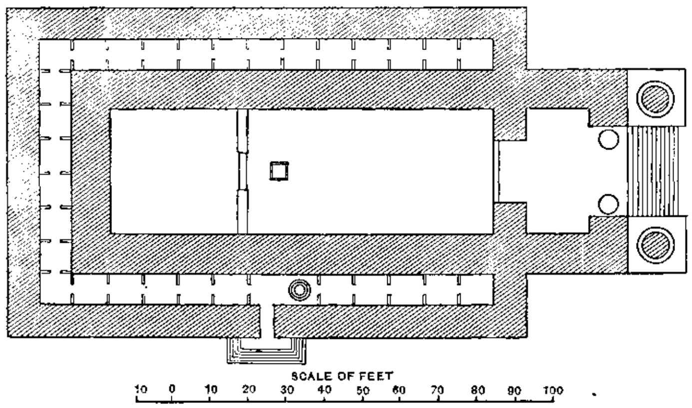

FIG. 1.—Ground-plan of the Temple.

The main building was a rectangular structure 60 cubits in length, 20 cubits in breadth, and 30 cubits in height, corresponding, on the basis of the cubit of 20.7 inches, in round numbers to 104, 35, and 52 feet respectively. It lay E. and W., with entrance from the E. The measurements given above are, as appears from the description of the *dĕbīr* (1 K. 6 16*a*, cp *v.* 20), and as is confirmed by Ezekiel's account, the internal dimensions.

On this assumption, indeed, we must suppose that either the total length (60 cubits) or one or other of the detailed figures for the Holy Place and the Holy of Holies is incorrectly given, as the dividing wall between the two must of course have taken up some space. The thickness of the walls is given by Ezekiel (41 15) as 6 cubits, a measure that may also be taken as applying to the old walls. At all events the walls, to begin with, were of considerable thickness as appears from the circumstance that for the second and third stories successively they were made thinner by rebatements of half a cubit, or it may be of a whole cubit (but see below, § 11).

Before the *hēkāl* (הֵיכָל), the Holy Place, eastward, stood a porch. Its length was the same as the breadth

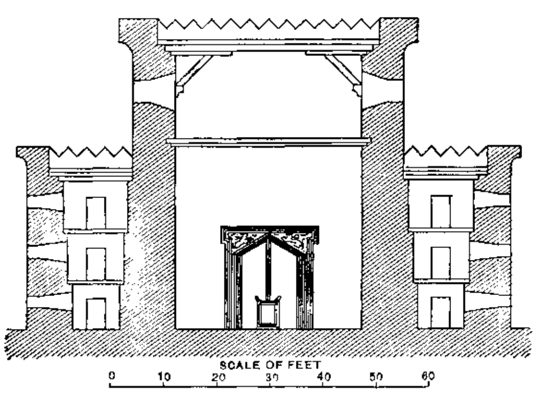

FIG. 2.—Section of the Temple.

of the house (20 cubits) and it was 10 cubits in depth; but its height is nowhere given either in Kings or in Ezekiel. The parallel place in Chronicles (2 Ch. 3 4) mentions 120 cubits, which is a sheer impossibility. The text is hopelessly corrupt; the 20 cubits of 𝔊A, Pesh., and Arab. are incorrect as appears from the data as to the height of the pillars (see below, § 12); these can hardly have been taller than the porch. Our most natural course will be to suppose for the porch a height equal to that of the temple itself, viz. 30 cubits. Perrot and Chipiez, and others with them, have sought to justify the 120 cubits in Chronicles by suggesting that the porch was similar to the pylons of the Egyptian temples; but neither the word *'ūlām* (אוּלָם) nor yet the other measurements would be appropriate to a gateway of this sort. In Ezekiel's temple one ascended to the porch by ten steps. This, we may take it, will have been in agreement with the actual facts.

7. Internal arrangements.

The internal space was divided, as already said, into two apartments, the larger in front and the smaller behind. The wall which separated them has, in Ezekiel's temple, a thickness of two cubits. From the description of the door it is clear that in Solomon's temple also the partition consisted of a solid wall, not of a curtain merely.[1] The door was made of olive wood and was pentagonal—*i.e.*, the lintel was not horizontal but formed an angle as Thenius rightly explains, 1 K. 6 31 (cp St. *ZATW* 3 148).[2] In Ezekiel's temple a breadth of 6 cubits is given to this door (Ezek. 41 2); whether this figure is applicable to Solomon's temple also we have no materials for determining. All that we learn further about it from our present texts is that it was a folding door, was decorated with carvings of cherubim, palm trees, and open flowers, and overlaid with gold. This notice, however (1 K. 6 32), does not belong to the old architectural description. If the walls of the *hēkāl* and of the *dĕbīr* were unprovided with carvings, we can hardly suppose that the doors were otherwise treated; and as for the overlaying, we learn from 2 K. 18 16 that it was Hezekiah who first overlaid the temple doors with gold.

The inner apartment (*dĕbīr*) was lower than the main building—being only 20 cubits in height. It thus formed a perfect cube, 20 cubits in the side. As we can hardly picture to ourselves the Holy of Holies as being merely a sort of low annex to the temple, we must suppose that above it there was an upper chamber of 10 cubits in height, and that thus the temple roof had a uniform height of 30 cubits from the ground. From 1 K. 8 12 *f.* (see Benz. *ad loc.*) we may venture to infer that the inner room was perfectly dark. This adytum, called later the Holy of Holies, was the most essential part of the temple. It was the dwelling-place proper of the

[1] According to 2 Ch. 3 14 there was a curtain before the entrance to the *dĕbīr*. This would not be improbable in itself; but there is no mention of it in the old description of the temple in Kings. Thenius, Riehm, and others indeed have found a curtain in 1 K. 6 21: 'he drew [the curtain] across with chains of gold,' etc.; but if these words belong to the original text they must relate to the altar; cp Benz. *ad loc.*

[2] The other interpretation (Ges., Bähr, Keil, and others) explains the חֲמִשִׁית of 1 K. 6 31 as meaning that the area of the door was a fifth of the entire superficial area of the wall. So also Klostermann with emendation: the lintel was a fifth—*i.e.*, of the transverse wall, which is equivalent to saying that the breadth of the doorway was a fifth of that of the house,—in other words 4 cubits. Both explanations are very forced. חֲמִשִׁית stands in contrast with רְבָעוֹת, 'square,' in 1 K. 6 23 7 5.

deity, whose presence here was represented by the sacred ark.

The walls of the *dĕbīr* were panelled with cedar; the floor was of cypress wood. According to the present text the walls were also overlaid with gold (1 K. 6 20); this, however, is a later addition to the text (see below).

The anterior apartment, the *hēkāl*, afterwards known as the Holy Place, was, as already mentioned, 40 cubits long, 20 broad, and 30 high. It also was floored with cypress and panelled with cedar, so that of the mason work nothing was visible.

8. The Holy Place.

Here again the statements as to the walls having been overlaid with gold (1 K. 6 21 22 *a* 30) are quite late additions to the text (see below, § 9). This apartment also was not particularly well lighted. Since the building that surrounded the house was 15 cubits in height and the *dĕbīr* had probably no window at all, we must suppose that such windows as the apartment had were situated above the 20 cubit level of the *dĕbīr*. We must further take into account the thickness of the walls which was such that even if the windows were made so as to widen inwards after the manner of embrasures (cp 1 K. 6 4 RVmg.), they could not have admitted much light. Add to this that they were provided with wooden lattices like the windows of dwelling-houses generally; so at least we are to interpret the expression *'ăṭūmīm* (אֲטֻמִים; cp Benz. on 1 K. 6 4). We learn further that the windows were casement windows—furnished, that is to say, with wooden frames and not mere openings in the stone wall, a refinement which was unknown in ordinary dwelling-houses. Also the doorway leading to the anterior room was provided with posts of olive-wood, and, in contrast to that leading to the Holy of Holies (see above), was rectangular in shape. The door was of cypress and either half consisted of two folding leaves which were so connected in some way with each other, by means of double hinges or charnières, that in entering one did not requre to open the whole door, but only the two inner leaves.[1] The width of the doorway is not stated; in Ezekiel's temple it was 10 cubits (Ezek. 41 2). Here also are repeated the statements as to overlaying with gold (1 K. 6 35). More particularly it is here stated that the covering of gold was fitted exactly on to the engraved design (מְיֻשָּׁר עַל־הַמְּחֻקֶּה). Thus the decorative work in question did not consist of figures carved in relief (Reliefschnitzereien), but of figures outlined on the flat (Konturenzeichnungen).

Stade (*ZATW* 3 140 *ff.*) has shown that the various statements as to the overlaying of the walls of the *dĕbīr* (1 K. 6 20), of the walls of the *hēkāl* (*vv.* 21 22*a* 30), of the doors (*vv.* 32 35), of the cherubim (*v.* 28), and of the altar in the *hēkāl* (*v.* 22*b*) with gold are all very late additions to the text.

9. Ornamentation and decoration.

From the point of view of literary criticism they can be shown to be such by the circumstance that they come in at the wrong place and moreover that, in part at least, they are absent from 𝔊. Besides, their incorrectness in point of fact appears from certain other data of the OT.

On the occasions when the temple is despoiled, the foreign foes and King Ahaz when in financial straits take everything of value, but the covering of gold is not mentioned, though this certainly would not have been left untouched had it existed (1 K 14 26 2 K. 14 14 16 17). On the other hand we are told of Hezekiah that he overlaid the doors and doorposts of the *hēkāl*; but it was not with gold (2 K. 18 16). Moreover, strictly speaking a covering of gold must be regarded as incompatible with the carving on the walls. The whole is taken from the description of the Tabernacle with its wealth of gold and transferred to the temple of the wealthy king, which, it was thought, was certainly not less costly (see Benz. on 1 K. 6 20).

That the temple walls were adorned with carvings is more credible. In Ezekiel's temple (41 17 *f.*) we read that the whole wall was in like manner decorated with carved cherubim and palms, a palm between two cherubs. Here, however, great suspicion cannot but be aroused by the fact that the relative notice (1 K. 6 18) is wanting in 𝔊, that the verse disturbs the connection in the most violent way, and that with its statement that 'all was of cedar' it is inconsistent with what has been said in 1 K. 6 15. Nevertheless, there is nothing improbable in the supposition that the temple walls were at a later date decorated with carvings (as we are led to infer from Ezekiel). Elsewhere, also, we read of later adornments of the temple (2 K. 12 8 *ff.* 29 16 10 *ff.* 23 4 11 *f.*). Thus we may safely regard the carvings as having been the work of a later king.

We are not told anything as to the construction of the roof of the building. Many scholars, such as Lund (see *Die alt.-jüd. Heiligthümer*), Hirt (see *Der Tempel Salomos*), Schnaase (*Gesch. d. bildenden Künste*, 1; 1843), take it to have been gabled; but according to 2 K. 23 12 2 Ch. 3 9 this cannot have been the case; the roof was flat.

10. Roof.

It is highly probable that, as in the case of the house of the forest of Lebanon (see PALACE), it was made of beams and planks of cedar. Upon this we may suppose to have been laid, for protection against the weather, a coating of clay, according to ancient custom, or perhaps even slabs of stone. The usual railing or battlement ran round it (cp Dt. 22 8). We must assume some sort of subsidiary arrangement for the support of the beams, since cedar beams of the length specified must have bent if unpropped. The text says nothing of this; but in the case of the house of the forest of Lebanon, where the span was much less (only 12½ cubits, about 21½ ft.), we hear of struts (lit. shoulder-pieces 1 K. 7 2 *f.* 𝔊, see Benz. *ad loc.* and PALACE, § 5, with illust.) on the pillars which served as supports for the beams of the roof. We must think of similar supports projecting from the walls in the case of the temple building.

The main building was surrounded on three sides (N., W., and S.) by a side building, or *yāṣūă'* (יָצוּעַ, AV 'chamber,' RV 'story') in three stories containing 'side chambers,' *ṣĕlā'ōth* (צְלָעוֹת AV 'chambers'; cp Ezek. 41 5 *f.*).

11. Side-buildings.

The under story was 5 cubits broad, the middle one 6 cubits, and the upper 7. The increasing width seems to have been obtained by narrowing the temple wall, which diminished in thickness by successive steps or rebatements on the outside (1 K. 6 6 RV). Thus the cedar beams which formed the floors (and the roofs) of the side chambers were not built into the temple wall but rested upon the rebatement (cp fig. 2).

Stade has conjectured—what is not at all improbable—that this was also the case with the exterior wall of the side-building. In that case the differential breadth of 1 cubit falls to be divided between the two walls; the thickness of the temple wall therefore diminished with each story by only half a cubit, which is much the more probable view. On this basis we shall have to suppose that the temple wall at the base of the middle story was still 5½ cubits thick, at the base of the upper story 5 cubits, and above the upper story 4 cubits thick (see fig. 2). The thickness of the external walls of this subsidiary building is not given in 1 K. Ezekiel gives it as 5 cubits, and this will doubtless have been the old measurement (Ezek. 41 9).

The height of each story from floor to ceiling was 5 cubits (1 K. 6 10), and thus the height of the whole structure over 15 cubits (3 × 5 cubits, plus the thickness of floors and roof). The number of the side chambers is not stated in Kings, but in Ezekiel it is given as 30 (or 33) for each story (cp Cornill and Bertholet on Ezek. 41 6). Thus they were very small; but this need not cause us any difficulty, as they were not used as living-rooms but only for storage of temple furniture and the like. We are left entirely without information as to the windows of the side building. On the other hand, with regard to the only door we learn that it was on the S. side (1 K. 6 8). The passage from one story to another was by means of steps, or more probably ladders, through openings in the roof (1 K. 6 8).[1] That

[1] Ewald, Keil, and others think of the doors as horizontally divided each into an upper and a lower half, of which only the lower had to be opened on entering. Against this cp Thenius on 1 K. 6 34.

[1] *Lūlīm*, לוּלִים is usually rendered as meaning a winding staircase. For this rendering reliance is chiefly placed on 𝔊

the several chambers of a story communicated with each other by means of doors may be taken for granted.

In front of the porch of the temple stood at the entrance two bronze pillars cast by Huram-Abi, a Tyrian artificer (see HIRAM 2); for further details see below, also JACHIN AND BOAZ. We are told that Jākīn was the one on the right—*i.e.* S.—Bō'az that to the left or N.; but what the names mean we do not know. Their precise position is a much disputed point. Many scholars, including Nowack (*HA* 2 33 *f.*), hold that they were engaged in the portal of the porch itself and that the lintel rested upon them. For this view reliance is placed mainly on Ezek. 40 49, where two columns to right and left of the entrance are mentioned over and above the pillars of the porch. This evidence, however, is not conclusive. To begin with, the very circumstance that Ezekiel does not give the columns the names handed down by tradition is in itself noticeable. It is very questionable, too, whether Ezekiel has these columns in his mind at all, and whether he has not rather dropped them altogether as he has done in the case of the brazen sea and the lavers. In 𝔊 (1 K. 7 45) is preserved the information that there were yet other pillars in the temple; these cannot well have stood anywhere else than in the porch where those of Ezekiel also are found; or, if we are to identify the latter with Jachin and Boaz, it still remains very possible that he deliberately not only suppresses their names but also assigns to them a quite different place which deprives them of all special significance. Some special significance they must certainly have had originally; the mere fact of their having special names would be enough to prove this: there would be no point in it if they were architectural ornaments merely. Nor is it possible to assign to them a structural value as supporting the roof, for it is certain that they did not stand in the inside. There is to be considered also the further circumstance that there were quite analogous pillars in other Semitic temples as well. In temples of Baal they are quite usual; the sanctuary of Melkarth at Tyre for example had two costly pillars in which Melkarth was worshipped (Herod. 2 44). The annexed figure, representing the temple at Paphos on a coin, exhibits the two pillars standing wholly detached to the right and left of the entrance. In front of the temple at Heirapolis, also, were similar pillars (WRS, *Rel. Sem.*[2] 208, 488). Since the temple of Solomon was assuredly affected by Syrophœnician influences it is natural to conjecture that in it Jachin and Boaz had a significance analogous to that of the other pillars just alluded to; namely, that they were symbols of the deity. In that case their origin will have to be sought in the ancient ***maṣṣēbōth*** which used to be customary objects in all Semitic sanctuaries, including those of ancient Israel (see MASSEBAH; also Benz. *HA* 379 *f.*; WRS, *Rel. Sem.*[2] 191, n. 1).

12. The pillars of bronze.

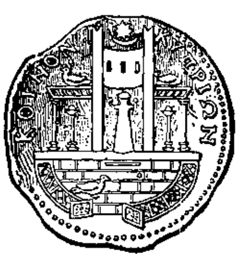

FIG. 3.—Coin representing temple at Paphos.

(ἑλικτὴ ἀνάβασις). This, however, is not a translation of לוּלִים but proceeds upon another reading (Benz. *ad loc.*). In buildings of the ancient E. no trace of winding staircases has anywhere been found, and it is therefore very improbable that they are mentioned here. Levy (*NHWB*) points out that the openings in the roofs of the Holy of Holies by which the workmen were let down (see below, § 33) are called לוּלִין (cp *Middōth*, 4 5). Thus, as Stade has rendered probable, we shall most likely have to think of openings provided with trap-doors and reached by ladders or trap-stairs.

TEMPLE, TEMPLE-SERVICE

This is not equivalent to saying that as late as Solomon's time these pillars were still regarded as symbols of Yahwè; we can equally well suppose that they were set up in accordance with an ancient custom no longer understood, or simply in imitation of Phœnician models. If the view just taken be correct, it becomes easy to understand why Ezekiel should have ignored them, or have sought to disguise their original meaning by reducing them to mere supports of the roof. And if so it also becomes highly probable that the Chronicler is right in assigning them a position in front of the temple (עַל־לִפְנֵי הַהֵיכָל). It would not be easy to guess how he could have come to place them so unless he had some old source to go upon, for the meaning of the pillars offered above was certainly unknown to him.

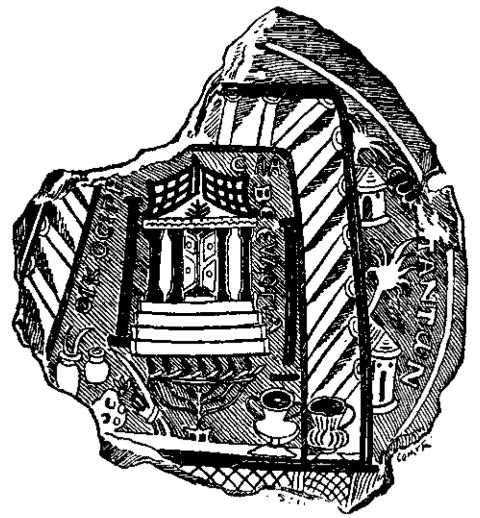

FIG. 4.—Glass bowl with representation of Temple.

The view that they occupied detached positions in front of the temple is confirmed by the interesting representation of the Jewish temple found upon a glass bowl of the third or fourth century A.D. which shows two

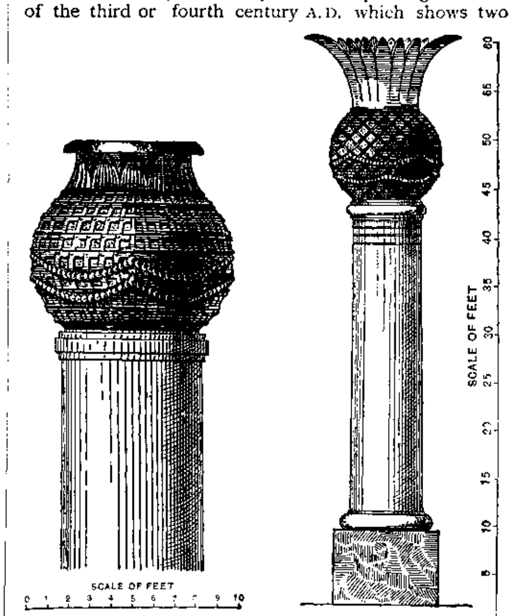

FIG. 5—Brazen pillars.

quite detached pillars near the entrance. The detailed description of the pillars has been preserved in a threefold form (1 K. 7 15-22 41 *f.* 2 Ch. 3 15-17 Jer. 52 21-23

2 K. 25 17), in accordance with which Thenius was able to restore the text of the account with considerable accuracy. Each of the pillars was 18 cubits (about 30 ft.) in height, and 12 cubits (𝔊 wrongly 14 cubits) in circumference. They were hollow, the brass being 4 finger-breadths in thickness. Each was surmounted by a molten chapiter, or capital, 5 cubits in height. The capitals were covered with bronze net-work which was surrounded by two rows of pomegranates. The one questionable datum is that of 1 K. 7 19 where the meaning can be either that the capitals were curved outwards at the top after the fashion of lilies (as is also said, for example, of the brazen sea), or that above the capitals there were lily-shaped additions (cp Benz. on 1 K. 7 15).

13. Court and gates. The temple was surrounded by a court, called the 'inner' court, as distinguished from the great court enclosing the entire citadel. This inner court was surrounded by a wall of three courses of hewn stone surmounted by a course of cedar beams (1 K. 6 36). As to the dimensions of the court, its entrances, or any other architectural details the description in 1 K. says nothing. The measurements in Ezekiel (100 × 100 cubits) are not to be transferred to the old temple, since with that prophet the court had quite a different function. He makes it accessible to the priests alone; whence the Chronicler actually describes it simply as the 'Court of the Priests' (חֲצַר הַכֹּהֲנִים; 2 Ch. 4 9). In ancient times and down to Ezekiel's day everyone had free access to it; it was a place of public assembly as we can see from such passages as Jer. 35 1 *ff.* 36 10 2 K. 12 12. For the position it occupied in the complex of buildings, see PALACE, § 3. In Jer. 36 10 it is quite rightly designated as the 'upper forecourt' as it was higher up than the great palace court. By the 'new gate' one went down from it to the king's house (Jer. 26 10 36 10). This designation 'new gate' tells us that it must have been restored by some later king; for of course there can be no question of an entirely new gate, such as had never stood there before; there must always have been some way by which the king could pass northwards from his palace to the sanctuary. The same will hold good also of the 'upper' gate which according to 2 K. 15 35 was built by Jotham; here also we have to do merely with a restoration of an ancient gate. We may with considerable confidence seek for this gate on the upper, that is on the northern, side of the court, and thus identify it with Ezekiel's 'north gate' (8 3 9 2) and with Jeremiah's 'upper gate of Benjamin' (20 2), since the road to Benjamin lay northward. If this N. gate is called the gate of the altar in Ezek. 8 15 we shall best explain the designation as referring to the fact that it was the people's usual way of access to the altar. Other expositors (such as Graf) think of 2 K. 16 14 where we are told that Ahaz set up the old altar on the N. side of the forecourt. This N. gate appears also in Ezekiel's temple as the chief entrance (46 9 40 38 *ff.*). Whether Solomon's temple had a third gate—to the E.—is not certain; but it is probable. Ezekiel's temple has one such gate which is opened only on Sabbath and feast days and reserved for the prince (Ezek. 46 *ff.*). But in the old temple, where the royal palace stood immediately to the S. of the court, the king of course approached the sanctuary direct from his house. If, accordingly, the Chronicler (1 Ch. 9 18) speaks of a 'king's gate,' there are only two possibilities; either he means the S. gate and is to this extent aware of what the ancient conditions were, or he means the E. gate, in which case he is simply transferring without criticism to the older period the circumstances which existed in his own time. On the other hand, in Jer. 38 14 we read of a third entrance, and such a third gate can best be looked for on the E. side. The mention also of three 'keepers of the threshold' (2 K. 25 18 Jer. 52 24) points to the existence of three gates. We further learn of the temple court that it was already paved in the pre-exilic time (2 K. 16 17). So also that in the same period there were 'chambers' in it. Jer. 35 4 mentions a 'chamber of the princes' (*liškath haś-śārīm*, לשכת השרים) which was above a 'chamber of Maaseiah, the keeper of the threshold,' and adjoined that of the 'sons of Hanan.' According to Jer. 36 10 Baruch read the book of the words of Jeremiah in the chamber of Gemariah, which was situated at the entry of the New Gate. Here we are doubtless to understand partly chambers which served as lodging for various officials, partly store-rooms for temple equipments. In the temple of Ezekiel a series of cells are provided for the priests on the N. and S. side of the court (Ezek. 40 44 *ff.* 42 1 *ff.*).

14. Equipment: the ark. The sacred object *par excellence* in this royal seat of worship was the ark of Yahwè (see ARK) which had its place in the Adytum (דְּבִיר *dĕbîr*), the dark inner chamber, and in the ancient view represented the presence of the deity. It is remarkable to find in the temple of Solomon this special significance of the ark weakened by the addition to it of two cherubim. These stand 10 cubits high, their wings each measure 5 cubits; the wings stretching inwards touch one another in the middle of the house, those stretching outwards touch respectively the N. and S. walls of the *dĕbîr*. Their faces are turned towards the E. Beneath the wings that touched one another was the ark. On the form, origin, and meaning of these figures see CHERUB (cp also Benz. on 1 K. 6 30). What is of special interest to note here is that the cherubs are the bearers of Yahwè, the signs and witnesses of his presence (Ezek. 18 10 19 *f.*); it is on this account that we read of Yahwè as throned above the cherubim (Ps. 18 10 [11]), and the name Yahwè, the Lord of hosts, now receives the addition 'who sitteth upon the cherubim' (1 S. 4 4 2 S. 6 2). In accordance with this the *dĕbîr* is regarded as an extension of the ark just as the *Ka'ba* at Mecca is an extension of the sacred stone (see above, § 1 end, n.).

15. The brazen serpent. Another quite peculiar symbol of deity which had not its like at the other sanctuaries was the brazen serpent, Nehuštan. It stood in the temple—whether in the Holy of Holies or in the outer chamber we are not told. Down to Hezekiah's reformation incense was offered to it. On its origin and meaning, cp NEHUSHTAN. The absence from the accounts of the temple which have reached us of any reference to this, which a later age had learned to regard as an idolatrous object, is easily intelligible; and, besides, it is not to be assumed off-hand that this serpent had its place in the temple from the first.

16. Table of shewbread. In the outer chamber of the *hēkāl* stood, in front of the entrance to the *dĕbîr*, the table of shewbread (1 K. 6 20). This was an altar of cedar wood which is not further described in the account of the temple in 1 K., but Ezekiel's description of the corresponding object will doubtless apply here.

According to this, it was 2 cubits in length and breadth and 3 in height; doubtless, therefore, there were steps up to it. Further, it had, as was usual with altars, 'horns'—*i.e.*, corner-pieces resembling horns (Ezek. 41 21). According to 1 K. 6 20 *f.* it was overlaid with gold; but to this statement will apply what has already been said of the corresponding statements elsewhere (§ 9); it is a later addition. The table of Ezekiel is plain cedar. The use of the table is for offering the so-called shewbread (see SACRIFICE, §§ 14, 34 *a*). In order to be able to make out from Solomon's temple the existence of an altar of incense not otherwise mentioned, Keil and others will have it that this is the altar in question. A table of cedar, however, even if thinly plated with gold, would be useless for the purpose of burning incense. Moreover, the offering of shewbread indeed is attested from an early date (cp 1 S. 21), but there is no evidence of any regular offering

of incense such as would have demanded a special altar. In 1 K. 7 48 an altar of incense is mentioned along with the table for the shewbread; but both this verse and that immediately following it are later additions to the account of the temple (see Benz. *ad loc.*). In ch. 6 there is nothing of any such altar, which indeed makes its appearance only in later strata of P.

Similarly, it is only in a late appendix (1 K. 7 49) that the golden candlesticks said to have been made by Solomon are mentioned. When this is said it is not of course meant that there were no candlesticks at all in the temple. It is an ancient custom to keep a light or lamp constantly burning in dwellings; if at the present day in conversing with fellahin or bedouin of Palestine one says 'He sleeps in the dark,' what is meant is that he is so poor that he cannot buy himself a drop of oil. The Hebrew expression that speaks of a man's lamp as having gone out, meaning that he and his family have disappeared, is analogous (cp Jer. 25 10); see LAMP. This custom makes it probable that a light was also burnt in the sanctuary, the dwelling-place of Yahwè; according to 1 S. 3 3 this was the case during the night at all events. From what has been said above (§ 7 *f.*) as to the lighting of the *hēkāl* it will also be apparent that the use of artificial light in the temple cannot have been out of place; we shall not err therefore if we suppose that Solomon caused lampstands to be made by Huram-Abi—of bronze, however, not of gold. The number 10, too, can hardly be right; as the tabernacle had only one candlestick it would probably be nearer the truth to assume but one for the temple also. That there is no mention of the candlesticks in 2 K. 25 14 *f.* may be due to accident merely (cp Jer. 52 19, which verse, however, is regarded by Stade, in view of Ex. 25 29, as an interpolation; see *ZATW* 3 [1883] 173 *f.*). Cp CANDLESTICK.

17. The candlesticks.

In 2 Ch. 4 8 mention is also made of ten tables, five on the S. and five on the N. side of the sanctuary. These are often explained (as for example by Keil) as having been intended for the shewbread, but certainly not correctly (see above, cp 2 Ch. 13 11 29 13); they are rather to be placed in the same category as the ten candlesticks (see Bertheau on 2 Ch. 4 19).

To the temple service also pertained of course a variety of minor furnishings, such as knives, forks, dishes, and the like. In 1 K. 7 48 *ff.* these are introduced by a later hand and represented as having been of gold. In the original description they were either passed over without mention, or they have been removed from it to make room for this later notice.

18. The bronze altar.

In the forecourt, due E. from the temple entrance, stood the great altar of burnt offering. In our present text this is left wholly undescribed. But that a description of it once stood in this place, and that Solomon caused an altar of bronze to be made by the same Tyrian artificer who cast the other pieces, are facts attested by 1 K. 8 64, cp 2 K. 16 10 *ff.* A later redactor stumbled at this, for in his view there already existed in connection with the tabernacle an altar which was now transferred to the temple. Here also we may, generally speaking, suppose Phœnician influences to have been at work. The mere fact that the altar was of bronze shows this, for in old Israelite practice altars were made of earth or unhewn stone: cp the law of the altar as laid down in Ex. 20 24 *ff.* In 2 Ch. 4 1 some additional data are given as to the size of this altar; it is represented as having been 10 cubits in height and 20 in length and breadth. These are the measurements of Ezekiel's altar, and may safely be presumed to have been taken from the ancient altar, which in other respects also must have been the prototype of that of Ezekiel. The dimensions given (20 × 20 cubits) will therefore apply to the area of the base, from which the altar rose in three successive stages each diminishing by 2 cubits; the lowest was 2 cubits and each of the other two was 4 in height. The actual hearth was 12 cubits square, and it was reached by means of steps. Cp further ALTAR.

TEMPLE, TEMPLE-SERVICE

To the service of the altar belonged a variety of utensils which were also cast by Huram-Abi. See Benzinger on 1 K. 7 40 45; ALTAR, § 9.

19. The brazen sea and lavers.

Between the altar and the porch, to the SE. of the temple building, stood the great brazen sea (1 K. 7 23-26), as to probable shape and significance of which see SEA (BRAZEN). To this brazen sea belong the ten wagons (AV bases, מְכֹנוֹת, *mĕkōnōth*) with lavers, which were arranged, five on the S. side and five on the N., of the temple (1 K. 7 27-39).

The text of the description of these lavers is extraordinarily corrupt, and inasmuch as the parallel description of the Chronicler is no longer extant, whilst the LXX offers but few data on which a restoration could proceed, it is by no means easy to amend it satisfactorily, and many details in the description, after every effort, still remain obscure.[1] The following description rests on the reconstruction of the text upon which Stade proceeded in 1883 (so also Benz. *ad loc.*); in many details Stade has since (1901) preferred a different interpretation. The various particulars cannot be discussed here.

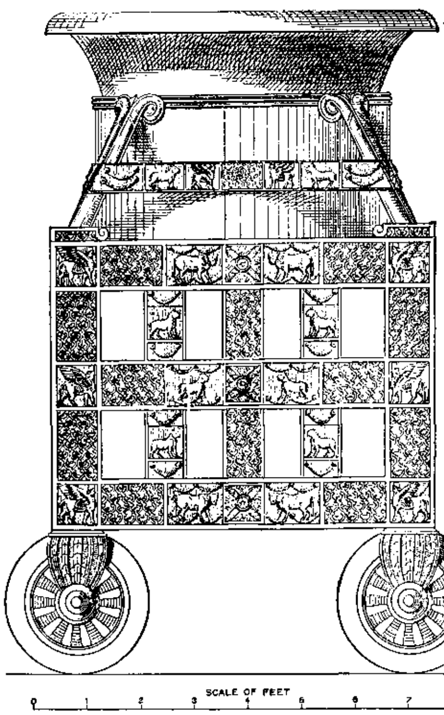

FIG. 6.—The brazen laver.

The wagons which support the lavers are 4 cubits in length and breadth and 3 in height. Their sides are not of massive plates but consist of a brazen framework ornamented with ties or cross-pieces of brass (*misgĕrōth*, EV 'borders'). The ties were subsequently removed by Ahaz for the sake of the metal, so that the frames alone were left (2 K. 16 17). Frames and ties were decorated with lions, oxen, and cherubim. The whole structure was carried on brazen axles and wheels. Upon each stand rested a brazen laver, of 40 baths capacity (see WEIGHTS AND MEASURES, § 3 [ii.]), having a diameter of 4 cubits (equal to the length and breadth of the stand). The statement as to the cubic capacity accords with the diameter given (see SEA [BRAZEN]), but the lavers were certainly shallower, and we must also allow for the thickness of the metal. As for the manner in which the lavers were mounted in the stands

[1] Cp Ewald, *Gött. Gel. Nachr.*, 1859, pp. 131 *ff.*, *Jahrbb. f. bibl. Wissensch.* 10 273, and *GVI*(3) 3 333 *f.*; Stade, *ZATW*, 1883, and 1901, 145 *ff.*; Benz. in *KHC* (*Kön.*); Kittel in *HK* (*Kön.*), and art. LAVER.

the most probable conjecture seems to be that a sort of hollow cylinder rested upon the stand and was firmly fixed to it by means of ties and struts; the upper end of this cylinder supported the laver. At a later date these lavers proved stumbling blocks as well as the brazen sea. They are absent alike from the temple of Ezekiel and from the tabernacle of P. In lavers and sea alike we may therefore safely conjecture the original meaning to have been a symbolical one. The cherubims and animals with which they were adorned had at first assuredly a mythological significance. Nowack and others with some probability bring the lavers into connection with the chariot of the cherubim in Ezek. 1; there the cherubs are the bearers of the cloud-throne, here of the collected waters. Kosters (*Th. T.* 1879, p. 455) explained them as symbolising the clouds. This is possible (see SEA, BRAZEN), but cannot be made out with certainty. The Chronicler disposes of any difficulty of this kind connected with these vessels by assigning to lavers and sea alike a highly prosaic function, that of supplying the water required in connection with the sacrifices. It can hardly be said that they were conspicuously well adapted for any such purpose.

20. Meaning and origin of temple plan.

If we proceed next to a consideration of the meaning and origin of the whole temple plan, it is plain at the very outset that it reproduces the fundamental type of the Semitic sanctuary, viewed as the abode of the deity in the sense already set forth (see § 1). The essential feature is the little cella, the *dĕbīr*, where the deity himself is conceived of as present in mysterious gloom. In front of this is a greater hall, comparable to the audience-chamber of human kings, where the deity receives the adoration of his worshippers. Finally, in front of the building is an open space with its altar, where the people can gather together around the sacrifice in reverential stillness.

This ground plan—the tripartite—is common to the temples of various peoples. It is seen particularly clearly in Egyptian temples, which has led many scholars (Benz. *HA*, 385) to think of a preponderant Egyptian influence here. There are other considerations, however, which serve to render this less probable. In the case of the other Solomonic buildings Syro-phœnician influence is quite unmistakable (cp PALACE). Phœnician architects built temple as well as palace, and can hardly fail to have embodied their ideas in both. In point of fact all the noteworthy features of a distinctive kind in the temple buildings of Solomon have been discovered also in the temples of the northern Semites. Puchstein (*Jahrb. d. kaiserl.-deutschen archäol. Inst.* 7 13), on the basis of a comparative survey of the extant architectural remains, thus characterises the Syrian temple: 'To judge by the (as yet not very numerous) certain examples of Syrian temple-architecture, a complete old Syrian temple consisted of portico, cella, Holy of Holies, and side-buildings. Portico and side-buildings are to be regarded as capable of being dispensed with according to circumstances. The Holy of Holies can be open or closed, on a level with the cella or above it, semi-circular or angular, and the side-buildings can be either divided or undivided.' Robertson Smith (art. 'Temple' in *Ency. Brit.*(9)) points especially to the temple at Hierapolis (*Mābūg*), which, as described by Lucian, offers an exact parallel. It faced the E. and had two cellæ and a *pronaos*. In front of the door stood a brazen altar in a walled court. This walled court is also one of the characteristic peculiarities of the Syrian temple (cp T. L. Donaldson, *Architectura Numismatica*, London, 1859; Renan, *Mission de Phénicie;* Perrot and Chipiez, *Art in Jud.*). On details of decoration, cp CHERUB. The palm tree, likewise so prominent a *motif* in the temple, is also one of the commonest symbols in Phœnician art.

When Solomon built his temple, it was as a royal private chapel, one sanctuary among many, and not even the most famous of these; the ancient sanctuaries of Bethel, Beersheba, Dan, etc., long continued to rank far above it in the popular estimation.

21. History of Solomon's temple.

The development in the standing of the temple and its importance in the history of Israel need not be dwelt on here (see DEUTERONOMY, § 13; ISRAEL, § 33 *f.*; LAW LITERATURE, § 13); but it falls within the scope of the present sketch to trace the external history of the temple building itself. Unfortunately, here also our sources are far from copious, and sometimes what has reached us is far from clear. Of Jehoshaphat the Chronicler relates (2 Ch. 20 5) that he built an outer court. The form of the notice—that it is with an 'outer' court that we are now concerned (see above § 13)—is due to the Chronicler; but the fact itself need not on that account be questioned. Under Joram, Ahaziah, and Athaliah the sanctuary must have been greatly neglected and allowed to fall into disrepair; under Joash at least extensive repairs had become necessary (2 K. 12 4 *ff.*). Jotham built a new gate, the 'upper gate' of the minor forecourt (2 K. 15 35) already referred to. The 'godless' Ahaz also beautified the sanctuary, although, indeed, this is set down by the narrator to his discredit; he caused a new and more magnificent altar after the pattern he had seen at Damascus to be set up in place of the old. Afterwards indeed he found himself in such monetary straits that to meet the demand of the king of Assyria he found himself compelled to strip off the ties (EV 'borders,' *misgĕrōth*) of the lavers, and to melt the oxen of brass which supported the brazen sea (2 K. 16 14 *ff.*)—an incidental illustration of the freedom with which the kings acted within their own private sanctuary. In the spoiling of the temple it was no other than the pious Hezekiah who followed the example Ahaz had set; after having in prosperous days overlaid the door-posts and doors of the temple with gold, he found it necessary to strip them again to meet the demand of the Assyrian king (2 K. 18 16). The structural changes made in the temple by Manasseh were connected with his introduction of foreign eastern cults; on the temple roof and in the court he set up altars to the 'host of heaven' (2 K. 23 12); the houses for the hieroduli and the accommodation for the horses of the sun (2 K. 23 7 11) are doubtless also to be assigned to Manasseh's reign. Josiah removed all this, and took in hand extensive restorations of the temple fabric (2 K. 23 5 *ff.*).

According to our present accounts the temple was plundered by foreign foes four times before its final destruction by the Babylonians.

First by Shishak in Rehoboam's time (1 K. 14 26); again, under Joram's reign, by the Philistines in conjunction with Arab tribes (Joel 3, cp 2 Ch. 21 16 *f.* 22 1); a third time under Amaziah by Joash, king of Israel (2 K. 14 14); and a fourth time under Jehoiachin by Nebuchadrezzar (2 K. 24 13). These all contented themselves with robbing the temple of its treasures, without carrying the work of destruction farther so far as we know.

It was not till eleven years after the first appearance of Nebuchadrezzar that the building itself was burnt to the ground, after it had been stripped of everything valuable,—whether of gold, silver, or bronze,—the pillars also being broken up and carried away (2 K. 25 8 *ff.* Jer. 52 12 *ff.* 2 Ch. 36 18). This was according to the MT of 2 K. on the seventh of the fifth month, according to Jer. on the tenth day of the fifth month, and according to $\mathfrak{G}^L$ of 2 K. 25 8 on the ninth day of the month. The Talmud harmonises:—on the seventh day the Chaldæans forced the temple, on the evening of the ninth they set fire to it, and on the tenth it was destroyed.

Ezekiel's temple (Ezek. 40-43)[1] never got beyond the

[1] The text of Ezekiel's description of his temple is very corrupt. It is impossible therefore to reconstruct it with exactitude. Consult especially Cornill's edition of the text; as also the commentaries of Smend and Bertholet, and the Archæologies of Benzinger and Nowack. On Ezekiel's altar cp *ZKWL*, 1883, pp. 67 *ff.* 458 *ff.*, 1884, pp. 496 *ff.*

theoretical stage, and remained always an imaginative construction merely. It demands some notice here, however, as giving expression to a new conception of the sanctuary and its significance—new or at least differing from that which finds expression in the temple of Solomon. On the other hand, as already remarked, the later representation is, as has been pointed out above, in many respects fitted to be of use to us in our reconstruction of the earlier temple. The fundamental conception of the entire structure is the strict separation of sacred from profane. The whole temple area is sacrosanct, and no secular building of any description, whether royal or official, is allowed a place within its precincts. The whole eastern hill is set apart for its exclusive occupancy. A protective area, the land of the Zadokites, encloses it and shuts out the rest of Jerusalem. At no point are the city walls allowed to be in immediate contact with this land of priests. A similar determination to separate sacred from profane dominates the internal arrangements. It is with this purpose in view that the temple has two courts (whereas the pre-exilic temple had but one); the inner court is accessible only to the officiating priests and their servants the Levites. The laity are restricted to the outer court.

22. Ezekiel's temple.

Another characteristic feature of the whole arrangement is the strict symmetry observed throughout. The fundamental unit of measurement is the length of 50 cubits; the buildings exhibit by preference the proportion of 1 : 2; the gateways are 25 cubits in width and 50 in length, the temple proper 50 cubits (from end to end 100), the open space surrounding the altar is 100 cubits square, and so forth. The entire temple area is 500 cubits square, enclosed by a wall 6 cubits in height and thickness. Outside this wall a further strip, 50 cubits in breadth, is still reckoned to the holy territory, and must not be cultivated even by the priests. The northern, eastern, and southern sides are pierced at the middle by great gateways (25 × 50 cubits), each with siderooms and a gateway. These lead into the outer court which surrounds the inner to a breadth of 150 cubits on the northern, eastern, and southern sides. On each of these three sides are 10 cells—making a total of 30—intended to be used by the people for miscellaneous purposes such as refreshment and the like (cp Ezra 10 6 Neh. 13 4 *f.*). In the four corners are lesser courts separated off by partitions; here are the kitchens where the Levites cook the offering of the people. Gateways corrresponding exactly to the three gates just mentioned lead on the three sides from the outer to the inner court. Within and in close proximity to the eastern gate stand the tables for slaughtering the sin- and trespass-offerings (or burnt offerings and peace-offerings). At the N. and S. gates are chambers for the officiating priests. Exactly in the middle of the square in front of the temple stands the altar of burnt offering. The temple building itself, which stood on a higher level reached by ten steps, consisted of a porch (20 cubits in width and 12 in depth), the Holy Place (40 × 20 cubits, inside measurement), the Holy of Holies (20 × 20 cubits) and the three-storied side-building. The thickness of the walls was, in the main building, 6 cubits, and in the side building 5; the width of the chambers was 4 cubits, the total breadth thus amounting to 50 cubits. The total length, including the porch, was 100 cubits, outside measurement.

23. Zerubbabel's temple.

As the Chronicler relates, the first care of the exiles on their return was the restoration of divine worship. In the first instance, however, they contented themselves with setting up a new altar of burnt offering on the site of the old (Ezra 3 3; cp Hag. 2 14). So much indeed was evidently indispensable; without an altar there could be no sacrifice, without sacrifice no worship, without worship no Jewish community. A considerable time elapsed before the returned exiles proceeded to the building of a temple proper. In our present book of Ezra indeed it is made out as if the work was begun with great zeal immediately after the return. It has long been recognised, however, that the representation in Ezra in its essential features is unhistorical (see EZRA-NEHEMIAH, §§ 6 *f.*, 10, 16 [1], 17; HAGGAI, § 3 (*b*); ISRAEL, §§ 53 *ff.*).

24. Measurements, etc.

As regards the build ng itself the OT supplies us with only a few fragmentary notes, which are but sparingly supplemented by Josephus and Pseudo-Hecatæus (ap. Jos.). The dimensions of the whole temple area are given by Hecatæus (ap. Jos. *c. Ap.* 1 22), in so far as he tells us that the court was 5 plethra (*i.e.*, 500 Gk. ft. = 485½ Eng. ft.) in length, and 100 Gk. cubits (= 145½ ft.) in breadth. The gates had double doors. Within the court stood the altar which now was in exact accordance with the precepts of the law, being constructed of unhewn stones (1 Macc. 4 44). Doubtless also it was reached by a sloping ascent instead of steps. According to Hecatæus it was as large as that of Solomon. In like manner, in accordance with the description of the tabernacle arrangements, there was but one laver in the court (*Midd.* 3 6; Ecclus. 50 3: the latter passage is certainly very corrupt). Of the gates mention is made in Neh. 3 31 of the Miphkad Gate, and in Neh. 12 39 of the Prison Gate, which last doubtless was on the southern side. Whether the cells and store-rooms (*liškōth*; παστοφόρια) of which we incidentally hear, were in the court or in the side-building of the temple itself we do not know.[1] Over the Tyropœon valley was a bridge from the temple area which was broken down by the Jews during the siege of Jerusalem by Pompey; its position is indicated by the so-called Wilson-arch. When it was erected we do not know (Josephus, *Ant.* xiv. 4 2; *BJ* i. 7 2 ii. 16 3 vi. 6 2). Like Ezekiel's temple this also had two courts (αὐλαί, 1 Macc. 4 34 48): only—the point of chief importance—the laity had in this case access to the inner as well as the outer court and to the altar. When on one occasion Alexander Jannæus did something that was contrary to to the sacrificial ritual, the multitude pelted him with palm branches and citrons. It was only in consequence of this incident that he afterwards caused a wooden enclosure to be set up round the altar, the space within which was thenceforth accessible to the priests alone (Jos. *Ant.* xiii. 13 5). The whole account of Josephus presupposes that until that time the laity had unhindered access to the inner court and altar. In this most essential matter of the strict exclusion of the laity from the sanctuary proper, accordingly, we see that the demands of Ezekiel and P were not carried out immediately but only gradually made way.

The temple building itself, according to Ezra 6 3, had a breadth and height of 60 cubits. But this statement has no satisfactory sense. It is all the less credible because we are expressly informed that this second temple came so far short of that of Solomon that in the eyes of those who had seen the first it appeared as nothing (Hag. 2 3). Certainly, therefore, it cannot have been so very considerably larger than the other. The text of the passage is hopelessly corrupt (cp also Ryssel and Bertholet *in loc.*).

25. Internal arrangements.

As regards the internal arrangements, we know that the Holy of Holies was empty; the ark no longer existed. A stone three fingers in height was laid in the place of the ark, so that the high priest on the Day of Atonement could set down his censer upon it. It was the foundation stone (*ében šĕthiyyāh*) already referred to in § 5; cp Jos. *BJ* v 5 5, *Yōmā* 5 2). The Holy of Holies were separated from the Holy Place by a curtain (1 Macc. 1 22 4 51).

The Holy Place, in like manner, was closed by a curtain (1 Macc. 4 51); within it stood, as in the former

[1] Cp 1 Macc. 4 38; Jos. *Ant.* xi. 4 7 xiv. 16 2; Ezra 8 29 10 6 Neh. 3 30 10 37 *ff.* 12 44 *ff.* 13 5 *ff.*

temple, a table of shewbread. The place of the ten candlesticks (see § 17) was taken by one with seven branches which was removed by Antiochus (1 Macc. 1 23). It was restored by Judas the Maccabee. The Holy Place also contained the golden altar of incense. As already mentioned, this was a quite recent arrangement, resulting from a duplication of the golden table. It is interesting to notice that the accounts continue to vacillate down to a quite late date; Hecatæus and the author of 2 Macc. 2 5, each naming two pieces of furniture in the sanctuary: the former (Jos. *c. Ap.* 1 22) the βωμός and the candlestick, the latter the incense altar and the candlestick. On the Arch of Titus, also, only two pieces are shown.

26. A priestly temple. The first temple resembled other temples of antiquity in being built to contain a visible symbol of the presence of the deity, namely, the ark, which stood in the inner chamber. In the second temple the adytum was empty; but the idea that the Godhead was locally present in it, still found expression in the continuance of the altar service, in the table of shewbread (a sort of continual lectisternium) that stood in the outer chamber, and above all in the annual ritual of the Day of Atonement, when the high priest entered the Holy of Holies to sprinkle the blood of the expiatory sacrifice on behalf of the people.

Not only in this point but in all others the ritual of the second temple was dominated by the idea of priestly mediation, and the stated sacrifices of the priests on behalf of the people, which took the place of the old stated oblations of the kings, became the main feature of the altar service. The first temple was primarily the royal chapel, and the kings did as they pleased in it; the second temple was the sanctuary of the priests, whose chief now became the temporal as well as the spiritual head of the people. In the time of Ezekiel, not only laymen but uncircumcised foreigners entered the sanctuary and acted as servants in the sacred offices (Ezek. 44 7); in the second temple the laity were anxiously kept at a distance from the holy things, and even part of the court around the altar was fenced off, as we have just seen, by a barrier, which only the priests were allowed to cross (Jos. *Ant.* xiii. 13 5).

27. History of second temple. As regards the later history of Zerubbabel's temple, the subsequent works upon it and the strengthening of the wall surrounding the outer court are associated with the name of the high priest SIMON II. (Ecclus. 50 1). Antiochus Epiphanes not only plundered it, but desecrated it by setting up on the altar of burnt offering a small altar to Jupiter Olympius (1 Macc. 1 23 *ff.* 44 *ff.* 54 4 38 2 Macc. 6 2 *ff.*). Three years later, after the reconquest of the city, Judas the Maccabee restored the temple, set up a new altar with new furniture, and consecrated the building anew (cp 1 Macc. 1 23 *ff.* 4 43 *ff.* 52 *f.* 2 Macc. 10 5 Jos. *Ant.* xii. 7 6). At the same time he fortified the temple with high towers and walls (1 Macc. 4 60 6 7), so that the temple thenceforward could be regarded as the citadel proper of Jerusalem. These fortifications were demolished by Antiochus II. Eupator (1 Macc. 6 22); but they were again restored by Jonathan (1 Macc. 12 36 Jos. *Ant.* xiii. 5 51), and at a later period further strengthened by Simon (1 Macc. 13 52). At the time of Pompey's siege (63 B.C.) the temple was an exceptionally strong fortress, defended on the northern and more accessible side by towers and deep ditches (*Ant.* xiv. 4 2). Pompey took it by storm, but left the sacred vessels untouched (Ant. xiv. 4 7). Crassus, on the other hand, plundered it without mercy (*Ant.* xiv. 7 1, *BJ* i. 8 8). The temple was again besieged and stormed by Herod; like Pompey he concentrated his attack on the north side. In this siege some of the temple cloisters were burnt and some persons killed; but the desecration stopped at this (*Ant.* xiv. 16 2 *f.*).

28. The temple of Herod. In the twentieth year of his reign (20-19 B.C.) Herod the Great began to build the temple anew. Besides the descriptions in Josephus, we have for Herod's temple a mass of details and measurements in the Mishnic treatise *Middōth.* Josephus was himself a priest, whilst the Mishnah was not written till a century after the destruction of the temple, though it uses traditions that go back to Levites who had served in the temple. The two sources differ in many measurements, and the *Middôth* appears to be possessed of detailed traditions only for the inner temple. The state of the evidence is not such as to allow a plan of the temple to be formed with architectural precision. The following account rests almost entirely on Josephus, who, apart from certain exaggerations in detail, gives a satisfactory general account, such as could be written from memory without notes and drawings (for literature, see § 43).

29. Herod's motives. Herod's motives in this undertaking were not so much religious as political. On the one hand it afforded him an opportunity of giving some satisfaction to the religious feelings of his Jewish subjects, which he had so often outraged, and of gaining some favour in pious circles throughout the country. On the other hand, he had his full share of the passion for building, which characterised that age. After raising so many splendid temples in the various Greek cities of his kingdom, it seemed hardly fitting that the temple of his capital should fall behind the others in magnificence. His preparations for the work, we are told, were made on a very comprehensive and elaborate scale, so as to spare the Jews any apprehension lest in the event of his death the scheme should remain uncompleted. In other directions, also, he showed all possible respect for the religious susceptibilities of his compatriots. As it was not lawful for any laymen to enter the inner precincts of the temple, he found it necessary to have a thousand priests trained as masons and carpenters, so that the building might be duly completed.

30. Plan of temple. The rebuilding meant, in the first place, a considerable enlargement of the temple area. According to Josephus' account (*Ant.* xv. 11 3, *BJ* 1 21) the former area was exactly doubled, and the perimeter raised from four stadia (*Ant.* xv. 11 3) to six (*BJ* v. 5 2). In other words, the breadth (from E. to W.) remained as before—a stadium (*Ant.* xv. 11 3)—but the length (N. to S.) was increased from one stadium to two. The available level ground on the temple hill was insufficient for a plan so extended, and vast substructions on the southern side became necessary. The whole S. wall was new from the foundation. Even to-day the southern portion of the temple area is seen to rest on immense arches, known in Arab tradition as Solomon's stables, but really dating from the time of Herod.

The whole area was surrounded by a battlemented wall (*BJ* iv. 9 12). On the N. was the gate Tadi of the Mishnah, which Josephus mentions only incidentally. This, like the gate Shushan on the E., which he does not mention at all, must have been of minor importance; the chief accesses were necessarily from the lower city to the S., and the upper city to the W. beyond the Tyropœon valley. The S. wall, says Josephus, had gates in the middle (*Ant.* xv. 11 5). The Mishnah names them the two gates of Huldah. There is a double gate in the substructure of the S. wall, 350 ft. from the SW. angle, and from it a double tunnel leads up to the platform. This double gate exactly fits Josephus's description. There is also a triple gate, 600 ft. from the SW. angle, which is probably to be regarded as the second Huldah gate. In the W. side the Mishnah places one gate (Kiponus), while Josephus recognises four. The most southerly is necessarily the one which opened on a flight of steps descending, and then reascending across the Tyropœon to the upper city opposite. Now, at the SW. corner of the platform, there are still remains of the great arch (Robinson's arch), which must have belonged to a bridge connecting the upper city with the S. portico of the temple. Many scholars (as, for example, W. R. Smith, in *Ency. Brit.*[9], *s.v.* 'Temple') look for this

southern gate here. It is more probable, however, that it lay somewhat farther to the N., at the point where, tolerably low down in the temple wall, the colossal lintel of a gate was found, consisting of a single stone. The steps of which Josephus speaks, must, in that case, have been inside the gate, as the gate itself was not far above the level of the bottom of the valley. Comparing *BJ* ii. 16 3 vi. 6 2 v. 4 2, we see that the embankment also carried the city wall (the so-called first wall). Of this approach there are remains at Wilson's arch, 600 ft. N. of Robinson's arch. Here also as in the case of Robinson's arch, under the so-called Wilson's arch, have been found remains of the arch of an older bridge in the Roman style, which presumably dates from the Herodian period (as to this cp JERUSALEM, § 8). Round the entire temple area on all four sides ran porticoes built against the enclosing wall. The finest was that on the S. side—the Stoa Basilica—which was formed by four rows of Corinthian columns of dazzling white marble (162 columns in all). Of the three aisles that in the middle was twice as high (some 28 metres) as those flanking it, and broader by one half (some 12 metres). On the three other sides of the area were double porticoes, some 15 metres in breadth with monolith pillars of some 12 metres in height. All hese buildings were roofed with cedar beams, richly carved (Jos. *Ant.* xv. 11 5, *BJ* v. 5 2). The eastern portico was known as Solomon's porch (Jn. 10 23, Acts 3 11 *f.* 5 12); there must therefore have previously stood on this side a structure which was considered as resting on Solomon's foundations. The court itself immediately within these buildings was paved in mosaic fashion with stone.

Connected with the temple was the citadel of Antonia (see JERUSALEM, § 28). It lay on the NW. and dominated the temple area (Jos. *Ant.* xv. 11 4). Stairs descended from it to the NW. corner of the area, to the northern and western porticoes.

In the temple of Herod the separation of sacred from profane was rigorous. The Antonia, the porches, and the space immediately within these were not holy ground, in the strict sense of the word. They were accessible to Gentiles even, on which account the 'outer' court is actually often called the 'court of the Gentiles,' although this description is nowhere met with, either in Josephus or in the Mishna. In the centre of this enclosed space rose a platform at a height of 15 cubits above the court of the Gentiles—the inner court with the sanctuary proper. This platform itself was in turn surrounded by a narrow terrace, 10 cubits in breadth (*ḥēl*: *BJ* v. 5 2; *Middōth*, 2 3). From the court of the Gentiles fourteen steps led up to this terrace, and from this again five steps to the gate of the inner court (see Jos. *BJ* v. 5 2; *Middōth* gives the number of the steps differently). There was no entrance upon the W. side. A breastwork (סוֹרֵג, *sōrēg*) of stone ran round the whole of the inner court beneath the level of the steps. On it were placed at intervals inscribed tablets forbidding every one who was not a Jew from crossing the limit or treading the holy place, on pain of death.[1] At the top of the steps was the inner court properly so called, surrounded by a wall rising 25 cubits above the level of the outer court. The inner court was divided into two unequal portions by a cross wall running N. and S. The eastern and smaller space, which lay at a somewhat lower level, formed the so-called court of the women (*'ăṣārath nāšīm*, עֶזְרַת נָשִׁים, *Midd.* 2 5), and was accessible to Jewish women. The western space, containing the temple buildings properly so called, was for men only. The wall enclosing the inner court was pierced by nine gates; the N. and S. sides had each four gates, the easternmost of which in each case led directly into the court of the women, whilst

31. The courts and gates.

[1] One such inscription (Greek and Latin) is still extant (*PEFQSt.*, 1871, p. 132; Benz. *HA* 404; Nowack, *HA* 2 77).

TEMPLE, TEMPLE-SERVICE

the others opened into that of the men. The gates had double doors which were covered with silver and gold, the gift of the Jewish alabarch, Alexander of Alexandria. To the W. there was no gate and the E. side had but one,[1] which, however, was specially magnificent and costly. Its doors were of Corinthian brass. It led, according to what has just been said, directly into the court of the women. In a straight line with it, finally, in the wall between the courts of the men and women, the most magnificent of all the gates closed the eastern approach to the temple (Jos. *BJ* v. 5 3). It was the 'Great' gate, 40 cubits broad and 50 cubits high; 15 semicircular steps here ascended from the court of the women to that of the men. Which of these two doors on the E. is intended by the 'Beautiful' gate of Acts 3 2, it is impossible to determine. According to the Mishna (*Midd.* 1 4), the last-named inner gate between the court of the men and that of the women corresponded to the gate of Nicanor; according to the description of these gates by Josephus, however, there would seem to be some mistake in this. The gates were probably[2] all of them porch-like in plan, with side recesses (exedræ) which made the connection with the chambers skirting the length of the walls. In like manner there was an upper chamber above the gateway properly so called (cp *Midd.* 1 5; *Tāmīd*, 1 1, where mention is made of an upper chamber of the gate of Sparks [שַׁעַר הַנִּיצוֹץ on the N. side). This gave the gates the tower-like appearance of which Josephus speaks.

32. The chambers.

Along the enclosing wall ran a series of chambers (*lĕšākōth*) which served for storage of the various utensils, skins of sacrificial animals, sacrificial salt, wood, vestments, and the like, or for various operations, such as the preparation of the meal-offering, and so forth.

The supreme council also held its sittings in one of these chambers. Their precise number is unknown. *Midd.* 5 3 *f.* mentions three on the N. and three on the S.; elsewhere yet others are alluded to. According to *Midd.* 2 5 there were four chambers in the women's court also—a piece of information, however, the accuracy of which is with reason called in question (Schürer in Riehm, *HWB*, conjectures that the statement is an inference from Ezek. 46 21). Some of these chambers (whether all of them is uncertain) had upper stories (*Yōmā* 1 5, and *Tāmid* 1 1; allusion is made to an upper chamber of the Bet-Abtinas). In front of the chambers were, as in the first inner court, porticoes, though much smaller in size. Finally, we hear of thirteen offertory chests for free-will offerings of all sorts.

From this court of the Israelites the portion immediately surrounding the sanctuary was separated by a breastwork of stone—on all sides, according to the express statement of Josephus (*BJ* v. 5 6 *Ant.* xiii. 13 5); but the Mishna (*Midd.* 2 6) speaks only of a wall running from N. to S. The area thus shut off was the court of the priests. Laymen had access to this court only when the ritual connected with certain offerings demanded the presence of the persons presenting them.

33. The temple building.

Within the court of the priests stood on a still higher level the temple building proper. The ascent to it was by twelve steps (*Midd.* 3 6). The ground plan and dimensions of the building were the same as in the temple of Solomon—viz., 60 cubits in length 20 in breadth and 40 in height. Two costly curtains shut off the Holy of

[1] According to *Midd.* 2 6 (cp M. *Shĕḳālīm*, 6 2) the gates on the S. side were these: (1) שַׁעַר הָעֶלְיוֹן (wanting in *Midd.* 1 4 *f.*); (2) שׁ׳ דֶּלֶק; (3) שׁ׳ הַבְּכוֹרוֹת; (4) שׁ׳ הַמַּיִם; and those on the N. side were: (1) שׁ׳ יְכָנְיָהוּ; (2) שׁ׳ הַקָּרְבָּן; (3) שׁ׳ הַנָּשִׁים; (4) שׁ׳ הַשִּׁיר. *Midd.* 1 4 *f.* gives three quite different names; those at the eastern end leading into the court of the women are not taken account of at all.

[2] Jos. *BJ* v. 5 3 seems to presuppose this for all the gates. Elsewhere in Josephus mention is made of the northern or western exedra, so that it might seem as if not all the gates were so constructed. The last seems to be the view of the Mishna also. Moreover, a hall or exedra of the same kind existed also upon the W. side, where there was no gate.

TEMPLE, TEMPLE-SERVICE

Holies (20 × 20 cubits), which was quite empty. The outer curtain was folded back upon the S. side, whilst the inner was similarly folded back on the N. side, so that in this way the high priest entered the intermediate space from the S. and passing along it entered the Holy of Holies on the N. side.

The anterior apartment of the sanctuary (חוך ההיכל *Midd.* 4_7) was 40 cubits in length. It was entered from the E. through the porch by a great double door (שער הגדול *Midd.* 4_2, cp *Tāmīd* 3_7) of 40 cubits in height and 16 cubits in width (so Jos. *BJ* v. 5_4; according to *Midd.* 4_1 only 20 cubits high and 10 broad). Like the gates of the court it was richly covered with gold. In front of the great door hung a magnificent curtain of Babylonian workmanship; its colour according to Josephus symbolised the universe: byssus the earth, purple the sea, scarlet the element of fire, and hyacinth the air (*BJ* v. 5_4). Above the gate were golden vines and grape clusters as big as a man (*BJ* v. 5_4; *Ant.* xv. 11_3 cp Tacit. *Hist.* 5_5). The sanctuary was accessible only to the officiating priests. The altar of incense stood near the entrance to the Holy of Holies, the table of shewbread to the N., the seven-branched candlestick to the S. (cp the figures on the arch of Titus; also CANDLESTICK).

Eastward from the temple was, as in the temple of Solomon, a porch (*'ūlām*) 100 cubits in breadth, 100 cubits in height and 20 cubits deep (according to *Midd.* 4_7 only 11 cubits). Its gateway, which had no doors, was 70 cubits high and 20 cubits broad (Jos. *BJ* 5_5; according to *Midd.* 3_7 it was only 40 cubits high and 20 cubits broad). Above this gate Herod caused the name of Agrippa his patron (*BJ* i. 21_3) and a golden eagle to be placed. The eagle was, as may well be believed, an abomination in the eyes of pious Jews; and Josephus tells how, shortly before the death of Herod, two zealous rabbins incited some youths to tear it down (*Ant.* xvii. $6_{2\text{-}4}$).

The temple building had an upper story of the same dimensions with the lower (*BJ* v. 5_5). The Holy of Holies could be entered directly from above by means of a trap-door; by this means workmen could be let down in boxes whenever repairs were needed. The access to the upper room was from the S. from the roof of the side-building. As in Solomon's temple, the side-building surrounded the house on the S., W., and N. It was three-storied and 40 cubits in height. The individual chambers were not only connected with those on the same floor by means of doors, but there was communication between those above and those below by means of trap-doors. The principal entrance was on the NE. where it was possible to pass from the portico direct into these chambers. The whole breadth of the temple buildings inclusive of the side-building was 70 cubits (*Midd.* 4_7, where the separate figures are given from which this total results). Thus the porch on each side exceeded by 15 cubits the breadth of the temple building.

Eastwards of the temple at a distance of 22 cubits from the porch, in the court of the priests, stood the great altar of burnt offering of unhewn stones (see ALTAR). At the SW. corner was a channel which drained into the Kidron valley. Twenty-four rings fixed in the ground to the N. of the altar served for tying up the sacrificial animals, there were eight pillars connected by cedar beams for hanging up the carcases, and eight marble tables on which to prepare the sacrificial flesh (*Midd.* 3_5 5_2 *Tāmīd* 3_5 *Shĕkālīm* 6_4). On the S. side was the bronze laver at which the priests washed hands and feet before entering the sanctuary (*Midd.* 3_6; cp *Yōmā* 3_{10}); also a silver table for the vessels and a marble table for the sacrificial flesh (*Shĕkālīm* 6_4; *Tāmīd* 4_3). Herod's gigantic and costly structures were still in building forty-six years after their commencement, when Jesus began his ministry (Jn. 2_{20}), and the works were not completed till the procuratorship of Albinus (62-64 A.D.). In 66 the great revolt against Rome broke out, and in August 70 Jerusalem was taken by Titus and the temple perished in a great conflagration. I. B.

II. THE TEMPLE-SERVICE.

34. Introductory. The system of worship of which the Jerusalem sanctuary was the centre assumed its most elaborate and highly developed form in the temple of Herod.

The immense and manifold religious activities that concentrated themselves in the temple worship, can only be adequately realised when it is remembered how unique was the position occupied by Judaism's central shrine. It was absolutely the one and only sanctuary where the highest expressions of the religious life of a whole people could be offered. Judaism possessed but one sanctuary, and that was in Jerusalem.

At the time when the Christian movement was born, Palestine—though its population was by no means exclusively or (except in such districts as Judæa and possibly Galilee) even predominantly Jewish—had once again become the centre of Jewish national life. And it was in the Holy City, and pre-eminently in the temple worship, that this life found its most intense and Jewish expression. Jerusalem was constantly thronged with pilgrims from the Jewish communities scattered over the E. and W. worlds (see DISPERSION) laden with gifts for the temple. And here, in the elaborate sacrificial worship, they rendered the highest tribute of homage within their power to the God of their fathers. How immense the influence of the temple worship was is evidenced by the large space devoted to its details—the minutiæ of its ritual and organisation—in the later Jewish literature (the Mishna and Gĕmārā), which was compiled long after the destruction of the sanctuary. Such pious ejaculations as, for instance, the following constantly recur. Towards the end of the Mishna tractate *Tāmīd*, which sets forth in detail the course of the daily offering, we read: 'Such is the order of the daily offering for the service of the house of our God. May it be his will to build it speedily in our days. Amen' (7_3). The same sentiment finds frequent expression in the liturgy of the synagogue, which also reflects the influence of the sacrificial worship in its essential structure. Cp SYNAGOGUE.

Of the more important features of this worship, so far as known, a brief sketch may here be appended. As a preliminary to this it will be necessary to give some account of the officers by whom it was carried on.

35. Officers, etc. (*a*) *The Priests.*—According to Josephus (*c. Ap.* 2_8) the priesthood in his day numbered no less than 20,000 men. It was only on rare occasions—at certain of the high festivals—that the whole, or anything like the whole, of this number officiated at one time within the temple precincts. For the purposes of regular worship this body was, as is well known, divided into twenty-four 'courses' (*mišmār*, מִשְׁמָר, 'watch' = πατριά or ἐφημερία, cp Lk. 1_5 8, or ἐφημερίς); and the 'courses' again into subdivisions or 'families' (בָּתֵּי אָבוֹת = φυλή).

It is interesting to note that Josephus (*Vit.* 1_1) claims to belong by birth to the first of the twenty-four 'courses'—that of Joiarib—from which also the Hasmonæans sprang (1 Macc. 2_1). Both the main- and the sub-divisions were presided over by 'heads' (רָאשִׁים), each of whom was termed respectively 'head of the course' (ראשׁ הַמִּשְׁמָר) or 'head of the family' (ראשׁ בית אב).

Each 'course' in succession was responsible for the regular temple services for the week (from sabbath to sabbath), and divided up the week's services among its 'families' according to their number (which varied).

At the head of the whole priesthood stood the high priest (*kōhēn hag-gādōl*, כהן הגדול, ἀρχιερεύς), at this time the greatest native personage, both in church and

state, to whom was reserved the performance of the highest religious acts, such as the supreme sacrificial act enacted on the Day of Atonement. On ordinary occasions, however, it was rare for him to participate officially in the temple worship, and as a rule he did so, according to Josephus, only on sabbaths, new moons, and the great annual festivals (*BJ* v. 5_7). During the time of the Roman predominance the office was held almost exclusively by members of two or three families (those of Phabi, Boethus, Ananus, and Kamith) who formed the priestly aristocracy, and were divided by a deep social gulf from the great mass of the priesthood.

(*b*) *Levites.*—Another class of temple officials, occupying a position subordinate to that of the priests, was the Levites, who, however, like the priests, formed at this time a strictly exclusive and hereditary order, though, strange to say, they had now absorbed the musicians and door-keepers, who (even in the post-exilic period) had formerly been carefully distinguished from the Levites proper. Later still (just before the destruction of the temple) the musicians advanced a step further in securing from King Agrippa II., with the assent of the Sanhedrin, the privilege of wearing the white linen garments of the regular priesthood (*Ant.* xx. 9_6).

The Levites, like the priests, were divided into twenty-four 'courses,' and each performed duty in a corresponding manner. Similarly these were also presided over by 'heads' (ראשים).

(*c*) *The official 'Israelites.'*—Corresponding to the divisions of the priests and the Levites there was also a division of the people into twenty-four courses of service (משמרות) 'each of which had to take its turn in coming before God, every day for a whole week, by way of representing the whole body of people while the daily sacrifice was being offered to Yahwè' (Schürer). The division on duty for the time being was technically termed 'a station' (*ma'ămād*, מַעֲמָד). It seems, however, that not the whole division, but only a deputation of it, was actually required to be present at the offering of the sacrifice in the temple. At the time when this was being performed the absent members of the 'station' met together in the local synagogues for prayer and the reading of certain passages of Scripture. The leading passage on the subject in the Mishna (*Ta'ănīth* 4_2) runs as follows :—

'The earliest prophets established twenty-four courses of service (משמרות). To each belonged a staff (מעמד) in Jerusalem, composed of priests, Levites, and Israelites. As soon as its turn to serve came round to a course, the priests and the Levites belonging to it proceeded to Jerusalem, but the Israelites assembled in the synagogues of their different towns and there read the account of the creation.' (It should be noted that the *whole* of the course, of priests and Levites, when its turn came, had to be present in Jerusalem.)

36. Functions of priests and Levites.

The part taken by the high priest in the temple worship has already been referred to, and need not here be further enlarged on. It may be pointed out, however, that the daily meal-offering of the high priest, which was offered in conjunction with the daily burnt-offering of the people (Lev. $6_{12\text{-}16}$), was (in practice) not so much offered *by* him as *on his behalf* and *at his expense*. According to Schürer (*Hist.* ii. 1_{288} n. 243) it is this offering which is referred to in the difficult passage Heb. 7_{27}, though it was in no sense a sin-offering.

The functions of the ordinary priests, when they were engaged in the service, mainly consisted in ministrations at the altar. These will be described in greater detail below (§ 38). To the priests the Levites were in all respects subordinate—the strictly priestly function of officiating at the altar was forbidden to the Levites, nor were they permitted to enter the inner sanctuary ; their duties mainly consisted in such offices as the guarding of the temple fabric, and acting as choristers and door-keepers (see further below, *b*). There were, however, other high officials of whom mention must be made. The most important of these was the *sĕgan* (Aram. סְגַן, the vocalisation of the Heb. form סגן is uncertain), who ranked next to the high priest. The widely-held view that the *sĕgan* was the high priest's deputy or substitute has been controverted on cogent grounds by Schürer (*Hist.* ii. 1_{257} *f.*) who points out that a substitute for the high priest was appointed annually, seven days before the Day of Atonement, to act in case of necessity (*Yōmā* 1_1)—a superfluous provision if an official substitute already existed. Schürer gives good reasons for identifying this official with the captain of the temple (στρατηγὸς τοῦ ἱεροῦ) frequently mentioned in both Josephus and the NT, who controlled all arrangements for maintaining order within the temple area. Subordinate to him, but exercising functions essentially similar, were a number of other *sĕgānim* or captains of the temple police, who are probably to be identified with the 'captains' (στρατηγοί) of Lk. $22_{4\ 52}$.

Next in dignity to the high priest and the *sĕgan* ranked the heads of the twenty-four courses (ראש המשמר) and (below them) those of the constituent 'families' (ראש בית אב). Besides the above there were various other functionaries connected with the temple among the priests and Levites. These (following Schürer) we may group into three divisions :

(*a*) Those entrusted with the administration of the temple stores, furniture, and treasures. The officials who controlled this vast department—which included not merely the custody of the sacrificial plate and vestments, and supplies of corn, wine, and oil for ritual purposes, but also the care of vast sums of money belonging to the temple, as well as of large amounts deposited there by private individuals for safety—were known as 'treasurers' (*gizbārīm*, גִּזְבָּרִים ; γαζοφύλακες). They also gathered in the half-shekel tax (*Shĕḳ.* 2_1). The full complement of officials in this department must have been very large, and may have included Levites ; but, in any case, the more important offices connected with it were filled by priests.

Not improbably the 'treasurer' mentioned by Josephus in conjunction with the high priest (*Ant.* xx. 8_{11}) was the head of the order. To the order of treasurers, forming probably one of its subdivisions, belonged the *ămarkĕlin* (אמרכלין), a word of Persian origin meaning 'accountants.' The Jerusalem Talmud also mentions another class that falls within this category : viz., the קתוליקין (καθολικοί), about whom, however, the Mishna is silent.

(*b*) Officials connected with the police department. Here Levites were mostly employed. According to the Mishna (*Tāmīd* 1_1), of twenty-four points at which guards were stationed at night no less than twenty-one were occupied by Levites, whilst the other three were watched by priests. In point of fact the whole space within the low barrier beyond which Gentiles were forbidden to pass on pain of death (§ 31)—*i.e.*, the inner court, or court proper—was guarded by priests. Outside of this inner court, at the gates and the corners, the Levite posts were stationed, and also (but on the inside) at the gates and the corners of the outer court (*i.e.*, the 'court of the gentiles' ; § 31). All these gates were also occupied during the day time, and, amongst other things, it was the duty of the Levitical guards to see that the prohibition of Gentiles from entering the sacred enclosure was strictly carried out. Patrols also moved round by night and day. At night it was usual for a captain of the temple, known as איש הר הבית, to make a round of inspection to see that the guards were not sleeping at their posts (*Middōth* 1_2).

Another officer (στρατηγός) is also mentioned under the title of *ish hab-bīrāh* (איש הבירה)—*i.e.*, 'man of the citadel'—the citadel in this case doubtless being the temple proper, and the officer in question the head of the priestly guard (of the inner court). All the gates of the courts were shut at night by the guards, and a special officer was appointed to superintend the operation (*Shĕḳ.* 5_1). The keys of the gates of the inner court were kept by the elders of the particular division of priests on duty for the watch, and, when the divisions were changed, were handed over to the elders of the incoming division. As the morning sacrifice was offered at daybreak it was necessary that

the gates should be opened somewhat earlier. At the great festivals (when large preparations for additional sacrifices, etc., had to be made) the gates were opened much earlier—as early as midnight during Passover (*Ant.* xviii. 2 2).

(*c*) Special functionaries connected with public worship. Whilst the general conduct of the sacrificial worship was exercised by the priesthood as a whole (in their courses), certain special duties were performed by permanent officials, who, in many cases, belonged to families which had acquired a hereditary right to fulfil a particular office. A number of these (who were in office during the closing years of the temple) are enumerated in the Mishna (*Shĕkālīm* 5 1). From this passage we learn that there was an officer 'over the lots' (*i.e.*, the lots cast daily for the allocation of particular offices to the officiating priests), another 'over the seals' (tokens issued to the people, which corresponded to the various kinds of drink-offerings). These 'seals' were handed by the purchasers to another official who was 'over the drink-offerings' and who 'in return would give to the person tendering one the amount of drink-offering requisite for the particular occasion for which it was wanted' (Schürer).

The hereditary offices, confined to certain families, were connected with matters involving special technical skill and knowledge, such as the preparation of the shewbread (family of Garmu), and of the frankincense (family of Abtinas). Other officials mentioned are: a master of the psalmody, a cymbal-player (who gave the signal for the Levites to begin the music), a temple physician, a master of the wells, a herald, a keeper of the veils, and a keeper of the priests' garments.

A comparatively large class of officials was the guild of sacred musicians (*mĕšōrĕrīm*, משררים, *ψαλτῳδοί, ἱεροψάλται, ὑμνῳδοί, κιθαρισταί τε καὶ ὑμνῳδοί*), who formed a hereditary and exclusive order (now Levitical). They were divided into three families (those of Heman, Asaph, and Ethan or Jeduthun; cp *e.g.*, 1 Ch. 25), and these again into twenty-four courses of service. Greatest importance was attached to the singing, to which the musical accompaniment was regarded as subordinate. For the instruments employed see MUSIC.

It may be noted that reed-pipes (*ḥălīlīm*) were introduced into the choir at the high-festivals (Passover, Pentecost, and Tabernacles), and that the only instruments not assigned to the Levites were the metal trumpets (*ḥăṣōṣĕrōth*), which were regularly blown by priests (esp. to accompany the offering of the daily sacrifice). The place of the Nĕthīnīm in Herod's temple seems to have been taken by the *ḥazzānīm* (חַזָּנִים 'servants,' 'sextons': see *e.g.*, *Tāmīd* 5 3). Menial offices were also performed by boys of the priestly families (פרחי כהנה, 'scions of the priesthood,' *Tāmīd* 1 1, etc.).

We may pass over the details connected with such subjects as admission to the ranks of the officiating priesthood (Schürer, *Hist.* ii. 1 210 *ff.*), the residence of the priests and Levites (*ib.* 229), and the sources of the temple revenue (*ib.* 230 *ff.*), the consideration of which hardly falls within the scope of this sketch; but some description must be given of the public worship of the sanctuary, in, at least, its typical features.

37. The temple services: the daily offering.

The regular worship of the temple centred in the daily *public* offering (עולת התמיד or simply התמיד) of the prescribed sacrifices, morning and evening. On sabbaths and festivals the *number* of the sacrifices was increased, and (in particular cases) other ritualistic elements were added; but essentially the course and sequence of the worship was the same. There were also, of course, multitudes of *private* sacrifices offered. But here we are mainly concerned with the public worship, which embodies the typical features of the rest. Fortunately a detailed account of the course of the daily offering has been preserved in the Mishna, which devotes a whole tractate to the subject (*Tāmīd*), based evidently on sound tradition. The substance of this may here be given.

The service naturally divides itself into three moments: (1) the preliminaries, mainly affecting the priests, and including the slaughter and preparation of the sacrifice (§ 38 *f.*); (2) the offering of incense and of the sacrifice, accompanied by prayer (§ 40); and (3) the service of praise and thanksgiving (§ 41).

38. The preliminaries.

1. The priests on duty slept within a chamber of the inner court. Very early those who were desirous of taking part in the sacrificial worship arose and took the baptismal bath so as to be ready for the official summons, which might come at any moment. When the summons came the priests who were ready followed the superintendent through a wicket into the court. They then divided themselves into two parties, one going eastward and the other westward, with lighted torches in their hands (except on sabbaths when the temple was lit up) and met in 'the place of the pancake makers' (*i.e.*, the apartment where the high-priest's daily meal-offering was prepared), and greeted each other with the words 'It is well; all is well!' They then passed to the Hall Gazith (לשכת הגזית, lit. 'hall of polished stones,' where the Sanhedrin also met) and proceeded to cast lots. Altogether four lots—not immediately, but at intervals—were cast during the service, the first to determine who was to cleanse the altar and prepare it.

The mode of casting the lots is thus described by Edersheim (*Temple*, 122): 'The priests stood in a circle around the president, who for a moment removed the head-gear of one of their number, to show that he would begin counting at him. Then all held up one, two, or more fingers—since it was not lawful in Israel to count persons—when the president named some number, say seventy, and began counting the fingers till he reached the number named, which marked that the lot had fallen on that priest' (so Lightfoot, *Temple Service*, chap. 9 1, following Maimonides).

The person selected first of all bathed his hands and feet at the brazen laver, which stood between the temple and the great altar, and mounting the altar carried away the ashes in a silver pan. While he descended, the other priests washed their hands and feet at the brazen laver, removed the unburnt sacrifices and debris from the altar, laid on fresh wood, and replaced the unconsumed pieces of the sacrifice. They then all adjourned to the 'Hall of Polished Stones,' where the second lot was cast.

During the proceedings above described, which took place in darkness, the only light being the glow of the altar fire, those priests to whom the duty had been assigned, were preparing the baked meal-offering of the high priest in the 'place of the pancake makers.'

The second lot designated the priest on whom it fell, together with twelve others standing next him, to discharge the following duties:—(1) the slaughter of the victim; (2) the sprinkling of the blood upon the altar; (3) the removing of the ashes from the altar of incense; (4) the trimming of the lamps on the candlestick; further, the lot determined who were to carry the various portions of the victim to the foot of the ascent of the altar, viz., who was to carry (5) the head and one of the hind legs; (6) the two forelegs; (7) the tail and the other hind leg; (8) the breast and the neck; (9) the two sides; (10) the entrails; (11) the offering of fine flour; (12) the baked meal-offering (of the high priest); and (13) the wine for the drink-offering.

Immediately after this the president directed inquiries to be made as to whether the time for slaughter had arrived (determined by the approach of dawn when it was visible in the sky up to Hebron). On the signal being given the lamb was brought from the lamb-chamber (לשכת הטלאים), given some water to drink from a golden bowl, and led to the place of slaughter on the N. side of the altar. At the same time the ninety-three sacred vessels were brought from the utensil-chamber. Meanwhile the two priests to whom the duty had been assigned of cleansing the altar of incense, and trimming the lamps on the candlestick (3 and 4 above) proceeded to the sanctuary, the one with a golden pail (טני), the other with a golden bottle (כוז). At this point orders were given (by the elders who had charge of the keys) to open the temple gates, the noise of which (according to the Mishna) was heard at Jericho. The accomplishment of this was heralded

TEMPLE, TEMPLE-SERVICE

by three blasts on the silver trumpets, which gave the signal for the Levites and 'men of the station' (representative Israelites) to assemble, and also announced to the city that the morning sacrifice was about to be offered (for these details see the *Gĕmārā* on *Tāmīd*). At this point also, the great gates leading into the holy place were opened to admit the priests whose duty it was to cleanse the incense-altar and trim the candlesticks, into the sanctuary (see above). The opening of the sanctuary gates was the signal for the actual slaughter of the sacrifice. See Edersheim, *Temple*, 133, SACRIFICE, § 32.

Meanwhile the two priests above referred to had entered the holy place. While the slaughter of the lamb was taking place the first of the priests cleansed the golden altar of incense, putting the burnt coals and ashes into the golden pail (טני), and then withdrew, leaving the utensil behind. The second priest, while the blood of the lamb was being sprinkled, proceeded to trim and re-light the lamps of the candlestick.

The procedure was as follows :—Only five of the seven lamps were at this time trimmed—the other two being reserved for a later period of the service. If the two farthest E. were still burning they were left undisturbed, and the trimming and re-lighting of the five others was proceeded with. But the central lamp, called the 'western' (because it inclined westward to the most holy place), could only be relighted by fire brought from the altar. If it happened that the two farthest E. were out, they were first of all trimmed and relighted, before the others were attended to. The candlestick was approached by three stone steps, and on the second of these the priest, when this part of his duty was done, deposited the golden bottle (כוז) and withdrew.

Meanwhile the slaughtering of the sacrifice and the sprinkling of the blood upon the altar had been followed by the flaying of the victim, which was cut up into pieces, and the entrails washed upon the marble tables. The pieces were carried by the six allotted priests (each taking one piece) to the altar, while a seventh carried the offering of flour, an eighth the baked meal-offering (of the high priest), and a ninth the wine of the drink-offering. These were all laid at the foot of the altar-ascent, and salted ; and then all the priests assembled once more in the Hall of Polished Stones.

39. The prayers and blessings.

Here a service of prayer was celebrated, the details of which are, however, not free from ambiguity. The Mishna passage (*Tāmīd* 5 1), bearing on the matter, runs as follows :—

The president said : 'Give one blessing' ; and the priests blessed and read the ten commandments (and), the Shĕma' (in its three sections). They blessed the people with the three blessings—viz. (the blessing) 'True and firm' (אמת ויציב), (the blessing) 'Service' (עבודה), and 'the blessing of the priests' (ברכת הכהנים). And on the sabbath they added one blessing for the outgoing temple course.

The points undetermined here are the following :—(*a*) how far we are to understand that these prayers were said in the hall by the priests alone, and how far in the temple itself by priests and people ; and (*b*) what is meant by 'one blessing' and by 'three blessings'?[1]

Regarding (*a*) it has been usual to suppose that the Shĕma' (*i.e.*, the three sections of the Law, Dt. 6 4-9 11 13-21 ; and Nu. 15 37-41 which had to be repeated by each Israelite every day, morning and evening), preceded by a benediction and the ten commandments, was repeated by the priests in the hall, whilst the other prayers mentioned form part of the *public* service, and come later (so Edersheim, and apparently Schürer). The difficulty about this view is that the benediction 'true and firm' belongs to the Shĕma', which it ought immediately to follow. In any case, if the benediction was said by priests and people publicly, must we not suppose that the Shĕma' itself was recited *publicly* as well? It is not, perhaps, altogether impossible to regard the priest's service in the hall—*i.e.*, the recitation of the Shĕma' preceded and followed by the benedictions mentioned, including 'service' and 'the priestly blessing'—as a sort of rehearsal, *before* the solemn part of the sacrificial worship, of what was publicly recited later when the incense ascended from the altar. We may suppose also that the people, during the interval of silent prayer, mentally repeated the same prayers.

The analogous case of the Shĕmōnĕh 'Esreh ('The Eighteen Benedictions') in the modern synagogue, may be cited. This is first of all said by the congregation inaudibly, and then repeated aloud by the reader.

The recital of the ten commandments, which is elsewhere attested as a daily practice, was afterwards discontinued, probably for anti-Christian reasons (cp C. Taylor, *Sayings of J. Fathers*,(2) Excurs. 4 119). (*b*) As to what benediction was recited *before* the Shĕma', the Mishna gives no indication, and it was early a matter of dispute (*B. Ber.* 11*b*) whether it was that over the creation of light (יוֹצֵר אוֹר ; the modern form can be seen in Singer's Ed. of *Heb.-Eng. Prayer Book*, 37 *ff.*), or that in praise of God's love, known as Ăhābāh Rabbāh (='with abounding love'). According to the generally received opinion, it was the latter that was recited in the temple. In its early form this ran somewhat as follows :—

With abounding (or, according to another version, everlasting) love hast thou loved us, O Lord our God (Jer. 31 3). With great and exceeding compassion hast thou taken compassion on us (cp Is. 63 9). Our Father, our King, for the sake of our fathers who trusted in thee and whom thou taughtest the statutes of life, be gracious unto us, and be thou also our teacher. Enlighten our eyes in thy law, and make our hearts cleave to thy commandments ; render our hearts one that we may love and fear thy name, and not be ashamed. For in thy holy name we trust ; we rejoice and exult in thy salvation. For thou art the God who works salvation, and thou hast chosen us from all peoples and tongues, and brought us nigh unto thy great name (Selah) in truth, that we give praise unto thee and proclaim thy unity in love. Blessed art thou, O Lord, who hast chosen thy people Israel in love. (Cp *Jewish Encycl.* I 281, and reff.)

The benediction that followed the Shĕma', beginning with the words 'true and firm' (אמת ויציב), is a thanksgiving to God for various acts of redemption (hence its technical name *gᵉullā*), and has been much amplified in the later Jewish liturgy. In its earliest form it may not have contained more than the following :—

True and firm (established) it is that thou art Yahwè our God, and the God of our fathers ; our King and the King of our fathers ; our Saviour and the Saviour of our fathers ; our Maker and the Rock of our Salvation ; our Help and our Deliverer. Thy name is from everlasting, and there is no God besides thee. A new song did they that were delivered sing to thy name by the sea-shore ; together did all praise and own thee as King, and say, Yahwè shall reign who has redeemed Israel. (See further Zunz, *Gottesd. Vortr. d. Juden*,(1) 370, (2) 383.)

Of the other two 'blessings,' the first, that known as 'service' (עבודה), was doubtless a thanksgiving for the splendid temple worship, which may have been an earlier form of the present 'Ăbōda prayer (=the 17th of the Shĕmōneh 'Esreh ; cp Singer, 50 *f.*), and in its earlier form may have run thus :—

Accept, O Lord our God, thy people Israel and their prayer ; receive in love and favour both the fire offerings of Israel and their prayer ; and may the service of thy people Israel be ever acceptable unto thee. Blessed art thou, O Lord, who receivest the service of thy people Israel with favour [for the last clause, see Rashi on *Bĕrākh.* 11 *b*].

The 'blessing of the priests' was, doubtless, some form (*not*, however, the precative form now used in the synagogue = the last of the Shĕmōnĕh 'Esreh) of the well-known priestly blessing (Nu. 6 24-26), in using which within the Temple the priests pronounced the ineffable name (יהוה) as written. After the priests had recited the Shĕma' and the accompanying prayers in the Hall, the third and the fourth lot were taken—the third to determine who should offer the incense in the sanctuary, and the fourth to determine who should lay the various parts of the victim upon the altar. The most important duty of the service that could fall to a priest was that of offering the incense, and only those who had not performed the office before were eligible (except in the rare case when all present had so officiated). Those on whom no lot had fallen were now free to go away, after divesting themselves of the priestly dress.

2. *The offering of incense and of the sacrifice accom-*

1 (See L. Blau, 'Origine et Histoire de la lecture du Schema, *REJ* 31 [1895] pp. 179-201.)

panied by prayer.—The incensing priest now took a golden saucer (כַּף) covered with a lid, containing a smaller saucer (בָּזַךְ) with the incense. An assistant priest then brought some live coal from the great altar in a silver pan (מַחְתָּה) which he emptied into a golden pan. This done, both proceeded with another assistant, and with the two who had already dressed the altar and candlestick, into the sanctuary, striking as they passed the instrument called *magrēphāh* (see col. 3229), at the sound of which priests hastened to the worship, the Levites to occupy their places in the choir, while the delegates ('stationary men') ranged at the eastern gate of the Temple (=the gate of Nicanor) such of the people as were to be purified that day ('the defiled men').

40. Offering of incense.

The two priests who had dressed the altar and the candlestick entered first, the former merely to bring away his utensil, which, after prostrating himself, he did; while the latter completed the trimming of the lamps, and then, prostrating himself, withdrew with his utensil.

The assistant priest who had the pan of coals emptied them on to the altar of incense, prostrated himself, and withdrew. The other assistant then arranged the incense, and withdrew in like manner. The chief officiating priest was now left alone within the sanctuary, awaiting the signal of the president before burning the incense. When this was given (with the words 'offer the incense'), he emptied out the saucer on to the coals, and the incense ascended in clouds of smoke. At this solemn moment, the people withdrew from the inner court and prostrated themselves, spreading out their hands in silent prayer (cp Rev. 8 1 3 *f.* quoted by Edersheim). The incensing priest, also, after prostrating himself for worship, withdrew from the sanctuary. The period of silent prayer was followed (if the conjecture given above is correct) by the recitation of the Shĕma', with the ten commandments and benedictions set forth above. Others think that only the three 'blessings' (mentioned in *Tāmīd* 5 1) were here recited. In any case, the priestly blessing was given in the following manner. The five priests who had been engaged within the Holy Place now proceeded to the steps in front of the Temple, and with uplifted hands, pronounced the priestly benediction. This was pronounced by the leader (probably the incensing priest), the others following audibly after him. As already mentioned, the divine name was on these occasions pronounced. The people also responded: 'Blessed be the Lord God, the God of Israel, from everlasting to everlasting.' The offering of the burnt offering was now proceeded with. The chosen priests brought up the various pieces of the victim from the foot of the ascent, and, after placing their hands upon them, threw them on to the altar-fire. When the high priest officiated, he received the pieces from the priests, placed his hands upon them, and threw them on to the altar. The appropriate meal offerings (that of the people, and that of the high priest) were now brought, oiled, salted, and laid on the fire; and the drink offering was poured out at the foot of the altar.

3. *The Service of praise and thanksgiving.*—Hereupon the music of the temple began. The choir of Levites, to the accompaniment of instrumental music, sang the psalm of the day, which was divided into three sections. At the close of each section, a body of priests blew three blasts on the silver trumpets, and the people prostrated themselves in worship. The singing of the psalm closed the morning service, and the private sacrifices were proceeded with.

41. Musical service.

The evening sacrifice (which, according to the law, was to be offered 'between the two evenings'—*i.e.*, in the evening twilight) was at this period offered early in the afternoon, about 3 o'clock. It was in all respects exactly similar to that of the morning, save that incense

TEMPLE, TEMPLE-SERVICE

was offered *after* the burnt offering instead of before it, and the lamps in the sanctuary were not trimmed, but simply lighted. The priests on whom the lots had fallen again officiated in the evening, except the incensing priests. For this office another lot was taken.

The daily psalms were the following: first day, 24; second, 48; third, 82; fourth, 94; fifth, 81; sixth, 93; on the sabbath, 92.

On the sabbath and festivals the same daily sacrifices were offered, only increased. Thus on the sabbath the sacrifice was doubled, and so on. The essential features, however, were much the same. [For details, see FEASTS, SABBATH, and the works cited below.]

42. The sabbath and festivals.

G. H. B.

The literature of the subject is immense. The older books are given in Bähr (*Der Salomonische Tempel*) and other writers; only the more important modern works can be mentioned here.

TEMPLE-KEEPER (νεωκορον), Acts 19 35 AV^mg. RV. See NEOCOROS.

TEMPTATION. The word מַסָּה, *massah* (𝔊 πειρασμος always), occurs in the OT not only as a place-name (see MASSAH), in Ex. 17 7 etc. Ps. 95 8 (AV 'temptation,' RV 'Massah,' RV^mg. 'temptation'), but also as a common noun in Dt. 4 34 7 19 29 2 [3] where EV has 'temptations' and RV^mg. 'trials' or 'evidences,' in Job 9 23 [see 𝔊] where EV has 'trial' and RV^mg. 'calamity.' The verb is נִסָּה. AV renders inconsistently; in Ex. 17 2 7 Dt. 6 16 etc., it gives up the best rendering—*i.e.*, 'to prove'—and substitutes what to modern readers is certainly misleading—'to tempt.' As Driver (on Dt. 6 16) well observes, 'נִסָּה is a neutral word, and means to *test* or *prove* a person, to see *whether* he will act in a particular way (Ex. 16 4 Judg. 2 22 3 4), or *whether* the character he has is well established (1 K. 10 1). God thus *proves* a person, or *puts* him *to the test*, to see if his fidelity or affection is sincere, Gen. 22 1 Ex. 20 20 Dt. 8 2 [*q.v.*] 13 4 [3]; cp Ps. 26 2; and men *test*, or *prove* Jehovah when they act as if doubting whether his promise be true, or whether he is faithful to his revealed character, Ex. 17 2 7 Nu. 14 22 Ps. 78 18 (see *v.* 19) 41 56 95 9 106 14; cp Is. 7 12. So *massōth* Dt. 4 34 7 19 29 2 [3], are not "temptations," but *trials, provings* (see note on 4 34).' With regard to the NT, it is satisfactory that πειράω is rendered 'try' in Heb. 11 17 Rev. 2 2 10, and πεῖρα 'trial' in Heb. 11 36. On the use of πειρασμός ('temptation,' but RV^mg. sometimes 'trial'),[1] Holtzmann (*HC* 1 45 *f.*) remarks that this is one of the expressions to which the NT has given a pregnant and almost new meaning, indicating the external conflicts and distresses which become the means of inward temptation; see Lk. 22 28 Acts 20 19 Jas. 1 2 1 Pet. 1 6. Such a conflict, such a distress is reported to have been the lot of Jesus, at the beginning of his ministry. See below.

[1] In Acts 20 19 Rev. 3 10, etc., RV gives 'trial' in the text.

TEMPTATION OF JESUS

Three stories (§§ 1-4).
Contents of the tradition (§ 5 *f.*).
Nucleus (§ 7).
Possible light from Persia (§ 8).
Discussion (§§ 9-11).
Possible light from myths (§ 12).
Specially parallel stories (§ 13).
Mythic elements, etc. (§ 14).
Bibliography (§ 15).

[There are three chief modes of procedure in dealing with the traditional story of the Temptations, or rather Trials, of Jesus. (1) The narrative may be regarded as having arisen in consequence of a kind of natural law or tendency which, in the case of one who has won the crown of moral perfection for himself and for his disciples, places a symbolic event summing up the trials and achievement of his life at the very outset of his career, just as the final victory of good over evil needs, through the operation of the same law, to be effectually guaranteed by a reported initial victory of the Light-god over the Dragon of Chaos. This may lead us to begin our consideration of the story of the Trials of Jesus by putting the story side by side with similar stories of other spiritual heroes known to tradition, and to put our literary criticism of the narratives under the control of results already obtained by such a comparison. Thus the literary criticism of the narrative will become subordinate to the historical (*religions-geschichtlich*) criticism of the narrative. The neglect of this procedure has, according to Gunkel and others, led to much misunderstanding of some of the narratives in the OT (notably those of Paradise, of the Deluge, and of Jonah), and it would perhaps be too much to suppose that no loss would be sustained by the neglect of it in the study of the NT. (2) It is also possible to begin our consideration of the narratives of the Trials by applying a purely literary criticism—*i.e.*, by determining, so far as may be possible, from what literary sources they proceed, and explaining their details by reference to the OT or to passages in the traditional life of Jesus. We may then consider whether, endeavouring to realise in some slight degree the mental state of Jesus, and applying the ordinary canons of probability, we can venture to point out a historical nucleus of the traditional story of the Trials, and we may then compare, or contrast, the Christian tradition with apparent parallels elsewhere. (3) We may, without disparaging either of the preceding methods, consider whether light cannot be thrown on the Christian tradition by inquiring whether the peculiarities of the narrative may not be accounted for by the discovery of some custom or observance the details of which are similar in essentials to those of the story of the Trials, and yet are beyond the suspicion of having been derived from it. The difference between the first and the second of these methods and between both and the third is striking. It may, however, be minimised, when the student of literary criticism is not opposed to the comparative study of myths, and when the student of strange customs does not at all deny the importance of illustrating, and to some extent at least explaining, the narrative from biblical and extra-biblical literary sources. The essential truth of the significant and instructive narrative of the Temptation is of course not a matter of controversy. Cp Cheyne, *Hallowing of Criticism.*]

1. Three stories. It is usual to explain the origin of the three synoptic[1] reports of the temptation by one or other of two critical hypotheses: (*a*) that Mk.'s represents a bare and brief allusion to the larger story, substantially reproduced in Mt. and Lk., which was already current when he wrote (cp 4 33, allusion to parables omitted), or (*b*) that Mt. and Lk. represent a common and somewhat mythical expansion (in Q, the Logia-source) of the original nucleus preserved by Mk. Neither of these hypotheses is without its difficulties, however, and it seems preferable upon the whole to conjecture that Mk.'s report constitutes an allied though independent[2] account of the incident (in the Ur-Marcus or Petrine narrative), which has been depicted with fuller ethical detail and for other ends in Q and thence transferred with editorial modifications to Mt. and Lk. The standpoint for criticising the contents of both stories is furnished by the principle that in its higher forms temptation becomes more than ever a mystery—hard to understand as an experience and harder to communicate, especially to less sensitive souls with a tendency to materialise the subtler elements of moral conflict.

2. Mk. 1 12 *f.* Upon this view Mk. 1 12 *f.* portrays the inauguration of Jesus as Messiah by a contest with dæmonic powers whom he encountered in bestial form. The allusion to 'wild beasts' is not a realistic touch (see §§ 9 *f.*) or a reference to the loneliness and danger of the experience, much less a subtle parallel to the first Adam (Gen. 1 28 2 19), but symbolic—and symbolic not of passions and hostile powers[3] but of devils who appeared in such guise to

[1] The author of the Fourth Gospel, with his higher Christology, naturally omits the temptation as one of several features (*e.g.*, the agony in Gethsemane) in the human experience of Jesus which would not have lain in line with his specific conception of Christ's person. He prefers to dwell on the resultant sinlessness (7 18 8 46), and the incidental allusions to a strife (12 27-32 14 30) breathe security of triumph rather than intensity of struggle.

[2] Mk. 1 1-13, though not an excerpt from earlier and fuller writings, is a *résumé* of facts already familiar in the evangelic tradition (cp 'the gospel,' *v.* 1). That does not imply, however, that *v.* 12 *f.* is the conscious abbreviation of a tale corresponding to that preserved in Mt. and Lk., even although the Logia underlying those gospels was composed of didactic pieces which circulated earlier than the Ur-Marcus. See Soltau's *Unsere Evangelien*, 35-50 and A. Menzies' *Earliest Gospel*, 62-63.

[3] As Réville (*Jésus de Nazareth*, 2 14) suggests—'les bêtes sauvages sont les passions dévorantes que déchainent les révolutions violentes; les anges conseillent et donnent les armes pures de la persuasion et de l'appel aux consciences.' This is too modern an idea. In Jewish apocalyptic angels are often violent and punitive, by no means to be identified with gracious and gentle influences. The wilderness might also be symbolic (Herm. *Vis.* i. 1 3), or part of the scenic accompaniment of a

the vision of devotees in the desert. To the fervour and imagination of Jesus the divine spirit is like a fluttering dove (*v.* 10), the satanic spirits like wild beasts. Here, as afterwards in human form (1 23, etc., especially 1 22 27 with the different application in Mt. 7 28), the satanic spirits comprise for Mk. a prominent sphere in which Jesus lived and worked as Messiah, the foe of dæmons. This interpretation of Mk.'s language,[1] therefore, is not simply in line with the naive psychology of the age,[2] which peopled the desert with haunting deities, visible especially to rapt devotees, but entirely consonant with the leading idea of Jesus' career developed in Mk.'s gospel (cp the mutual recognition of Jesus and dæmons in 1 23 *f.* 34 3 11 *f.* 5 6 *f.* 9 20; and Wrede's *Das Messiasgeheimniss in den Evangelien*, 23 *f.*).

3. Common matter.

Common to all three gospels is the symbolic term of 'forty days' (cp the forty years of Israel in the wilderness, Dt. 8 2, and the forty days' fast in the experience of Moses [Ex. 34 28] and Elijah [1 K. 19 8], and see NUMBER, § 8) to delineate, as in Acts 1 3, a considerable period of time. In Mk., at any rate, whatever be thought of Mt. 4 11 (cp 8 15 25 44 27 55), the angelic[3] service has no reference to food (Ps. 78 25 Wisd. 16 20). It is simply the counterpart of satanic opposition,[4] and represents an experience of continuous aid during the vigil, not (as in Mt.) a reward and refreshment vouchsafed after the strain. All three accounts, however, imply that Jesus passed through the prolonged crisis without fall or wound. Whatever he thought or sought in the desert, his character suffered no deflection or compromise, much less defeat. This is developed in Mt. and Lk., who draw independently upon a didactic passage in the Logia which evidently contained a naive, pictorial description of what Jesus experienced in a far less matter-of-fact and obvious fashion at this period. The form of it is vivid and severely simple upon the whole, but dramatic rather than mysterious, and naturally less impressive, because less inward and direct, than the later record of Jesus' strenuous temptation in Gethsemane or even of his sharp encounter with an insidious enticement near Cæsarea Philippi (Mk. 8 31-33). It now remains for us to consider the temptation-vision in this semi-parabolic presentment which Mt. and Lk. have realistically preserved. (Cp *HC* [1901] 1 i. 45-48.)

4. Mt. and Lk.

Both in Mt. and in Lk. the original report of Q has been worked over, and traces of editorial handling are obvious if (as a rule) comparatively unimportant.

Favourite or characteristic Matthæan terms in 4 1-11 are: 'then' (τότε, *quater*), 'coming forward' (προσελθών), 'the tempter' (ὁ πειράζων), 'and' (δέ, 4), 'the holy city' (τὴν ἁγίαν πόλιν),[1] 'takes' (παραλαμβάνει, *bis*), the asyndeton in 7, 'again' (πάλιν, *bis*), 'the world' (τοῦ κόσμου, 8), 'and behold' (καὶ ἰδού), besides the additions of 4*c*, 8 (high hill), and 'depart, Satan' (ὕπαγε σατανᾶ, 10). Lucan peculiarities in 4 1-13 are: 'full of holy Spirit' (πλήρης πν. ἁγίου,[2] 1*b*), 'in those days' (ἐν ταῖς ἡμέραις ἐκείναις), 'and he said' (εἶπεν δέ: GOSPELS, § 38, n. 2), 'answer' (ἀποκρίνεσθαι πρός), 'lead' (ἄγω, *bis*), 'departed' (ὑπέστρεψεν,[3] *bis*), τοῦ with infin. (10), 'world' (οἰκουμένη, cp 2 1), 'complete' (συντελέω, *bis*), 'before' (ἐνώπιον), 'departed' (ἀπέστη), besides the addition of 2*b*, 5 (in an instant), 6*c*, 9 (ἐντεῦθεν), 10 (to safeguard thee), 13 (for a season), and the omission of the angelic ministry at the close (made up for by the later vision of 22 43 ?).

It is evident that the original tale in Q was little altered in subsequent recensions and that the final editors have reproduced it accurately though not slavishly, preserving the essential features of the story. The main exception to this rule is the altered order of the second and third temptations by a process of transposition which is fairly common throughout the synoptics (see SERMON ON THE MOUNT, § 9). There are no data which would enable us to decide with any confidence which, if either, represents the original series in the Logia, much less the actual sequence. Fortunately the order is not a matter of moment.[4] Each of the two canonical sequences has plausible features and is ethically effective, especially in view of the gospel in which it occurs.

In Mt., where Jesus is pictured as the real if unexpected (11 3) Messiah of Judaism, the newly realised consciousness of his position (3 17) suggests the final and supreme temptation of adopting compromise with external methods in order to gain the universal dominion which formed his goal (4 8-11). The true Messiah, as had been already seen in part (Ps. Sol. 17 37-45), was to be no second Solomon but one whose reliance was solely upon God for strength and wisdom. In Lk., again, the climax is not merely that the OT scriptures themselves might suggest unworthy ideas, but that presumptuous claims upon God are a danger subtler than seductions appealing to the flesh or to the external and sensuous inclinations (4 9-12). Besides, 'thou shalt not tempt the Lord thy God' formed a dramatic and appropriate ending to the initial series of temptations in a life which Lk. emphasises (4 13 22 28) as a tempted existence throughout. Further, an apologetic tendency is to be traced in his anxiety to give a more natural geographical order, to show that the retirement was due to a spontaneous and spiritual[5] impulse or rather habit (4 1 *f.*, πλήρης πνεύματος ἁγίου . . . ἤγετο ἐν τῷ πνεύματι, cp Rom. 8 14), and to explain[6] for the benefit of non-Jewish readers (4 6, ὅτι . . . αὐτήν) how Satan could reasonably make such an offer.[7] The awkward

vision (Rev. 17 3) translated into circumstantial prose. But the literal sense is quite suitable and natural.

[1] It is one bit of evidence in favour of the verdict that whilst Mk.'s gospel rests upon facts, not upon ideas, at a relatively small number of points 'legendary features have come to attach themselves to the facts' (O. Holtzmann in *ZNTW*, 1901, p. 273).

[2] For demons in bestial shape see, *e.g.*, Mk. 5 12 11 Rev. 12 3 13 11 16 13 *f.*, and—for the current belief in their connection with waste and lonely places—Mt. 12 43 (DEMONS, § 3; MAGIC, § 2, *b.* 1, and Cheyne on Is. 13 21), with Charles' note on Apoc. Bar. 10 8. These and other traces of Semitic folklore (see Doughty, *Ar. Des.* 2 189-194) form the atmosphere for much in the synoptic tales of evil spirits and their malign influence upon men (cp also 2 Cor. 11 3; Everling, *Die paul. Angelologie*, etc., 51-57). In the Arabic 'gospel of the infancy' demons emerge from a lad's mouth in the shape of crows and serpents (*Apocryphal Gospels*, ed. B. H. Cowper, 179).

[3] Evidently part of the primitive tradition, for Mk. never mentions angels elsewhere in narrative. A Johannine equivalent in Jn. 1 51?

[4] Just as the 'rulers of this world' (ἄρχοντες τοῦ αἰῶνος τούτου, 1 Cor. 2 6-8) are evil spirits who attempt to thwart the Lord of glory, so here the Messiah encounters supernatural foes, after Ps. 2 2 *f.* where the rulers (οἱ ἄρχοντες) gather against the Lord and his anointed (καὶ κατὰ τοῦ χριστοῦ αὐτοῦ), the latter being God's son *par excellence* (*v.* 7 = Mk. 1 11 Lk. 3 22 [D], etc.). Cp *Clem. Hom.* 8 22 of Satan setting himself to catch him (θηρεύειν αὐτὸν ἐπιχειρῶν) at this period. In Herm. *Vis.* iv. 2 4 Segri is the angel with authority over beasts such as are seen in the vision. The conception of Messiah as inevitably assailed by dæmons is preserved in Rev. 12 4 *f.* (cp Mk. 3 27 and specially Mt. 8 29).

[1] The Gospel of the Hebrews apparently agreed here with Lk. (τὸ ἰουδαϊκὸν οὐκ ἔχει· "εἰς τὴν ἁγίαν πόλιν" ἀλλ' "ἐν ἰλήμ" [ἱερουσαλήμ], Handmann, *TU* [1888] v. 3 70). The telic note, characteristic of Mt. (4 1), is added to Lk. harmonistically by Ss, as Lk.'s 'for a season' to Mt. 4 11*a* (so Cur.).

[2] Here, as at 3 22 (= Mt. 3 16 Mk. 1 10), the most correct form (Dalman, *Worte Jesu*, 166 *f.*).

[3] In *v.* 1, whither? Hardly to Galilee (*v.* 14). There is a good deal to be said for Hahn's idea that the retirement and conflict of Jesus in Lk. forms an aside—a change of purpose (cp *v.* 1 and *v.* 14). Certainly that is the impression left by the narrative. But this may be due simply to the ill-arranged order of Lk. at this point (see, *e.g.*, the unchronological position of 3 19 *f.*) and not to the author's real conception.

[4] 'The thoughts crossed and recrossed each another, occurred and recurred, and the record is simply a classified summary of forty days' reflections and examinations' (Peyton), or rather of prolonged agitation in mind and soul. Some historical significance, however, is attached by Hönig to the order (desert, hill = Galilee, temple = Jerusalem); see also O. Holtzmann's *Leben Jesu*, 35 *f.* 108 *f.*

[5] Bruce (*Expos. Grk. Test.* 1 486) prefers to regard this as the first instance of Lk.'s editorial solicitude: no evil thoughts possible in the mind of such a holy man.

[6] Mt. naturally takes it for granted that his readers understand the Jewish notion, shared by most early Christians, that the present age and world lay under the control (2 Cor. 4 4 Eph. 6 12, etc.; Everling, *op. cit.* 49 *f.*, 107 *f.*) of Satan as king of the present time (ὁ πρόσκαιρος βασιλεύς) or king of the present things (β. τῶν παρόντων) (*Clem. Hom.* 8 21).

[7] The transport to a hill-top, characteristic of Jewish apocalyptic (Rev. 21 10, cp Herm. *Sim.* ix. 1 1, etc., also Ezek. 40 2, Apoc. Bar. 76 8), is also softened down (ἀναγαγών), and stress

TEMPTATION OF JESUS

insertion of the genealogy (3 23-38) between the baptism and the temptation may have been intended to suggest that Jesus was mature, as well as equipped by descent, at his entrance upon ministry and at the moment of his conflict with Satan (so, evidently, Justin, *Dial.* 125, 354: ὅτε γὰρ ἄνθρωπος γέγονεν, προσῆλθεν αὐτῷ ὁ διάβολος). It certainly makes the connection, rightly emphasised in Mk. 1 12 (καὶ εὐθύς) and even Mt. (4 1, τότε), somewhat loose.

5. Contents of the tradition.

Treating the subject of their relation to similar narratives elsewhere (see § 13), we may remark that the figurative[1] stories in Mt. and Lk. were written in an atmosphere of belief in Satan as the arch-opponent of God's authority (Mt. 12 27 *f.* = Lk. 11 19 *f.*, etc.) and the personal agent in seduction—a belief (Jewish and early Christian; Spitta, *Das Urchrist.* 1 34-38) which there is no reason to doubt was shared, in however minimised and moralised a form, by Jesus himself. In two other visions of spiritual conflict recorded by Lk.[2] (10 18 22 31 *f.*), Satan appears as the defeated protagonist of Jesus; and these, like the original nucleus of the baptism-story (*Historical New Testament*, 1901, p. 18) and possibly also the transfiguration, certainly represent (ὑφηγήσατο ἡμῖν, *Clem. Hom.* 11 35) autobiographical communications of one who, like Paul, though far from being a visionary, had visions and moments of rapture, especially at crises of his religious experience. These communications[3] must have been made to the disciples in order to reassure, impress (Mt. 26 38), and clarify their minds. The main object was to throw light upon his own method and aims, and also by inference upon the course of life to be followed by his adherents. Hence, in their present didactic form, it is not easy to determine whether the stories originally possessed a Messianic or a human significance, unless both are conceived to have lain blended together.

[With regard to the order of the three Trials, it is worth mentioning (after O. Holtzmann, *Leben Jesu*, § 72) that according to the fragments of the Gospel of the Hebrews (referred to again in § 14) the narrative was originally so arranged that the temptation on the mountain came first, that in the city second, and that in the wilderness third, whereas in Mt. the order is: wilderness, city, mountain, and in Lk. wilderness, mountain, city. He gives psychological reasons for preferring the order of the Gospel of the Hebrews, pointing out that it coincides moreover with that in which the texts quoted from Deuteronomy occur (6 13 16 8 2 *f.*). It was in Deuteronomy, he supposes, that Jesus, in the prolonged period of meditation after his baptism in which his vocation had been revealed to him, sought for the guidance of which he felt in need.]

6. The three trials.

i. Loneliness and fasting,[4] the normal conditions of an ecstasy or trance, naturally introduce the first synoptic temptation, the ethical point of which lies in the refusal of Jesus to seek exemption from the limitations of common needs and bodily privations. The later counsel Mt. 6 25-33 is thus grounded in his own experience (cp Jn. 4 31-34 and Mt. 10 8-10 Lk. 9 3 10 4). Divine sonship, even in its highest degree, is thereby shown to confer no title to exceptional treatment; it merely enforces the duty of loyalty to God's interests and demands as the supreme thing in the moral life (see the application of this in Jn. 6 26 *f.*), and the companion duty of faith, that such devotion shall not be left ultimately destitute by God.

ii. With admirable penetration the very intensity of such faith is represented in the temple-temptation as an insidious occasion for presumption. The inclination now is to abuse not one's feeling of independence but one's consciousness of dependence—*i.e.*, the current pious conviction, shared by Jesus, that God could and would miraculously interpose on behalf of his servants in peril. Jesus repels this suggestion.[1] Genuine faith in man, he is convinced, will be content to believe in God's care without nervously insisting upon arbitrary proofs of it.

iii. The mountain-temptation depicts Jesus' rejection of another attractive and plausible idea which occurred to him (no doubt suggested in part by popular expectation), viz., that his Messianic goal might be swiftly and smoothly reached along paths bordering upon compromise. Renan's motto for the scene—'Christ or Mahomet'—hits off one aspect of the dilemma precisely. Yet the bearing of the temptation need not be exclusively messianic, as Mk. 8 36 shows; the latter passage[2] (with 8 33) indicating also that here at any rate the larger temptation-narrative, relegated not without psychological aptness to the opening of Jesus' life, forms really a miniature of the fundamental temptations which recurred as constant factors in his career, just as the Sermon on the Mount is placed by Mt. unchronologically in the forefront of the ministry as a summary of his general teaching. No doubt the moral insight of Jesus carried with it foresight of coming perils. At Nazareth he had not been out of touch with currents surging from the outside pagan world and its glories (see GASm. *HG* 35-37, 433-435, for the consciousness of ethnic splendour possible to a Galilæan). But the full force of such a temptation could not be felt until he had entered definitely upon his public mission (cp Jn. 6 14 *f.*); and the same may be said of the temple-temptation (Mt. 26 53 *f.*), for hitherto Jesus, though acquainted of course with the dizzy pinnacle of the temple (Jos. *Ant.* xv. 11 5), had run no risk to his person (see further the didactic side of this developed in Mt. 10 17-31 Lk. 12 2-12). The difficulty of Jesus at the outset naturally was to see and choose the true method: his subsequent trial, recurring at frequent stages, was to adhere to the choice made in this initial hour of insight.

7. Historical nucleus.

The Logia passage on the temptation thus represented the disciples' memory of Jesus' memory. It was the literary embodiment, coloured by OT reminiscences,[3] of a crisis in the life of Jesus which (cp Mt. 12 29 Mk. 3 27) he imparted in an ideal and concentrated form, looking back on it through the later, deeper experience of his

laid on the time (ἐν στιγμῇ χρόνου, 4 5). The appositeness of Mt. 4 3 and the more vivid Lk. 4 3 lies in the resemblance between the rounded shingle of the locality and loaves of bread (cp Mt. 7 9). There is no subtle allusion to the Baptist's remark (Mt. 3 9 11), which indeed is amply illustrated otherwise (cp Klein in *ZNTW*, 1901, pp. 343-344).

1 They appear to lie between a chronicle and a poetical parable. As early as the seventeenth century, the Temptation was viewed as 'an interchange of dangerous thoughts,' by Balthasar Bekker: *Die bezauberte Welte* (chap. 21).

2 It is noticeable that the tempted nature of Christ is brought forward in Hebrews, a book linguistically allied to Lk.-Acts.

3 For the imparting of the substance of ecstasies and trances see Acts 11 4 *f.* 16 9 *f.* 18 9 *f.* 22 6 *f.*, etc., and *Asc. Isaiæ*, 6 10-15, 'Oculi eius erant aperti, os vero clausum, sed inspiratio spiritus erat cum illo. Visio quam videbat, non erat de seculo hoc, sed de abscondito omni carni. Et cum cessavit a visione, reversus notificavit visionem Ezechiæ et filio eius Nasoni.'

4 See Gunkel's *Die Wirkungen des heiligen Geistes* (1899), 22, and FASTING, § 2 (with PROPHETIC LITERATURE, § 19). A notable exception occurs in Rev. 1 9 *f.* Intense prayer may have preceded the Temptation (see von der Goltz, *das Gebet*, 3-4), but it is not specifically mentioned.

1 The ethical triumph of the crisis, as Keim points out (*Jesu von Nazara*, ET, 2 328), is not simply that Jesus conquered but that 'the inexorable godlike loftiness of his judgment discovered the devil in scruples which even the noblest would have fondled as spiritual pearls.' Further, with the possible and partial exception of the hunger-experience, the allurements in this initial crisis of Jesus' life are depicted as attractive rather than threatening or painful. All trial (in the modern sense of the word) is temptation; but all temptations are not trials. As Gethsemane indicates, Jesus felt the harsh as well as the soft touch, and emerged from the ordeal unspoiled: cp πέπονθεν αὐτὸς πειρασθείς . . . χωρὶς ἁμαρτίας (Heb. 2 18 4 15).

2 The allusion to Peter as an embodiment of Satan corresponds with the early Christian belief that seductions through human influence were the devil's work (Weinel, *Wirkungen des Geistes u. der Geister*, 14-17 [1899]); but the synoptic stories, in their present form at any rate, expressly exclude the idea that Jesus had to grapple in the temptation with anything but spiritual hosts of wickedness (Eph. 6 11-13). Even the notion of the temple-temptation as a miracle of display before a crowd is rather irrelevant and theatrical. For the unpolitical character of Christ's propaganda, see Barth's *Hauptprobleme des Lebens Jesu*, pp. 41-44.

3 The OT citations are all from 𝔊, and present little or no difficulty. Mt. 4 4*c* omits τῷ before ἐκπορ. with AF (Dt. 8 3); the other variants ἐν ἄρτῳ (Zahn, *Einl.* 2 316; Nestle, *Einführ.* 211) and ἐν ῥήματι are insignificant and uncertain. Ps. 91 11 *f.* is quoted with some freedom in Mt. 4 6. But in citing Dt. 6 13 both Mt. and Lk. agree with 𝔊A in substituting προσκυνήσεις for φοβηθήσῃ and in adding μόνῳ to αὐτῷ. The sequel in Ps. 2 8 *f.* to *v.* 7 may have suggested the mountain-temptation, just as perhaps the beasts of Ps. 91 13 may have suggested Mk. 1 13. But such conformations or infusions are at most subordinate to the dominant factor in the composition of the story—viz., the endeavour to summarise the cardinal temptations of Jesus.

actual ministry, when the initials eductions had become more grave and subtle than before. The historical nucleus of the tradition is the natural and overpowering impulse which drove Jesus into the gaunt, wild solitudes W.[1] or rather E. of the Jordan to reflect upon the strange consciousness (Baldensperger, *Das Selbstbewusstsein Jesu*, 229 *f.*) which had recently dawned upon him at his baptism,[2] to forecast its issues and determine his course of action (cp Gal. 1 15-17). It is noticeable that he does not seem to have doubted the reality of his Messianic consciousness; for the words 'if thou art a son of God' (εἰ υἱὸς εἶ τοῦ θεοῦ) do not bear this full hypothetical meaning. What he had to win clearness and conviction upon was the real nature and consequences of his position; if any hesitation or uncertainty upon the genuineness of this occurred to him, it was during the period of conflict[3] (implied by Mk. and Lk., not Mt.) and self-questioning preceding that in which Mt. and Lk. place the triple and typical conflict of what is rather inappropriately termed *the* Temptation of Jesus. J. Mo.

It has been remarked above (introd.) that light might be expected to be thrown upon the singular and suggestive story of the Trials of Jesus by comparing it with more or less striking parallels in the literature of other religions, but that it is also possible that the insertion of such a narrative (which is plainly not literally true) may conceivably be accounted for by the existence of some custom or observance which may have led the narrator to postulate such an event as the threefold trial at the opening of the ministry of Jesus. In an essay read before the Oxford Society of Historical Theology in Nov. 1901 (an abstract of which is given in the Society's *Proceedings* [privately printed], 1901-2, pp. 27-31) the view has been expressed by Prof. A. A. Bevan that the so-called Temptation-story in its original form (*i.e.*, a form resembling the narrative in Mk.) was a description of a traditional practice or ceremony, by which, it was supposed, a man could obtain control over demons.

8. Possible light from the modern East. The practice referred to must have been of ancient origin, and it has continued in the East down to the present day. Rather than attempt to describe it anew, Prof. Bevan cites the testimony of an Oriental, as reported by Prof. E. G. Browne in his work, *A Year amongst the Persians* (1893), 148 *f.* About fifteen years ago Prof. Browne heard this story from a philosopher of Isfahān, entitled Amīnu-sh-Sharī'at.

'At one time of my life I devoted myself to the occult sciences, and made an attempt to obtain control over the *jinnīs*, with what results I will tell you. You must know, in the first place, that the *modus operandi* is as follows:—The seeker after this power chooses some solitary and dismal spot. . . . There he must remain for forty days. . . . He spends the greater part of this time in incantations in the Arabic language, which he recites within the area of the *mandal*, or geometrical figure, which he must describe in a certain way on the ground. Besides this, he must eat very little food, and diminish the amount daily. If he has faithfully observed all these details, on the twenty-first day a lion will appear, and will enter the magic circle. The operator must not allow himself to be terrified by this apparition, and, above all, must on no account quit the *mandal*, else he will lose the results of all his pains. If he resists the lion, other terrible forms will come to him on subsequent days—tigers, dragons, and the like—which he must similarly withstand. If he holds his ground till the fortieth day, he has attained his object, and the *jinnīs*, having been unable to get the mastery over him, will have to become his servants and obey all his behests. Well, I faithfully observed all the necessary conditions, and on the twenty-first day, sure enough, a lion appeared and entered the circle. Next day a tiger came, and still I succeeded in resisting the impulse which urged me to flee. But when, on the following day, a most hideous and frightful dragon appeared, I could no longer control my terror, and rushed from the circle, renouncing all further attempts at obtaining the mastery over the *jinnīs*. When some time had elapsed after this, and I had pursued my studies in philosophy further, I came to the conclusion that I had been the victim of hallucinations excited by expectation, solitude, hunger, and long vigils; and, with a view to testing the truth of this hypothesis, I again repeated the process which I had before practised, this time in a spirit of philosophical incredulity. My expectations were justified; I saw absolutely nothing. And there is another fact which proves to my mind that the phantoms I saw on the first occasion had no existence outside my own brain. I had never seen a real lion then, and my ideas about the appearance of that animal were entirely derived from the pictures which may be seen over the doors of baths in this country. Now, the lion which I saw in the magic circle was exactly like the latter in form and colouring, and, therefore, as I need hardly say, differed considerably in aspect from a real lion.'

This custom, it will be noticed, belongs to the large class of observances now often called 'ceremonies of initiation,'

9. Initiation ceremonies. that is to say, ceremonies by which a man is introduced into some new line of life, such as that of a warrior, a priest, a king, and so forth. Among savages, as is well known, these ceremonies are often very elaborate and very repulsive, involving, for example, mutilations of the body and other torments; among civilised peoples there is naturally a tendency to soften them down, or suppress them altogether; but traces of them have survived in almost every country of the world.

In the particular case under consideration the purpose

10. Subjugation of jinn. of the ceremony is perfectly clear, namely, to obtain power over those beings whom modern Orientals call *jinn*—a term which in meaning corresponds to the Jewish *shēdhīm* and to the Greek δαίμονες, δαιμόνια.

Later Jewish writers told that King Solomon possessed such a power (τὴν κατὰ τῶν δαιμόνων τέχνην, as Josephus calls it). Josephus also states that Solomon composed incantations whereby diseases are relieved, and left behind him forms of exorcism, whereby men control and drive out demons, so that they can never return. He adds, 'even to the present day this mode of cure prevails among us to a very great extent' (*Ant.* viii. 2 5).

In this connection it is to be observed that both in ancient and in modern times a distinction is made between *subjugating* demons, as Solomon is supposed to have done, and *entering into league* with them, in order to gain some advantage for oneself or to injure one's enemies. The former is called lawful, the latter unlawful magic. Now the ceremony which we are discussing evidently belongs to the former category, and that it bears a striking resemblance to the accounts of the temptation in the Gospels, as Prof. Bevan points out,

11. Illustrates gospel story. cannot be denied. In both cases we find the forty days spent in the desert, the fasting, and the presence of the wild beasts. It is also plain that in the Synoptic narrative of Jesus' ministry the casting out of demons is a continually recurring feature. It appears natural, therefore, that the narrative should begin with an account of the process by which Jesus' power over the demons was acquired. Nor must we overlook the important fact that the Fourth Gospel, which omits the 'Temptation,' *also* omits all reference to the casting out of demons. Does not this give plausibility to the view that the early Christians believed that their Master had obtained control over the demons by performing this rite at the outset of his ministry? Further corroborations of this view are given in the abstract of this essay in the *Proceedings* referred to.

An earlier explanation must, however, be mentioned. The more we familiarise ourselves with the utterances

[1] In the vicinity of BETHABARA? Cp JOHN THE BAPTIST, § 1. On the haggard, austere Judæan desert with its vipers (Mt. 3 7), see GASm. *HG* 312-317.

[2] Justin (*Dial.* 103, 331) loosely brings the two into close connection—ἅμα τῷ ἀναβῆναι αὐτὸν ἀπὸ τοῦ Ἰορδάνου the voice from heaven is followed by the temptation to worship the devil.

[3] In *Clem. Hom.* (11 35 19 2) these forty days are occupied by discussions (διαλέγεσθαι) with the devil (προτρέπων καὶ ἀναπείθων, 8 21). See the striking passage cited from Victor Hugo's *Quatre-vingt-treize* (in John Morley's *Studies in Literature*, 235 *f.*) on the moral incitements and haunting effects of Nature upon the human conscience, and especially of Nature in her more savage and gloomy scenes. Where the strong conscience resists, and develops by resisting, 'the puny conscience soon turns reptile . . . it undergoes the mysterious infiltration of ill suggestions and superstition.'

TEMPTATION OF JESUS

of primitive antiquity, the more we are relieved from the difficulties incident to a literalistic and rationalistic reading of ancient religious records. Primitive antiquity delights in myths, and details derived from myths were not held to be misplaced in narratives the nucleus of which was historical. Indeed, even whole episodes might be borrowed from myths and adapted to their own needs by the writers of popular narratives, without any sense of incongruity. How largely this is the case in the earlier portion of Israelite history, is becoming known, and there is no sufficient reason for denying the existence of a more or less modified mythic embroidery in early Christian narratives. The narrative of the Temptation of Jesus is one of the most precious of these narratives. We cannot call it an allegory any more than we can call the Hebrew paradise-story an allegory, for it is put forth as history—such history as to early Christians of a primitive habit of mind appeared to need no proof, because it was ideally and undeniably true. Had these been called upon to prove the facts of the history, they would not have understood the summons, unless, indeed, it came to them from one who was equally sceptical as to all that the truly ancient mind held most dear, and in this case they would have scorned to answer it. We need not then indulge the pleasant fancy that Jesus himself may have given the impetus to the production of the temptation narrative, by giving some of his nearest disciples glimpses of his early soul-history. The fancy is not only unnecessary but also unwise—at least, if it entices us to suppose that our purely subjective imaginings are of equal value with critical or traditional facts, and so to lose that sobriety which in a student of religion is the crowning moral quality.

12. Possible light from myths.

There are two stories[1] parallel to that now before us which deserve the attention of the student. One is the Temptation of Zarathustra (Zoroaster) by the evil spirit Angra Mainyu; the other is the Temptation of Gautama (the Buddha) by the demon Mara. In both these stories the tempter seeks first of all to overcome the Holy One by violence, and only when this effort fails has recourse to spiritual temptations.

13. Specially parallel stories.

Ahriman, 'the guileful one, he the evil-doer,' bids a demon rush down upon Zarathustra. But the holy Zarathustra steps forward to meet him, wielding 'stones as big as a house,' obtained from Ahura Mazda (*i.e.*, thunderbolts). Then the guileful one, fearing the overthrow of his own empire, promises Zarathustra that if he will 'renounce the good law of the worshippers of Mazda,' he shall 'gain such a boon as Zohak gained, the ruler of the nations.'[2] Zarathustra answers, 'No! never will I renounce the good law . . . though my body, my life, my soul, should burst.' And when Ahriman howls out, 'By whose word wilt thou strike and repel,' Zarathustra answers, 'The words taught by Mazda, these are my weapons, my best weapons.' Once more he chants the sacred formula, the Ahuna Vairya, and prays, 'This I ask thee: teach me the truth, O Lord!'[3]

With this, Darmesteter[4] well compares the Temptation of Gautama by the demon Mara.

The legend is that when the young Indian prince made the 'great renunciation' to devote himself to the discovery of truth for the sake of his fellowmen, Mara became visible in the air, promising that in seven days from now the wheel of empire would appear, and would make Gautama sovereign over the four continents and the two adjacent isles. Baffled, the demon Mara sends his three daughters, Craving, Discontent, and Lust; but their wiles are fruitless; on the forty-ninth day the king of the gods brings water for his face, and the four guardian angels minister to him.[5]

It is plain that both these stories are of mythic origin; plain too that psychological reflection has done more for the Buddhist story than for the Zoroastrian.[1] The more archaic of the two stories is the Temptation of Zarathustra, the more appealing the Temptation of Gautama. Darmesteter traces both to the nature-myth embodied in the dialogue of the Panis and Saramâ in the Rig Veda. This, at least, seems highly probable; the Temptation-stories in general originated in the mythical conflict between the Light-god and the Storm-spirit, and while we fully grant that the story of the Temptation of Jesus has been, like that of the Temptation of Gautama, enriched by psychological reflection, and (we may add in the case of the Gospel-story) by reminiscences of the Temptation of Adam and of ancient Israel, we cannot consistently deny that its ultimate germs are mythical. Not that the mythic element in this story can be traced to imitation of either of the two parallel stories mentioned above (§ 15); so far as we know as yet, it is only in the apocryphal Gospels (150-700 A.D.) that Buddhistic influence can safely be admitted. Indeed, the 'exceeding high mountain,' from the top of which the tempter shows Jesus 'all the kingdoms of the world and the glory of them,' would seem to be suggested by the Babylonian mountain of the gods which passed into the folklore of the Israelites[2] (cp Is. 14 13 Ezek. 28 16), and is ultimately the great mythic earth-mountain. 'We know not where to look for the "high mountain,"' remarks Keim. The Gospel according to the Hebrews, however, did know. According to a fragment in Origen,[3] 'the Saviour said, Even now my mother the Holy Spirit hath seized me by one of my hairs, and hath brought me to the great mountain Tabor (Θαβωρ, Ταβωρ).' Why Tabor? Probably by a misunderstanding. It was the mountain of the Navel (טבור) that was originally meant—the mountain in the earth's centre. Earlier generations knew where this mountain was—it was in the old Hebrew Paradise, but certainly no one in the first Christian century could have localised that Paradise.[4] It was also on this mountain that we should have expected to find Jesus spending the forty days; the analogies of Ex. 24 18 34 28 1 K. 19 8 *f.* point distinctly to this. But here again the lapse of centuries since the period of a still flourishing folklore must be borne in mind. Since these passages were written transcendentalism had placed its seal on Jewish theology, and even the most venerated earthly mountain was no more than the footstool of God (cp Ps. 99 5 132 7). Jewish ascetics naturally resorted to the desert, as the region where communings with another world would be most attainable (cp JOHN THE BAPTIST, § 1). It was possible there to reduce the claims of fleshly nature to the utmost; there, too, mysterious oracular voices might be heard (see col. 3882, with n. 2); there, too, the moral athlete might prove his spiritual weapons in conflict with the Evil One. Whether the 'forty days' were, according to the earliest form of the narrative, really forty days of temptation may be doubted. The Lenten fast of forty days might naturally exert a modifying influence on the original tradition, which surely must have said that Jesus, as the second Moses and the second Elijah,[5] communed with God for forty days before he underwent the sorest attack of the Evil

14. Mythic elements.

1 Already referred to by J. E. Carpenter, *The First Three Gospels*, 165 *ff.*; J. M. Robertson, *Christianity and Mythology*, 343 353 355.

2 A king in ancient Iranian mythology who ruled the world for a thousand years.

3 *Vendidâd* (Zendavesta), 19 1-11 (the Revelation chapter), *SBE* 4 204-206; cp Introd. p. lxxvii. There is also a briefer account of the episode in the Dīnkart, besides allusions to it elsewhere (A. V. Williams Jackson, *Zoroaster, the Prophet of Ancient Iran*, 53).

4 *Ormazd et Ahriman*, 201.

5 *Birth Stories* (Rhys Davids), 1 84 96 *f.* 106 *ff.*

1 According to Rhys Davids (*Buddhism*, 36, SPCK), 'the very thoughts passing through the mind of Gautama appear in gorgeous descriptions as angels of darkness or of light. Unable to express the struggles of his soul in any other way, they represent him as sitting sublime, calm, and serene during violent attacks made upon him by a wicked visible tempter and his wicked angels, armed by all kinds of weapons.' We must not, however, imagine that the Temptation of Gautama is of purely psychological origin. Even here the first germs are evidently mythological (see Darmesteter).

2 The fondness for references to mountains in Jewish eschatological literature also has its roots in mythology.

3 See Nestle, *NT Gr. Supplementum*, 77, and cp TABOR, § 5.

4 There is evidence suggesting that the early tradition placed it in the Jeraḥmeelite Negeb (see PARADISE, § 11, with n. 6).

5 On the genesis of the 'forty days' in the Moses and Elijah story, cp MOSES, § 11.

One.[1] Just so, Zarathustra is said to have beheld seven visions of Ormazd and the archangels before meeting the combined attack of the powers of evil.[2] It may well be that in the original Temptation of Jesus, as in that of Zarathustra, the efforts of the tempter were made to centre in the one object of drawing the Saviour away to a false ideal of success. Analogy favours the view that this, like other stories of the same class, grew, and by the belief that it grew our appreciation of the final perfected form is increased rather than diminished.

One serious difficulty, however, remains. The short account in Mk. runs—

'And he was in the wilderness forty days tempted of Satan; and he was with the wild beasts; and the angels ministered unto him' (Mk. 1 13),

To suppose that this account merely sums up a fuller narrative, such as Mt.'s, is scarcely admissible. It consists of three clauses, and it is only the first and the third which can be represented as the skeleton of the vivid narrative known to Mt. and Lk. 'He was with the wild beasts' (ἦν μετὰ τῶν θηρίων)—clearly there is something more than picturesque realism here, and the duty of the critic is not performed by referring to Is. 30 6, 2 Macc. 5 27. We seem to have here a fragment of another separate narrative, attached to the beginning of Jesus' career, the trials described in which were those incident to initiation into mysteries, or (in Egypt) to the passage of the soul to the Islands of the Blest.[3] J. M. Robertson[4] is inclined to account in this way for the tempter's invitation to Jesus to grasp at food before the appointed time. 'We know that among the trials of the later Mithraic initiations were those of hunger and thirst; and as the adversary, the tempter, is a capital figure in all stages of the Mazdean system, it would be almost a matter of course that the initiate should figure as being tempted by him to break down in the probation.' It would certainly not be extraordinary that some echo of these mysteries should have made its way into the Christian community, considering how close was the struggle between Christianity and Mithraism (the successor and supplanter of Mazda-worship) at a later period. Nor have we even thus exhausted critical possibilities. Considering that ability to vanquish demons was regarded as one of the most essential gifts of the Messiah (cp Mk. 3), it is not surprising if an attempt was made by early Christians to connect the temptation-story with this widely-spread view of the messianic office. The discussion in §§ 8-11 will not, indeed, supersede the mythological theory, but it may help us to realise the popular theories which may possibly have been based at an early time on the narrative of the temptation. T. K. C.

15. Literature. On the literary criticism of the synoptic narratives, besides the relevant sections in critical editions of the synoptic gospels and in the various biographies of Jesus, see von Engelhardt, *De tentatione Jesu* (1858), Hünefeld, *Die Versuchungsgeschichte* (1880); N. Schmidt, *St. Kr.*, 1889, p. 443 *f.*; Wendt's *Lehre Jesu* (ET, 1 101 *f.* 395); W. Hönig, 'Die Versuchungsgeschichte' (*Protest. Monatshefte*, 1900, 331 *f.* 382 *f.*); and B. W. Bacon, *Bibl. World*, Jan. 1900, pp. 18-25; also Ullmann's *Sündlosigkeit Jesu* (ET, 123-144 265-291 [1870]); Trench's *Studies in Gospels*, 1-65 (1867); *Ecce Homo* (ch. 2); Campbell's *Crit. Studies in Luke*, 16-28 (1891); A. E. Garvie, *Exp. T* 10 301 *f.* 356 *f.* 419 *f.* 453 *f.* 509 *f.*); W. W. Peyton, *Expos.*, third ser. 9 369-391, fourth ser. 2 360-378 439-454 4 223-236 340-360; and W. B. Hill, *Bibl. World*, 11 28-36; further, on the metaphysical problem, Bruce, *Humiliation of Christ* (3) (1889), 236-288; and Fairbairn, *Christ in Mod. Theology*, 348-353 (1893). A crude literalism dominates essays like Nebe's *Der Versuch des Herrn eine äussere Thatsache* (1857), and F. Nerling's 'Die Versuchung Jesu Christi, des Sohnes Gottes, durch Satanas in der Wuste' (*Mittheil. und Nachrichten für die evang. Kirche in Russland*, 82 49-104); cp

[1] Keim unites the two views of the forty days. 'He stands like Moses on Sinai in still converse with God, by whose word he lives, but he is, at the same time, put to the test by Satan; and it is this side of his sojourn which has been most industriously portrayed' (*Jesus of Nazara*, ET 2 305). The synoptics, however, only speak of his being tempted of the devil.

TENT. The tent, as a place of abode or shelter, appears to stand midway between the tree and the circular hut.

1. Introduction. The tree, with its canopy of branch and brushwood, would suggest to nomad tribes the use of the tree-trunk or pole, around which would be hung the skins of animals caught in the chase, whilst settled races would prepare a more lasting shelter by the erection, on a similar plan, of round (or nearly round) dome-shaped buildings of straw and clay. A later development of this would be the construction of round buildings with perpendicular walls, and sloping, not conical roof.

For these stages cp Montelius, cited by O. Schrader, *Indogerman. Altertum*, 339 *f.*, and J. H. Middleton, art. 'Templum' in Smith's *Dict. Class. Ant.* 2 773*b* ('the round shape was the earlier form for a god's house, just as the circular hut, built round a central pole, is the early architecture for a human habitation'). It is not denied, however, that oval or oblong buildings are very old, and although there are indications that the Indo-Germanic races, for example, passed through the 'round-hut' stage (Schrader, 981 *f.*), it cannot be proved, although it may plausibly be inferred, that they were originally tent-dwellers. To proceed farther along this line, and to suggest that from the cave has arisen first the rock-hewn chamber and then the rectangular abode, is a hypothesis not yet sufficiently warranted by the evidence.[1] At all events, there is reason to suppose that the portico or gateway in front of the Egyptian house, for example, has evolved from a previous practice of building some kind of structure before the mouth of a cavern. Cp ORACLE, 3.

It is unfortunate that the exact age of the circular dome-shaped bee-hive buildings in the Sinaitic peninsula which are described by Palmer (*Desert of the Exodus*, 139 *ff.*, 169, 317, etc.), is unknown.[2] At all events there is no solid ground for the old theory (based on Lev. 23 43) that they were once occupied by the children of Israel during their wanderings in the wilderness. Some of them (at least) appear to have been used as tombs by monks, a use to which they are occasionally put at the present day, and this supports Mr. F.C. Burkitt's suggestion that the term applied to them, ***nawāmīs***, is not from ***nāmūs***, 'mosquito,' but is 'an evident oral corruption of ***nawāwīs***, plural of ***nā'ūs***, which is ultimately derived from *ναός* (Syr. *nausā*), "temple," but is used for "cemetery," and apparently for the Parsee towers of silence—in fact for any non-Mohammedan kind of burial-place' (private communication).

The characteristic Hebrew term for the tent is *ōhel* (אֹהֶל, σκηνή [BAL]), occasionally rendered TABERNACLE (*q.v.*, § 1). It has been connected[3] with the Ass. *ālu*, 'settlement, city' (in contrast with *maḫāzu*, 'fortified place'); but the relationship is doubted by Nöldeke (*ZDMG* 40 720 [1886]), who also questions the identity of the Hebrew word with the S. Sem. *ahl* (*op. cit.* 154, n. 1).[4] On the other hand, *ōhel*, like *báyith* (see HOUSE, § 1), may refer not only to the dwelling, but also to its occupants; cp Ps. 83 7 [6] 'tents of Edom' (∥ Ishmaelites), 120 5 'tents of Kedar' (cp *v.* 6*b* 'those who hate peace'),[5] and for this reason it has been considered probable that the last two letters of אהליהם in 1 Ch. 4 41, and that מקנה of 2 Ch. 14 14 [15], are corruptions of tribal names.[6]

'Tent' is also the rendering of ***miškān***, מִשְׁכָּן, Cant. 1 8 and (∥ אהל) Nu. 24 5 Jer. 30 18; of ***sukkah***, סֻכָּה ('booth') in 2 S. 11 11, see PAVILION (1), TABERNACLE, § 1; and of ***ḳubbah***, קֻבָּה, Nu. 25 8, see PAVILION (2), and § 4 below. *Báyith*, too, is used of a tent[7] in Gen. 27 15 33 17 (J), and is thus rendered also

[1] For cave- or underground dwellings among Semitic peoples, cp Now. *HA* 1 135 *f.* (E. of Jordan, Petra), and Landberg, *L'Arabie Méridionale*, 1 159 (S. Arabia).

[2] See KIBROTH-HATTAAVAH, NEGEB, § 6.

[3] *E.g.*, by Fr. Delitzsch (*Prol.* 105), Sayce (*TSBA* i. 2 305).

[4] Nöldeke compares Syr. *yahla*, 'troop, tribe.' From the S. Semitic comes also the cognate Nab. אל, found in two inscriptions from Ḥaurān (*CIS* 2 164 *f.*).

[5] Not to be corrected into שנאי שלמי, 'haters of the Salmu (*i.e.*, Salamæans)' as the emendation in Cant. 1 5 (see We. *Prol.* (3) 218, n. 1) might suggest.

[6] Cp Wi. 'Muṣri,' etc. *MVG*, 1898, 1 48 *ff.*, and see ZERAH.

[7] Cp, perhaps, the gloss in Hesychius: βαίτη = tent of skin.

by RV in 2 K. 23 7 (but see DRESS, § 8, col. 1140). Conversely, *ōhel* seems to refer to the palaces of Israel's neighbours in Ps. 84 10 (11)[1] Job 21 28.

On the use of *ōhel* in Sabæan and Phœnician proper names, see AHOLIBAMAH, OHOLAH, OHOLIBAH.

2. Tent-life in Israel. Originally the Hebrews, like the Arabs,[2] were essentially a tent-living people, and in one of their legendary genealogies they enumerate among their ancestors Jabal, the father of tent-dwellers and herdsmen, thus recognising their nomadic origin (Gen. 4 20, cp Heb. 11 9, and see CAINITES, CATTLE, § 1). The tent-dweller, if he follows an honest calling, is essentially a herdsman, and it is not until he has become at least an agriculturist—the two types are represented in Abel and Cain respectively—that he will begin to think of replacing the tent by a shelter of a more substantial character.[3]

The Canaanites among whom the Hebrews settled were house-dwellers (cp Nu. 13 19 28 Dt. 1 28 3 5, and see CITY, § 1), and that the immigrants in time followed their example, is only to be expected, and is presupposed in the (later) law Dt. 22 8 (cp HOUSE, § 1). Still, it is noteworthy that outside help was desirable, if not actually necessary, and for the building of his temple Solomon was obliged to invoke the aid of the more expert Phœnicians (see HIRAM, 1), just as Arabian tradition relates that for the erection of the Ka'ba Coptic, Persian, or Roman workmen were called in (Fraenkel, *op. cit.* 4).

In this connection it is interesting to note that the Arabic word for 'roof' (*ājurr*) is of Aramaic, and ultimately, perhaps, of Assyrian origin (Fraenkel, 5, Muss-Arnolt, *Ass. Dict.* 16*a*), and that the Hebrew synonym *gāg* is of unknown etymology, and does not appear to be Semitic. Similarly, the derivation of the Heb. *'īr*, *ḳīr*, *déleth*, *bāṣar* (in *mibṣār*, etc.), and *ḥēl*, all of which presuppose town-life, are quite obscure.

Long after the settlement, the Hebrews retained in their language traces of their earlier mode of living. Wealth and cattle (מקנה) are identical terms.[4] *Nāsa'* (נסע), 'to journey,' comes from the idea of pulling up the tent-pegs before journeying. Removal is compared to the carrying away of the shepherd's tent (cp Is. 38 12); desolation is as the breaking of the tent-cords, and as the fall of the tent, when there is none to set up or spread the curtains (Job 4 21 RV, Jer. 10 20). A tent firmly staked with stout cords s a figure of security (Is. 33 20), and a tent-peg, like our 'pegging out a claim,' is synonymous with the right of possession (Ezra 9 8). 'To your tents, O Israel' remains the formula of dismissal, and even in the time of Amaziah, Judah is deemed to dwell among tents (2 K. 14 12).

In spite of this, however, it is important to remember that there were certain clans in Israel which apparently continued to remain semi-nomads (*e.g.*, Kenites and doubtless other clans living S. of the Negeb, and to the E. of the Jordan). Again, although modern analogy supports the inference that the agriculturists were almost wholly house-dwellers (however mean their abode may have been; see HOUSE), yet to a certain extent these still retained the earlier custom of dwelling in tents, whether it was during the ingathering of the vintage (see TABERNACLES, FEAST OF) or for comfort during the summer, or from religious principle (see RECHABITES).[1] See below, § 4.

On the ease with which the people will pass from house to tent-life see Per.-Chip. *Art in Chald.* 1 199. To understand this we must realise the deeply-rooted preference which all Bedouins have for their tent.[2] It is still the practice to the E. of the Jordan for the population of such towns even as es-Salt, and Kerak, to pitch their tents in the country during the summer. The same holds good of the peasantry of S. Palestine, and was no doubt usual in ancient times (Thomson, *Land and Book*, 296). Another practice, Schumacher remarks, is for the fellāḥīn of the Jaulān to build a hut of branches or reeds[3] upon the roofs of their houses (*Jaulān*, 43). Cp also BED, § 1; HOUSE, § 3; HUT.

As an instance of the modification of the tent by a more settled folk, the usage of the Turcomans, NW. of Aleppo, is of interest. According to Burckhardt (*Travels in Syria*, 636; London, 1822), the dwellings consist of oblong walls of about 4 ft. in height. These are made of loose stones, and the whole is covered over with a black cloth of goat's hair, elevated by twelve or more posts, about 8 ft. high, in the middle of the enclosure. A stone partition near the entrance bars off the women's apartment from that of the men. Many of the people, however, live in large huts 15 ft. high, which look like tents but have roofs of rushes. As a further adaptation may be noticed the *jourt* or tent of the Kirghiz in Central Asia, 'consisting of a wooden frame for sides, radiating ribs for roof, and a wooden door. . . . Over this framework a heavy covering of felt is thrown, which is either weighed down with stones or, when necessary, stitched together.'[4] From this it is possible to gain some idea of the construction of the Israelite tabernacle as it existed in the mind of the priestly writers. See further TABERNACLE, § 10.

3. Description. The well-known retention of ancient customs in the East being admitted, our conception of the tent of the Hebrews must be based upon our knowledge of its construction among the Bedouins of the present day,[5] supplemented by the unfortunately small number of representations of tents upon the Assyrian sculptures, and illustrated by the scanty details in the OT. The sculptures furnish us with illustrations of the royal pavilion which accompanied Sennacherib at the siege of Lachish,[6] and from

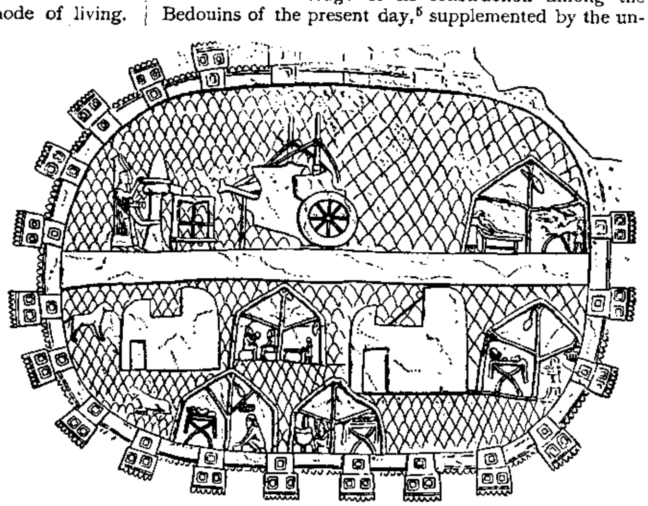

FIG. 1.—Sennacherib's camp at Lachish. Brit. Mus. Assyrian Saloon.

1 [Che. *Ps.*(2) contends that in a number of passages (Ps. 15 1 19 5 27 5 *f.* 61 5 69 26 78 60 84 11) אהל is miswritten for היכל.]

2 Cp Gen. 37 25 Judg. 8 11 (where Tg. actually has ערבאי for שכוני באהלים) Ps. 83 6 (7) 1 Ch. 5 10. As an examination of the terms appears to show, the Arabs learned the art of building from the Aramæans (Fraenkel, *Aram. Fremdw.* 1 *ff.*). The older civilisation of the Minæans and Sabæans of the S. of Arabia does not come under consideration here.

3 On the gradual settling of the Hebrews, cp Buhl, *Die socialen Verhältnisse d. Israeliten*, 13 *ff.* (Berlin, 1899).

4 Cp also perhaps, Syr. *marhāṭē*, and see CATTLE, § 8 (end).

1 Cp Bu. 'The Nomadic Ideal in the OT' (*New World*, 1895).

2 Cp v. Oppenheim, *Mittelmeer z. Pers. Golf*, 2 50.

3 Called *'arīshi*; cp below, col. 4973, n. 2.

4 *Ency. Brit.*(9) 'Tent,' 23 183*a*. The tent of Shiloh, according to Rabbinical writers, was also supposed to be a walled enclosure, covered over with curtains.

5 Among the descriptions of the various travellers in the East, Burckhardt, and more especially Doughty, have been drawn upon most frequently in this section.

6 Cp also the pavilion portrayed upon the bronze gate of Balawāt (expedition against Carchemish). For other royal tents, cp Per.-Chip. *Art in Chald.* 1 175 193.

the same source there is preserved, fortunately, a plan of the Assyrian camp, in which are depicted both the royal pavilion and tents of a less luxurious description (fig. 1). In addition to this, upon the sculptures representing Ašur-bāni-pal's expedition against the Arabians (*KB* 2 217 *l.* 122), there are interesting portrayals of the tents of the enemy (fig. 2). In the uppermost panel, the tent-dwellers are seen peacefully working; below, is depicted the hand-to-hand conflict with the Assyrians; and, finally, the Arabians are overpowered and killed, and the burning tents are on the point of collapse. The representation is extremely vivid. The framework of the tents appears to consist of an upright branch from the middle of which other branches

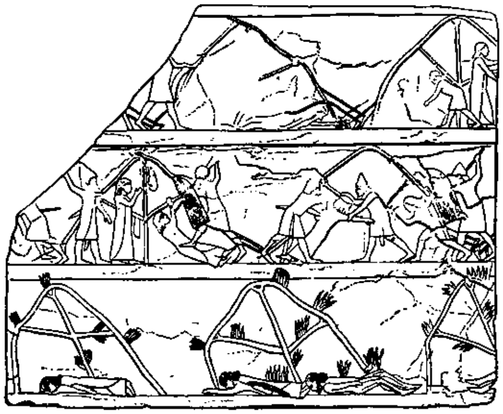

FIG. 2.—Arabian tents. Brit. Mus. Assyrian saloon.

project, and the general appearance, it will be seen, is markedly inferior to that in Sennacherib's camp.[1]

The Assyrians, like the Egyptians, were especially a house-dwelling people. But according to De Morgan (*Recherches sur les Origines de l'Égypte*, 66 *f.*, Paris, 1897; cp Budge, *Hist. of Egypt*, 1 42 56 102; London, 1902), the earlier inhabitants of Egypt lived in booths of rush and reed, and the art of brick-making (see BRICK) was introduced probably from Chaldæa. As regards the Assyrians, the theory that they, too, once dwelt in tents or booths, can at present be supported only by the fact that they were in the custom of erecting a tent upon the flat house-roof (Per.-Chip., *Art in Chald.* 1 197, cp above, § 2, end), a practice which might lead to the erection of the so-called 'upper-chamber' (found also in Egypt, *e.g.*, Wilk. *Anc. Eg.* 1 352), and of the rounded tops, domes, or sugar-loaf roofs of Mesopotamia (cp *Art in Chald.* 1 128 145 165 *ff.*). May we also point to the general lack of windows?

The nomad tent (*hejra*, Doughty, *Ar. Des.* 1 224) is made of black worsted or hair-cloth, or of sheep's wool mingled with the hair of goats and camels.[2] Tents of linen were, and still are, used only occasionally for holiday or travelling purposes, by those who do not habitually live in them (Kitto, *Bibl. Cycl.* art. 'Tent,' cp Doughty, 2 356). The Bedouins of the Jaulān according to Schumacher (*Jaulan*, 54 *f.*) do not make the plaited goat-hair tent-cloths themselves, but buy them from certain tribes and gipsies (*Nawār*), who for the most part drive a regular trade in this.[3] The skeleton consists of a number of tent-poles (*'amdān, 'awāmīd*),[4] varying in number from three to nine according to the size of the tent, which are kept in position by cords (*yéther, mēthār* [cp CORD], mod. *ṭunub* or *ḥabl* [Eg.]) attached to stakes or pegs (*yāthēd*, mod. *wated*).[5]

[1] Cp also Layard, *Nineveh and its Remains*, 2 271 (London, 1849), and Per.-Chip. *Art in Chald.* 1 330.

[2] Hence the mod. name *bait ša'r, b. wabar;* for the material, cp also Ex. 25 26 36 14, TABERNACLE, § 4 *f.*, SACKCLOTH, § 1 n.

[3] Tent-making, the trade followed by Paul, was no doubt a lucrative profession. The Pesh., however, in Acts 18 3 reads ܠܘܪ̈ܩܐ, 'saddle-makers,' (=*lorarius?*), whence it has been suggested that σκηνοποιός is an error for ἡνιοποιός. See further, CILICIA, PAUL, § 5, SACKCLOTH, and cp SHIP, § 8 n.

[4] For a collection of other mod. terms in use see Oppenheim, *Vom Mittelmeer z. Pers. Golf*, vol. 2, facing 44.

[5] The Hebrew phrase for 'to pitch a tent' (תקע את האהל, Gen. 31 25 Jer. 6 3) really contains a reference to the hammering (תקע) of the tent-peg.

TENT

Over the poles are stretched the coverings of skin or rag (*yĕrī'ōth*, cp AZUBAH), and around the sides is hung a long cloth, an open space being left at one side for light and ventilation.[1] Inside the larger tents, a hanging, commonly not more than breast or neck-high, separates the smaller and inner apartment (*ḳubbat, maḥram*) for the women (who rarely have their own tent, cp § 4 below), from the larger, and commonly open division, which is used as a reception and general living room (*maḳ'ad*).[2] When there is a triple division, and this is rare (cp Doughty, 2 285), the extra room is used for servants and cattle. The tents average 20-25 feet in length (though sometimes reaching as much as 40 feet); they are about 8-10 feet high, and usually oblong in shape; round tents are mentioned in the old Arabian poems,[3] and a few traces have been found at the present day near Teima (Doughty, 1 284 *f.*); but with these exceptions, they are used only by Turkish officials and travellers.

The Arabs usually wander in *ferjān*, or nomad hamlets, according to their kindreds,[4] accompanied perhaps by some poor unprotected followers. The collection of tents forms the *menzil;*[5] if few, they may be arranged in a circle or semicircle,[6] but usage varies, and not unfrequently a tribe may be identified at a distance by the arrangement adopted.[7] Zarebas, encampments surrounded with a stone wall, are vouched for in the desert of Pharan (Nowack, *HA* 137), but are not common.

The sheikh's tent is naturally the most important, though not necessarily, therefore, the most luxurious.[8] It is usually placed in the most prominent position, and will often face the direction from which travellers may be expected to arrive (cp Gen. 18 1 *f.*). To it repair the desert wanderers (*ḍuyūf Allah*, 'God's guests'), who find therein a sanctuary and can claim protection for two nights and a day.[9] The *raḥla* ('migration') is agreed upon the previous day by common assent or may rest with the Sheikh. Should his tent remain standing an hour past sunrise, it is known that the camp will not move that day (Doughty, 1 216). Naturally the proximity of trees and wells (cp Gen. 18 4) is sought for in selecting a fresh *menzil.*

To the women falls the duty of erecting and taking down the tents (Doughty, 1 216). It is in their apartment that the goods and chattels are stored, though these, it is true, are few in number (Doughty, 1 216 227). Some lumps of rock-salt, a few lengths of cloth and patches of leather, a box for the feminine vanities, the great brazen pot, a lamp, and a dozen minor utensils will form the average equipment (Doughty, 1 227, cp HOUSE, § 6 and references).

Nowhere do we find such conservatism of ancient

[1] This is the only door, in the proper sense of the word; see DOOR. Contrast Gen. 18 1 *f.* the *entrance* (*péthaḥ*) of the tent, and 19 7 the *door* (*déleth*) of the city-house (*báyith*; cp *v.* 8, where mention is made of the beam, *ḳōrāh*). Cp Jer. 49 31, the Arabians who have neither 'doors nor bars.'

[2] Doughty (*Ar. Des.* 1 227) well says: 'Tent is the Semitic house; their clay house is built in like manner, a public hall for the men and guests, and an inner woman's and household apartment.'

[3] The tents in the illustrations from the monuments (above) are also probably round.

[4] Cp P's conception of the camp of Israel in the wilderness (Nu. 1 52, etc.). In modern times the size of a tribe is frequently reckoned by the number of tents; for examples, see Merrill, *East of the Jordan*, 471.

[5] From Ar. *nazala*, 'to dwell,' perhaps originally 'to unload.' Cp in Syr. *mašrithā*, 'camp,' from *šĕra*, 'to loosen' (unload). See Fraenkel, *op. cit.* 3, n. 1.

[6] Cp the Ar. name *duwār*, and the Heb. *ṭīrāh;* see CAMP, § 1; CATTLE, § 1; NEGEB, § 6.

[7] Cp CAMP, § 1. Thus the tents may be arranged in the shape of a triangle, rectangle, in one long line, or in two parallel lines (Conder, *Tent Work in Palestine*, 2 275 *f.*); for square-shaped encampments, cp Robinson, *BR* 2 180 307, and for oval, *ib.* 201.

[8] Rich and elaborate tents are more characteristic of the Persians, cp Judith 10 21.

[9] Doughty, 1 228, cp WRS, *Kinship*, 41 *f.* 259, and see STRANGER AND SOJOURNER, § 5.

customs as in matters outside everyday life, and in the case of the tent this is particularly illustrated in certain religious festivals (cp above, § 2), and in marriage ceremonies.

4. Tent in marriage and religion.

It has not escaped notice that in a few cases in the OT the tent appears to be the property of the wife (*e.g.*, Jael, Judg. 4 7; Sarah, Gen. 24 26; Jacob's wives, 31 33 *f.*), and in this Robertson Smith recognised the survival of an earlier stage of society (still found in various phases among some communities) where the woman possesses her own tent, into which she receives her husband, and in which, though married, she retains perfect independence (the so-called *beena* marriage). In later ages, when marriage entails the loss of her independence, and the woman belongs to the man, the importance of the tent is retained in a variety of ways: thus, notably, the Arab still erects a special hut or tent for his wife on the first night of marriage, although it is otherwise unusual for the woman to possess a separate dwelling (*Kinship*, 167).

The erection of this tent for the consummation of the marriage illustrates 2 S. 16 22 (*the*, not *a*, tent as in AV); such a bridal chamber may well have been called *ḥuppāh*, חֻפָּה (cp Joel 2 16 [where the ∥ *ḥéder* is used of a bridegroom, as also is *ḥuppāh* itself in Ps. 19 5 [6]).[1] According to Robertson Smith (*Kinship*, 168 291) the *'éreś* or bridal bed (Cant. 1 16) was also primarily a booth; cp Ar. *'irrīs*, 'thicket,' *'arrasa*, 'to make a booth' (esp. with a view to marriage), *'arūs*, 'bridegroom,' and *'irs*, 'wife,'[2] but this is doubted by Budde, *Fünf Megillot*, on Cant. *l.c.*

Allusion has already been made to the circular and tent-like shape of the earliest temples in the classical world (§ 1), and although there do not appear to be actual records of the use of tents as temples, at least Orestes had his sacred booths (Paus. ii. 31 6), and temporary booths were not unfrequently erected in sacred precincts (Frazer, *Paus.* 2 165 *f.* 204). These usages remind us both of the tents and booths erected by the Israelites on special religious festivals (Hos. 12 9, see TABERNACLES, FEAST OF), and of the temporary tents in which dwelt the female-mourners over Ḥosein.[3] Portable tents were also used as shrines on military campaigns (WRS, *Rel. Sem.*(2) 37, cp Schwally, *Semit. Kriegsalterth.* 1 13), and the use of tents as sanctuaries[4] was familiar to the Israelites long after the settlement in Canaan. See further, TABERNACLE, esp. § 12.

TENTH DEAL (עִשָּׂרוֹן), Ex. 29 40 AV, RV 'tenth part [of an ephah].' See WEIGHTS AND MEASURES, § 3 (*s.v.* 'omer').

TEPHON (τεφων [A]), 1 Macc. 9 50 RV, AV TAPHON (*q.v.*).

TERAH (תֶּרַח, θαρα [BADEL]; AD sometimes θαρρα; *Thare*), the father of Abraham (Gen. 11 24 *ff.* Josh. 24 2 1 Ch. 1 26 Lk. 3 34). Tradition described him variously as the son, and as the brother, of Nahor. P represents him as migrating from 'Ur Kaśdim' (see UR OF THE CHALDEES) to 'Ḥaran' (Gen. 11 31). To understand 'Terah,' we must, first of all, have a definite view as to the meaning of 'Abraham' and 'Ḥaran.'

(1) There is some probability in Winckler's theory (*GI* 2 24 n. 1) that תרח is an intentional distortion of יָרֵחַ (*yeraḥ*)=Ass. arḫu, originally 'the beginning of a moon.' Ur Kaśdim, whence Terah came, was (as is commonly held) the S. Babylonian city of Uru, which was the seat of the moon-cultus. Ḥarran (=Ḥaran, where Terah died) was the other great centre of the same cultus (see HARAN). This must be taken in connection with the theory of Winckler and Stucken as to the mythological character of Abraham and Sarah (cp SARAH). (2) Another view, however, may deserve to be mentioned. There is strong reason to think that Abraham is the hero of the Jeraḥmeelites, as Israel (cp Sarah) is the hero of the Israelites, and that his original seat (*i.e.*, that of the Jeraḥmeelites) was, traditionally, in the southern Ḥarān. Terah's close connection with Ḥaran and Naḥor (=Ḥaran?), suggests that he is a double of Abraham, and that his name is a corrupted fragment of Jeraḥmeel. Possibly for 'corrupted' we should rather say 'altered.' P, or his authority, may, as Winckler (see above) remarks, have had a repugnance to a name which suggested moon-worship. (3) Jensen's comparison of N. Syrian (Hittite) proper names, like Tarḫular (*ZA* 6 70; *Hittiter*, 153), leads to the meagre result that Terah may have been a divine name.

T. K. C.

TERAH (תֶּרַח), Nu. 33 27 *f.* RV, AV TARAH (*q.v.*).

TERAPHIM (תְּרָפִים, 𝔊 in Gen. ειδωλα, Hist. Books θεραφ[ε]ιν, θαρ., θεραπειν, -φειμ [exc. 1 S. 15 23 θεραπειαν (B) 19 13 16 κενοτάφια or καιν.], Hos. 3 4 δῆλοι [see below, n. 2], Ezek. 21 21 [26] γλυπτά, Zech. 10 2 ἀποφθεγγόμενοι; Aq. μορφώματα, προτομαί Sym. εἴδωλα, ἐπίλυσις, θεραφειν, Theod. θεραφ[ε]ιν, ἐπιλυόμενος); AV (following Vg.) sometimes transcribes, sometimes translates 'image,' 'idols,' idolatry'; RV more consistently adopts 'teraphim' throughout.

The name appears to designate a particular kind of idol (cp Gen. 31 19 with *v.* 30, 'my god'; also 35 2 4). Of the form of these images we learn nothing from the scanty notices in the OT; we cannot certainly infer from the fact that Laban's was concealed under a camel saddle that it was small, nor from the use which Michal makes of David's (1 S. 19 13 16) that it was of the size or shape of a man. Laban's teraphim (his god) was stolen by Rachel (Gen. 31), but with other foreign gods and heathenish amulets, was put away by Jacob before he went to worship Yahwè at Bethel (35 2-4); the meaning of the story (in E) plainly is that the teraphim were relics of Aramæan paganism which Israel cast off to serve Yahwè alone (cp Josh. 24 15); see also 1 S. 15 23, where in a prophetic passage (E, Budde) teraphim[1] is coupled with divination as a type of sin most hateful to God, and 2 K. 23 24 (R_D). Micah had an ephod and teraphim in his shrine, which were carried off by the Danites to their new settlement at the sources of the Jordan and placed in their sanctuary (Judg. 17 5 18). The teraphim in David's house (1 S. 19 13 16) is spoken of as if it was a thing which would be found in every household. In the eighth century Hosea joins the ephod and teraphim[2] with sacrifices and maṣṣēbahs as essential to the religious observances of his people; in their absence religion would cease (Hos. 3 4).

Like the ephod, with which they are associated (in Judg. and Hos.), the teraphim were employed or consulted in divination (2 K. 23 24 Ezek. 21 21 [26] Zech. 10 2). Ezekiel, in the passage cited, represents the Babylonian king as divining by shaking arrows (belomancy; see URIM AND THUMMIM), inquiring of the teraphim, examining the entrails of a sacrifice (*extispicium*); cp also 1 S. 15 23, where divination (קסם, *sortilegium*) is connected in a similar way with the teraphim. It is not clear, however, that the teraphim were consulted by the lot; Ezekiel seems to distinguish the two. Spencer's theory that the teraphim were small images (figurines), perhaps of human form, the heathen counterpart of the Urim, has no substantial foundation.[3] Other scholars have inferred from Gen. 31 19 30-35 Judg. 17 5 *ff.* 1 S. 19 13 16, that the teraphim were household gods (penates, a Lapide; Seb. Schmid, Vitringa, Ew., Eerdmans, etc.); more specifically, images of the ancestors, so that the consultation of the teraphim was a kind of manes oracle (E. Meier, Stade, Schwally, etc.). The latter hypothesis rests upon questionable anthropological or etymological

[1] Another word is *ḳubbah* (Nu. 25 8, see PAVILION, 2) with which cp the Ar. term *ḳubba* (§ 3, above). BDB prefer '(Zimri's) princely tent,' but the older view is better (see Ges. *Thes.*, Di.), and is supported by the vulgar colloquial usage of the word in both MH and Ar. (cp Freytag). Note that the derivative 'alcove' itself, was used in Spanish to denote especially the recess in a chamber for the bed.

[2] Add, too, the *'arīshi* (col. 4970, n. 3 above). The stem is to be kept distinct from Ass. *erišu*, 'bridegroom,' which corresponds to Hebr. *ērēś* (ארש), 'to espouse,' lit. 'pay the price.' The original meaning of עֶרֶשׂ is uncertain.

[3] As Eerdmans has shown, the rite has traces of the Tammuz-cult (*ZA* 9 303); cp also v. Kremer, *Stud. z. vergleich. Culturgesch.* 1 59 (Vienna, 1890).

[4] The *Ka'ba* appears to have been evolved from a tent (Wellh. *Heid.*(2) 73).

[1] Read עֲוֹן תְּרָפִים.

[2] It is to be observed that 𝔊 has δῆλοι, elsewhere used to render אורים.

[3] See URIM AND THUMMIM.

assumptions; other passages are hardly compatible with the theory that the teraphim were solely domestic idols (see Hos. 3 4 Ezek. 21 21 [26] Zech. 10 2 2 K. 23 24).

The etymology and meaning of the word are unknown; for various conjectures see Ges. *Thes.* 1519 *f.*, Moore, *Judges*, 381 *f.* cp also I. Löw, in *WZKM* 10 136; those who think that the teraphim were images of the ancestors connect the name with רפאים (Neubauer, Sayce, Klo., Schwally). The opinions of Jewish writers about the nature of the teraphim may be found by the curious in Buxtorf, *Lex. Talm.* 2660 *ff.*; Beyer, *Additamenta* to Selden, synt. ii. chap. 1. The most remarkable is that the teraphim was a mummied human head (Jer. Targ. Gen. 31 19, etc.); with which cp the stories of this kind of divination among the Harranians, Chwolsohn, *Ssabier*, 2 19 *ff.* 388 *f.* 150 *ff.*

TEREBINTH. The four forms אֵלָה, *ēlāh*, אַלָּה, *allāh*, אֵלוֹן, *ēlōn*, and אַלּוֹן, *allōn*, are evidently closely connected in origin. אֵילִים, *ēlim*, or אֵלִים, *ēlīm*, is best regarded as plur. of אֵלָה, *ēlāh*, or perhaps of the masculine form אַיִל (occurring only in the proper name (אֵיל פָּארָן) from which אֵלָה is the *nomen unitatis.* *Ēlāh* and *ēlōn* are usually taken together as = 'terebinth,' *allāh* and *allōn* as = 'oak'; though Celsius (*Hierob.* 1 34 *ff.*) joins *allāh* as 'terebinth' to *ēlāh* and *ēlōn*. The connection of these words—at least of אֵלָה, אֵילִים—with the divine name אֵל, suggested by Wellhausen (*Prol.* ET, 238) and Stade (*GI* 1 455), is too vague to help towards identifying the tree intended (cp WRS, *Rel. Sem.*(2) 192 *f.*); the difficulty is increased by our uncertainty as to the original meaning of the root אול—according to others אלה—with which the words appear to be connected. (See the literature cited in Gesenius(13) under אֵל, and cp NAMES, § 116.) On the other hand, the fact that Aram. *īlānā*, which is in form exactly equivalent to *ēlōn*, means 'a tree' in general, may suggest that the special sense which these words have acquired in Hebrew is derived from a more general one—viz. that of trees *par excellence*—the large and strong trees characteristic of the region. This view is supported by the fact that the place Elim was apparently so called from its *palm* trees (see ELIM), and the possible or (Moore) probable identity (but see DINAH) of the תֹּמֶר־דְּבוֹרָה in Judg. 4 5 with the אַלּוֹן בָּכוּת of Gen. 35 8. Twice, however (Is. 6 13 Hos. 4 13), *ēlāh* and *allōn* are mentioned in the same verse as distinct trees. And as a considerable body of tradition has identified *ēlāh* with the terebinth (Celsius, *l.c.*), and there is repeated mention of the *allōnim* of Bashan (Is. 2 13 Ezek. 27 6 Zech. 11 2), a district famous for its oaks, it is reasonable to conclude that *ēlāh* and *allōn* came to be used for these trees respectively. It is doubtful whether the distinction in pointing between *ēlāh* and *allāh* and between *ēlōn* and *allōn* is more than an artificial creation of later times.[1] The occurrence in 𝔊 of ηλα (1 S. 21 10 [9]) and ηλων (Judg. 9 37 [B]) may help to show which of the forms were original.

1. Hebrew terms.

The special associations of large trees like the oak and the terebinth with the religion of the Hebrews, as with those of other Semitic peoples, have been discussed by Baudissin (*Studien*, 2 184 *ff.*), Robertson Smith (*Rel. Sem.*(2) 185 *ff.*), Stade (*GI* 1 455 *ff.*), and others. Such names as *ēlōn mōreh* (אֵלוֹן מוֹרֶה), 'oak of the teacher' (Gen. 12 6 Dt. 11 30), and *ēlōn mĕʿōnĕnīm* (אֵלוֹן מְעוֹנְנִים), 'diviners' oak' (Judg. 9 37), point to their having been early seats of prophetic oracles. The custom of burial beneath the tree (Gen. 35 8 1 Ch. 10 12) is again an evidence of sacred association. On the appearance of the angel to Gideon beneath the אֵלָה in Ophrah, see Wellh. *Prol.*, ET, 238. By the prophets the association of worship with sacred trees was condemned as a departure from the spiritual ideal of Israel's religion, and also on account of the degrading practices connected with it (Hos. 4 13 Ezek. 6 13 etc.).

2. Religious associations.

[1] G. F. Moore goes farther, 'There is no real foundation for the discrimination; the words signify in Aramaic "tree" simply; in Hebrew usually, if not exclusively, "holy tree"' (note on Judg. 4 11). If so, however, the correctness of the text in Is. 6 13 Hos. 4 13 will have to be disputed.

We proceed to notice briefly the occurrence of the various words.

1. אֵלָה, *ēlāh* (Gen. 35 4 Judg. 6 11 19 1 S. 17 2 [𝔊BA om.] 19 [𝔊B om.] 21 9 [10] 2 S. 18 9 *f.* [𝔊L δένδρον and in *v.* 14] 14 1 K. 13 14 1 Ch. 10 12 Is. 1 30 6 13 Ezek. 6 13 [𝔊B om.] Hos. 4 13 [𝔊 δένδρου συσκιάζοντος] †; τερέμ(β)ινθος in Ecclus. 24 16; the proper name אֵילַת, Elath, Dt. 2 8 etc. is possibly the same word) is in AV rendered 'oak' (RVmg. 'terebinth') except in the two places where אַלּוֹן, *allōn*, is also present; in Is. 6 13 AV has 'teil tree,' and Hos. 4 13 'elms,' while RV has 'terebinth' and 'terebinths' in these verses. 𝔊 renders six times by δρῦς and thrice by τερέμ(β)ινθος; besides these, twice in Judges 𝔊AL has δρῦς and 𝔊B τερέμ(β)ινθος.[1]

3. References.

As has been shown at length by Celsius (*l.c.*) the meaning 'terebinth' will suit all the passages where *ēlāh* occurs. *Pistacia Terebinthus*, L., which in some countries is only a shrub, attains in Syria the proportions of 'a noble umbrageous tree,' 20 to 40 ft. or more in height (Fl. and Hanb.(2) 165). It may thus constitute a landmark. Robinson (*BR* 3 15) describes one he saw on the way from Hebron to Ramleh—such a tree as we can imagine to have given the valley of Elah its name. 'Here, in the broad valley, at the intersection of the roads, stands an immense Butm tree . . . the largest we saw anywhere in Palestine, spreading its boughs far and wide like a noble oak. . . . The Butm is not an evergreen . . . its small feathered lancet-shaped leaves fall in the autumn and are renewed in the spring. The flowers are small and followed by small oval berries, hanging in clusters from 2 to 5 in. long, resembling much the clusters of the vine when the grapes are just set.' The abundant branching and foliage of the terebinth agree with the references in 2 S. 18 9 *f.* 14 Ecclus. 24 16; the fact that it is nevertheless not an evergreen explains the simile in Is. 1 30.

2. אַלָּה, *allāh* (τερέμ[β]ινθος, Josh. 24 26†), can be only a slightly divergent form of אֵלָה, *ēlāh*. The tree intended in Josh. (*l.c.*) may be the same as that mentioned Gen. 35 4 Judg. 9 6 (βάλανος), where for AV, 'plain,' read 'oak' or 'terebinth.'

3. אֵילִים, *ēlim*, or אֵלִים, *ēlīm*, the plur. of אֵלָה or אַיִל (see above) occurs Is. 1 29 57 5 61 3 and possibly Ezek. 31 14†. In the first two places 𝔊 has wrongly εἴδωλα, which is followed by AV 'idols' in the second. In the first passage 'it is the disappointingness of nature-worship which is indicated' (Cheyne); the same species of idolatry is referred to in 57 5. In Is. 61 3 (where 𝔊 interprets loosely γενεαί) we have a spiritual metaphor drawn from the noble stature and luxuriant foliage of these trees; cp 60 21 and other passages. The word אֵלֵיהֶם constitutes a difficulty in Ezek. 31 14; its rendering πρὸς αὐτά formed no part of the original 𝔊, according to some cursives (Field, *ad loc.*), and the verse reads more smoothly if, with Cornill, we omit the word. [See *Crit. Bib.*]

4. אֵלוֹן, *ēlōn* (in 𝔊 usually δρῦς, Gen. 12 6 13 18 14 13 18 1 Dt. 11 30 Josh. 19 33 [cp 𝔊] Judg. 4 11 9 6 37 1 S. 10 3†, wrongly 'plain' in AV), and (5) אַלּוֹן, *allōn* (usually δρῦς or βάλανος, Gen. 35 8 Is. 2 13 [δένδρον βαλάνου] 6 13 44 14 [om. 𝔊] Ezek. 27 6 [ἐλατίνους?] Hos. 4 13 Am. 2 9 Zech. 11 2†).

Ēlōn and *allōn* are slightly varying forms of the same word, which had come to denote a particular large tree distinct from אֵלָה, *ēlāh*, most probably the oak. According to Tristram[2] (*NHB* 368 *ff.*) there are three species of *Quercus* which flourish in Palestine, the most abundant being the evergreen *Q. pseudo-coccifera*; the others are both deciduous species, *Q. Ægilops* and *Q. infectoria*. The first he describes as in appearance much like our 'holm oak,' and he speaks of one very large tree of this species, the so-called 'Abraham's oak' near Hebron. The oak of Bashan he believes (following Hooker) to be *Q. Ægilops*. Cp Anderlind in *ZDPV* 13 220 *ff.* On the oaks of Sharon, see SHARON.

N. M.—W. T. T.-D.

TERESH (תֶּרֶשׁ), a chamberlain of king Ahasuerus (Esth. 2 21 6 2 om. BAL$^{a\beta}$, θαρ[ρ]ας [ℵc.a mg.]), called in

[1] For Ps. 29 9 and Gen. 49 21 where 𝔊 compares Naphtali to a στέλεχος ἀνειμένον (*i.e.*, אֵילָה שְׁלֻחָה, Di., etc.), see HIND, NAPHTALI.

[2] His statements are based upon the important paper by Sir J. D. Hooker in *Trans. Linn. Soc.* 23 381-387.

Esth. 12 1, THARRA (θαρα [ℵ*vid.], θεδευτου [L^a]). If the name must be Persian, we have a choice between *turš*, 'dark, fierce' (Ges. *Lex.*(11)), and *taršatâ*, 'feared,' the supposed original of Tirshatha (cp Marq. *Fund.* 70); Oppert (*Annales de philos. chrétienne*, janv. 1864), however, compares Tiri-dates, the name of the governor of Persepolis (temp. Alexander). But if underneath the present Esther-story there is an earlier story, the scene of which was not in Persia, but in the land of Jerahmeel (N. Arabia), the only one of the above suggestions which will serve us is the second, and the question is, What is the origin of TIRSHATHA? But cp also ZETHAR.
T. K. C.

TERTIUS (τερτιος), in the present text of the Epistle to the Romans (16 22), figures in the first person as having 'written' the epistle (ἐγὼ Τέρτιος ὁ γράψας τὴν ἐπιστολήν). As long as the authenticity of the epistle is maintained it is impossible to suggest a reason why Paul's amanuensis, while delivering the author's greetings in the usual manner in *vv.* 21 23, should thus abruptly have taken an independent course in *v.* 22. True, 1 Cor. 16 21 Col. 4 18 2 Thess. 3 17 compared with Gal. 6 11 can be urged for the opinion that Paul dictated his epistles; but so far as Rom. 16 22 is concerned this does not lead to any further conclusion than that an amanuensis had to be mentioned somewhere in the pseud-epigraphon. In point of fact the appearance of Tertius at this place belongs only to almost the final form of the work. See ROMANS, § 4, 7, par. 3.
W. C. v. M.

Various conjectures have been made regarding Tertius (*v.l.* Terentius) on the assumption of the authenticity of the epistle. A favourite suggestion is that he may have been one of those Jews whom Claudius had expelled from Rome. Under JUSTUS, 2, it has been suggested that he really is the Titius, or Titus, Justus of Acts 18 7. Ryder (*JBL* xvii. 98 197) thinks of him as an influential Roman Christian, and argues that Rom. 15-16 23 is a letter or part of a letter from him to his friends at Rome. It can hardly be disputed, however, that the argument for the separation of chaps. 15-16 from the rest of the traditional epistle is stronger than that for their ascription to Tertius. Cp SIMON ([7] the Cyrenian). In the lists of the 'seventy' disciples by the Pseudo-Dorotheus and Pseudo-Hippolytus Tertius appears as bishop (according to Dorotheus the second bishop) of Iconium.

TERTULLUS (τερτυλλος [Ti. WH]), the rhētōr or orator who appeared for the prosecution against Paul before Felix (Acts 24 1 *f.*).

TESTAMENT (διαθηκη), Mt. 26 28 etc. See COVENANT, § 7; also GALATIA, § 21.

TESTIMONY (עֵדוּת), Ex. 16 34. See ARK, § 3. Cp also WITNESS. On 2 K. 11 12 see BRACELETS, 5.

TETA (αθητα [A]), 1 Esd. 5 28 AV) = Ezra 2 42, HATITA (*q.v.*).

TETRARCH (τετραρχης), the ruler of a tetrarchy (τετραρχια), that is, in the original sense of the word, of one quarter of a region. The title of tetrarch is familiar from the NT as borne by certain princes of the petty dynasties, which the Romans allowed to exercise a dependent sovereignty within the province of Syria. In this application it has lost its original precise sense, and means only the ruler of part of a divided kingdom, or of a region too narrow to support a higher title. After the death of Herod the Great (4 B.C.) his realm was shared among his three sons: the chief part, including Judæa, Samaria, and Idumæa, fell to Archelaus (Mt. 2 22), with the title of ethnarch (see ETHNARCH); Philip received the NE. of the realm, and was called tetrarch; and Galilee was given to Herod Antipas, who bore the same title (Lk. 3 1). These three sovereignties were reunited under Herod Agrippa from 41 to 44 A.D. On the tetrarchy of Lysanias mentioned in Lk. 3 1 see ABILENE, LYSANIAS.

TETTER (בֹּהַק, *bohak*; αλφος), a harmless eruption of the skin (Lev. 13 39†, AV 'freckled spot').

'In Syria, at the present day, this disease is known by the same name, *bâhaq*, and it is recognised as not dangerous. It takes the form of dull white or reddish spots on the skin, of unequal size, and hardly rising above the surface of the skin. The spots have no bright surface, and in time disappear of themselves.' *SBOT*, *Lev.* Eng., *ad loc.*

INTRODUCTION

The exact determination of the original text of the Old and New Testaments is a study which has points of contact with questions concerning both the Canon of Scripture, and the literary sources of the several books. There are instances of a translation acquiring a scriptural authority which has never been accorded to the original, as in the case of ECCLESIASTICUS (*q.v.*); other books have been the product of successive compilations and revisions, so that it may become a matter of doubt at what stage of its existence it can be said to have been in its 'original' form. Generally, however, the limits of the subject can be marked out by the actual state of extant documents. Thus the criticism of the 'Priestly Code' (P), or of the book usually called JE, as they may have existed before the compilation of the Pentateuch, lies quite beyond textual criticism. Our documents do not carry us back behind the Pentateuch already complete as a single work. On the other hand, the extant texts of the Greek translation of Jeremiah suggest very serious questions as to the collection and editing of his prophecies and as to the authority for the arrangement found in the Hebrew and adopted in the English Bible.

1. General limits.

The case stands much the same with the NT. We can learn from the variations of our MSS little that directly bears on the apostolic origin of the Fourth Gospel or the Pastoral Epistles. Even the earliest versions do not take us behind the collection of the four evangelical narratives which together made up the Gospel, or the collection of the thirteen Pauline Epistles. Of the literary fate of the Apostle's letters, of the journeys which they may have made from Corinth to Rome, or from Thessalonica to Philippi, before incorporation into the collected edition, our MSS tell us nothing. There is some evidence that there circulated in the West an edition of the Epistle 'to the Romans,' in which the name of Rome was absent from the opening salutation, and there is strong evidence that elsewhere than in the West the name of Ephesus was absent from the Epistle 'to the Ephesians'; but on this one circumstance it is difficult to build. The only real point where textual study touches the 'Higher Criticism'—though it must be confessed that it is an important one—arises when we consider what inferences are to be drawn from the incomplete condition in which the Gospel according to Mk. appears in the best texts. By whomsoever Mk. 16 9-20 was supplied, and at whatever time it was first attached to the Gospel, the fact remains that the genuine text breaks off in the middle of a sentence with all the marks of accidental mutilation. The natural inference, the only inference which would be drawn from a similar state of things in any classical or ecclesiastical writing in which such phenomena were observed, is that all our MSS are ultimately derived from a single copy itself imperfect at the end.[1]

But this forms an exception to the class of problems raised, and the subject of this article may with little loss of accuracy be defined to be the history of the text of the books of the Old and New Testaments from the time each became canonical, whether in the Jewish or the Christian church.

The methods of scientific criticism are of course equally applicable to the whole of the Bible. Indeed, in certain branches of textual study the division observed in this article between OT and NT has no significance.

The Old Latin, for instance, and the Egyptian versions are translations of the Greek Bible as a whole; in such cases the only true divisions are those produced by the mechanical conditions of transcription. Those books of the Bible which were usually included in the same volume have usually the same literary history. Nevertheless, the division into NT and OT represents for the most part a real distinction. All purely Jewish documents obviously extend to the OT only. Then, again, the Peshitta and the Latin Vulgate are in the OT translations of the Hebrew, and the study of them raises a class of questions quite separate from that raised by the study of the texts of the NT with which they are bound up.

But the great distinction between the textual study of the OT and that of the NT lies in the very different part which palæographical error has played in the surviving documents. Accidental mistakes in the chief ancient texts of the NT are rare; but in the OT they are to be found continually. The inevitable result is that conjectural emendation, which is almost inadmissible in the NT, is in the OT a necessity, and one which can historically be justified.

2. Textual criticism.

A few words here on this important subject may not be out of place. Strange and confusing as the appearance of an ancient MS is to our eyes, it was nevertheless clear enough to those who wrote it, and the mistakes in copying which we make are as a rule avoided in old times. The discoveries of very ancient papyrus fragments of classical works have not overthrown but rather confirmed the better class of extant mediæval codices. As long as a work was frequently read, as long as the scribe was fairly familiar with what he was copying, mere mistakes do not seem often to have been made, and when made were frequently corrected. In rare and unfamiliar writings a perfectly different state of things obtains, and there is then no limit to the perversity of the copyist.

The NT was written by Christians for Christians; it was moreover written in Greek for Greek-speaking communities, and the style of writing (with the exception, possibly, of the Apocalypse) was that of current literary composition. There has been no real break in the continuity of the Greek-speaking church, and we find accordingly that few real blunders of writing are met with in the leading types of the extant texts. This state of things has not prevented variations; but they are not for the most part accidental. An overwhelming majority of the 'various readings' of the MSS of the NT were from the very first *intentional alterations.* The NT in very early times had no canonical authority, and alterations and additions were actually made where they seemed improvements. The substitution of ἐλεημοσύνην for δικαιοσύνην in Mt. 6 1 and the addition of the doxology to the Lord's Prayer a dozen verses later are not palæographical blunders, but deliberate editing.

The literary history of the OT has been very different. While the Canon of the OT was being formed, Hebrew was a dying language, and the political misfortunes of the Jews were of a nature far less favourable to the preservation of ancient documents than the legal persecutions of the Christians. Under Antiochus, under Titus, and finally under Hadrian, the Palestinian Jews suffered all the devastating and uprooting effects of a war for existence, and it is no wonder if, at the close of each of these epochs, the MSS which survived were few and torn, and the scholars who could read them fewer still. Hebrew had become a learned tongue, its place being mostly supplied by the various forms of Aramaic, and it was not every Jew who could read the Scriptures in the original, far less spell out correctly a damaged or faulty exemplar. These are the very conditions in which slips of copying are inevitably made and least easily detected. The veneration which the Jews felt for their Scriptures ultimately led them to copy so accurately as to preserve the most obvious blunders in the transmitted text; but this antiquarian science came too late.

Nor are we on much surer ground when we come to the only very ancient version—*viz.*, the Greek OT, commonly called the Septuagint. The fable of the seventy translators, each of whom independently agreed in their rendering, may be evidence that the Alexandrian Jews had some common tradition of the meaning of the Law; but if we except the Pentateuch, to which alone the name 'Septuagint' properly applies, the various

[1] Probably it was mutilated elsewhere. 'Boanerges' is too monstrous a form not to be a mere corruption.

TEXT AND VERSIONS

books of the Greek OT bear all the marks of having been originally the private ventures of untrained scholars. These unsatisfactory translations passed over into the keeping of the Church; but Christian scribes were unable to check corruption in a text which frequently cannot be translated to make rational sense, nor have we any gaurantee that the earliest MSS which came into Christian hands were accurate representatives of the original version. Yet from these earliest Christian MSS our copies seem to be descended.

Thus both in the Hebrew original and in the Greek translation there are serious breaks of continuity in the history of the OT, to which the history of the NT offers no parallel. The textual critic is therefore justified, in the case of the OT, in a temperate use of conjectural emendation based (1) on the scientific study of the Hebrew language and (2) on the ascertained usage of the biblical writers in passages where the text is comparatively free from suspicion.

From various causes, but chiefly from the better preservation of the documents, the textual criticism of the NT is at the present time in a more advanced state than that of the OT. Contrary, therefore, to the usual custom, the history of the text of the NT in the original and in translations will precede that of the OT in this article.

I.—NEW TESTAMENT.

A.—TEXT

The original authorities for the text of the NT may be divided into three classes—*viz.*, Greek MSS, Versions made from the Greek, and Patristic Quotations. The Greek MSS range in date from the fourth century[1] to the invention of printing, the Versions from the middle of the second century to the ninth. The original form of each version is attested by MSS, some (as in the case of the Old Latin) as early as any known Greek MS, and by the quotations of writers who used the version.

3. Original authorities.

We may point out here the inherent merit of the testimony obtained from versions and patristic quotations, and the counterbalancing difficulties attendant on their use. The most ancient versions of the NT into Latin, Syriac, and Egyptian, are older than our oldest Greek MSS; wherever, therefore, we can be sure that we have the original form of any of these versions, and wherever we are able to retranslate with certainty that original form into the Greek underlying it, we have a resultant Greek reading possessing a higher direct claim to antiquity than the reading of any single extant Greek MS. But obviously this is not always the case.

i. Until a version has been critically studied we may not assume that any single MS faithfully represents its original form, for the text of the MS may have been revised from later Greek texts. Moreover, the early translations were not always literal, nor can Greek distinctions always be represented in another language, so that retranslation in some cases is a matter of uncertainty.

ii. The testimony derived from quotations in ecclesiastical writers also requires very cautious handling. Many 'Fathers' were not in the habit of quoting accurately, and the text of their works, which in some important instances depends ultimately on a single late MS, is often open to suspicion.

Nevertheless, patristic quotations have a special value to the textual critic. They are as a rule both localised and dated. Where there is reason to believe that the quotation in a writer's work reproduces the reading of his Bible we have in effect a fragment of a MS of the writer's own age and country, which serves as a fixed point in our historical and geographical grouping of the continuous extant biblical texts.

Unfortunately patristic evidence is often lacking just where it is most wanted. The verses most instructive for tracing the literary history of the text of the Bible are rarely those of immediate doctrinal import, and again and again where crucial variations occur the testimony of early Fathers is absent. It is especially difficult to ascertain the true weight of the patristic evidence for omissions.

Most non-Greek Fathers are to be reckoned among the authorities for the version in their vernacular; but some—notably Tertullian and Jerome—seem often to make independent translations of their own direct from the Greek.

In quoting authorities, the Greek MSS written in *uncial* letters (ranging from the fourth to the ninth cent.—or later) are denoted by capital letters, those written in *minuscule* (ranging from the ninth to the sixteenth cent.) by numerals. These latter are commonly called 'cursive.' (See WRITING.) There is absolutely no distinction in critical value between a 'cursive' and an 'uncial' MS.

4. Chief MSS.

[1] Some papyrus fragments from Oxyrhynchus are still earlier, being assigned to the middle of the third century A.D.

CHIEF GREEK MSS OF NT

Designation.	Place.	Contents.
	4th Cent.	
B (*Cod. Vaticanus*)	Rome	all books except part of Hebr., Pastoral Epp., and Apoc.
ℵ (*Cod. Sinaiticus*)	S. Petersburg	all books complete.
	5th Cent.	
D (*Cod. Bezæ*)	Cambridge	Gospels and Acts.
A (*Cod. Alexandrinus*)	London	all books.
C (*Cod. Ephræmi*)	Paris	fragg. of nearly all books.
	6th or 7th Cent.	
D_2 (*Cod. Claromontanus*)	Paris	Pauline Epp.
E_2 (*Cod. Laudianus*)	Oxford	Acts.
	8th Cent.	
L (*Cod. Regius*)	Paris	Gospels.
	9th Cent.	
Δ (*Cod. Sangallensis*)	S. Gallen	Gospels } Δ and G_3 originally formed one book.
G_3 (*Cod. Bærnerianus*)	Dresden	Paul. Epp. } Δ and G_3 originally formed one book.
P_2 (*Cod. Porphyrianus*)	S. Petersburg	all bks. except Gospels.

The following fragmentary uncial MSS are important for the light they throw on the history of the text:—

Z (6th cent.)—fragments of Mt.; Ξ (8th cent.)—fragments of Lk.; six fragmentary MSS denoted by T, ranging from the 5th to the 7th cent. and containing portions of the Gospels with a Sahidic translation, which, together with some similar fragments lately published by Amélineau (*Not. et Extr.* vol. xxxiv.), give the type of Greek text current in Upper Egypt.

The most important cursives are: i. In the Gospels, those numbered 33, 157, 28, 565, 700; and the two groups 1-118-131-209 and 13-69-124-346-543. These two groups are composed of the immediate descendants of two lost uncials, each of which would have been as valuable for critical purposes as any but the very chief codices BℵDA. ii. Outside the Gospels a special mention must be made of 61 of the Acts, for the goodness of its text; also of 137, 180, and in the Epp. for the marginal readings cited as 67** (Paul) and 66** (Cath. Epp.).

Cod. 565 (*Gregory*) is also called 473 (*Scrivener, Burgon*), and 2pe (*Tischendorf*).
Cod. 700 (*Gregory*) is also called 604 (*Scrivener, Hoskier*).
,, 543 (*Gregory*) ,, 556 (*Scrivener*).

The history of the printed text of the Greek NT falls into three divisions. i. The first age opens with the *editio princeps* of Erasmus at Basel in 1516, and includes the early printed editions of Stephanus ([3], 1550), Beza, etc., and the Polyglots. During this period the ordinary form of the text, commonly called the *Textus Receptus*, was fixed, and the first collections of various readings were made. ii. The second age dates from Mill's edition of 1707. Little change was made in the printed text during this second period; but it is marked by the great collections of variants brought together by Mill, Wetstein, Matthæi, and others. The first attempts

5. Printed editions.

TEXT AND VERSIONS

towards a systematic arrangement of the material by Bentley, Bengel, and Griesbach also fall within this period. iii. The third age dates from Lachmann's edition of 1831, in which for the first time a modern editor constructed the text from ancient evidence alone, without reference to previous editions. During the last fifty years many very ancient documents have been discovered; many more have been for the first time accurately collated, or edited in full. As a natural consequence the earlier collections of various readings have been almost entirely superseded. The same may be said also of the earlier critical theories, which were based on imperfect data, especially with regard to the primitive forms of the early versions.

6. Textus Receptus.

The *Textus Receptus* derives its name from a passage in the preface to the Elzevir edition of 1633. This edition, though really little more than a bookseller's reprint, professed to give the text as received by the best authorities.[1] As a matter of fact the early editions of the NT were constructed from but few MSS, and those which were chiefly followed were late and of no special critical value. Yet from the very fact that the MSS used were commonplace, these editions give a very fair representation of the ordinary text of the middle ages.

The importance of the *Textus Receptus* is derived not from the accident that it was the text of the early editions, or of any one of them, but from the fact that it is in all essentials the text of the NT as publicly read in the Greek church ever since the fifth century. For this reason, in collating the variations of MSS the *Textus Receptus* (*e.g.*, in Scrivener's reprint of Stephanus) should still be used in preference to any modern critical text.

A complete list of the editions of the NT in Greek is given in 'Tischendorf,' vol. iii. pp. 202-287. The two editions which are practically indispensable to the student are those of Tischendorf-Gregory (1869-1894), and of Westcott and Hort (1881). 'Tischendorf' (*i.e.*, the '*editio octava critica maior*') contains by far the fullest collection of variants of every class, those of the uncial MSS being almost completely recorded. The Prolegomena by C. R. Gregory (who brought the whole edition to a conclusion after the successive deaths of Tischendorf and Ezra Abbot) occupy the third volume, and include full lists and descriptions of all the MSS, versions, and editions. The edition thus forms a complete Introduction to the study of the textual criticism of the NT.

In using it, however, we must remember:—(1) The text is the product of Tischendorf's somewhat arbitrary judgment, and has no special authority; (2) some valuable readings, now only found in minuscules, are not recorded, and must be looked for in earlier editions, such as Wetstein, or even Mill; (3) the readings of the versions, especially of the Oriental versions, are not always given accurately, and they are rarely quoted where their text, though implying a different Greek reading, is not supported by any known Greek MS.

7. Westcott and Hort's theory.

The general theory contained in Westcott and Hort's *New Testament in the Original Greek* (published in 1881, (2) 1896) has formed the starting-point for all subsequent investigation of the textual history of the NT, whether by way of defence or of criticism. It will therefore be necessary to describe the main outlines of this theory at some length.[2]

If a text of the NT were formed by taking in each variation the reading of the majority of the Greek MSS, it would be in all essentials identical with that found in the works of Chrysostom, who died in 407, after having lived all his life, except the last ten years, at or near Antioch.[3] It would also be the text of Theodoret and the other writers of the Antiochian school as well as of later Greek Fathers generally. Such a text would, moreover, be practically identical with the 'Received Text'—that is, the text as first printed by Erasmus in 1516 and repeated with little serious variation till Lachmann's edition in 1831. The text thus formed is called by Westcott and Hort *Syrian* or *Antiochian*. Hort commonly uses the term 'Syrian'; but the 'Syrian Text' of the Greek NT is so easily confused with the Syriac version (with which it has nothing to do), that the term 'Antiochian' will be used here instead.

The agreement of the Antiochian text with Chrysostom's shows it to have been in existence as early as the fourth century, whilst the fact that the MSS by which it is supported form in most cases a majority numerically overwhelming, shows that it continued to be the current text of succeeding generations. It does not agree, however, with the text as preserved in our oldest MSS ℵ and B or in the Egyptian versions, and still less would it be the text represented by the older forms of the Latin and Syriac versions. The clearest view of the nature of the Antiochian text and of the documents which support it is found in a series of readings called 'conflate' by Hort, where the later text has combined earlier rival variants.

For example:—

1. Lk. 24 53 (after 'and they were continually in the temple')—

(α) blessing God	ℵBC*L Syr.sin.-palest Boh.
(β) praising God	D *e a*(*b*)*ff l r* Aug.
(δ) praising and blessing God	A unc.rell minusc.omn *c f g* Lat.vg Syr.vg-hcl Arm.

('blessing and praising God' Æth.)

(Latin MSS are represented by *italics*. For the notation of the Versions and the weight to be given to them, see the sections upon each version.)

Of the three readings here called α, β, and δ, either α and β are independent abridgments of δ, or δ has been made out of α and β. That is, unless δ be the original reading it is not a chance alteration or expansion, but a combination of *previously existing variants*. Now although δ has the immensely preponderating numerical majority of witnesses in various regions, it is not supported by the older forms of text in any of the main classes of evidence. In Greek, δ is opposed by the three oldest MSS ℵBC, though it is supported by A, a MS of the fifth century; it is opposed by the African (*e*) and the European (*a b ff r*) forms of the Old Latin, though supported by the revised texts *f g* and Jerome's Vulgate; in the East δ is opposed by the Old Syriac (Syr.sin or Ss) and the Palestinian lectionary, though supported by the Syriac Vulgate and the Harclean; finally it is unknown in the Egyptian version.

The analysis of the evidence is fatal to the originality of δ, the Antiochian reading; it must, therefore, be later than α and β, and, if later, must be a mere combination of them.

2.[1] Mk. 8 26 (following καὶ ἀπέστειλεν αὐτὸν εἰς οἶκον αὐτοῦ λέγων).

(α) Μηδὲ εἰς τὴν κώμην εἰσέλθῃς (ℵ)BL 1*-209 Syr.sin Boh. [ℵ has μὴ for μηδὲ.]

(β) Ὕπαγε εἰς τὸν οἶκόν σου καὶ μηδενὶ εἴπῃς εἰς τὴν κώμην D (*q*).

($β_2$) Ὕπαγε εἰς τὸν οἶκόν σου καὶ ἐὰν εἰς τὴν κώμην εἰσέλθῃς μηδενὶ εἴπῃς μηδὲ ἐν τῇ κώμῃ 13-69-346 28 565 (*i*), and with the omission of μηδὲ ἐν τῇ κώμῃ *b ff f* vg [also *a* nearly].

($β_3$) Μηδενὶ εἴπῃς εἰς τὴν κώμην (or ἐν τῇ κώμῃ) *k* (*c*). Syr.hl (mg.) Arm. have α prefixed to $β_2$.

(δ) Μηδὲ εἰς τὴν κώμην εἰσέλθῃς μηδὲ εἴπῃς τινὶ ἐν τῃ κώμῃ ACΔ unc.rell minusc.omn. (exc. 8) Syr.vg-hcl (text) Æth Go.

(Notice that the Old Syriac version has now to be added in both of these examples to the little band which supports the α text adopted by Hort.)

3. Lk. 24 46.

(α) οὕτως γέγραπται παθεῖν τὸν χριστὸν ℵBC*L D Lat.afr-eur (Lat. afr *om.* οὕτως) Syr.palest Boh Æth.

(β) οὕτως ἔδει παθεῖν τὸν χριστὸν minusc[4] Syr.sin (*hiat* cur) Arm Eus. *Theoph.*

(δ) οὕτως γέγρ. καὶ οὕτως ἔδει παθ. τὸν χρ. AC²N rell. *f q* vg Syr.vg-hcl.

(Part of the verse is illegible in Syr.sin; but there is no doubt as to the reading. Note that here, as often, the Armenian follows Syr.vt.)

The distribution of documents in these conflate readings is, roughly, as follows. To α belong ℵBL and the Bohairic (or *Memphitic*) version; to β belong D and the older forms of the Latin versions. The Sahidic (*Thebaic*) version sides sometimes with α and sometimes with β, as is the case also with the Old Syriac. In a few cases where the Latins side with α, the Old Syriac forms the chief item in the attestation of the β

[1] The words of the Preface are: *Textum ergo habes, nunc ab omnibus receptum: in quo nihil immutatum aut corruptum damus.*

[2] The Introduction to this edition is from the pen of Dr. Hort (§ 21). In the following pages it will be cited as 'Hort,' with a reference to the numbered paragraphs.

[3] Hort 130.

[1] Hort 140.

text; but it never sides with δ. All other authorities (except **fragments**) have been influenced by the δ text.

The groups of authorities marked off above as α, β, and δ, are found to present distinct types of text all through the Gospels. We can thus test their witness chronologically and geographically through the quotations of the Fathers. This examination again is as adverse to the priority of δ to α or β as the analysis of the conflate readings. After the fourth century, evidence for δ is abundant; before the fourth century it is doubtful or non-existent.

A fourth family (γ), independent of β and prior to the Antiochian text (δ), is recognised in Westcott and Hort. No document contains it in a pure form; but readings characteristic of it are most frequent in ℵ, L, T, Z (Mt), Δ (Mk), Ξ (Lk), and in the Bohairic version, in fact in all the documents where α readings are found except B. This text is supposed by Hort to have originated at Alexandria and is called by him *Alexandrian*. The most constant witnesses for the text called β are the various forms of the Old Latin; it was therefore supposed by previous investigators to have arisen in the West of Europe, and is still universally known by the name of *Western*. The α text, which is neither 'Western' nor 'Alexandrian,' nor 'Antiochian,' is called by Hort *Neutral*.

These three strains—the Western, the Alexandrian, and the Neutral—are the three great divisions into which, according to Hort, the ante-Nicene text of the NT can be divided.

8. The three texts.

The 'Western' text is found everywhere, from the banks of the Euphrates to Spain and to Upper Egypt. The Alexandrian text is witnessed chiefly in Alexandria and Lower Egypt. The Neutral text is not so clearly associated with any local use; but, as is implied by the name, its subsidiary attestation is found among predominantly Alexandrian documents as opposed to Western corruptions, and among the Westerns as opposed to Alexandrian corruptions. Moreover, not all Western readings are shared by the whole of the Western array, some early Western texts in many cases supporting the Neutral reading where other Western authorities have gone wrong.

Put more concretely, the case may be stated thus: combinations of B (the typical Neutral document) with ℵ or L or the Bohairic on the one hand, or with D or the Latins or the Old Syriac on the other, approve themselves as giving the genuine reading. B is thus the central witness for the text; it is sometimes right almost alone, and to reject its readings is never quite safe. Instances are also given by Hort of 'ternary variations,' where the Western texts have a corruption in one direction and the Alexandrian in another, but B retains the genuine reading, which could not have arisen from either corruption and yet explains the origin of both.

Next in excellence to B is ℵ, which Hort believed to have a text entirely independent of B; so that the combination Bℵ, which frequently occurs even in opposition to all other authorities, is practically certain to give the true text. Almost the only exceptions are found in a series of passages found in all except Western documents, which are nevertheless considered by Hort to be no part of the genuine text of the NT. In these passages, called the 'Western Non-Interpolations,' B has gone wrong, and the true text is preserved chiefly by D and the Latins.

The reasons given by Hort for the final supremacy of the Antiochian text are mainly two, one political and the other literary.

'Antioch is the true ecclesiastical parent of Constantinople, so that it is no wonder that the traditional Constantinopolitan text, whether formally official or not, was the Antiochian text of the fourth century. It was equally natural that the text recognised at Constantinople should eventually become in practice the standard New Testament of the East' (Hort 195). 'The qualities which the authors of the Syrian [*i.e.*, Antiochian] text seem mostly to have desired to impress on it are lucidity and completeness. . . . New omissions accordingly are rare, and where they occur are usually found to contribute to apparent simplicity. New interpolations, on the other hand, are abundant, most of them being due to harmonistic or other assimilation, fortunately capricious and incomplete. Both in matter and in diction the Syrian text is conspicuously a full text. . . . The spirit of its own corrections is at once sensible and feeble. Entirely blameless on either literary or religious grounds as regards vulgarised or unworthy diction, yet showing no marks of either critical or spiritual insight, it presents the New Testament in a form smooth and attractive, but appreciably impoverished in sense and force, more fitted for cursory perusal or recitation than for repeated diligent study' (Hort 187).

The survival of good readings in some late cursives may be accounted for in two ways. Readings from the older texts may here and there have been introduced into a fundamentally Antiochian text from marginal glosses or through the eclectic preferences of scribes. But as late MSS which contain good readings present them in the less read parts of the narrative quite as much as in the more striking sayings, it is probable that these good readings are generally the result of a process of imperfect correction. A MS containing another than the dominant Antiochian text would be corrected to that text, but not as a rule with perfect accuracy. Only in those readings which do not agree with the ordinary text of the Middle Ages can we be certain that such MSS are reproducing the text of their remote ancestors. The minuscules, in short, give little additional authority to the 'received text' where they agree with it, whilst their differences from it are often of critical weight.[1]

9. General remarks: Antiochian revision.

It is still held by a few scholars that the Syriac Vulgate is a true product of the second century, and that the version known by the name of the 'Separated Gospels' (called in the above section the 'Old Syriac') is a revision of it. According to this the support given by the Syriac Vulgate to the Antiochian text transfers the evidence for that text from the fourth to the second century. But Syriac patristic evidence for the existence of the Syriac Vulgate (*i.e.*, the Peshīṭta) in its present form before 411 A.D. is non-existent; whereas the text of the 'Separated Gospels' (or 'Old Syriac') is actually attested from works of the third and early fourth centuries. (For the proof of this, see below on 'Syriac Versions' §§ 22 *ff.*)

Another objection which has often been raised is the silence of ecclesiastical writers with regard to the Antiochian revision. It has been said that if there had been prepared at Antioch early in the fourth century a revision of the text of the NT which practically came to supersede all other forms of the text, we should have expected clear references in ecclesiastical writers to so great an event. We hear something about the circumstances which gave rise to Jerome's Vulgate; should we not find similar references to the Antiochian revision if it had ever taken place?

The parallel here suggested with the history of the Latin Bible is instructive; a closer examination will show that it tells the other way. It is true that we know something about the preparation of Jerome's new translation; but this is owing to the fact that we possess the correspondence of that energetic and self-assertive personality. Of the reception of his NT we know little, except that his revision of the Gospels seems to have found favour immediately in Africa. A still closer parallel to the silent success of the Antiochian revision is afforded by the history of the Book of Daniel.

Both the Greek and the Latin branches of the church originally received the Book of Daniel in the LXX version, but afterwards discarded this for the version of Theodotion. The change occurred in the Greek-speaking church towards the end of the second century, in the Latin church (at least in Africa) about the middle of the third century. But on events connected with this serious alteration of the traditional text ecclesiastical history is silent, and we are forced to say with Jerome (*Præf. in Daniel*), 'et hoc cur acciderit nescio.'

A true picture of the general attitude of the fourth century to textual revision is, in the opinion of the present writer, given by the Latin dialogue *contra Fulgentium Donatistam*,[2] where a Catholic and a Donatist dispute together, the Catholic using the Vulgate throughout the Bible unchallenged, though the Donatist uniformly quotes from an Old Latin text.

Against these objections to the theory of the Antiochian

[1] Hort 196, and especially 334 *ff.* [2] Migne, 43 763

revision we may now set the evidence derived from the Sinai palimpsest (S_S), a MS discovered some years after the publication of Hort's work.

Hort's estimate of the Old Syriac had been necessarily derived from Cureton's MS (S_C), the surviving portions of which cover less than half the Gospel text. It seems, moreover, to represent a type of the Old Syriac which has undergone revision from the Greek (see col. 5002). Thus the discovery of Ss has practically for the first time revealed to us the true character of the great version of the Eastern world in its earliest form.

Now S_S is absolutely free from the slightest trace of Antiochian readings. Not one of the characteristic Antiochian conflations is found in it. Moreover, in certain cases where the Latins agree with the 'Neutral' text, but the Antiochian text has an additional clause, this additional clause alone is found in S_S. An instance is given above (§ 7) from Lk. 24 46; another may be found at Mk. 1 13, whilst the additions to the true text of Mk. 12 23 and 13 8 have a somewhat similar attestation. These passages do not merely prove that the Old Syriac was uninfluenced by the Antiochian text; they go far to show that a text akin to the Old Syriac was one of the elements out of which the eclectic Antiochian text was constructed. Thus the readings of B and its allies, the readings of the Old Latin and its allies, and now the readings of the Old Syriac, all contribute to explain the phenomena of the Antiochian text; but the mutual variations of B and the Old Latin and the Old Syriac cannot be explained from the Antiochian text regarded as the genuine original.[1]

In leaving the discussion of the Antiochian revision we leave the region of comparative certainty. Hort's division of the ante-Nicene text into the three strains of Western, Alexandrian, and Neutral, still more or less holds the ground; but important details of his scheme have incidentally been undermined, and the fresh evidence of S_S is here much less favourable to his presentation of the history of the text. The general tendency of criticism has been to raise the value of the texts which Hort would have grouped under the heading of 'Western.' The channel of early 'non-Western' transmission has been still further narrowed, whilst there have come to light types of early 'Western' texts purer than those which have earned them both their misleading name and their bad reputation.

10. The pre-Antiochian texts.

1. Recent research has decidedly confirmed Tischendorf's assertion that B and ℵ came from the same scriptorium.

This was admitted by Hort; but he thought that the two MSS might have been written in Rome. It now seems almost certain that they both belonged to the great library collected by Pamphilus at Cæsarea.[2] We must therefore allow for the possibility that their agreements come from a partial use of the same exemplar. This might happen in several ways; *e.g.*, the immediate ancestor (or ancestors) of ℵ may have been largely corrected to the B text. These considerations do not militate directly against the excellence of the common archetype of Bℵ but they undoubtedly raise once more the very serious question whether these great codices are in every case independent witnesses.

The demonstrable inferiority of B in certain books of the OT, notably Judges and Isaiah (see OT, 'Greek Versions'), may be held to cast a certain suspicion upon its NT text. But the great Bibles of the fourth century must have been copied from several smaller codices or rolls containing only part of the Scriptures. The textual characteristics, therefore, of B in the Prophets or the Octateuch are by no means necessarily those it exhibits in the Gospels or the Acts.

2. The claims of the Antiochian text to represent the apostolic original are rejected mainly because no clear evidence can be found for it earlier than the fourth century. It is acknowledged by all that the various forms of the 'Western' text were widely spread in the second and third centuries. But where was the 'Neutral' text transmitted?

1 The latest serious defender of the conflate readings of the Antiochian text is W. Bousset (*Texte und Untersuchungen*, xi. 4 97-102); but the emphatic rejection of these readings by Ss has made the refutation of his argument superfluous.

2 See Bousset, *TU* xi. 4 45 *ff.*; J. R. Harris, *Stichometry*, 71-89; J. A. Robinson, *Euthaliana*, 36-43.

TEXT AND VERSIONS

Hort's answer is unambiguous. 'The Western licence did not prevail everywhere, and MSS unaffected by its results were still copied. The perpetuation of the purer text may in great measure be laid to the credit of the watchful scholars of Alexandria; its best representatives among the versions are the Egyptian, and especially that of Lower Egypt; and the quotations which follow it are most abundant in Clement, Origen (Dionysius, Peter), Didymus, and the younger Cyril, all Alexandrians' (Westcott and Hort, *smaller ed.* 550).

It must, however, be noted that the testimony of our Alexandrian and Egyptian witnesses becomes more and more Western the earlier they are. Of the three great Alexandrian fathers, Origen is more 'Western' than Cyril, Clement is more 'Western' than Origen.[1] Recent criticism has dealt similarly with the evidence of the Egyptian versions. The old arguments for the comparative antiquity of the Sahidic version remain, and new discoveries of ancient fragments of that version and its immediate kindred are made year by year. But in the Sahidic 'the Western influence is often peculiarly well marked.'[2] The Bohairic, on the other hand, is thoroughly non-Western; but Guidi has shown that this version in its present form, so far from being a product of the *third* century, is almost certainly not earlier than the *sixth*. The very existence of a specifically Bohairic literature before the sixth century is extremely doubtful (see § 34).

Yet with all deductions it remains true that the 'Neutral' text receives a larger measure of general support even from the Sahidic version than from the early Latin or Syriac texts. In other words, a predominantly 'non-Western' text was current in Egypt from about Origen's time onwards. We are, moreover, placed in a peculiarly favourable position for studying this type of text owing to the fortunate accident that the Antiochian revision never found favour in Egypt. Until long after the Arab conquest the text found in Egyptian documents, both Greek and Coptic, continued on the whole to be that which Hort has called 'Alexandrian.' This text, though far purer than the Antiochian, is equally with it an artificial eclectic revision; its survival at Alexandria, alone among Greek-speaking communities, was no doubt connected with the growth of Egyptian Monophysitism.[3]

3. The 'Western' text, as a whole, has hitherto found few defenders. This is partly due to 'an imperfect apprehension of the antiquity and extension of the Western text as revealed by patristic quotations and by versions' (Hort 170). Hort, whose general estimate of Western readings is no more favourable than that of his predecessors, groups Western characteristics under the three heads of *Paraphrase*, *Interpolation*, and

1 *Ibid.* 549. The Gospel quotations of Clement of Alexandria have been carefully edited by P. H. Barnard (*Texts and Studies*, 5 5, 1899).

2 Hort, 550.

3 The form in which the alternative ending to Mk. is exhibited by the 'Alexandrian' text is a good illustration of its highly artificial character. The genuine text of that Gospel breaks off in the middle of a clause at Mk. 16 8 with the words ἐφοβοῦντο γὰρ . . . ('*for they feared* . . . .'); but an ancient text, now represented by the Latin Codex Bobiensis (*k*), added the following sentence: 'But all that they had been commanded they showed forth in few words to those that were with Peter. And after these things Jesus himself also appeared, and from the East even unto the West sent forth by them the holy and incorruptible preaching of eternal salvation. Amen.' The absence of quotations from Mk. 16 9-20 in Tertullian and Cyprian makes it highly probable that *k* here, as elsewhere, faithfully reproduces the text of the Gospels current at Carthage up to the middle of the third century. This shorter conclusion evidently presupposes a text which ended at 16 8 as in Bℵ and Ss.

Most documents of course add to 16 8 the so-called 'last twelve verses of S. Mark,' forming *vv.* 9-20. *It is the characteristic of the Alexandrian recension that it gives both conclusions*, the longer one being linked to the shorter by a critical note. This composite ending is still extant in five Greek MSS, in some Æthiopic MSS, and in the margins of the Harclean Syriac and of the best MS of the Bohairic, accompanied in most cases by the critical note (see Amélineau, *Not. et Extr.* 34 2, and the descriptions of Ψ [Gregory 445], and of $ℸ^{12}$ [Gregory 1308], and see also J. R. Harris, appendix to Mrs. Lewis's *Cat. of Syriac MSS at Mt. Sinai*, 103 *f.*).

Assimilation (Hort 173-175). Notwithstanding this unfavourable verdict, 'Western' documents not unfrequently form the bulk of the attestation for the readings adopted by him.[1] The fact is that the expression 'the Western text' is a misnomer. The 'Western' documents do not present a single recension, like the Antiochian text, or even a body of aberrant readings; they rather represent the unrevised and progressively deteriorated state of the text throughout the Christian world in the ante-Nicene age. 'Western' readings are accordingly of various types, ranging from the uncorrupted original to the most extreme forms of interpolation and paraphrase. It was a perception of this fact that led Hug as early as 1808 to speak of what is usually called 'the Western text' by the name of *κοινὴ ἔκδοσις*.

Much of the bad repute of 'Western' texts comes from the almost universal practice of treating Codex Bezæ (D) as their leading representative. But this famous MS, though it contains very ancient elements, is far from being a pure representative of any ancient strain of text. A more just view would be gained by taking, on the one hand, the Latin fragments called Cod. Bobiensis (*k*) as the best type of the texts early current in the West, and, on the other, the Sinai palimpsest (S_S) as the best type of the texts early current in the East. Both these documents would be reckoned as 'Western' according to the ordinary view; but it has not yet been proved that they have any common origin later than the archetype of all our extant authorities.

The discovery of the Sinai palimpsest has materially altered our conceptions of the early 'Western' text. One of the chief characteristics formerly assigned to that text was a tendency to admit interpolation; and the presence in the leading 'Western' authorities of a series of interpolations, which must have come from non-canonical sources, seemed to make it obvious that all 'Western' documents were derived from an interpolated copy of the Gospels later than the archetype of Bℵ and their allies.[2] But though the Sinai palimpsest has a thoroughly non-Alexandrian text, *not one of these interpolations is found in it*. It was the presence of clear errors in all 'Western' documents known to the earlier critics which made them think of a 'Western' recension or edition; every fresh discovery, therefore, of documents fundamentally 'Western,' but nevertheless free from these errors, makes the theory of a single Western *recension* less and less probable.

4. One of the arguments employed by Hort in favour of the genuineness of the 'Neutral' text is the intrinsic excellence of the groups containing B, the chief 'Neutral' document. This line of argument is of course quite independent of theories connected with the spread of the 'Western' or of any other ancient text. It is somewhat open, however, to the charge of subjectivity, and the very fact that not all the readings adopted by Hort have found universal favour, proves that the evidence of groups might have been interpreted differently. Salmon (*Some Thoughts on the Textual Criticism of the NT*, 1897) calls the term 'Neutral' 'a question-begging name' (p. 49), and adds with great truth, 'if we want a more precise answer to the question what Hort means by "Alexandrian," we shall not be far wrong in saying, those readings which are Alexandrian in their origin and are not recognised by Codex B' (p. 51). Yet there is no doubt that the text of B in the Gospels is, generally speaking, an excellent one. Of this there can be no stronger proof than the support it frequently gives to early readings, which, but for the witness of B, would have been dubbed with the fatal epithet of 'Western.'[1] The habitual associates of B are of quite a different character; so frequently indeed does it agree with such 'Alexandrian' documents as TL and the Egyptian versions, that it has actually been maintained that the Gospel text of B is a transcript of the Egyptian recension of Hesychius (Bousset, *TU* xi. 4 92). But the occasional, yet unmistakable, support which B affords to the Western against the specifically 'Alexandrian' readings is inconsistent with this view.[2]

[1] Notable instances are Mt. 6 33 [(B)ℵ], 7 13 [ℵ*], 13 35 [Bℵ^b min.[2] Orig.], 16 20 [B* codd. ap. Orig.]. The square brackets contain the 'non-Western' attestation of the text of Westcott and Hort. Thus before the discovery of ℵ the true text of Mt. 6 33 7 13 was known from 'Western' documents alone.

[2] There are about twenty of these 'Western' interpolations in the Gospels. The chief of them are:—Mt. 3 15 (the light at the baptism); Mt. 16 2*b* 3 ('the face of the sky'); Mt. 20 28 ('seek from little to increase'); Mk. 16 3 (the angelic host at the resurrection); Lk. 6 4 (the man working on the Sabbath); Lk. 9 54 *f.* ('Ye know not what spirit ye are of'); Lk. 22 43 *f.* (the bloody sweat); Lk. 23 34*a* ('Father, forgive them'); Jn. 5 4 (the angel at the pool); Jn. 7 53-8 11 (the woman taken in adultery). All these are absent from Ss as well as from Bℵ, but they appear to belong to the earliest Latin texts. The longer conclusion to the Second Gospel ([Mk.] 16 9-20) is absent from *k* in addition to Bℵ Ss, so that this passage forms no part also of the earliest non-Alexandrian text.

To sum up, Hort's text of the Gospels is less affected by recent discoveries than his criticism of the documents.

11. Conclusion. As was pointed out above, the readings of Bℵ, the authorities on which Hort chiefly relied, are often supported by the most ancient form of the Old Latin (*k*), or by the most ancient form of the Old Syriac (S_S). These readings are almost always to be perferred, for they represent an agreement between the best 'Western' and the best 'non-Western' texts.[3] The crucial difficulty occurs where all the early 'Western' documents unite against Bℵ, or BℵL and the Bohairic. In other words, the question before the textual critic in the immediate future is, Are the oldest forms of the Old Latin and the Old Syriac independent? We may put the question in another form. Accepting Hort's nomenclature, and remembering that 'Western' documents such as *k* and S_S not unfrequently support B against the specifically 'Alexandrian' text, what grounds have we for thinking that B, or even Bℵ united, is entirely free from 'Alexandrian' corrections?[4] In the portions of the Gospels where *k* and S_S are both extant, B has the support of one or other of them about four times out of five; may not B be itself in the wrong in the remaining readings? How far, in fine, can we trust B whether supported by the other Greek MSS or not, in cases where its only attestation among the ancient versions is Egyptian?

The answers to these questions cannot positively be given until a complete analysis has been made of the extant 'Western' variants to the text of Bℵ. It is,

[1] *E.g.*, in Lk. 10 1 17, B has 'seventy-two' disciples with the best Latin and Syriac texts, not 'seventy.'

[2] There is not the slightest likelihood that the non-Alexandrian readings in B have been introduced into the text of B's ancestors by irregular revision. The probability indeed is all the other way. The few indications afforded by the actual readings of the MS tend to show that 'Western' (or at any rate non-'Alexandrian') readings would have been corrected out, not introduced. The most striking instance is Mt. 27 16 *f.* In these verses the common text has **Βαραββᾶν . . . Βαραββᾶν**, but an ancient text (now represented by some good minuscules, a scholion, and the Old Syriac) read **Ἰησοῦν Βαραββᾶν . . . Ἰησοῦν τὸν Βαραββᾶν**. Now B has **Ἰησοῦν** in neither place; but it inserts **τὸν** before the second **Βαραββᾶν**. The obvious explanation is that an ancestor of B had the reading *Jesus Barabbas*, but the corrector who expunged the word **Ἰησοῦν** in both places omitted to delete the article in the second place. Other instances, somewhat similar, are Mt. 21 31 (**ὕστερος**); Mt. 23 26 (**αὐτοῦ**); Lk. 19 37 (**πάντων**); Jn. 8 57 (**ἑόρακες**). In such places the 'neutrality' of B is the neutrality of compromise.

[3] A striking instance is afforded by the readings connected with the double cock-crowing in Mk. 14. The text adopted by Hort was that of B, a Greek lectionary, and the Bohairic. It is now found also in Syr.sin. The fact that Syr.sin. here agrees with B is a strong confirmation of the correctness of Hort's judgment; at the same time it removes the whole set of variations from the category of places where the true text is preserved in 'non-Western' documents alone.

[4] The definite issue is raised, for instance, in Mk. 6 20, where BℵL Boh read **ἠπόρει** for **ἐποίει**. **Ἐποίει** (with slight variations) is found in all other documents, including Lat.vt and Syr.vt. If **ἠπόρει** be not original, it looks more like an ingenious conjecture than a palæographical blunder.

TEXT AND VERSIONS

however, in the direction here indicated—viz., the preservation of the true text in a considerable number of cases by 'Western' documents alone—that criticism may ultimately be able to advance beyond the point reached by Hort.

We may add a few illustrations of passages where the text adopted by WH can be certainly or probably amended.

12. Illustrative texts.

i. Mt. 6 8 'your Father knoweth what things ye have need of *πρὸ τοῦ ὑμᾶς αἰτῆσαι αὐτόν*.' For *αἰτῆσαι αὐτόν* we find *ἀνοῖξαι τὸ στόμα* in D *h*.[1] This picturesque locution has been adopted by Blass and by Nestle (Hastings' *DB* 739*a*); the slenderness of the attestation may be explained by the desire of avoiding what seemed an undignified expression. All Syriac VSS. support the common text; but it is worth noticing that in Mt. 5 2 S_S reads 'and he began to say to them' instead of 'and he opened his mouth and taught them, saying. . .'

A somewhat similar variant is to be found in Mt. 7 23, where for *ὁμολογήσω* we find *ὀμόσω* attested by *b q* vg. codd. pp. lat (incl. *de Rebaptismate*, § 7): Justin Martyr 262, with the African Latin (*k* [Cyp] also [*a*] *g*) and S_C (*hiat* S_S), have *ἐρῶ*—*i.e.*, their text has been assimilated to Lk. 13 27.

ii. Mt. 11 5 '*καὶ πτωχοὶ εὐαγγελίζονται*' *om.* *k* S_S Diat.^{vid} (*i.e.*, *Moes.* 100).

These words belong to the genuine text of Lk. 7 22 and are in accordance with Lk.'s accustomed diction. In Mt., on the other hand, the word *εὐαγγελίζεσθαι* never occurs again: if the phrase omitted by *k* and S_S be retained, we must almost assume that Mt. is here directly borrowing from Lk. Omit the phrase, and the linguistic difficulty is removed; Mt. gives the actual words of Jesus, whilst Lk.'s addition 'the poor are evangelised' is an early (and correct) ***interpretation*** of them. Similarly *νομικός* in Mt. 22 35 is alien to the diction of the First Gospel and comes from Lk. 10 25: the word is rightly omitted from Mt. by 1-118-209 *e* S_S Arm Origen ^{lat}.

Harmonistic additions are among the most frequent and misleading corruptions of the text, as Jerome was the first to see: 'dum eundem sensum alius aliter expressit, ille que unum e quattuor primum legerat, ad eius exemplum ceteros quoque aestimauerit emendandos' (*Ep. ad Damasum*). Other passages where the discovery of S_S has helped to remove additions of this kind are Mt. 21 44 (taken from Lk. 20 18); Lk. 11 33 *οὐδὲ ὑπὸ τὸν μόδιον* (Mt. 5 15); Jn. 12 8 'For the poor ye have always with you, but me ye have not always' (taken from Mk. 14 7, Mt. 26 11, but omitted in Jn. by D S_S).

iii. Mt. 25 1 'went forth to meet the bridegroom *and the bride*,' D 1*-209 124* Latt Syrr (incl. S_S) Arm. This addition is certainly genuine, and in accordance with Oriental custom. The bridegroom goes with his friends to bring away the bride from her father's home; no one is left at the bridegroom's house but a few 'virgins' (*i.e.*, maidservants) to keep watch. In the parable these maidservants represent the church (as in Lk. 12 36), whilst the arrival of the wedding procession with the bridegroom and his bride represents the coming of Christ. Christ is here the bridegroom and the bride; the waiting servants are the church. But the more familiar image was the comparison of Christ to the bridegroom, the church to the bride; when the Bride had become the stock metaphor for the church, the careless editor had a strong temptation to leave it out in the parable where it does ***not*** mean the church.

iv. Mt. 8 32 '*καὶ παρρησίᾳ τὸν λόγον ἐλάλει*.' These words come after the first announcement of the Passion, without variation in Greek MSS. As they stand they are a remark of the evangelist, to which there is nothing corresponding in the parallel passages Mt. 16 21, Lk. 9 22: either the remark was considered too uninteresting to repeat, or it originally contained something which later writers might regard as unsuitable. For *vv.* 31 *f.*, S_S Diat^{ar} and *k* have 'the Son of Man must suffer many things . . . and after the third day rise and openly speak the word'—*i.e.*, they read *λαλεῖν* or *ἐκλαλεῖν* instead of *ἐλάλει*, thereby making the clause part of Jesus' word to the disciples. The central thought, therefore, of the prediction is not the physical miracle but the general victory of the Gospel after the great struggle (cp Hos. 6 2 *f.*). That Jesus did not preach 'openly' after the Resurrection was a reason why the clause should be omitted by Mt. and Lk., and at a later period should be altered in Mk.; but the agreement here of our earliest eastern and western texts enables us to restore the original form with confidence.

v. The restoration of the true texts of Acts is a more difficult matter than that of the Gospels owing to the comparative poverty of the evidence. We need especially something corresponding to the 'Old Syriac,' by the aid of which we might separate really ancient readings in the Old Latin and in D from those western variants that never had anything beyond a local circulation. Several of the proper names are undoubtedly corrupt. *E.g.*, *Ἰουδαίαν* Acts 2 9 is impossible, for Judæa is quite out of place between Mesopotamia and Cappadocia. The African Latin (Tert. *adv. Jud.* 7, Aug. *c. Fund.*) substituted ***Armeniam;*** but this is palæographically unlikely: possibly Lk. wrote ΓΟΡΔΥΑΙΑΝ—*i.e.*, Gordyæa, now Kurdistan. vi. In Acts 4 6 *Ἰωάννης* is a mistake for *Ἰωνάθας*, the true name being preserved only in D, in Berger's Perpignan MS and (as E. Nestle points out) in Lagarde's *OS* 69 18: on the other hand the Fleury palimpsest (*h*) is said to have [*Io*]*hannes*, and we may conjecture from the *Doctrine of Addai* 11 23 that the Old Syriac attested *Onias*. vii. In Acts 13 8 the present writer has a strong suspicion that the mysterious name *Ἐλύμας*, for which *ἕτοιμος* is read or inferred in several Western documents, is a corruption of *ὁ λοιμός*, 'the pestilent fellow' (cp Acts 24 5). But conjectures of this kind stand on quite a different footing from those restorations of the text which are based on a consenus of the most ancient evidence. If we are to feel any confidence that this or that phrase or variant is the actual word of the original writer, it must be because we can really trace back the phrase in question to the earliest times, not because it happens to have commended itself to some critic of the ancient or modern world.

In addition to Hort's ***Introduction*** (above, § 7), the following works on NT textual criticism may be recommended. E. Nestle, *Introd. to the Textual Criticism of the Greek NT* (Theological Translation Library, vol. xiii.), 1901. F. G. Kenyon, *Handbook to the Textual Criticism of the NT*, 1901. K. Lake, *The Text of the NT* (elementary), 1900. G. Salmon, *Some Thoughts on the Textual Criticism of the NT*, 1897. C. R. B. VERSIONS

I. LATIN

13. Latin versions: first traces.

Latin versions of the scriptures can be traced back into the second century. The Scillitan martyrs at Carthage in the year 180 A.D. had in their case of rolls 'epistles of Paul the just man.'[1] What type of text these MSS may have contained it is of course impossible directly to determine; but the occasional references of Tertullian (*e.g.*, *adv. Prax.* § 5) to the translation then in common use are not inconsistent with the belief that it was of the same general type as that found in the many biblical quotations of Cyprian.

To Cyprian, according to the judgment of the latest

[1] *I.e.*, cod. Claromontanus of the 6th century. D has the itacism ΑΝΟΙΖΕ.

[1] *Texts and Studies*, i. 2 114.

investigator of his style,[1] the Latin version seemed 'clumsily executed and quite modern'; but he quotes it continually with remarkable accuracy, and never seems to question the correctness of the renderings. The natural inference is that Cyprian in the middle of the third century found a definite Latin text established as an authoritative standard in Carthage.

We are able to carry back the history one stage farther. The quotations of Novatian, Cyprian's Roman contemporary, give us the text current in Rome, just as Cyprian's quotations give us the text current in Carthage. To them we may add the few verses quoted by the Roman presbyters Moyses and Maximus in their letter to Cyprian (ap. Cypr. *Ep.* 31, § 4). These quotations present marked differences from the Cyprianic text, as well as marked agreements with it; we are, therefore, justified in assuming for both the Carthaginian and the Roman types a common origin, which at the same time must have been sufficiently remote to allow for the development of the characteristic differences between the two texts.

No *tradition* of the origin or literary history of the Latin versions seems to have been known even to Augustine or Jerome; it remains an open question whether the first translation was made in Roman Africa, in Italy, or in Gaul.

14. Their origin.

What is certain is that by the middle of the fourth century, Latin biblical MSS exhibited a most confusing variety of text, caused at least in part by revision from later Greek MSS as well as by modifications of the Latin phraseology. This confusion lasted until all the 'Old Latin' (or 'ante-Hieronymian') texts were supplanted by the revised version of Jerome (383-400 A.D.), which was undertaken at the request of Pope Damasus and ultimately became the Vulgate of the Western church.

We are thus driven back on evidence other than tradition to classify our MSS—to find, if possible, the local texts which they respectively represent. This classification is the more necessary as the primary importance of the Old Latin versions lies in their age. The 'Old Latin' may go back to the second century; but before any particular Old Latin reading can be safely treated as second-century evidence we require at least *prima facie* proof that the document in which it occurs has a text which has largely escaped revision from later Greek MSS.

In classifying our Old Latin authorities each group of books must be treated separately. As a matter of fact, the different groups have had different literary fates. In the Gospels, the Psalms, and Isaiah, we find a maze of aberrant texts; on the other hand, the book of Wisdom seems never to have undergone a thorough revision in later times, and the text of Cyprian's citations here hardly differs from the printed Vulgate.

15. Classification.

The necessary starting-point is supplied by the biblical quotations in the Latin Fathers. Some of the evidence, however, derived from this source must be used with great caution.

i. It is rarely possible to take the many scriptural allusions in Tertullian's works as literal representations of the biblical text current in Carthage in his day. They are, in fact, so unlike any surviving type of the Latin versions that it is maintained by Zahn[2] and others that the Bible had not been translated into Latin in Tertullian's time. Even those, however, who place the origin of the Latin Bible earlier than Tertullian admit that he often translates directly from the Greek. A clear instance of this is *de Carne Christi* § 20, where Mt. 1 16 is quoted in agreement with the ordinary Greek reading against the combined testimony of all the older Latin texts.

ii. A great uncertainty hangs over the age of the Latin translation of Irenæus's work against Heresies. If it be contemporary with the author *it* becomes a primary witness for the Gallican text. Some, however, including Hort, have placed it in the fourth century, and this is undoubtedly the safer view.

iii. One of our chief authorities, the *Testimonia* of Cyprian (a series of proof-texts from Scripture), was so popular in the Latin church that certain later writers quote from it instead of using the Bible directly. In so far as this is done these writers cease to be independent witnesses. This applies to Firmicus Maternus, Commodian, Lactantius, and in part to Lucifer and Zeno.

[1] E. W. Watson in *Studia Biblica*, 4 195.

[2] *Gesch. d. NT Kanons*, 1 51-60.

Fragments at least of eighteen MSS of the Old Latin Gospels are still extant. Of these only one—the Latin of Codex Bezæ (*d*)—is a bilingual. Five of these MSS—*viz.*, codd. Vercellensis (*a*), Veronensis (*b*), Palatinus (*e*), Sangallensis (*n*), Bobiensis (*k*),—as well as *d* itself, are of the fourth or the fifth century, having therefore been transcribed at a time when the Old Latin was in full church use.

16. The Gospels.

Hort was the first to point out the close connection of the texts of *k* and *e* with the many and accurate quotations of Cyprian (died 258). Of these two MSS *k* is more faithful to the Cyprianic standard than *e*; but both are quite on a different plane from the rest of the Latin MSS. We may therefore take the text of *k* and *e* as representing the form in which the Gospels were read at Carthage in the middle of the third century before the Decian persecution. The only other non-Patristic authorities which show a distinctive African (*i.e.*, Cyprianic) character are the contemporary corrections in the text of *n* (esp. in Lk. and Mk.), corrections which must have been made from a MS very like *e*, and isolated sections (*e.g.*, the last chapters of Lk.) in the late MS *c* (Colbertinus).

The character of the 'African Latin' differs much from other Old Latin texts both in language and in the underlying Greek text.[1] But one fact stands out above all others—its unlikeness to the eclectic texts of the fourth century, both Greek and Latin.

For the most part the interpolations of this, the oldest continuous Latin text of the Gospels that has come down to us, are to a large extent not the interpolations of the eclectic texts, and its omissions are not their omissions; moreover its renderings are not the renderings of the later revised Latin texts such as the Vulgate and its immediate predecessors. All this tends to show that the African text of the third century had to a large extent escaped revision from Greek sources; in other words, that the Greek text implied by *k* and its companions is that which underlies the original translation.

The remaining Old Latin MSS, including the Latin of Cod. Bezæ, may be classed as 'European,' since they agree with the European Fathers against the peculiar African renderings. The origin of this type of text is still obscure. The MSS group themselves round the two great codices *a* and *b*. Of these *b* occupies a central position, the other MSS differing from one another more than they differ from it. At the same time it may be doubted whether *a* does not represent an earlier stage of the European text, as the quotations of Novatian (the Roman contemporary of Cyprian) predominantly favour *a* against *b*, so far, that is, as the 'European' type is developed in them. This is especially the case in Jn., where the *a* text is also supported by Lucifer of Cagliari. On this view 'African' readings found in *a* are relics of the earlier form of the 'European' text. On the other hand *b* is the oldest representative of that stage of the European text from which most of the later forms of the Old Latin, and finally the Vulgate, are descended.

Some of the later Latin texts have been partially conformed to the Antiochian Greek text. The most prominent surviving example is Cod. Brixianus (*f*), a Gospel MS of the sixth century. It has been conjectured that MSS of this type were referred to by Augustine under the term *Itala* and that they formed the basis of Jerome's revision. But it is much more probable that Augustine's *Itala* means the Vulgate; see below (§ 59). The peculiar element of *f* is derived from the codices of the Gothic version brought into N. Italy by the Lombards and perhaps by previous northern invaders during the fifth and the sixth century, whilst the agreement of *f* and the Vulgate (which in parts is

[1] See especially Sanday's essay on the text of *k* in *Old Latin Biblical Texts*, vol. ii.

very marked) is most likely due to the intrusion of Vulgate readings into the text of *f*.[1]

Many 'Antiochian' readings are found in the Vulgate, as is only natural in a revision undertaken by the aid of Greek MSS at the end of the fourth century. Some noteworthy agreements of the Vulgate with the Greek MSS ℵ and B are also found, especially in the Acts: this points to a use of the great library at Cæsarea. Jerome gave special heed to the elimination of harmonistic corruptions and to correcting the rendering of important doctrinal expressions. A well-known instance of the latter is the introduction of *supersubstantialem* into the Lord's Prayer in Mt. instead of *cotidianum*, to render ἐπιούσιον. Quite as characteristic is *mundus* for ὁ κόσμος in Jn., *hic mundus* being reserved for ὁ κόσμος οὗτος.[2]

17. Pauline epistles.

The African text of the Pauline epistles is imperfectly preserved. The version used by Cyprian is not represented in any known MS, though some of its peculiar renderings reappear in the not inconsiderable quotations of Tyconius (flor. 380). Entirely distinct from these, and representing a different Greek original, is the text of Gal. 5 19 *ff.* as quoted by Nemesianus of Thubunæ at the Council of Carthage (256 A.D.), a text which has points of contact with Tertullian (cp *de Pudic.* § 17).[3]

Among European texts the Latin of cod. Claromontanus (D_2 d_2) holds a high place. The twin texts of bilingual MSS are always open to the suspicion of having been greatly assimilated to one another. In the case of d_2, however, the genuine Old Latin character of the text is vindicated by its frequent agreement with the quotations of Lucifer of Cagliari (†370). The curious interlinear Latin version of Cod. Bœrnerianus (G_3 g_3) is not predominantly supported by any Latin writer, and perhaps ought not to be reckoned among continuous Old Latin authorities. The revised text used by Augustine in this part of the NT is represented by fragments of two MSS formerly at Freising, now at Munich (*r*, r_2).

In the Vulgate itself comparatively few changes appear to have been made by Jerome in the Pauline Epistles, so that it may almost be reckoned among the late Old Latin texts. On the other hand the Gothic-Latin MS usually quoted as *gue* has very little independent value, as the Latin has been assimilated to the parallel Gothic text.

The Epistle to the Hebrews was absent from the original form of the Latin canon, and it is not quoted by Cyprian or Tyconius, nor apparently by Irenæus. Tertullian quotes it once (*de Pudic.* § 20), but not as scripture; as in the other parts of the NT the version he uses does not agree with any other Latin authority. It is, therefore, of interest to observe that the text of Hebrews in d_2 stands on the same footing with that of the rest of the epistles, the agreement with Lucifer being there as clearly marked as elsewhere, although in the MS itself the epistle forms a sort of appendix at the end. The epistle also occurs in the Freising MS, with the text of which the quotations of Augustine agree.

18. Acts.

The 'Western' text of Acts is found in nearly all Old Latin authorities (see col. 4996, n. 3); in attempting therefore to trace their mutual connection we must chiefly be guided by the style of the Latin renderings. The mere presence of Western glosses in a Latin source, such as Augustine, tells us little of his relation, *e.g.*, to the Latin of Cod. Bezæ.

The most important quotations are found in Irenæus, Tertullian, Cyprian, Augustine, Lucifer of Cagliari, and the anonymous African tract *de Rebaptismate* (usually bound up with Cyprian). Of MSS we have besides the Latin of the bilinguals Cod. Bezæ (*d*) and Cod. Laudianus (e_2), large fragments of an African text in the sixth-century palimpsest Cod. Floriacensis (*h*), a complete European text in Cod. Gigas Holmensis (*g*), and 1-13 6 28 16-end in a (?) Spanish text published by Berger from a MS once at Perpignan (*p*). There are also fragments of a late European text in a fifth-century palimpsest at Vienna (*s*), now published by H. J. White. The '*Acta*' of Augustine's dispute with Felix the Manichee at Hippo in 404 A.D. should almost be counted among the MSS, for in them Augustine reads from a codex the continuous text of Acts 1-2 11 (see below, § 21).

The most primitive form represented by these MSS is that found in *h*, the text of which is almost exactly that of Cyprian and also of Augustine. That the text contained in *g* is ancient, although the MS is only of the thirteenth century, is proved by its close agreement with the quotations of Lucifer, where it agrees with as well as where it differs from the Vulgate.

This type of text is also found in a Milan lectionary (g_2) containing the story of Stephen, and to some extent in *s*; it reappears, strange to say, in the non-Vulgate portions of the '*Liber Comicum*,' a Visigothic lectionary published by Morin. The text of *p* differs greatly from *g*, and seems to have most affinity with the very scanty extracts in the Speculum (*m*) which run parallel to it. The not unfrequent agreements of *p* with e_2 seem rather to be due to the fact that each is a very literal version of the Greek than to real kinship of text. The Latin columns of the two bilinguals *d* and e_2, as we might almost expect, agree closely with no ancient Latin text.[1] The renderings found in the quotations of Tertullian and the Latin translation of Irenæus here as in other parts of the Bible do not agree consistently with any other authority.

With regard to the underlying Greek, Irenæus and the Africans together with the Perpignan MS all go back to a Greek text such as that of Codex Bezæ, but comparatively seldom afford any real support to the eccentricities of its Latin side. It is probable that the 'Western' element of E_2 (Laudianus) is ultimately of Latin origin.[2] This, however, but rarely gives an independent value to the Latin side of the existing MS, except where E_2 stands alone among *Greek* authorities. Whatever the history of the ancestors of Cod. Laudianus may have been, in our MS the Greek and the Latin are almost completely equated to each other. The pages indeed have quite the appearance of a glossary.

In the later European text represented by *g* and Lucifer the 'Western' glosses have been to some extent corrected out. This is true still more of the Vulgate, which in Acts not unfrequently follows the Greek text approved by modern critical editors.

A very remarkable type—a third-century African text as far as regards renderings, but without the 'Western' glosses—is found in the anonymous tract *de Rebaptismate*.

It reflects in fact the isolated position of the writer, who, although a contemporary of Cyprian, differed from the majority of the Africans in the biblical text he used, as he differed from them on the question of the Rebaptism of heretics.[3] The literary history of Acts in Latin can never be regarded as definitely settled until the appearance of this curious text is sufficiently accounted for.

19. Catholic epistles.

The full collection of seven Catholic epistles which usually follows Acts in Greek MSS was not included in the Latin canon until the fourth century. Only 1 Pet. and 1 Jn. with Jude had hitherto been universally re-

[1] F. C. Burkitt, *Journ. of Theol. Studies*, 1 129-134: Fr. Kauffmann's 'Beiträge zur Quellenkritik der gotischen Bibelübersetzung 5,' in *Ztsch. f. deutsche Philologie*, 32 305-335.

[2] In Jn. 10 16 the Vulgate, against all Greek MSS, substitutes *unum ouile* ('one fold') for the Old Latin *unus grex* ('one flock'), and from the Vulgate was derived the familiar rendering of the authorised version. The Vulgate rendering of this verse has been used by Wordsworth and White in support of their view that Jerome used Greek MSS of a type of text now lost. See, however, J. H. Bernard in *Hermathena*, 11 335-342.

[3] For Nemesianus see C. H. Turner in *Journ. of Theol. Studies*, 2 602 *ff.*

[1] This contrasts strongly with the perfect agreement between e_2 and Beda, who actually used the Cod. Laudianus itself.

[2] Blass, *Acta Apl.* p. 28 *f.*

[3] The phraseology of the quotations in the *de Rebaptismate* is almost always that of the Cyprianic Bible. The work is a letter apparently addressed to Cyprian himself (§ 4, § 10). It is possible that it was not originally composed in Latin, and that we possess only the Latin translation, as in the parallel case of Firmilian's letter to Cyprian (ap. Cypr. *Ep.* 75). This would account both for the African phrases and for the non-African text. It is worth noticing that the *de Rebaptismate* contains a clear allusion to Mk. 16 14 (§ 9, end: *non crediderunt*, nisi *postmodum* ab ipso Domino omnibus modis fuissent *obiurgati* atque *increpati*).

TEXT AND VERSIONS

ceived, although 2 Jn. is also quoted by some early Fathers.

The extant Old Latin authorities for this division of the NT are as follows:—(i.) Of the Old African version no MS is known; but we have the quotations of Cyprian from 1 Pet. (called *ad Ponticos*, as in Tertullian) and 1 Jn. With these, on the whole, agree the quotations of Tyconius. A verse from 2 Jn. is quoted by one of the Bishops at the Council of Carthage. (ii.) A later African revision, including all the seven epistles is found in Augustine. Of this revision we have two MSS, *h* at Paris (fragments of 1 and 2 Pet., 1 Jn.) and *q* at Munich (a large fragment of 1 Jn.). *h* is the same Cod. Floriacensis as in Acts, but in the Cath. Epp. the text is not Cyprianic, but late African. A peculiar recension is found in the pseudo-Augustinian Speculum (*m*), in which the extracts from Jas. agree very closely with the quotations of the Spanish heretic Priscillian. This late Spanish type of text is noteworthy as the original source of the famous gloss of the Three Heavenly Witnesses in 1 Jn. 5 7. (iii.) Among European texts we have the extensive quotations of Lucifer, including more than half of Jude; fragments of Jas. and 1 Pet. are also found in *s* (see § 18). Of Jas. a complete text is extant in a non-biblical MS formerly at Corbey, now at St. Petersburg (*ff*). This translation appears to be as old as the early part of the fourth century, and is apparently used by Chromatius of Aquileia. A fragment of 3 Jn. is found in Cod. Bezæ, immediately before Acts; but it must remain a matter of conjecture what other books that MS once contained between the Gospels and Acts.[1]

20. Apocalypse.

The Apocalypse from the first formed part of the Latin NT, and in Africa the ecclesiastical version of it does not seem to have suffered revision in the fourth century as was the case with the rest of the NT, except Acts. Hence it comes to pass that the 'late African' text of the Apocalypse, as given almost in full in the Commentary of Primasius, bishop of Hadrumetum in the sixth century, differs but little from the Cyprianic text. The same text is also found in the fragments of Cod. *h* (see above, § 18*f.*). A somewhat different type appears in the Commentary of Tyconius, large fragments of which are preserved in Primasius, in Beatus the Spaniard, and in other sources. Beside these a late European text is extant in *g* (see above, § 18); but Lucifer avoids quoting the Apocalypse altogether. A third type of text seems to underly the Vulgate, which has affinities both with *g* and with the African text.

21. History of the Vulgate.

In certain circles some parts of Jerome's revised translation were received immediately into Church use. This, for instance, was the case at Hippo. Augustine, whilst writing to Jerome in 403 A.D. to deprecate his great changes in the OT, nevertheless says: 'Proinde non paruas Deo gratias agimus de opere tuo quod *Euangelium* ex Græco interpretatus es, quia pæne in omnibus nulla offensio est.' This limitation of his praise to the *Gospel* is confirmed by the story of the trial of Felix the Manichee in the following year (see above, § 18). At the trial Augustine had occasion to read from the NT the story of the descent of the Spirit. Accordingly there was handed to him first a *Codex* of the Gospels, from which he read Lk. 24 36-49 in the Vulgate text; then being given a *Codex* of Acts, he read out Acts 1 1-2 11 in a very pure African Old Latin text. The fact that the text of Acts as here given is quite unmixed with Vulgate readings shows that our MSS of 'Aug. *contra Felicem*' have suffered no wholesale corruption; we cannot therefore but conclude that by 404 A.D. the Gospels were read at Hippo from the Vulgate, whilst in other books of the Bible, such as Acts, the unrevised Old Latin was still publicly used.

In some parts of the Western Empire the old versions were long retained in ecclesiastical use, especially in Gaul and N. Italy. This resulted in the formation of mixed texts, sometimes by the insertion of familiar Old Latin phrases into Vulgate MSS, but more often by the imperfect correction of the codices of the old versions to the Vulgate standard. These principles were in action in all parts of the Latin church; but they produced somewhat different types of text owing to the different epochs at which the Vulgate text, as current in Rome and S. Italy generally, was brought in among the various nationalities.

Some of the most interesting texts of the Vulgate come from the British Isles. Both Great Britain and Ireland had received the Bible before the victory of Jerome's revision; but the coming of the heathen English almost entirely destroyed Christianity in what is now England. The mission of Augustine brought the Vulgate with it, and the careful English scholars of Northumbria looked to Rome and S. Italy for patterns of text, rather than to north-western Europe. A product of the Northumbrian school is the Codex Amiatinus, now at Florence, the leading MS of the Vulgate both in the Old and in the New Testament. This great book appears to have been copied from a Neapolitan text; it was written at Jarrow or Wearmouth a little before 716 A.D. and was brought to Italy as a present to the Pope by the Abbot Ceolfrid.

The Irish, until after the time of Columba, adhered to the Old Latin; one fairly pure Irish Old Latin text of the Gospels survives in Cod. Usserianus (*r*). From about the year 700, however, the Roman tonsure and the Roman text began to make way among the Irish also, and this resulted in the prevalence of a mixed type of MSS of which the Book of Kells and the Book of Armagh are noteworthy examples. A similar type of text is found also in MSS written in Britain, representing the fusion of Iona and Rome.

Simultaneous with the re-establishment of a Western Empire under Charlemagne came efforts for improvement of the Vulgate text. Hence arose the two great eclectic editions of the ninth century: that of *Theodulf* of Orleans, who aimed at collecting a large body of variants in the form of marginal notes; and that of *Alcuin* of York, who at the express desire of the great Emperor constructed a standard text. Alcuin's revision was presented to Charlemagne on Christmas Day, 801 A.D., and although his text was soon corrupted in minor details his work marks a turning-point in the history of the Vulgate. 'Up to the middle of the ninth century . . . we find a distressing jumble of the best and the worst texts existing side by side, the ancient versions mixed with the Vulgate in inextricable confusion, and the books of the Bible following a different order in each MS. After Alcuin all is changed; the singularities have been levelled, the text has become more equal and its character more tame. . . . From Alcuin's time onward the only Bible in use has been that of Jerome, and the ancient versions have disappeared' (Berger, *Vulgate*, p. xvii).[1]

II. Syriac

22. Three early Syriac versions.

Almost everything that relates to the origin and early history of the Syriac versions is the subject of controversy. In the following account an attempt has been made to distinguish between what may be regarded as proved beyond reasonable doubt, and what must in our present state of knowledge remain only a probability. It will be necessary, in discussing the earlier forms of the Syriac versions, to take the various parts of the NT one by one, as in the case of the Old Latin. The later Syriac versions will be described subsequently by themselves.

The Four Gospels.—About the year 420 A.D. the Gospel was extant in Syriac in three forms, viz.—

(i.) The *Peshitta*, or Syriac Vulgate.

[1] The vacant space would suggest that the missing books are the Apocalypse, and all three Johannine epp., making up with the Fourth Gospel the complete *Instrumentum Iohannis* (Tert. *de Res. Carnis*, § 38).

[1] The Vulgate was first printed at Mainz between 1452 and 1456 ('Mazarin Bible'). The authoritative edition used by the Roman Church was issued by Clement VIII. in 1592. A critical edition of the NT is being prepared by Bishop J. Wordsworth and the Rev. H. J. White, of which the volume containing the Gospels has already appeared (*Oxford*, 1889-98).

(ii.) Tatian's *Diatessaron*.

(iii.) The '*Evangeliôn da-Mepharreshê*,' or Old Syriac.

A clear idea of the nature of these three documents and their relation to one another is necessary for a right use of the Syriac versions in the criticism of the Gospels.

23. Peshitta. (i.) The version of the NT which alone has been in ecclesiastical use int he Syriac church since the middle of the fifth century, is known by the name *Pĕshīṭtā* (or *Pĕshīṭtō* in the Jacobite system of pronunciation)—*i.e.* 'the simple.'

The name Peshitta was in use as early as the ninth or the tenth century; it has been conjectured that it originally served to distinguish the Syriac Vulgate of the Old and New Testaments from the Hexaplaric version of the OT and the Harclean of the NT (see below, §§ 30, 61), editions which were furnished with marginal variants and other critical apparatus.

The Peshitta is extant in many MSS, a few of which are as old as the fifth century. All of them, however, represent the same type of text as is found in the modern editions. It was first printed by Widmanstad (Vienna, 1555). The best edition of the Gospels is the *Tetraeuangelium* published by (the late) P. E. Pusey and G. H. Gwilliam (Oxford, 1901). A small American edition of the NT in the Nestorian character (New York, 1886, etc.) gives an excellent text in a very handy form. Following the notation of Westcott and Hort, I shall speak of the Peshitta as Syriac Vulgate.

24. Diatessaron. (ii.) The *Diatessaron*, a harmony of the Four Gospels composed by Tatian the pupil of Justin Martyr, at one time took the place of the separate Four Gospels in the public services of the Syriac-speaking church. But a vigorous effort to get rid of it was made by the bishops during the first half of the fifth century, and in consequence of this no copy of the Syriac Diatessaron is now known to survive.

Our main extant authority for the text of the Syriac Diatessaron is the Commentary of Ephraim[1] (†373). This work is no longer extant in Syriac, but is known to us through an Armenian translation. A few express quotations from the original work survive in some later Syriac commentaries on the Gospels, such as those of the Nestorian Ishō'dād and the Jacobite Dionysius Barṣalībī. A complete Arabic version of the Diatessaron, made early in the eleventh century, has been published by Ciasca from two MSS (Rome, 1888); this was not made from the Diatessaron as Ephraim knew it, but from a later edition in which the text had been almost wholly assimilated to the text of the Peshitta.[2] It is therefore nearly worthless for the study of the *text* of the Diatessaron, though valuable for determining the *arrangement* adopted by Tatian.[3] The Commentary of Ephraim is quoted by the pages of a Latin rendering of the Armenian, published in 1876 by G. Moesinger.

25. 'Old Syriac.' (iii.) Another version of the Four Gospels, distinct from the Peshitta (or Syr.vg), was called *Evangeliôn da-Mĕpharrĕshê*—*i.e.* 'Gospel of the Separated (ones).'[4] The name obviously contains a reference to the Diatessaron, which in contradistinction to it is also called in Syriac *Evangeliôn da-Mĕhallĕṭê*, 'Gospel of the Mixed.' The title 'Separated Gospels' would be equally applicable to the Four Gospels as read in the Peshitta, and indeed the Peshitta is probably intended in the passage where *Evangeliôn da-Mĕpharrĕshê* occurs in the canons of Rabbûla.[1] On the other hand, the Sinaitic and the Nitrian MSS both call themselves by this name, and Barṣalībī and Bar Bahlūl the lexicographer expressly quote from the *Evangeliôn da-Mĕpharrĕshê* the reading '*Jesus* Barabbas' in Mt. 27 17, found in the Sinaitic MS.[2]

Two codices of the *Evangeliôn da-Mĕpharrĕshê* are at present known to scholars, viz., the Sinai palimpsest (S_S), and the Nitrian MS used by Cureton (S_C). The Nitrian MS, now B.M. add. 14,451, came with the rest of the library of the Convent of S. Mary Deipara in 1842-7 to London, where its peculiar character was shortly afterwards recognised by Cureton, then keeper of the Oriental MSS. His edition of the MS appeared in 1858,[3] and from him the version came to be known as the 'Curetonian.' The Sinai palimpsest was discovered at the Convent of S. Catherine on Mount Sinai by Mrs. Lewis and Mrs. Gibson of Cambridge in 1892, and transcribed in the following year by the late R. L. Bensly, J. Rendel Harris, and the present writer.

Sc may be assigned to the middle of the fifth century. It contained the Gospels in the order Mt. Mk. Jn. Lk.; but all that is now extant is Mt. 1 1-8 32 10 32-23 25 Mk. 16 17-20 Jn. 1 1-42 3 6-7 37 14 10-12 16-18 21-23 26-29 Lk. 2 48-3 16 7 33-16 12 17 1-24 44, or less than half of the whole. Ss is perhaps half a century older than Sc. It contained the Gospels in the usual order: Mt. Mk. Lk. *Jn.*; only about 450 verses (*i.e.*, about one eighth of the whole) are now altogether missing; but many words and lines are illegible. Most of the gaps in Cureton's text can now in a measure be filled; but for the history of the text the value of Ss lies less in those parts where it supplements Sc than in those where the two MSS run parallel. By a comparison of these portions we are able to gain some idea of the range of variation found in the codices of the 'Old Syriac.'

26. Relation of three. Since the publication of Cureton's Codex in 1858, a discussion has gone on as to the relative age of the *Evangeliôn da-Mĕpharrĕshê* and the Peshitta. The general opinion had formerly been that the Peshitta, much in its present state, had existed ever since the earliest ages of the Syriac-speaking church. The defenders of that opinion rested their case upon the common reception of the Peshitta by all the sects into which Syriac Chistendom has been divided from the end of the fifth century, the exclusive use of the Peshitta by Syriac ecclesiastical writers, and the alleged conservatism of Orientals. The first of these arguments proves, indeed, what is universally acknowledged—that the Peshitta had already attained a position of exclusive authority by the latter part of the fifth century. But the publication of a mass of early Syriac works during the last fifty years has materially weakened the second argument. The decisive moment is the episcopate of Rabbûla, bishop of Edessa from 411-435 A.D. From that time the NT quotations of Syriac writers are all influenced by the Peshitta, beginning with Isaac of Antioch (†460). But the quotations in Syriac writers earlier than Rabbûla agree with the known peculiarities of the Diatessaron and the *Ev. da-Mĕpharrĕshê*. The text of the Diatessaron itself, as known to us from Ephraim's Commentary and the few but express quotations of later writers, very closely resembled that of the *Ev. da-Mĕpharrĕshê* without being identical with it.

[1] Ephraim is often spoken of as *Ephrem Syrus*, and as 'the Deacon of Edessa.' The Syriac form of the name is *Afrem*.

[2] It is worth notice that the textual history of the Diatessaron in the E. is largely paralleled by its history in the W., where it is extant in Cod. Fuldensis and its copies, the text being altogether assimilated to the Vulgate. But there are many indications that it had formerly existed with an 'Old Latin' text. In other words, the text of the Diatessaron, so far as we are able to trace it, was always in process of being assimilated to the prevalent local text of the Four Gospels.

[3] English translation by J. Hamlyn Hill, *The Earliest Life of Christ* (T. & T. Clark, 1894), and (direct from the Arabic) by H. W. Hogg in *Ante-Nicene Christian Library*, add. vol. pp. 35-138 (T. & T. Clark, 1897).

[4] Perhaps 'Gospel according to the Separated (Evangelists)' is a nearer translation, the particle *da* being used for *κατά* in the Syriac titles of the Gospels.

[1] The codices of the *Psalter* in the Peshitta bear the title 'The Book of the Praises of David *da-Mĕpharrĕshê*.' May not the last word be taken to mean 'in separate (Psalms)'?

[2] The *Evangelion da-Mĕpharrĕshê* could not have got its name in contradistinction to the *Peshitta*. The only piece of evidence which seems to suggest this unlikely conclusion is the above-quoted statement about *Jesus Barabbas*, which is repeated word for word by Barṣalībī and Bar Bahlūl. Probably, therefore, they each took it from some older scholion, in which the 'Old Syriac' was contrasted, not with the Syriac Vulgate, but with the Diatessaron. It is possible that *Evangelion da-Mĕpharrĕshê* in Rabbûla's canons (Overbeck, 220 3) means any MS of the Four Gospels as opposed to a MS of the Diatessaron.

[3] It had been already in print for ten years. Three leaves of the codex found their way to Berlin, and are now numbered *Orient. Quart.* 528 in the Royal Library.

TEXT AND VERSIONS

The writings in which the Diatessaron or the *Ev. da-Mepharreshê* are used include the *Acts of Judas Thomas* (3rd cent.), the *Doctrine of Addai* (4th cent.), the Homilies of Aphraates (337-345), the genuine writings of Ephraim (†373), the writings of Cyrillona (*fl.* 400), the Syriac *Doctrine of the Apostles* published by Cureton (4th cent.). The Syriac translations of Eusebius' *Ecclesiastical History* and *Theophania* (made before 411) also show the influence of the *Ev. da-Mepharreshê*, and even Jacob of Serug (6th cent.) follows the Diatessaron in his Homily on the Lord's Prayer.

The witness of Ephraim was long claimed for the Peshiṭta against the *Ev. da-Mĕpharrĕshê* on the authority of commentaries and homilies which were printed as Ephraim's in the Roman edition (1737-43), but on insufficient evidence. Ephraim's genuine writings, which include more than 350 homilies, show no trace of distinctively Peshiṭta readings (F. C. Burkitt, *S. Ephraim's Quotations from the Gospel*, Cambridge, 1901).

To Rabbūla is due both the publication of the Peshiṭta and the suppression of the Diatessaron. At the beginning of his episcopate (411 A.D.) 'he translated by the wisdom of God that was in him the NT from Greek into Syriac, because of its variations, accurately just as it was' (*Life of Mar Rabbula*, in Overbeck, 172 18 *ff.*). And in his canons he ordered 'that in every church there should be a copy of the *Ev. da-Mĕpharrĕshê*, and that it should be read' (Overbeck, 220 3). When we consider that up to the time of Rabbūla the Gospel quotations in Syriac works never exhibit the peculiarities of the Peshiṭta, whilst after the time of Rabbūla they uniformly agree with it, there can be little doubt that the translation of the NT prepared by Rabbūla was the Peshiṭta itself.[1]

The Peshiṭta is thus an edition of the *Ev. da-Mĕpharrĕshê*, revised into closer conformity with the Greek, and published by authority with a view of superseding both the Diatessaron and the then current Syriac texts of the Four Gospels.

The method by which the new edition was propagated may be learnt from Theodoret, bishop of the adjoining see of Cyrrhus, who 'swept up more than two hundred copies of the Diatessaron in the churches of his diocese and introduced the Four Gospels in their place' (quoted in Wright's *Syriac Literature*, 9). The older forms of the *Ev. da-Mĕpharrĕshê* seem throughout the fourth century to have been much less used than the Diatessaron, so that when the Peshiṭta was substituted for the Diatessaron in the public services, it practically had no rivals. Neither S_S nor S_C show any signs of having been prepared for church use. In a word, the Diatessaron was condemned; the *Ev. da-Mĕpharrĕshê* was antiquated.

The internal character of the Peshiṭta, as compared with that of the *Ev. da-Mĕpharrĕshê* confirms the view of their relation to one another which has been given above.

1. The style of the *Ev. da-Mĕpharrĕshê* gives an impression of great age. All the later Syriac versions, such as the Harclean, are marked by excessive literalness; but the *Ev. da-Mĕpharrĕshê* is less conventional and more idiomatic than the Peshiṭta. Certain particles also and idioms are found in the *Ev. da-Mĕpharrĕshê* which are avoided in the Peshiṭta and later Syriac writings.[2]

2. The subscriptions at the end of each Gospel in the *Ev. da-Mĕpharrĕshê* contain no more than '*Here endeth the Gospel of Mark*,' or '*of Luke*,' as the case may be. But to render Εὐαγγέλιον κατὰ M. more exactly the Peshiṭta has '*The* [*holy*] *Gospel, the preaching of M.*' Moreover, it is added in almost all codices of the Peshiṭta that Matthew composed his Gospel '*in Hebrew in Palestine*,' Mark '*in Latin at Rome*,' Luke '*in Greek at Alexandria the Great*,' and John '*in Greek at Ephesus*.' Similar statements are found in some Greek MSS of the Gospels. This peculiar rendering of κατά, and the insertion of these pseudo-bibliographical notices, when contrasted with the simplicity of the *Ev. da-Mĕpharrĕshê*, are by themselves enough to stamp the Peshiṭta as a later recension.

1 See F. C. Burkitt, *S. Ephraim's Quotations*, 57.

2 Such are the occasional use of the copula to introduce the apodosis of a conditional sentence (*e.g.*, Lk. 12 45 *f.* Ss Sc) and the occurrence of the word *'ōdh*, 'forsooth,' which is met with only in the oldest Syriac literature and has been consistently *expunged* in Sc by a corrector.

3. Although S_S and S_C usually agree closely with one another against the Peshiṭta text, and sometimes even stand alone together against all other critical authorities, they often differ in important readings.[1] But the MSS of the Peshiṭta hardly vary except in orthographical matters and other trifles. It is difficult to reconcile this fact with the priority of the Peshiṭta. If the two versions had existed side by side during the third century, it is not easy to see why the codices of the *Ev. da-Mĕpharrĕshê* should have been honoured by revision from the Greek, whilst the codices of the Peshiṭta were untouched.

The Peshiṭta has too many points of resemblance to the *Ev. da-Mĕpharrĕshê* to be considered an independent translation from the Greek. We must therefore regard the Peshiṭta as a revision of the previously existing *Ev. da-Mĕpharrĕshê*, just as the Latin Vulgate was a revision of an Old Latin text. For that reason Westcott and Hort quote the Peshiṭta as Syr.vg. The *agreement* of S_S and S_C may be conveniently indicated by Syr.vt. or the 'Old Syriac.'

The Greek text of the Antiochian revision (see §§ 7, 9) is usually followed by the Peshiṭta, where it differs from the Old Syriac; but to this rule there are some exceptions (*e.g.*, Mt. 11 19 22 13 Jn. 1 18). The revision of the Syriac NT was therefore made from a Greek MS such as Cod. Ephraemi (C) which retained some non-Antiochian readings in the midst of a fundamentally Antiochian text. It will be remembered that Rabbūla was the friend of Cyril of Alexandria, in whose quotations much the same state of things is found. At the same time there are readings in Syr.vg which definitely reflect the local Antiochian tradition (*e.g.*, the punctuation of Jn. 5 27 *f.*).

The only theory to account for the textual facts which has been advanced by defenders of the priority of Syr.vg to the *Ev. da-Mĕpharrĕshê* is that, on the suppression of the Diatessaron, a sudden demand may have arisen for copies of the Four Gospels. Scribes would then have made imperfect copies, full of phrases taken from Tatian's Harmony, two of which survive in Ss and Sc. This theory accounts for the marked resemblance of the *Ev. da-Mĕpharrĕshê* to the Diatessaron on the one hand, and to the Peshiṭta on the other. It does not account, however, for the numerous instances where Ss and Sc (or one of them) have a reading which is neither that of the Diatessaron nor of the Peshiṭta. Thus in Lk. 17 21 ('the kingdom of God is ἐντὸς ὑμῶν') the Peshiṭta has *within you*, the Diatessaron has *in your heart*, but Ss and Sc have *among you*. Other notable instances are Mk. 10 50 Lk. 4 29.

No hypothesis about the origin and mutual relations of early Syriac texts can stand, which does not account for the crucial fact that Mk. ends at 16 8 in Ss, although the 'last twelve verses' are found in the Diatessaron as well as in the Peshiṭta.

Of our two codices of Syr.vt S_S is in every respect a better text than S_C. The discovery of S_S has justified Hort's conjecture that S_C represents a form of the Old Syriac which has suffered 'irregular revision' from the Greek.[2] The best evidence for this is afforded by the presence in S_C of several conflate readings (*e.g.*, Mt. 5 18 Jn. 4 24).

The fact of this revision once established, it is reasonable to assign to the reviser the many passages where words and verses which are absent from S_S have been added in S_C. Thus the episode of the bloody sweat, the missing clauses of the Lord's Prayer in Lk., the long interpolation after Mt. 20 28, and the verse Mt. 21 44, are all found in S_C, though absent from S_S. The process of revision, however, was by no means thorough, for S_C agrees with S_S in omitting Mt. 16 2 3 17 21 18 11 Jn. 5 3 4, etc.[3]

1 The most striking instance is [Mk.] 16 9-20, which is read by Sc but omitted by Ss.

2 Hort, 118.

3 In Lk. 10 41 42 Ss has the shorter reading found also in all genuine Old Latin texts, viz., 'Martha, Martha, Mary has chosen the better part,' etc., omitting the γάρ after 'Mary' in

It might have been suspected that Ss had been corrected to a Greek text such as that of B by the *excision* of all these passages. But this suspicion is shown to be groundless by the fact that Ss contains several interpolations (notably one at the end of Lk. 23 42) which are especially characteristic of the Old Syriac, though found in no Greek MS. Had the passages which are wanting in Ss been deliberately expunged owing to their absence from certain Greek MSS, these other passages would have been rejected along with the rest.

The crucial problem in the history of the Old Syriac is its relation to the Diatessaron. There are two views conceivable.

27. Relation of 'Old Syr.' to Diatess.

1. That the Diatessaron was the original form in which the Gospel was circulated in Syriac, and that the *Evangeliôn da-Mepharreshê* (Syr.vt) was a later translation from the Greek; but the translation was much influenced by the text of the already existing Syriac Diatessaron.

2. That Syr.vt was the original form of the Gospel in Syriac; and that the Diatessaron was an independent work, originally composed in Greek (or Latin), but translated into Syriac as far as possible in the wording of Syr.vt, which it eventually superseded for church use.

A third theory, that the Diatessaron was a purely Syriac work, later than Syr.vt and compiled exclusively from it, can no longer be held since the discovery of the Sinai palimpsest.

The Diatessaron undoubtedly contained extracts from the 'last twelve verses' of Mk.,[1] which are absent from Ss and therefore from the earliest form of the *Evangeliôn da-Mepharreshê*. If the Diatessaron had been entirely based upon Syr.vt, we should have to assume that Syr.vt had been already *revised* by 170-180 A.D., the date of Tatian's return to the East. Besides, the theory that the Diatessaron was a Syriac work fails to account for the Latin *Codex Fuldensis* and allied documents.

An adequate discussion of the other two theories would far exceed the limits of this article, although it depends upon the conclusion reached whether we are to place the Old Syriac in the middle or end of the second century.

28. Conclusion.

It must suffice to say here, that the scanty historical notices of the early Syriac-speaking church contain nothing contrary to the first view (viz., that the Diatessaron preceded the *Evangeliôn da-Mepharreshê*) and much that confirms it.[2]

On this hypothesis we may conjecturally date the *Ev. da-Mepharreshê* about 200 A.D. and connect it with the mission of Pālūṭ, who was ordained bishop of Edessa by Serapion of Antioch.

The arguments in favour of the second view are chiefly based on the text of Ss. Some of the readings characteristic of that MS are quite contrary in tendency to what we otherwise know of Syriac Christianity, and that such a text should exist at all is a remarkable testimony to the essential faithfulness of the translator to the Greek text before him. The Diatessaron much nearer reflects the tendencies of the time. In fact, some things which we know to have stood in the Diatessaron almost read like a deliberate protest against the text of Syr.vt as represented by the Sinai palimpsest.

Tatian held Encratite views, and it accords with them that he left out the genealogies from the Diatessaron, and that Joseph is never called husband of Mary. This course is also followed in Sc (except so far as concerns the genealogies), and it harmonises with all we know of the Syriac-speaking church in the third century. But in Ss this tendency is altogether absent, to such an extent that the last clause of Mt. 1 16 is rendered '*Joseph, to whom was betrothed Mary the Virgin, begat Jesus which is called Christ*.'[3] Certain statements in Aphraates' Homily on the Genealogy of our Lord, and some comments preserved by Barṣalībī on Mt. 1 16 prove that these readings of Ss are not mere peculiarities of an isolated MS. On the other hand, Sc throughout the whole of the first chapter of Matthew's gospel presents a corrected text (except Mt. 1 20, '*to thee*'). The attempt which has been made to represent Ss as an heretical codex rests on no sure foundation, and the natural inference is that Syr.vt in its original form was characterised by a primitive innocence of offence in this matter (see Lk. 2 48).

The arguments which go to prove that the Armenian and Æthiopic versions were originally made from the Old Syriac are indicated elsewhere (see § 36 *f.*). It may be remarked that there is nothing to connect these versions with the Diatessaron. But if, as seems most probable, they were made from the *Evangeliôn da-Mepharreshê*, this circumstance affords another proof of its antiquity. If the *Evangeliôn da-Mepharreshê* were a novelty, hardly holding its own against the ancient and popular Diatessaron, it would scarcely have been chosen in preference to the Diatessaron for missionary translations.

On the first publication of Sc in 1858, Cureton brought forward arguments to prove that the Gospel of Mt. in Sc represented the original 'Hebrew' Gospel whilst the other Gospels were mere translations from the Greek. This wild theory found few defenders and is almost forgotten. But it was based on a perception that there is a difference of style between the various Gospels in the *Ev. da-Mepharreshê*. Lately Dr. A. Hjelt has collected the indications which show that the translation of the four Gospels does not come from the same hand, Mt. being the earliest and Lk. the latest to be rendered into Syriac (*Die altsyrische Evangelienübersetzung*, Leipsic, 1901). The theory is attractive and may very well rest upon a basis of fact; at the same time too much stress should not be laid upon irregularity of rendering as a proof of composite authorship. Only those who have tried to make a pedantically consistent translation of the Gospels can realise with what difficulty consistency is attained.

No MS of the Old Syriac version of Acts or of the Pauline epistles is known to have survived. That the Peshiṭta is not the original form of the Syriac version in these books also is proved by the quotations in Aphraates, and from the commentaries of Ephraim.

29. Acts and Epistles.

These commentaries are preserved only in the ancient Armenian translation, having no doubt fallen out of favour when the text on which they were based had been superseded by the Peshiṭta. In using these commentaries great care is necessary, as the biblical text appears sometimes to have been assimilated to the Armenian Vulgate. The quotations of Aphraates from the Pauline epistles are many; but those from Acts unfortunately cover only five verses.

The almost complete loss of the Old Syriac version, except for the Gospels, causes a serious gap in the apparatus of critical authorities for the text of the NT. It can be to some little extent supplied from the Armenian. Readings of the Armenian Vulgate which differ from the ordinary Greek text, especially if they are supported by the Peshiṭta, may be considered with some confidence to have been derived from the lost Old Syriac.

The *Catholic Epistles* and the *Apocalypse* formed no part of the Old Syriac version.[1] In the Peshiṭta this defect is partially supplied by a translation of James, 1 Peter and 1 John, in agreement with the usage of Antioch as represented by Chrysostom; but to this day the Syriac Vulgate does not include the Apocalypse or the minor Catholic epistles.

The Peshiṭta was firmly established for ecclesiastical use in the Syriac-speaking church at the time of the Nestorian schism, and has continued to be exclusively used by the Nestorian community.

30. Later Syriac versions.

Among the Jacobites (or Monophysite branch of the Syrians), however, two successive attempts were made to render into Syriac the full canon and the current text of the later Greek-speaking churches.

What appears to have been a revision of the NT

v. 42, as well as the words about the 'something necessary' in *v.* 42. In Sc the missing words are supplied to *v.* 41; but no particle is added after 'Mary' in *v.* 42, and thus the reviser's hand is betrayed.

[1] The same mosaic of Mt. 28 Mk. 16 and Lk. 24 is found in *fuld* as in the Arabic Diatessaron. Aphraates 120 mentions Christ's session at the right hand of the Father (Mk. 16 19) immediately after quoting Mt. 28 20.

[2] The public reading of the Diatessaron at Edessa in early times to the apparent exclusion of the Four Gospels, is implied in the *Doctrine of Addai* 36. For the date and historical value of this work, see L. J. Tixeront, *Les Origines de l'Eglise d'Edesse*, esp. 120 *ff.*

[3] [On the text of this verse cp MARY, § 13 (*a*).]

[1] *Addai* 46; 'The Law and the Prophets and the Gospel . . . and the Epistles of Paul . . . and the Acts of the twelve Apostles—these writings shall ye read in the churches of Christ, and besides these ye shall read nothing else.' Neither in Aphraates nor in the genuine works of Ephraim are there any quotations from Apoc. or Cath. epp.

Peshitta, supplemented by those books of the Greek canon which were lacking in Syriac, was made in 508 A.D. for Philoxenus, bishop of Mabbōg.

Whether any part of this revision of the Peshitta survives is doubtful:[1] but there is good reason to believe that the supplemental version of 2 Peter, 2 and 3 John, and Jude, which was first published by E. Pococke in 1630, and is generally bound up with modern editions of the Peshitta, belongs to the original Philoxenian. A MS of the Apocalypse in the same version has been discovered by Gwynn, who has published the text with full Prolegomena and critical notes (Dublin, 1897).

In the year 616 Thomas of Heraclea (Ḥarḳel), bishop of Mabbōg, made at Alexandria an elaborate revision of the Philoxenian which still survives in several MSS and is called the Harclean Version. It was edited by Joseph White at Oxford in 1778-1803 from a slightly imperfect MS; but the missing portion of Hebrews was at length supplied from a Cambridge codex by Bensly in 1889. It is not improbable that the version of the Apocalypse published in 1627 by De Dieu, and now commonly printed with the Peshitta, is a part of the work of Thomas of Heraclea.

The text of the Harclean version is remarkable for its excessive literalness,[2] and for the critical notes with which it is furnished. These notes contain the various readings of two (or three) Greek MSS collated by Thomas at Alexandria. In Acts these notes are of real importance, as one of the MSS must have contained a 'Western' text much like that of Codex Bezæ. The text of the Harclean version itself, as distinguished from these alternative or additional readings, is almost invariably that of the later Greek MSS.

The Syriac versions hitherto described have all been in the 'classical' Edessene idiom. It is customary also to reckon under 'Syriac Versions' the surviving biblical fragments in the 'Palestinian' dialect.

31. Palestinian version.

The Aramaic language is divided into two branches, the classical Edessene being the main example of the Eastern Aramaic, whilst Palmyrene and the various types of Jewish Aramaic (including Samaritan) belong to the Western branch. The dialect in which the Christian version described in this section is written is a variety of the Western Aramaic, almost identical with that of the later Galilæan Jews.[3] Its linguistic interest, therefore, is very great, for although it is a somewhat literal translation from the Greek, the language in which it is written comes nearest of all known Christian dialects to that spoken by Jesus and the apostles. See ARAMAIC, § 7 (col. 283).

The surviving documents can be traced to three sources: (1) the Malkite convent of S. Elias on the Black Mountain in the district of the *Dux* near Antioch;[4] (2) the convent of S. Catherine on Mt. Sinai; (3) a community, or communities, of Malkites settled in Egypt.

The MSS included under (1) appear to have been bought for the convent of S. Mary Deipara in the Nitrian desert in the thirteenth century, after the sack of Antioch by Bibars the Mameluke Sultan. They include the Vatican lectionary and the London fragments published by Land. The S. Petersburg fragments published by Land, which were brought by Tischendorf from the East, are almost certainly to be added to the MSS of class (2). Those of class (3) include the book of occasional offices now at the British Museum (Or. 4951), the *Praxapostolos* edited by Mrs. Lewis, and the fragments from the Cairo Genîza now in the Bodleian and the Cambridge University library.

For the Gospels we have fragments of four continuous codices:—

1. Land's *Petropolitanus antiquior* (7th cent.): 2. Land's *Petropolitanus recentior* (8th cent.), two leaves of which appear to be still at Sinai in *Cod. Iber.* 32;[1] 3. One leaf of B.M. Add. 14,450, published by Land (8th cent.); 4. Fragments of Mt. and Lk. from B.M. Add. 14,664, published by Land (11th cent.). Besides these there are three complete Gospel lectionaries, one at the Vatican and two at Sinai, besides fragments of at least two others at Sinai and London, all dating from the eleventh century. The Vatican lectionary (Vat. Syr. xix) has been well edited by Lagarde (*Evangeliarium Hierosolymitanum*, 1892). The Sinai lectionaries, together with the readings of the Vatican lectionary, were edited by Mrs. Lewis and Mrs. Gibson in 1899.

The rest of the NT is but imperfectly preserved. The very ancient Bodleian fragments of the Pauline epistles have been edited by G. H. Gwilliam (*Oxford*, 1893-6), and a small fragment of Galatians from Sinai by J. R. Harris. Land has edited Acts 14 6-13 from an ancient lectionary (see § 62). In 1895 Mrs. Lewis bought in Cairo a late MS (? 12th cent.) containing lections from all parts of the Bible except the Gospels, and in conjunction with Mrs. Gibson and Dr. Nestle published the text in 1897 as *Studia Sinaitica*, 6. The lections differ from those in Land's much older lectionary, and Mrs. Lewis' MS is distinctly stated not to have come from Sinai. It may have belonged to the same community that owned the very late MS of the Liturgy of the Nile, edited by G. Margoliouth (*JRAS*, Oct. 1896). This Liturgy contains a lesson from Acts 16; but the text is nothing more than an adaptation of the Peshitta to the Palestinian dialect.

The Palestinian documents exhibit a mixed text. The influence of the Peshitta is often apparent; but in the main the Greek is closely followed, so that even such Semitic names as Ἰησοῦς and Σίμων are transliterated *Isôs* and *Sîmôn*, not *Yēshû'* (or *Ishô'*) and *Shim'ôn*. The syntax, moreover, is so much assimilated to the Greek as to render the Palestinian version a very unsafe guide in the reconstruction of the original Aramaic of Gospel phrases.

The origin of this curious literature is still obscure; but the present writer has given reasons for connecting it with the efforts made by Justinian in the sixth century to extirpate the Samaritan religion and by Heraclius early in the seventh century to harass the Jews. An earlier date than the sixth century is not suggested either by the general course of history or by the character of the surviving documents. F. C. Burkitt's art. in *Journ. of Th. Studies*, 2 183 *ff.*, contains a full bibliography of the Christian Palestinian literature.

III. Coptic and other Versions

Egypt is the stronghold of 'non-Western' texts. The determination of the age of the Egyptian versions is therefore a problem of considerable interest for the general history of the text of the NT.

32. Coptic translation: date.

In Egypt 'the progress of Christianity was for a long time confined within the limits of a single city, which was itself a foreign colony; and till the close of the second century the predecessors of Demetrius[2] were the only prelates of the Egyptian church. Three bishops were consecrated by the hands of Demetrius, and the number was increased to twenty by his successor Heracles. The body of the natives, a people distinguished by sullen inflexibility of temper, entertained the new doctrine with coldness and reluctance; and even in the time of Origen it was rare to meet with an Egyptian who had surmounted his early prejudices in favour of the sacred animals of his country. As soon, indeed, as Christianity ascended the throne, the zeal of those barbarians obeyed the prevailing impulsion; the cities of Egypt were filled with bishops, and the deserts of Thebais swarmed with hermits.'[3] The date here assigned for the spread of Christianity in the country is borne out by the Life of S. Pachomius (§ 1), which puts the repentance of the nations as coming to pass after the persecutions of Diocletian and Maximin. Pachomius, the founder of organised monastic life, born

[1] See Wiseman, *Horæ Syriacæ*, 178 n.

[2] The same torturing of the Syriac idiom in order to express every particle of the Greek is found in the contemporary translation of the Hexaplar text of the LXX by Paul of Tella (see § 61).

[3] Dalman, *Gram. des Jüd.-Paläst. Aramäisch*, 33-40. The only locality in Palestine with which any of our documents can be definitely connected is *'Abûd*, a small town in lat. 32°, long. 35°, almost equally distant from Jaffa, Nāblus, and Jerusalem—*i.e.*, not far from the frontier between Judæa and Samaritan territory.

[4] The Malkites (or 'King's Party') are those Oriental Christians who did not become Monophysites or Nestorians, but remained in communion with Constantinople. The district of the Dux (τὸ Δούξ) is mentioned by Anna Comnena (*Alexias*, 13 12).

[1] The Sinai leaves are published in Mrs. Lewis's *Cat. of Syriac MSS*, App. pp. 118-120. They exactly agree in size and character with the leaves of Land's *Petropolitanus recentior*.

[2] Bishop of Alexandria, 189-233 A.D.

[3] Bury's *Gibbon*, 2 60, following Eutychius (*Annal.* 1 333) and Orig. *Cels.* 1 757.

in 285, was converted early in the fourth century, and established the Tabennitic monastery in Upper Egypt in 322. Such a community could not long be without the Scriptures in the vernacular, so that the earliest version in Egyptian cannot be later than the first quarter of the fourth century.

There is very little reason for placing it much earlier. The notices in Eus. *HE* 641 of the 'Egyptian' Alexandrians who suffered during the Decian persecution contain nothing to indicate that they formed a separate community, with a translated Bible and Liturgy. The Life of S. Antony is generally quoted as implying the existence of a Coptic version in the third century; but it is not easy to say how much may be built upon the details of the early part of Antony's career, as related by his biographer.[1] The evidence of the *Pistis Sophia* also is indecisive as to date. The *Pistis Sophia* is a Gnostic work of the latter half of the third century,[2] which survives in a very ancient Sahidic MS.[3] Most of the allusions in it to the Old and New Testaments are loose and paraphrastic. But several of the Psalms are quoted *by number* in full, almost word for word with the Sahidic version. We cannot, however, certainly infer from this that Sahidic is the original language of the book. The Sahidic version must be older than the *Pistis Sophia* as we have it; but the Psalms in question, which are all put into the mouths of the various apostles to illustrate the Gnostic teaching of Jesus, may have been added by the Sahidic translator with the view of commending the book to orthodox readers; their strict fidelity to the biblical text shows quite a different spirit from the free invention of the rest of the book.

As many as five or six Coptic dialects have been distinguished by modern scholars; but from the point of view of textual criticism the Coptic versions fall into three divisions:—the *Sahidic*, the *Fayyūmic*, and the *Bohairic*.

33. Three versions.

The Sahidic (Ṣa'idic) is the version of Upper Egypt (in Arabic *eṣ-Ṣa'īd*); it was formerly sometimes called the Thebaic version. The Fayyūmic version, formerly called 'Bashmuric,' is represented chiefly by documents coming from the Fayyūm; to this version belong also the biblical fragments in the 'Middle Egyptian' dialect, as in text they agree with the Fayyūmic, whatever the relation between the dialects may be. The fragment of a very ancient MS of the Catholic epp. in the 'Akhmīmic' dialect must be reckoned among Sahidic authorities for a similar reason. Some of the more ancient Sahidic MSS are Græco-Egyptian bilinguals, the Greek occupying the page on the left hand of the open book.

The version now in ecclesiastical use among all the Copts, or Christian Egyptians, is called by scholars the 'Bohairic.' This version was formerly named 'Coptic' and 'Memphitic'; but the latter term is now known to be inaccurate, whilst 'Coptic' is equally applicable to Sahidic or any other Egyptian dialect. The term Bohairic comes from the Coptic Grammar of Athanasius, Bishop of Cos (*Kōs*) in the Thebaid during the eleventh century. Athanasius recognised three dialects, *viz.*, 'Cairene Coptic, which is also that of Upper Egypt; Bohairic Coptic, which is named from the Bohaira; and Bushmuric Coptic, which is named from the Bushmûr.'[1] The Bushmuric dialect had already died out in the time of Athanasius, and it does not appear that the Bible had ever been translated into it. The 'Boḥaira' (*i.e.*, 'Lake') is not, as is sometimes stated, the Arabic for Lower Egypt (*el-Wajh el-Baḥri*) or for the Egyptian sea-coast; it is a district near Alexandria between Lake Mareotis and the W. arm of the Nile.[2] The Bohairic version is therefore almost certainly of Alexandrian origin. The dialect in which it is written became, later, the *ecclesiastical* language of Cairo; but this change occurred only after Coptic had ceased to be the speech of the people in Lower Egypt, and it was probably caused by the removal of the Coptic patriarch from Alexandria to Cairo.

The earliest surviving codices of the Bohairic NT of which the date is known with certainty are of the twelfth century, though some fragments are probably as early as the ninth.[3] They are often accompanied by an Arabic translation; but there is no instance of a Græco-Bohairic MS. All appear to present the same type of text, the chief variation being the presence or absence of certain interpolations derived from the great vulgates of the East—*i.e.*, the 'Antiochian' Greek text and the Peshiṭta.[4]

The Bohairic version was known in Europe for a considerable period before any form of the Sahidic. It was long assumed to have been the earliest version of the NT in any Egyptian dialect, and this opinion is still maintained—*e.g.*, by A. C. Headlam in the fourth edition of Scrivener's 'Introduction.' Many scholars, however, consider the Bohairic to be an altogether later recension. The most thoroughgoing exponent of this view is Guidi, whose argument in the *Nachrichten von der K. Ges. der Wissenschaften*, Göttingen, 1889, pp. 49-52, is reproduced in the following paragraphs.

34. Age of Bohairic and Sahidic.

Guidi considers that the use of the various Coptic dialects as literary languages was in great part a reaction against the foreign Greek element. The true Egyptians hated foreigners and Alexandrians, and the diffusion of Christianity would be favoured rather than retarded by the dislike of the Imperial Roman authority which was persecuting it.[5] We may add that this dislike did not cease when the Empire became Christian. When the Emperors were Arian, Egypt was Orthodox; when the Emperors became Orthodox, Egypt became Monophysite.

The foreign and Greek element was comparatively strong in Lower and Middle Egypt; but in Upper Egypt it was weaker, and so the native Egyptian characteristics made their presence felt more quickly there in any new movement. Hence it is that the first beginnings of Coptic literature are found in Upper Egypt (where also, for analogous reasons, Coptic maintained itself as a living language longer than in the Delta). These early products of Egyptian Christianity, whether originals or translations, contain a purely Egyptian element. Such, for example, are the *Pistis Sophia*, the Bruce papyrus, and other Gnostic writings, all of which show traces of the ancient beliefs and

1 Antony died at an advanced age in 356. The received date of his birth, viz. 250 A.D., appears to depend upon the fact that shortly before his death he claimed to be 105 years old, but such statements from the mouth of illiterate men are rarely to be trusted. S. Antony could neither read nor write, and could not speak Greek. 'My book,' he is reported to have said, 'my book is the Book of Nature (ἡ φύσις τῶν γεγονότων), and that is present whenever I wish to read the words of God' (Evagrius, ap. Migne, 40 1249). The statements in the Life of S. Antony (§§ 2 and 3), even if we accept the details of the story, imply no more than that *two isolated sayings* of Jesus were forcibly brought to S. Antony's mind, and upon these he built his whole theological system. Many illiterate Roman Catholics, who may have never heard the Gospels except in Latin, know that Christ said 'Sell that thou hast and give to the poor,' and 'Be not anxious for your life.'

2 See Harnack, *TU* vii. 2 94 *ff.*; Amélineau, *Pistis Sophia*.

3 Both Harnack and Amélineau hold that Greek was the original language of the *Pistis Sophia*.

1 The original Arabic text is given by Quatremère, *Récherches*, 21. A later form of Athanasius' statement is given by Stern, *Z. f. Æg. Sprache*, 16 23 (1878), in which the Bohairic is claimed as the Cairene dialect, and the Sahidic is said not to be current N. of Minieh. *El-Bushmûr*, not *Bashmûr* is the Arabic name of a district near Damietta (Yāḳūt 1 634).

2 The modern *Beḥēra* (Yâḳût 1 514).

3 In Lord Crawford's Catena (Parham MS 102), edited by Lagarde, the exposition is translated from Greek writers; but the Gospel text is that of the Bohairic version. This MS is dated 888 A.D. A facsimile is given in Kenyon's *Introduction*.

4 See the passages in square brackets in Lagarde, *Die Vier Evangelien arabisch* (1864), and the critical notes which belong to them.

5 Diocletian's action in Egypt was not directed against the Christians alone (cp Gibbon, 1 363-365).

superstitions of heathen Egypt. The school of thought represented by these writings is quite out of touch with the orthodox Christianity of the Greek church of Alexandria, and would not long be content to have the Scriptures only in Greek. Thus the Sahidic version is probably of considerable antiquity; it can be traced back, as we have seen, to the early part of the fourth century.

To allow the national Coptic element to come to the front in Lower Egypt, where it was less powerful than in Upper Egypt and where the centre of government and of the church was situated, required a longer interval of time. In the end, however, it was remarkably helped by the Monophysite heresy. It is well known that after the death of the Emperor Anastasius (518 A.D.) and the repression of the heresy in Syria, Egypt became the true home of Monophysitism. From that time Egyptian Christianity detached itself more and more from Byzantine Christianity and the Greek church, and under these changed conditions there grew up a new Coptic literature written in Bohairic (the Coptic dialect spoken in the neighbourhood of Alexandria), comprising translations of the Bible from the Greek and of many other writings. It was probably at the same period that popular Egyptian legends, such as the death of Joseph, were adapted into Bohairic from the Sahidic.[1]

Coptic is generally supposed to have become a literary language somewhat earlier; but that is not supported by historical evidence, nor can it be proved from the documents we possess. These show us that down to the sixth or the seventh century the official written language of Egypt was Greek. With this accords the fact that the most ancient writings connected with Egyptian Christianity—the original of the Bruce papyrus, the Life of S. Macarius, the Rules of S. Pachomius, etc.—were all in Greek. Antony did not know Greek; yet the Coptic letters attributed to him and published by Mingarelli (pp. 198, 201) are translated from the Greek.[2]

An additional reason for assigning a late date to the Bohairic version and literature is the rapid decay both of the Coptic language and of Christianity in Lower Egypt after the Arab invasion. By the tenth century Coptic was almost as dead a language in the Delta as Greek (see Schwartze, *Copt. Gram.* 10), though as late as the time of Makrizī, in the fifteenth century, the Sahidic dialect was still used in Upper Egypt. The entire absence of native exegetical literature is also inconsistent with the assumed antiquity of the Bohairic. In Lagarde's *Catena* more than thirty 'Fathers' are quoted—all Greek. Can one imagine (to take a parallel from another Eastern church) a *Syriac* Catena on the Gospels without one extract from Ephraim or Philoxenus or Jacob of Serūg?

35. Three versions compared.

The three chief forms of the Egyptian NT—the Sahidic, the Fayyūmic, and the Bohairic, are not independent. A comparison of the passages where all three forms are extant brings to light three peculiarities of the Bohairic:

1. *Greater faithfulness to the Greek.* The Bohairic contains a representation of nearly all the particles of the original, which are often omitted by the other Egyptian versions; it also often reverts to the Greek order of the words.

2. *A different choice of Greek words to be transliterated.* The Bohairic is especially distinguished by vernacular renderings for abstract substantives. Perhaps words such as πίστις, χάρις, σοφία, ἐξουσία, had acquired a heretical and 'Gnostic' signification.

3. *Where the Bohairic follows a different Greek reading from the others it is almost always a specifically 'Alexandrian' reading.* The textual character of the Bohairic thus fits in with the date assigned to it by

[1] See F. Robinson, *Coptic Apoc. Gospels*, T. and S. 4 2, p. xvi

[2] Guidi, 51.

Guidi. Its chief allies are Cod. Regius (L) of the Gospels, a MS probably written in Egypt in the eighth century, and among the Fathers not so much Clement and Origen as Cyril of Alexandria.

In all this a close parallel is afforded by the Harclean Syriac, itself the work of a Monophysite living near Alexandria at the beginning of the seventh century. The great difference between the general type of Greek text represented by the Bohairic and by the Harclean is due rather to the difference of their ancestry than to their final revision.

The Fayyūmic version occupies a very peculiar position between the Sahidic and the Bohairic. In the Pauline epistles, indeed, the Bohairic separates itself so much from the other two as practically to become an independent version; but in the Gospels the Fayyūmic stands much nearer the Bohairic. The general turn of the sentences and the Egyptian vocabulary are the same in both versions, though the Fayyūmic is careless of the connecting particles of the Greek, which here as elsewhere have been industriously supplied in the Bohairic. In essentials, therefore, the official Bohairic recension preserves in the Gospels an Egyptian text somewhat older than itself. Unfortunately, the date of the Fayyūmic version is unknown, and its relation to the Sahidic obscure.[1]

The 'Antiochian' Greek text seems never to have influenced Egypt—at least not before the tenth century. Freedom from specifically Antiochian readings is a characteristic of all forms of the Egyptian NT. The relation of the Egyptian versions to the 'Western' text is more complicated. All Egyptian texts are predominantly non-Western; but a few very striking 'Western' readings and interpolations are found in the Sahidic,[2] yet not as a rule those which were most widely spread in later texts.[3] In Acts also, there is in the Sahidic a decided 'Western' element; but it is by no means so large as that, for instance, of the margin of the Harclean Syriac. Blass (p. 29) puts the Sahidic among the numerous 'mixed' texts of Acts, and it seems probable that it had this character from the beginning.

Even more interest attaches to the many readings where the Sahidic supports ℵ or B, or both, where these great MSS stand almost alone.[4] Here again, the version must faithfully have preserved its original form, as these readings are usually found also in the fragments of the Græco-Sahidic bilinguals.[5] We learn, therefore, from the evidence of the Sahidic version that a text similar in essentials to that of ℵ and B, though slightly more 'Western' in character, was current in Egypt about the beginning of the fourth century.

The full Greek canon is represented both in the Sahidic and the Bohairic; but the Apocalypse seems to have been regarded as non-canonical, and is never bound up in the MSS with the rest of the NT. Acts is placed *after* the Catholic epistles. In the Pauline epistles, Hebrews follows 2 Thess. in Bohairic MSS; but in the Sahidic and the Fayyūmic it follows 2 Cor.

[1] A curious point of contact between Fayyūmic and Bohairic MSS is that the same contractions for 'Lord' and 'God' are found in both, whilst in Sahidic the words are always written out in full.

[2] Prominent among them is the interpolation about the great stone in Lk. 23 53, with which is connected the longer form of Lk. 24 1 2. The only non-Egyptian evidence for this reading is D *c*.

[3] *E.g.*, '*Nineue*' for the name of the rich man in Lk. 16 19; comp. 'ille Fineus diues' in *de Pasch. Comp.* 265, and 'Finees inmisericordis diuitis' in *Priscillian*, 91.

[4] *E.g.*, Mt. 3 14 (om. Ἰωάννης); Mt. 6 8 (add. ὁ θεός).

[5] See, *e.g.*, Lk. 10 24 23 34*a* 36 Jn. 8 57, in the fragments published by Amélineau (*N. et Extr.* 34). It should be noticed that Græco-Sahidic bilinguals are generally written with two columns on a page, the Greek occupying the whole of the *verso* and the Sahidic the *recto*, so that of the four columns visible at the open page, the two on the left are Greek, and the two on the right are Egyptian. The Greek and the Sahidic agree column for column, but not line for line, and the two sides of the codex now and then support different readings—*e.g.*, in Jn. 6 33, the Sahidic side of T reads ὁ τοῦ θεοῦ with ℵD against its own Greek.

TEXT AND VERSIONS

In an article of this kind it is almost impossible to indicate the printed texts of the *NT* in the various Egyptian dialects, which (apart from early editions, now antiquated) lie scattered in periodicals such as the *Zeitschrift für Aegyptische Sprache.* Complete lists of editions and MSS will be found in Scrivener (4th ed. [by A. C. Headlam]), 2 106-123, 127-136, 140-144. For the official Bohairic by far the best edition is the Oxford text edited with translation and critical apparatus by G. H[orner], vol. i. *f.* Gospels, 1898; vol. iii. Acts and Epistles (shortly).

The first mention of an Armenian church dates from the episcopate of Dionysius of Alexandria (248-265), concerning whom Eusebius relates that he wrote a letter to the Armenians, and that their bishop was named Meruzanes.

36. Armenian version.

Gelzer (*Die Anfänge der armenischen Kirche*) believes that this community lived in Azerbaijân; but in any case there can be little doubt that it was evangelised by Syriac-speaking missionaries, and that its ecclesiastical language was Syriac. An Armenian version does not appear till much later. Tradition ascribes the work to Isaac and Mesrob (*fl.* 400); but, as Armitage Robinson remarks, the accounts 'combine a certain conflict of assertion with a suspicious family likeness' (*Euthaliana* 72). He adds: 'One fact which seems to stand out distinctly after the perusal of these puzzling statements is that the earliest attempts at translating the Scriptures into Armenian were based on Syriac codices,' and goes on to show (pp. 76-91) that there are still unmistakable traces of the primitive renderings from the Syriac in the existing Armenian Vulgate. The Syriac text which was employed was not the Peshitta but the Old Syriac, both in the Gospels and in the Epistles. About the middle of the fifth century this primitive version was thoroughly revised from the Greek, so that it is only here and there that we can recognise the original groundwork. The Greek text by which the revision was made was apparently not the Antiochian, but one akin to Bא; the readings of the Armenian which are attested neither by Syr. vt nor by Bא are very few and may have come from chance corruption in later times.[1]

The only critical edition of the Armenian version is that of Zohrab (NT, Venice, 1789). A useful abstract of the native traditions about the Armenian version, with lists of some ancient MSS, is to be found in F. C. Conybeare's article in Scrivener (4th ed. 2 148-154).

Old Armenian MSS of the Gospels usually omit [Mk.] 16 9-20 altogether; those which retain the verses make a break at *v.* 8, giving the colophon *Gospel of Mark* both after 16 8 and after 16 20. F. C. Conybeare (*Expositor*, 1893, pp. 242 *ff.*), however, discovered at Etchmiadzin a codex of the Armenian Gospels, written in 989 A.D., which contains the disputed verses with the rubric *Ariston Eritzu* ('Of the Presbyter Aristion'). A photograph of the page containing Mk. 16 8 *ff.* is given in Swete's *St. Mark*, p. civ. The inference is that the scribe of the MS, or of its archetype, had access to a tradition that Aristion, the friend of Papias mentioned in Euseb. *HE* 3 39, was the man who added the verses at the end of the second Gospel. This would seem to be some fifty years too early, if other indications are to be trusted. In any case, the readings of the codex should be published in full, as alone among Old Armenian MSS it contains the story of the Woman taken in Adultery, but in a form quite different from any other authority (Conybeare in *Expositor*, Dec. 1895).

The version in Ge'ez, the classical language of the Abyssinians, is usually cited as the 'Æthiopic.' Abyssinian Christianity is said to go back into the fourth century; but the existing version is not older than the fifth or the sixth century.

37. Ethiopic version.

The translation was from the Greek; but it has been proved by Guidi (*Le Traduzioni degli Evangelii in Arabo e in Etiopico*, Rome, 1888) that many of the existing MSS, which are all very late, represent later revisions made from the mediæval Arabic text current in Alexandria.[1]

A few traces survive of a yet older Ethiopic version of the Gospels, made from the Syriac, as in the case of the Armenian version. The Aramaic colouring of the vocabulary of the Ethiopic NT has been pointed out by Gildemeister (Tischendorf's *NT* 3895 note), and the text now and again agrees with Syr. vt against almost all other authorities, though it usually follows the Greek or the Arabic. Thus in Mk. 10 50 it reads ἐπιβαλών for ἀποβαλών, supported only by cod. 565 and by Ss. (*not* by the Diatessaron).

The Ethiopic NT was printed at Rome in 1548-9; this edition was repeated in Walton's Polyglott, and has been carefully rendered into Latin (C. A. Bode, Brunswick, 1753). Another edition was prepared by T. Pell Platt for the British and Foreign Bible Society in 1830.

The remaining versions of the NT are of much less importance for the text. The Gothic version dates from the middle of the fourth century. It is the work of Ulphilas (*Wulfila*, 'Little Wolf'), the apostle of the Goths, and so is the earliest surviving literature in any Teutonic language.

38. Gothic version.

Ulphilas worked among the Goths of the Danubian Provinces; but the surviving documents all appear to belong to N. Italy and the age of the Ostrogoths or even of the Lombard conquest. Of the NT we have the Gospels and Pauline epistles (except Hebrews), but with many gaps, well edited from MSS of about the sixth century.

The Gothic, unlike the Armenian and the Ethiopic, has hardly any link of connection with the great ante-Nicene versions and so for critical purposes is of less value. For the influence of the Gothic on some late Old Latin texts see above, § 16. The MS of Romans cited as *gue* (or *guelph*) is a Latino-Gothic bilingual; the Latin appears to be entirely dependent on the Gothic text. Here and there the Gothic MSS seem to have taken over O. Latin readings (*e.g.*, Lk. 1 3), in the same way that the Latin cod. *f* has been influenced by the Gothic.

The *Georgian* (or *Iberian*) version shows signs of having been originally made from the Old Syriac, like its sister the Armenian (F. C. Conybeare in *Amer. Journ. of Theology* 1883 *ff.*). The *Slavonic* version, of the ninth century, is made from the Greek and is too late to represent any ancient type of text not otherwise preserved.

39. Other versions.

Arabic versions from the Syriac and the Greek can be traced back to the eighth and the ninth century; but the current Arabic is essentially a translation of the Bohairic Coptic, interpolated from the Greek and Syriac Vulgates. Its sole claim to our attention here is that Guidi has recognised it as the source from which the far earlier Ethiopic has been corrupted.

Just as in the East late versions were made from the Greek and Syriac Vulgates, so in the West there are various translations into Anglo-Saxon, Frankish, etc., from the Latin Vulgate. All these secondary translations contribute nothing for the criticism of the original text of the NT because the Greek, Latin, and Syriac Vulgates can be accurately constructed from earlier authorities.

II. OLD TESTAMENT

A. The Massoretic Text

All MSS of the Hebrew OT are copies, more or less full and accurate, of a single critical edition commonly called 'the Massoretic Text.' This edition, like other critical works, contains a *Text*, a *Punctuation*, and *Notes*.

40. Massoretic text.

'Massora' means tradition, and the unknown editors only profess to give the traditional text, as it was traditionally recited in the synagogue. The date of the Massoretic edition must be placed somewhere between the fifth and the eighth century of our era. Jerome knew nothing of any system of vocalisation in Hebrew MSS; the present system must have been introduced later than the beginning of the fifth century; an inferior limit is set by the existence of Massoretic codices as old as the ninth century.[2] (On the Samaritan text of the Pentateuch see § 45.)

[1] *E.g.*, in Mt. 1 7-8 the Armenian has ἀσάφ with Bא, against the Antiochian Greek text on the one hand, and all forms of the Syriac on the other.

[1] Possibly a reminiscence of this revision has been preserved in the *Encomium* of Abba Salama published by Ludolf in 1691 *Commentarius*, p. 295.

[2] Systems of vocalisation similar in principle are now used for Syriac and classical Arabic. All three systems must have a common origin, and may have been indirectly a result of the Mohammedan conquest and the consequent spread of the Arabic language in a vulgarised form. Before the seventh century

TEXT AND VERSIONS

1. The *Text* of the Massoretic edition consists of the consonants of the Hebrew (cp WRITING, § 7), which are, however, divided into words.

According to the Jewish view this alone is 'Scripture,' and in theory it is complete by itself without further punctuation or vocalisation. The extant MSS, none of which are older than the ninth century, give the consonantal text adopted by the Massoretes with great fidelity; throughout the forty-eight chapters of Ezekiel only sixteen real variations occur between a modern edition based ultimately on Western MSS and the 'Codex Babylonicus Petropolitanus' (916 A.D.), a newly discovered MS of wholly Eastern ancestry. Yet, as will be shown later, this consonantal text is frequently corrupt, so that the agreement of our MSS only enables us to reconstruct their common exemplar and affords no proof whatever that this exemplar faithfully represented the lost original as it left the author's hands.

The leather rolls used in the synagogue contain no vocalisation; but their full agreement with the pointed codices proves that they also are only transcripts of the official Massoretic text.

41. Vowels.

2. The Massoretic *Punctuation* serves what we are accustomed to consider the double purpose of vocalisation and accentuation. Each word is provided with 'points' and one or more 'accents, the points indicating the vowels that are to be supplied to each letter, whilst the accents indicate the inflections of the voice, telling the reader what pause, if any, is to be made on the word, and thus forming a complete system of punctuation in the English sense of the term. These additional signs also are given with considerable accuracy in the MSS, though there is a certain amount of variation in the case of the subordinate accents.

The value of the whole system as a kind of grammatical commentary on the Hebrew Scriptures can hardly be over-estimated. So well is the vocalisation carried out, that there are very few places where the text can be emended by altering the points and leaving the consonants as they stand. In fact, the Massoretic pointing may even be used as a means of discovering errors in the text. The Massoretes did not make a critical revision; they only supplied traditional vowels to the traditional consonantal text; where the consonantal text was corrupt, really suitable vowels could not be placed. As a general rule, therefore, anomalous pointing in our Hebrew text is a sign that the consonants are wrong.[1] The chief exceptions are to be found in places where theological or national prejudice appears to have influenced the punctuation. Even there, however, the false readings are hardly ever novelties; they are the perpetuation of old and popular errors.[2]

42. Notes.

3. In addition to text and punctuation the Massoretic edition includes critical *Notes*, which occupy the margins of our copies. Some of these notes draw attention to anomalies of vocalisation, or what might seem to be such, thereby fulfilling the same purpose that we express by putting *sic* after a word; others form part of a vast system of 'marginal references' and computations intended to preserve the absolute integrity of the Massoretic standard.[3] For textual criticism, however, the most interesting of these notes deal with passages where the Massoretes against their usual custom have deserted the reading of the text. Not that even in such cases they have dared to change the written Word (*Kĕthībh*); the consonantal text remains unaltered, but the vowels supplied to it are those of the emended consonantal text, which appears only on the margin, followed by the word *Ķĕrē* ('to be read').

A certain number of these alterations refer to the spelling or pronunciation of grammatical forms, of which the *Kĕthībh* has often preserved the older type, especially in the Aramaic portions of Daniel and Ezra. But where it is a question of real variation of reading there can be no doubt that the *Kĕthībh* was simply supposed to be corrupt, and the *Ķĕrē* was a more or less successful *conjectural emendation*. Thus we come to the very important conclusion that the Massoretic text itself is, in parts at least, ultimately based on a single faulty MS; when we find in Ezek. 48 16 'five five hundred' in the text, not corrected, but with a marginal note to read 'five' only once, we cannot but conclude that here at any rate the editors had been reduced to following a single MS in which 'five' had been written twice over by mistake.[1]

Few scholars will suppose that the *Ķĕrē* readings cover all the corrupt passages in the Hebrew text. They are simply the passages where the mistake was most patent and the remedy nearest at hand. It is only likely that we should find corruptions in the ancient literature of the Jews, literature written in a dead language and relating to vanished national and social conditions, circulating among a people whose seats of learning were again and again broken up by political misfortunes (see further, § 66).

But in whatever condition the text underlying the Massoretic edition may be, criticism has to start from it. The direct evidence takes us no farther, and the only quarter from which we can hope for an improvement of the Hebrew text (apart from conjectural emendation) is the study of the ancient versions. From these we may at least learn something of the history of the text back to the second or the third century B.C.

Since the above was written some fragments of papyrus, containing the ten commandments, followed by the *Shĕma'* (Dt. 6 4 *f.*) in Hebrew, have been edited by S. A. Cook in *PSBA* (Jan. 1903). The appearance of the papyrus and the very remarkable handwriting, which presents striking resemblances with the Palmyrene character, point to a date not later than the second century A.D. The text agrees in several instances with the Septuagint against MT. It is possible, therefore, that further discoveries may one day enable us directly to control the Massoretic tradition.

43. Editions.

The three chief pointed editions of the Hebrew text are the Bomberg Folio, published in Venice 1525-6, the Mantua Quarto with Norzi's commentary 1742-4, and the octavo edition of Van der Hooght, 1705. The last is the parent of the ordinary reprints. The Bomberg edition is the work of Rabbi Jacob ben Ḥayyim, and contains, besides Rabbinical commentaries and the Targums, a vast collection of Massoretic material there brought together for the first time. Of modern editions that of Baer-Delitzsch is to be noticed for its correctness and the fulness of its Massoretic notes. C. D. Ginsburg also may be mentioned; his *Massora* (now nearly completed) will contain the entire apparatus, with indices.

In addition to canonical Scripture there was a considerable body of pre-Christian Hebrew literature; but this has altogether perished, or is only known by translations into Greek, etc. Such for instance is the First Book of the Maccabees, the Book of Enoch, and others (see APOCRYPHA, APOCALYPTIC).

A fragment of this literature in the original Hebrew was brought to light in 1896 by the discovery of part of a MS of the Wisdom of Jesus the son of Sirach (בן סירא), commonly called *Ecclesiasticus*.[2] Fragments of other MSS have been discovered in the following years. It is still disputed to what extent these MSS preserve the original text, as they seem to have been corrected in places to agree with the Syriac and with the Greek,

other systems of partial vocalisation, such as the introduction of the 'matres lectionis' and in Syriac the diacritical point, had been employed in Semitic writing where a purely consonantal alphabet had been found too ambiguous.

[1] Illustrations of this statement will be found, *e.g.*, in Dt. 33 21 1 S. 16 9 Is. 9 6 (7), Ezek. 28 12 Mi. 2 8.

[2] Thus the Hebrew oath was by the life of the person sworn by (*e.g.*, Gen. 42 15 *f.* Amos 8 14); but in swearing by the true God this is altered into a predication of His Being. Hence the impossible mixed formula 'As the Lord liveth, and by the life of thy soul' (1 Sam. 20 3, etc.). But this mixed form is as old as the Targum. For other instances, see col. 5029.

[3] Some of these lists and calculations form separate works, such as the tract *Ochla*, and are no doubt in part older than the written vowel-points and the Massoretic edition. For a full description of the methods used in the Massoretic Notes see Wellhausen-Bleek, *Einleitung*, § 277.

[1] In any given variation it is of course quite likely that the copies used by the Massoretes had not fallen into the error for the first time, but were slavishly repeating the originally accidental error of a single MS.

[2] See ECCLESIASTICUS, § 4; SIRACH.

whilst in other places the newly-recovered Hebrew differs widely from both versions. See ECCLESIASTICUS, § 4 *f.*, and especially SIRACH. The extensive variations between the Hebrew MSS and the ancient Greek and Syriac versions show the dangers to which Hebrew works were exposed in transmission unless artificially preserved by rules such as those observed by the Massoretes; they also illustrate the freedom used by the ancients when translating profane literature.

B. VERSIONS

The age and character of the versions of the OT are so different that it may be well to prefix a list of them, arranged roughly in chronological order, to the more detailed examination which follows:—

44. OT versions.

1. The *Samaritan* (Heb.) Pentateuch (§ 45) and the Samaritan (Aram.) Targum (SAMARITANS, § 5 *a*), the origin of which goes back to 400 B.C.

2. The ancient *Greek* version, commonly called the *Septuagint* (§§ 46 *f.* 51-55). Parts of it date from the third century B.C.; but other portions are not so ancient, and the whole has been much revised and altered in later times. This is the OT of the Greek church. There are valuable subsidiary translations of the Septuagint into *Latin* (§§ 56-58), *Coptic* (§ 63), *Ethiopic* (§ 64), and *Armenian* (§ 64), from the second to the seventh century A.D.), and at a later period into *Syriac* (§ 61 *f.*), *Arabic*, *Gothic*, etc. (§ 64).

3. The *Targums*, paraphrases of the Hebrew OT in the various dialects of Jewish Aramaic for use in the synagogue. Their origin goes back to before the Christian Era; but their extant form was fixed at a much later period (§ 65).

4. Later Greek translations of the Hebrew Scriptures, made during the second century A.D. by Jews or Jewish-Christians named *Aquila* (§ 46), *Symmachus* (§ 47), and *Theodotion* (§ 48).

5. The *Syriac* version, commonly called the *Peshiṭtā*, a translation from the Hebrew, of unknown age but certainly earlier than the fourth century A.D. (§ 60),

6. The new *Latin* version made by Jerome at the beginning of the fifth century A.D., now known as the *Vulgate* (§ 54).

It will be practically convenient to describe these versions of the OT under the languages in which they are found, irrespective of the character of the text.

The 'Samaritan Pentateuch' is not a version; it is the Hebrew text of the 'five books of Moses' as preserved by the Samaritan community.

45. Samaritan Pentateuch.

The Samaritans were a mixed race settled in the country round Samaria. They had been willing to join the Jews in rebuilding the temple after the return; but when the Jews refused their help they became bitterly hostile, and Samaria formed a permanent asylum for those who left or were driven out by their co-religionists in Jerusalem. About 333 B.C. one of these refugees, a certain Manasseh, grandson of the high priest Eliashib (Neh. 13 23-31; Jos. *Ant.* xi. 7 8), obtained leave from Darius Codomannus to set up a temple on Mt. Gerizim, and it is highly probable that along with the temple ritual he brought with him the then canonical Jewish Scriptures—*i.e.*, the Book of the Law in Hebrew.[1] This alone forms the Scriptures of the Samaritans. It is written, like all their books, in the 'Samaritan' character, which is the direct descendant of the old Hebrew writing. The dialect spoken by the Samaritans was a variety of western Aramaic (see ARAMAIC, § 8; SAMARITANS, § 5 *d*), into which at some period was made a translation of the Pentateuch known as the Samaritan Targum (SAMARITANS, § 5 *a*); there is also found in Samaritan MSS an Arabic translation made about the eleventh century A.D., at a time when the Samaritans, like the rest of the peoples of Syria, had adopted the Arabic language. See SAMARITANS.

The Samaritan Pentateuch had from the beginning certain intentional adaptations to fit it to the new worship, as the command to build an altar on Mt. Gerizim inserted after Ex. 20 17, and the interchange of Ebal and Gerizim in Dt. 27 4. Characteristic also of the Samaritan Pentateuch are certain long interpolations from parallel or semi-parallel passages (*e.g.*, at Ex. 20 19 *ff.* from Deut. 18, and in Nu. 20 *f.* from Deut. 1-3), and in some places anthropomorphic expressions are paraphrased, much as in the Targums.[1] On the other hand it has, presumably, escaped the corruptions which have befallen the purely Jewish line of transmission since the fourth century B.C., whence now and then it agrees with the Septuagint in preserving words and letters which have dropped out of the Massoretic text.[2] There is nothing, however, to show that the roll or rolls carried off by Manasseh contained a recension in any way superior to those then current in Jerusalem; in fact, the Samaritan shares with all other extant forms of the Pentateuch some clear palæographical corruptions, such as שְׁפִי, Nu. 23 3, מטל, Deut. 33 13, ספן ויתא, Deut. 33 21 (see § 66).

The main thing, therefore, to be learnt from the Samaritan recension is that about the year 333 B.C., less than a century after Ezra, less than a century after the Torah in its present form had become once for all the Law-book of the Jewish church, the text of the Pentateuch was read substantially as we read it now.

The Samaritan Pentateuch and Targum were first printed by J. Morinus in the Paris Polyglott (1632) from a MS brought to Europe by Pietro de la Valle. This was repeated in Walton's Polyglott (1657), and the Hebrew text separately printed in 1790. Bagster's Polyglott contains a collation of this edition with the ordinary printed Hebrew. Cp SAMARITANS, § 5 *a*.

I. GREEK

46. Septuagint: origin.

Earliest among the versions properly so-called, perhaps the earliest translation of any considerable body of literature into a totally different language, is the ancient Greek version commonly known as the Septuagint. According to the constant tradition of the Alexandrian Jews the Law was translated into Greek in the reign of Ptolemy Philadelphus (284-247 B.C.) at the instigation and under the patronage of Demetrius Phalareus the librarian of the Alexandrian Library. One of the two authors from whom we gather this is Aristobulus of Alexandria, a Jewish philosopher of the second century B.C.; the other is a Jewish writer of the Ptolemaic period who composed under the name of Aristeas, a courtier of Philadelphus, a fictitious account of the origin of the version. Aristobulus (*ap.* Clem. Alex. *Strom.* 1 342 and Eus. *Praep. Ev.* 9 6 13 12) maintained that Pythagoras and Plato derived their philosophy from Moses, whilst the object of the pseudo-Aristeas (HISTORICAL LITERATURE, § 19, vi.) appears to have been to represent the Greek version of the Law as having been undertaken with the express approval of the high-priestly circles in Jerusalem. These authors had no object in asserting that the version had been made about 280 B.C. under distinguished heathen patronage—such a representation must have stood in their way; we may therefore assume that it was a historical fact of which they were obliged to take account.[3] The name *Septuagint* comes from the story given by pseudo-Aristeas, and variously embellished by later writers, that the translation was made by seventy men (or seventy-two, six from each tribe), who all agreed in their renderings.

It will be noticed that these stories refer exclusively to the Pentateuch, to which alone the name Septuagint (LXX) properly belongs. But the whole Greek OT is now comprehended under this term, by a convenient if unhistorical usage, which goes back to the time of Origen.

The other books of the OT had an even less official origin than the translation of the Law. They seem to have been turned into Greek by different hands at various times from the middle of the third century B.C.

[1] It is not unlikely that the schism of Manasseh is the cause of the well-known various reading in Judg. 18 30, where the name Moses (משה) has been changed into Manasseh (מנשה with נ suspended) by the insertion of a letter above the line. By this thoroughly rabbinic device a parallel between the earlier and the later northern schism was indicated, yet without entirely falsifying the text. 'Manasseh' is in the Ḳĕrē, the Targum, the Peshiṭta, and the later texts of 𝕲; but the earlier text of 𝕲 had 'Moses,' which is still read by the Lyons Octateuch and some Greek MSS.

[1] *E.g.*, Nu. 23 4.

[2] *E.g.*, Gen. 4 8 Deut. 32 35.

[3] Demetrius Phalereus was exiled by Philadelphus early in his reign; hence we cannot place the translation of the Law much later than 280.

down to the Christian Era, or even later. There is evidence for believing that Philo the Jew (about 30 B.C.-50 A.D.) was acquainted with all the OT except Esther, Ecclesiastes, Song of Solomon, and Daniel[1] (cp CANON, § 50). At a still earlier date (132 B.C.) the translator of Ecclesiasticus speaks of 'the Law and the Prophets and the rest of the Books' as existing in Greek (cp CANON, § 39), whilst the Book of Wisd. 2 12 (? 50 B.C.) contains a clear adaptation of the very peculiar rendering of Is. 3 10 in the LXX.

47. Citations.

The use of the OT by the writers of the various books of the NT suggests many difficult problems, the solutions of which have by no means all been reached. Some writers, notably Lk., clearly use LXX. Others, such as the writer of the first Gospel, often agree with the Hebrew in places where it differs from LXX. But it by no means follows that this latter class are using an independent Greek version. In the opinion of the present writer it is far more likely that the quotations in the NT that do not follow LXX are derived either directly from the Hebrew or mediately through the more or less fixed Aramaic renderings then current in the synagogue. In the case of the Apocalypse we must remember that it is in language an adaptation of a previously existing Jewish Apocalypse in Hebrew or Aramaic (APOCALYPSE, § 24 *ff.*), an adaptation so close as to be in parts, at least, a translation. Such a work naturally shows in its Greek dress many coincidences with the OT which are quite independent of LXX; but these coincidences can scarcely be used with any confidence to postulate independent Greek versions. After the catastrophe of the Jewish War in 70 A.D. the Semitic-speaking Christianity of Palestine disappeared, and by the next generation the church became entirely dependent on the Greek version of the OT.

In the middle of the second century A.D. we find the Christian Justin and the Jew Trypho equally using the LXX and founding their arguments on its wording, though here and there (as in Is. 3 12 7 14) the Jew is no longer satisfied with the traditional rendering. But after the Hebrew canon became definitely closed under 'Aḳiba and his school, and a stricter exegesis began to come into fashion, the LXX failed to satisfy the synagogue, and three separate attempts were made to supersede it. These are the new translations of Aquila and of Symmachus, and the elaborate revision of the LXX by Theodotion. As these works are of importance mainly for their influence upon the text of the LXX, which continued to be the translation used by the church, it will be convenient to describe them here.

48. Version of Aquila.

Aquila, a native of Pontus, is said to have been a proselyte to Judaism and a disciple of the celebrated Rabbi 'Aḳiba (d. 135 A.D.). His version, therefore, may be dated about the second quarter of the second century. It is marked by the greatest literalness, an attempt being made to express every word of the original, and even to render the derivatives of a Hebrew root by derivatives from the corresponding Greek root (*Field*, 22). This method of translation was not the result of ignorance, but of a system of exegesis which was willing to deduce important theological conclusions from the presence or absence of the smallest particles.[2] For the textual critic Aquila's method is extremely convenient. It is always easy to retranslate his renderings into their Hebrew original, and (what is practically more important) his style is so pronounced that fragments of his work which have been incorporated with other documents can be easily recognised and eliminated.

1 Ryle, *Philo and Holy Scripture*, 32.

2 "The Hebrew prefix *eth*, which marks the definite accusative, agrees in form with the preposition 'with.' Hence, when Deut. 10 20 says, 'Thou shalt fear *eth*-Jehovah thy God,' Akiba interprets, 'Thou shalt fear *the doctors of the law* along with Jehovah.' So Aquila, the disciple of Akiba, translates the mark of the accusative by σύν" (WRS, *OTJC*, 1881, 399). In such cases σύν does not govern a case.

TEXT AND VERSIONS

The version of Aquila was used by Greek-speaking Jews in the days of Justinian (*Nov.* 146); but no MS was known to survive until some fragments of two very handsome codices were found among the débris from the Geniza of the Cairo synagogue, which were transferred in 1897 to the Cambridge University Library. The fragments of the books of Kings (1 K. 20 7-17 2 K. 23 12-27) were edited in 1897 by F. C. Burkitt, those of Psalms (parts of Pss. 90-103) in 1899 by C. Taylor.[1] Small as is the extent covered by these fragments, they are of great importance for the criticism of Origen's Hexapla and the Hexaplar readings in our Greek MSS of the LXX.

A peculiarity of Aquila's version, as revealed by these fragments, is the use of the Old-Hebrew character for the Tetragrammaton (Yahwè: see NAMES, § 109 *ff.*) 𐤉𐤄𐤅𐤄, which is left thus untranslated. In Ps. 102 17 we find ΤΕΙΩΝ for צִיּוֹן, a notable transliteration, to be paralleled only by ΤΙΑΔΗ in B's text of Lam. 1 18 2 18 3 52-54 4 18, itself probably adapted from Aquila.

49. Of Symmachus.

Symmachus is said to have been a Samaritan by race and an Ebionite Christian by religion. His version seems to have been published between the times of Irenæus and of Origen, about 200 A.D. His method was utterly different from Aquila's, as he aimed at giving a rendering of the OT in Greek sufficiently idiomatic not to offend a reader ignorant of Semitic constructions. The Hebrew text which underlies the translation of Symmachus is equally with that of Aquila almost identical with the Massoretic. Both Symmachus and Aquila appear to have published second editions of their translations, differing slightly from the first.

50. Of Theodotion.

Theodotion is mentioned along with Aquila by Irenæus (*Hær.* 3 23) as a modern translator in contradistinction to the ancient Seventy. He is said to have been an Ephesian and a proselyte to Judaism; other accounts make him, like Symmachus, an Ebionite. The date of his work is uncertain; but, according to Epiphanius, it falls within the reign of Commodus (180-192 A.D.). The only reason for doubting this and assigning Theodotion to a considerably earlier date is that coincidences with the version of Daniel, which goes by his name, have been detected in various early Christian writings, including some books of the NT. But these coincidences admit of another explanation (see above, § 47) which has strong claims on our acceptance; it would, moreover, be against all analogy that Christian literary tradition should put a work of this kind a century too *late*.

Theodotion's edition differs essentially from those of Aquila and Symmachus. It was not, like theirs, an independent translation, but a revision of the LXX by the existing Hebrew. He supplied translations of words and passages of the Hebrew for which there was no equivalent in the LXX, but retained the additions of the Greek which are unrepresented in the Massoretic text. The renderings of the LXX were largely retained by him, and the construction of the sentences but little changed. His own renderings followed the general style of the LXX, his chief peculiarity being a fondness for transliterating Hebrew words instead of translating. Theodotion seems to have based his work on a good text of the LXX, which is often unrepresented in our existing MSS, and this constitutes for us his chief value.

The revision of the LXX thus made by Theodotion appears very soon to have influenced the text used by Christian scholars. Clear traces of Theodotion's renderings are found in some of the quotations of Clement of Alexandria (*e.g.*, *Pæd.* 1 10 = Is. 48 22; *Strom.* 2 22 = Ezek. 18 4-9).[2] A little later the same remarkable

1 The numeration in each case is that of the *Hebrew* text.

2 See 'Clemens Alexandrinus und die LXX,' by Dr. Otto Stählin (*Beit. z. Jahresb. d. K. neuen Gymnasiums in Nürnberg*, 1901).

TEXT AND VERSIONS

phenomenon meets us in Tertullian's quotations from Ezekiel (Tertullian, *De Res. Carnis*, § 29 = Ezek. 37 1-14; *Adv. Iudæos*, § 11 = Ezek. 8 12-9 6). But the quotations of Cyprian and other Latin writers from Ezekiel are free from admixture with Theodotion. On the other hand, the Church definitely adopted Theodotion's revision of Daniel in the place of the older and more paraphrastical translation of the LXX. The history of this important change is extremely obscure. It may have been helped on by the popularity of the commentary on Daniel issued by Hippolytus (about 220 A.D.), and, in any case, it was accepted even in the Latin-speaking church at Carthage during the lifetime of Cyprian (250 A.D.). One consequence of this change is that all copies of the genuine LXX text of Daniel have disappeared except two, and these give the text only as revised by Origen (§ 49). We have, therefore, a very imperfect idea of the range of variation in the ecclesiastical texts of Daniel current in early times, and it is probable that the coincidences of language with Theodotion's Daniel which have been observed in early writers are due to the use, not of Theodotion's text itself, but of a text of the LXX, akin to that which Theodotion took as the basis of his revision.

It has been maintained by Sir H. H. Howorth (*PSBA* 23 147-159 [1901]), and the theory has great probability, that the book called Ezra B in our Greek MSS of the Septuagint, which is practically a literal translation of the Massoretic text of Ezra-Nehemiah, is a part of the work of Theodotion, the original Greek rendering of the book being that called Ezra A—*i.e.*, '1 Esdras' in the English *Apocrypha* (see EZRA, THE GREEK, col. 1490).

51. Origen's work.

About the year 240 the celebrated Origen, then living as an exile from Alexandria at Cæsarea in Palestine, prepared an edition of all these versions arranged in parallel columns, which is known as the *Hexapla*. The six columns contained (1) the Hebrew, (2) a transliteration of the Hebrew into Greek letters, (3) Aquila, (4) Symmachus, (5) the LXX, (6) Theodotion. In the poetical and prophetical books there were also extracts from a fifth and a sixth Greek version, both of unknown age and authorship. The columns were arranged in very short *cola*, the extant fragments rarely containing more than the equivalent of one or two Hebrew words. A smaller edition, called the Tetrapla, was afterwards prepared by Origen himself, consisting of the four Greek versions alone, without the Hebrew columns. The Hexapla, however, was not merely a synoptical table; it was rather an attempt to emend the LXX by the Hebrew, like the edition of Theodotion. In the words of Jerome (*Præf. in Paralipomenon*), 'Origen not only brought together the four translations—writing down their renderings one against the other, so that the eccentricities of any one of them can be convicted by the agreement of the three others between themselves; but, what was more audacious, he interpolated the LXX from Theodotion's translation, marking the fresh additions with asterisks, and at the same time obelising those parts [of the genuine LXX] which seemed to be superfluous'—*i.e.*, as having no equivalent in the Hebrew.[1] It should be remarked that though the additions are usually taken from Theodotion there are many places where the missing words are adapted from Aquila or Symmachus. In principle the Hexaplar text of the LXX differs from Theodotion's edition only in two particulars:—(1) the process of revision was chiefly confined to supplying what was missing, not to altering the Greek renderings; (2) all additions to the text, of whatever kind, were indicated by critical marks. But there was no clear indication of actual changes in the text itself, as distinct from additions or suggested subtractions.[2]

[1] See also Origen *in Matt.* 15 14 (3 671).

[2] There probably were a few various readings set in the margin, some of which are preserved in the Syro-Hexaplar text of 4 Kings under the sign [sign] (*i.e.*, fifth column). Some of these [sign] readings are the last survival of a very pure LXX text; see below, § 66.

As to the amount of change admitted by Origen into the Hexaplar text, it is probable that he emended the Hebrew proper names (cp Orig. *in Joann.* 1 159 in Brooke's edition with the Hexapla to Ex. 6 16); but he seems often to have hesitated to introduce emendations which seriously affected the sense. Thus in Jer. 15 10 he retained οὔτε ὠφέλησα, οὔτε ὠφέλησέν με οὐδείς for לא נשיתי ולא נשו בי, instead of substituting ὠφείλησα and ὠφείλησέ μοι from Theodotion, although he believed the LXX to contain a scribal error (Orig. 3 225). The scribal error, however, seems to occur in Philo (*De Confus. Ling.*, § 12).

52. Three recensions.

The last quarter of the third century and the beginning of the fourth are marked by the appearance of three editions of the LXX, from one or other of which practically all our Greek MSS are descended. 'Alexandria with Egypt uses as its Septuagint the work of Hesychius; Constantinople, as far as Antioch, uses the copies of Lucian the martyr; the provinces lying between these extremes use the MSS of Origen's work issued by Eusebius and Pamphilus' (Jerome, *Præf. in Paralip.*: 'Alexandria et Ægyptus in Septuaginta suis Hesychium laudat auctorem, Constantinopolis usque Antiochiam Luciani martyris exemplaria probat; mediæ inter has prouinciæ Palestinos codices legunt, quos ab Origene elaboratos Eusebius et Pamphilus uulgauerunt, totusque orbis hac inter se trifaria uarietate compugnat'). Of these three editions, the Eusebian is the Hexaplar text of the LXX with its apparatus of asterisks (*) and obeli (÷); the Hesychian edition is that found in the quotations of Cyril of Alexandria, and corresponds in character to Hort's 'Alexandrian' text of the NT; the Lucianic edition, like the 'Antiochian' text of the NT, is characterised by attempts to smooth down grammatical harshnesses and by conflate readings, where two previously existing and mutually exclusive renderings have been fused into one.[1] It is this circumstance which gives the Lucianic LXX considerable value for us, as internal evidence conclusively shows that one at least of the elements out of which this composite text was constructed was not only ancient, but also quite independent of the texts used for the Hexapla.

53. Extant MSS.

Such in brief is the history of the LXX; a few words must now be said about the existing MSS, and the relation they bear towards the various ancient texts. First of course come the four great MSS of the fourth and fifth centuries, viz. the Vaticanus (B), the Sinaiticus (א), the Alexandrian (A), and the fragments of Cod. Ephraemi (C). Besides these there are a multitude of copies from the sixth century onwards; but very few of these ever contained the whole OT, which is usually divided up into divisions such as the Octateuch, the Prophets, etc. The Psalter is usually separate.

The original MS of Origen's Hexapla was doubtless never copied again in full on account of its unwieldy bulk; but fragments of the Psalms in all five editions, accompanied by a Catena Patrum, were discovered in the Ambrosian Library at Milan in 1896 by G. Mercati. The MS (O 39 *sup.*) is a palimpsest, the original writing containing in tenth-century minuscules all the columns of the Hexapla, except the Hebrew in Hebrew letters. A fragment of Ps. 22, containing all six columns, was found in 1898 among the Cairo Geniza MSS at Cambridge, and has been published by C. Taylor together with his fragments of Aquila (see above, § 48).

More important for practical purposes than these fragments are the MSS connected with the Eusebian edition of the LXX. These are of varied character. Some, like the great codex א, give a text more or less corrected to the Hexaplar standard, but without the diacritical marks. Others, such as Codex Sarravianus (G) of the Octateuch, have the critical signs, whilst others have the

[1] The original copy of Lucian's recension, written by his own hand, is said by Theodoret to have been found in the time of Constantine at Nicomedia walled up in the turret of a house belonging to Jews.

TEXT AND VERSIONS

critical signs together with marginal notes containing renderings from Aquila, Symmachus, Theodotion, etc. Foremost among these fuller authorities is the *Syro-Hexaplar* version made by Paul of Tella in 616-617 A.D. (see § 61), one of the most valuable extant works for the text of the LXX.

From some of the notes in the Syro-Hexaplaric version and from remarks of Theodoret it has been possible for Field and Lagarde independently to identify the MSS which contain a Lucianic text. The Hesychian text is best represented by the first hand of Codex Marchalianus (Q), a sixth-century MS of the prophets. A second hand has added to this MS a number of Hexaplar readings from the other editions.

54. Printed editions.

The chief printed editions of 𝔊 are :—(1) the *Aldine*, Venice, 1518; (2) the *Complutensian* Polyglott, Alcala, printed 1514-17, published 1522, representing a Lucianic text; (3) the *Sixtine*, Rome, 1587, based on Cod. B; (4) the *Alexandrian*, Oxford, 1707-20, *i.e.*, Grabe's edition, based on Cod. A; (5) *Holmes and Parsons*, Oxford, 1798-1827, a reprint of the Sixtine text (Cod. B.), but with an apparatus containing the various readings of many MSS and Fathers.[1]

Quite distinct from these, as aiming to reproduce not MSS but particular recensions of 𝔊 are :—Field's *Hexapla*, a collection of the extant fragments, Oxford, 1875; and Lagarde's restoration of the Lucianic text [*Gen.-Esther* only], Göttingen, 1883.

55. Recovery of original LXX.

Lagarde in his *Anmerkungen zur griechischen Übersetzung der Proverbien*, 3 (see Driver, *TBS*, p. xlvii) has laid down the following rules for recovering the original text of the LXX from our authorities :—

1. The MSS of the Greek translation of the OT are all either immediately or mediately the result of an eclectic process: it follows that he who aims at recovering the original text must follow an eclectic method likewise. His only standard will be his knowledge of the style of the individual translators: his chief aid will be the faculty possessed by him of referring the readings which come before him to their Semitic original, or else of recognising them as corruptions originating in the Greek.

2. If a verse or part of a verse appears in both a free and a slavishly literal translation, the former is to be counted the genuine rendering.

3. If two readings coexist, of which one expresses the Massoretic text, while the other can only be explained from a text deviating from it, the latter is to be regarded as the original.

These admirable rules, however, practically give up the attempt to trace out the history of the text of the LXX. It may therefore be worth while to indicate the lines on which such an attempt may be undertaken.

In the first place it is necessary to get some criterion for estimating the worth of the Hexaplar text with its apparatus of asterisks, etc., as preserved in existing MSS. For this we may use the fragments of the Old Latin which are certainly derived from a Greek text older than the Hexapla (see § 56 *f.*). Along with the Old Latin we may take the quotations from the early Greek fathers, so far as their text can be trusted. When we compare our Hexaplar text with these primary sources of information the general result may be summarised thus:—(1) The critical signs attached to the text, especially the all-important asterisks (*) which mark interpolations introduced into the LXX from Aquila, Symmachus, or Theodotion, are fairly well preserved. Single authorities have dropped or misplaced them here and there; but it is rarely the case that the majority of our witnesses conspire in error. (2) The Hexaplar text itself, when purged of the interpolations under * is a good text of the LXX, on the whole the best continuous text which survives. (3) It is very far, however, from being really pure. The proper names have been largely corrected to the Massoretic Hebrew, while in other matters inferior readings have been either introduced or have been wrongly followed.

Having thus gained some idea of the worth of the Hexaplar text we may go on to apply these results to the criticism of our chief surviving MSS. Their value and independence will be found to differ greatly in the various books. That they all contain 'Theodotion's' Daniel, not the Daniel of the genuine LXX, is perhaps not due to the Hexapla alone, as the change probably occurred earlier. But it was Origen who introduced nearly 400 lines (*i.e.*, half-verses) into the LXX text of Job from Theodotion, yet these interpolations are found in all our MSS; so far therefore as Job is concerned it is certain that none of our MSS go behind the Hexapla. The fact that in various parts of the OT, notably the four books of Kings (KINGS, § 3; cp SAMUEL, § 4) and Ezekiel, $𝔊^B$ leaves out many passages known to be interpolations, has given plausibility to the belief that it presents us with a pre-Hexaplaric text; but other phenomena of $𝔊^B$ are inconsistent with this view, and it is better to regard $𝔊^B$ as in the main a Hexaplar text without the passages under asterisk (Lagarde, *Proverbien*, 3, n. 1). In Judges, Isaiah, and Lamentations, the text of $𝔊^B$ is neither Hexaplaric nor that of the unrevised LXX.[1] [On the text of Judges, cp JUDGES, § 18.]

The text of $𝔊^A$ shows greater independence than that of $𝔊^B$ and though it is sprinkled more or less throughout the OT with Hexaplaric additions it often retains the reading of the LXX when most other MSS have gone wrong.[2]

The Lucianic text contains a singular mixture of good and bad readings; but so far as can be judged from the surviving evidence its *good* readings are also those of the Old Latin. Its value to us therefore is to supply evidence akin to the Old Latin, where that invaluable witness fails us. The character of the Lucianic text is indicated by Jerome (*Ep. ad Sunniam et Fretelam, ap.* Field, p. lxxxvi) when he says: 'editionem, quam Origenes, etc. *κοινὴν* id est *communem* appellant atque *uulgatam*, et a plerisque nunc Λουκιανὸς dicitur.' Lucian's revision, rather than the Hexaplar texts, is the representative of the old *κοινὴ ἔκδοσις* that survives approximately pure in the better texts of the Old Latin. The difference between the comparative value to us of the 'Antiochian' texts of the OT and the NT simply comes from the paucity of what we might call 'early Western texts' of the OT in Greek. If a MS analogous to Codex Bezæ survived, the value of the Lucianic text would have been largely discounted.

II. LATIN

The Old Latin is the only version of the OT made from the Greek which is certainly older than the Hexapla.

56. The Old Latin version.

The Syriac version of the OT was translated direct from the Hebrew, not from the Greek, and the other Oriental versions belong to a later period. Hence the Old Latin occupies a unique position, and must be regarded as the chief authority for the restoration of the *κοινὴ ἔκδοσις*, or pre-Hexaplaric LXX. Unfortunately it survives only in fragments, and some of the better-preserved forms are the result of revision from Greek texts later than the original translation.

As in the NT, the quotations of Cyprian (d. 258) form the standard by which we may classify our texts. Cyprian quotes from nearly all the books of OT and NT and with almost unfailing accuracy, so that we may gather from his works a fair idea of the characteristics of the OT in Latin as it was read at Carthage about the middle of the third century. Closely akin to the

[1] The useful editions of Tischendorf (7th ed. 1887) give the Sixtine text with the variants of BℵAC. The Cambridge *Editio Minor*, 1887-1894, gives the text of B and the variants of ℵAC with some other uncial MSS; a larger edition is in progress which it is hoped will supersede *Holmes and Parsons*.

[1] Cp, for example, Is. 49 18 in $𝔊^B$ and the Hexapla. In Lamentations the names of the Hebrew letters of the alphabet are transliterated in $𝔊^B$ differently from other MSS, τι being used for צ and χσ for ש (see above, § 48).

[2] *E.g.*, Judg. 5 8, end.

Cyprianic text is that used in *De Pascha Computus*, except in Daniel. A slightly later type is presented by the various Donatist texts, such as that found in the extensive quotations of Tyconius, and in the *Gesta* of the 'Collatio Carthaginiensis' held in 411 A.D.; among these also must be reckoned the Lucca *Genealogiæ* (Lagarde, *Septuaginta Studien*, 25-28), a historical work of purely Latin origin containing a very large number of biblical proper names, all of which are given in pre-Hexaplaric spelling.

Among 'European' texts special mention must be made of Lucifer of Cagliari (d. 371), whose quotations, especially from the historical books, are very full and accurate. The pseudo-Augustinian *Speculum* (Corp. Scrip. Eccl. Lat. xii.), a collection of biblical extracts somewhat similar to the *Testimonia* of Cyprian has a text, possibly Spanish in origin, which contains some elements belonging to the earlier form of the version.

Revised texts, which cannot be used as evidence for the true Old Latin save in exceptional cases, are met with in Ambrose, Augustine, and Jerome. Jerome's quotations especially are often taken direct from the Greek and usually agree with 𝔊ℵ and 𝔊B. Augustine (to mention only the clearest cases) used Jerome's translation of Job from the *Hexapla*, and in Judg. 5 he agrees with the Hexaplar Codex Coislinianus against the true Old Latin as preserved by Verecundus.[1] Tertullian's curious use of a text of the LXX mixed with Theodotion's in the Book of Ezekiel has been already noticed (see above, col. 5019).

57. MSS. The most complete MS of any part of the Old Latin OT is the *Lyons Heptateuch* of the seventh century, containing most of the Pentateuch, Joshua, and Judges to 20 31 (ed. by U. Robert, 1881 and 1900). A better text is to be found in the *Freising Palimpsest* now at Munich, of the fifth or sixth century (*Bruchstücke einer vorhieronymianischen Übersetzung des Pentateuch . . .*, by L. Ziegler, 1883); although this MS shows some marks of literary revision it contains a Cyprianic element, which in conjunction with the general independence of its text places it in the first rank of LXX authorities.[2] Its independence is especially noticeable in the latter chapters of Exodus.

Other Old Latin MSS, all of them palimpsests or mere fragments, are:—the *Vienna Palimpsest* of Genesis (? Oct.) and the historical books, fifth–sixth century, a text which agrees remarkably with that of Lucifer, and only requires to be well edited to take its place among the very best MSS; the two *Würzburg Palimpsests*, one of the Pentateuch, the other of the Prophets, fifth–sixth century, both edited by E. Ranke, 1871; the *Weingarten* MS of the prophets, fifth century, also edited by E. Ranke, 1868-1888. Besides these there are smaller fragments at Quedlinburg, Vienna, and S. Gallen. Of a slightly different character are the two documents edited by Vercellone in his *Variæ Lectiones Vulg. Lat. Bibl. editionis*, viz., extracts out of Genesis and Exodus from the Codex Ottobonianus, an eighth-century MS of the Latin Vulgate, and the various readings written in the margin of a Visigothic MS of the Latin Vulgate at Leon in Spain. These various readings agree very closely with the Lucianic text, much closer in fact than any other form of the Old Latin, so the conjecture may be hazarded that they were translated direct from some Greek MS.

A number of Latin Psalters are extant; but none of them represents the earlier stages of the version, as the quotations of Cyprian differ widely from them all.[1]

58. Apocrypha. The OT 'Apocrypha'—*i.e.*, those books of the Greek OT which are not in the Hebrew canon—were left more or less untouched by Jerome; in these books, therefore, the Old Latin survives in the Vulgate. In fact, the Vulgate text of Wisdom and Ecclesiasticus does not differ appreciably from the Cyprianic standard. It is therefore important to notice the divergence in the arrangement of Ecclesiasticus 30-36 in the Greek and the Latin. 'In these chapters the Greek order fails to yield a natural sequence, whereas the Latin arrangement, which is also that of the Syriac and Armenian versions, makes excellent sense. Two sections [of the Greek], chap. 30 25-33 13a (*ὡς καλαμώμενος . . . φυλὰς Ἰακώβ*) and chap. 33 13b—36 16a *λαμπρὰ καρδία . . . ἔσχατος ἠγρύπνησα*), have exchanged places. . . . There can be little doubt that in the *exemplar* from which, so far as is certainly known, all our Greek MSS of this book [Ecclus.] are ultimately derived, the pairs of leaves on which these sections were severally written had been transposed, whereas the Latin translator, working from a MS in which the transposition had not taken place, has preserved the true order' (Swete, pref. to vol. ii. of the Cambridge Septuagint, p. vi *f.*).[2] A fact of this kind deserves to be particularly mentioned, as it brings out the exceptional value of the Old Latin for the text of the LXX, and the essential homogeneousness of our Greek authorities notwithstanding their numerous variations.[3]

A conspectus of the biblical quotations of the Latin Fathers, together with such Old Latin MSS as were then available, is to be found in the great work of Sabatier (*Bibliorum Sacrorum Latinæ Versiones Antiquæ*, 1743 and 1751).

59. Vulgate. Jerome's edition of the NT was a simple revision of an existing text; but his version of the OT was wholly new. It is, in fact, a translation of the Hebrew into Latin independent of the LXX, though Jerome frequently adopts renderings from the other Greek editions, particularly that of Symmachus. The great work had been begun at the invitation of Pope Damasus; but that powerful patron died when only the Gospels had been issued (384 A.D.), and Jerome left Rome for Bethlehem. The various parts of the OT were published separately and furnished with prefaces, in which the merits of the Hebrew over the Greek and the methods of translation adopted are vigorously defended.

Thus the Latin church was confronted with a new version of the Bible which had no external authority to recommend it save the well-deserved reputation of Jerome as the most learned scholar of his day. It is not surprising that it met at first with opposition. Its ultimate success is probably due in great measure to Augustine. At first Augustine thought the new version of the OT too revolutionary, and almost to the end of his life clung to a belief in the inspiration of the Seventy. He wrote of Jerome's translation, however, with increasing respect and occasionally quotes from it (*e.g.*, *De Civitate Dei*, 18 43), and in his last work—the genuine *Speculum*, a collection of biblical extracts, left unfinished at his death in 430—he follows the new version wholly, except where he quotes from memory. In the sixth century Cassiodorus seems to have treated the two versions on an equal

[1] Printed in Pitra's *Spicilegium Solesmense* and in Vercellone's *Variæ Lectiones*.

[2] See Ex. 17 14 for the revision. In Ex. 32 1 the MS has *eicere* for to 'bring out' of Egypt (ἐξάγειν) with Cyprian, *Test.* 1 1. For an instance of its positive value in correcting the Greek see Ex. 40 3, where in place of σκεπάσεις τὴν κιβωτὸν [τοῦ μαρτυρίου] τῷ καταπετάσματι, which is the reading of all other LXX authorities, Greek and Latin, and corresponds verbally with the Massoretic text, we find in the Freising MS *et super eam propitiatorium*; that is, it reads כפרת instead of פרכת, with the Samaritan and the Jer. Targ. Thus by Lagarde's canons the Freising MS alone has preserved the true text of the LXX in this passage.

[1] Cp also the remarks of Augustine (*De Doct. Christiana*, 2 19) on Ps. 13 3.

[2] The English version, both in AV and RV, follows the Latin here.

[3] The Syriac of Ecclesiasticus is not a witness for the LXX, as it was made for the most part direct from the Hebrew; the Armenian here probably follows the Syriac as so often elsewhere. The newly-recovered Hebrew text supports the Latin order, as might be anticipated.

With regard to the Latin text of Ecclesiasticus it has recently been shown by Thielmann that chaps. xlv.-l. are the work of a later hand; apparently the praise of the Jewish Fathers was intentionally left out by the Christian translator as superfluous to his object (cp J. H. A. Hart's edition of the Greek cod. 248).

TEXT AND VERSIONS

footing; but Isidore of Seville in the seventh century uses Jerome's exclusively. From that time it really deserves the name 'Vulgate' now universally applied to it, though as a matter of fact it was not so called before the time of Roger Bacon. In Jerome's own works *Vulgata* means the Old Latin.

The difference between the Vulgate and the Old Latin in the OT is so great that mixed recensions were less readily formed than in the NT, though single passages have suffered corruption from time to time in the MSS. As was remarked above, the Latin church in adopting the new version added to it from the Old Latin those books which formed no part of the Hebrew canon and were therefore left untouched by Jerome.

The best MS of the Vulgate is considered to be the Codex Amiatinus (a seventh-century MS of the whole OT and NT, see § 21), the variations of which from the authorised Clementine text have been not very accurately published by Heyse and Tischendorf (in 1873); a valuable collection of readings is brought together in the unfinished *Variæ Lectiones* of Vercellone.

The Vulgate is less useful to the textual critic than the Old Latin, just as the later forms of the LXX which contain interpolations and corrections from Theodotion are not so useful as the earlier forms. That, however, is because we have access to the Massoretic Hebrew in the original and possess admirable renderings of it into the vernacular. The early forms of the LXX are valuable because by their aid we can correct some errors which have befallen the existing Hebrew text. It should not be forgotten, however, that the LXX is often a bad translation to work from, many passages being quite devoid of sense as they stand, a defect that was sometimes intensified by the further translation of Greek into Latin. The Vulgate, on the other hand, is the work of a competent scholar, and gives the meaning of the Hebrew with comparative accuracy and clearness. It was the great good fortune of the Latin church that so excellent a translator should have been raised up for the work, and it is her great glory that neither the sentimental associations of the old version nor the increasing ignorance of the Dark Ages were able to interfere with her final acceptance of S. Jerome's labours.

III. Syriac and other Versions

60. Peshitta.

In the OT the Syriac Vulgate, commonly called *Pĕshīṭta*, is a translation made direct from the Hebrew. Time and place of translation are alike unknown. It is conjectured that it was made at Edessa, the centre of Syriac literary culture, and it seems to have been the work of Jews rather than Christians.[1] There is no surviving trace of any previous recension of the text; the earliest Syriac Father, Aphraates, who is our chief quarry for pre-Vulgate citations from the Syriac NT, quotes the OT in literal accordance with the Peshiṭta.

The character of the Peshitta varies in the different books, which has been held as an indication that the version was the work of several hands. The Pentateuch and Job (which in the Syriac follows the Pentateuch) are rendered literally; some of the other books, notably Chronicles, are very freely paraphrased. But the Hebrew underlying the Syriac is in almost all cases simply the Massoretic text.[2] Here and there, especially in the Prophets, there are unmistakable traces of the influence of the LXX. No satisfactory explanation of this influence has yet been reached; it is possible that it dates from the establishment of the church in Edessa about the end of the second century.

In addition to the Hebrew canon the Syrians had translations of the OT Apocrypha, in most cases derived from the Greek; but the Syriac Ecclesiasticus is partly a rendering of the Hebrew. The dates of all these translations are quite unknown; but 'it seems tolerably certain that alterations were made from time to time with a view to harmonising the Syriac text with that of the LXX' (Wright's *Syriac Literature*, 4), a process which may have begun as early as the episcopate of Pâlûṭ (about 200 A.D.).

The Peshiṭta is extant in many MSS of considerable antiquity. The oldest known dated MS of any portion of OT or NT in any language is the Cod. Add. 14,425 in the British Museum containing Gen., Ex., Nu., Dt., transcribed at Amid in the year 464 A.D. A good text of the whole OT is presented by the Cod. Ambrosianus of the sixth century, which contains, in addition to the ordinary 'Apocrypha,' the Apocalypse of Baruch and 4 Esdras. This MS has been reproduced in photolithography by Ceriani.

The most accessible edition of the OT Peshiṭta (without the Apocrypha) is that prepared by Lee for the 'British and Foreign Bible Society' in 1823; but it only reproduces with little variation the text of the London and the Paris Polyglott. In fact all the printed editions go back to the *ed. princeps* in the Paris Polyglott, which is a mere transcript of a very late MS (now at Paris), as conjecturally emended by the editor Gabriel Sionita.[1] For practical purposes, therefore, Ceriani's reproduction of the *Ambrosianus* is the most satisfactory text that has yet appeared.

61. Syriac versions from the Greek.

The earliest attempt at a Syriac version from the LXX seems to have been that called by the name of Philoxenus, made in 508 A.D. (see § 30). Of this version fragments of Isaiah survive in a MS in the British Museum (edited by Ceriani in *Monumenta Sacra et Profana*, v. 1 1-40). It seems to have been a free revision of the Peshiṭta by a Lucianic MS, producing a curious mixed text.

Of far more critical value is the Syriac version corresponding to the Harclean revision of the NT, which is commonly known as the *Syro-Hexaplar*. This was made at Alexandria in 616-617 A.D. by Paul, Bishop of Tella (Assemani, *BO* 2 333 334). It contains a translation of Origen's text of the LXX with the asterisks and obeli, together with many marginal renderings from the other Greek editions; the style, moreover, of the Syriac translation is so literal that the exact Greek represented can be recovered with considerable accuracy. The work of Paul of Tella formed Field's chief authority in his reconstruction of the Hexapla.

The Syro-Hexaplar version is extant for most books of the OT. The poetical and prophetical books are extant in a cod. in the Ambrosian Library at Milan which has been published in photo-lithography by Ceriani (*Mon. Sacr. et Prof.* 5). The remains of the Pentateuch and Historical Books are collected in Lagarde's *Bibliothecæ Syriacæ etc.*, published in 1892.

At the beginning of the eighth century Jacob of Edessa made a final effort to revise the Peshiṭta by the various Greek versions; but his work does not seem to have ever gained any currency. He made use of no materials which we do not possess from other sources

62. Palestinian version.

The whole OT appears to have been translated into the Palestinian dialect (see § 31); but only small fragments now survive. It is a translation from the Greek, certainly post-Hexaplaric, and it probably presented a text closely akin to the 'Eusebian' edition (§ 52) and the Codex Vaticanus. The fragments of the OT, so far as they have already been published, are collected in Land's *Anecdota*, vol. iv., in *Anecdota Oxoniensia* (Semitic

---

[1] Cp especially 1 Ch. 5 2, where the words 'for Judah prevailed above his brethren, and of him *came* the prince' (נגיד) are rendered in the Peshiṭta 'From Judah *shall come* forth King Messiah.' Cp also J. Perles, *Meletemata Peschitthoniana* (1859).

[2] Some of the best MSS supply a striking illustration of the close connection of the Peshiṭta with the Hebrew by the fact that they contain a note marking the exact place where the half of a book comes in the Massoretic text. Cornill (*Ezechiel*, Prol. 144) brings this forward as a proof that the *Ambrosianus* has been revised from the Hebrew; but the phenomenon is to be found in other MSS of other books, and as far as we know the tendency of the Syrians was to correct from the LXX, not from the Hebrew.

There are a few instances where the Syriac seems to represent a really different Hebrew, not agreeing with the LXX. In Judg. 14 8 Pesh. reads החדרה for החרסה, so as to make the sentence run 'when Samson had not yet entered the marriage chamber.' Such readings occur so rarely, however, that we must suppose this instance to have been the result of a brilliant guess (cp chap. 15 1).

[1] See *An Apparatus Criticus to Chronicles in the Peshiṭta Version* by W. E. Barnes, 1897.

TEXT AND VERSIONS

Series), and in a lectionary edited by Mrs. Lewis (*Studia Sinaitica*, 6, 1897).

The general history of the Bible in Coptic has been discussed in the section upon Egyptian versions of the NT. The Bohairic version in the OT has the same characteristics as in the New, and there is every reason to assign it to the same date, viz., the sixth century. It is not even yet edited in full; but the Prophets have been edited by Tattam, the Pentateuch and Psalms by Lagarde, and lately Proverbs by Bouriant.

63. Coptic versions.

The Sahidic version from its greater antiquity is of more importance. Of this the Borgian MSS, together with other fragments previously collected, were admirably edited by Ciasca (Rome, 1885-9). The Psalms have been edited by Budge from a seventh-century MS in the British Museum (1898), and now lately again by Rahlfs. There is also a large addition to OT Sahidic texts to be found in Maspero, *Mission archéol. franç.*, tom. 6. The general character of the text resembles that of the first hand of Cod. Marchalianus (Q); that is, it is akin to what we are accustomed to call the Hesychian recension of the LXX (§ 52). Ciasca himself (2 55) points out that the Minor Prophets show clear signs of revision 'iuxta archetypum hebræum.' The text of Daniel is that of Theodotion, as in the Greek MSS. The type of Greek text followed by the Sahidic in the Psalms is represented by U, the fragments of a papyrus book in the British Museum (see F. E. Brightman in the *Journ. of Theol. Studies*, 2 275). U is now considered to be of the sixth or the seventh century, and is said to have come from a monastery near Thebes. Doubtless, therefore, it gives us the text of the Psalter as sung in the earliest days of Christian monasticism, and where it is defective it may be reconstructed from the Sahidic as edited by Budge, Rahlfs, and Ciasca.

The chief interest of the Sahidic version centres in the Book of Job. As has been explained above (§ 55), the original Greek translation of Job omitted between three and four hundred lines, or half verses, which were supplied in the *Hexapla* under asterisk. The Sahidic leaves these lines out, and it is generally supposed that it therein represents the pre-Origenian κοινὴ ἔκδοσις, like the Old Latin. But apart from the difficulty of assigning to the Sahidic version of Job the high antiquity which would be required for a translation uninfluenced by the *Hexapla*—we should have to think of the second century, instead of the end of the third or the beginning of the fourth—there are other reasons which are inconsistent with this view. It is far more in accordance with all the facts to regard the Sahidic Job as a translation of Origen's revised text of the LXX, *with the passages under asterisk omitted.* The Sahidic text, when it is examined closely, cannot claim to preserve even so large a measure of independence as the Greek Cod. A; we may fairly describe 𝔊ᴬ as a text of the κοινή interpolated from the *Hexapla*, but the Sahidic is Origenian from post to finish.

The importance of this question for the history of the Greek Bible makes it necessary to indicate the chief signs of the dependence of the Sahidic on the *Hexapla*.

1. Ciasca uses five Sahidic codices for Job. One of these, the Bodleian MS edited by Erman, contains the Hexaplaric additions as an integral part of the text. The 400 half-verses, therefore, were not altogether unknown in Upper Egypt.

2. A few of the lines which are distinctly assigned to Aquila or Theodotion in our Hexaplar authorities are found in the Sahidic. Thus Job 30 20*b* and 22*b* (from Theod.) are in their ordinary place; 9 15*b* (from Aq.) is inserted after *v.* 14.

3. After Job 11 20 *f.* 𝔊ᴬ adds παρ' αὐτῷ γὰρ σοφία καὶ δύναμις. Syr.-Hex. *obelises* these words—*i.e.*, they are a genuine part of 𝔊, though not in the Hebrew. They are omitted by BℵC and also by the Sahidic, which thus represents here a *critically revised* text. [See also 3 17 ἐξέκαυσαν; 7 11 om. ἀνοίξω.]

4. The original Greek for לא יעננו in Job 9 3*b* appears to have been οὐδ' οὐ μὴ ἀντείπῃ (cp *Hex. ad loc.*). Symmachus and Theodotion had οὐ μὴ ὑπακούσῃ αὐτῷ. In the *Hexapla*, followed by the Greek MSS, a conflation of the two was made, producing οὐ μὴ ὑπ. αὐτῷ ἵνα μὴ ἀντείπῃ. This conflation is reproduced in the Sahidic.

5. The clearest case of the dependence of the Sahidic on Origen is in Job 28 21 *f.*, which runs thus in the *Hexapla*, the lines from Theodotion being italicised:

It [viz., Wisdom] is concealed from every man,
and from the fowls of the heaven it is hid.
Destruction and Death said:
But (δὲ) we have heard the fame thereof.

Omit the italics, and the first person plural in the fourth line is meaningless; it is impossible to suppose that it could have been the original form of the Greek. Yet that is exactly what the Sahidic gives. The true LXX is probably preserved by Clement of Alexandria (*Strom.* vi. 6 763) who quotes *v.* 21 thus: λέγει ὁ ᾅδης τῇ ἀπωλείᾳ εἶδος μὲν αὐτοῦ οὐκ εἴδομεν φωνὴν δὲ αὐτοῦ ἠκούσαμεν (cp Jn. 5 37). This not being an accurate rendering of the Hebrew, it was emended in the *Hexapla* by the help of Theodotion; but simply to omit the lines here taken from Theodotion, as has been done by the Sahidic, cannot be managed without ruining the sense, and (we may add) revealing to all time the Origenian source of the text.

The *Ethiopic* version dates from the fourth or the fifth century; but the existing codices are late and seem to have been much revised, some from mediæval Greek or Arabic texts, some from the Hebrew. Gen.-Kings has been edited by Dillmann, Psalms by Ludolf (1701), Song by Nisselius (1656), Lamentations by Bachmann (1893). The best critical discussion on this version is to be found in Cornill's *Ezechiel*, 36-48.

64. Other versions.

The *Armenian* version appears to contain in the OT, as in the NT, both Greek and Syriac elements. The best edition is still that of Zohrab, published in 1805. Some Armenian codices have the Hexaplar critical marks ('Scrivener,' ed. 4, 2 153).

The *Gothic* of the sixth, and the *Slavonic* of the ninth century, both of which are intimately connected in origin with Constantinople, are remarkable for their affinity with the Lucianic text (Lagarde's *Lucian*, 14, 15). Of the Gothic OT, however, only fragments of Ezra B, chap. 2 and Neh. 5-7 survive, besides a few verses of Gen. 5.

The *Arabic* versions of the OT are of various character and value. The version printed in the Polyglotts is derived from a MS now at Paris (Colb. 900 = de Sacy, 1) written in Egypt in the sixteenth century. The Pentateuch is the translation of Sa'adia from the Hebrew; but the Prophets were translated from an old uncial MS of 𝔊 akin to A (Cornill's *Ezechiel*, 49-57).

The Targums, or Aramaic paraphrases of the OT prepared for use in the Synagogue, contain elements of various dates. They differ from the versions hitherto considered in having a directly edificatory aim; they are, in fact, paraphrases rather than translations, although the style of some of them is often very literal. They take their rise from the custom, described in Lk. 4 16 *ff.*, of giving a short explanation of the sacred Hebrew text in the Aramaic vernacular of Palestine. At first the Targum was a free oral exposition; then it gradually acquired fixed forms, and at last it was reduced to writing.

65. Targums.

The written Targum is found in MSS sometimes alone, sometimes verse by verse with the Hebrew text. There are two Targums to the Pentateuch (besides the Samaritan Targum; see SAMARITANS, § 5 *a*), the official *Babylonian Targum*, known by the name of the reputed author *Onkelos* (אונקלוס, אנקלס),[1] and the *Jerusalem Targum*, also known as [Pseudo-] Jonathan. 'Jerusalem' (*Yerūshalmī*) means Palestinian; in fact, this Targum gives to a great extent the old popular exegesis, though its extant form dates from after Mohammed. There once existed a 'Jerusalem' Targum to the Prophets; but the Babylonian recension alone has come down to us; it is commonly cited by its reputed author Jonathan ben Uzziel. The Hagiographa are also preserved in a Babylonian recension; but they are of varied character, being to some extent private literary works, since the Hagiographa were not regularly read through in the Synagogues like the Law and the Prophets. Job is a comparatively literal rendering; Proverbs appears to have been made up from the Peshiṭta; Esther is extant in two forms, both wildly paraphrastical.

The Targums are to be found in the great rabbinical

[1] *Onkelos* is probably a corruption of עקילס *Aquila*.

TEXT AND VERSIONS

editions of the OT. *e.g.*, the Bomberg edition of 1517, ed. by Felix Pratensis. Onkelos has been edited by Berliner in 1884, the Prophets and Hagiographa by Lagarde in 1872, 1873.

The Hebrew text from which the Targums were made is practically identical with that of the Massoretes.[1] Their value for us is not so much the text they attest, as the prejudices they display. They show us the atmosphere of thought in which the tradition of the meaning of the OT was preserved, an atmosphere absolutely unliterary and unartistic, and anxious at any cost to remove the anthropomorphism of earlier Hebrew religion (see the amazing list of locutions in Cornill's *Ezechiel*, 123). Some of the toning down of old metaphors or reminiscences of ancient heathendom is very ancient; even 𝔊 does not call God by His personal name but translates יהוה by [ὁ] κύριος (NAMES, col. 3321), and refuses altogether to call him a *Rock* [Heb. צור, *e.g.*, Ps. 95 1]. The Targums simply exhibit this tendency in an exaggerated form. The popular exegesis has now and then influenced the Massoretic text. But the Massoretes were too good scholars simply to point the true text wrong; it almost always happens in such cases that there is some corruption in the transmitted consonants, which formed the starting-point for the wrong interpretation. The mode of procedure by which the critic recognises the corruption is somewhat as follows. A grammatical anomaly in MT surprises him; he refers to the Targum and finds it carefully reproduced, perhaps in the midst of quite a free paraphrase. Evidently the anomalous punctuation is *intentional*, and as the prophets wrote better Hebrew than the Targumists, it is only too likely that the traditional interpretation of the whole passage is wrong. Now and then it is possible to restore the original, to the great gain of literature.

No better instance can be given than Is. 63 1-6. Here we find a series of verbs pointed as jussives instead of with wāw consecutive; this arouses suspicion. The same verbs are taken as futures in the Targum, and the reference to future punishments upon the heathen is more pointed than in the Hebrew. Now 63 1-6 is the only passage in Deutero-Isaiah that contains the name of any of the petty nations of Palestine; in fact the sudden and inartistic mention of 'Edom' has given much trouble to commentators. In the popular Jewish exegesis, however, 'Edom' regularly stands for Rome and the Roman Empire (cp, *e.g.*, Targum to Lam. 4 21 *f.*). It is out of place here,[2] and we should read with Lagarde (*Proph. Chald.* p. l) מְאָדָּם for מאדום and כְּבֹצֵר for מבצרה, so that the sentence runs: *Who is this that cometh all reddened, with garments stained more than the gatherer of the vintage?*' The corruption of *v.* 1, which took its rise in popular exegesis, was the excuse for the wrong pointing of the verbs in *vv.* 3-6 by the Massoretes.

An article like the present ought in strictness to consider what may be called the pre-canonical history of the text. It is almost demonstrable that some of the most serious corruptions originated in the documents before they became part of the OT. Such are all the variations which can be traced to confusions arising from the Old Hebrew alphabet. *E.g.*, מטל '*for the dew*' in Dt. 33 13 corresponds to the more appropriate מעל '*above*' in Gen. 49 25, as in both cases the word is contrasted with '*beneath.*' But in the older character ע is ○ and ט is ⊗, so the corruption was easily effected. Again, the influence of Hosea 2 17 ('I will take away the names of the Baalim out of her mouth') should be mentioned. This verse was interpreted to mean that the very names of heathen gods were unlawful to be used; accordingly the vowels of *bōsheth* ('shame') are substituted for the real vowels in such words as *Tōpheth* and *Mōlech* (also '*Moloch*'). In Amos 5 26 *Kaiwân* (*i.e.*, 'Saturn') has been vocalised with the vowels of *šikkūṣ* (*i.e.*, 'abomination'), producing the form כִּיּוּן (*Chiun*, AV). By a more violent change Saul's son '*Ish-ba'al* ('Baal's-man'), preserved almost intact as *Eshbaal* in 1 Ch. 8 33, becomes *Ish-bosheth* ('Man-of-Shame') in the more frequently read book of Kings. In later Jewish writings this tendency is carried into original literature; there is no reason to doubt that the name *Abed-nego*, evidently meant for *Abed-nebo* ('Worshipper-of-Nebo'), is the invention of the author of Daniel, not a scribe's blunder. It is in Daniel (12 11) that we find שקוץ שמם (the 'Abomination which maketh desolate'), an intentional perversion of בעל שמים, the title of Zeus Βεελσαμην.[1]

66. Correction of MT.

We are now concerned, however, with the corruptions which have befallen the text in the course of transmission, and here, as Wellhausen remarks, the chief agents have been chance and caprice, not deliberate falsification (cp Well.-Bleek, § 295 *ff.*). Space will only allow of a few examples; but those given below will sufficiently exhibit the commonest kinds of corruption, while at the same time they bring forward the instances where modern scholarship has been most successful in restoring the true reading, whether by means of the ancient versions or by simple conjecture.

Conjecture is not always a mere arbitrary procedure, it may be based on the surest of all exegetical and critical rules, viz., the explanation of passages which are obscure by those which are plain and free from suspicion. Thus we can be quite certain by comparing Zeph. 2 14 with Is. 34 11 that for חרב, 'desolation,' we must read ערב, 'raven,' and that the mysterious ישורר not only contains the name of some bird, but must be a corruption of ינשוף, *yanshūph* or *yanshōph*, 'the eagle-owl' (see OWL, 4). The translation then runs: 'Both the pelican and the porcupine shall lodge in the chapiters thereof; hark to the eagle-owl in the window, the raven on the threshold!'

Although the Massoretes point well where the text is sound, the smallest error definitely represented in the consonantal text is sufficient to throw them out. Thus the long final *nun* of כן עני הצאן ('verily the poor of the flock') in Zech. 11 7 11, was doubtless the cause which prevented the first two words from being run together and vocalised כְּנַעֲנֵי הצאן, *kĕna'ănē haṣ-ṣōn*—*i.e.*, 'the sheep-dealers.' There are of course a few cases where the restoration of the true text depends on a point of archæological knowledge which might easily fade from the narrowly grammatical Hebrew tradition. Thus in Jer. 46 15 we should divide מרוע נסחף into מרוע נָס חָף, and translate with 𝔊 'Why has Apis fled?' (cp APIS). Again, it was not till some progress had been made in Assyrian that Halévy was able to recognise in חילך (Ezek. 27 11) the name Cilicia, the *Ḫilakku* of the cuneiform monuments.

𝔊—in its original form—often preserves excellent readings which have quite disappeared from our other authorities. Thus 'in 2 K. 15 10 Grätz's clever conjecture (*Gesch. der Juden*, ii. 1 99) ביבלעם for the un-Hebraic קבל־עם is confirmed by Lucian' (ἐν Ιεβλααμ, quoted in Driver, *TBS*, p. lii note). Another example is furnished by Dr. Hayman's too little known emendation of Dt. 33 21 (*Proc. Cambridge Philol. Soc.* 1895, p. 8), the essence of which is the substitution of ויתאספון for the impossible ספון ויתא. The phrase is then exactly parallel with *v.* 5.[2] Here also 𝔊 appears to support the true reading; but ὅτι ἐκεῖ ἐμερίσθη γῆ ἀρχόντων συνηγμένων ἅμα ἀρχηγοῖς λαῶν is too paraphrastical to suggest the actual change required. The cause of the corruption here in the Massoretic text may have

[1] This is especially the case with the Babylonian Targum. The Jer. Targum sometimes differs—*e.g.*, in Exod. 40 3 it reads כפרת for פרכת, with the Samaritan *and the Old Latin*.

[2] 𝔊 of this passage cannot be correctly preserved, for the constant rendering of 'Edom' in the Prophets is ἡ Ἰδουμαία, not (as here) Ἐδώμ.

[1] Nestle, *ZATW*, 1884, p. 243; see ABOMINATION OF DESOLATION.

[2] Translate: 'And [Gad] saw the first fruits were for him, for there was the allotment of the Lawgiver, and so the chiefs of a people were assembled together.' The reference appears to be to the settlement of Gad on the E. of Jordan (cp Nu. 32).

been a transposition, the word having been written סִפּוֹ / ויתא at the end of a line in the archetype.

Some corruptions are older than any of the versions, perhaps older than the final redaction of the Pentateuch. Thus all extant authorities give וילך שפי as the end of Nu. 23 3, generally translated: 'And he [Balaam] went to a level place.' Apart from the grammatical harshness, however, this and every other sense which these letters can be made to bear are alike poor, and Kuenen has suggested that at some period *before the development of medial* כ the letters לך had been written once instead of twice over; then by reading the final י as ו (or supposing ו to have been lost before the following ויקר) we get וילדלךשפיו (*i.e.*, וַיֵּלֶךְ לִכְשָׁפָיו), 'he went to his incantations.' This agrees with Nu. 24 1, where we read that Balaam 'went not, as at other times, to seek for enchantments.'

Equally brilliant is Lagarde's emendation of Ps. 32 6. For לעת מצא רק לשטף he writes לְעֵת מֵצַר קֹל שֶׁטֶף—*i.e.*, מצר has been written מצאר (for מֵצַר) by some scribe. Translate 'in the time of distress; the sound of the flood of mighty waters shall not come nigh him.' Finally, we may quote Wellhausen's restoration of the original of 2 K. 19 26 *f.* (=Is. 37 27 *f.*). For לִפְנֵי קָמָה: (27) ושבתך he writes לְפָנַי קָמְךָ ושבתך (27): so that *v.* 27 begins 'Before me is thy rising up and thy sitting down, and thy going out and coming in I know.' It is worth while pointing out, as a final testimony to the excellence of 𝔊 in its original form, that this palmary emendation is not without support from 𝔊. In Is. 37 27 the לפני קמה of MT is omitted. In 2 K 19 26 most documents have ἀπέναντι ἑστηκότος for לפני קמה, but the text called 𝔒 in the Syro-Hexaplar MSS (see col. 5019) had ἀπέναντι ἀναστάσεώς σου—*i.e.*, לפני קמך, the consonantal text suggested by Wellhausen.

In concluding an article of any length on the textual criticism of the Bible it is always wholesome to remind oneself of the comparative soundness of the text. That there are blots, especially in the OT, some of them probably irremovable, must be admitted; but they are not enough seriously to obscure the main features of the narratives related or the ideas expressed. So far as the Pentateuch is concerned we may be especially at our ease. It would have been impossible to separate the documents with the minuteness which modern scholarship has found possible if the text had been much confused by scribal errors. And with regard to the Prophets, though their works are less accurately preserved than the Pentateuch, we can be sure that textual corruption never improves the style or the thought. The fact that so much of the Prophetical Books is—judged by any standard—of the first rank as literature, is the strongest proof that they have not been utterly disfigured in transmission.

67. Bibliography. Some of the most important bibliographical references have already been indicated above. The best general account of the text and versions of the OT in any language is Wellhausen's monograph in the fourth edition of Bleek's *Einleitung in das Alte Testament*, Berlin, 1878, §§ 275-298; later edd. are arranged on a different plan. Somewhat similar in plan, but more confined to the special books treated of, are the introductions in Driver's *Notes on the Hebrew Text of the Books of Samuel*, pp. xxx-lxxxiv, and in Cornill's *Ezechiel*, 1-160. Klostermann, quoted by Driver, p. lii, says 'Let him who would himself investigate and advance learning, by the side of the other Ancient Versions, accustom himself above all things to the use of Field's *Hexapla*, and Lagarde's edition of the Recension of Lucian.' To these specially valuable authorities the present writer would add any well edited fragment of the Old Latin.

F. C. B.

THADDÆUS. In Mk. 3 13 ΘΑΔΔΑΙΟϹ appears tenth in the list of apostles. Λεββαῖος is here a western variant (D a b ff[1] i q). In Mt. 10 3 Θαδδαῖος is

1. Name. the right reading (אB), but Λεββαῖος is found in western texts (D 122 Aug.), and the conflate Λεββ. ὁ ἐπικληθεὶς Θαδδ. in the late 'Syrian' text. Θαδδαῖος has been derived from the Heb. שַׁד=Syr. *thĕdā*=*mamma*, and Λεββαῖος from לֵב=*cor.* But Dalman (*Worte Jesu*, 40) connects Θαδδαῖος with Θευδᾶς and Λεββαῖος with the Nabatæan לבאי. WH (*Notes*, 11) suppose Λεββαῖος to be due to an attempt to bring Levi (Mk. 2 14) within the number of the Twelve. But we should have expected Λευείς. Λεββαῖος=Λευείς is unparalleled. It seems clear that Λεββαῖος is a 'Western' gloss of a copyist who connected Θαδδαῖος with *thĕdā*=*mamma*, and wished to substitute a not dissimilar name which should be more appropriate to an apostle, and less undignified. If Λεββαῖος can be thus explained as an early emendation the difficult Θαδδαῖος remains. Dalman's Θαδδαῖος=Θευδᾶς is improbable. It is more likely that Θαδδαῖος, by corruption in Greek or Aramaic, represents an original יה(ו)דה or יה(ו)דא. For the θ cp θουδουια [B]=הודוה, Neh. 7 43 (see HODAVIAH), θυηλ [B*vid.א]=אואל, Ezra 10 34 (see UEL); θουε [B]=אהוא (Ahava), Ezra 8 21; θελκαθ [A]=חלקת (Helkath), Josh. 21 31; θασειρει [B], θασουρ [A]=אשורי, 2 S. 2 9 (see ASHURITES); θασοβαν [AD], -μ [L]=אצבן (Ezbon), Gen. 46 16. For the doubled δ and the ending -αῖος cp ידי='Ιαδδαῖος, De Vogüé, *Syr. Cent.* 63.

In Lk. 6 16 Acts 1 13 Ἰούδας Ἰακώβου=Judas, *son* of James,[1] takes the place of Thaddæus. See JUDAS, 7.

2. Identification. It may, therefore, be reasonably conjectured that Judas was the name of the apostle, that Thaddæus is a corruption of Judas, and that Lebbæus is a gloss upon Thaddæus. Of James, the father of Judas, nothing is known. Syr. Cur. has here *Judas Thomas*, and Syr. Sin. *Thomas* (see THOMAS). The evidence of the Gospels being so confused we not unnaturally find great uncertainty in the post-biblical tradition. In Origen (*Præf. ad Rom.*) Thaddæus=Lebbæus=Judas Jacobi. In the *Chron. Pasch.* Thaddæus=Lebbæus=Barsabas, whilst Judas Jacobi=Simon the Canaanite. In the Abgar legend preserved by Eusebius (*HE* 1 13) Thaddæus is distinguished from Judas Jacobi=Thomas. In the *Acta Thomæ* Judas Thomas is the Lord's brother. According to the Syrian Ischodab (9th cent.) quoted by Zahn (*Einl.* 2 263) the *Diatessaron* identified James son of Alphæus with Lebbæus (note that D in Mk. 2 14 has Ἰάκωβον for Λευεὶν).

The earliest form of legend connected with Thaddæus is that which represents him as preaching at Edessa. A very exhaustive bibliography of the literature and sources of this tradition may be found in von Dobschütz, *Christusbilder*, 158*-249*. In the account given by Eusebius (*HE* 1 13) from Syriac sources, Thaddæus the Apostle, one of the Seventy, was sent by the Apostle Judas Thomas to Abgar, king of Edessa, in accordance with a promise made by Christ before his death. In the later Syriac legend (*Doctrina Addai*, 4th cent.? ed. Phillips) Addai is substituted for Thaddæus. In the Gk. Πράξεις Θαδδαίου (Lips. *Acta Apost. Apocr.* 1 273-278) Lebbæus is identified with Thaddæus, one of the Twelve. For this and the later legends which represent Thaddæus as preaching in Armenia, in Syria and Mesopotamia, and in Persia, see Lips. *Dict. Christ. Biog.*, *s.v.* 'Thaddæus.' W. C. A.

THAHASH, or (RV) **TAHASH** (תַּחַשׁ, ΤΟΧΟϹ, [ADL]), a name in the Nahorite genealogy (Gen. 22 24†).

He is identified by Winckler (*Mittheil. d. Vorderas. Ges.*, 1896, p. 207) with Tiḥis, mentioned in the so-called Travels of an Egyptian (*Pap. Anast.* i. 22 3; see *RP* 2 111) and elsewhere, as in the region of Kadesh on the Orontes (to the N.). Cp WMM, *As. u. Eur.* 258. But see also TEBAH. T. K. C.

THAMAH (תֶּמַח, ΘΕΜΑ [BA]), Ezra 2 53 AV, RV TEMAH (*q.v.*).

THAMAR (ΘΑΜΑΡ [Ti. WH]), Mt. 1 3. See TAMAR.

THAMNATHA (ΘΑΜΝΑΘΑ [AאV]), 1 Macc. 9 50. See TIMNAH (3).

THANK OFFERING (תּוֹדָה), 2 Ch. 29 31 etc. See SACRIFICE, § 29 *b*.

THARA (ΘΑΡΑ [Ti. WH]), Lk. 3 34 AV, RV TERAH.

THARRA (ΘΑΡΡΑ [Bא c.a AL]), Esth. 12 1. See TERESH.

THARSHISH (תַּרְשִׁישׁ), 1 K. 10 22 AV, RV TARSHISH (*q.v.*).

THASSI (ΘΑϹϹ[Ε]Ι [אV]), 1 Macc. 2 3. See SIMON (1), and MACCABEES, §§ 1, 5.

[1] So *Syr. Sin.* Mt. 10 3 Lk. 6 16; Pesh. Lk. 6 16 Acts 1 13.

THEATRE. Although theatres and amphitheatres were erected by the Herods in Jerusalem and other towns of Syria (Jos. *Ant.* xv. 8 1, 9 6, xvi. 5 1, xix. 7 5, 8 2; *BJ* i. 21 8, ii. 7 2) in which magnificent spectacles were exhibited, principally in honour of the Roman emperors, there is no reference to them in the Gospels or Acts. Even in narrating the death of Herod Agrippa (Acts 12 21 *f.*), whose fatal seizure, according to the Jewish historian, took place in the theatre at Cæsarea (*Ant.* xix. 8 2), the word does not occur. The word theatre is absent alike from the canonical and from the apocryphal books of the OT, and in NT is found only in Acts 19 29-31 where the theatre of Ephesus is spoken of. It was probably the usual place of meeting for the assembly; and the ruins can still be seen (see EPHESUS, § 3).

1 Cor. contains two probable references to theatrical representations, neither of which is very apparent in EV. The word translated 'spectacle' (1 Cor. 4 9) is θέατρον, and the whole passage seems to refer to 'the band of gladiators brought out at last for death, the vast range of an amphitheatre under the open sky well representing the magnificent vision of all created beings, from men up to angels, gazing on the dreadful death-struggle; and then the contrast of the selfish Corinthians sitting by unmoved at the awful spectacle' (Stanley, *Corinthians*, 73). Cp Heb. 10 33 'being made a gazing-stock' (θεατριζόμενοι). In 1 Cor. 7 31, 'the fashion of this world passeth away' (**παράγει τὸ σχῆμα τοῦ κόσμου**), many have seen an allusion to the drama, drawn either from the shifting of the scenes, or the passing across the stage of the gorgeous processions then so common.

Ancient history records the name of at least one Jewish dramatist—Ezekiel, who lived in Alexandria in the second century B.C. and wrote a 'tragedy' or dramatic poem, entitled *The Exodus* (Ἐξαγωγή), of which considerable fragments are preserved in Clem. Alex. (*Strom.* 1 23), Eusebius (*Præp. Ev.* 9 28 *f.*) and Eustathius (*ad Hexaëm.* 25). On the question of a Semitic drama cp CANTICLES, § 7, POETICAL LITERATURE, § 4 (5).

THEBES. See NO-AMON.

THEBEZ (תֵּבֵּץ), where Abimelech was killed whilst besieging the citadel (Judg. 9 50: θηβης [BL], θαιβαις [A]; 2 S. 11 21 and *v.* 22 in 𝔊, θαμας[ε]ι [BA, -μεσσει [L]), was situated, according to Eusebius and Jerome (*OS*, 262 44, 157 15), 13 R. m. from Neapolis on the road to Scythopolis. Starting from this, Robinson plausibly identifies Thebez with the mod. *Ṭūbās*, a large village on the W. slope of a fruitful valley, 10 m. due NE. from Nāblus. So Buhl, *Pal.* 204 and the *PEF Survey.*

But is this correct? Ṭūbās suggests rather טוּבָץ. Apart from this, the form of the name is peculiar. We expect some famous fortress to be referred to. From the point of view of SHECHEM, 2, one may naturally think of Zephath (= Zarephath); צפת might easily be written צבת, out of which by transposition would come תבץ. This seems to give greater vividness to the narrative.

T. K. C.

THECOE (θεκωε [AℵV]), 1 Macc. 9 33 AV, RV TEKOAH.

THELERSAS (θελερσας [B]), 1 Esd. 5 36. See TEL-HARSHA.

THEMAN (θαιμαν [BAQΓ]), Bar. 3 22 *f.* AV, RV TEMAN.

THEOCANUS (θωκανου [A], θοκ. [B]), 1 Esd. 9 14 AV = Ezra 10 15, TIKVAH (*q.v.*).

THEODOTUS (θεοδοτος [AV]), one of Nicanor's ambassadors to Judas the Maccabee in 161 B.C. (2 Macc. 14 19).

THEOPHANY. The invisibility of God formed no part of early Hebrew belief. Although it was commonly

1. Immediate. thought that to see God (or indeed to hear his voice Dt. 4 33 5 23 *ff.* [20 *ff.*]) was dangerous and even fatal (Ex. 33 20 Judg. 13 22 cp Gen. 16 13[1] Ex. 3 6 19 21 Judg. 6 22 *f.* 1 K. 19 12 *f.* Is. 6 5), many narratives, including those just cited, record cases in which men saw God, or at least perceived hrough the senses that he was present, and yet lived. The most striking of these is in Ex. 24 10 (JE) where it is quite simply related that Moses and Aaron, Nadab and Abihu, and seventy elders of Israel, having gone up Mt. Sinai, saw the God of Israel. The narrator is well aware of the exceptional character of the occasion, for in the next verse he expressly records that God 'laid not his hands' upon them; but he gives no hint that what was seen was anything less than the fullness of the glory and person of the deity or that it was seen in any other way than by ordinary vision. Cp Nu. 12 6-8 (E).

In most cases, however, it is implied that the deity, although he makes his presence known by a physical appearance, does not manifest himself in his fullness to the ordinary human eye. We may conveniently classify the OT theophanies into those in which the appearance is of the human form and those in which it is some other physical phenomenon.

1. *Theophanies in human form.*—(*a*) Ex. 24 10 records, as we have seen, a complete exception to the

2. In human form. law that the sight of God was fatal. The nearest parallel to this occurs in Ex. 33 17 *ff.* (J), which relates that Moses saw the back of Yahwè as he passed away, but that even he could not with safety see the face of Yahwè. In other narratives, however, it is just the face of God which is seen—Ex. 33 11 (E), Gen. 32 30 [31] (probably E); in Nu. 12 6-8 it is said that Moses, unlike others (cp Dt. 4 12 15), in his customary and immediate intercourse with Yahwè sees his form or tĕmūnāh (something less distinct than his appearance—cp Job 4 16). But these are only typical cases in connection with the present subject, in which looseness and inconsistency of expression correspond to looseness and variety of thought. We are dealing with popular ideas and expressions, not with theological and systematic thought. What is common to the present type of theophany is that the sight of God is partial.

(*b*) In another type the peculiarity consists in the fact that God is seen in human form indeed, but only by

3. In vision. means of dream or vision (cp Nu. 24 3 *f.*). So we should probably interpret the experience of Isaiah (Is. 6) and certainly those of Ezekiel (Ezek. 1 etc.) and Daniel (Dan. 7 2 9). Cp Gen. 28 13-16 (J).

(*c*) But the commonest type of a theophany in human form[2] was by means of the 'angel of Yahwè' or 'of

4. 'Angel of Yahwè.' God' (מלאך יהוה, מ׳ אלהים). Cp ANGEL, § 2; NAME, § 6. The narratives clearly identify the 'Angel of Yahwè' with Yahwè, though often in the same narrative a certain differentiation is also implied. Thus in Gen. 16 the angel of Yahwè who appears to Hagar is called 'Yahwè who spake unto her' (*v.* 13), and Hagar expresses surprise that she still lives after seeing God (cp further *v.* 10 with *e.g.*, 12 2). On the other hand in *v.* 12 the angel speaks of Yahwè in the third person.

For further illustrations from other narratives of this identification, see Gen. 22 11 *f.* Ex. 3 (angel of Yahwè, *v.* 2 = Yahwè, *vv.* 4*a* 5 7), Nu. 22 32-35 (cp especially *v.* 35 with 24 13), Judg. 2 1-5 6 11-24 (angel of Yahwè, *vv.* 11 *ff.* 20 *ff.* = Yahwè, *vv.* 14 16 23), 13 23; for indications of differentiations see Gen. 24 7 40—yet cp *vv.* 27 48 Nu. 22 31 Judg. 13 8 *f.* 2 S. 24 15-17.[3] See also DESTROYER.

[1] Read 'Have I even seen God and am I (still) alive?' So Ball in *SBOT* in accordance with a large consensus of critical opinion. See BEER-LAHAI-ROI, § 1.

[2] In Ex. 3 2 the 'angel of Yahwè' exceptionally manifests himself in 'a flame of fire,' presumably not in human form.

[3] The Yahwistic narrative in Gen. 18 *f.* presents special peculiarities. Yahwè appears to Abraham (18 1) as three men (*v.* 2) who speak or are addressed sometimes in the singular (*vv.* 3 10), sometimes in the plural (*vv.* 4 *ff.*). Subsequently (16-33) one of the three, who is identified with Yahwè, remains behind with Abraham, the other two, who are described in 19 1

In brief, the 'angel of Yahwè' is an occasional manifestation of Yahwè in human form, possessing no distinct and permanent personality but speaking and spoken of, at times as Yahwè himself (cp the way in which the word of Yahwè passes over insensibly into the prophetic comment), at times as distinct from him. The danger which attached to the sight of God attached also to the sight of the angel. The two early literary strata of the Hexateuch differ in their detailed accounts of the angel. In J he eats, drinks, and converses with men, and in every respect comports himself as a human being—the narratives of Judg. 6 13 are also in many respects similar; in E there is a tendency to keep even the angel from close contact with men—thus he appears in and speaks from heaven (*e.g.*, Gen. 22 11).

At a later date, theophanies in (human) form were denied (Dt. 4 15) or, as regularly in P, the theophany is referred to in the barest possible terms without any indication of its character—*e.g.*, 'And God [or 'Yahwè'] appeared . . . and spoke (said)' (Gen. 17 1 35 9; cp Ex. 6 3); and thus (after the Exile) the 'angel of Yahwè' was no longer regarded as a theophany but became one of the numerous distinct angelic personalities which thenceforward formed prominent objects of belief (see ANGEL, § 3 *f.*).

2. *Theophanies in which the manifestation is not in human form.* (*a*) Fire, in one form or another, fre-

5. Fire.

quently indicated the divine presence. The most notable illustrations of this are the 'Burning Bush' (Ex. 3) and the 'Pillar of Fire' (Ex. 13 21). In Ex. 14 19*b* (J) the 'pillar of cloud' = 'the angel of God,' *v.* 19*a* (E). For further details see the articles BUSH and PILLAR OF FIRE. But there are a number of other passages where fire or a fiery appearance clearly has the same significance—*e.g.*, Gen. 15 17 Ex. 19 18 24 17 Dt. 4 12 15.

We ought also to compare the part played by fire in the destruction of Nadab and Abihu (Lev. 10), of Korah and his company (Nu. 16 35), of the people at Tab'erah (Nu. 11 1-3), in Elijah's conflict with the priests of Baal (1 K. 18, cp 2 K. 1 10 *ff.*), in the theophany at Horeb (in 1 K. 19 11 *f.*, where fire is not itself the theophany but an accompaniment of it), in the assumption of Elijah (2 K. 2 11), and generally in the later literary theophanies (see below, § 9), and in similes (*e.g.*, Is. 10 17; 'Yahwè is a devouring fire,' Dt. 4 24 9 3). Cp also the Arabic stories of fiery appearances of the jinn; Goldziher, *Abh. zur Arab. Philologie*, 205 *ff.*

Even in the NT we find, in addition to citations from or references to the OT (*e.g.*, Acts 7 30 Heb. 12 18 29), two or three instances of theophanic fire; the fire clearly indicates, or is the accompaniment of, the divine presence in Acts 2 3 2 Thess. 1 8 (of the second coming of Christ) 2 Pet. 3 10-12 Rev. 10 1 (of an angel); perhaps also Mt. 3 11 = Lk. 3 16 should be compared. Generally, however, in NT (as already in Enoch; *e.g.*, 10 13 21 7-10 98 3) fire is the instrument of the divine punishment and does not necessarily or explicitly affirm the divine presence. The transition from the older to the later conception was facilitated by such passages as Am. 5 6 Is. 33 14 (cp 66 24) Mal. 3 2, and is actually seen in certain NT passages—2 Thess. 1 8 2 Pet. 3 10-12 1 Cor. 3 13-15.

(*b*) The 'glory of Yahwè' (כבוד י״), which from Isaiah (6 3) onwards (*e.g.*, Nu. 14 21 *f.* Dt. 5 21 [24] Ezek. 39 21

6. Glory of Yahwè.

Ps. 8 1 19 2 [1] 96 3) expresses the manifestation of the divine character in nature and history, is used by Ezekiel to express also the fiery appearance which, in his visions, indicates the presence of Yahwè—1 28 10 4 43 2 etc. In P the phrase is invariably used of a fiery theophany—in the first instance of the theophany on Sinai (Ex. 24 15 17) and, subsequently, of that in the tabernacle—Ex. 29 43 40 34 *f.* 16 7 10 (in *v.* 10 restore המקדש, tabernacle, for the redactorial המדבר), Lev. 9 6 23 Nu. 14 10 16 19; cp further, 1 K. 8 10 *f.*, which is dependent on P (Corn. *Einl.* 108). In its last usage the phrase corresponds closely to the Shechinah of post-biblical Hebrew. The fact that the 'glory of Yahwè,' where it indicates a fiery appearance, is so frequently associated with cloud and the similar combination of fire and cloud in the stories of the Pillar of Fire and Cloud (*q.v.*) may be, in part at least, explained as modified survivals of an old view, which also maintained itself in greater purity in poetical passages (*e.g.*, Pss. 18 29), that Yahwè manifested himself in the thunder-storm.

as 'the two angels,' proceed to Sodom; but these in turn are addressed and speak in the singular (*vv.* 19-21), and speak and act as Yahwè himself (*vv.* 21 *ff.*).

(*c*) Closely related to the term just discussed, and in some cases almost synonymous with it, are the 'Name

7. 'Name' or 'Face' of Yahwè.

of Yahwè' and the 'Face of Yahwè'; the former stands in parallelism with the 'glory of Yahwè' in Is. 59 19 Ps. 102 15. The most strictly theophanic passage in which either occurs is Is. 30 27, and even that is clearly figurative. Cp NAME, § 6. Generally speaking, both terms are used of God as made known to men, but rather by some decisive event, or otherwise indirectly, than by a physical phenomenon. In Phœnician, on the other hand, 'the face' or 'name of Baal' is a goddess—עשתרת שם בעל ,תנת פן בעל (cp Baethg. *Beitr.* 56 *f.* 267 *ff.*, also NAME, § 6; and see Fr. Giesebrecht's monograph, *Die Alttestamentliche Schätzung des Gottesnamens u. ihre religionsgeschichtliche Grundlage* [1901]).

Two remarks are suggested by the preceding survey. (1) The belief that fire, especially the lightning of the

8. General estimate.

storm, was the physical indication of Yahwè's presence may lie at the base of the belief in the danger of beholding Yahwè's face; at the same time, it must be remembered that analogous beliefs occur in other religions. (2) A large proportion of the stories are connected with the Exodus and the subsequent Wanderings. The idea of the 'Angel' or 'Messenger of Yahwè' may well have sprung out of an attempt to reconcile the belief that Yahwè abode in Sinai, and yet that he accompanied Israel to Canaan (cp Ex. 23 20-23). A similar conflict would still have called for reconciliation when Yahwè was regarded as seated in heaven.

In addition to the narratives of theophanies where the theophany is regarded as sober historical fact, we have numerous

9. Later.

purely literary theophanies—*i.e.*, descriptions clearly intended by the writers to be metaphorical and imaginative. Some of these are conceived in the boldest anthropomorphic manner (cp, *e.g.*, the descriptions of Yahwè as a warrior—Is. 63 1-6 59 15*b ff.*); in others, figures drawn from the storm or other natural phenomena play a large part (cp, *e.g.*, Ps. 18 Hab. 3).

In the NT we have angelophanies (see ANGEL, § 7), but (except as indicated above, § 2 *a*, *ad fin.*) no occasional theophanies such as the OT records. Instead, we have the life of Jesus which, most clearly by the author of the fourth gospel, but also by other NT writers, is regarded as a prolonged manifestation of God in the flesh (cp especially Jn. 1 1-3 14, and *e.g.*, Rom. 1 1-7 Col. 1 15 *ff.* 2 9 Heb. 1 1-3). In the same way the belief in the *Parousia* is tantamount to the expectation of a coming theophany.

THESSALONIANS (EPISTLES TO)

Place and time (§ 1).	Its authorship (§ 8).
Character of epistles (§ 6).	2 Thess. (§ 4 *f.*).
Thessalonian Christians (§ 7).	Its authorship (§§ 9-15).
1 Thess. (§ 2 *f.*).	Bibliography (§ 16).

The two Epistles to the Thessalonians were written,

not in Athens (cp 1 Thess. 3 1) as stated in the subscription to the epistles in the *Textus Receptus*, but in Corinth during Paul's first visit there recorded in Acts 18 1 *ff.* This appears from the following considerations :—

1. Place and time.

i. The names of Silvanus and Timothy are joined with the name of Paul in the salutations of both epistles, and they were with Paul in Corinth during his first visit there, according to Acts 18 5, which is confirmed by 2 Cor. 1 19. A considerable period had elapsed since Paul left Thessalonica, for the fame of the Thessalonian Christians had already spread throughout Macedonia and Achaia (1 Thess. 1 7 *f.*), and Paul must have laboured at least for some months in Achaia, as may be gathered from the spread of Christianity in that province implied in the same passage. Timothy had been sent back to Thessalonica from Athens, and had had time to return and make his report to the apostle (1 Thess. 3 2 6), and this return may fairly be identified with the arrival of Silas and Timothy in Corinth, mentioned in Acts 18 5. See TIMOTHY, § 3 ; cp SILAS.

ii. On the other hand, the epistles cannot have been written at a time subsequent to Paul's first visit to Corinth, for the first of them was evidently written immediately after the return of Timothy from Thessalonica, whither he had been sent by Paul from Athens (1 Thess. 3 6); the Thessalonian church was apparently still a young church (1 Thess. 1 9), and, finally, there is no sign that Paul and Silvanus and Timothy were together again after the first visit in Corinth ; cp SILAS.

The epistles were written probably in the year 48 or 49,[1] or, according to the generally accepted chronology of Paul's life, in 53 or 54.[2] They are commonly regarded as the earliest of Paul's epistles ; but there is good reason for thinking the Epistle to the Galatians still earlier.[3] The notable lack in 1 and 2 Thessalonians of the doctrinal element which is so prominent in most of Paul's epistles counts for nothing in the matter of date, for in any case they were written later than the Council of Jerusalem, sixteen years or more after Paul's conversion, and an interval of only some five years separates them from the Epistle to the Romans, and still less from Galatians and Corinthians. As a matter of fact, the simplicity of the Thessalonian epistles and the absence of the great characteristic Pauline doctrines are to be explained, not by the date of the epistles, but by the particular circumstances which called them forth.

Those circumstances are indicated with sufficient clearness in the epistles themselves. Paul had been compelled to leave Thessalonica before he wished to do so, and under circumstances which made him fear for the permanence of his work there (1 Thess. 2 17 3 1 *f.*). He had apparently been driven away from the city by a persecution which continued to assail the disciples after his departure. Whether this persecution is to be directly connected with the attack of the Jews upon Paul recorded in Acts 17 5 *f.* is uncertain. At any rate, if the persecution was begun at the instance of the Jews, it was carried on afterwards by the Gentiles, and it was at their hands that the Christians of Thessalonica chiefly suffered (1 Thess. 2 14).[4] The persecution was so severe that Paul feared his Thessalonian converts might lose courage and renounce their faith, and he therefore greatly desired to return himself to Thessalonica (1 Thess. 2 17 *f.*). For some reason, however, possibly because his friends had given bonds for his continued absence (Acts 17 9), he was unable to do so, and he therefore sent Timothy from Athens to encourage and strengthen his converts and to bring him news concerning them (1 Thess. 3 1 *f.*).[5]

2. 1 Thess. : occasion.

It is possible that Timothy also carried a letter from Paul to the Thessalonian church (see Rendel Harris in *Expos.* 8 174 [1898]); but we have no evidence of such a letter, and the information which Paul gives his readers in 1 Thess. 2 17 3 5 rather argues against an earlier communication from him. But though we have no adequate ground for assuming that Paul sent to Thessalonica another epistle before our 1 Thessalonians, there is some reason for thinking that the Thessalonians sent a letter back to Paul by Timothy (see Harris, *ibid.* 167 *f.*). Harris finds evidence of such a letter in 1 Thess. 1 2 5 2 1 5 9 10 13 3 3-6, and also in 1 9, where he suggests the alteration of 'they report' (ἀπαγγέλλουσιν) to 'you report' (ἀπαγγέλλετε), in order to bring it into line with 2 1 ; and he gives a tentative reconstruction of the letter on p. 172. 'Also we' (καὶ ἡμεῖς) in 2 13, 'also I' (κἀγώ) in 3 5, the conventional epistolary formula 'ye have good remembrance of us' (ἔχετε μνείαν ἡμῶν ἀγαθήν κ.τ.λ.) in 3 6, 'for you yourselves report concerning us' (αὐτοὶ γὰρ περὶ ἡμῶν ἀπαγγέλλετε) in 1 9 (to adopt the reading suggested by Harris) may fairly be regarded as pointing to a Thessalonian epistle ; but beyond these hints we can hardly go. It will not do at any rate to regard the words 'ye know' (οἴδατε) as evidence of such an epistle, for we cannot well suppose that the Thessalonians gave Paul an account of his sufferings in Philippi (2 2).

The report which Timothy brought back from Thessalonica was upon the whole very cheering ; but he informed Paul of the existence of certain evils among the Thessalonians which demanded the apostle's attention. The common fleshly impurity of the heathen world, especially prevalent in a great commercial metropolis like Thessalonica, had not been entirely overcome by the Thessalonian Christians (1 Thess. 4 4 *f.*) ; a spirit of enthusiasm was abroad among them which led them to neglect their ordinary employments and so bring disrepute upon the brotherhood (1 Thess. 4 11 *f.*) ; and there was on the part of some a tendency, entirely natural where fanaticism had so free play, to disregard the counsel and authority of the leaders of the church (1 Thess. 5 12 *f.*). On the other hand, in opposition to the common enthusiasm, there were some who 'despised prophesyings' and frowned upon all spiritual manifestations (1 Thess. 5 20). It looks also as if some of the disciples were casting aspersions upon the character and motives of Paul himself, possibly because he had left the city during a time of persecution. At any rate he felt obliged to defend himself in his epistle against various charges, such as covetousness, avarice, selfishness, and personal ambition (1 Thess. 2 1-12). Finally, the Thessalonians had apparently asked the apostle a question touching the fate of Christian brethren dying before the return of Christ (1 Thess. 4 13 *f.*). Evidently they had believed that Christ would come so soon that they should all be alive to greet him ; but as time passed some of their number died and Christ still tarried. The question naturally forced itself upon them, Were such brethren to be deprived of the privilege of seeing the Lord at his coming and sharing his glory? Either Timothy was asked to consult the apostle upon the matter, or the question was raised in the epistle to the Thessalonians referred to just above. It was due to all these circumstances that Paul wrote his first epistle to the Thessalonians.

The epistle has no central theme, nor is it a studied composition constructed upon a well-defined plan. It is a familiar letter in which expressions of affection and words of exhortation and warning follow one upon another with no attempt at logical arrangement.

3. Contents.

After a salutation, in which the names of Silvanus and Timothy are joined with his own (1 1), Paul expresses his gratitude, beginning with the conventional terms of contemporary correspondence (see Harris, *ibid.*), for the faith and steadfastness of the Thessalonians (1 2-8), and reminds them of his own conduct while among them, of his devotion and self-sacrifice which some bad evidently called in question (2 1-12), gives utterance to his joy at the reception they had given his message, and at the steadfastness they had shown in the face of persecution (2 13-16), tells them of his anxiety about them while in Athens and of his great desire to see them, which resulted, when he could not go himself, in his sending Timothy to visit them (3 1-5), and which is now fully relieved by the good news brought by him (3 6-10). The commendatory, apologetic, and explanatory portion of the letter is concluded with a beautiful prayer for the readers' growth in grace (3 11-13).

The passage just referred to serves at the same time to introduce the second and hortatory section of the epistle (4 *f.*). After emphasising the importance of purity (4 1-8), of brotherly love (4 9 *f.*), and of quietness and diligence in daily business

[1] According to the chronology of Paul's life adopted by Kellner, *Katholik*, 1887, 1 146 *f.*, O. Holtzmann, *NTliche Ztgesch.* (1894), Blass, *Acta Apostolorum* (1895), Harnack, *Chronol.* (1897), M'Giffert, *Hist. Christ. in Apost. Age* (1897), and some others.

[2] Cp CHRONOLOGY, § 72 *ff.*

[3] See M'Giffert, *l.c.* 226 *f.* ; Zahn, *Einl.* 1 138 *f.* ; Bartlet, *Apostolic Age*, 84 ; Bacon, *Introd. to NT*, 57.

[4] Zimmer (*Der erste Thessalonicherbrief*, 34, 94 *f.*) takes the opposite view, but without sufficient warrant.

[5] Of this mission of Timothy to Thessalonica we hear nothing in Acts. In fact, there is no hint in Acts that Timothy was with Paul in Athens, as we know from 1 Thess. that he was.

(11 *f.*), the apostle turns to the subject of eschatology and instructs the Thessalonians, first, touching the brethren dying before the return of Christ (4 13-18), and secondly, touching the uncertainty of the time of the Parousia, which makes it necessary to be constantly watchful and zealous (5 1-11).[1] Then follow various exhortations having especial reference to the disciples' association with each other as a Christian brotherhood (5 12-22), and the epistle closes with a petition for their perfect sanctification (23 *f.*), a request for their prayers (25), a salutation, and a benediction (26-28).

The epistle apparently accomplished its purpose, for we hear nothing more of aspersions upon Paul's character, and the Thessalonians seem to have needed no further instruction as to the resurrection of the dead. But Paul's words touching the Day of the Lord (5 2 *f.*) evidently led them to believe that the Parousia was imminent, and some of them in their expectation of the immediate return of Christ were greatly excited and were neglecting their ordinary employments (2 Thess. 2 1 *ff.*). It is possible that it was this expectation which had led them to similar fanaticism before Paul wrote his first epistle (1 Thess. 4 11 *f.*); but if so he cannot have been aware of it, or he would have dealt with the matter in that epistle.

4. 2 Thess.

How Paul learned of the existing situation we do not know. It is not impossible that he had received another letter from the Thessalonians in answer to his former one (see Bacon, *l.c.* p. 72); but we have no positive evidence of it. At any rate, however the news reached him, it led him to write a second epistle intended to put a stop to such unwarranted fanaticism.[2]

5. Its contents.

After commending the patience and faithfulness of the Thessalonians (2 Thess. 1 1-4), as he had done in the first epistle, and comforting them with a reference to the recompense which God will render both them and their enemies (1 5-12), he proceeds at once to his main point. When he wrote before, he supposed that an exhortation to go about their daily business with quietness and diligence would suffice to put a stop to their fanatical conduct, and that they needed no special instruction touching the time and the season of the consummation (1 Thess. 5 1). He saw now, however, that it was because they believed that Christ might come at any moment that their minds were disquieted, and so he reminded them that certain events must occur before the consummation. The 'man of sin,' the 'son of perdition,' the 'lawless one' must be revealed as he had told them when he was with them (2 Thess. 2 5); but he cannot be until 'that which now restraineth (2 Thess. 2 6 τὸ κατέχον, *v.* 7 ὁ κατέχων) has been taken out of the way' (2 Thess. 2 3-10).[3]

This eschatological passage is followed by renewed commendations, and by exhortations to steadfastness and patience, sobriety and diligence (2 13-3 15), and the epistle concludes with benedictions and with a salutation from Paul's own hand, which he asserts is the token in every letter (3 16-18).

It would seem that those disciples who were insisting that the Parousia was immediately at hand were appealing to a letter bearing Paul's name (2 Thess. 2 2); but as he was not conscious of having written anything to support their opinion, he concluded that they must be making use of a forged document, and so he was careful to call attention to his autograph signature which guaranteed the genuineness of all his letters. It is not likely that Paul's surmise was correct, for it can hardly be supposed that any one would venture to palm off a forged letter upon the Thessalonians so soon after the apostle's departure, and as a matter of fact the eschatological passage in the first epistle (5 1-11) was of such a character that it might easily serve to promote the belief in the immediate consummation, though he seems not to have realised it.

6. Character of epistles.

The Epistles to the Thessalonians are almost wholly personal and ethical and throw very little light upon Paul's theological views,[1] except in the matter of eschatology to which there are a great many allusions. Thus, the Parousia of Christ is referred to in 1 Thess. 1 10 2 19 3 13 4 15 *f.* 5 2 *f.* 23 2 Thess. 1 7 *f.* 2 1 *f.*; the judgment in 1 Thess. 1 10 2 Thess. 1 6 *f.* 2 12; the resurrection of believers in 1 Thess. 4 14 *f.*; their future glory and blessedness in 1 Thess. 4 17 5 10 2 Thess. 2 14; and the final kingdom in 1 Thess. 2 12 2 Thess. 1 5. It is evident that the Thessalonian Christians were much interested in eschatological questions, and it would seem that Paul must have laid considerable stress, while in Thessalonica, at any rate upon the speedy return of Christ and the impending judgment (cp 1 Thess. 1 10 5 2 *f.* 2 Thess. 2 5). Possibly he was led to do so by the great prevalence of vice and immorality in the city. However that may be, the Thessalonians expected the return of Christ very soon, before any of their number had passed away, and Paul had evidently given them some warrant for the expectation, for even when he wrote his First Epistle he looked for the Parousia during his own lifetime and theirs (cp 2 19 4 15 *f.*). It was doubtless because of this that Paul had not instructed them touching the resurrection of believers and so was obliged to do so at some length in 1 Thess. 4 13 *f.* (cp 1 Cor. 15 and see M'Giffert, *l.c.* p. 248).

7. The Thessalonian Christians.

The two Epistles to the Thessalonians throw considerable light upon Paul's work in Thessalonica and upon the character and condition of his converts there. The Christians addressed were most, if not all, of them Gentiles (1 Thess. 1 9 2 14); and, moreover, as appears from the former passage, they had been converted directly from heathenism to Christianity under Paul's preaching. But the account of Paul's work in Thessalonica contained in Acts (17 1 *f.*) gives a very different picture of the Thessalonian converts. According to that passage, 'Some of them (*i.e.*, of the Jews) were persuaded and consorted with Paul and Silas, and of the devout Greeks (*i.e.*, Jewish proselytes) a great multitude, and of the chief women not a few.' Of these Jews and Jewish proselytes there is no trace in either of Paul's epistles, and though of course it is quite possible that there were some of them among his converts, it is certain that they must have formed an altogether insignificant minority. It is clear then that the author of Acts, as is frequently the case, has recorded the least important part of Paul's activity in Thessalonica, and that it was not in the synagogue that he did his chief work (the only part of his work mentioned in Acts), but among the heathen population of the city. At the same time there is no reason for doubting that Paul actually did preach to Jews and proselytes in the synagogue of Thessalonica.[2] But after a brief period spent in that work he must have turned to the Gentiles, instead of leaving the city directly as implied in Acts 17 10, and must have spent at least some months in labour among them, as is clear from 1 Thess. 2 7 *f.* and Phil. 4 16, and also from the large and permanent results accomplished. The account in Acts is thus very meagre and misleading at this point and has to be not only supplemented but also corrected by 1 Thess. It is evident that that epistle was not in the hands of the author of Acts when he was writing

1 On this apocalypse see H. St. John Thackeray, *The Relation of St. Paul to Contemporary Jewish Thought*, 102 *f.*

2 It was formerly maintained by some scholars (*e.g.*, Ew. *Sendschreiben des Paulus*, 17 *f.*, Laurent, *NTliche Studien*, 49 *f.*) that 2 Thess. is earlier than 1 Thess.; but this is excluded by the literary relationship between the two epistles, which clearly points to the secondary character of the second, by the sharper tone of 2 Thess. in dealing with the disorderly (3 6 *f.*), and by the relation of the apocalyptic passage in 2 2 *f.* to 1 Thess. 4 13 *f.*

3 Upon the interpretation of this passage see ANTICHRIST, § 4 *f.*

1 See 1 Thess. 2 12 3 8 13 4 7 8 5 10 18 2 Thess. 1 11 2 13 16 for familiar Pauline ideas.

2 See M'Giffert, *op. cit.* 246.

his account of this part of Paul's work, nor was Acts in the hands of the author of 1 Thess.

The Thessalonian epistles bear eloquent testimony to the success of Paul's missionary labours in Thessalonica. He succeeded in founding there a strong and vigorous church, and the faith and patience and brotherly love of his converts were so marked that their fame speedily spread even beyond the provinces of Macedonia and Achaia (1 Thess. 1 7 *f.*), and their generosity in ministering to the necessities of other churches, even though poor themselves, called forth the apostle's hearty commendation (1 Thess. 4 10; cp 2 Cor. 8 1 *f.* and Acts 20 4). To none of his churches was he bound by warmer ties of affection than to the churches of Thessalonica and Philippi, and none of his epistles, except that to the Philippians, is more thoroughly pervaded with joy and confidence and affection than 1 Thess.

It has been assumed throughout this article that both 1 and 2 Thess. are genuine epistles of Paul. So far as

8. Authorship: of 1 Thess.

the former is concerned its authenticity, denied a couple of generations ago by many scholars, is to-day generally recognised except by those who deny the genuineness of all the Pauline epistles (see PAUL, § 38). As a matter of fact, if one accepts any of Paul's epistles there is no good reason for denying the authenticity of 1 Thess. The argument against its genuineness, drawn from its lack of the doctrinal and polemical material found in the great epistles to the Galatians, the Corinthians, and the Romans, is now universally recognised as fallacious, for the situation in Thessalonica as indicated in the epistle itself fully accounts both for what it contains and for what it omits. Moreover, the style of the epistle, its revelation of the character of its author, its familiar and personal tone, the absence of any doctrinal or polemic interest which would account for pseudonymity, the discrepancies between the epistle and Acts, the use of the three names Paul, Silvanus, and Timothy (the form Σίλας being found uniformly in Acts and Σιλουανός only in 1 and 2 Thess. 2 Cor. 1 19 and 1 Pet. 5 12) all make for genuineness [cp SILAS]; and the evidence brought by Rendel Harris in the article referred to above (§ 2) that it is part of a correspondence with the Thessalonian church, strengthens the argument, and if that evidence be regarded as conclusive, of course places the genuineness of the epistle beyond all question. Finally, the implication in 4 17 that Christ was to return during the lifetime of the apostle is of itself enough to prove that it was not written after his death.[1]

On the other hand, the authenticity of 2 Thessalonians is by no means so clear, nor is it so widely recognised.

9. Of 2 Thess.

The tendency to view it as a genuine epistle of Paul has apparently grown somewhat in recent years among scholars of the critical school (*e.g.*, Jülicher, *Einl.* 40 *f.* [1894]; Harnack, *Chronol.* 239 [1898]; Bacon, *Introd. to NT*, 75 *f.* [1900]; and compare the statement of Holtzmann [*Einl.*(3) 216] that 'at the present day the question is not whether the epistle is to be brought down into the post-apostolic age, but whether it does not on the contrary reach up into the lifetime of the apostle, and whether consequently it must not be genuine, and have been written soon after 1 Thess.'). Many, however, who accept 1 Thessalonians reject 2 Thessalonians altogether (as, *e.g.*, Lipsius, Hilgenfeld, Holtzmann, Pfleiderer, Schmiedel, Weizsäcker), or regard it as largely interpolated (*e.g.*, P. Schmidt, *Der erste Thessalonicherbrief*, 127 *f.*).

The first objection urged against the genuineness of the epistle is the apocalyptic passage, 2 Thess. 2 2-12.

10. Argument from eschatology.

This objection is based chiefly upon the assumption that the passage is inconsistent with 1 Thess. 5 2 *f.*, and since its substance is said to have been imparted to the Thessalonians while Paul was still present with them (2 Thess. 2 5), the inconsistency cannot be explained as due to the further development of Paul's thought after the writing of 1 Thessalonians.

It is to be noticed, however, that though the author indicates in 2 Thess. 2 that certain events must occur, and, consequently, some interval elapse before the final consummation, there is no sign that he regards the interval as long, and that he does not expect to live until the Parousia. Nor is the fact that certain signs are to precede the consummation inconsistent with the exhortation in 1 Thess. 5 2 to be watchful, for the day of the Lord comes as a thief in the night only for those who sleep, the implication being that those who are awake know the signs of its coming and will not be taken unaware. It is quite conceivable that Paul might have told the Thessalonians when he was with them why the Parousia was delayed, and might have spoken of the traditional figure of Antichrist (the ταῦτα of 2 5 refers to what precedes), without contradicting his belief or theirs that the consummation was to take place very soon. Only when he found that their expectation of its imminence was leading them into fanaticism would he naturally, in order to show that it could not come immediately, dwell more at length upon the intervening events, and indicate still more fully what those events were. Possibly the protection of the Roman pro-consul at Corinth (Acts 18 12) had led him to recognise more clearly than ever before the protecting power of Rome (to which τὸ κατέχον and ὁ κατέχων ['the restrainer'] certainly refer), and so, for the first time, to bring this element of the traditional eschatology into prominence as in 2 Thess. 2 6 *f.*

The further objection brought against the genuineness of 2 Thess. 2 2 *f.*, on the ground of its alleged dependence upon the Apocalypse, or of its acquaintance with the Nero redivivus legend, breaks down completely when the passage is interpreted as it should be in the light of current Jewish eschatology, and the figure of Antichrist is recognised as purely traditional (see ANTICHRIST, § 4 *f.*).

It must be recognised then that there is not sufficient ground in the eschatology of the second epistle for denying its Pauline authorship. If there is good reason for ascribing the remainder of the epistle to Paul, there need be no difficulty in assuming that he wrote the apocalyptic passage, 2 2 *f.* In fact, we may perhaps go farther and say that that passage, when taken in connection with the remainder of the epistle, can be better understood on the assumption of its authenticity than on that of its pseudonymity. It can hardly be supposed that any one would venture to produce such a pseudonymous epistle during Paul's own lifetime, or that it would find acceptance if he did. On the other hand, if Paul's first epistle gave rise to misunderstandings—as the second epistle, whether genuine or not, seems to show that it did—we should expect those misunderstandings to have arisen immediately, not after an interval of many years, when the expectation expressed in the epistle was already at least partially discredited by Paul's own death. And if the fanatical abuse of his words appeared during his lifetime, it would be strange if he took no notice of it. If it could be supposed that the epistle was written simply to save Paul's reputation and set him right with the Thessalonians after his death, by showing that he had not expected the consummation as soon as 1 Thessalonians seemed to imply, its post-Pauline date would be easy to understand, but there is no sign of such an interest. The sole purpose of the eschatological passage is clearly to put a stop to the fanaticism to which the belief in the speedy consum-

[1] Schmiedel, while accepting the epistle as a whole, suggests that 2 15 *f.* is an interpolation. There is, however, no reason to doubt the genuineness of the passage, though it is quite possible that *v.* 16*b* is an interpolation; and the same may be said of *v.* 23*b*. The latter looks decidedly un-Pauline, and by its omission *v.* 24 is brought into immediate connection with *v.* 23*a* with which it seems to belong.

mation was giving rise. Under these circumstances 2 Thessalonians, so far as the eschatological passage is concerned, seems easier to explain as a letter of Paul's, written within a few months of 1 Thessalonians, than as the work of a later time and of another hand.

It has been suggested by some scholars (*e.g.*, Schmidt, *op. cit.* 127) that 2 Thess. 2 2-12 has been interpolated in a genuine epistle of Paul; but there is no ground for such a hypothesis. The point of the epistle is entirely gone if the apocalyptic passage be omitted, and the difficulties which beset the genuineness of the remainder of the epistle are even greater than those which beset the apocalyptic passage. As a matter of fact, the suggestion of Hausrath (*NTliche Zeitgesch.*(2) 3 198) that this passage is the only genuine part of the epistle is much more plausible.

A second objection to the Pauline authorship of 2 Thessalonians is drawn from its language and style.

11. From language and contents.

It is true that the epistle contains an uncommonly large number of words and phrases which occur nowhere else in Paul (the Pastoral epistles not being reckoned as Pauline).

Such are: 'groweth exceedingly' (ὑπεραυξάνω*), 1 3;[1] 'glory' (ἐγκαυχάομαι*), *v.* 4; 'token' (ἔνδειγμα*), 'judgment' (κρίσις), 'count worthy' (καταξιόω), *v.* 5; 'flaming fire' (πῦρ φλογός), *v.* 8; 'punishment' (δίκη), 'suffer' (τίνω*), 'everlasting destruction' (αἰώνιος, ὄλεθρος*), 'from the presence' (ἀπὸ προσώπου), *v.* 9; 'glorify' (ἐνδοξάζω*), *vv.* 10 12; 'good pleasure of goodness' (εὐδοκία ἀγαθωσύνης*), *v.* 11; 'gathering together unto' (ἐπισυναγωγή), 2 1; 'shake' (σαλεύω), 'be troubled' (θροοῦμαι), *v.* 2; 'falling away' (ἀποστασία), *v.* 3; 'object of worship' (σέβασμα), *v.* 4; 'deceit of unrighteousness' (ἀπάτη ἀδικίας*), 'because' (ἀνθ' ὧν), 'love of truth' (ἀγάπη ἀληθείας*), *v.* 10; 'a working of error' (ἐνέργεια πλάνης*), *v.* 11; 'belief of truth' (πίστις ἀληθείας*), *v.* 13; 'chose' (αἱρέομαι), *v.* 13 (occurs once in Phil. 1 22 and Heb. 11 25 in another connection; the common word in Paul, to express the idea, being ἐκλέγω); 'good hope' (ἐλπὶς ἀγαθή*), *v.* 16 (cp Heb. 7 19 1 Pet. 1 3); 'unreasonable' (ἄτοπος), 3 2; 'busy-bodies' (περιεργάζομαι*), *v.* 11; 'well-doing' (καλοποιέω*), *v.* 13; 'note' (σημειοῦσθε*), *v.* 14; and the particle 'nor' (μήτε) in 2 2.

Considerably more than half of these, however, are found in the apocalyptic passages in chaps. 1 and 2, and their presence is sufficiently accounted for by the nature of the subject-matter, and it is now generally recognised that very little weight can be laid in any case upon the mere occurrence of *hapax legomena.*

More striking is the fact that the epistle contains very few words which are found in Paul's epistles but not elsewhere in the NT, except such as it has in common with 1 Thessalonians.

The particle 'if so be' (εἴπερ), 2 Thess. 1 6, and the word 'working' (ἐνέργεια), 2 9 11, are found half a dozen times in Paul, the former in Romans, 1 and 2 Corinthians, the latter in Philippians, Ephesians, and Colossians, and 'goodness' (ἀγαθωσύνη) in Romans, Galatians, and Ephesians, once each. The phrase 'as that' (ὡς ὅτι), 2 Thess. 2 2, occurs only in 2 Cor. 11 21; 'exalteth himself' (ὑπεραίρομαι), 2 Thess. 2 4, only in 2 Cor. 12 7; 'withdraw' (στέλλομαι), 2 Thess. 3 6, only in 2 Cor. 8 20; 'keep company with' (συναναμίγνυμαι), 2 Thess. 3 14, only in 1 Cor. 5 9 11; 'deceive' (ἐξαπατάω), 2 Thess. 2 3, which is found in Romans and 1 and 2 Corinthians, occurs also in the post-Pauline 1 Timothy.

On the whole, the argument from style, so far as it goes, seems to point away from Paul rather than toward him as author; but it must be recognised that no definite conclusion can be drawn from it.

Nor can any conclusion be drawn from the ethical and theological content of the epistle. There are but few characteristically Pauline ideas—*e.g.*, 1 11: 'that our God may count you worthy of [your] calling' (*ἵνα ὑμᾶς ἀξιώσῃ τῆς κλήσεως ὁ θεὸς ἡμῶν*; cp Eph. 4 1); 2 16, 'God who loved us' (*ὁ θεὸς . . . ὁ ἀγαπήσας ἡμᾶς*; cp Rom. 8 3 Eph. 2 4); 2 13, 'God chose you from the beginning unto salvation' (*εἵλατο ὑμᾶς ὁ θεὸς ἀπ' ἀρχῆς εἰς σωτηρίαν*; cp Eph. 1 4, where the idea is the same but not the language), and no argument can be drawn from any of these. On the other hand, there is nothing in the teaching of the epistle which can be pronounced in any way un-Pauline, except possibly the conception of divine recompense and vengeance in 1 6-12. One might almost be tempted, if accepting the epistle as a whole, to regard these verses as an interpolation and to connect the 'to which end' (*εἰς ὅ*) of *v.* 11 directly with 'that ye may be counted worthy' (*εἰς τὸ καταξιωθῆναι ὑμᾶς*) of *v.* 5.

Much more serious than the objections to the genuineness of the epistle already mentioned is the objection drawn from its close resemblance to

12. From resemblance to 1 Thess.

1 Thessalonians, amounting at times to an almost slavish dependence. A detailed comparison of the two shows that the only new matter in the second is found in 1 5-12 2 2-12 15 3 1-5 10 13 *f.* 17.

Even within these passages there is more or less dependence upon 1 Thessalonians. Thus 2 Thess. 1 7 suggests 1 Thess. 1 10 2 19 4 16; and 2 Thess. 1 10*a* suggests 1 Thess. 3 13. 2 Thess. 2 15, taken with the verses immediately preceding, seems to show the influence of 1 Thess. 5 6-10. 2 Thess. 3 1 and 1 Thess. 5 25 both have the words, 'brethren, pray for us' (προσεύχεσθε, ἀδελφοί, περὶ ἡμῶν), which occur nowhere else in Paul, and 2 Thess. 3 1 and 1 Thess. 1 8 4 15 have the phrase 'word of the Lord' (λόγος κυρίου), which is also wanting in Paul's other epistles, though 'word of Christ' (λόγος Χριστοῦ) is found in Col. 3 16. 2 Thess. 3 3-5 contains reminiscences of 1 Thess. 5 22-24 1 3 3 11, and 2 Thess. 3 15 of 1 Thess. 5 12 14.

The remainder of the epistle, about a third of the whole, is simply a more or less close reproduction of the first epistle.

Thus, in addition to the salutation at the beginning and the benediction at the close, which are identical, except for the addition of 'from God the Father and the Lord Jesus Christ' (ἀπὸ θεοῦ πατρὸς καὶ κυρίου Ἰησοῦ Χριστοῦ) in 2 Thess. 1 2, and of 'all' (πάντων) in 3 18, we find that 2 Thess. 1 1-4 is a condensed summary of 1 Thess. 1. 2 Thess. 2 1 has the clause 'now we beseech you, brethren' (ἐρωτῶμεν δὲ ὑμᾶς, ἀδελφοί), which occurs in 1 Thess. 5 12 (cp 4 1) but nowhere else in Paul; also the clause 'touching the Parousia,' etc. (ὑπὲρ τῆς παρουσίας κ.τ.λ.), which is nearly identical with 1 Thess. 2 19 3 13 4 15 5 23, and the remainder of the verse suggests 1 Thess. 4 17. 2 Thess. 2 13 *f.* contains reminiscences of 1 Thess. 1 2 2 13 (though 'we are bound' [ὀφείλομεν] is added as in 1 3); of 1 Thess. 1 4 ('brethren, beloved of the Lord' [ἀδελφοὶ ἠγαπημένοι ὑπὸ κυρίου] for 'brethren, beloved of God' [ἀδελφοὶ ἠγαπημένοι ὑπὸ θεοῦ]); of 1 Thess. 4 7 (though the combination of 'of spirit' [πνεύματος] with 'sanctification' [ἁγιασμῷ], and the phrase 'belief of truth' [πίστει ἀληθείας] are new); and of 1 Thess. 5 9. 2 Thess. 2 16 *f.* may be compared with 1 Thess. 3 2 12 *f.* (notice the connection of the two words, 'comfort' [παρακαλέσαι] and 'stablish' [στηρίζω]). 2 Thess. 3 6-12 is entirely, with the exception of the latter part of *v.* 10, which is new, a reproduction of 1 Thess. 2 6 *f.* 4 11 *f.*; *v.* 8 being verbally identical with a part of 1 Thess. 2 9 ('wrought in labour and travail night and day that we might not burden any of you' [ἐν κόπῳ καὶ μόχθῳ νυκτὸς καὶ ἡμέρας ἐργαζόμενοι πρὸς τὸ μὴ ἐπιβαρῆσαί τινα ὑμῶν]); and *vv.* 10*a* with the first clause of 1 Thess. 3 4 ('for even when we were with you' [καὶ γὰρ ὅτε ἦμεν πρὸς ὑμᾶς], the particle 'when' [ὅτε] being found nowhere else in either epistle, and 'for even' [καὶ γάρ] only here in 2 Thessalonians). The passage also contains striking reminiscences of 1 Thess. 1 6 *f.* 4 1 11 5 14. 2 Thess. 3 16, 'now the Lord of peace himself' (αὐτὸς δὲ ὁ κύριος τῆς εἰρήνης) may be compared with 1 Thess. 5 23, 'and the God of peace himself' (αὐτὸς δὲ ὁ θεὸς τῆς εἰρήνης). The following words and phrases, which are common to 1 and 2 Thessalonians, but occur nowhere else in Paul, may also be referred to: 'work of faith' (ἔργον πίστεως), 2 Thess. 1 11 1 Thess. 1 3; 'obtaining' (περιποίησις), 2 Thess. 2 14 1 Thess. 5 9 (the word is found once in Ephesians in a different sense); 'stablish' (στηρίζω) with 'heart' (καρδίας), 2 Thess. 2 17 1 Thess. 3 13; 'direct' (κατευθύνω), 2 Thess. 3 5 1 Thess. 3 11; 'patience of Christ' (ὑπομονὴ τοῦ Χριστοῦ), 2 Thess. 3 5 (in 1 Thess. 1 3, 'patience of the hope of our Lord Jesus Christ' [ὑπομονὴ τῆς ἐλπίδος τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ]); 'disorderly' [adv.] (ἀτάκτως), 2 Thess. 3 6 11; 'behave disorderly' (ἀτακτέω), 3 7; 'disorderly' [adj.] (ἄτακτος), 1 Thess. 5 14.

In the light of these many and close resemblances between the two epistles it is clear that the genuineness

13. By Paul?

of the second requires the assumption that Paul had much of the thought and language of the first epistle in his mind when he wrote the second. If it could be supposed that the two were written at a single sitting, or within a few hours or days of each other, as is possible in the case of Ephesians and Colossians, the resemblances might be explained; but an interval of at least some months separates 2 Thessalonians from 1 Thessalonians. The verbal resemblances are altogether too many and too close to be accounted for on the ground that the general situa-

[1] The words and phrases marked with an asterisk are found nowhere else in the NT.

tion in Thessalonica and Corinth remained much the same, and suggested consequently a similar line of thought. The genuineness of the second epistle can be maintained, in fact, only by assuming that Paul had a copy of 1 Thessalonians in his possession, and that he read it over again shortly before writing 2 Thessalonians, and saturated himself with its thought and language. It seems a little unlikely that Paul should have had a copy of his earlier epistle at hand,[1] but it is not impossible; and if he had, it was not perhaps unnatural that, when the report reached him that Thessalonians were appealing to a letter of his in support of their views touching the Parousia, he should read over the earlier epistle to see if it gave any justification for such an appeal.

This would also serve to explain particularly the relation between 2 Thess. 3 6 *f.* and 1 Thess. 2 6 *f.* In both passages Paul refers in almost identical terms to the fact that he had supported himself with his own hands while in Thessalonica; but in the first epistle he cites the fact as a defence against the charges of his enemies, in the second as an example to the disorderly.

The effort of Spitta (*Zur Gesch. u. Lit. des Urchristenthums*, 1 122 *f.*; cp TIMOTHY, § 6) to explain the resemblances and divergencies between the two epistles by the ingenious suggestion that the second was written not by Paul but by Timothy at Paul's request and in the name of the three fellow-workers, while it might relieve the difficulties somewhat, is rendered impossible by the use of the first person singular in 2 5 which cannot, occurring as it does without qualification, refer to Timothy, as Spitta assumes, but must refer to Paul. That the Thessalonians should have known from the handwriting that Timothy was the author of the epistle instead of Paul there is no ground for supposing, for it was Paul's custom to dictate his epistles to an amanuensis, and 3 17 must suggest to the readers of 2 Thessalonians that it was written in the same way.

14. Not by Paul?

Those who deny the authenticity of 2 Thessalonians explain the striking resemblances between the two epistles by the assumption that the author of the second purposely conformed it to 1 Thessalonians in order to gain Pauline authority for its eschatological teaching, and so to displace the earlier epistle, which was giving rise to so much trouble in the Thessalonian church. Such a procedure is not without parallels, nor can it be regarded as in itself more improbable than the unique self-repetition involved in Pauline authorship. Indeed, while the reproduction of the earlier epistle is at times subtle and of such a character as to suggest that the author wrote with a free hand, it seems quite as easy to suppose that some one familiar with Paul's style produced 2 Thessalonians in conscious imitation of 1 Thessalonians as to suppose that Paul unconsciously repeated himself so slavishly. And if this conscious effort be assumed, the reference to Paul's own signature in 3 17 (cp 1 Cor. 16 21 Col. 4 18 Gal. 6 11) need constitute no insurmountable obstacle.

15. Conclusion.

At the same time, in view of the considerations urged above in connection with the apocalyptic passage, the present writer is inclined to think that the evidence points rather in the direction of the Pauline authorship of the epistle, but it must be recognised that its genuineness is beset with serious difficulties, and that it is at best very doubtful.

Upon the epistles to the Thessalonians see the various introductions to the NT, the histories of the apostolic age, and lives of Paul, and the special commentaries: by Schott (1834); Jowett, *The Epistles of St. Paul to the Thessalonians, Galatians, and Romans* (1856, (3) 1894); Eadie (1877); P. Schmidt, *Der erste Thessalonicherbrief neu erklärt nebst einem Exkurs über den zweiten gleichnamigen Brief* (1885); Zimmer, *Theologischer Kommentar zu den Thessalonicherbriefen* (1891). Of the general commentaries on the NT special mention may be made of Lünemann (Meyer's *Handbuch*(4)), Bornemann (Meyer, (5) and (6)), and Schmiedel in Holtzmann's *Hand-Commentar zum NT*, Bd. 2 (1889). On the integrity of the epistles, see especially Clemen, *Die Einheitlichkeit der paulinischen Briefe* (1894), p. 13 *f.*, and on the text Zimmer, *Der Text der Thessalonicherbriefe* (1893).

16. Literature.

In defence of the genuineness of both epistles, see the NT introductions of Weiss, Jülicher, and Zahn, also Bornemann in Meyer. In defence of the first epistle, see also von Soden in *St.Kr.*, 1885, p. 263 *f.*, and Weizsäcker, *Ap. Zeitalter*, 241 *f.*; in defence of the second, Klöpper in *Theologische Studien und Skizzen aus Ostpreussen*, 8 (1889). Against the genuineness of both epistles, see especially Baur, *Der Apostel Paulus* (1845, (3) 1867); and against the genuineness of the second Weizsäcker, *l.c.*, 249 *f.*; Schmiedel, *l.c.*, 8 *f.*; Bahnsen, *JPT*, 1880, 401 *f.* For further literature see Holtzmann, *Einl.* (3) 210 *f.*, and Findlay in *Expos.*, 1900, 2 251 *f.* A. C. McG.

1 The common notion that copies of Paul's epistles must have been from the beginning carefully preserved, either by Paul himself or by his companions, rests upon a conception of their dogmatic importance which was not shared in Paul's own time, as is sufficiently indicated by the fact that so few of his epistles—so far as we know, only those which we still have—were handed down to the next generation, and that even the author of Acts apparently made no use of them in the composition of his work (see McGiffert, *l.c.*, 436).

THESSALONICA (θεccαλονικη,[1] WH, Acts 17 1 11 13 Phil. 4 16 2 Tim. 4 10; ethnic Θεσσαλονικεύς, Acts 27 2 20 4 1 Thess. 1 1 2 Thess. 1 1 [translated in the three latter passages by the curious syncopated form 'Thessalonians,' EV]). A large and important city (now *Salonica*) at the head of the Gulf of Salonica, which in ancient times was called the Thermaic Gulf, from the city itself. Thessalonica, we are told, was originally named Therma or Therme,[2] from the hot springs found on the coast in its neighbourhood. But Therme seems to have been a small place in the vicinity, from which, as well as from twenty-five other towns on the gulf, the inhabitants were compelled to migrate in order to create the new city (Strabo, 330, *frg.* 21; Plin. *HN*, 4 17).

1. History.

The creation of Thessalonica was due, according to the most probable account (that of Strabo, *l.c.*), to Cassander, who called it after his wife Thessalonica, step-sister of Alexander the Great (about 315 B.C.). The history of the town begins therefore with the Macedonian, and its importance increases as we approach the Roman, period. It was the great Macedonian naval station (Livy, 44 10); and when Macedonia was conquered by the Romans and was divided by them into four districts, Thessalonica was made the capital of the second region, *Macedonia Secunda* (168 B.C.; see MACEDONIA).[3] When the whole of Macedonia was reduced to a single province (146 B.C.) Thessalonica became virtually its capital.

Even before the close of the Republican period the natural advantages of Thessalonica had raised it to importance, for it lay upon the great route which connected Rome with the East (cp Cic. *De Prov. Cons.* 2: 'Thessalonicenses, positi in gremio imperii nostri'), about midway between Dyrrhachium on the Adriatic, and the river Hebrus in Thrace. It was the residence of the proconsul; Cicero during his exile found here a refuge, in the quæstor's house (*Pro Planc.* 41). During the first Civil War the town was the headquarters of the Pompeian party (Dio Cass. 41 18); but in the second war it took the side of Octavius and Antonius (Plut. *Brut.* 46; Appian, *BC* 4 118), and by way of reward was made a 'free city' (Plin. *HN* 4 17).[4] As a free city it was ruled by its own assembly (cp the use of the word δῆμος in Acts 17 5, in accordance with the actual constitutional fact) and by its own magistrates,[5] who here bore the special title of politarchs (πολιτάρχαι, Acts 17 6).

1 Θετταλονίκη in Pol. 23 4; Θεσσαλονίκεια in Str. 330, *frg.* 20 etc.

2 Θέρμη, Herod. 7 121, *et sæp.*; Thuc. 1 61 2 29. Θέρμα, Æschin. *De Fal. Leg.* 29 (Bekker).

3 After 158 B.C., when the right of silver coinage was granted by the Senate, Thessalonica issued silver tetradrachms with the inscription ΜΑΚΕΔΟΝΩΝ ΔΕΥΤΕΡΑΣ. See Head, *Hist. Numm.* 213. Its bronze coins before and during the empire are plentiful, bearing the name of the town, or the ethnic in the genitive, often with titles μητρόπολις or κολωνία. The latter title dates from the time of Valerian (see Momms.-Marq. 1 320).

4 To this may allude the word ἐλευθερία with female head on some of its coins.

5 Cp Livy, 45 29, where Æmilius Paulus at Amphipolis

The title politarch does not occur elsewhere in Greek literature, but its use here is quite accurate, as appears from an inscription (*CIG*, 1967) which was engraved on a Roman arch of the *Vardar* gate (perhaps a monument of the victory of Philippi) recording its erection when certain persons, whose names are given, were politarchs of the city' (πολιταρχούντων).[1] It is doubtful whether the number of politarchs was five or six (see a paper on the politarchs by Dr. Burton, reprinted from the *Am. Jour. Theol.* [1897], 598, where other inscriptions are cited from Macedonia, and more particularly from Thessalonica, in which the title πολιτάρχαι, or the verb πολιταρχοῦντες, occurs).

The town flourished greatly. Strabo (330, *frg.* 21) calls it the μητρόπολις of the Macedonia of his time, and notes its populousness (323, ἣ νῦν μάλιστα τῶν ἄλλων εὐανδρεῖ). Lucian, in the second century A.D., speaks in similar terms (*Asin. Aur.* 46, πόλεως τῶν ἐν Μακεδονίᾳ τῆς μεγίστης Θεσσαλονίκης).

The spread of the Jews after Alexander's death would doubtless affect the city, well placed as it was for controlling the trade of Macedonia.

2. NT references.

That the Jewish community in Paul's time was fairly large is evident from the fact that it possessed a synagogue here (Acts 17 1; contrast Philippi, and compare with Berœa, which also, being a commercial town, possesses a synagogue, Acts 17 10). The number of the Jews settled in the town had also produced an appreciable effect upon the Hellenic section of the population, and prepared the way for Paul's work of evangelisation by the creation of a large class of proselytes (cp Acts 17 4, 'of the devout Greeks a great multitude,' EV; πλῆθος πολύ). A testimony to the number and influence of the Jews, both in Thessalonica and in all this region of Macedonia, is to be found in the apparent ease with which they excited hostility against Paul. The exact ground of complaint alleged against Paul at Thessalonica should be closely compared with the charge used against him at Philippi, for the difference runs closely parallel with the actual difference of political status between the two towns.

The charge at Thessalonica is virtually one of political innovation or revolution (*v.* 7, 'contrary to the decrees of Cæsar' . . . 'another king')—a thing to which the Empire was very sensitive, and one fraught with grave possibilities of undesirable changes for the people of Thessalonica if the imperial authorities were minded to take it seriously. In Philippi, on the other hand, a Roman colony, where there could be no question of loyalty, the charge touches *religious* innovations (see on this point, Ramsay, *St. Paul the Traveller*, 229 *f.*). The riot itself, though not so represented in the narrative in Acts, would appear to have surpassed that at Philippi in malignity and violence (cp 1 Thess. 2 14 *f.*). The attitude of the magistrates, so far as can be inferred from the short account, would seem to have differed entirely from that of the magistrates at Philippi, and to have been not in harmony with the feelings of the dregs of the populace stirred up by the Jews. With the attitude of the politarchs and upper classes of Thessalonica we may well compare that of the Asiarchs at Ephesus (Acts 19 31). Nevertheless the politarchs were obliged in the interests of their own safety to fetter Paul's work effectually by taking sureties of Jason and other prominent Christians of Thessalonica against the repetition of the teaching. Paul was therefore cut off from the city by a barrier more effective than the threat of merely personal danger (1 Thess. 2 18, 'Satan hindered us.' Cp Rams. *op. cit.* 230).

As regards the time spent in the city by Paul, nothing certain can be inferred. Probably, however, it would be an error to confine his work to the limited space mentioned in Acts 17 2 ('three sabbath days'). Not only is a longer sojourn indicated by the expression used in 1 Thess. 1 8 ('For from you sounded out the word of the Lord not only in Macedonia and Achaia'), but such is perhaps proved by the statement in Phil. 4 16 ('For even in Thessalonica ye sent once and again unto my necessity'). Further, the church in Thessalonica would seem to have been composed very largely of Gentile converts (whether proselytes or pagans at the time of Paul's teaching is, of course, not to be decided). At any rate the Jewish Scriptures are not employed in the two Epistles to the Thessalonians, and in 1 Thess. 1 9 the members are spoken of as having 'turned to God from idols.' Hence we should infer that much time was spent in Gentile circles, apart from the work among the Jews which is most prominent in Acts. It does not appear that the inference as to the length of Paul's stay in Thessalonica derives any further support from a consideration of such passages as 1 Thess. 2 9 2 Thess. 3 8 *f.*, in which stress is laid upon Paul's self-supporting industry.

Though the name of Thessalonica does not recur in Acts, Paul almost certainly saw the town again, both going and returning, on his third missionary journey (Acts 20 1 *f.*). On his return two members of the church of Thessalonica accompanied him into Asia (*v.* 4) [see ARISTARCHUS, SECUNDUS]. Possibly he was also there after his first imprisonment (cp Phil. 1 26 2 24); the visit to Macedonia recorded in 1 Tim. 1 3 might very well embrace an excursion to Thessalonica.

Of members of the church at Thessalonica we can specify Jason (Acts 17 5; possibly identical with the Jason of Rom. 16 21), Demas (probably; 2 Tim. 4 10), Gaius (Acts 19 29), Secundus (Acts 20 4), and above all Aristarchus (Acts 19 29 20 4 27 2; he is alluded to also in Col. 4 10 and Philem. 24).

Christianity, having been once established in Thessalonica, spread rapidly (1 Thess. 1 8), and in later times the city was the bulwark of religion in this region of Europe, so much so that it was designated 'The Orthodox City.' Its name is prominent in the Byzantine historians. It was a safeguard of the Empire during the Gothic inroads, and later during the Sclavonic wars, of which it bore the brunt from the middle of the sixth century A.D. onwards. During the Middle Ages the city was thrice captured, by the Saracens, the Normans, and the Turks. It is now a flourishing place, the second in European Turkey after Constantinople. It is specially rich in remains of Byzantine ecclesiastical architecture, surpassing in this respect any other city in Greece (Leake).

3. Literature.

The most elaborate work is that by Tafel, the first part of which was published in 1835 and afterwards prefixed as *Prolegomena* to his *De Thessalonica eiusque agro, Dissertatio geographica* (Berlin, 1839). This is especially full in relation to the topography and the Gothic and Sclavonic wars. For the history Finlay's *History of Greece* (ed. Tozer) may also be consulted. Descriptions of the town and remains are given by all travellers from Clark (1810) to Leake (1835), and onwards. A good succinct account will be found in Murray's *Handbook to Greece*.

W. J. W.

THESSALY (θεccαλια, Acts 17 15 D). Thessaly is mentioned only in an addition to Acts 17 15 in D, which runs, 'and those who conducted Paul brought him as far as Athens; [and he passed by Thessalia, for he was prevented from preaching the word unto them].' It is not clear whether at this time Thessaly was included in the province of Achæa, or fell to Macedonia. If the latter was the case, we should naturally expect to find Paul going from Berœa to Larissa, the chief town in Thessaly, for his call was to Macedonia (Acts 16 10); and in that case his neglect to visit Thessaly must have been due to divine injunction (as in Acts 16 7). If Thessaly fell at that time to Achæa, there was no necessity specifically to mention its omission, unless we assume that already Paul felt that he was called to a wider field than Macedonia. It is indeed a strange omission in Acts that nowhere is it indicated when and how this conviction forced itself upon his mind; already in Athens (Acts 17 17) the special call to Macedonia is forgotten in the absorbing self-imposed task of disputing with the Jews and proselytes of that city. Apparently there is no feeling of restriction to a particular province.

As regards the actual attribution of Thessaly, Ptolemy assigns it to Macedonia, Strabo to Achæa (p. 840). The separation may have been the work of Vespasian.

W. J. W.

declares 'omnium primum liberos esse iubere Macedonas, habentes urbes easdem agrosque, utentes legibus suis, annuos creantes magistratus.'

[1] The arch was demolished about 1867, but the inscription is now preserved in the Brit. Mus. (Murray, *Hdbk. to Greece*, 826). It is remarked as a curious coincidence (Conybeare and Howson, *Life and Epp. of St. Paul*, 1 395) that three of the names on the inscription are identical with those of three of Paul's friends in this region (Sopater, Gaius, and Secundus; cp Acts 19 29 20 4). Possibly a later date should be assigned to the arch than is given above (so Leake and Tafel), but that will hardly invalidate the weight of the inscription as a testimony to the accuracy of Acts in this passage.

THEUDAS

CONTENTS

1. Acts and Jos. on Theudas.
2. Not two persons.
3. No error in Jos.
4. Did Lk. know Jos.?
5. Text and purpose of Acts 5 36 *f.*
6. Separation of sources.
7. Inexact use of Jos. by Lk.
8. Literature.

Theudas (ΘΕΥΔΑΣ[1] Ti. WH) is mentioned only in Acts 5 36, where Gamaliel, in his speech in the synedrium

1. Acts and Jos. on Theudas. in support of his plea for letting the apostles alone, names him as the leader of a movement which, notwithstanding its threatening appearance at first, very soon came to nothing. The peculiar interest which attaches to this passage lies in the fact that a quite similar story is found also in Josephus (*Ant.* xx. 5 1, §§ 97 *f.*). (*a*) As the point to be investigated is whether Lk. has here drawn upon Josephus, it will be convenient to print both passages in close juxtaposition.

Josephus.—*Φάδου δὲ τῆς Ἰουδαίας ἐπιτροπεύοντος γόης τις ἀνὴρ Θευδᾶς ὀνόματι πείθει τὸν πλεῖστον ὄχλον ἀναλαβόντα τὰς κτήσεις ἕπεσθαι πρὸς τὸν Ἰορδάνην ποταμὸν αὐτῷ. προφήτης γὰρ ἔλεγεν εἶναι, καὶ προστάγματι τὸν ποταμὸν σχίσας δίοδον ἔφη παρέξειν αὐτοῖς ῥᾳδίαν. καὶ ταῦτα λέγων πολλοὺς ἠπάτησεν. οὐ μὴν εἴασεν αὐτοὺς τῆς ἀφροσύνης ὄνασθαι Φᾶδος, ἀλλ' ἐξέπεμψεν ἴλην ἱππέων ἐπ' αὐτούς, ἥτις ἀπροσδόκητος ἐπιπεσοῦσα πολλοὺς μὲν αὐτῶν ἀνεῖλεν, πολλοὺς δὲ ζῶντας ἔλαβεν· αὐτόν τε τὸν Θευδᾶν ζωγρήσαντες ἀποτέμνουσι τὴν κεφαλὴν καὶ κομίζουσιν εἰς Ἱεροσόλυμα.* 'While Fadus was procurator of Judæa, a certain charlatan, Theudas by name, persuaded a very great number of people to take their effects with them and follow him to the river Jordan; for he told them that he was a prophet, and said he would at the word of command divide the river and give them an easy passage through it; and by these words he deluded many. Fadus, however, did not permit them to gain aught by their folly, but sent a regiment of cavalry against them, which, falling upon them unexpectedly, slew many of them and took many alive. Taking Theudas also alive, they cut off his head, and carried it to Jerusalem.'

Acts.—*πρὸ γὰρ τούτων τῶν ἡμερῶν ἀνέστη Θευδᾶς, λέγων εἶναί τινα ἑαυτόν, ᾧ προσεκλίθη ἀνδρῶν ἀριθμὸς ὡς τετρακοσίων. ὃς ἀνῃρέθη καὶ πάντες ὅσοι ἐπείθοντο αὐτῷ διελύθησαν καὶ ἐγένοντο εἰς οὐδέν.* 'For before these days rose up Theudas, giving himself out to be somebody, to whom a number of men, about four hundred, joined themselves: who was slain; and all, as many as obeyed him, were dispersed and came to nought.

(*b*) In so far as the differences betwen the two accounts affect their substance, they are so unimportant as in no way to hinder us from believing that the same fact is intended in both.

Lk. naturally is shorter, for his object is not to tell the history of Theudas, but simply to cite an instance appropriate to the purpose of Gamaliel's speech. He therefore mentions only the beginning, and the ultimate issue of the movement. Therefore, there is no contradiction with Josephus when Lk. says of the followers of Theudas simply that 'they were dispersed and came to nought.' If Theudas gives himself out 'to be somebody,' the meaning can well be what Josephus says—that he called himself a prophet.[2] Lk.'s expression recalls Acts 8 9, where almost the same claim is atributed to Simon Magus—an identical claim if 'great' (*μέγαν*) there be a gloss (see SIMON MAGUS, § 1, n.).

The greatest discrepancy is that whilst Lk. is able to give the number of followers of Theudas as about 400 men, Josephus has *τὸν πλεῖστον ὄχλον*. It does not follow from this expression that he intends a substantially larger number.

Krenkel (below, § 8), 170 *f.*, has collected abundant instances to show that Josephus, in places where we are able to control his statements, often gives much too high figures. On the other hand, we are not precluded from supposing that to Lk.'s 400 men, women and children ought to be added.

That the number must have been a relatively moderate one is evident from Josephus's own statement that an *ἴλη* (=*ala*) of cavalry (some 500 men) was all that was required for the suppression of the rising.

(*c*) Much more serious is the next difficulty. Lk. goes on to say that *after* Theudas, Judas of Galilee raised another revolt in the days of the taxing. As he particularises the taxing by means of the definite article (*ἐν ταῖς ἡμέραις τῆς ἀπογραφῆς*) and in his own Gospel (2 1 *f.*) mentions that under Quirinius (in 6 or 7 A.D.) and that alone, he cannot intend any other here; and it was at the time of this taxing that in point of fact Judas of Galilee did make his revolutionary attempt (see JUDAS OF GALILEE). Thus, Lk. carries the insurrection of Theudas back to a somewhat early date. According to Josephus, however, the insurrection of Theudas was when Cuspius Fadus was procurator, that is, some time between 44 and about 46 A.D. (Tiberius Alexander, the successor of Fadus, held office till 48 A.D.). If Lk. is thinking of the same Theudas, he has thus not merely assigned him to a wrong date but, what is more, has put into Gamaliel's mouth a reference to an occurrence which at the alleged time of speaking had not yet happened.

To avoid the ascription of so serious an error to Lk., it has often been assumed that he has in his mind

2. Not two Theudases. another Theudas than the one mentioned by Josephus. Indeed, the attempt has been made to prove this from Josephus himself. (*a*) Sonntag (below, § 8) thought he had discovered Lk.'s Theudas in the Simon who, originally a slave of Herod the Great, shortly after the death of that monarch (4 B.C.), gathered round him a band of robbers in Peræa, got himself chosen to be their king, burned and plundered royal citadels in Jericho and elsewhere, but finally was defeated in battle by Gratus, an officer of Herod's, pursued and beheaded (*BJ* ii. 4 2, §§ 57-59, *Ant.* xvii. 10 6, §§ 273-276). That this Simon, however, also bore the name of Theudas is a mere conjecture. (*b*) Zuschlag (below, § 8) identifies Lk.'s Theudas with Theudion, brother of Doris, the first wife of Herod the Great and mother of his eldest son, Antipater.

After the execution of Herod's third son, Aristobulus (7 B.C.), Theudion married Berenice his widow (*BJ* i. 28 1, § 553). He subsequently engaged in a plot against the life of Herod the Great which had been set on foot by the Antipater just mentioned. Antipater caused poison to be fetched from Egypt through the agency of Antiphilus, one of his friends; Antiphilus passed it on to Theudion and Theudion to Pheroras the brother of Herod. Pheroras handed it over to the charge of his wife. Not till after the death of Pheroras (5 B.C.) did the matter come to the knowledge of Herod; the result was that Antipater was put to death (*BJ* i. 30 5 *f.*, §§ 592-598; *Ant.* xvii. 4 2, §§ 69-77). It is plain that between this Theudion and the Theudas of Lk. there is not the faintest resemblance, and it is therefore quite useless to inquire whether Theudion could also be called Theudas. In point of fact, Theudas can quite well be an abbreviation of Theudion; but with few exceptions a person was known exclusively either by the full or by the abbreviated form of his name, not by both indifferently (Winer, *Gram.*(8), § 16 9).

(*c*) Wieseler (below, § 8) discerns the Theudas of Lk. in Matthias the son of Margaloth or Mergaloth or Margalos, a teacher of the law, who, together with his colleague Judas the son of Sariphæus or Sephoræus, in the last days of Herod the Great, persuaded a number of their pupils to cut down the golden eagle which Herod, in contravention of the law against graven images (Ex. 20 4 *f.* Dt. 4 15-18 23 5 8 *f.* 27 15), had caused to be placed over the great gate of the temple. Herod roused himself from his deathbed and caused Matthias and Judas and their most prominent accomplices to be burnt to death, and the rest of the forty who had been taken to be executed (*BJ* i. 33 2-4, §§ 648-655, *Ant.* xvii. 6 2-4, §§ 149-167).

This story also has but few points of agreement with what we read in Acts. That Matthias gave himself out to be any great person of any kind is neither asserted nor probable; he simply appealed to the OT command. Nor can it be said that he won over a band of followers; for those who joined in his undertaking were from the outset his pupils, and the entire action was an affair of a few hours, since the temple captain intervened at once with armed force. At the same time all those taking part, who were not captured, were dispersed, and it was only afterwards that Matthias and Judas were seized. Further, Judas was as deeply involved as Matthias; in fact, in *BJ* and in the first two mentions of him in *Ant.* he is named before Matthias, and only afterwards (§ 167) does Josephus name Matthias alone because directly before he has spoken of another Matthias; so also xvii. 9 1, § 206: *Ματθίαν καὶ τοὺς σὺν αὐτῷ*. The only reason Wieseler has for passing Judas over is that the name Matthias has the same meaning as Theudas.[1] But that Matthias bore this second name also by no means follows.

[1] On the name see next col., n. 1.

[2] If Theudas promised his followers to lead them through Jordan, like another Joshua, this will be not the sole purpose he had in view, but probably only a first trial by means of which he hoped to confirm faith in his miraculous power with a view to being afterwards in a position to take up some bolder enterprise.

[1] *Θευδᾶς* is one of the names formed with the well-known abbreviation-ending (cp NAMES, § 86, end; LUKE, § 6; APOLLOS, § 1,

(*d*) Other critics, with rather more prudence, attempt no identifications, but nevertheless declare that some Theudas other than the Theudas of Josephus must have come forward before Judas of Galilee. Thus, in the last instance, again Ramsay (below, § 8). The scholar who with Ramsay starts from the axiom that Lk. is a historian of the same rank as Thucydides (see GALATIA, § 12, end) will not readily give up this way of dealing with the difficulty. Those on the other hand who take cognisance of the great untrustworthiness of Lk. in specifically historical questions (cp ACTS, §§ 2, 4, 13 *f.*; GOSPELS, § 132; LYSANIAS) will regard the assertion as rash. Ramsay is certainly right in saying (p. 259) of Josephus that 'he does not allude, or profess to allude, to every little disturbance on the banks of the Jordan.' But it is just as certain that Gamaliel must be supposed to be alluding not to a little but to a great disturbance, if his speech is to be in keeping with the gravity of the occasion. An occurrence which could reasonably be placed side by side with the affair of Judas of Galilee would certainly not have been passed over by Josephus.

Therefore also it is quite irrelevant to urge that the name Theudas was a common one, that the later Theudas was perhaps the son or grandson of the earlier (so Blass), or that Theudas was not his original name but only one which he had afterwards assumed (so Ramsay). As for the frequency with which the name occurs, the evidence—particularly that from the inscriptions—will be found in Schürer (*GJV*[2] 1 473, ET i. 2 168 *f.*). That the name was frequent among the Jews, however, is not affirmed. John Lightfoot (on Acts 5 36) mentions two men named תודום in rabbinic literature, with regard to whom he himself adds that neither of them can be the person intended in Acts.

Lastly, some critics have asked: If one or other of the two authors must have been mistaken, why not Josephus 'cui et in historia et in chronologia titubari et vagari non insuetum?' (so John Lightfoot). Joh. Dav. Michaelis (*Einl. i. d. Schriften d. Neuen Bundes,*[4] 1 [1788] p. 62 *f.*) formulates this position with greater precision thus: Lk. dates Theudas correctly; Josephus correctly remembers (from his childhood) that a revolt occurred under Cuspius Fadus, but is mistaken in thinking that Theudas was the name of the leader on that occasion. Blass is conscious that such a charge against Josephus would be inadmissible, but reaches the same result by the extremely bold assumption (which, however, he introduces only with a *fortasse*) that, in describing the rising under Cuspius Fadus, Josephus wrote either another name than that of Theudas or no name at all, and that his copyists, carelessly identifying this narrative with that of Acts 5 36, introduced the name of Theudas into his text. This identification would have been occasioned by the circumstance that with both authors the mention of Judas of Galilee immediately follows.

3. No error in Josephus.

Indeed our problem becomes still more complicated than at first sight it appeared to be, by reason of the fact that Josephus, immediately after the words about Theudas quoted above (§ 1), mentions Tiberius Alexander's succession to Cuspius Fadus in the procuratorship and the famine in Judæa during his term (Acts 11 28), and then proceeds as follows:—

4. Did Lk. know Josephus?

(*Ant.* xx. 5 2, § 102 [Naber]) *πρὸς τούτοις δὲ καὶ οἱ παῖδες Ἰούδα τοῦ Γαλιλαίου ἀνηρέθησαν* [Niese, *ἀνήχθησαν*] *τοῦ τὸν λαὸν ἀπὸ Ῥωμαίων ἀποστήσαντος Κυρινίου τῆς Ἰουδαίας τιμητεύοντος, ὡς ἐν τοῖς πρὸ τούτων ἐδηλώσαμεν, Ἰάκωβος καὶ Σίμων, οὓς ἀνασταυρῶσαι προσέταξεν ὁ Ἀλέξανδρος*: 'Besides all this, the sons of Judas the Galilæan were now put to death,—[that Judas] who drew away the people from the Romans when Quirinius made a census of Judæa as has been shown in a former part of this work. Their names were James and Simon, whom Alexander commanded to be crucified.'

With this must be carefully compared what is said in Acts 5 37:

μετὰ τοῦτον ἀνέστη Ἰούδας ὁ Γαλιλαῖος ἐν ταῖς ἡμέραις τῆς ἀπογραφῆς, καὶ ἀπέστησεν λαὸν ὀπίσω αὐτοῦ· κἀκεῖνος ἀπώλετο καὶ πάντες ὅσοι ἐπείθοντο αὐτῷ διεσκορπίσθησαν: 'After this man rose up Judas of Galilee in the days of the enrolment, and drew away [some of the] people after him: he also perished, and all, as many as obeyed him, were scattered abroad.'

(*a*) If Lk. cannot be cleared of the charge of having made a mistake about Theudas it will be exceedingly natural to look for the cause of his mistake in this passage of Josephus, on the assumption that Lk. took the latter part of the passage just quoted from Josephus as referring not to the sons of Judas but to Judas himself. If so, it could indeed appear as if Theudas ought to be placed before Judas as long as Lk. confined his attention to the dating of Judas which he found in his own gospel (2 1 *f.*) and left that of Theudas out of consideration (see further, § 7 *b*).

The remarkable collocation, by which the two are mentioned in the same order, has (since Keim) determined most critics who are not shocked at the suggestion of an acquaintance with Josephus on the part of Lk. to see here a proof of such an acquaintance—a view which it is rather difficult to avoid. Indeed, so strong is the proof that it and it alone has led Wendt, who in the seventh edition of Meyer's commentary on Acts had still denied the use of Josephus by Lk., to affirm it in the eighth edition (1899, pp. 35-38); and Blass, who does not admit it, nevertheless says: 'non facile adducimur ut casui tribuamus Theodæ Judæque apud utrumque scriptorem junctam commemorationem,' and has no better way of escape than that mentioned in § 3, end.

(*b*) As for the phraseology: the expression 'to draw away the people' (*λαὸν ἀποστῆσαι*) in particular is one that two authors writing independently would not easily happen upon. Then there is also the mention of the census. In 'obeyed' (*ἐπείθοντο*) Lk. uses, both in the case of Judas and in that of Theudas, the same verb which Josephus uses in speaking of Theudas ('persuades,' *πείθει*). It is specially important to mark that of all the five passages of Josephus in which Judas is mentioned (see JUDAS) only that which we are at present considering exhibits these agreements with Lk. Theudas's description of himself is introduced in both cases by *λέγειν*, and the participle *λέγων* which Lk. employs Josephus has in his second passage. The statement that after his capture Theudas had his head cut off was plainly too detailed for Lk.; but he uses with reference to him the verb *ἀναιρεῖν* ('was slain') which Josephus applies to the death of the followers of Theudas (*ἀνεῖλεν*, 'he slew'), and to the sons of Judas in precisely the same aor. pass. (*ἀνηρέθησαν*, 'were slain') as we find in Lk. Any one of these coincidences can appear indecisive, but taken together they turn the scale.

The last of the coincidences enumerated above is, it is true, denied by Blass. (*a*) Eusebius (*HE* ii. 11 1) quotes the words of Gamaliel regarding Theudas in indirect narration as follows:—*ὡς ἄρα κατὰ τὸν δηλούμενον χρόνον ἀνέστη Θευδᾶς, λέγων ἑαυτὸν εἶναί τινα, ὃς κατελύθη, καὶ πάντες ὅσοι ἐπείσθησαν αὐτῷ διελύθησαν*: 'that at the time specified Theudas arose, giving himself out to be somebody, who was destroyed, and all, as many as obeyed him, were dispersed.'

5. Text and object of Acts 5 36 *f.*

Although this quotation is far from being verbally exact (notice *ἐπείσθησαν* and the order of the words *ἑαυτὸν εἶναί τινα*), Blass, nevertheless, believes that we have a survival of the original text of Lk. in *κατελύθη*, and that we shall be warranted in supposing the *ἀνηρέθη* of the best authorities to have been first introduced into Lk. by copyists of the Bible, from the text of Josephus

n. 1; SILAS, § 7 *a*). Probably it comes from Θεόδωρος, Θεόδοτος, or some such form, and thus the meaning does coincide with that of Matthias ('gift of God'); but various other forms such as Θεοδέκτης, Θεόδημος and the like could also have produced it. Θευ- for Θεο- rests upon a contraction met with mostly in the Ionic dialect (Gust. Meyer, *Griech. Gram.*[2] § 119; Schweizer, *Gram. der pergamen. Inschriften*, 1898, § 8 2 *b*; Meisterhans, *Gram. der att. Inschriften,*[3] § 19 1). If the accent lies on the first element of the composite name as in the first instances given above (of which Θεύδοτος is established in Attic inscriptions of about 200 B.C. and Θεύδωρος—both with ευ—from the period of the empire, whilst Θεόδοτος is already found in Plato and Θεόδωρος in Thucydides), it is proper to accentuate the word as Θεύδας (see SILAS, col. 4519, n. 2); if such a form as Θευδόσιος—a name met with also in Attic inscriptions of about 160 B.C.—is at the basis of the contraction Θευδᾶς will be the correct accentuation.

(ἀνεῖλεν; cp ἀνῃρέθησαν in his section relating to the sons of Judas), and *vice versa* that the name of Theudas was introduced into the text of Josephus also by copyists (above, § 3). Assuredly a bold hypothesis.

(*b*) Blass considers that some support for this hypothesis can be found in the reading of D*: *ὃς διελύθη αὐτὸς δι' αὑτοῦ καὶ πάντες ὅσοι ἐπείθοντο αὐτῷ καὶ ἐγένοντο εἰς οὐδέν.*

Not only, however, does this vary greatly from the rendering of Eusebius; it also appears to be the older of the two. This has been recognised by Blass in so far as he takes up into what he maintains to be the first form in which Acts was written the words αὐτὸς δι' αὑτοῦ (=ἑαυτοῦ) and omits the διελύθησαν. It is all the more remarkable to find that he refrains from proceeding to the natural consequence—that of taking the κατελύθη of Eusebius as a modification of the διελύθη in D which was preferred after the διελύθησαν had been introduced from the ordinary text into the text of D. Καταλύειν will have been selected in the process because it occurs in *vv.* 38 *f.* The converse, that D or his predecessor changed the κατελύθη (of the original text put forward by Blass) which yet was not followed by any διελύθησαν, into διελύθη, might be hard to explain.

(*c*) On the other hand it is nevertheless quite intelligible why Blass should have found difficulty in accepting the text of D entirely, including the διελύθη, as the original. For D's text admits very readily of being regarded as modification—not indeed of the primitive text assumed by Blass, yet certainly of the generally received text of the best authorities. The ἀνῃρέθη καὶ . . . διελύθησαν has here been compressed into one verb διελύθη.

If this διελύθησαν had not lain before the scribe, the single verb διελύθη would never have been chosen. It can be applied to a group of men who have been dispersed or to a thing which has been destroyed, but to apply it to one man is not natural. Only καταλύειν is so used (*v.* 39); but κατελύθη in view of what has been said above cannot be accepted as the original reading. By the compression of the two verbs above referred to, however, the construction also has suffered. The subject to διελύθη is in D not merely ὅς but also the plural as well, πάντες ὅσοι ἐπείθοντο αὐτῷ, and this same second subject receives further a verb in the plural: καὶ ἐγένοντο εἰς οὐδέν. The Latin translator of D has seen that this is inadmissible, and has therefore taken occasion to delete the καί before ἐγένοντο: 'qui interfectus est, et omnes quotquot obtemperabant ei facti sunt nihil'; and Hilgenfeld (*Acta apost. græce et lat.*, 1899) has found necessary the following punctuation—so completely inconsistent with the genius of the Greek language—of the words of D which he too regards as those of the true original: ὃς διελύθη αὐτός, δι' αὑτοῦ καὶ πάντες ὅσοι ἐπείθοντο αὐτῷ, καὶ ἐγένοντο εἰς οὐδέν. The reason for the compression of the two verbs into one (διελύθη) was perhaps that the eye of the copyist before it reached ἀνῃρέθη had already run ahead to διελύθησαν. Yet the addition of the words αὐτὸς δι' αὑτοῦ seems to indicate that the alteration, even if in the first instance it was due to an accident of the sort indicated, was nevertheless carried out with full consciousness.

(*d*) Blass also urges reasons derived from the context for preferring κατελύθη to ἀνῃρέθη. Gamaliel's design is to persuade his hearers to leave the apostles alone (*vv.* 38 *f.*); but if the revolt of Theudas had been quelled by his being put to death, such an instance would tend to show on the contrary that the right policy was to punish the apostles with death. We are willing to believe that it was this argument, whether by itself or taken in connection with the oversight conjectured above under (*c*), which led to the reading διελύθη αὐτὸς δι' αὑτοῦ in D. But the argument is not conclusive.

Wendt (in Meyer's *Comm.*) has already pointed out that it is not the apostles who are intended to be put in the parallel position to that of Theudas, but Jesus himself as the head of the new movement; Jesus, however, has already suffered the penalty of death, and Gamaliel therefore might all the more assume that his followers were no longer seriously to be feared. At the same time it is by no means indisputable that Lk. was here thinking of Jesus. Had it been so, to have referred expressly to the fact of his death would have been very natural. In point of fact not only is this reference not made, but in speaking of the case of Theudas it is not so much as hinted that his death was the *cause* of the dispersion of his followers; rather are the two facts brought into juxtaposition merely.

Thus the point of the comparison between the movement originated by Theudas and that in which the apostles were engaged will rather be simply that both at first had an apparently threatening character but soon lose it, without reference to the manner in which the change is effected. If this view is correct, it must be conceded that the example of Theudas from Josephus is not in all its particulars quite apposite, and the attempt of Blass to discover or conjecture another Theudas who was not 'slain' (ἀνῃρέθη) but only 'broken' (κατελύθη) must appear to be called for.

(*e*) But let us now for a little leave aside all this argumentation and simply ask: What of Judas of Galilee? What avails it to eliminate the death of Theudas by operations on the text if nevertheless that of Judas remains? True, Josephus knows nothing of it; but this does not come into account, for Lk. makes Gamaliel say, 'he also perished': κἀκεῖνος ἀπώλετο. Against this Blass can only adduce the Perpignan codex cited in ACTS, col. 50, n. 2. This in fact has for ἀπώλετο in the case of Judas, just as for ἀνῃρέθη in that of Theudas, 'dissolutus est'; but must we believe that the original has been preserved in a solitary Latin translation? Is it not very easily conceivable that the second 'dissolutus est' is due to repetition by a careless copyist? And who was it who introduced the ἀπώλετο in the case of Judas? The ἀνῃρέθη for Theudas, Blass will have it, is taken from Josephus; but the ἀπώλετο for Judas could not at all have been taken from Josephus by way of correction of a κατελύθη originally written by Lk. (according to Blass), for Josephus says nothing at all about the end of Judas.

It thus appears that text-criticism is of no avail in the endeavour to show that Lk. has fallen into no error or to disprove his acquaintance with Josephus.

6. Separation of sources.

Our next question therefore must be as to whether analysis of the sources can contribute nothing to a solution of the problems of our passage. Most of the source-critics named in ACTS, § 11, have no difficulty in attributing the mistake as to Theudas along with the entire speech of Gamaliel to the author of their 'secondary' source, to whom also they trace everything else that is inappropriate or incredible in Acts. The situation is changed somewhat if, as Clemen holds, the two verses about Theudas and Judas of Galilee were introduced into Gamaliel's speech by the final redactor only. Clemen shares the view of Blass as to the inappropriateness of both these instances to the purpose of the speech, and therefore assumes that its purpose had not been recognised with sufficient clearness by that redactor. Lastly, B. Weiss, with whom Feine and Hilgenfeld concur, regards only the instance of Theudas (from ἀνέστη in *v.* 36 to ἀνέστη in *v.* 37) as being due to the final redactor. The motive of the interpolation was, he thinks, because the movement led by Theudas, as being of a more religious character, supplied a better parallel to that led by the apostles than the purely political agitation of Judas of Galilee. Even if this is not very convincing, there is nevertheless this advantage gained by means of Weiss's hypothesis that the literatim repetition of ἀνέστη which would seem clumsy if we suppose a single writer, as well as that of πάντες ὅσοι ἐπείθοντο αὐτῷ, become less inexplicable. All critics who accept separation of sources at all are agreed in admitting the existence of the error in the existing text of Acts; as to acquaintance with Josephus on the part of the author of *v.* 36 they differ in opinion, and this is easily possible, since separation of sources naturally cannot shed any light upon this question.

(*a*) Thus we must resume the question at the point where we left it in § 4 *a*. Lk.'s acquaintance with Josephus was in no case an exact one; in fact it is sometimes denied even from a standpoint for which the chronological difficulty does not exist.

7. Inexact use of Jos. by Lk.

Thus Schürer (below § 8) without holding the priority of Lk. in point of time, says: 'either Lk. took no knowledge of Josephus at all, or if he did he afterwards forgot all that he had read. The first supposition, as the simpler, seems preferable.' With reference to the case before us, he therefore supposes that any knowledge Lk. had regarding Theudas was by hearsay only. In that case, however,

the remarkable degree of coincidence with Josephus must be set down to mere chance—at which explanation even Blass stumbles (above, § 4 *a*).

(*b*) It is difficult to see why the following explanation might not serve. Lk. had made notes from Josephus in which occurred the exact words now common to both authors. According to the order of Josephus, Theudas stood in the first place, Judas in the second. Perhaps in his reading Lk. had overlooked the circumstance that Josephus strictly speaking was dealing with the sons of Judas, and thus erroneously took what was said of the fate of these as referring to the father; perhaps, however, on the other hand he read quite correctly, but at the same time made his note only to some such effect as this, that 'Judas of Galilee stirred the people to revolt in the days of the taxing'; because the instance of the father seemed to him better suited for his purpose than that of the sons. If now he had never before heard anything of a trustworthy kind about Theudas, it will certainly be excusable in him if he did not retain in his memory the date of Theudas (which of course he did not require for his actual purpose and therefore did not note), and (especially if the composition of his work did not follow immediately on the making of his notes) took the order of his notes to be also in chronological order, and therefore represented Theudas as appearing before Judas whose date was well known to him. If he assigns to Judas himself the fate which according to Josephus overtook his sons, this admits of being explained, on the first of the assumptions suggested above, from careless reading of the passage; on the second it explains itself. Even Krenkel concedes that Lk., even without literary authority for it, could believe that Judas must have come to the same end as nearly all the insurrectionary leaders of that period (see JUDAS, 10).

An instructive example of careless reading which no one can dispute is to be met with in Eusebius (*HE* 2 11), who reproduces verbatim Josephus's account of Theudas, including the mention of Fadus, and nevertheless says that it relates to the same event as Gamaliel refers to in his speech. The mention of Fadus had thus failed to suggest to him the question as to the date to which the event ought to be assigned, and as to whether it could possibly be reconciled with the assumed date of Gamaliel's speech.

(*c*) The attempt here made to account for the remarkable degree of coincidence between Josephus and Lk. would have to be abandoned only in the event of its being possible to show that Lk. could not have used Josephus. Not to speak, however, of the great number of cases in which his employment of that author is raised to a very high degree of probability indeed, if not to absolute certainty, the non-employment in the strict sense is incapable of being proved. It is not difficult, indeed, to prove that Lk. did not make use of Josephus in the manner in which a modern scholar does; but all the cases in which he diverges from him admit of being arranged under two classes; either he knows some other account besides that of Josephus and prefers it[1] (whether, in our judgment, rightly or no is not the question), or he fails to use statements of Josephus as to the accuracy of which he would have had no doubts, simply because he has forgotten them, unless indeed, perchance, he had never read them (for it is possible that his use of Josephus may have been sporadic only).

(*d*) Let us suppose, however, the case that a modern scholar has read the whole of Josephus—or most of him. Will he at the end of his reading be in a position to say with confidence, for example, what were the territories included in the tetrarchy of Philip, and particularly whether Ituræa (Lk. 3 1) was one of them (there are, in all, five passages in Josephus, not all of them in full agreement, to be taken account of here; cp HEROD, § 11; LYSANIAS, § 1 *b*), or to recapitulate the facts about Lysanias? He will have to refer to his author again. But not only was such an expedient more laborious and time-consuming in those days in the case of a large work not then, as now, divided into chapters and paragraphs or provided with an index; we do not, above all, in the least know whether Lk. deemed this necessary, or whether he did not rather acquiesce all too willingly in the suggestion that he knew the matter well enough already without verifying it. We do not by any means deny that Lk. often gives way to fancies which a careful reading of Josephus on his part would certainly have dispelled; as for example the notion that two men could be high priest at one and the same time (Lk. 3 2) or that the census under Quirinius which Josephus plainly assigns to 6-7 A.D. could have coincided in date with the birth of Jesus. The question, however, is whether Lk. read Josephus with so much attention as to be able to correct these errors which had already passed into his flesh and blood. If, for example, as has been with probability supposed (see CHRONOLOGY, §§ 59 *f.*; QUIRINIUS), he had already confounded the census under Quirinius with some other, it could not of course make any great impression on him if he found it in Josephus mentioned in another connection than that in which he had already in his own mind placed it.

(*e*) If we are to form any correct judgment as to Lk.'s procedure with reference to sources which in our modern view ought to have been absolutely authoritative for him, it will be our duty to observe the manner in which he uses the Pauline epistles. He leaves so much of their contents unnoticed and contradicts them to so large an extent (cp ACTS, §§ 4, 7, 14; COUNCIL; RESURRECTION, §§ 16-18, 21, 23, 27 *d*, etc.; SIMON PETER, § 3; SPIRITUAL GIFTS, § 9 *f.*) that even some critical theologians have supposed he was entirely unacquainted with them. Yet this, if he wrote about 100-130 A.D., is almost more impossible than it would be on the assumption of his having been a companion of Paul. We could imagine that not every companion of Paul became acquainted with the contents of his epistles before they were dispatched. Yet this is a matter of indifference here; for a companion of Paul became acquainted, from his own observation or from the oral accounts of eye-witnesses, with facts of which but a small number is known to us from the epistles, yet in sufficient number to show us how far it was from Lk.'s intention to pay serious heed even to these authentic sources in constructing his picture of the apostolic age.

(*f*) To return once more to Theudas, it is clear that in this case also Lk.'s divergences (above, § 1 *b*) from the account in Josephus are not decisive against his use of Josephus. It is very easily possible that Lk., as Schürer thinks, knew something about Theudas by hearsay, and indeed that the reported number of his followers reached him in this manner. With this it is not at all irreconcilable that his collocation of Theudas with Judas of Galilee and the chronological error may be due to his use of Josephus. The case is not such as makes it possible to say that every other explanation is excluded; but the explanation here offered has in point of fact a probability that presses, and no counterproof can be brought forward. As against it may be urged, if one chooses, the contradiction apparently involved in the fact that Lk. is found accurately reproducing certain words of Josephus while yet altering so profoundly the general contents of his statements. This last fact seems to counteract the evidential value of the verbal coincidences. We believe, however, that this difficulty has been obviated by the suggestion that the words in question come from Lk.'s notes of Josephus (see above, *b*).

8. Literature. That Josephus had been used by Lk. was first affirmed by Holtzmann (*ZWT*, 1873, pp. 85-93, and especially 89 *f.*; 1877, pp. 535-549). See also Hausrath, *NTliche Zt.-gesch.*(2) 4, 1877, pp. 239-243; Keim, *BL* 5, 1875, pp. 510-513, and *Aus dem Urchristenthum*, 1, 1878, pp. 1-27, especially 18-21; Clemen, *Chronol. d. paulin. Briefe*, 1893, pp. 66-69, and *St. Kr.* 1895, pp. 335-337; and Krenkel, *Josephus u. Lucas*, 1894, pp. 162-174 (very thorough). Lk.'s use of Josephus was denied by Sonntag, *St.*

[1] For example, on the death of Herod Agrippa I. (Acts 12 20-23); see HEROD, § 12, end.

P. W. S.

THIMNATHAH (תִּמְנָתָה), Josh. 19 43. See TIMNAH.

THISBE (ΘΙCΒΗ [BN], ΘΙΒΗ [A]), the native place of Tobit (Tob. 1 2).

It was situated 'at the right hand'—*i.e.*, southward—of κυδιως [BN] or κυδιων [A] (Kadesh) in Galilee, and above ασ[σ]ηρ (Hazor?). א adds that it was ὀπίσω δυσμῶν ἡλίου, ἐξ ἀριστερῶν φογωρ.

So far on the hypothesis that we have the Book of Tobit in an approximately original form. There is, however, strong reason to believe that the stories of Daniel (in part), Esther, Judith, and Tobit, have been systematically altered as regards their historical and geographical names (see *Crit. Bib.*). Thus the addition in א represents אחר המערב משמאל הפעור, but this is a corruption of ירחמאל עֲרַב יִשְׁמָעֵאל, and the names *Naasson*, *Raphain*, *Sephet* in It. Vg. come respectively, (*a*) from כּוּשָׁן, (*b*) from רְפָאִים (see REPHAIM), and (*c*) from צרפת. גליל and גלעד are liable to confusion: the original reading was probably not 'Galilee' but 'Gilead'—*i.e.* the southern Gilead in the Negeb. 'Naphtah' is a southern district so called, and 'Asher' represents the southern Asshur or Ashhur. See, however, TOBIT, and on another reference to a Thisbe or Tishbeh, see TISHBITE.

T. K. C.

THISTLE, THISTLES occur in AV as the rendering of the following words:—

1. דַּרְדַּר, *dardar* (τρίβολοι, Gen. 3 18 Hos. 10 8†), a word also found in Aramaic, Arabic, and Ethiopic, but apparently quite distinct from another word *dardār* which, in Persian and Arabic, denotes the 'elm tree' (see Löw, 98 *ff.*). Being coupled in both places with קוֹץ, *ḳōṣ* ('thorns' or 'thorn-bushes,' see THORN), *dardar* has been reasonably identified both in ancient and modern times with the τρίβολος of the Greeks—*i.e.*, either a thistle or more probably a spinous plant of the knapweed kind, such as *Centaurea Calcitrapa*, L. (Ascherson ap. Löw, 427) or the more formidable *C. verutum* (Tristram, *NHB* 426). Petermann (*Reisen im Orient*, 1 74) reported that the name *dardar* was still used in Syria for plants of the thistle kind.

2. For אָטָד, *āṭād*, ῥάμνος, EV 'bramble,' AVmg. offers in Judg. 9 14 the alternative rendering 'thistle.' See BRAMBLE, 1.

3. חוֹחַ, *ḥōăḥ*, is rendered 'thistle' in 2 K. 14 9 2 Ch. 25 18 Job 31 40, and 'bramble' (AV only) in Is. 34 13, elsewhere and in RVmg. exc. Is. THORN (*q.v.*).

4. τρίβολοι occurs twice in NT (Mt. 7 16 Heb. 6 8†); the meaning is probably the same as that of OT דרדר.

Thistledown appears once in AVmg. (Is. 17 13), producing as the result, 'like thistledown before the whirlwind.' But if a definite plant is required, one might think rather with W. M. Thomson[1] of the globe-like branches of the wild artichoke (probably *Cynara syriaca*). When ripe and dry in autumn these 'vegetable globes' are carried far and wide by the wind. AV, curiously, gives in the text of Is. (*l.c.*) 'a rolling thing,' and in the similar passage, Ps. 83 13 [14], 'a wheel' (see WHEEL); RV in both passages renders 'the whirling dust.' The analogy of Syr. *gellā*, Arab. *jill*, would, however, rather recommend 'stubble' as the true meaning of גַּלְגַּל, *galgal*, in these two passages.

N. M.

THOCANUS (ΘΟΚΑΝΟΥ [B], ΘΩΚ. [A]), 1 Esd. 9 14 RV = Ezra 10 15, TIKVAH (*q.v.*).

THOMAS THE APOSTLE. For the order in which the name occurs in the lists in Mt. 10 Mk. 3 Lk. 6 Acts 1, see APOSTLE, § 1 (col. 264).

1. The name. In the Fourth Gospel the name occurs seven times, thrice with the addition 'who is called Didymus,' ὁ λεγόμενος Δίδυμος (11 16 20 24 21 2 14 5 20 26 *ff.*). From Jn. this addition found its way into the Greek and Latin text of Lk. in cod. D. Formerly the name was read also in Jn. 20 29 by the TR without any Greek attestation and in the Vulgate of this passage, though none of the MSS collated by Wordsworth-White have it there.

The spelling of the name is without exception Θωμᾶς, in Latin *Thomas* (only two MSS of Wordsworth-White have frequently *Tomas*); in Syriac *Thōmā* (ܬܐܘܡܐ) according to Bar-Hebræus, but the Nestorian vocalisation is *Theʾōmā* (ܬܐܘܡܐ), preserving the consonantal character of א as in Hebrew; the Syro-Palestinian writes the Grecised ܬܐܘܡܐܣ (cod. A, Jn. 11 16 ܬܐܘܡܐܣ), and for Δίδυμος ܬܐܘܡܐ (cod C, 20 24 ܬܐܘܡܐ). The Syriac appellative for twin is *thāmā* (Nestorian *thĕʾāmā*), and scarcely differs in pronunciation from the proper name, for which reason the explanation ὁ λεγόμενος Δίδ. was omitted in all three passages in Syr. Sin. Syr. Cur. is defective in all passages of the Gospels where Thomas occurs. But in both these Syriac texts the name Thomas occurs in a passage where it is not found in the original Greek, namely Jn. 14 22; instead of Ἰούδας οὐχ ὁ Ἰσκαριώτης, Syr. Sin. gives *Thoma*, Syr. Cur. *Juda-Thoma*; Blass gives now Ἰούδας[, οὐχ ὁ ἀπὸ Καρυώτου]. The Greek Δίδυμος has been preserved as *Didymus* in the Latin versions, but rendered *no creszentz* or *dubitos* in the MSS of Lyon and Carpentras of the Provençal version and *ein zweifeler* in the pre-Lutheran German Bible, as if it were = δίψυχος (see *PRE*(3) 3 66). The *OS* translates the name ἄβυσσος, ἀκατάληπτος βαθύτης = Hebrew *tĕhōm* (תְּהוֹם, in Pal.-Syr. *tūmā*), and δίδυμος. The meaning 'twin' is certain, but the original form of the Semitic word is much disputed (see, on the one hand, Olshausen, § 181 *b*, Lagarde, *Uebersicht*, 144; Barth, 182 *b*, n. 1; Ges.-Buhl, *Lex.*; on the other hand, Siegfried-Stade, *Lex.*; König, 269; Dalman, *Gramm.* 112, n. 4). The question is whether the Hebrew word be *tĕʾōm* (rather than *tōʾem*) or *tōʾām* (in Arabic *tauʾam*). Still more doubtful is the relation to the corresponding Ethiopic word. The spelling *tĕyōm* in the Targums is merely due to the pronunciation of א between two vowels. No example of the use of the noun as a proper name older than the NT is known to the present writer. There is no Thomas for instance in Josephus, but cp Phœn. תאם בן עבדמלך in *CIS* 1 no. 46, where also Θαμος Αβδουσιρου, though the name became very frequent in all parts of Christendom; for modern Syriac instances, see Maclean's *Dictionary*.

From the reading 'Thomas' or 'Judas-Thomas' for 'Judas not Iscariot' in Jn. 14 22, it is apparent that

2. The person. Thomas was identified at a very early date with 'Judas of James' in the lists of Lk. 6 and Acts 1. This is strange enough, since the name Thomas also occurs in these lists. Yet so it is, and this identification has been maintained by Resch (*Texte u. Unt.* x. 3 824 *ff.*), who explains 'Judas of James' as *brother* (not son) of James, and finds the other twin in James the son of Alphæus, taking Lebbæus-Thaddæus to be different from 'Judas of James' (see JUDAS, 7, col. 2623). This 'Judas of James' has been identified further with Judas (or Jude) the son of Joseph, the brother of Jesus, and thus Thomas has been made brother of Jesus himself. On the latter identification see especially Th. Zahn, *Forschungen*, 6 346 *ff.*, who thinks that it is an invention of the author of the *Acts of Thomas*. A Syriac origin for these Acts has been maintained by Nöldeke and supported lately upon valid grounds by Burkitt (*Journ. Theol. Stud.* 1 280 *ff.* 294 *f.*). The name Judas-Thomas occurs also in the Syriac Doctrine of Addai (see Lagarde, *Reliquiæ Syriace*, p. 42 *ll.* 16 *f.*; *Græce*, p. 94 *l.* 35; Cureton, *Documents*, 33; ed. Phillips, 5; Barhebræus, *Chron. Eccl.* 3 2), and it was doubtless from a Syriac source that Eusebius got his Ἰούδας ὁ καὶ Θωμᾶς (*HE* 1 13, where the Syriac text of Eusebius has only *Judas Thomas*). Ephrem Syrus, too, called him Judas-Thomas (6 16 F of his works, where the Roman edition printed 'Thomas,' see Burkitt, *Texts and Studies*, vii. 2 4). Others make Simon Zelotes a brother of Judas or James (see the Armenian Commentary of Ephrem on Acts in Rendel Harris, *Four Lectures on the Western Text of Acts*, 37), and from this combination the other fact may be explained, that for Lebbæus also Judas Zelotes is found in Latin MSS in Mt. 10 3, in Münter's Sahidic version, Jn. 14 22 (see Lipsius, 3 163), in the Latin Chronicle of the year 334 (ed. Mommsen, 670, ed. Frick, 100, who wrongly presupposes a lacuna between Judas and Zelotes). For the question whether under the 'things

1 *The Land and the Book*, 563 = *S. Palestine and Jerusalem*, 112 *f.*

which Judas Thomas wrote from India' (Lagarde, *Reliquiæ Syr.* 41 6; Cureton, *Documents*, 32) the epistle of Jude is to be understood, see Lipsius, 3 194; Zahn, *Forschungen*, 5 116 122 6 347, n. 4. The 'Gospel of the Twelve Apostles' (ed. by J. Rendel Harris, 190) makes him a member of the tribe of Benjamin, the 'Book of the Bee' (ed. Budge, 1886) of the tribe of Judah.

The legends that gathered round this apostle are of the most fanciful kind and too intricate to be treated at length here; cp the Greek edition of Bonnet, the Syriac of Wright, and its supplement by F. C. Burkitt in *Studia Sinaitica* 9 25-44, and the treatment of these Acts in Lipsius, *Die Apokryphen Apostelgeschichten*.

In the Clementine Homilies Thomas has a twin brother Eliezer (or, Eleazar, see Lipsius, *Ergänzungsheft*, 24), in another list a twin sister Lysias (*app. ad Chron. pasch.* 2 142, ed. Bonn). In the *Apostolic Constitutions*, vi. 14 (173, ed. Lagarde) the name Thomas is omitted in the list of the Apostles by the MSS *wx*, supplied between Bartholomew and Matthew by *oyzt*.

In the 'Apostolic Church order or Third book of Clement's *Teaching of the Twelve Apostles*, as published by T. P. Arendzen (in *J. Theol. Stud.* 3 60) the order is (7) James, (8) Nathanael, (9) *Thomas*, (10) Kephas, (11) Bartholomew, and (12) Judas *son* of James (the Sahidic version has 'brother of James,' see Arendzen, 74). In the corresponding text (to be published by Mrs. M. D. Gibson in *Horæ Semiticæ*, 1 20) we get (7) James, (8) Judas son of James, with (9) Nathanael, (10) Thomas, (11) Bartholomew, (12) Matthias. A MS in the possession of R. Harris agrees with the text of Arendzen (Gibson, appendix).

In the *History of Mary* (Budge, ET, 105) Thomas is said to have preached to 'the Indians, and the Chinese, and the Cushites, and (the people of) all the islands near and far' . . . His day in the Western church is the 21st Dec., in the Greek the 6th Oct., in the Syriac the 3rd July (see Nilles, *Kalendarium*). On the 22nd Oct. 394 his coffin was deposited in the great church of Edessa; but this was, perhaps, only a removal, as other sources tell of his grave at Edessa at a much earlier time. On the church of the Thomas-Christians of Malabar, which refers its origin to the apostle himself, see Germann, *Die Kirche der Thomaschristen* (1877); on the character of the apostle see the Commentaries on the Gospel of John and exegetical and homiletical books. That the legends make him a carpenter and builder may have arisen from his association with Jesus. E. N.

THOMEI (θομει [A]), 1 Esd. 5 32 RV, AV **Thomoi.** See TEMAH.

THORN, THORNS, occur in AV as the rendering of many different words. It is in nearly all cases impossible to arrive at a determination of the particular species intended, and indeed most of the words may be presumed to be of somewhat general application.

1. אָטָד, *āṭād* (see BRAMBLE), is probably some species of Rhammus. MT in Ps. 58 9 [10] where אטד occurs is probably corrupt. [In Cheyne's restoration the 'pots' and 'thorns' disappear in a sentence which may remind us of Job 27 20 *f.* Duhm here is more conservative. Olshausen's note, however, still deserves consideration.]

2. חֵדֶק, *ḥédeḳ*, is rendered 'brier' in Mic. 7 4 (but cp 𝔊), and 'thorns' in Prov. 15 19†. See BRIER, 6.

3. חוֹחַ, *ḥōăḥ* (2 K. 14 9 2 Ch. 25 18 Job 31 40 Prov. 26 9 Cant. 2 2 Is. 34 13 (cp 𝔊) Hos. 9 6), rendered in AV thrice 'thorn,' thrice 'thistle,' and once 'bramble,' is a word which elsewhere denotes a 'hook' (Job 40 26 [41 2] 2 Ch. 33 11)[1]; the חֲוָחִים, *ḥăvāḥīm*, of 1 S. 13 6† is probably a corruption (Dr., *ad loc.*). 𝔊 has in three places ἄκανθαι ('thorns') and once κνίδη ('nettle'); in 2 K. ακαν (accus. ακανα[ν] but ακχαν [L]); in 2 Ch. 25 18 the word is merely transliterated. ὁ χοζει, τὸν αχουχ [B], ὁ οχοζ, τὸν αχ. [A], ὁ ακχαν [L]. It is usually taken to be a tall and strong thistle, such as *Notobasis syriaca* (*FFP* 336), whose 'powerful spines' (*NHB* 424) would explain the connection with the meaning 'hook'; but some other thorny plant may be intended. Arab. and Pers. *ḫawḫ* ('peach' or 'plum') is probably quite a different word, and does not justify the rendering 'sloe' adopted by Celsius, 1 478 *ff.* See Löw, 147 *ff.*

4. נַעֲצוּץ, *na'ăṣūṣ* (σπήλαιον Is. 7 19, στοιβή[2] Is. 55 13†), is probably a general name for a prickly plant or bush, and connected with the verb נעץ (*nā'aṣ*), to 'pierce' or 'prick,' which appears in post-biblical Hebrew (see Barth, *Nominalb.* 213).

5. סִירִים, *sīrīm* (Eccles. 7 6 Is. 34 13 Hos. 2 8 [6] Nah. 1 10†), denotes 'thorns,' 'thorny branches,' or 'thorny bushes.' 𝔊 has in Eccles. ἄκανθαι, in Is. ἀκάνθινα ξύλα (?), and in Hos. σκόλοπες; in Nah. its text differs from MT, which is corrupt (see Wellh. *ad loc.*). As the etymology is unknown, no nearer speculation is possible.[1] The form סִירוֹת, *sīrōth*, in one place denotes 'hooks' (Am. 4 2).

6. סִלּוֹן, *sillōn* (Ezek. 28 24, σκόλοψ), and סַלּוֹנִים, *sallōnim*, παροιστρήσουσι? (Ezek. 2 6). See BRIER.

7. צִנִּים, *ṣinnīm* (Job 5 5 Prov. 22 5†) and (8) צְנִינִים, *ṣĕnīnīm* (Nu. 33 55 Josh. 23 13†), are also general words for 'thorns.' The former is rendered τρίβολοι by 𝔊 (in Prov. 22 5); the latter βολίδες. The Hebrew words are possibly connected with צִנְצֶנֶת, *ṣinṣéneth*, Aram. צַנָּא, Ar. *sinn*, which all mean 'basket.' In Job 5 5 the reading of MT is not supported by 𝔊 and seems suspicious (see Hoffmann, *ad loc.*).

9. קוֹץ, *ḳōṣ* (ἄκανθα, Gen. 3 18 Ex. 22 5 [6] Judg. 8 7 16 2 S. 23 6 Ps. 118 12 Is. 32 13 33 12 Jer. 4 3 12 13 Ezek. 28 24 Hos. 10 8†), is the commonest OT word for 'thorn' or 'thorns,' but is also (so far as we know) quite general (Löw, 198).

10. קִמּוֹשׁ, *ḳimmōš* (Prov. 24 31 Is. 34 13 Hos. 9 6†). See NETTLE.

11. שַׁיִת, *šayith* (Is. 5 6 7 23 *ff.* 9 17 [18] 10 17 27 4†), a word which only occurs in Is., is, in all the seven places where it appears, combined with שָׁמִיר, *šāmīr*, and is probably of similar meaning (see BRIER, 2). Dietrich (*Abhandl. zur semit. Wortforsch.* 73) proposes a derivation from שָׁאָה, *šā'āh*, 'to be waste,' but this is unlikely.

12. ῥάμνος occurs Bar. 6 71 [70]. Cp BRAMBLE.

13. σκόλοψ, 2 Cor. 12 7. See above (5), (6). In Ecclus. 43 19 Heb. is ספיר. For the meaning of the expression see PAUL, § 32, EYE, DISEASES OF, § 4. N. M.—W. T. T.-D.

THRACE. A 'Thracian' horseman (τῶν ἱππέων τινὸς Θρᾳκῶν) is incidentally mentioned in 2 Macc. 12 35 as one of the bodyguard of Gorgias, the governor of Idumæa under Antiochus Epiphanes. The opportune arrival of the Thracian saved Gorgias from capture by one Dositheus.

Thrace at this period was the general name for the entire region included between the Strymon and the Danube, embracing a variety of tribes (cp Herod. 5 3). With the death of Lysimachus in 281 B.C., all chance of Thrace becoming an independent kingdom ceased. The country became a recruiting ground for all who needed troops and could pay for them. Thracian troops were chiefly light-armed infantry and irregular horse (Xen. *Anab.* i. 2 9; *Memor.* iii. 9 2). Frequent references are made to them as an element in Macedonian, Roman, and other armies; probably the name came to be applied to indicate a certain type of equipment and mode of fighting rather than actual nationality.

[For Θρακων of 𝔊A, however, 𝔊V* reads Θαρσος, and 𝔊va Θαρσους; and it is, to say the least, quite as likely that the Syrian cavalry was drawn from Cilicia as from Thrace (cp ARMY, § 7). As to the possible identification of Tiras (Gen. 10 2) with Thrace, see TIRAS.] W. J. W.

THRASEAS or (RV) **THRASÆUS** (θρασαιου [A], θαρσιου [V*vid.], θαρσεου [Va], *thrasius* [Syr.]), father of APOLLONIUS, 2 Macc. 3 5. The name may possibly be another form of Tarsus.

THREAD (חֶבֶל, etc.), Josh. 2 18 etc. See CORD.

THREE CHILDREN, SONG OF THE. See DANIEL (BOOK), § 22.

THREE-STRINGED INSTRUMENT (שָׁלִישׁ), 1 S. 18 6 EVmg. See MUSIC, § 3 [4].

THREE TAVERNS (τριων ταβερνων [Ti. WH]; Acts 28 15†, AV 'The three taverns,' RV 'The Three Taverns.').

Here Paul was met on the final stage of his journey

[1] On the reading in 2 Ch. see MANASSEH.

[2] This word appears in Dioscorides (4 12) as the name of a common plant. According to Pliny (21 15, § 54) it had a prickly stalk. Fraas (*Syn. Pl. Fl. Class.* 78) identifies στοιβή with *Poterium spinosum*, a low herb occurring in Syria, the branches of which terminate in intricate branching spines.

[1] ἄκανθα in both Greek and Latin writers was undoubtedly *Acanthus spinosus*. The nearly allied *A. syriacus* is abundant in Syria.

to Rome by a company of the Roman Christians. It was a station on the Via Appia; evidently, from the order of the names, lying between Rome and Appii Forum. From Cicero (*Ep. ad Att.* 2 12, 'emeseram commode ex Antiati in Appiam ad Tris Tabernas'), we learn that it stood just where a cross road from Antium on the coast fell into the Appian Way from the W. Tres Tabernæ stood therefore very near the northern end of the Pomptine marshes, in the midst of which Appii Forum actually lay (cp Horace, *Sat.* i. 5 3 *f.*). The *Ant. Itin.* gives 17 R.m. between Aricia and Tres Tabernæ, and 10 R.m. from Tres Tabernæ to Appii Forum; Aricia stood 16 m. S. of Rome. These distances locate Tres Tabernæ at about 3 miles from the modern *Cisterna* on the Appian road. W. J. W.

THRESHING INSTRUMENT (מוֹרַג), 2 S. 24 22. See AGRICULTURE, § 8.

THRESHOLD. This is the rightful rendering of (1) סַף, *saph* (some scholars compare Ass. *sup(p)ū*), the more usual term (see DOOR); (2) מִפְתָּן, *miphtān*, is probably the special term for the threshold of the sanctuary proper (Thenius), 1 S. 5 4 *f.* (Dagon's temple), Zeph. 1 9 Ezek. 9 3 10 4 18 46 2 47 1 (cp DAGON, § 3). The rendering 'threshold' in AV of 1 Ch. 26 15 17 needs correction (see ASUPPIM). We also find the plural סִפִּים, *sippīm*, 'thresholds.' So in Is. 6 4, 'And the foundations of the thresholds shook at the sound of their voices' (read אַדְנֵי הַסִּפִּים, and cp Job 38 6). We are probably to suppose the front of the temple divided by one or more pillars into several entrances. So, too, in Am. 9 1, 'Strike the capitals (of the pillars) that the thresholds may tremble.' The temple at Bethel is spoken of. These 'thresholds' had special keepers (EV 'porters'), 1 Ch. 9 22 2 Ch. 23 4. Elsewhere the phrase is 'keeper (or keepers) of the threshold' (but סַף may be used collectively); so, *e.g.*, Jer. 35 4 2 K. 22 4 23 4 etc., for which in Esth. 2 21 𝔊 gives ἀρχισωματοφύλακες, taking the Hebrew phrase as synonymous with 'Keeper of the king's head' (1 S. 28 2, 𝔊 ἀρχισωματοφύλαξ). In Ps. 84 11 (if the text is correct), a psalmist values even this Levitical office highly (הִסְתּוֹפֵף, but 𝔊 παραριπτεῖσθαι). Gates and thresholds being sacred, it was of course a privilege to guard them. But though it is usual to quote this passage, it is doubtful whether this is critically justified.

1. Hebrew terms.

Sacrifices for the family were originally at the entrance of the home. According to Hommel, the Ass. *sup(p)ū*, 'prayer,' is a denominative form *sippu*, 'threshold.' In modern Egypt a threshold sacrifice may be offered to welcome the incoming master of the house,[1] and, in ancient times, Herodotus reports that every Egyptian sacrificed a hog to Osiris before the door of his house (2 48). Trumbull makes it probable that, in the narrative of the institution of the Passover, the words 'and he shall take a bunch of hyssop and dip it in the blood that is in the bason' (Ex. 12 22) misrepresent the true meaning. בַּסַּף might in fact mean either 'in the bason' or 'at the threshold,' and Trumbull prefers the latter rendering (𝔊 παρὰ τὴν θύραν, Vg. *in limine*). To set foot on the threshold in a careless manner was probably unlucky; Trumbull reports that even now in Syria 'it is unlucky to tread on a threshold,' and that in Upper Syria the bride is sometimes carried across the threshold of the bridegroom's house by the friends of the bridegroom. In Egypt it is the bridegroom who does this, and in ancient Greece and Rome, also in ancient India, similar customs are well known to have existed. Obscure passages in 1 K. 18 21 and Zeph. 1 9 can now be understood; also probably the name of the Pesaḥ (EV 'Passover'). פסח, *pāsaḥ*, means 'to leap, to dance. The Pesaḥ was perhaps so called because the Israelites 'leaped' over the threshold after the special sacrificial rite referred to had been performed at the threshold in recognition of its freshly attested sanctity, or performed a ritual dance near it.

2. Sacredness of the threshold stone.

In 1 K. 18 21, 'How long halt ye between two opinions' (AV), is admittedly most improbable. The revisers, however, not being allowed to correct the text without ancient authority, could find nothing that was plainly better. But Klostermann has provided the easy and natural correction הַסִּפִּים (for MT הַסְּעִפִּים). It only remains to interpret the reference to the *sippīm* aright. The true explanation seems to be, 'How long will ye leap over both thresholds?'—*i.e.*, enter with the same scrupulous awe the sanctuaries of the two rival deities, Yahwè and Baal. And in Zeph. 1 9 (reading *v.* 9*b* as in 𝔊) we may paraphrase, 'And on that day I will punish those who, though they leap with scrupulous awe over the sacred threshold, yet bring with them into Yahwè's house hands stained with cruelty and injustice' (Che. *JQR* 40 568 *f.* [1898]; cp Jastrow, *JBL* 17 108 *ff.* [1898]). See further, *Crit. Bib.* Trumbull has already explained 1 S. 5 1-5 by the light of the same archæological facts. The explanation in 1 S. 5 5 is of course an uncritical guess akin to that in Gen. 32 32.

T. K. C.

[1] So on the arrival of the new Khedive at his palace in 1882 (H. Clay Trumbull, *The Threshold Covenant* (1896), 7, quoting *Folk-Lore Journal*, 1 92).

THRONE. It will be convenient under this heading to deal with seats in general, the Hebrew word for throne being applied to all articles of furniture of that description. The terms are :—

1. Terms.

1. *kissē'* (כִּסֵּא, but כִּסֵּה 1 K. 10 19 Job 26 9 †), is apparently derived from the Ass. *kussū* 'seat, throne,' the Aram. equivalent *korsē'* (כָּרְסֵא Dan. 5 20, etc., cp Syr. *kūrseyā*), from which is borrowed Ar. *kursī* 'chair,' being probably an earlier form.[1] Purely colourless are the two terms—

2. *mōšāb* (מוֹשָׁב, 1 S. 20 18, etc., EV 'seat,' lit. 'place of sitting' from *yāšab*), or *šébeth* (שֶׁבֶת, Am. 6 3, EV *ib.*, 𝔊 καθέδρα; and

3. *tĕkūnāh* (תְּכוּנָה, Job 23 3 'seat,' lit. 'fixed place'), used of the dwelling-place of the Almighty.

4. βῆμα, Acts 12 21 (RVmg. 'judgment-seat'). Properly a raised platform (Lat. *tribunal*, cp *suggestum*) upon which, as Jos. *BJ* ii. 1 1 shows, the θρόνος (Lat. *sella*) was erected. In Neh. 8 4 βῆμα stands for *migdāl*, 'tower'—*i.e.*, an elevated stand or pulpit.

5. καθέδρα, Ecclus. 7 4 (Heb. *mōšāb*), cp Mt. 21 12 Mk. 11 5 (seat of the dove-sellers).

6. πρωτοκαθεδρία, the first or chief seat in a synagogue (Mt. 23 6 Mk. 12 39, etc.). Cp SYNAGOGUE, § 9 *f.*

7. θρόνος (in 𝔊 for 1 above), Rev. 4 4 11 16, etc., a state chair having a footstool. Plu. in Col. 1 16 as the name of a class of angels; cp *Test. Levi*, 3, where they appear as in the seventh heaven. See ANGEL, § 1.

Such pieces of furniture as chairs, seats, or stools are unknown to the ordinary tent-dweller, and doubtless the Hebrews first came to use them after they occupied Canaan (see MEALS, § 3*b*). It is true that in the representation of Sennacherib's camp before Lachish a kind of seat or bench is to be seen in some of the tents, but this departure from the ordinary custom is doubtless due to the superior culture of the Assyrians (see TENT, fig. 1). As in Assyria, Babylonia, and Egypt, seats were no doubt to be found in every house in Canaan, and together with a bed, table, and lamp formed part of the equipment of a well-appointed room (2 K. 4 10; EV 'stool').[2] The word used in this passage (*kissē*) elsewhere refers to the seat or throne of Eli the priest (1 S. 1 9 4 13 18), of the governor 'beyond the River' (Neh. 3 7, see Ryle, *Camb. Bible, ad loc.*), and of the throne of Solomon (1 K. 10 18 *ff.*, 2 Ch. 9 17 *ff.*).

2. References.

The reference to Satan's throne at Pergamos (Rev. 2 13, see PERGAMOS, § 2), if the great altar of Zeus is meant, is associated

[1] According to another view the *r* in the Aram. forms has been inserted to compensate for the loss of the doubled *s* (for a statement of the views see Bevan, *Daniel*, 104 *f.*). It is to be noticed that the form with *r* occurs in the old Aramaic inscription of Bar-rekub (Zenjīrlī, B5, temp. Tiglath-pileser III.). The same form appears to recur in Phœnician inscriptions from Cyprus of the beginning of the fourth century B.C. (*CIS* 1, nos. 22, 44, 88), where מלץ (ה)כרסים, 'interpreter of the two thrones,' is perhaps the ἑρμηνευτής (cp Gr. inscr.) between the rulers of Cyprus and Persia (see *CIS* 1 65).

[2] But note perhaps that the hostess is said to have been a 'great' woman.

with the interesting question of throne-worship. That there is a very close connection between the throne of the deity and his altar appears certain, and it is not improbable that they were originally identical. On the whole subject see Reichel, *Vorhellen. Götterculte*, 3 *ff.* (Vienna, 1897), with Budde's remarks, *Exp.T* 9 396 *ff.*; and Clermont-Ganneau, *Rec. d'Arch. Orient.* 4 247 *ff.*

3. Description. There are three main varieties of seats to be noticed: (*a*) the seat with neither back nor arms, (*b*) the seat with straight back, and (*c*) the straight-backed seat with arms. The three practically correspond to the classical *sella*, *cathedra*, and *thronus* respectively. The first of these is frequently represented upon Assyrian and Babylonian seals,[1] and bears a general close resemblance to the primitive altars and table upon the Assyrian slabs.[2] In a large number of cases it is shaped like a square stool, often with several cross-bars, though instances are by no means wanting where the legs cross transversely, not unlike the construction of the modern camp-stool.

These shapes are found in the ancient classical world and were probably borrowed from the East. The Greek term for them, δίφρος, is used by 𝔊 to render *kissē'* in 1 S. 1 9 4 13 18 2 K. 4 10, and in accordance with Gr. usage occurs in 1 S. 28 23 to render *miṭṭāh*. On the use of beds, couches, and divans, cp Bed, § 3.

Representations of the second and third variety are likewise found in Assyria where they are often accompanied with a footstool; cp the analogy of the Gr. *θρόνος* and its *θρῆνυς*.

The OT references to the footstool (*hădōm*, הֲדֹם, 𝔊 ὑποπόδιον, always metaphorical) would show that the Hebrews were well acquainted with seats of this nature. On *kĕbeš* (כֶּבֶשׁ), 2 Ch. 9 18, see below, n. 6.

The two last-mentioned varieties lent themselves to decoration and elaboration to a greater extent than the *sella*. They were frequently of the finest workmanship and adorned with gold and plaques of carved ivory (see Ivory, § 2).[3] An overspread or baldachino was often added, and a reference to this is perhaps rightly seen in the *šaphrīr* (Kr., but Ktb. שפרור) of Jer. 43 10.[4] A common form of ornament was the representation of animals or men, to support the arms or seat.

If Benzinger is correct in his suggestion that Solomon's throne (situated in the Porch of the Throne, 1 K. 7 7) was the work of Hiram, it is natural to suppose that it was based upon the familiar Egyptian or Assyrian models. The throne was decorated with ivory and gold, and was approached by six steps (cp Is. 6 1 'a throne high and lifted up'), at each end of which was the figure of a lion.[5] The back appears to have been adorned with heads of bulls. The second Targ. on Esther adds many fanciful details which are devoid of value.

On the text of 1 K. 10 18 *ff.*, 2 Ch. 9 17 *ff.*, see the *Comm.* of Ki. and Benz. In 1 K. 10 19 the reading 'rounded top' (head-rest) appears obvious, but we should probably read רָאשֵׁי עֵגֶל, 'the heads of bulls' (𝔊 προτομαὶ μόσχων). In 2 Ch. 9 18 the words have been seriously misunderstood.[6]

The meaning of *yādōth*, EV 'stays' (lit. hands, 𝔊 χεῖρες, *manus* [K.], ἀγκῶνες, *brachiola* [Ch.]) is not clear. Jos. *Ant.* viii. 5 2 offers ἐνήλατον, which means (*a*) the slats of the framework of a bed, (*b*) the rungs of a ladder, and (*c*) axle-pins (cp 1 K. 7 32). Following (*a*) we might think of the slats forming the seat of the throne, but the idiomatic 'on either side' (מִזֶּה וּמִזֶּה), and 𝔊's ἀγκῶνες in Ch. points rather to the arms. Such arms are represented, *e.g.*, upon the throne of Ašur-bani-pal (Perrot and Chipiez, *Art in Chald.* 1 108, fig. 28), and of Sennacherib before Lachish (*ib.* 2 105, fig. 47, cp Ball, *Light from the East*, 193). What is meant by the 'two lions standing by (near) the stays' is also obscure; the words are omitted by 𝔊A in 1 K. 10 19, perhaps rightly. S. A. C.

[5] 1 K. 10 20 אריים † elsewhere אריות. In a Phœnician inscription from Citium in Cyprus (*CIS* 1, no. 10) mention is made of the offering of an altar and two ארום—*i.e.*, perhaps (on the analogy of our passage) 'lions' (אֲרִים).

[6] כֶּבֶשׁ, footstool' (𝔊L ὑποπόδιον, *scabellum*) is for כבש, a variant of עֵגֶל in 1 K. (emended text). See, primarily, Geiger, *Urschr.* 343.

THRUM (דַּלָּה), Is. 38 12 RV$^{mg.}$ See Weaving.

THUMMIM (תֻּמִּים), Ex. 28 30. See Urim and Thummim.

THUNDER (רַעַם, Ps. 77 19 [18] 81 8 [7] 104 7 Job 26 14 Is. 29 6; βροντή; also, much more frequently, קוֹל י׳, Ps. 29 3 Is. 30 30, cp Jer. 10 13, plur. קֹלוֹת, Ex. 9 23, or קֹלֹת אלהים 9 28; in NT φωνὴ βροντῆς, Rev. 6 1 14 2 19 6 (βροντῶν), φωναὶ καὶ βρονταί Rev. 4 5 8 5 11 19, etc.

This most sublime of natural phenomena is represented by a poetical echo of primitive myth as the voice of God, Ps. 104 7 Job 37 4 *f.*, 40 9 Ps. 18 13 [14], and especially Ps. 29. In Ps. 2 4*a* (cp *v.* 5*a*) as his laugh (see Del. and Che. *Ps.*(2)). When, however, in Ezek. 10 5 the sound of the wings of the cherubim is likened tautologically to 'the voice of El Shaddai (EV God Almighty) when he speaketh,' we naturally ask whether this is not some error in the text, and the result is interesting, for it opens up a vista of possible rectifications of early mistakes (see Shaddai). And if we lose the traditional reference in Ezek. 10 5 (and 1 24), we have still enough to show that thunder to the ancient Israelites had a special sanctity as the expression of the divine omnipotence (Ps. 29 3), and of the terrible divine vengeance (1 S. 2 10 Ps. 18 13 [14] Is. 30 30). Thunder in summer-time was peculiarly awful (1 S. 12 17), though perhaps the case mentioned is but a poetical way of stating that with God nothing is impossible; Tristram (*NHP* 33) says, 'it is unknown in summer.' The wise men of later times, such as the poet of Job, were well aware that thunderstorms did not occur capriciously, but were subject to laws appointed by the Creator (Job 28 26 38 25, cp Ecclus. 43 17).

'Right-aiming thunderbolts' (Wisd. 5 21) has been changed in RV into 'shafts of lightning (βολίδες ἀστραπῶν) with true aim.' In Ps. 78 48 'hot thunderbolts' remains, though רְשָׁפִים more probably means here 'burning sicknesses' in accordance with the requirements of parallelism. Another peculiar phrase, 'in the secret place of thunder' (בְּסֵתֶר רַעַם, ἐν ἀποκρύφῳ καταιγίδος), still remains in the RV of Ps. 81 7 [8]. Duhm explains, 'in the cloud which hides the thunder and at the same time veils God from sight (Job 22 13 *f.*).' This is no doubt a worthy explanation; but the Hebrew phrase does not appear to suit the parallelism. On the so-called Bath-ḳol, see Voice, and on the title given to James and John, and rendered 'sons of thunder,' see Boanerges.

THYATIRA (θυατειρα [Ti. WH],[1] Rev. 1 11; ἐν Θυατείροις [Ti. WH], Rev. 2 18 and 2 24; πόλεως Θυατείρων, Acts 16 14).

1. Position and history. Thyatira was a town in northern Lydia, so close to the indefinite borderland between Mysia and Lydia that some preferred to reckon it to Mysia (Strabo, 625, ἣν Μυσῶν ἐσχάτην τινὲς φασίν). It lay east of the Lycus, a tributary of the Phrygius, which river itself falls into the Hermus from the north. Thyatira thus was placed almost exactly midway between the Caicus (N.) and the Hermus (S.), on the great road which crossed this region going to the SE., into the valley of the Mæander. Its geographical position is the key to its historical importance. The watershed in which it lay was, in fact, of the utmost importance strategically, as it was the line of demarcation between the territory of competing sovereigns. For in 301 B.C. Lysimachus, king of Thrace, and Seleucus I. (Nicator), king of Syria, had partitioned Asia Minor, which they had taken from Antigonus, in such wise that Lysimachus had the western portion, as far as central Phrygia, whilst the remainder fell to Seleucus (see Seleucidæ, § 2). When, subsequently (from 283 B.C.), hostilities broke out between the two monarchs, the district in question would be of great military importance; and, still later, when in 277 B.C. the Gauls (Galatia) invaded Asia Minor and founded their robber state in north-eastern Phrygia (cp Galatia,

[1] Neut. plur., τὰ Θυάτειρα; but the *v.l.* in Rev. 1 11, εἰς Θυάτειραν, is 'well attested' (WH 2 App. 163). Cp the case of Lystra (*q.v.*). The form *Thyateira* gradually gives place to *Thyatira*. The place is now called *Ak-hissar*, 'a large town of mud houses' (Murray, *Hdbk. to AM* 84).

§ 1), its importance was enhanced. Consequently, we find established here a group of so-called 'Macedonian colonics'; and Strabo describes Thyatira as such a colony (625, κατοικία Μακεδόνων).[1]

The word Macedonian in this connection undoubtedly implies, firstly, Macedonian blood and descent, and secondly the nucleus of the standing armies kept on foot by the Seleucidæ, Ptolemies, and other kings. This nucleus of trusted troops was in reality the remnant of the soldiers of Alexander the Great, or their children, their numbers being continually recruited by drafts of volunteers from Macedonia itself.[2]

In course of time many men who were not of Macedonian blood would doubtless find their way into these select corps of guards. It is in this sense that the term 'Macedonians' is used in 2 Macc. 8 20 (see MACEDONIA, § 1; THRACE). It is abundantly clear from the extant inscriptions from the region in which Thyatira stood that the bulk of the colonists were 'Macedonians' both in the sense of being men of the standing army and also as being of Macedonian blood.[3]

The date of the foundation of Thyatira as a military colony is uncertain; probably it was subsequent to 277 B.C. The name is a compound; *-teira* = 'village' or 'town,' and the whole name signifies 'the town of Thya' (for Thya, cp the town-names Thyessus, Thyassus [see Ramsay, *Hist. Geog.* 114, 148, 437]). We are told that previously the place was called Pelopeia, or Semiramis, or Euhippa (Plin. *HN* 5 31)—names which scarcely sound historical. According to a piece of false etymologising based upon mere similarity of sound, it was said that the name Thyatira was derived from Thygatira (Θυγάτειρα), because Seleucus heard here of the birth of his daughter (θυγάτηρ). (See Steph. *Thes. s.v.*; and cp Rams. *op. cit.* 127, note.)

The town became of importance owing to its favourable position in two respects.

2. Importance: military.

(*a*) It was here, for example, that Antiochus the Great assembled his troops for the campaign which ended so disastrously for him at Magnesia (see SELEUCIDÆ, § 7) a few miles to the S. In consequence it submitted to the Romans as a matter of course, and was included within the territory made over by them to their ally the king of Pergamus. Then followed a long period during which Thyatira does not appear in history; not until the time of the empire, in fact, does it seem to have realised to the full the natural advantages of its position as above described. Naturally it was only in a peaceful direction that such could, under the empire, make themselves felt, as it was not until the later Byzantine period that strategic advantages came again in question. A glance at the network of Roman roads in western Asia Minor is sufficient to reveal the importance of Thyatira at this time. Starting from Pergamus, an important road ran through Germe and Nakrasa 48 R. m. to Thyatira, thence 36 R. m. to Sardis, and so through Philadelphia and Hierapolis to Laodicea on the Lycus (Rams. *Hist. Geog.* 167). When we take into account the fact that an important road runs northwards along the coast from Ephesus through Smyrna to Pergamus, we see that the order of names of the seven churches is capable of easy and rational explanation, quite apart from any question of political or ecclesiastical precedence. The order is in fact simply that of the occurrence of the towns as one follows the main road from Ephesus in a great loop through Pergamus, and so down to Laodicea (Rev. 1 11).

3. Commercial.

(*b*) Thyatira owed its importance to its connection with the wool trade, or rather the manufacture of woollen goods, and more especially to that of dyed fabrics. This was always a staple industry in Lydia.[4] The 'certain woman named Lydia' (so EV in Acts 16 14; perhaps 'called the Lydian' would be more correct) was a 'seller of purple,' 'of the city of Thyatira'—that is to say, probably an agent of some great house of dyers and manufacturers in Thyatira (Rams. *St. Paul*, 214).

The dyers and other handicraftsmen in Thyatira were united in guilds (called ἔργα in inscr. from Thyatira, ἐργασίαι elsewhere, as, *e.g.*, at Hierapolis), as was the case at other Asiatic towns (*e.g.*, Smyrna, Ephesus, and Philadelphia). The Thyatiran guild of 'dyers' (βαφεῖς) is known to us from inscriptions, as well as the guilds of 'cloakmakers' (ἱματευόμενοι), 'potters' (κεραμεῖς), 'brass-workers' (χαλκεῖς), and numerous others (see Clerc, *De rebus Thyat.* 92, quoted by Rams. *Cities and Bish. of Phrygia*, 1 105 n. 2. Cp *Bull. Corr. Hell.* 10 407, and 1900, p. 592 *f.*).

4. Rev. 2 18 *f.*

In the epistle to the Thyatiran church (Rev. 2 18 *f.*) there does not seem to be any reference to this prominent side of the life of the town, such as lies on the surface of the epistle to the Laodiceans (Rev. 3 14 *f.*). Nevertheless, in Rev. 2 20 the reference to 'that woman Jezebel'[1] points to something distinctive and characteristic of the place. From the context it is clear that under this figure is concealed some form of teaching or practice, or some intellectual movement, which presented itself as a rival or perversion of Christian teaching.

The following interpretation has been suggested. Outside the city there stood the Σαμβαθεῖον or sanctuary of Sambatha (Σαμβήθη), a Chaldean or Persian Sybil or prophetess.[2] Apparently this was some form of eastern superstition, of great popularity, if the reference in Rev. 2 20 is to this shrine. 'Jezebel,' if (Schürer and others) a definite person, must be the Sibyl of some shrine connected with an eclectic (pagan-Hebrew-Christian) system. It appears more probable, however, that we should interpret the denunciation more broadly, with reference to the prevailing tone of Thyatiran Christianity rather than to a superstition idolatrous in origin and general content, which could hardly have infected the majority of the church. In other words, the expression in the message obtains full significance only if we understand the church of Thyatira to have developed some heretical or impure form of belief or practice, such as might naturally be typified by a notorious figure drawn from OT history (cp 2 K. 9 22). We here touch upon the relation of the Jewish settlers and colonists in Phrygia and neighbouring districts to the mixed population amid which they dwelt. The evidence of the Talmud is clear, that these immigrant Jews were divided from their brethren and failed to maintain their peculiar religious position (see Neub. *Géogr. du Talm.* 315; and Rams. *Cities and Bish. of Phrygia*, 2 674 *f.*). The population of Asia Minor was undoubtedly attracted to the religious system of the Jews; but the other aspect of this fact was that the Jews became merged with them (see Rams. *St. Paul the Traveller*, 142 *f.*; *Comm. on Gal.* 189 *f.*, where the position of the Jews in S. Galatia is treated at length). Such syncretism must have had its dangers for the Christian churches, based as they were in general upon proselytes and containing a more or less large admixture of Jewish elements. It is to some form of gross degeneration of Jewish practice and belief that reference is made in the epistle to the Thyatiran church (see art. by Schürer, 'Prophetin Isabel in Thyatira' in *Abhand. Weizäcker gewidmet*, 39 *f.*). In Cyprus (Acts 13 6) and Ephesus (Acts 19 13) also we find that certain Jews had abandoned themselves to the practice of magical arts forbidden by the Mosaic law.

For a parallel to the church factions produced by a question about pagan institutions, cp the case of Corinth (1 Cor. 10 15 *f.*; cp Ramsay, *Expos.* 1900 *f.*; Zahn, *Einl.* 2 608 *f.* [also NICOLAITANS, col. 3411]).

W. J. W.

THYINE WOOD (ξύλον θύϊνον [Ti.WH], Rev. 18 12†) is mentioned among the precious wares sold in the market of the apocalyptic Babylon. The wood intended is no doubt that of the tree called θυία or θύα by the Greeks, and *citrus* by the Latins (cp Hehn, *Kulturpflanzen*, 386). The former name would seem to refer to the fragrance of the wood; and *citrus* is probably a corruption of κέδρος and so points to a tree of aromatic, antiseptic wood.

[1] This is confirmed by inscriptions; see *Bull. de Corr. hell.*, 1886, p. 398; 1887, p. 456; *CIG* 3496.

[2] Cp Diod. Sic. 18 12, ἐσπάνιζε καὶ ἡ Μακεδονία στρατιωτῶν πολιτικῶν διὰ τὸ πλῆθος τῶν ἀπεσταλμένων εἰς τὴν Ἀσίαν ἐπὶ διαδοχὴν τῆς στρατιᾶς—speaking of the time of Antigonus Gonatas.

The *θυία* (or *citrus*) *par excellence* was a N. African tree (Theophr. 5 3, § 7, Plin. 13 15, § 29), probably to be identified with *Thuia articulata*, Vahl., which, according to Sprenger (*Erläuterungen zum Theophrast.* 205), is a tree resembling the cypress and growing to a height of 24 ft. In accordance with Pliny's statement (*l.c.*), it is found in the region of Mt. Atlas. In the days of Roman luxury the citrus was much used in the making of costly furniture; the phrase '*all* thyine wood' (Rev., *l.c.*) probably alludes to the great variety of objects constructed from it.

TIBERIAS (τιβεριας), on a narrow strip of plain under a hill, on the western shore of the Sea of Galilee, was founded by Herod Antipas, apparently not before 26 A.D., and so was quite a new place at the time of the public life of Jesus in Galilee. Its founder named it in honour of his friend and patron the emperor Tiberius. Though it became the capital of Galilee, it was at first a purely Greek city, which accounts for its not appearing among the scenes of the Galilean ministry. It joined in the war of liberty, but yielded without resistance to Vespasian, and was restored by him to its master Agrippa, on whose death in 100 it fell directly under Roman rule. The place came to be a great seat of Jews and Jewish learning; it was the residence of R. Judah, the editor of the Mishnah; and, though the schools of Palestine were ultimately overshadowed by those of Babylonia, the school of Tiberias was still famous in the time of Jerome. On Jn. 6 1 23 21 1 see GALILEE, SEA OF, §§ 1, 4 *f.*

Half an hour to the S. of the modern *Ṭabarīyeh* (a town of some 4000 inhabitants) are the famous hot baths (now *el-Ḥammeh*) which are mentioned by Pliny (*HN* 5 15 [71]; Tiberiade aquis calidis salubri) and by Josephus (*τοῖς ἐν Τιβεριάδι θερμοῖς ὕδασιν*, *BJ* ii. 21 6). In *Ant.* xviii. 2 3, *BJ* iv. 1 3 he alludes to the *θερμά* as not far from Tiberias and as being called Ἀμμαθους, 'which being interpreted is *θερμά*.' It seems to be the Hammath of Josh. 19 35. See HAMMATH. This Hammath is mentioned in Egyptian records (see PALESTINE, § 15, no. 16). The Talmud of Babylon identifies Tiberias sometimes with the biblical Hamath, sometimes with Raccath (see also Talm. Jerus.), sometimes with Chinnereth. See Neubauer, *Géogr.* 208; Schürer, *GJV*(2) 2 126 *ff.*; ET ii. 1 143 *ff.*

TIBERIAS, SEA OF (η θαλασσα της τιβεριαδος [Ti. WH]), Jn. 21 1. See GALILEE, SEA OF.

TIBERIUS (τιβεριος [Ti. WH]) is mentioned only in Lk. 3 1, where the commencement of the ministry of John the Baptist is assigned to the fifteenth year 'of the reign of Tiberius Cæsar' (*τῆς ἡγεμονίας Τιβερίου Καίσαρος*).

Tiberius Claudius Nero succeeded Augustus as Emperor of Rome in 14 A.D., and reigned until 37 A.D. He was son of Tiberius Claudius Nero and Livia, so that he was only the stepson of Augustus. The two chief authorities for his life are Suetonius, who revels in court scandal, and Tacitus, whose political views marred his historical accuracy. Hence little justice has been done to Tiberius. The *Annals* of Tacitus have been in fact maintained to be 'almost wholly satire' (Merivale, *Hist. of the Romans under the Empire*, ch. 64), and it cannot be denied that the satiric tendency, 'to take extreme acts as typical of the man, and extreme men as typical of the age,' is a conspicuous feature of the book. Consequently, his portraiture of Tiberius, the most elaborate analysis of character in his writings, is most often attacked as untrustworthy. We have in fact, in accepting the picture in Tacitus as historical, this problem before us—to explain how Tiberius, who up to the age of fifty-five (when he became emperor) had shown himself a commander with more than ordinary talent, an orator of no mean calibre, and an administrator of acknowledged sagacity, degenerated from the moment of assuming the purple until he became that monster of cruelty and vice and impotence which perhaps for all time he is in the imagination of mankind. This is not the place in which to attempt to review either the private life or the public acts of Tiberius. Thus much is certain, that his life cannot be disposed of in a 'cascade of epigrams' (Beesly, *Catiline, Clodius, and Tiberius*, 115), such as compose the summary in which Tacitus gives his most deliberate judgment on Tiberius (*Ann.* 6 51).

Furneaux, *Annals of Tacitus*, vol. 1, Introd. chaps. 4 and 8 gives a careful review of the evidence, with an unfavourable verdict. Beesly's *Catiline, Clodius, and Tiberius* is a vigorous defence. Champagny, *Les Césars*, an unmeasured invective. See also Boissier, *L'Opposition sous les Césars*. For the chronological questions in connection with the NT, see Ramsay, *Was Christ born at Bethlehem?* and the articles CHRONOLOGY, LYSANIAS, QUIRINIUS, etc. W. J. W.

TIBHATH (טִבְחַת; μεταβηχας [Bℵ], ματεβεθ [A], ταβααθ [L]; Pesh. *ṭebaḥ*), a city of Hadadezer, 1 Ch. 18 8. See TEBAH.

TIBNI (תִּבְנִי, § 79; see below on meaning; cp Ass. *Tabni*, *Tabnê'a*, Phœn. תבנת, *Tabnith*; θαμν[ε]ι [BA], θαβεννει [L]; *Thebni*), b. GINATH, a competitor with Omri for the throne of Israel after the death of Zimri (1 K. 16 21 *f.*†). See ISRAEL, § 29, OMRI, § 1.

Like so many other successful adventurers, including his rival Omri (=Imri=Jeraḥmeeli), Tibni seems to have been of Jeraḥmeelite origin. His name is a gentilic in form, and probably should be read נבטי (Nebaṭite) or נביתי (Nebaiothite). Cp 1 Ch. 5 15, where (in the original form of the text; see SHAPHAM) Guni is a clan-name in the southern Gilead (temp. Jeroboam ii.). T. K. C.

TIDAL (תִּדְעָל; θαργαλ [EL], θαλγ. [D? and A in 5 9], θαλγα [A]; Pesh. *tār'īl*), 'king of Goiim,' an ally of Chedorlaomer (Gen. 14 1 9). Nothing has yet been made out either as to a king called Tid'al (or Tar'al) or as to the 'Goiim' or 'nations' over which, according to MT and 𝔊, he ruled. The identification of Tid'al with a supposed ancient name in a very late cuneiform tablet is in the highest degree precarious (see King, *Letters of Ḥammurābi*, 1 p. liii; and cp Haupt, note on Gen. 14 1 in Ball's *Genesis*, Heb. text, *SBOT*). Sir H. Rawlinson thought that 'Goiim' was a corruption of Gutium, the situation of which district (see KOA) accords well with the mention of 'Goiim' after Elam. It is certain (see inscription quoted by Rogers, *Outlines of Bab. Hist.* 10) that Gutium was early subject to Babylonian influence. If 'Goiim' comes from 'Gutium,' Tar'al (if we may follow 𝔊EL) may conceivably be a Babylonian name. The only word which approaches it, however, seems to be *targul*, 'rudder' (Deluge-story, 97), which is sometimes a title of the god 'Ninib' (see Jensen, *Kosmol.* 422). But 'seductive' as Rawlinson's theory is, it is too hazardous (see Hal. *Rev. sém.* 1894, p. 279) to make *g* correspond to *y* in לָעֹמֶר (*lagamari*) and to ג in גוים (=gutium?).

So far we have assumed that MT and 𝔊 correctly represent the original text. But in the general failure of critical theories based on this assumption, it becomes reasonable to suppose that Tidal and the other names in Gen. 14 1 are deeply corrupt, that תדעל (EV Tidal) is a corrupt fragment of ירחמאל (Jeraḥmeel) and that גוים (Goiim) as often has the same origin. See SODOM, 1. T. K. C.

TIGLATH-PILESER (תִּגְלַת פִּלְאֶסֶר, 2 K. 15 29 16 10, תִּגְלַת פִּלֶסֶר, 2 K. 16 7) or **Tilgath-pilneser** (תִּלְּגַת פִּלְנְאֶסֶר, 1 Ch. 5 6 2 Ch. 28 20, תִּלְּגַת פִּלְנֶסֶר, 1 Ch. 5 26).

𝔊's readings are: in 2 K. 15 29, *αλγαθφελλασαρ* [BA]; 16 7, *θαλγαθφ.* [B], om. A; 16 10, *θαλγαλφ.* [B]; *αγλαθφαλλασαρ* [A]; *θεγλαφαλασαρ* [L] throughout; in 1 Ch. 5 6, *θαλγαβανασαρ* [B]; *θαγλαθ' φαλνασαρ* [A]; 5 26, *θαγναφαμασαρ* [B]; *θαγλαθ'. φαλνασαρ* [A]; 2 Ch. 28 20, *θαλγαφελλαδαρ* [B]; *θαγλαθ'. φαλνα | σαρ'.* [A]; *θεγλαθφαλασαρ* [L] throughout.

In the Zenjīrli-Inscriptions תגלתפלסר and תגלתפליסר, Assyr. *Tukulti-âpil-êsarra*, 'My help is the son of Êšarra.' Êšarra, 'the house of the multitude,' was the name of the temple of Ninip, who was therefore called 'the son of Êšarra.'

1. His name.

The strange form in Chronicles is, according to Kittel (*Chron.* Heb. *SBOT* 68), 'merely an accidental corruption of a familiar name at the hands of the Chronicler or of his Midrashic source.'

The biblical Tiglath-pileser was the third of the Assyrian kings of that name, and came to the throne in 745 B.C. Nothing is known of his origin and parentage, but as he is called in the Babylonian Canon Pulu (PUL, 2 K. 15 19, etc.), it is thought that he was not of royal race, but was probably a general under Ašur-nirari, his predecessor, and that he called himself Tiglath-pileser on coming to the throne on account of the renown attaching to this royal name.

2. Possible origin.

The chief sources of the history of his reign are the inscribed slabs found in the remains of his palace at Calah, and two tablets which appear to have been copied from records on stone similar, in some respects, to the slabs. With regard to the latter, several of them are only known from squeezes now in the British Museum, where also the clay tablets referring to his reign are preserved. The chronology of his reign has been placed beyond a doubt by the Eponym Canon with historical references (*KB* 1 212-213), from which it appears that he mounted the throne on the 13th of the month Iyyar (April-May) of the year 745 B.C., as successor to Ašur-nirari (II.), in the last year of whose reign there was a rising in Calah; not improbably Tiglath-pileser seized this opportunity to assume the supreme power. Whether the fact that the Eponym for the next year was the governor of Calah supports this supposition or not, is a matter of opinion.

3. Sources of history, and accession.

The first campaign of this king, which took place in the year of his accession, is stated to have been 'into the midst of the rivers'—*i.e.*, 'to Babylonia.' His object was, not so much to conquer the country as to break the excessive and dangerous power of the Aramæan tribes. In this he was fully successful, and the Babylonians themselves, who suffered from the tribes in question, thankfully acknowledged his suzerainty. Owing to this success, he seems to have assumed, from the first, the title of 'king of Šumer and Akkad.'

4. History of his reign. The Aramæan tribes.

The next year (744 B.C.) Tiglath-pileser turned his attention to the mountainous district on the E. of Assyria, inhabited by wild tribes who had always been troublesome to the Assyrian kings. This district, which was called Namri (cp ZIMRI ii.), he wasted with fire and sword, annexing a portion of it to Assyria.

5. Namri.

In 743 B.C. affairs in the W. claimed his attention. The state of which ARPAD (*q.v.*) was the capital, supported, to all appearance, by the king of Urarṭu (ARARAT), seems to have thrown off the Assyrian yoke; it had to be reduced again to submission. This probably gave an opportunity to Sar-durri, king of Urarṭu, to march towards Assyria. It was therefore necessary to put off the subjection of Arpad, and proceed against the northern foe, who was completely defeated. In 742 operations against Arpad were resumed, and in 741 (to judge from the Eponym-list) the city was taken, though the Assyrian army remained in the same district in 740 B.C. One result was the annexation of Unḳi (identified by Tomkins[1] with 'Amḳ), a district which had already felt the Assyrian might.

6. Arpad, Kullani, etc.

In 739 B.C. Tiglath-pileser carried on war in Ulluba, on the N., taking several cities and founding another, which he called Ašur-ikiša ('Ašur has presented'). It was apparently during this period that the Assyrian subject-states in Syria and northern Phœnicia rebelled. The operations into which the Assyrians were thus led resulted in the capture of Kullanî—*i.e.* (according to P. Rost), the CALNO (*q.v.*) of Is. 10 9[2] (738 B.C.).

1 'Geography of Northern Syria' in *BOR* 36. For the extent of Unḳi see Rost, *Tiglath-pileser*, 1 p. xxi, n. 1.

2 With regard to the identification there given, it may be noted that Kullani would seem from *WAI* ii. 53 6*a* to be one of the towns along the Taurus, implying an extension of operations in that direction.

The question now arises whether Azriau or Izriau (Rost)—*i.e.*, Azariah of Judah—came into touch with Tiglath-pileser on this occasion. It must be confessed that the frequent mention of his name in the exceedingly mutilated portion of the annals which seem to refer to this period gives Tiele justification for replying in the affirmative (*BAG* 230 *f.*; on the whole question, however, see UZZIAH). All the princes of middle and northern Syria now submitted and paid tribute, including Raṣunnu (see REZIN) of Damascus, Menihimme (Menahem) of Samaria, Ḥirummu (Hiram) of Tyre, and others, including Zabibi queen of Arabia (see OREB and ZEEB). There is no statement, so far as the texts are preserved, that the Assyrian king penetrated as far S. as Samaria, but the fact that he received tribute from that country (cp 2 K. 15 19 *ff.*) is a sufficient indication that he at least threatened it, and had to be bought off (see MENAHEM). The policy of deportation was on this occasion resorted to extensively.

7. Azariah.

The following year (737 B.C.) the state of affairs on the E. called the Assyrian king to Media (*mât Madâa*) and the district, where he set up images of himself, and peace again reigned—at least, as far as the Assyrians were concerned. This left Tiglath-pileser free to march, in 736 B.C., to the foot of the Nal mountains, on the N. of Assyria, where he took a large number of cities, thus preparing the way for the conquest of the land of Urarṭu, which, in the following year (735), he proceeded to carry out. He penetrated as far as Sar-durri's capital, Ṭurušpâ, and though, on account of its naturally advantageous position on the lake Van, he was unable to take the city, he nevertheless broke the power of the kingdom of Urarṭu for many years to come.

8. Media and Urarṭu.

For the year 734 B.C. the Eponym-list has this entry: 'to the land Pilišta'—*i.e.*, 'to Philistia.' Schrader in 1878 (*KGF* 126), in consequence of *WAI* 1 35, n. 1, 11 *ff.*, considered this to involve a campaign against Judah, Samaria, Phœnicia, etc. Rost, however, thinks differently, contending that the mere reception of tribute from the countries mentioned in *WAI*, *loc. cit.*, would sufficiently account for the references to the southern districts. As, however, the inscriptions of Tiglath-pileser, where they speak of relations with Judah, have no date (the text being defective at the important points), he follows the indications of the Eponym-list, which makes Philistia (*i.e.*, the small states on the shores of the Mediterranean) the chief object of the campaign. In proceeding thither, Tiglath-pileser, like the Assyrian kings in general, would take the coast-road from N. to S. The name of the city which was first threatened is broken away, but Rost conjectures it to have been Ashdod or Ekron. Its prince bought his reinstatement only by means of heavy tribute. It was Ḥanûnu of Gaza, however, who was to all appearance more especially aimed at by Tiglath-pileser, and, feeling this, he lost no time in seeking refuge in Egypt.[1] Gaza then fell an easy prey to the Assyrians; its treasure and its gods were carried away, the worship of Ašur was introduced, and the royal throne and image set up in the palace of Ḥanûnu.

9. Philistia.

The entry for 733 and 732 B.C. is 'to the land of Dimašḳa'—*i.e.*, Aram-Damascus. No doubt it was part of the king's plan to subjugate the states of the W., but he was also induced to make this campaign by the appeal of Ahaz of Judah for help against REZIN and PEKAH. The appeal was supported by the sending of gifts in acknowledgment of vassalage. It would seem that the allied kings despaired of resisting the advance of the Assyrians, and retreated to their own territories. They thus played into the

10. Ahaz.

1 For another view see Wi. *Muṣri*, 50 34 *f.*, and cp ISAIAH, BOOK OF, § 12, n. 1; MIZRAIM, § 2*b*.

hands of Tiglath-pileser, who may perhaps refer to this in his annals (11 227 *f.*) as follows:—

'In my former expeditions, I had counted (as spoil) all the cities (of Pekah) and had carried off his . . . and he forsook Samaria alone . . . their king . . .'

Rost completes the last phrase '(they overthrew Pekah), their king,' which is not impossible, and is supported by his revised text of *WAI* 3 10, no. 2, 50 28.

11. Rezin. Previously to this, however, as it would seem, the king paid a visit to the Phœnician states to assure himself of their fidelity, and on this occasion he may have annexed wide tracts of Israel, including 'all the land of Naphtali' (2 K. 15 29). No reference to this, however, occurs in his inscriptions (though, perhaps, as Hommel suggests, the *-li* of 17 of *WAI* 3, pl. 10, no. 2 may be the end of that word, for the preceding line refers to Bit-Ḫumria or Israel). Rezin of Damascus boldly resisted the invader, but on this occasion fortune deserted the Aramæans; Rezin took to flight, and fortified himself in Damascus. A siege of the city followed, during which the surrounding country was completely devastated. A successful expedition was also made against Samsi, queen of N. Arabia, which led to the submission of other tribes of that region, as far as Sa'ba (Yemen). Damascus itself fell at the end of 732 B.C.; it is not again mentioned as an independent state. The fate of Rezin is related in 2 K. 16 9. See DAMASCUS, §§ 10 *f.*; REZIN.

12. Israel and the neighbouring states. The relations of Hoshea, who seized the crown of Israel, to Tiglath-pileser are treated elsewhere (see HOSHEA). A third rebel against Assyria now claims our attention, namely Mitinti of Ashkelon, who had been joined by Metenna of Tyre. According to Rost, the Assyrian statement is[1] that Mitinti went mad on realising that he might soon have to share the fate of Rezin. His son Rûkipti now mounted the throne on account, as it would seem, of his father's mental state, and hastened to reconcile himself with the Assyrian conqueror by means of tribute and gifts. Tiglath-pileser now sent his rab-sakê (see RAB-SHAKEH) against Metenna of Tyre, who, finding no other course feasible, decided to submit and pay tribute. The rab-sakê was also successful in bringing about the submission of Uassurmi, chief of Tabal, who, however, was deposed, and a man named Ḫullî set in his place.

13. Operations in Babylon. To all appearance, affairs in the W. had reached a satisfactory settlement for the Assyrians. Leaving that district in 732 B.C., Tiglath-pileser found trouble awaiting him in the following year in Babylon, owing to the restlessness of the Chaldæans and Aramæans. Nabonassar had been succeeded by his son Nabû-nadin-zêri, who was killed after a reign of two years. His murderer, Nabû-šum-ukîn, made himself king, but was deposed after rather more than two months' rule by the Chaldæan prince Ukîn-zêr (Chinziros) of Bît-Amukkâni. At this period, the Babylonians proper had but little love for the dominion of the rough Chaldæans, and probably encouraged an Assyrian intervention in order to get release from a thoroughly distasteful rule. Tiglath-pileser therefore entered Babylonia, and besieged Ukîn-zêr in his capital Sapia, but without result. He wasted the territory of the other tribes, however, and carried Zakiru, prince of Bît-sa'alli, into captivity. According to the Eponym Canon, the Assyrian king did not engage in any campaign in 730, but remained at home 'in the land.' Apparently his army continued the siege of Sapia, which fell in the following year. The result was, that Ukîn-zêr lost his throne, and the other Chaldæan chiefs submitted, including MERODACH-BALADAN (*q.v.*), prince of the land of Tâmtim ('the sea-coast'). Tiglath-pileser could now celebrate one of his greatest triumphs. He proceeded to Babylonia as the saviour of his people, and was universally acknowledged as king; in the Babylonian Chronicle, and on at least one contract-tablet, he is called Tukulti-âpil-êšarra. (This has a bearing on the question whether PUL [*q.v.*] was his official name at Babylon, or not.)

[1] The preceding passage is very defective.

14. Last years and death. The next year (728 B.C.) found the king again in Babylonia, performing the ceremony of 'taking the hand of Bel,' which would thus seem to have been a yearly duty for one who claimed to be ruler of the land. The Eponym Canon mentions the name of a city, which may be Dir; it may be surmised that a rebellion had taken place there. It is probably to this city that the entry in the same document with regard to the expedition of 727 B.C. refers; after which it is stated that Shalmaneser set himself on the throne. The death of Tiglath-pileser, as we learn from the Babylonian Chronicle, took place in the month Tebet, thus closing a reign, than which none was more glorious for Assyria or more fateful for Israel.

15. Buildings. Turning now to other signs of progress, we note that the material prosperity of Assyria was well maintained, and one can see from the extant sculptures of the period that Assyrian art, too, had not declined. When at home, the king seems to have generally resided in Calah, but also in Nineveh. Being more of a warrior than a builder, he apparently contented himself with rebuilding and changing the great central palace at CALAH, which had been founded by his predecessor Shalmaneser II., copying the Hittite style, and adorning it with the objects sent as tribute by Hittite and Chaldæan princes.[1] Unfortunately, this building was for the most part demolished by Esarhaddon, so that the sculptures and inscriptions were partly destroyed, partly mutilated. This, added to the ravages of time, has deprived us of much valuable material, rendering the records of Tiglath-pileser very fragmentary. Happily the order of his campaigns is well preserved by the Eponym Canon with historical references, though the meagreness of the entries leaves one or two points still uncertain.

[As in the case of the articles SARGON and SENNACHERIB, it is necessary to warn the reader that the basis of the ordinary representation of the history of Israel needs to be tested afresh by textual criticism, and that one result of this is that the influence of the N. Arabian neighbours of Palestine is seen to have been at least as strongly felt as that of Assyria. In PROPHET, § 35, it is shown that the captivity foretold by Amos was most probably a N. Arabian one, and the region which was to bear the brunt of the invasion was that part of the Negeb which was in Israelitish occupation. Similarly in 2 K. 15 29 it is not the Assyrian king commonly called Tiglath-pileser, but Jeraḥmeel king of Ashḫur in N. Arabia who carries away captive the people of certain places and districts, which places and districts are not in N. Israel, but in the Israelitish Negeb. The critical proof of this is both interesting and suggestive. It entirely clears up the mystery of the three names, Pul, Tiglath-pileser, Tilgath-pilneser. See *Crit. Bib.*—T.K.C.]

TIMNA (תִּמְנָע, תִּמְנַע, § 54; θαμνα [BADEL]) in Gen. 36 12 ranks as the concubine of Eliphaz b. Esau and mother of Amalek; but in 1 Ch. 1 36 Timna and Amalek are among the *sons* of Eliphaz (so 𝔊^L; but 𝔊^B, *καὶ τῆς θαμνα αμαληκ*; 𝔊^A *θαμνα δὲ ἡ παλλακὴ ελιφαζ ἔτεκεν αὐτῇ τὸν αμαληκ*). Timna appears, however, as the sister of Lotan b. Seir (see LOT) in Gen. 36 22 1 Ch. 1 39 (*αιλαθ καὶ ναμνα* [B], *ἀδελφὴ δὲ λωταν θαμνα* [A], *καὶ ἀ. λ. θ.* [L]); and as an Edomite phylarch or rather clan in Gen. 36 40 1 Ch. 1 51 (*θαιμαν* [B], *θαμανα* [A]; in Gen. EV, against rule, gives TIMNAH).

These inconsistencies are not surprising (see GENEALOGIES, § 1). Perhaps, however, Gunkel is right in supposing that Gen. 36 12*a* (Timna a concubine) is a later insertion in P. Cp AMALEK, § 4.

TIMNAH (תִּמְנָה; θαμνα [BAL]; also תִּמְנָתָה, Josh. 19 43 Judg. 14 1 2 5; *i.e.*, 'allotted portion').

1. A town in the hill-country of Judah, in the same group with Maon and Carmel (Josh. 15 57; *θαμναθα* [B]), and therefore not to be identified with *Tibneh* or *Tibnah*, 4 h. W. of Bethlehem. There must have been a Timnah SE. of Hebron. Most scholars have supposed this place to be intended in Gen. 38 12-14 (*θαιμνα* [A] in *v.* 12; *θαμναν* [L] in *v.* 14), but the emended reading of the first place-name in *v.* 14 (see TAPPUAH, 1) favours the view that the Timnah (see below, 2) of Josh. 15 10 Judg. 14 1 is meant. The gentilic of this Timnah, 'Timni,' seems to occur, miswritten as TEMENI (*q.v.*), or Tīmĕni, in 1 Ch. 4 6.

2. (AV **Timnath**, and once, Josh. 19 43, THIMNATHAH, where 𝔊 varies as in 15 57 [see above]. In Judg. *θαμναθα* [BAL]. The gentilic תִּמְנִי, *θαμνει* [B], *θαμναθαιου* [AL], **Timnite**, Judg. 15 6.) A place on the northern frontier of Judah (Josh. 15 10, where 𝔊 has *ἐπὶ λίβα* [BL], *ἐπὶ νότον* [A]), assigned to Dan in Josh. 19 43, but according to Judg. 14 inhabited by Philistines in the pre-regal period. The latter narrative describes most graphically an occasion on which Samson 'went down to Timnah' (Judg. 14 1) from Zorah. The Chronicler includes it among the cities taken from Ahaz by the Philistines (2 Ch. 28 18; om. 𝔊^B), and the contemporary evidence of Sennacherib in the 'Prism-inscription' (*KB* 2 92 *f.*) records that king's capture of Tamna after the battle of Altaku before he laid siege to Amkaruna or Ekron. Timnah is now represented by the village of *Tibneh*, on the S. side of the Wādy Ṣarār, 2 m. W. of 'Ain Shems (Beth-shemesh) and a little farther to the SW. of Ṣar'ah (Zorah). The site, however, has been robbed of three-fourths of its ruins by the builders of a neighbouring village (Guérin, *Jud.* 2 30 *f.*). But cp ZORAH.

3. A third Timnah (possibly the same as TIMNATH-HERES) may be recognised in the THAMNATHA of 1 Macc. 9 50 (on the readings, see PIRATHON), which was one of the Judæan cities fortified by Bacchides. It is doubtless the Thamna mentioned by Josephus (*BJ* iii. 3 5) and Pliny (*HN* v. 14 70) as giving name to one of the toparchies (the Thamnitica) of Judæa, and incorrectly described by Eusebius and Jerome (*OS* 260 3 156 6) as being in the district of Lydda on the road to Jerusalem. The topographical notices in Jos. *BJ* iv. 8 1 confirm the view that this Timnah or Thamna is the northern *Tibneh*, a village about 10 m. NW. of Bethel, with extensive ruins which have been described at length by Guérin (*Sam.* 2 89 *ff.*). Cp Clermont Ganneau, *PEFQ*, 1875, p. 169; Schürer, *GVI* 2 138.

TIMNATH-HERES (תִּמְנַת חֶרֶס, as if 'Portion of the Sun,' see NAMES, § 95; Judg. 2 9 *θαμναθαρες* [BL], *θαμναθαρ·εως* [A], also called in Josh. 19 50 24 30 **Timnath-serah** (תִּמְנַת סֶרַח; *θαμαρχαρης* [B], *θαμνασαραχ* [Ba. mg.], *θαμναθσαρα* [A], *θαμναθασαρ* [L] in 19 50; *θαμναθασαχαρα* [B], *θαμνασαχαρ* [A], *θαμναθσ.* [L], in 24 30).

A locality 'in Mt. Ephraim on the N. side of the Mt. GAASH' (*q.v.*). According to the book of Joshua it was assigned to Joshua at his own request; he fortified the city, dwelt there, and was buried there. The place has been identified with the modern *Tibneh* (see TIMNAH, 3), where, on the N. slope of the hill to the S., are some remarkable tombs described by Guérin (*Sam.* 2 89-104). This, however, assumes that there is only one Ephraim, whereas the probability is that there was a second Ephraim (= Jerahmeel) in the Negeb.

The alternative identification with Kefr Ḥārith (a small village NE. of Tibneh), proposed by Conder, has only the support of a late Jewish and Moslem mediæval tradition (see *ZDPV* 2 13 *ff.* 6 195 *ff.*, and cp Goldziher, *PEFQ*, 1879, pp. 193 *ff.*). It also implies the correctness of *-ḥeres*, whereas Josh. (*ll.c.*) gives *-seraḥ*, which is hardly to be treated as a *deliberate* metathesis (so Moore).

But possibly חרס (whence by error סרח) comes from שחר—*i.e.*, אַשְׁחוּר (this also accounts best for 'Mount Heres'). This will become still more probable if 'Nun' in 'Joshua son of Nun' should really be Naḥshon[1] (apparently a Rehobothite or Jeraḥmeelite name). Joshua surely represents a clan of the Negeb; see JOSHUA. It is also important that Eleazar son of Aaron (apparently a kinsman of Joshua), is said to have been buried in Gibeath-pinehas, 'which was given him [omit בנו] in Mt. Ephraim,' for *pi[nᵉ]has* is not improbably another corruption of Jeraḥme'el. See PHINEHAS. T. K. C.

TIMON (τιμων [Ti. WH]), one of the seven deacons (Acts 6 5). He has a Greek name and was perhaps a Hellenist. Traditions contained in Pseudo-Dorotheus and Pseudo-Hippolytus make him bishop of Bostra in Arabia, and according to the former he suffered martyrdom by burning at the hands of the heathen.

TIMOTHEUS (τιμοθεος [AℵV]). 1. An 'Ammonite' leader; whether an Ammonite with a Greek name, or a Greek who had been put by the Syrian general in command of the Ammonites is unknown. He was defeated on various occasions by Judas the Maccabee; first in the campaign which resulted in the capture of Jazer, and again in that which included the battles of Dathema and Raphon and the relief of Bosora, Bosor, Alema, Casphor, Maked and Carnaim (1 Macc. 5 6-13 24-44). He is also mentioned in 2 Macc. 8 30 32 9 3 10 24 32 37 12 2 10 18-21 24, where the scene is transferred to Western Palestine and a chronology implied which has suggested to many scholars that a different person must be intended. The most probable explanation of the discrepancies, however, is that suggested under MACCABEES (SECOND), §§ 2, 3; col. 2870 middle, col. 2871, viz., the inadequacy of the sources, and the uncritical character of the compiler, of that book.

2. See TIMOTHY.

TIMOTHY

Birthplace, etc. (§ 1). Journeys (§§ 3-5).
Circumcision (§ 2). An author? (§ 6).
Traditions (§ 7).

This Hellenistic name (see TIMOTHEUS) is in the NT (τιμοθεος [Ti. WH]) borne by one of Paul's younger companions who was connected with, and probably born at, LYSTRA (§ 3) in Lycaonia, where the apostle first came across him.

In Acts 16 1 *ἐκεῖ* is epexegetic of *καὶ εἰς Λύστραν*, and the text

1 For a parallel cp חל in חל אביב, which may represent חובל; see TEL-ABIB.

of 20 4 is too secure to justify any alteration which (GAIUS, 2) would connect Δερβαῖος with Τιμόθεος, identifying this Gaius with the Macedonian of the same common name (19 29) from whom in all likelihood the epithet Δερβαῖος is expressly intended to distinguish him. Cp Holtzmann, *Die Pastoralbriefe*, 65 *f.* (1880).

1. Birthplace and family.

The diminished strictness of local Judaism (PHRYGIA, § 3) is betrayed by two features in the Lystran household where Timothy was brought up; his Jewish mother had married a pagan, and their son was allowed to reach manhood uncircumcised. His father, it has been conjectured, died during the boy's early years; this is corroborated at any rate by the absence of all reference to him as well as by the strong influence assigned in reliable tradition to the lad's mother (EDUCATION, § 5) and (maternal?) grandmother, even though we hesitate to lay stress on the slight textual evidence for Eunīcē's widowhood (Acts 16 1, add χήρας 25: χ. for Ἰουδαίας, gig. fu.), or even on the tense of ὑπῆρχεν (fuerat, Acts 16 3; ὑπάρχει would have been used, had he been alive [Blass]) Whether her husband was among 'the men that worship God' (σεβόμενοι τὸν Θεόν) or not, Eunīcē (Acts 16 1, cp *v.* 15) seems to have become a Christian at Paul's first visit to Lystra (Acts 14 6 *f.* 20-22). Later notices, embodying a tradition which there is no reason to suspect, indicate that her mother Lois had assisted her to train[1] the lad in the knowledge and piety of the OT previous to their joint conversion (2 Tim. 1 5 3 14 *f.*, cp 1 Tim. 5 4); and it may be inferred that their influence subsequently brought Timothy over to the new faith some time before the return of Paul a couple of years or so later. Passages like 1 Cor. 4 17 (contrast *v.* 15), 2 Tim. 2 1, etc., refer to kinship of spirit, and Phil. 2 22 expressly identifies Timothy's 'genuine sonship' with his loyal service to Paul, not with spiritual parentage. At any rate his intimate connection with Paul dates from the latter's second tour with Silas, when he found the young Lystran not a neophyte but a full member (μαθητής) of the local church.

The allusion in 2 Tim. 3 10 *f.* (a genuine fragment) simply means (Lk. 1 3) acquaintance with the facts and experiences narrated—an acquaintance involving moral imitation (1 Tim. 4 6)—and does not imply that Timothy accompanied Paul on the journey described in Acts 13 14-14 20. In this flight, according to *Acta Petri et Pauli*, etc. (ed. Lips. 1891, pp. 235 *f.*), Paul is accompanied by Demas and Hermogenes ὁ χαλκεύς, ὑποκρίσεως γέμοντες, καὶ ἐξελιπάρουν τὸν Παῦλον ὡς ἀγαπῶντες αὐτόν.

2. Circumcision.

The language of Acts 16 1 (καὶ ἰδού, cp 1 10 8 27 10 17 12 7) is intended to denote a remarkable and happy episode in the tour (cp Hort, *Christian Ecclesia*, 178 *f.*). It seemed providential that another youth was found willing and fit to join Paul's company and enterprise, after the defection of John Mark and Barnabas. Characteristically (cp 6 3 10 22 22 12) an excellent reputation is singled out as one essential feature in his moral equipment; Acts 16 2 suggests also, though it does not necessarily imply, that he had already preached in the neighbourhood. However, as his father's nationality was notorious in the locality, Paul had him circumcised. He carried out this long-deferred rite upon the eve of proceeding farther on a tour among the Phrygian churches with their Jewish surroundings and partially Jewish atmosphere, his object being to prevent people taking needless offence either at Timothy's connection with Paul or at his entrance into Jewish circles.

Acts 16 3*b* is often taken as an editorial gloss (*e.g.*, Clemen, Jüngst, Hilgenfeld, and Wendt), and on different lines the last-named critic and McGiffert (*Apostolic Age*, 232-234) have attempted to explain the whole passage as the popular and later misstatement of an actual fact, in opposition to the dominant view (cp ACTS, §§ 4, 7) which—apart from minor variations—generally regards the story as an invention of the author, introduced in order to illustrate what he conceived was or should have been Paul's deferential and conciliatory attitude towards Jewish-Christian scruples. But the existence of a strong Timothy-tradition in the later church makes it hard to believe that a strange story like this could be spread not long after Timothy's death, if it did not correspond to fact. And psychological reasons can be adduced which render the tradition fairly acceptable (cp Renan, *S. Paul*, 125, 313; Hort, *Jud. Christ.* 85 *f.*). Paul, either before or after the conference at Jerusalem, was independent of petty scruples against or for circumcision, which he probably regarded as among the *adiaphora* (1 Cor. 7 18). Particularly in the case of a half-caste or semi-Jew like Timothy, where no principle was at stake, Paul could not have felt bound to abstain from circumcision, if it promoted effectiveness, any more than to insist upon it uniformly. His liberal views (cp Rom. 2 28 *f.* 14 13-21) left him free to act upon his own judgment and to decide any case upon its merits, free even to accommodate himself to scruples felt by Jews when such accommodation could not fairly (yet cp Gal. 5 11, and Rams. *Hist. Comm. Galat.*, § 8) be misunderstood. Timothy's circumcision was a matter of convenience, not of principle; and Paul would make that perfectly clear before permitting his friend to become legally a Jew to save the Jews.[1] Upon the whole, therefore, there is a distinct case to be made out on behalf of the historicity of this paragraph, as against the plausible but somewhat arbitrary view that it represents a make-weight to Gal. 2 3 *f.* The case of Titus was entirely different. And it is one thing for a writer to omit an awkward fact, another and a much more serious thing—requiring greater motives and historical justification than can be reasonably brought forward in this case—deliberately to invent a story which hundreds of contemporary Christians (cp Heb. 13 23) could have readily refuted. This forms an almost insuperable difficulty in the way of accepting the ordinary hypothesis of criticism upon Acts 16 1-3; and it seems therefore more natural to regard Paul's action as somewhat exceptional, though it depends on the view taken of the date of Galatians (cp 5 2) whether we suppose Paul deliberately made this exception afterwards (so Weber, *Abfassung des Galaterbriefes*, 77 *f.* [1900]), or advanced to a clearer and more consistent line of action.

In sketching at a later date some personal traits of Timothy, the author of the pastoral epistles, either drawing upon Acts or upon independent oral tradition, lays characteristic stress on the questions of good character and reputation as a requisite for the ministry (*e.g.*, 1 Tim. 3 7), preserves the names of Eunīcē and Lois (2 Tim. 1 5), suggests timidity and backwardness as qualities of Timothy (2 Tim. 1 7 *f.*), and refers to several circumstances attending Paul's selection of the younger man. There is no reason to doubt the substantial accuracy of such notices or of the tradition that this momentous event (1 Tim. 1 18 4 14) was due to some local Christians, possibly including Paul himself, who felt themselves inspired in the assembly to single out the youth as a fit companion for Paul. The statement agrees at any rate with phenomena such as those noted in Acts 13 3, etc., and merely implies that the local prophets and leaders felt themselves divinely guided in selecting Timothy, or in ratifying Paul's judgment on a matter which may have already occupied his mind. But ecclesiastical tendency of a later age is felt in the further description, throughout these passages and elsewhere (*e.g.*, 2 Tim. 1 6, cp TIMOTHY AND TITUS [EPISTLES], § 7), of a supernatural χάρισμα due to solemn ordination; although the fact of the laying-on-of-hands at such a time is in itself quite credible (cp Acts 13 3 14 23).

3. In Macedonia.

Accompanying Paul and Silas on their European tour (PAUL, § 20), Timothy apparently took a specially keen interest in the Macedonian churches which he helped to found at Philippi and Thessalonica, although it is remarkable that the narrative in Acts only mentions his name quite incidentally (Acts 17 14 18 5). With the former church (Phil. 2 20-22) his relations remained singularly close and warm, but it is impossible to see him (with Völter, *Th. T*, 1892, p. 124) in a second-century allusion (4 3) to σύνζυγε (cp SYNZYGUS). His subsequent movements between Berœa (BEREA, 3) and Corinth are not quite clear owing to the loose and general statements of Acts at this point. The probability is, however, that (1 Thess. 3 2 being parallel to 3 5) Timothy rejoined Paul soon at Athens, and was sent back (perhaps with a letter, cp Rendel Harris: *Expos.*, 5th ser., 8 161 *f.* 401 *f.*) to Thessalonica to confirm the local Christians and bring back news of their condition to their anxious apostle. Returning from this errand Timothy, now accompanied by Silas, found that in despair Paul had gone across from Athens to Corinth. Cp THESSALONIANS, § 1 *f.*

[1] As the nearest synagogue was at Iconium, the religious instruction of the child devolved on Eunīcē, who probably possessed a copy of some part of the OT scriptures as well as 'the little parchment rolls, specially for the use of children, containing,' *e.g.*, the Shĕma', the Hallēl, the history of Creation down to the Flood, and Lev. 1-8 (Edersheim, *Sketches of Jewish Social Life*, 114-117).

[1] Zahn (*Einl.* 1 479 *f.*) subtly traces an allusion to this characteristic of Timothy in the ἡμεῖς of Phil. 3 3, which he insists on taking (as in *v.* 17) as a reference to Paul's coadjutor (Phil. 1 1). See further K. Schmidt's *Ap.-gesch.* 358 *f.* (1882).

TIMOTHY

The 'awkward and badly constructed' (Ramsay, *St. Paul*, 233) narrative of Acts 17 10*f.* shows that the author, or the source which he followed here, was ignorant of this Macedonian mission; he offers no explanation of the extraordinary delay which—on his own statement—transpired between 17 13*f.* and 18 5, imagining that Silas and Timothy had simply remained in Berœa. Whereas it is probable that the visit of Paul's two emissaries extended to Philippi as well as to Thessalonica, and that they conveyed from the former church to Paul (2 Cor. 11 9? Phil. 4 15) a gift of money.

4. At Corinth and elsewhere.

At Corinth and throughout Achaia, Timothy, as an 'apostle' (1 Thess. 1 1 2 6) in the wider sense of the term (cp MINISTRY, § 17; McGiffert, *Apostolic Age*, 648 *f.*), shared Paul's pioneering work (cp 2 Cor. 1 19) and was associated with him in the epistles (epistle?) to Thessalonica, which were written in the earlier part of the apostle's stay on the Isthmus—for although the mention of Athens (1 Thess. 3 1) does not exclude the possibility of that city as the place where they were composed (see 1 Cor. 15 32 16 8), it is plain from other allusions (cp 1 Thess. 1 8) that they presuppose the apostle's entry into Achaia. From Corinth two years later Timothy seems to have accompanied Paul as far as Ephesus, where he became known to the churches in the neighbourhood (Col. 1 1) and to local individuals (Philem. 1).[1] At any rate (cp CHRONOLOGY, § 68) towards the close of the two or three years spent by Paul in Ephesus and the surrounding district, Timothy and Erastus (Acts 19 22), as two assistants of Paul upon the spot, were despatched to Macedonia and Achaia (possibly; ἐὰν ἔλθῃ, 1 Cor. 16 10) in advance of their leader, who intended to follow up his letter to Corinth (despatched by sea after March 5, when navigation became open) by a personal visit. It is plain, from 1 Cor. 4 17 16 10*f.*, that there was a chance of Timothy failing to arrive until after the letter reached its destination; for Paul bespeaks a courteous reception for his young representative. The absence of any greeting from the latter, and the temporal aorist ἔπεμψα ('I have sent,' 1 Cor. 4 17), show that he had left before the epistle was despatched. His instructions were to return with some other Christians directly (*i.e.*, by the sea-route) to Paul at Ephesus (1 Cor. 16 11), after instructing the Corinthians afresh upon Pauline methods and views (1 Cor. 4 17) and generally consolidating their faith.

The obscurity of the Corinthian episode at this stage (cp TITUS, § 2) renders it difficult to decide whether Paul's silence in 2 Cor. upon the mission of Timothy and any results attending it forms a tacit proof that Timothy did not manage to reach Corinth (so, *e.g.*, Lightfoot, Weiss, and Ramsay), or that he did arrive and then, failing to cope subsequently with the fresh trouble, returned to Paul or simply sent him word of the crisis. On the last-named hypothesis he may have been either (so Beyschlag, Pfleiderer, G. G. Findlay) in person, or with Paul on the latter's painful visit (2 Cor. 2 1 5 *f.*), actually the man insulted (ὁ ἀδικηθείς; 7 12) by the recalcitrant majority at Corinth. On the whole intricate question see Schmiedel, *HC* ii. 1 220-223.

Whatever happened to Timothy in the interval, Paul at last met[2] him somewhere among his favourite Macedonian churches (2 Cor. 1 1 7 5) whither he had retired from Corinth probably to find a more congenial sphere; unless we are to suppose that he accompanied Paul thither from Ephesus. Evidently he had not been in Achaia lately (2 Cor. 7 5 *f.* 13). But when Paul went on to Corinth, Timothy accompanied him (Rom. 16 21), and formed a member of the apostle's *entourage* on his return to Asia in the spring of the following year.

5. Later movements.

Whether he accompanied Paul to Rome or was summoned by him afterwards, the scanty data available do not permit us to determine; the latter conjecture (cp TIMOTHY AND TITUS [EPISTLES], § 12 *f.*) fits in well with the tone of 2 Tim. 4 13-15 21-22*a* when that fragment is assigned to a genuine note sent by Paul either late in the Cæsarean or early in the Roman imprisonment, urging his friend to join him. At any rate it is obvious that Timothy did stay beside him at Rome for a considerable period (Col. 1 1 Philem. 1 Phil. 1 1). Later on, however, Paul's concern for the Philippian Christians led him to arrange for the disinterested and zealous Timothy paying them a visit (Phil. 2 19-22) in order to relieve the apostle's mind by bringing back news of his old friends. Timothy had a tried character by this time and his 'solicitude for the Philippians had become a second nature' (Lightfoot). 'Clearly he was not a prisoner, but free to come and go. His journey may have detained him; or he may have proceeded farther to Ephesus.[1] At least a genuine fragment preserved in 2 Tim. 1 15-18 4 6-12 16-19 shows that at some subsequent period Paul had been forced to abandon his hope of release and now, in view of a martyr's death, wanted to have Timothy beside him again in his isolation. We do not know if the summons was obeyed in time, or at all. A final glimpse of the envoy is afforded, some twenty years later, by a casual remark in an epistle apparently addressed to some Christians at Rome (Heb. 13 23), from which it would appear that Timothy, who was familar to this circle of readers (cp Rom. 16 21, HEBREWS, § 9), had been recently released from imprisonment somewhere and might possibly revisit Rome in company with his friend the writer.

6. As author.

Apart from a hypothesis, which needs only to be chronicled, that he actually edited the two pastoral epistles bearing his own name, three lines of critical reconstruction connect Timothy with authorship either independently or as an amanuensis of Paul. (i.) Least probable of all is Spitta's ingenious attempt to find in him the author of 2 Thess. (*Zur Gesch. u. Litt. des Urchristenthums*, 1 22 *f.*), an epistle written by him in the name of his companions (2 Thess. 1 1)—hence its somewhat formal and official tone—and saturated with apocalyptic fantasies of Judaism peculiar to himself (cp Acts 16 1 2 Tim. 3 15 *f.* 1 Tim. 1 4 4 7). See THESSALONIANS, § 14. (ii.) When 2 Cor. 10-13 is accepted as part of an intermediate letter to Corinth, written previous to 2 Cor. 1-9, it is natural (Pfleid. *Das Urchristenthum*, 106 *f.*) though far from necessary to suppose that these four chapters were preceded by a part (no longer extant) written by Timothy or by some other companion of Paul interested in the local church. On this view the αὐτὸς δὲ ἐγὼ Παῦλος means that Paul now strikes in to speak alone and independently. (iii.) With more plausibility the composition of the 'We-journal' in Acts has been assigned occasionally to Timothy (*e.g.*, by Königsmann, Ulrich, Beyschlag, de Wette, Bleek, and [?] Weizsäcker), although the threads of positive proof are extremely subtle (cp ACTS, § 9 *b*) and the general probabilities point rather to Luke as the diarist. Besides, even if the Bezan reading in Acts 11 27 *f.* be rejected, a passage like Acts 20 4-6 (unless we are to suspect a serious dislocation of the text) tells against the composition of the journal by Timothy. Sorof, however, has followed a modified form of Mayerhoff's theory in attributing to Timothy the task of editing Acts in its extant shape from (*a*) a Lucan sketch of early Christianity in connection with Paul and (*b*) a rather legendary Petrine source (*Die Entstehung der Ap.-gesch.* 1890).

7. In tradition.

The widespread belief of Christian tradition (*Ap. Const.* 7 46, Euseb. *HE* 3 4, Photius, *Bibl.* 254), that Timothy was appointed by Paul as the first bishop of Ephesus, is probably nothing better than an inference from the pastoral epistles (1 Tim. 1 3 *f.*), which, however, may echo some historical relationship. The story is occasionally improved by some circumstantial details: *e.g.*, that he was succeeded in his episcopate by the apostle and the presbyter John, suffering martyrdom (Jan. 22, Greek church; Jan. 24, Latin; Sept. 27, Ephesus) during the former's exile at Patmos towards the close of the first century A.D. (see Nicephorus in *HE* 3 11). No miracles are narrated of him in the fifth century *Acta Timothei* (ed. Usener, 1877). For these and other legends see further Lipsius, *Apokr. Ap.-gesch.* (1884), 372-400, and, for the traditional connection of Timothy and Ephesus, Zahn, *Einl.* 1 426 *f.* His martyrdom

[1] If the note to Ephesus, incorporated in Rom. 16, extended (as, *e.g.*, Weizsäcker and McGiffert suggest) to *v.* 23, the mention of Timothy in *v.* 21 would be highly appropriate. But the note probably contained *vv.* 1-20 and no more. [Cp, further, ROMANS, § 13.]

[2] Or, sent for him; if one plausible reconstruction of the period, based on a critical view of 2 Tim. 4 9 11-18 20 *f.* (see TIMOTHY AND TITUS [EPISTLES], § 12), could be established.

[1] If so, this would be the basis for the literary setting adopted by the later author of the pastoral epistles in his third composition (1 Tim. 1 3 *f.*, cp TIMOTHY AND TITUS [EPISTLES], § 11). The casual way in which Timothy's connection with Ephesus is assumed there, may be pure fantasy; but it is more likely that it may reflect some actual tradition of his career after Paul's removal; certainly (although the far from exhaustive or accurate nature of Acts as a record of Paul's later life does not make this an insuperable objection) there is no recorded period in Acts when Paul started for Macedonia leaving Timothy to superintend matters at Ephesus.

(1 Tim. 6 12 *f.*) is connected in one tradition with wild orgies in vogue possibly at the local festival of Diana, the mob having clubbed him to death for protesting against their licentiousness.

J. Mo.

TIMOTHY AND TITUS (EPISTLES)

Contents of epistles (§§ 1-3).	Second imprisonment (§ 10).
Period and object (§ 4).	Genesis of pastorals (§ 11).
The errorists (§ 5).	Critical analysis (§§ 12-14).
Paulinism (§ 6).	Order of composition (§ 15).
Sub-Pauline elements (§ 7).	Author (§ 16).
The faithful sayings (§ 8).	Pseudonymity (§ 17).
Style and diction (§ 9).	Bibliography (§ 18).

These three epistles commonly form a group[1] in the NT canon,[2] and the general similarity of their diction, aim, and atmosphere makes it convenient to discuss them side by side. Their contents are as follows :—

1. 1 Tim. 1 Tim. is somewhat loosely knit together; the contents are miscellaneous rather than orderly, as if the writer had had no single topic dominant in his mind. But in spite of this desultory character the general trend of the epistle is not obscure.

After the usual greeting (1 1 *f.*) the epistle opens by describing the commission already given by Paul to his lieutenant at Ephesus and now urged afresh upon his attention that he may be able to counteract local errorists of antinomian proclivities. This commission enforces sincerity and moral earnestness, according to the Pauline standard presented as an apostolic trust and tradition to which Timotheus is naturally heir (3-11). Here a digression occurs, suggested by the closing words of *v.* 11; Paul claims to be the staunch though unworthy representative of this evangelical standard, and summons Timothy to unflinching loyalty (12-20) in view of some recent instances of aberration (Hymenæus and Alexander). The epistle then passes away from polemic and personal allusions into the first of its two sections (2 *f.*). Directions are laid down for the regulation of church-life in general: (*a*) for whom (2 1 *f.*) and by whom (8) prayer is to be offered in church—both paragraphs expanding into slight digressions upon the universality[3] of salvation in the Pauline gospel (3-7) and upon the subordinate place of women (9-3 1). The writer then proceeds from Christian worship to the more vital question of (*b*) organisation, laying

[1] As 'personal' letters ('pro affectu et dilectione,' Murat. Can.) they usually share with Philemon the last place in the list of Pauline epistles. After the Murat. Canon, where for some reason Titus precedes the other two, the normal arrangement is 1 Tim., 2 Tim., Titus.

[2] The allusions and citations in early Christian literature simply prove the existence and (by no means unanimous) acceptance of these epistles during the second and third centuries. Neither their rejection by writers and leaders outside the catholic church, nor their welcome within it, can be supposed to throw independent light upon the question of their actual origin and authorship. Errorists usually refused to admit what was in more or less plain conflict with their own tenets, and one has always to suspect the bias of moral dislike (Clem. Alex. *Strom.* 2 11) behind their so-called literary verdicts upon authorship. But as little do the employment and the approbation of such writings by church-authors tell in favour of their reputed authorship. When admitted to the canon as documents bearing Paul's name, they were judged healthy in religious tone, practically serviceable to the church ('in honore ecclesiæ catholicæ in ordinatione ecclesiasticæ disciplinæ sanctificatæ sunt,' Murat. Can.), and generally congruous with the Pauline tradition and temper. Those who thus stamped them with approval had no independent knowledge of their composition; it was enough that the epistles contained nothing which jarred with what was judged to be apostolic or Pauline; and the early Christian attitude towards 'Hebrews' is abundant evidence of how loose that judgment could be. The modern critic is therefore justified in going behind such ecclesiastical tradition in order to face directly problems of origin and authorship which, in the nature of things, could hardly have been present to the consciousness of those who with sound instinct preserved writings handed down by religious usage from the past. No one would dream of challenging the verdict of the Homeric χωρίζοντες, simply because in common with antiquity generally Aristotle (with the same facts before him) found no difficulty in treating the Iliad and the Odyssey as products of the same mind. And the identification of canonicity or worthiness with direct apostolic authorship, which tacitly controlled nearly all early Christian discussions upon the primitive literature of the church, is a literary convention which it is needless at this time of day to spend space in refuting. Consequently, in the case of the pastoral epistles, there need not be any hesitation in concentrating attention upon their internal evidence when problems such as pseudonymity are raised. This is just one of the instances in which the naive presuppositions of early Christianity imposed limitations upon its judgment, when that judgment was exercised upon the remote literary and historical sources of its treasures.

[3] J. Turmel, 'Histoire de l'interprét. de 1 Tim. 2 4' (*Revue d'Hist. et de Litt. Rélig.* 1900, Sept.-Oct.).

down the moral criteria (see Education, §§ 16 *f.*) of *episcopi* (3 2-7) and *diaconi* (8-13, incidentally deaconesses are included), and closing the whole section[1] with a lofty stanza or fragment of a primitive confession upon the incarnate Christ (3 14-16).

The second section (4-6), which resumes the tone of polemic, is thrown into the form of rules for the personal conduct and ministry of Tim. in view of serious moral aberrations fostered by the ascetic tendencies of certain Christian teachers; these sophistries and superstitions he is authoritatively to refute (4 1-16). He is further advised upon his attitude to the practical problems created by differences of age and sex within the membership of the churches (5 1 *f.*), and some space is devoted to the maintenance and control of two special classes of officials—widows[2] (3-16) and presbyters (17-25). After[3] a word on the relative duties of slaves and masters (6 1 *f.*), the epistle comes round to lash the errorists, attacking them with considerable vigour for making a trade of religion. Naturally this suggests a warning to Christians in general[4] against the passion for money (3-10), and with an impressive charge addressed to the 'man of God,' the epistle dies away in a doxology (11-16).[5] In a postscript, some words to rich people are appended, together with a supplementary warning to Timothy against contemporary γνῶσις (17-21).

2. 2 Tim. In 2 Tim., after the greeting, Paul gives thanks for Timothy's inheritance and experience of faith (1 1-5). He then warns his friend against false shame, urging his own life and teaching to the contrary (6-14),[6] as well as a recent example of energy and fearlessness on the part of an Asiatic Christian called Onesiphorus (15-18). Especially for one who like Timothy is heir to the Pauline trust and tradition, endurance for Christ's sake and adherence to the Pauline gospel (of which, indeed, endurance is a note) form a pressing duty; the former is certain of a reward (2 1-13), whilst the latter is the one useful and honourable course of action open for a Christian teacher (14-26) amid the heightening temptations of unpractical controversy and immorality. After vigorously exposing the principles and methods of these errorists (3 1-9, see Jannes and Jambres), Paul bids Timothy maintain the principles of the Pauline gospel, even when they involve suffering and obloquy, and at the same time adhere to the OT scriptures (10-17);[7] then follows a *résumé* containing his final charge and the swansong of his own confession (4 1-8). Data of personal information and private messages close the letter (4 9-22).

3. Titus. After a somewhat elaborate greeting (1 1-4), the epistle to Titus opens by reiterating Paul's instructions with regard to the choice and duties[8] of

[1] The personal reference elsewhere in the NT (Gal. 2 9, Rev. 3 12) does not justify Bois in bracketing 'which is the church of the living God' (ἥτις . . . ζῶντος : 3 14-16) and connecting 'pillar' (στῦλος) with the subject of 'behave' (ἀναστρέφεσθαι).

[2] The concern to keep the widow-class under the bishop's control is thoroughly sub-apostolic (cp Ignat. *ad Polyk.* 4, 5). See Ministry, § 41, and Hastings' *DB* 4 916 *f.*

[3] The interpolated remark (5 23), if not an aside suggested by 'pure' (ἁγνόν), may have originally lain between 4 3 and 4 4 or 4 12 and 4 13, from which it has got displaced (instances of this in *Hist. New Test.*(2) pp. xxxix 676; also Jahn on Juv. 3 12 16 and Che. on Is. 38 22). Its insertion after 5 22, which must have taken place very early, would thus be due to a copyist who read the sentence as a qualifying definition of 'pure' (ἁγνόν)—Christian purity being no Essene-like abstinence. Epictetus (*Diss.* 3 22) similarly regards bodily health as a necessary part of the true Cynic's religious equipment; 'for if he has the appearance of a consumptive, pale, and thin person, his testimony has not the same weight.' Jülicher and Bacon group *vv.* 23-25 together, and von Soden links 25 to 23, 24 to 22, whilst Calvin plausibly suggested that 22*c*-23 was a marginal note of the author.

[4] In particular to teachers who found Christianity a lucrative trade (cp Did. 11 *f.*, Barn. 10, Ignat. *Ephes.* 7, Tit. 1 11).

[5] The absence of any greetings to members of the Ephesian church, together with the paucity of personal allusions, shows that the epistle is not a letter in the strict sense of the word. The author is writing with his eye on the Christian church of his own day, as the phrases (2 Tim. 4 22 Tit. 3 15 1 Tim. 6 21) prove for all three epistles. In Philemon, the one genuine 'private' note of Paul extant [cp, however, Philemon], the 'your' (ὑμῶν) in *v.* 25 refers to the different persons associated with Philemon in the introduction. Cp also the variant 'know ye' (γινώσκετε : Lachm.) in 2 Tim. 3 1. The alternative open to the traditionalists is the gratuitous assumption that passages like 1 Tim. 2 1-3 13, etc., were meant to be communicated by their recipients to wider circles (Zahn); which of course destroys the character of the writings as private letters. Cp 1 Tim. 2 8 (1 Cor. 7 17).

[6] On the contents of 1 6 see below (§ 7). But even if 'us' in *v.* 7 referred to Paul and Timothy (which is not absolutely certain) it would simply allude to them as the persons immediately under consideration, not as officials. The passage, therefore, does not in itself betray the narrowing of the Spirit to a class; and the contents of the Spirit are distinctly ethical: vigour issuing in love to others and in self-control.

[7] On 3 13 cp Aristides 6 16 (Wendland, *Rhein. Mus.*, 1894, 49 309).

[8] The curious antipathy of the writer to second marriages on the part of presbyters, episcopi, diaconi, and 'widows' (χῆραι, see Widow), is quite un-Pauline, but corresponds to the more general cast of feeling prevalent in the second century throughout

presbyters or episcopi in Crete,[1] in order to sharply check erroneous teaching and immoral practices on the part of some Judaising propagandists who were upsetting the churches (5-16).[2] Titus is then instructed how to enforce the moral obligations of Christianity upon aged men (2 1 *f.*), aged women,[3] and married women (3-5), younger men like himself (6-8), and slaves (9 *f.*). Paul insists on this moral life as an essential of the Christian faith (11-14, see PECULIAR PEOPLE), and urges Titus to press home the positive duties of obedience to authority and of pure conduct, instead of wasting time over controversialists and sectaries (2 15-3 11; cp EXCOMMUNICATION, § 3; HERESY, § 2). With some brief personal notices (12-15) the epistle closes; the mention of the jurist Zenas and the evangelist Apollos is perhaps intended to suggest that it was conveyed by their hands to its recipient.

The cluster of problems offered by these epistles is intimately connected with the dual nature of their contents.

4. Period and object.

Within a setting and alongside of material which, upon all available criteria of internal evidence, must be pronounced distinctly sub-Pauline,[4] the reader meets passages apparently alien which have high claims to be considered as directly due to the apostle whose name the letters bear. The task of criticism is to do justice to both of these elements. The sub-Pauline element is primary, and in view of it any reasonable appreciation of the whole question, not merely of isolated details, leads almost inevitably to the conclusion—one of the best established in NT research—that the three epistles are pseudonymous, composed by a Paulinist in Asia Minor[5] not earlier than the close of the first century, and not later than the second decade of the second century, based in part upon genuine fragments from the apostle's pen as well as upon more or less reliable oral tradition, and intended to express and instruct the common Christianity[6] of the day in terms, as far as was possible or useful, of the great Pauline tradition. Substantially they were written and circulated early in the second century, as is evident from their employment in the epistles of Ignatius and Polycarp. During the period 90-120, and during that period alone, they possess a career and object which corresponds to their own

the churches (*e.g.*, Athenagoras, *Leg. pro Christ.* 33, 'respectable adultery,' εὐπρεπὴς μοιχεία, Herm. *Mand.* 4 1 4; Clem. Alex. *Strom.* 3 1). See Jacoby, *Neutest. Ethik* (1899), 378-399.

1 The concrete and bitter description of the Cretan character—with its prevalent traits of falsehood, avarice, drunkenness, and restless sedition—does not favour the ingenious hypothesis that Cretans in this epistle are an allegorical equivalent for Philistines (Κρῆτες, cp CRETE), whom tradition occasionally connected with the island. There is no evidence for such personification in the pastorals as would represent the church under the figure of the twelve tribes scattered in the dispersion (Jas. 1 1) and opposed by enemies of the true Israel.

2 In *v.* 16 ὁμολογοῦσιν (EV 'profess') is (as Heb. 11 13) 'to make public avowal,' especially when called upon (1 Pet. 3 15). The writer's point is, not that the errorists made extravagant claims, but that they did not act up to the normal profession of the Christian faith.

3 For πρεσβῦτις in early Christianity see Achelis, *ZNTW*, 1900, pp. 92 *f.*; 'young men' (νεώτεροι) came to mean 'laymen,' as 'presbyters' (πρεσβύτεροι) passed into an official term (see MINISTRY, § 43).

4 It is only fair to the ascertained results of criticism to adopt this position, although one still meets statements like the following: 'It may be asserted without fear of contradiction that nothing really un-Pauline has been proved in any of the disputed epistles' (Sanday, *Inspiration*, 338 *f.* 363 *f.* 379 *f.*, 1896, a discussion characterised by Dr. Hincks of Andover thus: 'General assertion, bolstered up by the opinion of those like-minded—this is not the way in which an intelligent man, who has solid arguments at his disposal, maintains an imperilled cause').

5 Cp von Dobschütz, *Die urchristlichen Gemeinden*, 127-139 (1902), Harnack, *Ausbreit. d. Christ.* (1902) 461 *f.*

6 The motto of the pastorals lies in a sentence like (RV) 'For the grace of God hath appeared, bringing salvation to all men, instructing us' (Tit. 2 11, ἐπεφάνη γὰρ ἡ χάρις τοῦ θεοῦ σωτήριος πᾶσιν ἀνθρώποις παιδεύουσα ἡμᾶς). In their age Christianity had to fight for its life against a subtle spirit in the air rather than against civil persecution; visionaries and sophists were more deadly than proconsuls and lictors. Thanks to the moderation and steady sense of writers like the author of the pastorals, however, ordinary Christians came safely through the struggle with four truths as a secure possession; the unity of the Creator and the Redeemer, the unique and sufficient value of Jesus for redemption and revelation, the vital tie between morals and faith, and the secure future assured to the church of God.

internal evidence as well as to the data afforded by more or less contemporary literature. The latter point is minor though real. Their literary affinities are beyond question with Lk.-Acts,[1] Clem. Rom., Barnabas, and the epistles of Jude and 2 Pet., as well as with the fourth book of the Sibylline oracles (Asia Minor, *circa* 80 A.D.) which, like 4 Maccabees, reiterates the term 'pious' (εὐσεβής). Unlike Paul, the author also makes copious use of the vocabulary of 2 Maccabees, and, at least in Titus and 1 Tim., there are traces of acquaintance with 1 Pet.

The distinctive element, however—*i.e.*, the prominence assigned to Timothy and Titus, is intelligible only upon the supposition that the author had specially in view the ulterior end of vindicating the legitimate evangelic succession of contemporary episcopi and other office-bearers in provinces where this was liable for various reasons to be challenged. The pastorals were composed, says Tertullian, to expound church affairs ('de ecclesiastico statu'). The craving (visible in Clem. Rom.) for continuity of succession as a guarantee of authority in doctrine (and therefore in discipline[2]) underlies the effort of this Paulinist to show that Timothy and Titus were genuine (γνήσιοι) heirs of Paul, who himself (as the author goes out of his way to repeat and assert) was a divinely commissioned herald of the gospel. Inferentially, the successors appointed by Paul's lieutenants possessed the true central deposit of the faith. Conscious of this inheritance, and alive to its value, they are urged even as novices to instruct[3] the churches personally upon the faith in a peremptory and positive manner,[4] instead of allowing converts to lie exposed to unreliable teachers or false leaders. Such teachers and leaders abound. Indeed, one note of the age is the flaunting confident temper of the errorists (2 Tim. 2 23 *f.* 3 1 *f.* 4 3 *f.* Tit. 1 10 *f.* 3 10 1 Tim. 1 7 4 1 *f.* 5 24 Acts 20 29 *f.* Jude 8-10 12 19 Rev. 2 20 1 Jn. 4 1 5 2 Jn. 7 3 Jn. 9; Ign. *Ephes.* 7, *Trall.* 6, etc.).

Open attempts, as well as cunning intrigues (2 Tim. 3 6 Jude 4), are on foot to exploit the principles of the faith, and

5. The errorists.

the new tone of overbearing petulance, among other traits, answers to the tradition preserved by Hegesippus (*circa* 160 A.D.)[5] that such a phase occurred first of all during Trajan's reign (Eus. *HE* 3 32), previously to which the church[6] had remained 'a

1 Cp von Soden, *Theol. Abhandlungen*, 133-135 (1892). A comparison of the pastorals with Lk.-Acts, etc., establishes not their priority or literary filiation, so much as the relatively late period at which all were composed. Diction, ideas, standpoint—all indicate unmistakably the sub-Pauline period, with its stereotyped expressions and current phraseology.

2 The concern of the pastorals, less avowed yet none the less real than in Ignatius and Clement, is to vindicate the authority of the elders or bishops over the enthusiasts and ascetics in the church; the second century reveals this perennial struggle going on particularly in Asia Minor. Hence this Paulinist is forward to claim Paul's authority on behalf of the organised discipline of the churches.

3 The prominence given to 'teaching' qualities shows that one danger of the contemporary churches lay largely in the vagaries and crude speculations of unauthorised teachers (*Did.* 15 1). The author's cure is simple. Better let the *episcopus* himself teach! Better let those in authority themselves be responsible for the instruction of ordinary members! Evidently teaching was not originally or usually (1 Tim. 5 17) a function of the presbyters; but abuses had led by this time, as the *Didachè* proves, to a need for combining teaching with organised church authority. A contemporary spirit of contempt for young episcopi (Ignat. *Magn.* 3 etc.) is answered by the repeated encouragements of Paul in 2 Tim. 2 22 *f.* Tit. 2 6 *f.* 1 Tim. 4 11 *f.* 5 1; these are effective from the writer's standpoint, though such a tone would have been singularly inappropriate from Paul to lieutenants of mature experience. Here, however, they are types of loyalty to the Pauline gospel; that is all.

4 Timothy (2 Tim. 4 5), *e.g.*, is not an evangelist, but he is to do an evangelist's work as part of his full service. See EVANGELIST, MINISTRY, § 39 *b*, and Dieterich in *ZNTW*, 1900, pp. 336-338. The whole evidence from the allusions to ecclesiastical organisation points to the period immediately preceding that of Ignatius (MINISTRY, § 54).

5 Also to the statement of Clem. Alex. (*Strom.* 7 17) that Gnostic heresies first became threatening about Hadrian's reign, whilst the apostolic age and teaching ended with Paul's ministry under Nero.

6 Emphasis on the visible church as a bulwark of morals

pure and incorruptible virgin' (παρθένος καθαρὰ καὶ ἀδιάφθορος), her seducers lurking somewhere in obscurity (ἐν ἀδήλῳ που σκότει). This comparatively virgin purity of the church lasted not merely till the death of the apostles, but till the close of the next generation, 'of those thought worthy to be immediate listeners to the very words of the divine wisdom' (τῶν αὐταῖς ἀκοαῖς τῆς ἐνθέου σοφίας ἐπακοῦσαι κατηξιωμένων), when the deceit of teachers of other doctrine (τῶν ἑτεροδιδασκάλων, cp 1 Tim. 1 3 6 3) produced impious error in the communities. 'Since none of the apostles survived, these [ἑτεροδιδάσκαλοι] now attempted, unabashed and openly, to preach 'so-called gnosis' (τὴν ψευδώνυμον γνῶσιν; cp 1 Tim. 6 20) in opposition to 'the preaching of the truth' (τῷ τῆς ἀληθείας κηρύγματι; cp 2 Tim. 4 17 Tit. 1 3). Of these Marcion[1] was the foremost.

In the pastorals, as in Jude and 2 Peter, this movement in its incipient stage is met by equally frank methods, which seem denunciatory merely because we no longer possess any statement of the other side and are, therefore, prone to forget that such rough and decisive ways are at times the soundest method of conserving truth. Popular applications of gnosticism were, as a rule, brilliant and poisonous fungi. Instead of writing a botanical treatise on their varieties, this writer felt the simpler and more practical plan was to make people either avoid or destroy them. It was a short and easy plan, and probably effective at the time, although its expression in literature runs the natural risk of being reproached for containing more heat than light. Firmness and even ridicule have their own place as ethical weapons of defence, and the opening of the second century offered Christianity some admirable occasions for their use.

The physiognomy of the errorists is indistinct, for several reasons. The author had to preserve the verisimilitude of a Pauline situation, for one thing; and the desire of avoiding undue anachronisms prevented him from being more explicit about the details of errors which had arisen in his own later age. Besides, the errors were familiar to his audience and might be taken for granted on the whole. It is even probable that he abstained purposely from confining his range to any one set of visionaries and opponents, inasmuch as his letters were intended (like 1 Peter, James, and 2 Peter) to be manifestoes to the church in general, rather than homilies for any local audience. The numerous forms of opinion and conduct in and around contemporary Christendom, which by a sound instinct he regarded as a menace to the faith, had certain common features; and to describe these as due to a syncretism of Gnosticism and (Tit. 1 10 *f.* 3 9 1 Tim. 1 7) Judaism, is to go as far as the evidence of the pastorals warrants.

The environment (as in Rev. 2 *f.*, and the Ignatian epp.) is marked by the incipient phases of what afterwards blossomed out into the Gnosticism of the second century: an amalgam of tendencies towards dualism[2] and docetism (1 Tim. 2 6 3 16, as in 1 Jn.), the multiplication of media between God and man (1 Tim. 2 5 *f.*), a distinction between the God of creation and the God of redemption (1 Tim. 4 3-5, cp Herm. *Vis.* 1 3), a depreciation of the OT (2 Tim. 3 16),[3] and a penchant for magic and superstition (2 Tim. 3 8 13; cp Acts 8 9-24 19 11-19 for Ephesus, 13 6-12 for Cyprus). These tendencies were allied to ascetic predilections (like the prohibition of marriage among the Encratites, of marriage and flesh among the Saturninians and the Marcionites), which as usual bordered on antinomian license, to an aristocratic exclusiveness (opposed in non-Pauline fashion, 1 Tim. 2 4 *f.* 4 10), to a semi-philosophic evaporation of primitive beliefs—*e.g.*, on the resurrection[1] (2 Tim. 2 18; so Menander and Dositheus), to indulgence in superficial theories and rhetoric, and so on. To our author's eye these errorists were heterogeneous. 'For there are *many* insubordinate people, chatterers and cheats, *especially* those who have come from the circumcision' (Tit. 1 10). The mischievous feature about them was their presence within the churches and their combination of plausible errors with apparent, even ostentatious, fidelity to the principles of the faith—a trouble elsewhere reflected (Acts 20 29 *f.*) in connection with the Ephesian church towards the close of the first century.

(2 Tim. 2 19 *f.* etc.) is accompanied by its elevation to the rank of foundation (θεμέλιος), hitherto reserved for Christ (1 Cor. 3 11), or, at least, for the prophets and apostles (Eph. 2 20). The church now takes her place in a fairly stable world; the old anxious outlook for an immediate return of Jesus is no longer central. The really pressing questions concern not the next world but the present, and institutions are brought forward as a means of moral discipline and religious settlement.

[1] Marcion's omission of the pastorals from his canon tells heavily against their origin as preserved in tradition. Philemon was accepted by him, though far more of a private note than any of the pastorals; and the presence of elements antagonistic to his own views need not have made him exclude them, since he could have easily excised these passages in this as in other cases.

[2] Cp von Dobschütz, 180-187, 189.

[3] The lack of homogeneity in the description of the errorists prevents this trait from telling against the reference (GENEALOGIES, § 4; Hort, *Judaistic Christianity*, 135 *f.*) of the 'genealogies' (γενεαλογίαι) in Tit. 3 9 1 Tim. 1 4 to legendary pedigrees of Jewish heroes. But the phrase came to have a conveniently appropriate colour afterwards in view of the interminable series of æons and emanations developed especially by Gnostic sects like the Valentinians. The Jewish legalism of Tit. 1 14 3 9 1 Tim. 1 7 *f.* recalls Cerinthus decidedly.

6. Paulinism.

Even if the author had any single system of error in mind (which, in view of the contemporary fusion of paganism and Judaism, is unlikely), the vague and somewhat indiscriminate fashion in which he endeavours to confute their pretensions, renders it impossible to reconstruct any coherent picture of his opponents. Several traits suggest influences similar to those which fostered Essenism; others[2] recall the picture of Cerinthus sketched in later tradition, others again the errorists Carpocrates, Menander, and Dositheus. The two indisputable facts are, that the collective evidence of the early Christian literature, as well as of later tradition, places the origin of such phenomena (upon any considerable scale) not earlier than the close of the first century, and that their *locus* was primarily Eastern, in Syria and particularly Asia Minor, where we find the pastorals, like the Ignatian epistles, pouring a scattered fire upon manifold forms of antagonistic theosophy.

Against the seductive influences of local paganism, with its ethical miasma and religious cravings, the author assumes a moralistic standpoint based upon the popular conception of Paulinism.

No writer after Paul's death could maintain, even when—as in Marcion's case—he happened to sympathise with, the deeper aspects of the apostle's thought, which survived mainly, so far as the subsequent literature was concerned, but in altered form throughout the Fourth Gospel. As a general rule Paulinism was either misunderstood or modified. The sub-Pauline epistles, like the Roman symbol (Kattenbusch, *Das Apostolische Symbol*, 2 498 *f.* 596 *f.* 720 [1900]), show instances of both attitudes, and the pastorals are a vivid proof of how even a devoted Paulinist had to alter the emphasis at many points of his master's teaching upon religious and practical topics[3] in a restatement of it for some later age—being forced, for example, to meet the common objection to Paul's severe view of the Law, and to admit the high estimate of its value throughout the diaspora as an ethical code and check (1 Tim. 1 5-11),[4] as well as to correct abuses and misunderstandings of certain Pauline ideas (*e.g.*, the resurrection, 2 Tim. 2 18).

7. Sub-Pauline elements.

The author rightly felt that Paul was essentially anti-Gnostic, and that the tenets of the incipient Gnostic theosophy would have been repugnant to the man who had theoretically and practically attacked its precursors at Colossæ. But his own practical bent and prudent sense of the situation prevent him from developing in reply Paul's peculiar theory of gnosis as a special endowment, superior to faith, and mediated by the

[1] This notion is either ultra-spiritualist (cp Jn. 5 24, qualified carefully by 5 28 *f.*, etc.) and due to Gnostic tendencies, or chiliastic—the reign of Christ, eternal life, has already begun; therefore there can be no marrying (Lk. 20 35 *f.* 1 Tim. 4 3).

[2] If Cerinthus and Carpocrates really rejected the virgin-birth (Iren. *Adv. hær.* i. 26 1 25 1), it is strange that neither the author of the Fourth Gospel nor the author of the pastorals defended this point. The former, probably, had reasons of his own; but the latter, who had no semi-philosophic christology to state, seems to have omitted the virgin-birth from his rhythmic summary (1 Tim. 3 16 *f.*) owing to his genuinely Pauline standpoint. This adherence to the older view is all the more remarkable side by side with the eager insistence on it in *Asc. Isaiæ*, 11 2-22, and Ignat. *ad Eph.* 19 (where a Pauline citation occurs, 1 Cor. 2 8), both contemporary writings.

[3] Note, *e.g.*, the varying proportion of the two currents—one spontaneous and prophetic, the other veering towards order and organisation. The former is in some writings of this age almost wholly subordinated to the latter (Clem. Rom., Past., even Ignat.); in others it is dominant, almost exclusively important (Barnabas, 1 Jn., Rev., Jude, 2 Pet.).

[4] Antiphanes (*Fragm. Com. Graec.*), 'He who does no wrong needs no law' (ὁ μηδὲν ἀδικῶν οὐδενὸς δεῖται νόμου).

spirit. Such methods would not have been appropriate. Popular Christianity had always been wider and more varied than Paulinism, even during Paul's lifetime, and the new period which found Christianity in fresh relations with the wider empire in the generation following Paul's death, stimulated fresh energies and fresh methods of expression, native to the age but more or less an advance upon all previous conceptions. To the author of the pastorals, loyal to the apostolic and especially the Pauline tradition, but none the less free to interpret afresh his Christian consciousness, God appears—in un-Pauline fashion—as a Saviour; Jesus not as the son of God but as a mediator,[1] or rather *the* mediator; baptism (Tit. 3 5) as almost a sacrament of salvation, the Law simply as a useful code of morals. Anthropomorphism is carefully avoided, as in the Fourth Gospel; God is the Absolute—his unity, awe (1 Tim. 6 16, cp En. 14 21 *f.*), and eternity, his universal purpose, but not his fatherly love, being prominent.[2] The pressing question of religion is the consolidation of the churches rather than the extension of the gospel to those as yet unreached. We are in the age of the *Epigoni*, when the creative genius has almost disappeared and is yielding place to practical activities which are mainly devoted to conserving ground already gained. The spirit of defensiveness has increased. Christianity is now more self-conscious than ever. Her outlook is not eschatological so much as secular, directed to a useful though troubled career in the world. The church has behind her a sound body of religious truth, which it is her business to teach and enforce; and this is presented by the writer in brief, crystallised phrases and paragraphs, which recall the incipient liturgies and symbols of the church.[3] Faith consequently is tending to become more than ever *fides quæ creditur*. It is predominantly the confident apprehension of the truth or the conviction that the gospel-message is authentic, sometimes the virtue of fidelity; but neither the author nor his age has any intelligent sympathy with Paul's characteristic idea of faith as the warm tie between Jesus and the redeemed Christian. Nay more, the old Pauline antithesis of faith and works (like the idea of justification by faith, or of salvation from sin's guilt) is put into the background, evidently as misleading or apt to be misunderstood. 'Piety,' nourished by sound[4] teaching, is the root out of which all human virtues spring; and the conceptions of reward, a good conscience, and the value of a respectable reputation, come to the front. In effect, this is practically the ethical result of Paulinism. But how differently[5] the apostle and the later church reached even the same conclusions! Here eternal life is the boon granted to good works, and 'faith' (πίστις) is a man's relation to the 'truth' of 'the teaching.'

Similarly the church, to this unmystical author, is no longer *the bride* or *the body* of Christ but God's building, or rather a *familia dei*, quite in the neo-catholic manner. It is beginning to assume the place occupied by the Holy Spirit in Paul's theology, the latter doctrine having become liable to abuse as well as proving too profound for later generations. As in books like the Apocalypse, Jude, and 2 Peter, the Spirit in the pastorals is essentially prophetic;[1] as a means of union between the individual and Jesus, it is almost if not entirely ignored. The exceptions—and they are apparent or partial exceptions—are Tit. 3 5 *f.* 2 Tim. 1 14; even the personal relation of the believer to Jesus is not cardinal (2 Tim. 1 12 2 11 *f.*).

8. The 'faithful sayings.'

These and other items of the creed, now rapidly crystallising in Rome and Asia Minor, are conveyed partly in hymnal fragments[2] which, like those in the Apocalypse of John, sprang from the cultus of the churches; partly in the shape of aphorisms such as the terse and weighty axioms called the five 'faithful sayings' (cp Ps. 111 7 *f.*). These are like proverbs; they mark a comparatively advanced stage of experience, expressing in concentrated form the outcome of prolonged reflection.

(i.) 2 Tim. 2 11-13*a*.—Here the 'faithful saying' (πιστὸς λόγος)[3] resembles a fragment of some primitive hymn or confession, if it is not—like the rhythmical snatches (cp also Rev. 21 5 22 6, λόγοι πιστοί) in the Apocalypse—an outburst of the Spirit-raptures in the early church (cp Weinel, *Die Wirk. des Geistes*, 80 *f.* [1899]). (ii.) Tit. 3 8.—As the phrase implies a condensed and pregnant statement, it seems better in Tit. 3 8 to find its contents in *v.* 7 rather than in 4-7, which it is sometimes supposed (*e.g.*, by von Soden, Bernard, Weiss) to recapitulate. (iii.) 1 Tim. 1 15.—Here the phrase not merely is expanded by the non-Pauline addition[4] 'and worthy of all acceptation' (καὶ πάσης ἀποδοχῆς ἄξιος; as in 4 9), but also precedes its contents which are in this instance introduced by 'that' (ὅτι). (iv.) 1 Tim. 3 1—The use of the phrase in this verse, which of course refers back to 2 15 ('saved in child-bearing'; Chrysost. Erasm. etc.)—a wife's salvation being worked out in her own sphere of motherhood (despite the associations of Jewish tradition), not in ecclesiastical position—is remarkable for the variant (accepted by Zahn. *Einl.* 1 482) 'human' (ἀνθρώπινος)[5] in D*g (Ambrosiast. Sedul.). In 1 15 as here, 'save' (σώζειν) has an indirect eschatological reference. (v.) 1 Tim. 4 9.—In this verse (which Bois and

[1] Sub-Pauline idea (Heb. 8 6, etc.). In *Test. Dan.* 6, the angel of peace is the mediator between God and man.

[2] The heaping up of predicates, especially in the negative, recalls earlier attempts by Jewish thinkers (*e.g.*, Philo and Josephus) to define God semi-philosophically, as a reaction from the earlier realism and its love of theophanies. Passages like 1 Tim. 1 17 6 16 mark the sub-Pauline transition from this to the later efforts of the Greek spirit, as in the 'Preaching of Peter' and Aristides. The pastoral 'Trinity' corresponds, however, to the apocalyptic (*e.g.*, Rev. 1 4 Lk. 9 26, etc.)—*i.e.*, God, Jesus, and the angels (elect); while Christ's appearing (1 Tim. 6 14 *f.*) is stated in Pauline terms of subordination, and with the substitution of epiphany (ἐπιφάνεια) for the Pauline parousia (παρουσία).

[3] The pastorals, like Ephesians, are absorbed in an un-Pauline devotion to the church which ignores the local churches. This trait, absent even from Ignatius, significantly illustrates their authorship and real aim as tracts for the officers of the Catholic church. Timothy and Titus are portrayed as receiving instructions and ideals which were to control the contemporary teachers and other office-bearers of the author's age.

[4] This un-Pauline use of ὑγιαίνειν in διδασκαλία ὑγιαίνουσα ('sound doctrine') is anticipated in the Philonic phrases 'sound learning' (ὑγιαίνουσα μάθησις), and 'sound words' (οἱ ὑγιαίνοντες λόγοι); it tends occasionally to become almost equivalent to 'rational,' or 'sane.'

[5] Paul could have written Tit. 2 11 14; but he would have had something to say also about peace with God and reconciliation. He 'could no doubt have said all this' (*i.e.*, Tit. 3 4-7) also, but 'probably he would have said it otherwise, and not all at a time.' Practically it is the use of such stereotyped and almost formal language which makes it reasonable to say that 'St. Paul was inspired, but the writer of these epistles is sometimes only orthodox' (Denney, *The Death of Christ*, 1902, p. 203).

[1] In 1 Tim. 1 18 4 14, where a symbol is trembling into a sacrament (cp Acts 20 28, not 13 1-3 which denotes a commission for some special service), divine inspiration prompts the Christian prophets, of whom Paul is one, to select men for office in the church, and to confer upon them a supernatural charism (χάρισμα) by means of the rite of imposition of hands (see HANDS, LAYING ON OF, and SPIRITUAL GIFTS, also MINISTRY, § 37, *b*, *c*). The idea of such a special rite, even in the form of 2 Tim. 1 6 (1 Thess. 5 19 *f.*), could hardly have come from the man who wrote 1 Cor. 12 4 (diversities of gifts), 11 (dividing to every man), and represents the water-mark of later catholicism; the semi-official tinge lent to a primitive ceremony is palpable (see Gunkel's *Wirkungen des heilig. Geistes*,(2) 7 [1899], and especially Weinel's *Wirk. des Geistes und der Geister*, 140-142, 216-218 [1899], with the conveyancing of influence through physical contact as traced by Volz in *ZATW* 21 93 *f.* [1901]). The other function of the Spirit in the prophets—*i.e.*, prediction of woes and perils (1 Tim. 4 1 *f.* 2 Tim. 3 1 *f.*)—is naturally referred by the sub-apostolic age (Acts 20 29 *f.* Clem. Rom. 44 1 Jude 17 *f.* 2 Pet. 2 1) to the apostles. *They* foresaw what their successors suffer. Hence the pseudonymous pastoral epistles credit Paul with anticipations of the errors current in their own age.

[2] In 1 Tim. 3 16 the statement of the resurrection ('justified in the spirit,' ἐδικαιώθη ἐν πνεύματι) is an un-Pauline development of Rom. 1 4 (cp Iren. ii. 32 3 *f.*) after 1 Pet. 3 18 4 6 and Jn. 16 10, as that of the incarnation is un-Pauline and distinctly Johannine (1 Jn. 3 5 8, cp 1 Pet. 1 20); 'seen by angels' is a sub-Pauline development (Eph. 3 10 1 Pet. 1 12 3 18 *f.*), 'world' (κόσμος) appears to have its sub-Pauline emphasis of 'evil,' and 'was taken up in glory' (ἀνελήμφθη ἐν δόξῃ), if an allusion to the Ascension, is thoroughly un-Pauline. On the Messiah as the copestone of this new temple of Truth, see Briggs, *Messiah of Apostles*, 228-232 [1895].

[3] The reference is neither to *v.* 8 (Weiss) nor to what immediately precedes (Chrysost.), but to 11*b*-13*a* which, like Tit. 3 8 and 1 Tim. 4 9, looks out directly upon the future and final hope of the Christian disciple. 13*b* is probably an explanatory comment; but there is no need to regard 13 (with Ewald, Hesse, Hilg.) as a gloss or interpolation.

[4] Cp En. 9 41, 'the paths of righteousness are worthy of acceptation.'

[5] So r (*humanus*), 1 15.

Baljon delete) the contents of the 'saying' (λόγος) might be either *v.* 8 (Chrysost. Weizs. Hilg. Weiss, von Soden, Horton) or *v.* 10 (Bengel, Schleierm. Holtzm., cp 'for' [γάρ] and ἀγών. 2 Tim. 2 11). It is noticeable that of these *sententiæ* (i.) alone is in thought and style somewhat parallel to Paul,[1] who never associates 'heirship' or 'hope' (as Tit. 3 7 *f.*) with 'eternal life' (ζωὴ αἰώνιος). The colouring of (iii.), as of Tit. 3 5 (2 Tim. 1 10 1 Tim. 2 4[2] 6 13 *f.* Tit. 1 1 *f.* 16) is Johannine, whilst (iv.) contains the pastoral triad of *faith, love, and soberness*, and the ἅπ. λεγ. *childbearing*, which is besides an idea generally strange to Paul's mode of thought (particularly if childbirth is considered as a means of salvation). In (v.) characteristically un-Pauline terms abound (*e.g.*, 'bodily' [σωματικός], 'bodily exercise' [γυμνασία], profitable' [ὠφέλιμος], *v.* 7 *f.*; σωτήρ of God, *v.* 10). The 'faithful sayings,' therefore, not merely are characteristic of the pastorals, but betray an essentially un-Pauline conception of the *regula fidei*.[3]

This difference in ground-work is endorsed by the difference in style and diction between Paul and the author of the pastorals, an argument which forms a cumulative and almost final proof of the sub-Pauline origin of the epistles.

9. Style and diction.

Out of the 176 hapax legomena, a proportion two or three times as great as in the Pauline epistles, nearly 80 are in LXX and were therefore consciously neglected by Paul. Favourite Pauline phrases and words are totally wanting (*e.g.*, 'unjust' [ἄδικος], 'uncleanness' [ἀκαθαρσία], 'adoption' [υἱοθεσία], 'our Father' [πατὴρ ἡμῶν], 'covenant' [διαθήκη], 'reveal' [ἀποκαλύπτειν], 'free' [ἐλεύθερος] and compounds, 'be operative' [ἐνεργεῖν], 'perform' [κατεργάζεσθαι], 'boast' [καυχᾶσθαι], 'folly' [μωρία], 'tradition' [παραδοσις], 'persuade' [πειθειν], 'abound' [περισσεύειν], 'do' [πράσσειν, = ποιεῖν, in past.], 'perfect' [τέλειος], 'be gracious' [χαρίζεσθαι], 'think' [φρονεῖν], with 'ordinance' [δικαίωμα], 'greater' (μείζων], 'small' [μικρός], 'body' [σῶμα], 'good' [χρηστός], etc.; also particles like 'then' [ἄρα], 'wherefore' [διό], 'because' [διότι], 'then' [ἔπειτα], 'still' [ἔτι], 'behold' [ἴδε, ἰδού], etc., etc., prepositions like 'with' [σύν = μετά of pastorals], 'instead of' [ἀντί], 'until' [ἄχρι], 'before' [ἔμπροσθεν], 'beyond' [παρά, acc.]). Many fresh terms are coined, new compounds and Latinisms are introduced, whole families of words appear for the first time (cp those in ά privative, διδασκ-, οἰκο-, σωφρ-, φιλο-, etc.), and others are used with unwonted frequency (*e.g.*, κάλ-). The extent and significance of this change in vocabulary cannot adequately be explained even when one assigns the fullest possible weight to such factors as change of amanuensis, situation, or topic, lapse of time, literary fertility, or senile weakness; for the wider evidence of syntax and style, to be felt even through a translation, comes in to verify the impression already made by the vocabulary. Particularly where the writer is most himself and least dependent on previous letters (as in 1 Tim.), the idiosyncrasies of his composition appear, neither accidental nor trivial by any means. The comparative absence of rugged fervour, the smoother flow, the heaping up of words, all point to another sign-manual than that of Paul. In short, the relative proportions of likeness and unlikeness (especially to Romans and Philippians) between the style of Paul and the style of these three letters, are explicable only upon the hypothesis that the writer of the pastorals modelled his diction in part upon that of his master, but not slavishly—certainly not to the prejudice of his own originality and cast of thought. These proportions are precisely what we should expect in such a literary relationship. Upon any other hypothesis they do not seem credible or reasonable. Questions of style are proverbially delicate, but the linguistic data of the pastorals and the Pauline epistles may be said to resemble those of the Apocalypse and the Fourth Gospel; both ratify the conclusion that we have to do with kinship, not identity, of authorship.[4]

[1] Yet 'deny' (ἀρνεῖσθαι) is non-Pauline, and the stanza reads like a popular version of Paul's own words, adapted to the requirements of a martyr-period. See Denney, 202.

[2] The knowledge of God or of the truth = salvation or eternal life (Jn. 17 2 *f.* 17); cp Jn. 17 3 with 1 Tim. 2 5, the same combination of monotheism as against polytheism, and of Christ's unique and sufficient position as against Judaism or Gnosticism, besides ('the *man* Christ Jesus') a Johannine protest against the Gnostic or Docetic tendency to resolve Christ into a phantom of abstract spirit. On the Christology of the epistles (1 Tim. 3 16), see A. Klöpper in *ZWT* (1902) 339-361.

[3] No possible change of circumstances could make Paul oblivious (through three separate letters) of God's fatherhood, of the believing man's union with Jesus, of the power and witness of the Spirit, or of reconciliation. They might be taken for granted? But surely in enforcing the ethical requirements of the pastorals, Paul would never have demanded the blossom without urgently pressing the need of these spiritual facts as its root!

[4] There is no ground for the idea that the prosaic tone of the pastorals is due to their preoccupation with the practical steps of organisation, whilst in Paul's earlier letters he had been mainly employed in sketching the ideal of the church. A letter like 1 Cor., to say nothing of passages in the other letters, is enough to refute this explanation and to show how Paul would have dealt with the problems of organisation and church order, had these met him in an acute form. It would have been different from the method of this Paulinist, for Paul ever came down upon ethical tasks from a spiritual height.

Still further proof in corroboration of their un-Pauline origin flows in from the impossibility of placing the epistles within Paul's lifetime. With practical unanimity[1] defenders[2] of the traditional hypothesis abandon all attempts to fix them previous to Paul's Roman imprisonment; but their conjecture of a release, followed by a further extension of activity and a second imprisonment, is quite gratuitous and hardly furnishes a more tenable ground for the pastorals. It is not indeed bound up with the acceptance of their Pauline authorship; the two positions are independent and may be held separately. But even apart from the evidence of the pastorals (which never mention Spain, nor allude to so momentous a tour in the Western Mediterranean), the evidence for this second imprisonment must be pronounced inadequate (CHRONOLOGY, § 79 *f.*, PAUL, § 31), resting mainly on a vague rumour (λόγος ἔχει) reported by Eusebius, and the allusion in the Muratorian Canon (possibly derived from apocryphal *Acta*) which is simply an expansion of Rom. 15 24 28—the devout and imaginative fantasy of later tradition being convinced that because Paul proposed a visit to Spain, he must have carried it out. No such tradition lingered in Spain itself, whilst the express statement of Acts 20 25 38 and the significant silence of Clemens Romanus imply that the tradition nearest to Paul's life knew of no return to Asia Minor. The very passage in Clemens Romanus (5), which has been supposed to refer to this western journey, tells against it. Charged with rhetorical feeling, as Baur pointed out, it narrates (like Rom. 15 19) the sweep of Paul's career from Jerusalem to Rome: 'after teaching righteousness to the whole world, and reaching the limit of the West, and bearing testimony before the authorities, so he left the world.' Paul's sun had ended its course (Acts 13 47). Clement is speaking from the standpoint of his Eastern readers who would naturally take 'the limit of the west' (τὸ τέρμα τῆς δύσεως) as the Imperial capital (cp 'east' [ἀνατολῆς] and 'west' [δύσις] of Syria and Rome in Ignat. *Rom.* 2), and incidentally clinches the proof by adding that the Neronic martyrs of 64 were 'gathered unto Paul and Peter,' implying that the latter had already died. Were the 'earlier' chronology adopted, which brings Paul to Rome early in the sixties if not even earlier, space would of course be won before 64 for the two or three years' interval required by the traditional hypothesis of the 'pastorals' (CHRONOLOGY, §§ 64-66). Otherwise no time is left, and it is almost incredible that the 'pastorals,' if written after 64, should breathe no hint of the shock produced upon the Christian consciousness of the age, especially at Rome, by Nero's massacre which outraged even the Roman conscience. But even chronological resetting only makes the hypothesis possible; its acceptance or rejection rests on other grounds, and—to put it mildly—these do not seem at any point secure.

10. The second imprisonment.

The genesis of the pastorals is therefore sub-Pauline. To account for the Pauline, or presumably Pauline element, including not merely phrases and conceptions such as could be gathered from the extant letters of the apostle or from tradition, but also private details and personal matters affecting about sixteen new figures (some of whom are not mere names)—recourse must be had to theories of compilation, whose common feature is the presupposition that the author was in possession of genuine *reliquiæ Paulinæ*. No doubt a pseudonymous writer would endeavour to stamp his figures and scenery upon the reader's mind by means of circumstantial

11. Genesis of pastorals.

[1] Bartlet, Bowen (*Dates of Pastoral Letters*, 1900), and Lisco (*Vincula Sanctorum*, 1900) are the chief exceptions recently.

[2] Especially Spitta in *Zur Gesch. und Litt. des Urchrist.* 1 2-108; also Lightfoot (*Biblical Essays*, 215-233), Zahn (*Einl.* 1 435 *f.*), Steinmetz (*Die zweite röm. Gefang. des Apostels Paulus*, 1897), C. H. Turner (Hastings, *DB* 1 421, etc.), and Frey (*die zweite röm. Gefang. und das Todesjahr des Apostels Paulus*, 1900).

details, especially when (as in this case) the authentic letters would suggest the introduction of a certain quantum of personal matter—though in the sub-Pauline letters (Eph., Heb., 1 Pet.) this quantum is noticeably small. But, while it is conceivable that this may be sufficient to account for 1 Tim.,[1] it fails to afford an adequate rationale for 2 Tim. The latter is flooded with items which by no means fall under the category of romantic ornament or literary *vraisemblance*, and lift the letters quite above the level of later Pauline romances.

Even when such passages do not part from their context, they suggest to a critical inquirer the advisability of admitting that they are based upon authentic tradition and that they reproduce, with more or less freedom, information still accessible to the immediately sub-Pauline generation. It may be allowed, still further, that genuine notes have been incorporated, although these cannot any longer be deciphered. But the advocates of compilation attempt the subtler task of actually separating original notes from the strata in which they lie embedded,[2] upon the hypothesis that, whilst the author's direct aim was to instruct and move the church of his own day and not to preserve literary relics, he was able to use certain Pauline notes in the composition of 2 Tim. at least and even Titus. The preservation of such letters is far from incredible.[3] Paul was the first 'man of letters' in early Christianity, and the extant canonical collection represents only a part of his actual correspondence. In the nature of things, private notes would be more likely to remain overlooked than others, unless, like the letter of recommendation to Phœbe (Rom. 16 1-20), they were attached by late editors to some larger epistle.

In addition to this, the pastorals have suffered accretion as church documents, and thus three stages of their composition must be distinguished: (i.) the primitive notes from Paul's lifetime, (ii.) the incorporation of these by the author of the pastorals in his epistles, substantially composed about forty years after Paul's death, and (iii.) glosses added to these epistles by subsequent copyists to render them more suitable than ever for the needs of the second century. The last-named process naturally ceased by the time that the letters passed into the canon.

Whether the letters are substantially Pauline and only interpolated by some editor,[4] or whether—as is highly probable, in the case of 1 Tim. at any rate—the Pauline element, such as it is, has been submerged in later work, cannot be decided till each letter has been separately examined upon the principles of literary morphology. As the amount of presumably authentic material is obviously largest in 2 Tim. and least in 1 Tim., it will be advisable to discuss the epistles in that provisional order.

12. 2 Tim.: analysis.

Second Timothy.—Although the address of 2 Tim. (1 1 *f.*) is fairly[5] Pauline, the strange emphasis on the fact and purpose or standard of Paul's apostolate ('according to the promise' [κατ' ἐπαγγελίαν]) in a letter to one who could hardly have doubted it, at once reveals the real genius of the writing and corroborates the general evidence afforded by all three epistles, especially by 1 Tim. and Titus. They are not private letters at all, not even semi-private, and the very form of a private letter is not strictly preserved. They resemble rather 'pastorals' in the modern sense of the term, and find their real audience among people (primarily teachers and officials, it may be)[1] inclined to doubt the validity and misunderstand or misapply the tenets of the Pauline gospel. As even Liddon admits (*Explan. Analysis of 1 Tim.*, 1897, *ad loc.*), of Paul's apostolic authority 'Timothy did not require to be reminded; St. Paul has other readers of the epistle—perhaps false teachers[2]—in view.' Behind 1 3*c*-6*a* lies a tradition of Timothy's temporary absence (Phil. 2 19 *f.*) from Paul during his last captivity; but neither here nor elsewhere is it feasible in 1 3-14 to disentangle any written source. On the other hand, 1 15-18 is perhaps a displaced (after 4 10 M'Giffert, 4 13 Knoke),[3] and at any rate a genuine, fragment, probably written from Paul's Roman captivity. So most editors and critics (Lemme,[4] Hesse,[5] and Krenkel[6] omitting rather needlessly 15*b* and 18*a*). Again, 2 *f.* hardly seems homogeneous[7] (cp 2 16 3 13 with 3 9); 2 2 seems a gloss (om. Hesse, Hilg. *ZWT*, 1897, pp. 1-86); 2 14 *f.* is awkwardly introduced, and the thoroughly un-Pauline passage 3 1-9 may well be a later insertion, due to the process of accretion. 3 10-12, however, is an interpolated genuine fragment; its isolated position and contents mark it off from the surrounding context. Furthermore, the bulk, if not the whole, of 4 (6) 9[8]-22 is generally allowed to have come directly from Paul's own hand (9-18*a*, except 'having loved this present world' [ἀγαπήσας τὸν νῦν αἰῶνα] 10 11*b*, Bahnsen;[9] 9-15 19-22, Ewald;[10] 9-18, Immer;[11] 9-21, Pfleid.). But it is not homogeneous; evidently 11*a* and 21*b*, like 6-8 and 9-15, reflect different situations in Paul's life, and the whole passage offers an admirable proof of the composite character of even the directly Pauline strata in the pastoral epistles. Following the various dates and moods, one can detect approximately in 1 15-18 4 6-12 16-19 a note (or part of a note) written after Philippians; the situation has become more grim, and Paul pines in loneliness for his younger ally. Again, 4 13-15 21-22*a* go back[12] to a still earlier period, when

[1] 1 Tim. 1 3 *f.* might be developed from the hint in Philem. 22 (the Asiatic *locus* being shown in the failure to use the companion allusion in Phil. 2 24 to a return visit to Macedonia). The personal matter here is principally meant to furnish a suitable setting for an epistle dealing with general questions of church life and work in the Asiatic provinces, and reflecting that cardinal importance of Ephesus as a centre of early Christianity to which Lisco has rightly but extravagantly called attention (*Roma Peregrina*, 1901). Cp Harnack, *Ausbreitung*, 333 462 482.

[2] Perhaps 2 Pet. also contains material worked up from earlier sources; certainly it has incorporated parts of Jude. And the canonical 2 Cor. is a compilation of two separate letters in reverse order. But even were the pastorals, as compilations, without any analogy in the NT literature (cp, further, JAMES [EPISTLE], § 5), this would not of itself discredit the analytic hypothesis. The pastorals present quite unique features, and it is only reasonable that the complexity of their structure should demand somewhat unique and exceptional methods of treatment.

[3] *E.g.*, the correspondence of Cicero and Atticus, the letters of King Agrippa II. (Josephus), etc. See Peters, *Der Brief in der römischen Litteratur* (1901), 27 *f.* 78 *f.*, and Wehofer, 'Untersuch. zur altchristliche Epistolographie' (*SWAW: phil.-hist. Klasse*, 143, 1901).

[4] Ménégoz, for example (*Le Péché et la Rédemption*, 5 *f.*), treats them as authentic, but supposes that copyists under the direction of bishops subsequently added glosses; these, however, affected only questions of discipline and order, leaving the genuinely Pauline spirit unimpaired.

[5] The insertion of 'mercy' between 'grace' and 'peace' (so 2 Jn. 3) is un-Pauline. Deleting it among other phrases Hausrath (*Neutest. Zeitgeschichte*, ET, 1895, 4 160-163) finds a genuine letter to Timothy in 1 1 *f.* 15-18 4 9-18, Sabatier in 1 1-18 4 6-22.

[1] 'Les communautés vaudront ce que valent leurs conducteurs; voila l'idée générale qui se dégage de ses instructions' (J. Réville).

[2] Cp *Asc. Is.* 3 20 *f.* (before 100 A.D.) for the contemporary feeling that an apostasy would precede the latter days, when the disciples of Jesus would desert 'the prophecy of his twelve apostles and their faith (cp 1 Tim. 1 19, etc.) and love and purity (1 Tim. 4 19), and there shall be many sects, etc.' (τὴν προφητείαν τῶν δώδεκα ἀποστόλων αὐτοῦ καὶ τὴν πίστιν [cp 1 Tim. 1 19, etc.] καὶ τὴν ἀγάπην αὐτῶν, καὶ τὴν ἁγνείαν αὐτῶν [1 Tim. 4 12] καὶ ἔσονται αἱρέσεις πολλαί κ.τ.λ.).

[11] *Theologie des NT*, 399 (1877).

[12] These 'commissions and cautions' at least are 'unlike a dying man; the writer is in a hurry for Timothy to come simply because he is old and lonely,' not because he fears his friend will be too

Paul had left Troas on some journey; 4 20 (cp Acts 21 29) seems to belong to Acts 18 18 *f.*, though the historicity of Acts 21 29 is not above suspicion (cp ACTS, § 11, TROPHIMUS; with J. Weiss, *Ueber die Absicht u. d. literar. Charakter der Ap.-gesch.* 39 *f.* [1897]).

A dual analysis of 2 Tim. has been carried through by several critics from Credner onwards. Hesse, *e.g.* (pp. 170 *f.*), regards it as the compilation of a genuine brief letter of recall (1 3*c*-4 16 *f.* 18*bc* 4 9-22*a*) with a later pseudonymous letter (1 1-3*b* 5-10 2 3-8*a* 14-26 3 1-8 13*b*-17 4 1-5). Lemme's reconstruction of the genuine letter underlying 2 Tim. is even more intricate (see O. Holtzmann's critique, *ZWT*, 1883, pp. 45-72) and less convincing (= 1 1-9 except 'pity' [ἔλεος] 2 3*b* 6*b*, 'and a sound mind' [καὶ σωφρονισμοῦ] 7, 'in Christ Jesus before the world began' [ἐν . . . αἰωνίων] 9, 10, except 'but is now made manifest by the appearing' [φανερωθεῖσαν, . . . ἐπιφανείας], 11 except 'and a teacher' [καὶ διδάσκαλος], 12 except 'against that day' [εἰς . . . ἡμέραν], 14 except 'that good thing which was committed' [τὴν . . . φύλ.] 15*a* 16 *f.* 18*bc* 2 1 3-5 8*a* 9 *f.*, except 'with eternal glory' [μετὰ δόξης αἰωνίου], 4 6 *ff.* except ἐν ἐκ. τ. ἡ., 9-22), while Hilgenfeld's analysis of the epistle into two sub-Pauline notes is quite in the air (A = 1 1 *f.*, except 'according to the promise of life which is in Christ Jesus' [κατ' . . . Ἰησοῦ], 3*a* 5-10, except 'before the world began; but is now made manifest by the appearing of our Saviour Jesus Christ, who hath abolished death and hath brought life and immortality to light' [πρὸ χρόνων . . . ἀφθαρσίαν], 11 12*a* 16-18*a* 2 1 3-8*a* 9-12 19-26 3 1-4 10-12 14 *f.* 4 1 *f.* 6-8 19-22; B = 1 1*b* 3*b*-4 9*c*-10 12*b*-15 18*b* 2 2 8*b* 13-18 3 5-9 13 16 *f.* 4 3-5 9-18). More is to be said for M'Giffert's hypothesis that the epistle is a redacted version of one written by Paul towards the close of his Roman imprisonment (1 1-12 2 1-13 4 1 *f.* 5-8 16-19 21*b* 10 1 15-18) (so Clemen for 1 15-18; from Rome 61 A.D.), whilst 2 Tim. 4 9 11-18 20-21*a* represents an earlier note written from Macedonia before 2 Cor. which was composed (1 1) after Timothy had obeyed his summons. Similarly Bacon places 4 9 11-18 20-21*a* 22*b* in the period immediately previous to 2 Cor. 2 12 *f.*, when Paul was in Macedonia, whilst von Soden takes 1 15-18 4 9-19 21*b* 22 as a note written after Philippians from Paul's Roman captivity. Hitzig had already found a letter of Paul written about 58 A.D. from Cæsarea in 1 15 4 13-16 20-22*a* (so Clemen: 4 9-18, about 60 A.D. ?), and another letter written from Rome about 63 A.D. in 4 6-12 19 1 16-18 4 22*b*; whilst Bartlet recently has distinguished (in 4 9-13 21-22*a*) a note written between Ephesians and Philippians, the rest of 2 Tim. being the swan-song of the apostle. Less probably Clemen puts 4 19-21 into 57 A.D. (from Jerusalem, previous to his imprisonment), dating the epistle as a whole slightly earlier than Titus (*circa* 100 A.D.), which again preceded 1 Tim. (100-110 A.D. Asia Minor) and the author's interpolations in 2 Tim. (1 13 *f.* 2 14-26 4 1-8) and Titus (1 7-11 3 1-11).

13. Titus: analysis.

Titus.—The attempts to find in Tit. 1 1-4 a genuine address interpolated by some redactor are not convincing. But, even when the epistle as a whole is taken as sub-Pauline, 1 7-9 certainly appears a further gloss (so O. Ritschl, *TLZ*, '85, 609; Knoke; Harnack, *Chron.* 710 *f.*; Clemen, and M'Giffert). The sudden transition from presbyters to episcopi, and the general contents of the passage, mark it off as the insertion of some later editor who was interested in promoting the monarchical episcopate. Hesse and Clemen carry the gloss on to the end of 11; but, although 10 connects with 9 (which partly explains the insertion of the gloss at this point), 12 would be abrupt after 6, for κακὰ θ. are not an antithesis to ἀνυπ., nor 'slow bellies' (γαστέρες ἀργαί) to 'riot' (ἀσωτίας), much less 'liars' (ψεῦσται) to 'faithful' (πιστά which here = believing, not reliable or trustworthy). The passage 7-9, then, was inserted, perhaps from the margin, in the original text which ran: 'unruly, for there are many unruly' (ἀνυπότακτα. Εἰσὶν γὰρ πολλοὶ ἀνυπότακτοι, κ.τ.λ.). No man could discharge a presbyter's duties effectively, if the members of his own family were tainted with the local disease of insubordination and profligacy. 2 1-14 and 2 15-3 7 are somewhat parallel (cp 2 5 and 3 2, 2 14 and 3 1); but no analysis of the passage into a Pauline and a later source is plausible. The 'genuinely Pauline ring' of much in 3 1-7 (M'Giffert) is not very audible, though Sabatier detects genuine material in it and 3 12-15. The latter passage certainly, 3 12-13 [14] 15*b*, contains an authentic fragment, as is admitted upon almost all hands (*e.g.*, Weisse,[1] Ewald, Krenkel, Knoke, Hesse, von Soden, Clemen, M'Giffert). Hesse (pp. 150 *f.*) finds further in Titus (1 1 *f.* 4-6 12-13*a* 16 3 1-6 12 *f.* 15) a complete letter

late (G. A. Simcox, *Expos. T* 10 430-432, finding in Heb. 13 also two commendatory letters).

[1] *Philosoph. Dogmatik*, 1 146.

of Paul, written shortly after he left Crete; it has been expanded by the addition of passages which, although rising out of the original text (with the possible exception of 2), are intended as a proviso against heresy. Similarly M'Giffert regards the canonical epistle as a redacted version of some letter (1 1-6 partly, 3 1-7 12 *f.*) written to Titus before Paul reached Corinth in Acts 20 2. The alternative to these dual hypotheses is to reconstruct (with Krenkel) out of 2 Timothy and Titus three letters of Paul; (*a*) one written to Titus at Crete, perhaps from Illyricum during Paul's second journey to Corinth (Acts 20 1-3) = Tit. 3 12 2 Tim. 4 20 Tit. 3 13; (*b*) another, from his Cæsarean imprisonment, to Timothy at or near Troas = 2 Tim. 4 9-18, subsequent to Colossians and Philemon; (*c*) a third = 2 Tim. 4 19 1 16 *f.* 18*b* 4 21, written from his Roman imprisonment to Timothy at Ephesus. The Cæsarean date of Colossians, however, is untenable; and otherwise this ingenious resetting of the fragments fails to explain satisfactorily how such notes came into their present curious position.

14. 1 Tim.: analysis.

First Timothy.—In spite of its unwieldy anacoluthon (cp Rom. 1 1-7) 1 Tim. 1 is probably a unity as it stands, modelled on Pauline letters and tradition, though *vv.* 12-17[1] resemble in part something more definite. Certainly 1 3-11 and 1 18-20 hang together. After 1 1 *f.* a thanksgiving would naturally follow, in the Pauline manner; but when the thanksgiving does come (*v.* 12-17) it is occasioned not by the person addressed but by Paul himself. Even the 'therefore' (οὖν) of 2 1, resuming either 1 3-11 or 12-17 or 18-20, forms a loose transition; but it illustrates the zigzag course of the epistle rather than any phenomena of compilation. Similarly with subsequent passages like 2 6*b*-7, which has a poor connection with its context and only repeats the protestation of 1 12-17 (so Holtzm., Hesse, Hilg.), 2 9 *f.* (the odd juxtaposition of rules for prayer with a sumptuary regulation for women) 4 1-8 which would readily part from its context, and 5 which has suffered accretion towards the close. No fragment of the epistle can be referred, however, to the apostle himself with much confidence. The incidental allusions to Paul's personality (3 14 *f.* 4 13) merely betray the writer's consciousness that there was a certain awkwardness in such elaborate commissions and instructions upon the commonplace regulations of a Christian community being addressed to one who was not merely himself in mature life but *ex hypothesi* separated from his superintendent only for a short time. In such touches we feel the author's literary conscience and his tactful attempt to preserve the *vraisemblance* of the situation or to justify the existence and point of such an epistle.

As it stands, in fact, 1 Timothy is a free composition; it consists of a sub-Pauline letter which has been subsequently enlarged by interpolations, especially in chap. **6**. 6 17-21 is plainly an addition (Harn.), in thought and diction perhaps the least Pauline paragraph in all the pastorals; its contents and context are against it as an integral part of the letter. The 'antitheses' of 6 20 are not the casuistic subtleties of dialectic in the Halacha, but the tabulated passages from the OT and the gospel arranged by Marcion to prove the diversity of the two dispensations and the superiority of the later. Such arguments are dismissed as secular and verbose and pseudo-scientific. See 2 Tim. 3 16, '*every* scripture,' etc., and the significant collocation of an OT sentence and an evangelic saying in 1 Tim. 5 18. Another un-Pauline element is of course the connection between eternal life and almsgiving (*vv.* 17-19) as already between salvation and religious work or personal conduct (2 15 3 13). Hence, like Tit. 1 7-9 and some other passages in

[1] The motive of this section is to throw the glorious gospel into relief against the unworthiness and weakness of its original bearers, as in Barn. 5 9: 'he chose for the preaching of his gospel his own apostles ὄντας ὑπὲρ πᾶσαν ἁμαρτίαν ἀνομωτέρους, that he might show he had not come to call the righteous but sinners.' See Wrede, *Das Messiasgeheimnis* (1901), 107 *f.*

1 Tim. (3 1-13[1] 5 17-20?) or even 2 Tim. (2 20-26?), 6 17-21 shows the process of accretion familiar in documents bearing on church organisation and discipline.

Here again Hesse, admitting (like Schleiermacher) the irregular course of the epistle, attempts *acutius quam verius* to disentangle an original letter of commission (1 1-10 18-20 4 1-16 6 3-16 20 *f.*) containing the duties and rights of an episcopus at Ephesus. This is conjectured to have been enlarged by the addition of independent pieces bearing on the work of the episcopate: *e.g.*, 1 11-17 (justifying the apostolate to the Gentiles), arrangements for the worship (2 6*b*-7, so Hilg., and 2 9*b*-10, glosses) and the officials of the church (3 14-15*a*, a further insertion to justify the author dilating on such topics; 3 15*b*-16, to connect with 4 1 *f.*), a general mandate for bishops (5 : 5 23, however, being genuinely Pauline), and extracts (6 1-3 17-19) from a table of ethical duties. Knoke pushes the epistle much nearer Paul by his hypothesis of two letters from Paul's pen, one—an instruction (παραγγελία) written to Timothy from Corinth (1 3 *f.* 18-20 2 1-10 4 12 5 1-3 4*c*-6 11-15[2] 19-23 24 *f.*?), another—more doctrinal in character—composed in his Cæsarean imprisonment (1 12-17 3 14-16 4 1-11 13-16 2 12-15 5 7 *f.* 6 17-19 1 5-11 6 2*c*-16 20 *f.*?). These have been combined with an un-Pauline church-directory (3 1-10 12 *f.* 2 11 5 9 *f.* 16 4*a b* 17 6 1 *f.*), whilst passages like 3 11 and 5 18 are to be regarded as marginal glosses. It is not easy, however, to see adequate psychological motives for this sort of extensive compilation, and the criteria of style are by no means equal to the inferences drawn from them.

Hypothetical and contradictory as such conjectures may appear to be, however, a not inconsiderable agreement prevails even amid the most independent analyses of these epistles. All partition-theories presuppose an editorial function which certainly is unexampled in previous early Christian literature, even in Acts and the Apocalypse. But this is not an insuperable objection; and whilst it is idle to dogmatise upon the particular and original setting of verses, or at every point to distinguish precisely between redactor, author, and source, the composite nature of these epistles and (within general limits) the main strata of their contents have been substantially proved. Such analytic criticism is upon the right lines, and as a working hypothesis it is historically superior to the conjectures which attribute the writings *en bloc* to Paul or as unpromisingly set down the Pauline element to vague tradition or the inventiveness of a literary artist.

15. Order of composition. As the titles formed no part of the original autographs, the early church naturally argued from the internal evidence that 2 Tim., with its reflection of a climax and rich individual references, represented the last phase of the apostle's life, and that 1 Tim. was earlier. But the comparative study of the epistles suggests that 2 Tim. is the earliest, and 1 Tim. the latest production of the author.[3]

The relative amount of hapax legomena (46 in 2 Tim., 28 in Tit., 74 in 1 Tim.), the increasingly sub-apostolic colour of 'faith' (πίστις) and 'saviour' (σωτήρ), the diminution of freshness and intimate feeling in the allusions to Paul, the predominance of ecclesiastical interests and church organisation in Tit. and 1 Tim.,[4] the gradual shifting of emphasis from the personality to the sheer authority of the apostle, the gradual increase of severity towards errorists, evident as the epistles proceed—these and other traces form a cumulative and sufficient argument for this order of composition. When the author wrote 2 Tim. he had considerable Pauline material at his disposal. Even in the epistle to Titus, he falls back on genuine tradition, and Pauline material preponderates though to a less degree. But in 1 Tim. the situation has become more advanced; he writes more freely and less under the influence of his master, confutes errorists with greater sharpness, assigns more dictatorial powers to the officers of the church, and elaborates the various ecclesiastical canons with unprecedented care. The third epistle (1 Tim.) is thus, as Schleiermacher was the first to point out, an expansion and in some respects a repetition of the others, further from their Pauline background of reminiscences and tradition, but more characteristic of the writer himself. The superiority of 2 Tim., with its ample personal allusions and less formal tone, is quite obvious; and superiority means here priority. That it comes from the same pen as the others, need not be doubted, although in it the writer is more of an editor than an original author. The general sub-apostolic style and spirit of all three is fairly uniform and affords no adequate evidence for suspecting a plurality of writers.

16. Author. Like most of the NT writings, the pastorals have a communal origin. In them a current of the age becomes articulate, and hence the inconspicuous personality of their author[1] cannot be rightly deduced from his writings. It was an age when, as in the days of Haggai, men had to 'fetch wood and build the house,' while others had to encourage and direct their efforts. To furnish such inspiration may not have been a very heroic task, demanding writers of exceptional insight and pioneering ardour like Paul, but it was timely and serviceable; and after all 'edification' (οἰκοδομεῖν) was the criterion and aim of early Christian literature. This Paulinist had singular capacities for the labour of instructing the churches of his day. Thoroughly convinced that he had a message for it, or rather that in Paul's teaching and life lay the pattern for true doctrine and godliness, he addressed himself to the duty of curbing and stimulating his contemporaries in the spirit of his master, writing like a shrewd and experienced man of affairs who feels (unlike his contemporary, the prophet who wrote Rev. 2 *f.*) that the moral plight of the age demanded consolidation—consolidation as opposed to speculation in belief or looseness in organisation. If he lacks the authority of intuition, he at least possesses the intuition of authority. He has much in common with the unconciliatory element in Paul. Unlike the later apologists, he refuses to discuss points of disagreement or to meet objectors on their own ground, but is content with the more congenial method of insisting in a rather dictatorial fashion upon the fixed truths of the faith. In this he is a precursor of Polycarp, yet in all likelihood the majority of his opponents, perhaps even of his readers, were none the worse for being somewhat sharply reminded that the ultimate proofs of religion lay open to faith and the moral sense; there may have been an effectiveness in the resolve of this censor to assert and enlighten, not to argue. The genuine faith is to him a 'tradition' (παράδοσις) or a 'deposit' (παραθήκη),[2] involving 'testimony' (μαρτυρία), which lays a moral responsibility upon the officials of the church especially. The tone of his instructions to them reminds one often of Butler's famous *Charge to the Clergy* (1751) not to trouble about objections raised by 'men of gaiety and speculation,' but to endeavour to beget a practical sense 'of religion upon the hearts of the common people.' This task demands moral purity above all things, together with teaching ability in the higher officials. True to his master, this mentor is

---

[1] Among the qualifications of the Jewish *šĕlīăḥ ṣibbūr* (שְׁלִיחַ צִבּוּר, the man who on any given occasion offered common prayer in the synagogue) were: 'to have many children and no money . . . to be of sound age, and humble, popular, well-mannered . . . to be practised in the study of the law, the prophets, and the psalms; able to expound the allegoric meaning, traditions, and histories, etc.' (R. Jehuda, quoted by Selwyn, *Christian Prophets*, 208 *f.*).

[2] The difficulty of μανθάνουσι (*v.* 13) would certainly be eased by the adoption of the attractive conjecture λανθάνουσι (Hitzig, Naber, Baljon, Clemen).

[3] See ACTS, § 16, and MINISTRY, § 31. Besides Mangold, De Wette, Reuss (*La Bible*, 7 243 *f.* 307 *f.*), and some others, the main advocates of this order are denoted by an asterisk in the bibliography at the close of the present article. It is of course possible that the author himself rearranged the epistles in this order, having written them otherwise, as Vergil is said to have composed the various books of the *Æneid* irregularly (*e.g.*, the third before the second) and subsequently placed them.

[4] The pronounced element of 'ecclesiasticism' in 1 Tim., which in several passages is simply a manual of church order, betrays its more advanced situation. For some not insignificant details of style, see 'certain men' (τινὲς ἄνθρωποι), or 'certain' (τινές) [7 times in 1 Tim., never in others], 'faith' (πίστις) in objective sense (4 times in 1 Tim., once in Tit. 1 4), 'saviour' (σωτήρ) of God alone in 1 Tim. (in the second-century piety 'no one could any longer be a God who was not also a sōtēr,' Harn., *Dogmeng.*, ET, 1 118); cp also 2 Tim. 2 17-20 as preceding 1 Tim. 1 20, and the heightening scale of 2 Tim. 2 23 Tit. 3 9 1 Tim. 1 4, of 2 Tim. 1 11 and 1 Tim. 2 7, of 2 Tim. 3 1 and 1 Tim. 4 1 *f.*, of Tit. 1 7 and 1 Tim. 3 2.

[1] The pastorals in fact voice a tendency of popular Christianity rather than any individual writer's cast of thought; cp Wrede, *über Aufgabe und Methode der sog. NT Theologie*, 35 *f.* (1897). Authorship is here quite subordinate to function.

[2] Cp Herod. 9 45: 'Men of Athens, I leave these words with you as a trust' (ἄνδρες Ἀθηναῖοι, παραθήκην ὑμῖν τὰ ἔπεα τάδε τίθεμαι κ.τ.λ.) with 2 Tim. 1 12 *f.*, etc.

utterly indifferent to the sacerdotal heresy[1] which was already beginning to tinge unhealthily the primitive ideas of the church (MINISTRY, § 59 *a*, PRIEST, § 8). In resisting incipient Gnosticism with its attempt to Hellenise the faith into an evaporated intellectualism, the pastorals refuse to employ the tendency, which ultimately secularised the Catholic church, of Hebraising the religion of Jesus by means of a retrograde movement to ritual and priestly conceptions. Indeed the impression made by these letters is revealed in nothing so clearly as in the fact that they came to be cherished by those who more or less unconsciously were either ignoring or modifying or defying their principles under the constraining influence of the *Zeitgeist*.

Like the authors of Matthew's gospel, Barnabas, Hebrews, the Fourth Gospel and 2 Peter, the author of the pastorals belongs to the great anonymous period of early Christian literature. The religious life of the primitive church, as of ancient Israel, was 'at certain periods very intense, and at these periods the spiritual energy of the nation expressed itself almost impersonally, through men who forgot themselves and were speedily forgotten in name by others' (Dav. *Job*, lxviii.). His work, too, was pseudonymous.[2] To write under Paul's name was, for a Paulinist, quite a legitimate literary artifice; and although pseudepigrapha in the second century—that period rich in rhetorical forgeries (Jebb, *Homer*, 87)—ranged from mere fabrications to high-toned compositions, the pastorals, like 2 Peter, belong to the latter class, breathing not a crude endeavour to deceive but self-effacement and deep religious motives. Hence the oblivion in which the writer chose to work and has been allowed to remain. It was due not merely to the necessity of throwing a certain air of mystery round the situation in order to secure the circulation of letters long after their putative author's death, but to a sort of Pythagorean feeling that unselfish piety required a pupil's work to be attributed to his master—a canon of literary ethics not unfamiliar to early Christianity itself (Tertull. *adv. Marc.* 4 5). This author wrote from what he conceived to be the standpoint of Paul.[3] But it would be unjust to estimate him by the measure of the man whose spirit he endeavoured to propagate and apply in his own way. The correct standard is to be sought in the sub-Pauline literature. And if the author of the pastorals is inferior to the genius who wrote the fourth gospel, even in appreciating some of the more inward aspects of Pauline thought, he is superior in range and penetration to those who wrote Barnabas, Jude, the Ignatian epistles, the Christian section of *Ascensio Isaiæ*, and 2 Peter. The prevailing deference shown to the apostles and to Paul by contemporary and later writers[4] who disclaim all pretensions to equality with them, as well as the fact that mere literary ambition was utterly foreign to the early Christian consciousness at this period, may serve to guarantee the ethical honour of the pastorals and to corroborate the impression left by themselves that their author[5] was right in feeling himself not merely justified but obliged to sanction and support his message by his master's name. Not long before, another 'Paulinist' had composed speeches for Paul which were based on oral tradition and yet were indubitably free products of a historian who had skill and sympathy enough to give fairly faithful transcripts of the situation in question (Acts 13 16-41 17 22-31 20 18-35, etc.). It was but a step from this to the other recognised method of literary impersonation, which chose epistolary rather than historical expression to gain its religious end.

17. Pseudonymity.

18. Literature.

Since Schmidt and Schleiermacher almost a century ago suggested a sub-Pauline date for 1 Tim., a conjecture which Eichhorn amongst others speedily (1812) extended to all three epistles, there has been a remarkable continuity of criticism, starting from *F. C. Baur (*Die sogenannten Pastoralbriefe des Apostels Paulus*, 1835). For the critical work up to 1880 see *H. J. Holtzmann, *Die Pastoralbriefe kritisch und exegetisch behandelt* (1880), a monograph which is far from being superseded. Subsequent contributions in general support of Baur and Holtzmann, with modifications and adaptations, have come along three main lines:—(*a*) editions: *H. von Soden (*HC* iii. 1 155-254,(2) 1893); *Moffatt (*Histor. New Testament*,(2) 556-575 [1901]); O. Cone (*Internat. Hdbks. to NT*, vol. 3 [1901]). (*b*) monographs and essays on—(1) general criticism of epp.: Renan (*S. Paul*, xxiii.-lii., *l'église Chrétienne*, ch. 6); *Harnack (*Chronologie*, 480-485, 710-711); *Pfleiderer (*Paulinismus*, ET, 2 196-214, *Das Urchristentum*, 801-823 [1887]); *M. A. Rovers (*Nieuw-test. Letterkunde*, 1888,(2) 66-78); van Manen (OLD-CHRIST. LIT., PAUL); *Bruckner (*Die Chronol. Reihenfolge der Briefe des NT*, 277-286 [1890]); Prof. E. Y. Hincks, *JBL*, 1897, pp. 94-117, Réville (*Les origines de l'épiscopat*, 1 262 *f.*), and the NT introductions by Hilgenfeld (1875); H. J. Holtzmann(3) (272-292 [1892]); *S. Davidson,(3) 1-75 [1894]; B. W. Bacon (127-139 [1900]); Baljon, *Geschiedenis v. d. Bb. d. NV* (1901) 150-174; *Jülicher ((4) 136-156 [1901]) and Sabatier, art. 'Pastorales,' *L'ency. Sciences rel.*, 10 250 *f.* (2) textual features: Henri Bois, *JPT* (1888) 145-160 'zur Exegese der Pastoralbriefe'; *Clemen, *Einheitl. d. paul. Briefe*, 142-176 [1894]; P. Ewald, *Probabilia betr. d. Text des 1 Tim.* (1901). (*c*) Discussions on special phenomena of epp.:—(1) ecclesiastical organisation: See under MINISTRY and add (to lit. there cited) defences of conservative standpoint in Hort, *Christian Ecclesia* (1898), 189-217, and J. W. Falconer *From Apostle to Priest*, 109-146 (1900); against Kühl (*Die Gemeinde-ordnung in den Pastoralbriefen*, 1885) see Hilgenfeld (*ZWT*, 1886, pp. 456-473); and on their connection with *Apostol. Constitutions*, Harnack, *Texte und Untersuch.* ii. 549 *f.* (ii.) the errorists; Hilgenfeld (*ZWT*, 1880, pp. 448-464): Havet, *Le Christianisme et ses origines*, 4 376-380 (1884); and Bourquin, *Étude critique sur past. épîtres*, 51-64 (1890). (iii.) general setting and religious standpoint: Hatch (*EB*(9), articles 'Paul' and 'Pastorals'); *Beyschlag's *Neutest. Theol.* (ET, 1895), 2 501-517, Holtzmann's *Neutest. Theol.* 2 259-281 (1897); O. Cone (*Gospel and its Interpretations*, 327-338 [1893]); W. Mackintosh (*Nat. Hist. of Christ. Rel.* 465-490 [1894]); Weizs. *Das. Apost. Zeitälter*,(2) (ET) 2 163-165 329 *f.*; *A. C. M'Giffert, *The Apostolic Age*, 398-423 (1897); E. P. Gould, *Bibl. Theol. of NT*, 142-150 (1900), also Harnack, *Dogmengeschichte* (ET) 1 156-162 189-192 215 *f.* 223 *f.*, and Wernle, *Die Anfänge unserer Religion*, 347-368, 380 *f.* (1901).

Although the general critical position, outlined in these contributions, is unquestionable, it is unhappily not unquestioned. The traditional view survives, with more or less hesitation and a far from uniform presentment, in the editions of Kölling (1882-1887; on 1 Tim.), Weiss (-Meyer, (6)1893, also *Die Paulin. Briefe*, 16 *f.*, 604-682 [1896]), Riggenbach-Zöckler (1897), and Stellhorn (1900), and in the representative NT introductions of Weiss, Godet, Zahn, and Belser; so still most English commentators (Ellicott, Plummer, J. H. Bernard, Horton, J. P. Lilley), writers on NT introduction (Salmon, Gloag, and Adeney), and others, *e.g.*, G. G. Findlay (appendix to ET of Sabatier's *L'apôtre Paul*, 341-402 [1891], Hastings' *DB* 3 714-716), and Rams. *Church*,(5) 248 *f.*, *Expos.* 4th ser. 8 110 *f.*, etc. Add Bertrand (*Essai critique sur l'authenticité des épîtres Past.*, 1888), Ruegg (*Aus Schrift und Geschichte*, 59-108 [1898]); Roos (*Die Briefe des ap. Paulus und die Reden des Herrn Jesu*, 156-202), G. H. Gilbert's *Life of Paul*, 225-232 (1899); and G. T. Purves, *Christianity in Apostolic Age*, 170-176 (1900). Also (published since this article was written) Lock's studies in Hastings' *DB* 4 on the epistles.

J. MO.

[1] Louw, *Het ontstaan van het Priesterschaap in de Christelijke Kerk*, 32 *f.* 62 *f.* 79 *f.* 110-126 (1892).

[2] See EPISTOLARY LITERATURE, § 4; MINISTRY, 35 *d*; and, to the literature cited in *Hist. New Test.* 597 *f.*, 619-624, add W. Christ, *Philologische Studien zu Clem. Alex.* 30-39 (1900), and (for the pseud-epigrapha, mainly Gnostic, of the 2nd cent., etc.) Liechtenhan in *ZNTW*, 1902, Hefte 3-4.

[3] He is least successful in reproducing what would have been Paul's tone and temper to colleagues like Timothy and Titus. The curt, general instructions put into the apostle's mouth are often incongruous with the character of their primitive recipients as well as with the situation presupposed by the epistles in question.

[4] *E.g.*, Ignat. *Rom.* 4, 'I do not order you, as did Peter and Paul; they were apostles, I am a convict'; also *Acta Phoc.* 4, οὐκ ἀπαυτομολῶ τῆς τῶν ἀποστόλων τοῦ Θεοῦ εὐαρεστίας.

[5] His success, undoubtedly deserved, becomes all the more remarkable where failure was so easy. The Asiatic presbyter who half a century later composed the *Acts of Paul and Thekla* no doubt acted with a sincerity equal to his affection (*id se amore Pauli fecisse*), but failed to appreciate the vital elements of Paulinism and was deposed—not for using an illegitimate method so much as for employing it to promote notions which the common-sense of the church rejected as palpably alien to the faith. Pseudo-Pauline epistles ('fictæ ad hæresim Marcionis'), were widely circulated during the second century; the superiority of the pastorals to all such is a difference of degree rather than of kind.

TIN (בְּדִיל, *bĕdīl*, lit. 'that which is separated' [from precious metal], see Is. 1 25, where render 'alloy' [RVmg. Che., see 𝔊]; κασσίτερος [4 times], μόλιβ[δ]ος [twice], *stannum*), Ezek. 22 18 20 (Israel to be cast into the furnace like one of the baser metals), 27 12 (exported from Tarshish), Zech. 4 10 (material of plummet, κασσιτέρινος), Nu. 31 22 (cleansed by passing through fire).

Being a component of bronze, tin was used as a metal from a very early date (see COPPER). A ring from a tomb at Dahshūr (dated about the third dynasty) contains 8.2 per cent of tin; a vase of sixth dynasty 5.68 per cent of tin. When the unalloyed metal was first introduced cannot be ascertained with certainty. All we know is that about the first century the Greek word *κασσίτερος* designated tin, and that tin was imported from Cornwall into Italy after, if not before, the invasion of Britain by Julius Cæsar. From what Pliny says (*HN* 34 16 339), it appears that the Romans in his time did not fully realise the distinction between tin and lead; the former was called *plumbum album* or *candidum* to distinguish it from *plumbum nigrum* (lead proper).[1] The word *stannum* definitely assumed its present meaning in the fourth century. (See Jer. on Zech. 4 10).

TINKLING ORNAMENTS (עֲכָסִים), Is. 3 18 AV, RV ANKLETS (*q.v.*).

TIPHSAH (תִּפְסַח; wanting in the true 𝔊 but ραφει [B] in 1 K. 2 46 f.; θαψα [A]; *tahpīs—i.e.*, Tahpanhes [Pesh.]; *thaphsa* [Vg.]).

1. A place in the Eber-han-nahar (see EBER) mentioned as the NE. boundary of Solomon's empire (1 K. 4 24 [5 4]), corresponding to Gaza in the SW. It is generally held that Tiphsah is the ancient Thapsacus, and that Solomon's occupation of this place was connected with his commercial enterprises, Thapsacus being the great zeugma, or place of passage, of the river Euphrates alike for caravans and for invading armies.

It was there that the Ten Thousand first learned the real object of the expedition of Cyrus the Younger, and crossed the stream (Xen. *Anab.* i. 4 11). There too, Darius Codomannus crossed after the fatal battle of Issus, and Alexander after him. In the sixth century A.D. it passed out of knowledge.

The true site was identified about the same time by J. P. Peters (*Nation*, May 23, 1889) and B. Moritz (*Ber. der Berl. Akad.*, July 25, 1889) with *Ḳal'at Dibse*, a small ruin 'at the bend of the stream where it changes from a southerly to an easterly course, 8 m. below Meskene, and 6 below the ancient Barbalissus.' Among other points in which the situation of Dibse agrees with the statements of Xenophon and Strabo is the existence of a camel-ford at this very spot. There is no philological objection to this combination, but excavations still wait to be made (cp Peters, *Nippur*, 1 96 *ff.*).

At the same time, there are good reasons for testing this theory afresh. The realm of Solomon was not as extensive as a tradition based on incorrect readings of the text has represented (see SOLOMON, § 9). Tiphsaḥ and 'Azzah are most probably places on the frontier of Solomon's dominion in the Negeb. The former may come from Tappuaḥ (=Nephtoah), the latter may perhaps represent the strong city Zarephath. These points are doubtful.

2. A town in Ephraim which opposed the pretensions of Menahem, and was punished by him (2 K. 15 16 †), identified by Conder with *Kh. Tafsah*, on an old site 6 m. SW. of Shechem (*PEFMem.* 2 169). The 'Tiphsah' of MT is as much conjecture as the 'Tirzah' (*θερσα*) of 𝔊^B (*θαιρα* [A]). The right reading, as many think, is that of 𝔊^L—*viz.* TAPPUAH (*ταφωε*). So Thenius, Klostermann, Renan (*Hist.* 2 450), Köhler (*Bibl. Gesch.* 3 399), Guthe. There were at least three places called Tappuah (or Nephtoah). Whether this Tiphsah or Tappuah was really in the neighbourhood of Shechem, and not rather in the Negeb (cp 1), is one of the most recent critical problems. See *Crit. Bib.* on 2 K. 15 16.

T. K. C.

TIRAS (תִּירָס; θ[ε]ιρας [BADEL]), son of Japheth, mentioned after Gomer, Magog, Madai, Javan, Tubal, and Meshech, Gen. 10 2 (P), 1 Ch. 1 5. It is usually assumed that he must be the representative of a northern folk. The older commentators mostly think

1. A northern people?

of the Thracians (Θρᾷξ; Jos. *Ant.* i. 6 1). But after removing the Gk. nom. suffix *s*, we get a form which has no similarity to Tiras. Hence Tuch, Nöldeke (*BL* 5 519 *f.*), and W. Max Müller (*As. u. Eur.* 382 *f.*) think of the Tyrseni, who are spoken of not only as Etruscans but also as pirates on the Ægean Sea (cp TARSHISH, § 6, and note quotation from E. Meyer on the probable distinction between the Etruscan Tyrseni and the Turuša of the Egyptian inscriptions). This is certainly plausible, and has suggested (to the present writer) that after correcting תירס in *v.* 2 into תורס, the latter word should be substituted for תרשיש in *v.* 4. The order of the names in *v.* 4 seemed to favour this, and granting that 'Tarshish' is the Hebrew name for Tartessus or S. Spain, no better course seems to be open, for one cannot expect Tartessus to be inclosed between Elishah (*i.e.*, S. Italy and Sicily [Lag., Di., Kau.]), and Kittim (*i.e.*, Cyprus?). The Tyrseni, however, might naturally enough be so grouped. How easily Tiras (or Tures?) and Tarshish might be confounded is suggested by the fact that in Judith 2 23 [13] Vg. actually gives *filios Tharsis* where Vet. Lat. gives *filios Thiras et Rasis*. Cp ROSH. A better view, however, can possibly be found (see § 2).

Jensen connects Tiras with the Hittite T(a)rš = Tarzi (so Shalmaneser II.) = Tarsus (Jensen, *TLZ*, 4th Feb. 1899, col. 70), but see TARSHISH, § 6.

2. A corruption of Asshur?

The increasing evidence (see *Crit. Bib.*) that many parts of the OT, which came down to the late editor or editors in a corrupt form, have been manipulated by him in accordance with incorrect views of geography and history, compels us to consider, as we pass through the Table of Nations, what may have been the original form of each ethnic or place-name that we find there. It has already been suggested by others (see JAPHETH) that Japheth in the original legend meant either the Phœnicians or the Philistines. It may be added here that there is great reason to doubt whether either the J portions or the P portions of Gen. 10 in their original form extended their range beyond Palestine and Arabia.

It is a characteristic of P's lists (and to P *vv.* 2-4, according to the critical analysis, belong) that he in naive ignorance repeats the same name in different corrupt and independent forms. Thus 'Tiras' in *v.* 2 is ultimately the same as 'Tarshish' in *v.* 4; 'Gomer,' 'Magog,' 'Madai,' 'Javan,' and 'Togarmah' are all most probably corrupt and independent forms of 'Jeraḥmeel.' 'Tubal' (cp TABEAL), as the connection in which the name occurs in Ezek. 32 26 ought sufficiently to show, is a Palestinian or rather a N. Arabian name.[1] 'Meshech' (מֶשֶׁךְ) should be 'Cusham' (כּוּשָׁם)—*i.e.*, the N. Arabian Cush (see CUSH, 2). 'Elishah' in *v.* 4 should be 'Ishmael'; 'Kittim' probably comes from 'Reḥōbōthim'; 'Dodanim' should be Dedanim. If these emendations are in the main right—and the evidence referred to above would seem to make this a reasonable contention—it follows that 'Tiras' as well as 'Tarshish' (see TARSHISH, § 7), is most probably a corruption and distortion of the N Arabian ethnic name Ashḥur or Asshur (=Geshur). Cp GESHUR, 2.

T. K. C.

TIRATHITES (תִּרְעָתִים), 1 Ch. 2 55. See JABEZ.

TIRE. 1. שַׂהֲרֹנִים, *śahărōnīm*, Is. 3 18 Judg. 8 21 26 RV 'crescents.' See NECKLACE, 2.

2. פְּאֵר, *pĕ'ēr*, Ezek. 24 17 (AV), 23 (EV): see TURBAN, 2.

3. שֵׁשׁ, *šēš*; Ezek. 16 10 RVmg. translates '[a tire of] fine linen.' A headtire seems to be meant. See TURBAN, 2.

4. *μίτρα* Judith 10 3 16 8 (AVmg. 'mitre') Bar. 5 2 (EV 'diadem'). See DIADEM.

TIRHAKAH (תִּרְהָקָה; θαρακα [A in 2 K., B in Is.], θαρθακ [L], -ρα [B in 2 K.], -ραθα [ℵAQ* in Is.], Vg. *Tharaca*). According to Is. 37 9 = 2 K. 19 9, the Assyrian general (rab-shakeh) had heard that Tirhakah, king of Ethiopia (𝔊 of [the] Ethiopians), was coming forth to fight against the Assyrian armies occupying Judah before the siege of Jerusalem (701 B.C.) in order to assist Hezekiah.

1. Name.

This is the third king of the twenty-fifth (or Ethiopian) dynasty of Egypt (EGYPT, § 66 *b*). His name is written

[1] So in 𝔊 the distinction between *κασσίτερος* and *μόλιβος* is uncertain.

[1] 'Elam' of course should be 'Jeraḥmeel' (as probably always in OT), and most probably (if not certainly) 'Zidonians' should be 'Miṣrites.'

in Hieroglyphic signs *Ta-h-ru-ḳ*.[1] The vowels (a and u) are written quite constantly, although they appear to us unintelligible and useless. The cuneiform transcription is *Tarḳû*. Manetho gives *Tarkos* or *Tarakos*, Strabo, i. 3 21, *Tearko* (he strangely makes the king a great conqueror, who reached the pillars of Hercules; cp Megasthenes, Fragm. 20, in Strabo, 686). The biblical rendering would seem to need a transposition; *Teharḳo*, *Teharḳa* (תהרקה).

2. Date. The king seems to have been an usurper,[2] who legalised his crown afterwards by marriage with the widow of king Shabako. When the usurpation took place, can be determined with certainty (see So). Tirhakah reigned, according to a stele of the Serapeum, twenty-six complete years; according to Assyrian sources he died in 668/67;[3] consequently his accession to the throne was in 694/93 B.C. This shows at once that in the biblical account there is an impossible conjunction of facts. Either the original form of the text did not give the name of the 'king of Ethiopia' referred to—later scholars would then attempt to identify the king and insert Tirhaka-Taharko instead of Shabako who reigned in 701 (see, however, So on the improbability of Shabako's attacking the Assyrians)—or Taharko was mentioned as the Ethiopian governor of Lower Egypt, and the later recension made him a king. Otherwise, we should have to acknowledge a confusion of the events of 701 with others of the time between 693 and 676 B.C.

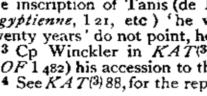
3. Assyrian data. The first expedition of the Assyrians against Egypt, in 676, was in all probability caused by such a provocation as military aid from Egypt to Palestinian rebels against Assyria. Esarhaddon mentions indeed that Ba'al, the king of Tyre, was induced to rebellion by Tarḳû. This may have occurred earlier; but 693 is, as has been said, for Tirhakah the superior chronological limit.

Tirhakah, however, could not really play the part of an aggressor in Syria. The difficulty of maintaining Egypt and keeping the nomarchs in subjection must as a rule have absorbed his whole strength. An Assyrian army penetrated into Egypt in 676 and seems to have occupied a considerable portion of it, but in 675 was annihilated.[4] In his tenth year, 671, king Esarhaddon secured the road to Egypt by an expedition against the Arabs, invaded (then, or by another army?) Egypt by way of a city in the desert called *Magdali* or Migdol (see MIGDOL), and met and defeated the forces of Taharko near a place called *Ishupri*. The Ethiopian king had finally, after losing the third battle, to withdraw from Egypt. The Assyrians marched as far as Thebes, which capitulated and was mildly dealt with. The country was divided among twenty nomarchs, descendants of Libyan generals. Some of these may have called in the Assyrians to free them from the Ethiopian yoke, and submitted to the Assyrian supremacy without resistance. Nevertheless we read of a conspiracy with Taharko against the Assyrians by the three most influential leaders (Nikû-Necho I. of Sais and Memphis, Šarludari of Tanis and Pakruru of *Pi-saptu*). Evidently, they felt too weak to resist the Ethiopians when these threatened to invade Egypt again, and therefore tried to maintain good relations with them. In point of fact Taharko invaded Egypt again in 669. Esarhaddon hurried to the rescue of his vassals, and died on the expedition. His army, nevertheless, entered Egypt, defeated Taharko's army, coming from Memphis, at Karbanit (near Canopus?), and forced him to retreat as far as Thebes. The cities Sais, Mendes, and Tanis were cruelly punished for joining the Ethiopians; prince Necho, however, when sent to Nineveh as a prisoner, obtained a pardon and his dominion. Evidently, the Assyrians needed his influence. They even gave the city of Hathribis to his son Psametik and thus furthered the rise of the next dynasty (the Saitic). Taharko, in the meantime, fortified a camp near Thebes and, while the Assyrian troops were engaged in the Delta, forced this city to surrender. At first, the prince of Thebes seems to have closed the door to the fugitive Ethiopian king. Preparing for a new invasion of northern Egypt, Tirhakah died there. His step-son Ten(wa)t-Amon (Tandamani of the Assyrian reports), son of Shabako, became king, and made the last attempt to expel the Assyrians (668/67).[1]

4. Egyptian data. On the Egyptian monuments, nothing of this warlike activity of the king can be observed. Tirhakah left many buildings and restorations, especially in his residence Napata (mod. Gebel-Barkal) and at Thebes. North of Thebes, the difficulties caused him by the nomarchs seem to have prevented him from building much; but inscriptions bearing his name have been found at Tanis, and at Memphis his name is represented at the burial of an Apis bull in his tenth and twenty-fourth year (directly before the Assyrian conquest?). Nominally, also, the two years following 668/7 seem to have been counted to him in Egypt, so at least later by Psammetichus I. At Thebes, the nomarch Mont(u)-m-ḥē't was in the time of the Assyrian invasion practically independent (he built considerably at Karnak) and does not seem to have always been faithful to his suzerain in Napata (see above).

A (rather conventionalised) portrait of Tirhakah is given elsewhere (ETHIOPIA, fig. 1, right-hand picture); the Negro blood is more strongly indicated in several other portraits; the full Negro type on the Zinjīrli-stele of Esarhaddon is therefore no caricature.

[The view expressed elsewhere (SENNACHERIB, § 5) as to the possibility of a confusion between an Assyrian and an Asshurite (N. Arabian) invasion of Judah may possibly require a reinvestigation of the meaning of מלך כוש in 2 K. 19 9 = Is. 37 9. 'Cush' may be, not Ethiopia, but a region in N. Arabia (see CUSH, § 2). If so, תרהקה (Tirhakah) will have to be admitted into the group of personal names which have (according to the new theory) been modified by redactors to suit their own limited historical knowledge. See *Crit. Bib.* on 2 K. 19 9 and other parts of 2 K.] W. M. M.



TIRHANAH (תִּרְחֲנָה; θαραμ [B], θαρχνα [A], θαρααναa [L]), a son of Caleb by his concubine Maacah (1 Ch. 2 48).

TIRIA (תִּירְיָא; om. B, θηρια [A], εθρια [L]), the name of a son of Jehallelel (1 Ch. 4 16), may have arisen from יתר in the following verse.

TIRSHATHA (תִּרְשָׁתָא; either = *taršatā*, Pers. partic. = 'feared' [Meyer, Ryssel, and most scholars], or an official title from Old Pers. *antare-kshathra*, 'royal representative in the province,' Lag. *Symmicta*, 1 60; αθαρασθας [L generally]), a title like 'Your Excellency' (Meyer), or an official title (Lag., Stade) of the Persian governor of Judah, or perhaps a corrupt form of a personal name, or of a gentilic, of Semitic origin. The article is always prefixed.

(*a*) Ezra 2 63 (*αθερσαα* [B], *-σαθα* [A], *-ασθας* [L]) = Neh. 7 65 (*ασερσαθα* [B], *αθερ.* [אA]) = 1 Esd. 5 40 (see next small type); (*b*) Neh. 7 70 (om. B, *αθαρσαθα* [א^{c.a mg.} A]); (*c*) 8 9; (*d*) 10 1 [2].

The sense in (*a*) Ezra 2 63 = Neh. 7 65 = 1 Esd. 5 40 and (*b*) Neh. 7 70 depends on the critical view adopted as to the origin of the list of 'sons of the province.' If, with Meyer, we admit it to be a list of exiles who returned

1 

2 See Maspero, *Histoire*, 3 361, on this point. The words of the inscription of Tanis (de Rougé in *Mélanges d'Archéologie Egyptienne*, 1 21, etc) 'he went to the Delta at the age of twenty years' do not point, however, to a revolution necessarily.

3 Cp Winckler in *KAT*(3) 93. Why he places (p. 87 and *AOF* 1 482) his accession to the throne in 691, does not appear.

4 See *KAT*(3) 88, for the report of the 'Babylonian Chronicles.'

1 So far after Winckler's arrangement, *KAT*(3) 90-94.

with Zerubbabel, the Tirshatha will of course be Zerubbabel; to Kosters, however, it is a list of post-exilic residents in Judah and Jerusalem, and the Tirshatha is Nehemiah.

Cp 1 Esd. 5 40 (= Ezra 2 63), where we find *ν.* [ὁ] *καὶ ατθαριας* (BA), *αταρασθας* [L], ATHARIAS, RV ATTHARIAS).

In (*c*) Neh. 8 9 = 1 Esd. 9 49 and (*d*) Neh. 10 1 [2], Nehemiah is mentioned by name as the Tirshatha, but is it certain that the text is correct? Guthe (*SBOT*) points out that 1 Esd. 9 49 (= Neh. 8 9) gives simply *καὶ εἶπεν ατταρατη* ([B], *ατθαρατης* [A], *αθαρασθας* [L], ATTHARATES)—*i.e.*, 'and the Tirshatha said,' and infers that נחמיה הוא is a gloss. Smend, however (*Listen*, 18), prefers to omit 'that is, the Tirshatha' (so 𝔊 [BℵA] in Neh.), whilst Meyer (*Entst.* 200) omits both 'Nehemiah' and 'Tirshatha.' In (*d*) Guthe (*SBOT*) and Wellhausen (*GGN*, 1895, p. 177) omit 'the Tirshatha,' because it separates the proper name from the patronymic (𝔊BℵA, but not 𝔊L, supports this). Very possibly here as well as in (*c*) both 'Nehemiah' and 'Tirshatha' are intrusive (cp Marq. *Fund.* 34). The two laymen, Nehemiah and Zedekiah, are very isolated just before the names of priestly classes (see ZEDEKIAH). Nehemiah's usual title is פֶּחָה, 'governor.' It is not certain that Nehemiah had yet returned. To this it may be replied that Nehemiah's change of title may be connected with a limitation of his jurisdiction during his second period of office to matters connected with a religious reformation. For the grounds of this hypothesis see NEHEMIAH. On the name see, further, *Crit. Bib.*

T. K. C.

TIRZAH (תִּרְצָה? 'agreeable,' § 102; θερcα [BAL]; but in Josh. 12 24 *θαρσα* [BF], *θερμα* [A], in 1 K. 14 17 *γῆν σαριρα* [A; see ZARETHAN], in 2 K. 15 14 *θαρσειλα* [B], *θερσιλα* [A], in Cant. 6 4 *εὐδοκία* [BℵA], in Targ. תרעיתא).

1. An ancient city of Mt. Ephraim (see below) which had a king of its own before the Israelitish conquest (Josh. 12 24), and was the residence of the N. Israelitish kings from Jeroboam to Omri (1 K. 14 17 15 21 16 6 8 *f.* 15 17 23). According to Klostermann's emendation of haṣ-Ṣĕrēdah in 1 K. 11 26 (and of the *σαρειρα* of 𝔊 in 1 K. 12), Jeroboam was a native not of 'Zeredah' but of Tirzah, which place he fortified while still nominally in the service of Solomon (see JEROBOAM, 1, ZARETHAN, § 2). Shortly afterwards we read (1 K. 12 24 *f.*) that on Jeroboam's return from Egypt he built a castle (*χάρακα* = כַּרְכָּא) at Sarira. Whether Klostermann is right in holding Tirzah to be the original form of the name of Jeroboam's city, will be considered later; at any rate, we may follow him in his statement that Zeredah (צְרֵדָה), or haṣ-Ṣĕrēdah, *σαρειρα*, and Tirzah are fundamentally the same. The next fact recorded of Tirzah is that, when, after a reign of seven days, Zimri saw that he could not hold Tirzah, he burned the citadel, and himself perished in the flames (1 K. 16 17 18); the usurper Omri then took up his abode in Tirzah. Even after Samaria had supplanted Tirzah as the capital, it continued to be a fortress of strategic importance. Menahem b. Gadi won Tirzah first and then Samaria, when he slew Shallum b. Jabesh and mounted the throne of Israel. From the context (on 2 K. 15 16 see TIPHSAH) Tirzah appears to have been not far from Tappuah (in Ephraim, but on the border of Manasseh). In the Book of Judges too there is one more reference in the narratives, which, if based on fact, should come first in chronological order. Nor must we omit a famous poetical reference in the ordinary text. In Cant. 6 4, as given by MT (𝔊, however, has *ὡς εὐδοκία*), we find the Shulammite compared to Tirzah. But whether a methodical criticism can accept this reading, is doubtful (see CANTICLES, § 14, and cp ROSE). We need not therefore discuss the question whether Tirzah really was as beautifully situated as the ordinary text of Cant. 6 4 seems to imply. It is enough to find out *where* this northern city lay.

There are three current identifications. (1) Robinson and Van de Velde thought of Ṭallūzā,[1] a picturesque village on a hill 2040 ft. above the sea-level, E. of Samaria, and slightly N. of Mt. Ebal. The phonetic resemblance, however, is but slight, and the description of Thersa quoted by Robinson from Brocardus ('on a high mountain, three leagues from Samaria to the E.') suits Ṭūbās (Thebez?) better than Ṭalluza. (2) The Midrash represents Tirzah as Tir'an (cp CANTICLES, § 14, note) and the Targum as Tar'itha. Hence Buhl (*Pal.* 203) suggests that Tirathana, a village close to Gerizim (Jos. *Ant.* xviii. 4 1), may be intended, and he (doubtfully) identifies this with *eṭ-Ṭīreh*, on the W. side of the plain of Makhneh. But this is not a sufficiently important site. (3) Conder (*PEFM* 2 216) suggests the village Teyāṣir, 11 m. N. of Shechem, and 12 m. E. of Samaria (see ASHER, 2). The site appears not unsuitable; but nothing can be based on the name.

But is the name Tirzah really the correct form? Is it likely to have been corrupted into Zeredah or haṣ-ṣĕrēdah? And is it the most natural name for an important fortress? Add to this that another corrupted form of the same original may be ZARETHAN (*q. v.*). The problem is to find a name out of which all these forms can have been corrupted. Such a name is בֵּית צוּר 'Beth-zur' (see col. 2405); such a name, too, is צָרְפַת, 'Zarephath.' It so happens that all the OT passages referred to above most probably, in their original form, referred to the Negeb (Cant. 6 4 of course is excluded). It will therefore be safer to pronounce in favour of Zarephath.

2. One of the five daughters of ZELOPHEHAD—the fifth (Nu. 26 33 27 1 [om. L] Josh. 17 3), or the second (𝔊BL the first), Nu. 36 11, perhaps = Zarephath.

T. K. C.

TISHBEH OF GILEAD (תשבי גלעד; єκ θєcβωn thc г. [BA], o єκ θєccєβωn thc г. [L]), 1 K. 17 1 RVmg., AV 'inhabitants of Gilead,' RV 'sojourners of Gilead.' See TISHBITE and reff.

TISHBITE (תִּשְׁבִּי;[2] θєcβ(є)ιthc;[3] *Thesbites*), *i.e.*, a native of Tishbeh, 1 K. 17 1 21 17 28 2 K. 1 3 8 9 36. See ELIJAH, § 1, and n. 1; JABESH, § 1; and especially PROPHET, § 6, and *Crit. Bib.*, where it is conjectured that Elijah and Elisha both came from Zarephath in the Negeb, then perhaps the extreme limit of the southern dominions of N. Israel. Cp THISBE.

TITHES[4] (מַעֲשֵׂר, pl. מַעַשְׂרוֹת; Δєκατη; *decima*).

1. Terms; history. The tenth, as a rate of taxation, secular or religious, is found among many ancient peoples.

See Ryssel, *PRE*(2) 17 428 *f.*, and for the Greeks, Pauly-Wissowa, *Real-Encycl.* 4 2423 *f.*; Romans, *ib.*, 2306 *ff.*; Carthaginians, Diod. Sic. 20 14; Justin, 18 7; Egyptians, Maspero, *Struggle of Nations*, 312 (spoil of war, tribute, etc., to Amon); Syrians, 1 Macc. 10 31 11 35; Sabæans, Plin. *NH* 12 63; Lydians, Herod. 1 89; Nic. Damasc. frg. 24 (*FHG* 3 371); Babylonians, Jastrow, *Religion of Babylonia and Assyria*, 668; Chinese, Legge, *Chinese Classics*, 1 119, etc.

The oldest use of the word seems to have been secular, designating a tax or tribute in kind levied by a ruler from a subject or vassal people, or from his own countrymen. The obligatory offerings to the gods were *ἀπαρχαί*, *primitiæ*, Heb. *rēšīth*, *bikkūrīm*. When these offerings came to be regarded as a tribute due to the deity as the ruler or the proprietor of the land, the name 'tithes' was applied to them also. The dedication of a tithe of the spoils of war, an early and widespread custom, may have contributed to this extension of the use of the term.

The 'tenth,' doubtless, originally roughly expressed the proportion exacted; and in later times also, for example in Sicily under Roman rule (Pauly-Wissowa, 4 2307 *ff.*), was the actual rate of taxation; but frequently the notion of tax or tribute predominated, so that the term 'tithe' might be used in cases where the

[2] König (*Exp. T* 12 383 [1901]) explains the י in the Gileadite place-name חשבי as a radical (√שבי)

[3] A om. in 1 K. 17 1, BAL om. 1 K. 21 28; 𝔊 has *θεσβ(ε)ιτης* also in 1 K. 18 27 [BAL], 29 [L] Mal. 4 4 [3 23] [BℵAQΓ].

[4] The tithe in relation to other sacred dues is discussed elsewhere (see TAXATION; see esp. §§ 9 *ff.*, to which the present article is supplementary).

rate was different—as in Moslem law the 'tithe' is sometimes $\frac{1}{20}$ or $\frac{1}{40}$—or where there was no fixed per cent. Thus in the religious sphere ἀπαρχαί and δεκάται are often synonymous: so, *e.g.*, in Dion. Halic. 1 23 *f.*, cp δεκάτευσις, *ib.* 24, for the payment of a vow of firstlings; so Philo calls the tithe which was to be paid the priests out of the Levites' tithe, ἀπαρχῆς ἀπαρχή (*De mutat. nom.* 1 607, Mangey).

Similarly in the OT: to exact a tithe from the grain-fields, vineyards, and flocks is a royal prerogative (1 S. 8 15 17). The oldest laws prescribe that the aparchæ (*rēšīth*) of the first fruits of the land shall be brought to the house of Yahwè (Ex. 34 26,[1] cp Dt. 18 4 26 2 Ezek. 44 30). The term 'tithe' was in use, however, in the northern kingdom in the eighth century for religious dues (Am. 4 4, cp Gen. 28 22, E). In Dt. the word occurs repeatedly (12 6 11 17 14 22 *ff.* 28 *f.* 26 12 *ff.*); the tithe of grain and wine and oil is to be brought to Jerusalem and—as in Amos—used for a feast; in the third year, however, a tithe is to be reserved for charity (see TAXATION, §§ 9 *f.*). Together with the tithes Dt. 12 6 11 17 names the *tĕrūmāh* (*tĕrūmath yādkā*; EV 'heave offering'; more accurately 'reserved portion'), by which it is commonly thought that the first fruits are intended (see Dillm. *in loc.*), but this is doubtful; more probably the terms are to be taken as synonymous; cp Nu. 18 24. In Ezekiel we find *rēšīth* and *tĕrūmāh* (20 40), which are assigned to the priests for their support (44 30); but no mention of tithes. There is nothing on the subject of tithing in H.

It seems probable, therefore, that the name 'tithe' was employed at some sanctuaries in the period of the kingdoms, while elsewhere other names were in use. It is not improbable, moreover, that the nature and quantity of the obligatory offerings, and the use made of them, differed at different places as well as times. When the fragmentary remains of old sacred laws were brought together with later rules (P) in one code, these various terms were treated as so many different dues, and combined in one system of religious taxation. The critic, on the other hand, sometimes falls into the hardly less serious error of assuming that all the laws lie in one serial development.

2. Use of the tithe. Until the aparchæ were offered to God, the crop might not be used by men in any way (see, *e.g.*, Lev. 23 14). The presentation was the natural occasion of a feast at the holy place. This is the use of the tithe in Dt. (12 6 14 23). The portion dedicated to the deity may at some time have been actually consumed upon the altar; or, as in the case of the voluntary *minḥāh*, a representative part may have been thus consumed; but in the rituals we possess the offering is symbolical (cp the wave sheaf and the two loaves, Lev. 23 9 *ff.* 15 *ff.*); God ceded his share to the priest (Nu. 18 11). At the feast given by the offerer the priest had a place by custom; and thus from early times the offerings of first-fruits or tithes indirectly contributed to the support of the clergy. The poor, also, shared in the feasts by a religious guest-right.

The deuteronomic reformers foresaw that the suppression of the village high-places would deprive both the country priests and the poor of the community of no small part of their living. They provided, therefore, that every third year the land-owner, instead of taking his tithe to Jerusalem, should set it aside for charity at his own home. Here, again, it is not improbable that they found a precedent in earlier custom; there are many examples, *e.g.*—among the Arabs—of sacrifices left wholly to the poor, this being a work of superior piety.

The new model of Ezekiel provides for the support of public worship, including the feasts at the great seasons, by the prince, out of the proceeds of a general tax (*tĕrūmāh*, 45 13 *ff.*) at a fixed rate. The old *rēšīth bikkūrīm* and *tĕrūmāh* are all assigned to the priests for their support (44 30). Ezekiel's programme was never put into operation, but in the Persian period the tithe seems to have been converted to the use of the temple (Mal. 3 8-10). Some such provision must have proved necessary, not only for the support of the priests but also for the maintenance of public worship.

In P all sacred dues, under whatever name, go to the support of the ministry (Nu. 18 8-20); the 'tithe' is specifically the portion of the Levites (*vv.* 21-24); of it they in turn make over a tithe to the priests (*vv.* 25-32). See NUMBERS, § 11. According to Neh. 10 37 *ff.* (Chronicler), the plan was for the Levites to collect their tithe in all the cities and villages, under the supervision of a priest, and then deliver the tithe of the tithes into the storehouse in the temple for the priests. There is complaint, however, that the tithes were not paid, so that the Levites had to support themselves (Neh. 13 10 *ff.*).

It is impossible to say whether this system was ever actually worked. It is often inferred that Neh. 10 37 *ff.* represents the practice of the Chronicler's own time; but it is quite as likely that it is one of the many *pia desideria* which he projects into his 'history as it ought to have been.' The fortunes of the Levites in these centuries are involved in dense obscurity (see LEVITES, § 7). What is certain is that at the beginning of the Christian era the tithes were collected by the priests for themselves (Jos. *Vita*, 12 15; *Ant.* xx. 8 8 9 2). This departure from the law is recognised in the Talmud: Ezra took the tithe away from the Levites because so few of them were willing to return to Palestine (*Kĕthūbōth*, 26*a*; *Yĕbāmōth*, 86*a b*; *Ḥullīn*, 131*b*, etc.).

3. Things tithed. The deuteronomic laws name grain, wine, and oil as subject to tithe (12 17, cp 14 22 Nu. 18 27); Lev. 27 30 is more general: 'all the tithe of the soil, whether of the seed of the ground or the fruit of the tree, is Yahwè's.' The general rule of the Mishna is: 'Everything that is eaten and is watched over and grows out of the ground is liable to tithe' (*M. Ma'ăsĕrōth*, 1 1). The scrupulosity of the Pharisees in matter of garden herbs—'mint, anise, and cummin'—is commented on in the NT (Mt. 23 23 Lk. 11 42); the Mishna and the Palestinian Talmud go into minute details and discussions of what should be tithed, and when, and how. The tithe of agricultural products paid to the Levites or to the priests, is called by the Jewish writers on the law 'the first tithe.'

Lev. 27 32 *f.* puts by the side of the tithe of seed crops and fruit (*vv.* 30 *f.*) a tithe of animals of the flock or herd; every tenth one, as the flock is counted, shall belong to Yahwè. The complete parallel between *vv.* 30 *f.* and 32 *f.* naturally suggests two inferences: first, that it is the increase of the year that is to be tithed (so *M. Bĕkōrōth*, 9 3 *ff.*, etc.); and, second, that the tithe of cattle, like that of the fruits of the earth, was to go to the priests. This is the view of Philo (*De praemiis sacerdot.* § 2, 2 234, Mangey; *De carit.* § 10, 2 391); so also Tob. 1 6 (cod. ℵ) and—what seems not to have been noted—Jubilees, 32 15 (on Gen. 28 22): 'all tithes of neat cattle and sheep shall be holy to God and belong to his priests, who eat them year by year before him.' On the other hand, the legal authorities unanimously take the whole passage, Lev. 27 30-33, to refer to the 'second tithe'; the animals were sacrificed by their owners as thank offerings (*tōdāh*), or as 'joyous peace offerings' (*šalmē śimḥāh*) at the feasts.[1] Modern critics generally assume that the chapter is a late supplement to the 'Priests' Code,' and that the tithe is therefore to be understood in accordance with Nu. 18 21 *ff.* But if, as is more probable, it be a supplement to a body of law which included Dt., the rabbinical interpretation is equally possible (cp *vv.* 9-15). There can be no doubt that the Mishna and Siphrē represent in this particular the practice of the first century. And it is not difficult

[1] Ex. 23 19 is brought over by a redactor from 34 26.

[1] *Siphrē*, Dt. § 63; *M. Ḥăgīgāh*, 1 4; *M. Mĕnāḥōth*, 7 5, etc. See Schürer, *GJV*(3) 2 251 n. So also Maimonides, Rashi, and the Mishna commentaries.

to conceive that the claim of the priests to all the firstlings—once the accompaniment of the tithe of corn and wine and oil (Dt. 12 6, etc.) —made it necessary to make some other provision for the sacrificial feasts; the tithe of cattle is a natural form for this provision to take. It is, therefore, not so certain as has sometimes been thought, that Lev. 27 32 *f.* is the last monstrous demand of a greedy priesthood or the fiction of an imaginative scribe.

4. Jewish system of tithing.

On the basis of the Pentateuch as a whole, the system included three tithes: the 'first tithe,' a tax of one tenth of all edible vegetable products collected by the ministry for its own support (Nu. 18 21-24); the 'second tithe' of the same products, which, together with the cattle tithe (Lev. 27 32 *f.*), furnished a feast for the owner and his guests at Jerusalem (Dt. 14 22-27); and the 'poor tithe,' set apart every third year for charity (Dt. 14 28 *f.* 26 12). The last, in the original intention of the law probably only a particular use of the tithe every third year, was in later times made, at least by some, a 'third tithe' falling twice in every seven years, in the third and sixth years of the Sabbatical cycle (Tobit, 1 7 *f.*; Jos. *Ant.* iv. 8 22; Trg. Jer. Dt. 26 12 *f.*); see Geiger, *Urschrift*, 176 *ff.*; Schürer, *GJV*(3) 2 252.

2. *τίτλος*, Jn. 19 19 *f.* See CROSS, § 4.

TITUS (ΤΙΤΟϹ: on the accentuation see Winer-Schmiedel *Gramm.* Th. i., § 6 2) is the name of a rather enigmatic minor figure in the apostolic age, who is known almost entirely from Paul's allusions to him (in Gal. and 2 Cor.) as a friend and trusty lieutenant. He is not associated with Paul in the address of any extant epistle, and nothing is known of his birthplace, age, or nationality, except that he was a pagan by birth (Ἕλλην ὤν) and apparently a native of Asia Minor (cp Gal. 2 1-5).

1. At Jerusalem.

Later tradition (Tit. 1 4) may be correct in hinting that he was brought over to Christianity by Paul himself. At any rate he appears at an early stage of the apostle's public career (possibly in 49 A.D.; cp CHRONOLOGY, § 74, PAUL, § 16) as a private individual who accompanied Paul and Barnabas (cp Acts 15 2) at the former's request upon their visit to Jerusalem, evidently to represent the success of the Pauline gospel outside Judaism. The burning question at the conference of Jerusalem was the value and validity of Christian faith if unsupplemented by circumcision, and (as Paul had foreseen) the case of Titus inevitably came up for discussion. Whether it was made a test case or not, it led to bitter feeling between the conservative party and their challengers. Paul and Barnabas, however, stood their ground against the orthodox centre and repudiated any compromise involving their companion; 'not even Titus,' says Paul triumphantly, 'was obliged to get circumcised'—much less (as the Judaising Christians appear to have insisted) Gentile Christians in general, who were not (like Titus) in direct daily touch with a circumcised Christian. Nothing is said of what Titus himself thought and felt. His attitude is passive. The natural inference, however, is that he left himself in Paul's hands, sharing, or at least sympathising, with that 'inward impulse' of Paul's spiritual nature, which 'went straight to the results of its principles . . . and thus carried him past a form of Christianity which was simply another form of Judaism' (Baur). Cp COUNCIL OF JERUSALEM, §§ 4, 7.

The textual problem raised by the omission of οἷς οὐδὲ (Gal. 2 5) in some western MSS is not serious (cp Lightf. *Gal.* 121-123, and Klostermann's *Probleme im Apostel-texte* [1883], 54 *f.*); besides, even were the external evidence more considerable, the internal probabilities of the case put the matter beyond doubt. The curious silence of Acts upon this notorious controversy (ACTS, § 4) is due to the irenical tendency of the author or of the sources which he edited at this point of his story. Even if he did not know the Pauline Epistles, Titus must have been familiar to him, as familiar at any rate as several of the minor figures who flit across his pages. But by the time he wrote, the circumcision-question was obsolete, and he probably deemed it prudent to pass by allusions which might revive unpleasant memories better left unstirred. Some such explanation is distinctly preferable to Ramsay's hypothesis that the Antiochian Luke omitted the name of Titus because he was his relative (*St. Paul*, 389 *f.*). Further, the disinclination to report so discreditable and unedifying an episode as that of the local dispute at Corinth naturally led to the omission of any later reference to Titus, who thus had the misfortune to be sacrificed to the special aims and interests of the first historian of the early church.

2. At Corinth.

Three or four years elapse before Titus reappears, in connection with the Corinthian church.[1] His lack of circumcision would naturally prevent him from being a suitable companion during Paul's second tour (49-52 A.D.) which embraced as a rule—for so much is visible even under the religious pragmatism of Acts—an initial attempt upon the synagogues in almost every city. But, since Titus is found at Paul's disposal in Ephesus, it is possible that the apostle took him from Antioch, after the dispute with Peter (Gal. 2 11-21), upon his third tour through Galatia and the Phrygian highlands as far as the Asiatic metropolis—a 'carefully planned stroke of policy,' according to Ramsay, which effectually answered the unfair deductions drawn by Judaisers in favour of Judaic Christianity from Timothy's circumcision previous to *his* promotion. Be that as it may, the keenest interest shown by Titus was in the Achaian Christians, an interest only equalled by that of Paul himself (2 Cor. 8 16), who stamped him as 'my comrade and fellow-worker in your interest' (2 Cor. 8 23), 'my brother' (2 Cor. 2 13), and a colleague actuated by the same high motives (2 Cor. 12 18)—an estimate borne out by the record of what transpired during the Corinthian episode, where Titus proved himself a prudent, active, and reliable commissioner of Paul. His connection with the Achaian Christians appears to have begun upon the occasion of a visit paid either at the despatch of 1 Cor. (which he may have carried, as one of 'the brothers': 1 Cor. 16 11; cp 2 Cor. 12 18) or shortly afterwards, when he set on foot arrangements for a local contribution to the great collection (cp Rendall, *Expos.*(4) 8 321-336, and E. Lombard, *Rev. d. Théol. et Philos.*, 1902, p. 113 *f.*) on behalf of the Judæan Christians which Paul was negotiating throughout the Gentile churches, partly as a timely act of charity, partly as a tangible evidence of sympathy between the two branches of the church, and partly to show his own belief and interest in their unity. Acquainted with the instructions already given by Paul to the Galatians in this matter of the λογία (1 Cor. 16 1), Titus was well adapted[2] for this financial work, which began in the year previous to that in which 2 Cor. 8 10 9 2 were written.

1 On the movements of Titus and Timothy at this period see especially and variously Lightfoot (*Bibl. Essays*, 273 *f.*), Schmiedel (*HC* ii. 1 82-86 267-269), Heinrici (*Der zweite Brief an die Kor.* [Meyer, 1900], 46-51), and A. Robertson (Hastings' *DB* 1 492-497). The scantiness of the available data renders any outline rather hypothetical at more than one point; upon the whole the most satisfactory view of the episode in general and of its extant literary evidence seems to lie somewhere among those which are based upon an acceptance of 2 Cor. 10-13 as the 'intermediate letter' (literature in Moffatt's *Hist. New Testament*,(2) 1901, p. 174 *f.*).

2 In describing the collection of temple tribute among the Jews, a custom which no doubt suggested to Paul the idea or at least the form of this collection, Philo notices the periodical assignment of the funds in each district 'to men of good standing whose duty it is to convey them to Jerusalem. For this purpose it is always men of the highest rank who are chosen, as a kind of guarantee that what forms the hope of every Israelite may reach the Holy City untampered with' (*De monarchia*, § 3, cited by Schür. *Hist.* ii. 2 289). Evidence for such collections in Egypt is displayed by Wilcken, *Griech. Ostraka* (1899), 1 253 *f.* 6 15 *f.* See DISPERSION, § 16, and Harnack's *Ausbreitung*, 133-135.

As the context implies (2 Cor. 12 13-17), 2 Cor. 12 17 *f.* (ἐπλεονέκτησα) refers to the collection; neither in person, nor by my agents (Paul retorts), did I overreach you. In view of this it seems inadequate to deny (with Zahn, *Einl.* 1 244 *f.*) that the collection is the topic of 2 Cor. 8 6. As Titus had previously made a beginning (προενήρξατο) with this bounty, so (Paul urges) let him complete it now in addition to (καί) the other local tasks—such as that of acting for Paul during the estrangement—which, as 2 Cor. 1-9 implies, he had brought to a happy issue.

Then and there he won the esteem of the Corinthians. Along with some other agent, he supported himself as Paul had done, thereby putting his disinterested zeal beyond suspicion; as Paul's language indicates (2 Cor. 12 18), he was evidently the last man in the world whom the Corinthians would have dreamed of accusing (cp J. H. Kennedy, *The Second and Third Epistles of Paul to the Corinthians*, 1900, p. 119). The business of the collection prospered famously (2 Cor. 9 1 *f.*). But it was rudely interrupted by the painful, discreditable, and contemptible affair which led to a rupture beween Paul and the Corinthian church. At this outbreak of bad feeling Titus in all likelihood returned to Ephesus, although this is one of several details which are far from luminous or coherent. It is possible that he contented himself with simply reporting the crisis. At any rate, he seems to have borne somewhat later to Corinth from Ephesus the vehement, severe letter (preserved in whole or part in 2 Cor. 10-13 10) which Paul precipitately wrote with caustic and passionate indignation, his aim being to test their loyalty and bring them to their senses (2 Cor. 2 13 7 6 *f.* 13 *f.*). The misgivings and apprehensions[1] of Titus on this errand proved happily unfounded. He was received and obeyed heartily by the majority, and eventually found himself able to rejoin Paul with good news of the Corinthians' repentance and affection. Some delay occurred, however, and meantime the outbreak at Ephesus (PAUL, § 25) had driven the apostle to Troas. Dismayed to hear at Corinth of the grief produced by his sharp letter (2 Cor. 7 8), he felt driven by restless eagerness for further news across to Macedonia. There at last he met his friend returning by land, and in an access of delight and relief at his favourable report composed 2 Cor. 1 1-9 13 11-13, which he concludes by planning to have the collection resumed and completed under charge of Titus accompanied by two anonymous but able subordinates. The former was not only willing but eager to return to Corinth (2 Cor. 8 16 23), so satisfied had he been with his recent experience of the church's temper (2 Cor. 7 6 *f.* 13-15). Thus Titus disappears from the scene. He probably returned with the letter to Corinth and reorganised the λογία or voluntary assessment throughout Achaia. For although no Corinthian deputies are mentioned among those named in Acts 20 4, it is evident from Rom. 15 26 that the long-promised liberality of the Corinthians (2 Cor. 9 5) had not been withheld, and that the financial labours of Titus (2 Cor. 8 6 9 2) were crowned with success. Curiously enough, among the virtues of the Corinthian church celebrated some forty years later, liberality (ἥδιον διδόντες ἢ λαμβάνοντες) is reckoned as one of its leading and traditional characteristics (Clem. Rom. 1 1 2 1).

3. Later traditions.

The genuine fragment incorporated in Tit. 3 12 *f.* (cp CHRONOLOGY, §§ 68 *f.*, TIMOTHY AND TITUS [EPISTLES], § 13) probably belongs to the period after the composition of 2 Cor. 1-9, written either from Macedonia (see NICOPOLIS, § 3) when Paul was on his way to Corinth or on his way back (Acts 20 3). How the connection with Crete arose, and whether Titus managed to rejoin him or not, it is impossible to say. The only light thrown upon his subsequent movements is afforded by a remark two years later in a genuine Pauline fragment preserved in 2 Tim. 4 10, from which it appears that Titus, who must have turned up during Paul's captivity in Rome, had left (on a mission?) for DALMATIA (*q.v.*). The trustworthiness of this notice need not be doubted, although the phrase 'this present world' (τὸν νῦν αἰῶνα, cp 1 Tim. 6 17) is un-Pauline. Nor is a substantial basis to be denied to the tradition (reflected in Tit. 1 5) that links Cretan Christianity to Titus at any rate (whatever may be thought of the allusion to Paul), although the tendency and object of the sub-Pauline author is naturally to suggest that the anarchic condition of the local Christians 'was one considerable cause of the evidently low moral condition to which they had sunk' (Hort, *Christian Ecclesia*, 176), and characteristically to lay stress upon organisation as a safeguard.

Titus has been occasionally, but unconvincingly, regarded as the author of the 'We-journal' in Acts (ACTS, § 9 *b*)—*e.g.*, by Krenkel, Kneucker, Seufert, Jacobsen, O. Holtzmann (*ZWT*, 1889, p. 409), and Bartlet (*Apost. Age*, 69, 100 [1900]). But all that the curious silence of Acts enables us to adduce in favour of such a conjecture is the wholly inadequate fact that Titus was a companion of Paul, possibly—though only possibly—during part of the time covered by the diary in question. Besides, it is significant that no writing, canonical or extra-canonical, is assigned to him in tradition, which is content to elaborate his connection with Crete and—by a strange shift of fortune, after the Venetian régime—with Venice. The meagre allusion to Crete which happens to occur in the Epistle to Titus, may quite well rest upon a nucleus of historical fact; but the luxuriant fancy of later generations proceeded among other developments to make him the first bishop appointed by Paul over Crete (*Ap. Const.* 7 46, Euseb. *HE* 3 4, Theod., Theophylact, Jerome, etc.), dying indeed at Candia, as archbishop of Gortyna, in his ninety-fourth year (Fabric. *Cod. Apocr. NT* 2 831 *f.*). Cp Tozer, *Islands of the Egean*, 65 *f.* In the Roman legends of the gnostic πράξεις Παύλου, Titus is connected with Paul, and plays along with Luke a rôle in the *Passio sancti Pauli Apostoli* and *Martyrium Pauli*, 114-117 (cp Lips. *Acta Apost. Apocryph.*, 1891, 1 23-44). Like Timothy he is of course reckoned among the seventy disciples by *Chron. Pasch.* 420 (ed. Bonn), and, according to *Acta Pauli et Theclæ*, 2 *f.*, he gives information regarding Paul to Onesiphorus at Iconium. One of the epistles of the pseudo-Dionysius Areopagita is addressed to Titus as bishop of Crete. The rather slight contents of the *Acta Titi* (see Lips. *Apocr. Ap.-gesch.* 3 401-406) are as legendary as the panegyric on Titus pronounced by Andreas of Crete (ed. Paris, 1644).

Like Timothy, Titus also has had some ado to preserve his individuality. But it seems needless to do more than chronicle even the attempts made to identify him (see Wieseler) with the Titius (Τίτου [ℵE]) Justus of Acts 18 7 or with Silas (Silvanus); against the latter as advocated especially by Zimmer, see the conclusive statement of Jülicher, *JPT*, 1882, pp. 528-552[, also SILAS, § 5 *f.*].

J. Mo.

TITUS (EPISTLE). See TIMOTHY AND TITUS (EPISTLES).

TITUS JUSTUS (ΤΙΤΙΟϹ ΙΟΥϹΤΟϹ [Ti. WH]), Acts 18 7 RV, AV JUSTUS (*q.v.*, ii.).

TITUS MANLIUS, RV **Titus Manius** (ΤΙΤΟϹ ΜΑΝΙΟϹ), 2 Macc. 11 34. See MANLIUS.

TIZITE (הַתִּיצִי; ο ιεαςει [Bℵ], ο θωςαει [A], ο αθωςι [L]; *Thosaites* [Vg.], all presupposing the form הַתּוֹצִי); a gentilic attached to the name JOHA (1 Ch. 11 45). David's warriors were presumably, like himself, from the Negeb. 'Shimri,' the name of Joha's father, also favours this. If TIRZAH (*q.v.*) was really a place in the Negeb, we might suppose corruption from תרצתי 'a Tirzathite.'

T. K. C.

TOAH (תּוֹחַ), 1 Ch. 6 34 [19]; in 1 S. 1 1, TOHU.

TOB (טוֹב; τωβ [BAL]), a region in which Jephthah 'the Gileadite' took refuge (Judg. 11 3 5), and whence the Ammonites obtained allies in their war against David (2 S. 10 6 8, RV; cp ISH-TOB). Sayce plausibly identifies it with Tubi, a place conquered by Thotmes III., and mentioned a little before Astiratu—*i.e.*, Tell 'Aštera (*RP*(2) 5 45; cp Maspero, *ÄZ*, 1881, p. 124). This does not, however, suit the original story which underlies Judg. 11 1-33 (see JEPHTHAH); a district of Ḥaurān is not to be expected here. Tubiḫi is much more appropriate (see TIBHATH); this very ancient city was probably in the Lebanon district, NW. of Damascus. The identification also suits the mention of Tob in 2 S. 10 6 8 in connection with ZOBAH (*q.v.*). The same region may be meant by the land of TUBIAS (AV TOBIE; 𝔊 τουβιου) in 1 Macc. 5 13, the people of which appear to be called TUBIENI (2 Macc. 12 17; see CHARACA)—

[1] As a personal friend of Paul and as a Gentile Christian over whom an acrimonious feud had been already waged (Gal. 2 3 *f.*), Titus cannot have felt comfortable at the prospect of confronting the Jewish Christian intriguers who were busy at Corinth. Probably it was dislike of them, if not their active malice, that had driven him away. At the same time his diplomatic qualities, no less than his organising capacity, made him evidently a more capable man than Timothy to deal with a difficult situation of this kind, and Paul's generous confidence in the sterling qualities of the Corinthian church (2 Cor. 7 14), as well as his sagacity in the choice of a new envoy, must have been amply justified by events.

i.e., the men of Tub or Tob. These identifications, however, only suit a fairly conservative view of the MT. If the Gilead originally meant in Judg. 11 and in 1 Macc. 5 be a southern Gilead in the Negeb, and if the Zoba originally meant in 2 S. 10 be Zarephath in the Negeb, we must consider whether טוב may not be a mutilated form of תובל (see TUBAL).

The *n* in the Gk. and Syr. forms (τουβεινους [A], τουβιανους [V], ܛܘܒܝܢܐ) is clearly not radical. See GASm. *HG* 587, n. 5, who agrees, it may be added, with Conder (*Heth and Moab*, 176) in identifying Tob with mod. *eṭ-Ṭayyibeh*, NE. of Pella.

T. K. C.

TOB-ADONIJAH (טוֹב אֲדוֹנִיָּה; τωβαδωβεια [B], -δωνια [AL]), a Levite temp. Jehoshaphat (2 Ch. 17 8). Note that Pesh. omits the name and that of the preceding Adonijah and Tobijah; 𝔊[BA] omits the second. If not a corruption (*e.g.*, for עֹבַדְיָה or עֶבֶד אֱדֹם—ע and ט are very similar in Samaritan script) the name should probably be omitted; a scribe may have begun to re-write טוביהו and then invented the most suitable name he could think of. [But cp *Crit. Bib.*, *ad loc.*]

S. A. C.

TOBIAH (טוֹבִיָּה), Ezra 2 60; see TOBIJAH, 2.

TOBIAS (τωβ[ε]ιας—*i.e.*, טוֹבִיָּה). 1. The son of TOBIT (*q.v.*).

2. The father of HYRCANUS (*q.v.*).

TOBIE (τογβιογ [AℵV]), 1 Macc. 5 13 AV, RV TUBIAS. See TOB.

TOBIEL (τωβιηλ [BℵA]—*i.e.*, טוֹבִיאֵל; cp Tabeel), the father of TOBIT (Tob. 1 1). Cp TOBIJAH.

TOBIJAH (טוֹבִיָּה, once טוֹבִיָּהוּ, 'Yahwè is good,' § 28, but ultimately, like TOBIEL, perhaps from Tubali, 'a man of TUBAL'; τωβιας [AL]).

1. A Levite temp. Jehoshaphat (2 Ch. 17 8; טוביהו; om. BA). All the associated names in 2 Ch. (*l.c.*) admit of being traced to Negeb ethnics or gentilics.

2. EV TOBIAH, a post-exilic family, unable to prove its pedigree: Ezra 2 60 (τωβεια [B], τουβιου [L]) = Neh. 7 62 (τωβια [BℵA]) = 1 Esd. 5 37 where the name is corrupted to BAN, RVmg. BAENAN (βαεναν [B], βαν [A]), and he appears as the father of Ladan (see DELAIAH). See GENEALOGIES i., § 3, and note the place-names in Ezra 2 59 = Neh. 7 61 = 1 Esd. 5 36 (*e.g.*, TEL-MELAH, TEL-HARSHA), all of which may plausibly be viewed as Negeb-names.

3. One of a party of Jews from Babylon (?), temp. Zerubbabel (Zech. 6 10 14; 𝔊 translates χρησίμων [-οις] αὐτῆς [-ῶν], *i.e.*, טוֹבֶיהָ). See ZERUBBABEL.

4. EV TOBIAH (the form τωβ[ε]ια is a constantly recurring form for no. 4 instead of τωβιας. The form τωβις [ℵ*] occurs in Neh. 4 3 [9]). An 'Ammonite,' one of the chief opponents of the fortification of Jerusalem by Nehemiah (Neh. 2 10, etc.). Whether 'Ammonite' is a race-name (cp AMMON, § 8) or means 'native of Chephar-Ammoni' (see BETHHORON, § 4) is uncertain. The latter view is superficially plausible through Tobiah's connection with leading Judæans (Neh. 6 17-19), from one of whom—the priest Eliashib—he received a chamber in the temple formerly used by the Levites, for his own special purposes. But we incline to think that 'Ammonite,' as often, = 'Jerahmeelite'; a connection between nobles of Judah and Jerahmeelites is historically probable.

The title 'the servant' given him in Neh. 2 10 19 ('the servant, the Ammonite'), but nowhere else, is explained as meaning 'the officer of the government' (Ryssel), or, 'one who had formerly been a slave' (Rawlinson). Both explanations are forced. העבד is almost certainly corrupted from הָעַרְבִי, 'the Arabian,' which the scribe in Neh. 2 19 (𝔊[B*] omits Tobias altogether) wrote as a gloss on העמני, 'the Ammonite.' From this passage it made its way into Neh. 2 10 (through the harmonising of an editor), most probably also into Neh. 4 1 [7]; if והערבים והעמנים (regarded by Guthe as an addition of the Chronicler, or a later gloss) is miswritten for הערבי העמני. In Neh. 2 10 19 the senseless הערבי became העבד; in 4 1 [7] (as we have seen) it went through another transformation. Later, in 4 1, והאשרודים (not in 𝔊[BℵA]) was added, not by an ill-timed reminiscence of Neh. 13 23, but (reading הָאַשּׁוּרִי, 'the Asshurite'), as a second gloss on העמני. Here, as in Neh. (*l.c.*), not Ashdod, but Asshur (Ashhur), the name of a N. Arabian district, is most probably referred to. Cp Che. *Das Relig. Leben nach dem Exile* (by Stocks), appended note.

Tobit (τωβ[ε]ιτ [BA], τωβειθ [ℵ]; *Tobias*) is one of the books of the OT APOCRYPHA (*q.v.*, § 5, 3). In the first sentence of the work itself it is called 'Book of the words [= doings: see CHRONICLES, § 1] of Tobit, son of, etc.' (βίβλος λόγων Τωβειτ [BA; ℵ -βειθ]). More than in the case of the other apocryphal writings of the OT the investigation is complicated by our having various *groups of texts*.

1. Various recensions. 1. To begin with, there are three Greek forms: (*a*) that of 𝔊[BA] which the Syriac [Syr.] follows down to 7 9; (*b*) that of 𝔊[ℵ], which is for the most part that followed by the *Vetus Latina* [Vet. Lat.]; and (*c*) that of Codd. 44, 106, 107 (Tob. 6 9 13 8). From 1 1 to 6 8 the text of these codices agrees with 𝔊[AB]; and the continuation of the Syriac version (from 7 10 onwards) coincides with it exactly.

2. Jerome's version is independent of all these; he tells us that he made it from an Aramaic original (*præf. in vers. libri Tob.*). Here it is noteworthy that the whole story of Tobit is told in the third person.

3. The same is the case with an extant Aramaic text edited by Neubauer.[1] This text, however, to judge by its language, would appear to be recent[2] and cannot therefore be identified with the MS used by Jerome, but is to be classed with three Hebrew versions which are also extant, as productions of a later date.

The recent essay by Margarete Plath 'Zum Buche Tobit' (in *St. Kr.*, 1901, pp. 377-414), which gives an analysis of the book with special reference to its stylistic peculiarities, will be found singularly helpful towards a right understanding of Tobit. As, however, it simply takes 𝔊[A] for its basis without any discussion of the originality of that text, this essay, which otherwise might be regarded as final on the stylistic features of the book, as a matter of fact is valid only for one of the traditional forms in which it has reached us. Before entering upon an analysis of style, therefore, it will be necessary to go into the question as to the original form of the book. In the first place we must examine the versions and seek to ascertain the form of text to which they carry us back; next, this form will have to be examined with a view to testing whether it be original or whether rather it does not show traces of having been worked over; the approximately original form will then have to be analysed; and finally the ultimate source of the materials will have to be considered.[3]

I. INTERPOLATIONS

In the first place we may be sure that the Aḥiḳar-episodes do not belong to the original form of the book.

2. Aḥiḳar-additions. (*a*) In 1 20 we are told that all Tobit's goods were forcibly taken away and there was nothing left to him save his wife Anna and his son Tobias. In 2 1, however, we read that on his return home these two were *restored* to him. The contradiction is manifest, but becomes explicable if we consider how it arose: this good deed also had been attributed to Tobit's protector; and the supplementer has betrayed himself by his incorporation of the Aḥiḳar-episode. The original sequence in 1 21, though it has been smoothed down in 𝔊[A], is observed in 𝔊[ℵ]: 'And Sacherdonos, his son, reigned in his stead—and in the reign of king Sacherdonos I returned to my home.'

1 *The Book of Tobit, a Chaldee Text from a unique MS in the Bodleian Library*, ed. by Neubauer, Oxford, 1878.

2 So Dalman, *Gramm. des jüd.-palästin. Aramäisch*, 27-29.

3 [On some special points relative to the original form of the text of Tobit, see *Crit. Bib.*, and cp THISBE.]

Underlying this we have the truly oriental idea that a new accession generally, an accession after a revolution always, brings with it a complete change of system. By א, Aḥiḳar is represented as having been cupbearer and keeper of the signet, steward and overseer of the accounts, as early as in the time of Sennachereim (Sennacherib, 705-682), whilst $\mathfrak{G}^{A}$ and $\mathfrak{G}^{B}$ have it that he first received his appointments from Sacherdonos (Esarhaddon, 682-669). א has the older reading; that it is the older is shown by the whole structure of the sentence. In the other Greek text the statement that Aḥiḳar was, even in the reign of Sennachereim, the most influential person in the kingdom has been deleted so as to avoid making Aḥiḳar in any way responsible for the expedition against Judæa and the resultant cruelties of the Assyrian against Aḥiḳar's own people. Thus we perceive that the original story of Aḥiḳar needed a rectifying hand in order to connect it with the story of Tobit with as little inconsistency as possible: again a proof that it was not from the first an integral part of it. Our opinion of the text offered by Jerome may be a poor one, yet when we note that to all appearance the story of Aḥiḳar seems to have had no place in the authority that lay before him, we may perhaps venture to say that, even if it has been greatly manipulated, Jerome's text still points back to a form of the text which had not yet passed through the hands of the supplementer.

(*b*) Aḥiḳar, the protector, afterwards becomes the supporter of the blind Tobit. Here the episode is brought in to lead up to an effective climax; first a relative takes care of the unfortunate man, afterwards his wife has to support him by doing work for strangers. In א even the duration of this period is given; it is two years. In the same text, all his brethren are represented as sorrowing for Tobit, though to judge by the scorn shown by the neighbours at his burying of the dead we should rather expect the opposite. In fact, the original story itself seems to have been so constructed as to exclude the notion of compassion by outsiders. His toiling wife is the blind man's only support, and when even she turns against him he longs for death. This Aḥiḳar feature also is wanting in Jerome.

It ought not to surprise us if even so secondary an authority should still be able to show us something original. In other cases as well as in that of the present book it will gradually come to be recognised that we must emancipate ourselves from the gratuitous assumption that all forms of an extant text can always ultimately be traced back to one of these which must accordingly be regarded as the original.

(*c*) Aḥiḳar appears again in 11 18, this time as a wedding-guest along with his nephew Nasbas. א mentions Aḥiḳar and Nabad as Tobit's nephews. That some wedding-guests should be specified ought not to seem strange in a book that deals so lavishly in names; and if we consider how insecure the tradition of names is, we cannot lay much stress on the fact that one of the wedding-guests bears the same name as Tobit's quondam protector and supporter. Moreover, Jerome gives Achior, like Syr. (1 24, ܐܚܝܩܪ). Perhaps, therefore, the mention of two wedding-guests by name may be original, one of them, however, having been transformed into that of Tobit's patron and supporter.

(*d*) Lastly, the story of Aḥiḳar is introduced in order to give Tobias an example of what compassion can accomplish. So $\mathfrak{G}^{A}$ Syr. and Vet. Lat. adduce it as showing the depravity prevalent at the time in Nineveh. א has it in both connections. One sees from this that uncertainty was felt as to the purpose of the story in Tobit's discourse to his son, and that various conjectures were made. The story was, therefore, no original part of the organism. Here again Jerome supports our inference.

The wording of his version leads to the conclusion that possibly it goes back to a form of the text which bore no traces of the work of the Aḥiḳar supplementer. If we arrange the text recensions by reference to their attitude towards these interpolations, we shall find that Jerome's original stands in contrast with that of all the others. The latter already has the Aḥiḳar interpolations. Whilst the paths by which A and B on the one hand, and Syr. and Vet. Lat. on the other, were reached are quite independent, א seems to represent a union of the divergent forms of the text at a certain stage of the development.

The introduction of the Aḥiḳar episodes shows that his story was widely known; it was possible to add weight to an admonition by a reference to what had happened to him. Like the story of Tobit, that of Aḥiḳar relates to the period of the exile.

3. History of Aḥiḳar-story.

The present writer has elsewhere[1] endeavoured to show that among the Jews of the exile there gradually arose a cycle of exilic legends. The individual legends belonging to this cycle have reached us not in original but in revised form; the persons figuring in them who of old maintained their fidelity amidst the most trying circumstances are exhibited by the various editors to the people of their own time, in circumstances of renewed distress, as conspicuous examples of Jewish piety and of Jewish patriotism. Our attitude indeed may well be sceptical, as regards the sources again and again cited—in Esther the chronicles of the kings of Media and Persia, in Tobit the relater of the wonderful experiences in 12 20—but we are not thereby justified in refusing to believe in the existence of widely circulated collections of legends from which the present texts had their origin, especially when we bear in mind the passion for writing which characterised those times.

The peculiar way in which the stories of Tobit and of Aḥiḳar are worked together points also in the same direction. The supplementer has made out the two men to have been kinsmen; this was all the easier as Tobit himself is represented as having once upon a time held an important position at the Assyrian court. So also Aḥiḳar, the son of Anael, is represented as already cupbearer, keeper of the signet, steward and overseer of the accounts under Sennachereim, and confirmed in his offices by Sacherdonos. א makes mention of his journey to Elymais (Elam); A and B, which make Tobit go there himself, present an unwarranted alteration of the text, and, we may be pretty certain, are hardly to be corrected in conformity with Vet. Lat. with which they otherwise in these episodes have but little affinity. Perhaps the circumstance may be taken as an indication that both forms of the text come from a region where the allusions to Aḥiḳar would have been unintelligible, his story being unknown. The chief event of Aḥiḳar's life is touched on in chap. 14 10. It will be of interest to place in juxtaposition the various forms in which it is given.

4. Its various forms.

SYR.	VET. LAT.	B (A)	א
So, my son, after thou hast buried me and thy mother, do thou leave Nineveh, for there are many unrighteous persons there. For there 'Akab evilly requited 'Akiḳar who had nourished him for happiness (?): for no cause did he bring him down into the earth. And 'Akab descended into darkness, and 'Akiḳar went forth into light out of the snare which	But now, my son, do thou leave Nineveh, and tarry no longer here, but on the day that thou hast buried thy mother beside me tarry no longer within her territory; for I see that there is much unrighteousness there and much deception is practised, and her people will not be moved therefrom. Behold, my son, what Nadab did to Aḥiḳar who had nourished him, whom he	Bury me decently and thy mother with me, and dwell ye no longer in Nineveh. Behold, my child, what Adam (Haman) did to Achiacharus that nourished him, how out of light he brought him into darkness and how he requited him; and indeed, he saved (there was saved) Achiacharus, but that other had his recompense, and he himself went down into darkness.	And now, my child, leave thou Nineveh, and tarry not here. On the day thou hast buried thy mother beside me, on that same day stay no longer in her territory. For I see that there is much unrighteousness in her and much deception is practised, and they are not ashamed. Behold, my child, what Nadab did to Achikarus who had nourished him; was he not brought alive down

[1] *Die Purimsage in der Bibel: Untersuchungen über das Buch Ester und der Estersage verwandte Sagen des späteren Judentums* (1900), 45-59.

TOBIT

Syr.	Vet. Lat.	B (A)	ℵ
'Akab had set for him, and this one went down into the earth.	brought down alive to the earth. But God requited that man's wickedness before his own face, and Aḥiḳar went forth into light, but Nadab went down into eternal darkness, because Nadab had sought to kill Aḥiḳar.	Manasseh practised mercy and escaped the snare of death which he had set for him, but Adam (Haman) fell into the snare and perished. And now, my children, behold what mercy does, and how righteousness doth deliver.	into the earth? And God requited his infamy to his face; and Achikarus ascended into light, and Nadab descended into eternal darkness, because he had tried to kill Achikarus. Since he showed mercy to me, he escaped the snare of death which Nadab had set for him, and Nadab fell into the snare of death, and he (death) destroyed him. And now, my children, see, what mercy does, and what unrighteousness does, for it kills.

The various recensions agree in the following points: Aḥiḳar brings up a youth who, however, drives him down into the earth (darkness). Aḥiḳar in the end is saved, and the other has to suffer the fate he had contrived for his benefactor.

5. Their common matter.

The young man's name is given variously: 'Akab, Nabad, Nadab, Adam, Haman. A and B unexpectedly call Aḥiḳar Manasseh. 'Akab is probably a corruption of Nakab and may perhaps go back to one or other of the forms Nabad, Nadab, as also may Adam. On the other hand the names Manasseh and Haman point to a separate tradition which, to all appearance, first came out in A and B. In this the introduction of the story of Aḥiḳar has its motive in the reference to the value of mercy. The characteristic phrase of this variant is: 'the snare of death which was set.' This phrase must have had a definite meaning in the narrative as well as that which occurs in the first: 'he was brought to the earth (darkness).' This is shown by the fact that, doubtless independently of A and B, the other variant has also found its way into ℵ; this becomes evident if we consider that here it is plainly not original. It has already been brought into connection with the story of Tobit; what is accentuated is that the showing of compassion has brought deliverance to Tobit. Moreover, the original names have given place to those which we now find. Along with this variant the new motive for referring to the Aḥiḳar episode has made its way into the ℵ text. Accordingly we shall have to imagine the steps in the process of interpolation somewhat as follows. With the formula: 'Behold, my child!' a supplementer introduces a Nineveh story with which he is acquainted. Afterwards it is endeavoured to bring it into connection with the book of Tobit, first by means of the moral it supplies 'Such wickednesses are done in Nineveh,' and next (with the view of securing a still closer connection) by introducing a variant which lays stress upon the virtue of compassion.

6. Successive stages of growth.

Whilst the first variant deals with the ungrateful youth and with the punishment of his ingratitude, what is emphasised by the other is that an act of compassion saves him who is lost. The two are not mutually exclusive; both may have their origin in one and the same story though in different aspects of it. The important thing to observe is that they are taken from different forms of this story, and in point of fact, as the introduction of the various separate elements occurred at different dates, we are thus enabled to gain an insight into the history of the story amongst the Jews. First we find the story which tells of Aḥiḳar and Nadab. The names are, to all appearance, foreign, and show at once that this material had been appropriated by Judaism comparatively recently. Next, the names, and especially that of the hero, give place to Jewish ones, and so the process of appropriation is completed. Nor are the new names insignificant or chosen at random; Manasseh is the name of the husband of the brave heroine of the Book of Judith, Haman is that of the notorious enemy of the Jewish race. By the alteration of the names of the chief actors the story of Aḥiḳar itself received a new stamp of nationality, and so became an integral part of the cycle of exilic legends.

That the story of Aḥiḳar is not native to Jewish soil is shown by its wide diffusion (cp the literature of this subject in *The Story of Aḥiḳar* by F. C. Conybeare, J. Rendel Harris, and A. Smith-Lewis, London, 1898).

7. Aḥiḳar-story of foreign origin.

It is found in Syriac, Armenian, Arabic, Greek, and Slavonic redactions, and is to be met with in the *Arabian Nights* and in the fables of Æsop (cp ACHIACHARUS). It runs somewhat as follows:—

The vizier and privy councillor of the Assyrian king Sennacherib, Aḥiḳar by name, having no child of his own, brings up his nephew Nadan and receives from the king the assurance that Nadan will be his successor in the offices that he holds so advantageously for the kingdom. Nadan receives from his uncle in wise discourse the ripe fruits of a rich experience. Soon, however, he begins to abandon himself to a loose and dissipated life, so that Aḥiḳar finds himself compelled, with the king's permission, to disinherit him. Nadan then begins to intrigue for the overthrow of his uncle, and at last with success; by means of forged letters Aḥiḳar is made to appear a betrayer of his country. The deluded Sennacherib condemns his faithful vizier to death and charges an executioner to carry out the sentence in front of Aḥiḳar's own house. But with the help of his devoted wife the vizier is able to induce the executioner, who is grateful for a former act of kindness, to spare him, and to substitute a criminal slave in his place. He himself is hidden in a cavity beneath the door of his house, and secretly fed by the executioner and his own wife, whilst overhead his ingrate nephew begins a reckless life. At this juncture the king of Egypt sends a letter to Sennacherib in which he challenges him to solve a problem. In the event of his succeeding, the king of Egypt will pay him tribute; should he fail, Assyria is to become tributary to Pharaoh. Sennacherib is to get a palace high up in the air built for him in Egypt (the same motive is found also among the Suaheli in a story of Abunawas).[1] In Assyria everyone is helpless; if only Aḥiḳar were still alive! Whereupon the executioner comes forward and tells the king the truth. Sennacherib is overjoyed. Aḥiḳar is fetched from his den and brought before the king; his unshorn, unkempt hair reached down to his shoulders, and his beard to his breast. His nails were like eagle's claws, and his body had become withered and disfigured. The fashion of his countenance was changed, and was like ashes (cp Dan. 4 30). Carefully tended he is speedily restored, takes the problem in hand, and sets out for Egypt, where he is able to meet cunning with cunning and Pharaoh is compelled to acknowledge defeat. Crowned with glory the hero returns home, and now condign punishment overtakes Nadan. First he is scourged, and next he is thrown into a foul den near his uncle's door: and as often as Aḥiḳar went in and out, he railed at him, his words of chastisement still taking proverbial form. 'As Nadan heard these words, in that same moment he became inflated like a leather bottle, all his members and bones swelled, and he split open and burst. Thus he came to his end and died' (cp as to this manner of death the account of Marduk's triumph over Tiāmat in the Babylonian creation-myth; Jensen, *Ass.-bab. Mythen u. Epen*, Berlin, 1900, p. 26 *ff.*).

The manner in which the story is told in the Book of Tobit points very clearly beyond the legendary form in which it has been handed down to an original which exhibited mythological motives. Some one is delivered from the snare of death—so a legend says. This is the latest shape the material receives; it is at the same time also a new interpretation and explanation. We meet with

8. Ultimately mythical.

1 *Lieder und Geschichten der Suaheli*, transl. and introd. by Büttner, Berlin, 1894, p. 89 *ff.*

the characteristic colouring of myth, however, when we read of someone being brought down from light into darkness, how he reascends to light, and how his adversary is plunged into eternal night. These are characteristic features of the original form which first are gradually smoothed down and then continue to be carried along as a metaphorical manner of speaking for a considerable length of time, but finally the bold myth is toned down till it becomes a mere illustration of a popular proverb: 'He who digs a pit for others falls into it himself,' or: 'Behold, what mercy does, and how righteousness delivers,' or: 'Mercy delivers from death, and will not suffer him who practises it to go into darkness.'

The appropriation of this story by Judaism through a change of names, depends on a primary affinity of material which made it possible and easy. Manasseh in the Book of Judith, who is struck down by a burning wind in the days of the barley-harvest, and so deeply lamented by his widow (Judith 8 2 *f.*), and Haman the persecutor of the Jews are both of them figures which Judaism found and appropriated in foreign lands. They afterwards became typical figures for the whole cycle of exilic legends; but originally it was between mythical figures that the struggle lay as to which should thrust the other down into everlasting darkness.

From the fact that the Book of Tobit contains references to the story of Aḥiḳar, we must not, with M. Plath, draw the inference that the Tobit material is the later: 'The story of Tobit is set forth in full detail whilst the other may be taken for granted as known already.' On the contrary we here see in operation the natural desire to bring the characters of legend into relation with each other and with contemporary life. In this way Judaism is exhibited, even by its legends dating from those days of oppression which had become classical for subsequent post-exilic times, as a close and mutually coherent community in which each individual helps his neighbour. It is in a similar manner that, on German soil, the figures of Siegfried and Dietrich have been brought into relation with each other in the 'Great Rosen-garden.' But whilst the Jews help one another the German heroes are at war. The former sort of legend circulates among a people that finds itself in adversity, the later in a nation that finds its delight in battle and tournament.

9. Didactic additions.

There can be no doubt that the didactic portions of Tobit have also received interpolations; this is evident from the extant texts.

Chap. 4, which contains Tobit's exhortations to his son before his departure, is shortest in ℵ, fuller in Jerome, most copious in A, B, and Vet. Lat. Whilst in Jerome there is prefixed an exhortation to attend to what is about to be said, and lay it to heart, in the other MSS Tobit, starting from the actual situation, begins with an admonition to Tobias to attend to his father's burial and care suitably for his widowed mother. This admonition is all the more effective, and *eo ipso* shows itself to be an integral portion of the story, because shortly before the blind old man has had to listen to bitter reproaches which almost drove him to despair from the very wife whom he now so thoughtfully remembers. Natural, too, in like manner is the admonition, generalising as it were the fundamental thought of what precedes, to be pious and to keep God's commandments. The prospect of a happy life is held out as a reward for such conduct.

The climax of the exhortation having thus been reached, the conclusion we expect is 'Remember these commandments, and suffer them not to be effaced from thy heart!' Only ℵ, however, closes thus; assuredly it represents the original rounded form. We cannot suppose any omission or shortening; for elsewhere ℵ is much the more detailed and copious.

The other texts have forcibly introduced into this rounded text manifold pieces of good advice: (1) Practise compassion, for this will give the best results; (2) Live chastely and marry within your own people as the patriarchs did, for this brings great blessing in its train; (3) Be not proud, above all not to any of your own people: pride brings ruin; (4) Give the hireling his wages; be well-bred in all your actions, and refrain from doing to others what would be unpleasing to yourself; (5) Beware of drunkenness; be compassionate; (6) Walk with the righteous and the wise.

Jerome has a like number of separate counsels, but they are more concisely worded, and it is noteworthy that the advice to marry within one's own kin is absent.

Thus there has been a gradual interpolation of this apparently favourite chapter of the Book of Tobit. People liked to read how the old man instructs the youth. More and more words were put into his mouth, of the sort which the various redactors would like to impress upon the minds of readers. It is interesting to see that the Aḥiḳar story also exhibits the same mixture of the epic and the didactic styles. Certain of the actual words too in the rules of wisdom it contains echo those of Tobit. The following examples are among the most noticeable:—

Aḥiḳar Story.	Vet. Lat.	Jerome.	A and B.
My son, pour out thy wine on the tombs of the just, rather than drink it with wicked and base people.	Pour out (funde) thy wine and thy bread on the tombs of the just, and give it (illud) not to sinners.	Place thy wine and thy bread upon the tomb of the just; but eat and drink not of it with sinners.	Dispense freely thy food at the burial of the just; but give not to sinners.

The original meaning of this saying, which has reference to libations at sepulchres, has gradually been toned down until at last what has come out of it is an exhortation to prepare a funeral repast. Thus we can clearly see that the counsels which by degrees found their way into Tobit's exhortation have in part at least been taken from the general oriental stock of quotations. On the other hand the accentuation of definite Jewish precepts of morality is deliberate. The time, from which their introduction dates, loved to inculcate them at every possible opportunity. Apparently it had every need to do so.

The peculiar circumstance that the advice to marry within one's kin is wanting in ℵ and Jer. raises the question, whether this element, upon which much weight is sought to be laid in the history itself, be original.

There is the further fact that in 6 16 [ℵ] Azariah reminds Tobias of it, although the admonition itself has not been previously recorded in this form of the text. The verse in question must therefore have been introduced by way of correction from the other forms of the text. We are confirmed in this inference when we observe that Jerome makes no mention at all of Azariah's reminder. But as in the dialogue between Azariah and Tobias, he deviates much from the other MSS, his evidence would not be so weighty as it is if we did not read in the third Greek recension simply these words: 'Dost thou not remember all thy father's commandments?' thus without express allusion to the particular exhortation now in question.

Further, the statement that Tobias is related to Raguel disturbs the whole structure of the story. If Raguel would indeed become by the Mosaic law guilty of death should he give his daughter to any other than Tobias,—an assertion of the angel's which in point of fact is not correct,—then it becomes inconceivable how the narrator could possibly have found any excuse for his having already previously betrothed her to seven suitors in succession. Sara herself, before abandoning herself to despair, must surely have had some thought of the one possibility of escape from her sad predicament—that, namely, of being married by the man whom the law required. Her prayer must have been that God should send her this deliverer. Nor is it possible that Tobit in receiving his daughter-in-law into his house, could have failed to recall the ties of kinship that united them. Raguel himself must have given thanks to God not merely 'for having had mercy upon two only children'; he would also have had every reason for pointing out how a faithful keeping of the law had found its reward.

Finally, the scene which above all others must determine as to the relationship between the two families, that namely in which Tobias enters the house of Raguel, is not always rendered in the same way. According to one version of the story the two travellers first meet with Sara and are afterwards led by her to the house, and according to another they first find Raguel himself sitting at his house door, and are hospitably welcomed by him; according to the one Tobit's loss of sight is already known to those in Raguel's house, whilst according to the other they first hear of it from the travellers. Also, ℵ shows a much greater interest than A and B in the relationship (cp 6 13 and 7 10), although it does not contain the exhortation mentioned above. The editor therefore, we may be quite certain, would not have omitted it if he had found it lying before him.

This want of agreement shows clearly the smoothing

touches of later hands. It is plausible to conjecture that without all arriving at one and the same result they all sought to incorporate the discovery by Raguel and his family that their new arrival was their nearest kinsman. This addition, intended to exhibit in concrete form by means of the story of Tobit the blessing which such marriages of kinsfolk bring, must have been made in a time which was trying to set aside this ancient Jewish custom. People 'turned away with haughty minds from the sons and the daughters of their own nation, nor took they wives from amongst them' (4 13 [A]). 'In pride—such was the teaching of this addition—lies destruction and much confusion.' On the other hand the progeny of those who are true to the customs of their forefathers 'inherits the land.' We see that political and religious hopes were believed to be affected by such deviations from traditional practice.

If we take a comprehensive survey of the work that has been expended upon the Book of Tobit, so far as can be judged from the extant forms of the text, it becomes plain that the introduction of certain episodes points to a heightening of the didactic character of the story, and to a desire to give it more and more the character of a family tale. In other respects, though the various MSS vary from each other in many ways, they never do so to such an extent that the course of events is changed. But copyists and translators seem to have treated their text with a good deal of arbitrariness; they might almost be called redactors. They have fully exercised what they deemed their own proprietory rights in copy or translation. The various forms of text thus produced were again compared at a distinctly later period, and here and there we find unmistakable attempts to harmonise them. It is therefore difficult to define in any brief formula the nature of their mutual relationship. We can do so, however, quite definitely so far as their attitude towards the Aḥikar episode is concerned.

10. Summary of foregoing discussions.

II. Uninterpolated Text

At this stage there arises at once the question whether the text to which the various extant MSS go back presents us with the original form of the Book of Tobit. In the opinion of the present writer it does not. Various indications go to show that what it offers us is a redaction of a story previously fixed in writing.

11. Not original.

In the speech in which the angel makes himself known he declares the part he has taken in the events in the life of Tobit (12 12 *ff.*). He it was who brought the memorial of his prayer before God; who was by his side when he buried the dead; likewise when he did not delay to rise up and leave his dinner in order to go and cover the 'dead' (sing. in ℵ, pl. in A). The allusion to Tobit's activity in burying the dead in the times of oppression caused by Sennacherib is abrupt; to say the least it stands in the wrong place, the events being enumerated in reverse order of their occurrence. It has the appearance of being an element that has been introduced at a late stage into the text with the effect in *v.* 13 of making 'the dead man' into 'the dead' (pl.). If this impression be correct, the originality of the introduction would then come into question. And in point of fact it is given as the hero's own account of himself in the first person whilst everywhere else the book is written in the third person. At a very early date this difficulty was felt. Jerome and the Aramaic (ed. Neubauer) give the introduction in the third person. M. Plath indeed points to the similar change between the first and the third person in the Aramaic version of the story of Aḥikar. In the latter case, however, it would seem as if we had to deal with an oversight or slip of the Chronicler rather than with a peculiarity of style. 'If the editor of the Book of Acts, skilled in literature as he was, placed in immediate juxtaposition the we-passages and those written in the third person,' his intention was that the impression of dependence on ancient sources which gives his narrative the stamp of authenticity might be left unimpaired. Thus M. Plath's reference to Acts goes rather to prove the opposite of what is intended; the inference is that here also as well as in the Book of Acts the manner in which the subject is presented enables us to discern the traces of a second hand.

Again, the mention of the various Assyrian kings, and the references to the history of that period altogether are quite uncalled for so far as the remainder of the narrative is concerned. Only at the very close of the narrative are similar allusions at all met with; but here too the various versions do not agree (*e.g.*, as to the ages of the persons).

Once more, Tobit's loss of sight is given as the sole reason for his impoverishment. After the return from the flight before Sennacherib he can afford to have a rich meal prepared; thus his poverty is not the consequence of the confiscation of his goods by Sennacherib.

Lastly, it is left wholly unexplained why it is that the neighbours say on the burial of the dead man at the feast of Pentecost that Tobit 'was no more afraid to be put to death for this matter.' No mention has previously been made that the Jew referred to had been slain by King Sacherdonos. The corpse is lying in the market place; but the Jews put to death by Sennacherib are not, it need hardly be said, left lying in the middle of the town; they are thrown outside the walls of Nineveh. The saying of the neighbours just cited, therefore, being irreconcilable with the narrative itself, and presupposing impossible conditions, cannot be original. If not original, the things to which it alludes, the Sennacherib story, are also brought into question.

We shall be safe, therefore, in excluding from the original text of the Book of Tobit, both this Sennacherib-story and the reference to the burials of the dead. What we have here is simply a later reduplication of one and the same motive—viz., that of the burial of the dead man—just as in the story of Esther the feast is reduplicated. In Esther the object is to interweave the Mordecai episodes by means of which the book read at the Purim festival was brought into harmony with the spirit of the age; we may well suppose a similar motive to have been at work in the case of the Book of Tobit. Preiss[1] has placed its date in the middle of the second century A.D., that is to say, immediately after the suppression of the Jewish revolt, and the annihilation of all their national hopes. If now we endeavour to represent to ourselves what it was that the redactor of the original text of the book of Tobit (possibly written in Hebrew) aimed at and has accomplished we shall arrive at some such conclusion as the following:—

The story, such as the redactor found it already reduced to writing, as an edifying tale of family life, was laid in the Assyrian times. The redactor shows himself to be, for his time, a man possessed of a certain degree of historical knowledge. He was acquainted with the almost legendary story of Sennacherib's fruitless expedition against Judah; and this he blended with the story of Tobit, perhaps after having first put it into a Greek dress. With the adoption of so free a treatment is explained also the stylistic character of the Greek text, which led Nöldeke to maintain its originality.[2] The redactor had along with his contemporaries passed through the bitter experiences of the suppression of the Jewish revolt against Rome. It had been a life-and-death struggle. 'In this conflict of races, that ended in 135 with the complete subjugation of the Jews, the fields were strown with dead bodies; nay (as Graetz has it) "the whole Jewish nation lay like one huge corpse on the gory fields of its native land" and in Media alone was peace any more to be found' (Preiss). These ghastly experiences were introduced by the redactor into an old tale of family life. He threw them back into the Assyrian time; and thus the old book with its limited horizon, with its personages who are 'no heroes in deeds, but heroes in suffering' (M. Plath) was adapted to the times for which he wrote.

12. How redacted.

Tobit who, braving the wrath of the king, buries the slaughtered brethren, thus receives a touch of the heroic valour of the fighters of Bar Kochba's time; but, at the same time, by his resignation and by his quiet patience and persistent hopefulness he could also become a conspicuous example to the Jews of those days, disheartened as they were by the failure of their effort to shake off the Roman yoke. As they read the new introduction to the old book, their hearts were captivated by this bold kindred spirit, to be guided by him forthwith along the only road on which they could possibly find healing for their grievous wounds. Perhaps therefore it was psychologically a very skilful touch on the part of the redactor to introduce this man at the outset as speaking *in propria persona*. Possibly he allowed himself here to be guided by his own feeling. In any case his intervention has impaired the compactness of the older narrative.

1 'Zum Buche Tobit' in *ZWT*, 1885, pp. 24 *ff.*
2 *MBBA*, 1879, pp. 45 *ff.*

The introduction of passages from general history into such a tale as this, dealing with events so domestic and private, strikes us as out of place; we instinctively feel that here some extraneous element has been imported into an already completed unity, that we have to do with the work of some editor, that a local and temporary interest is at work which has no universality in its appeal.

Our account of the redactor's interference with the older narrative is not yet finished. In 12 20 the angel, when taking his departure, bids Tobit commit to writing all that has happened. The reader notes that the matter is exhausted, and what he expects next to hear is that Raphael's command has been carried out. Perhaps afterwards the deaths of Tobit and Anna might have been added, and the removal of Tobias into Media,—a removal that considered in itself seems quite natural when we remember that his wife's relations live in Ecbatana and are possessors of great wealth which Sara and her husband are destined one day to inherit. But instead of any such natural conclusion as this we have in the first instance a thanksgiving prayer of Tobit's, of which we are told in A and B that it was put into writing by Tobit himself. The Syriac version has the same prayer in a shorter form. The other versions, however, make Tobit's discourse rise to a climax in an apocalyptic prophecy of the upbuilding of the heavenly Jerusalem. According to this discourse God's tabernacle in Jerusalem is for the present destroyed, and thus the city taken away from the nation and from its God.

Tobit appears of course to speak from his own proper standpoint, which has in view the destruction of Jerusalem by Nebuchadrezzar. It need hardly be said, however, that in reality the prophecy relates to the time of the author. Now it might not be impossible to think of the oppression of Jerusalem by Antiochus Epiphanes. The glowing colours, however, with which the rebuilding of the holy city is depicted suggest a period when a speedy natural restoration of the city and its worship was hardly to be expected. At such a period, when it is plainly seen that self-help is of no avail, men cling to the hope of some miraculous intervention. Heavenly powers shall build up Jerusalem (13 16) 'with sapphires, and emeralds, and precious stones, her walls and towers and battlements with pure gold; and her streets shall be paved with beryl and carbuncle and stones of Ophir.' A joyful expectation of this sort takes us beyond the times of the Maccabees. And as the opening of the book most probably emanates from one who had lived through the struggles of the second century A.D. it will be to him that we ought most probably to attribute not only the placing of the story in a similar historical background, but also the introduction into it of those ardent wishes and hopes regarding the future which at the time of writing were stirring his own heart. By this supposition we are best able to understand on the one hand the interest shown in events in the far East in the introduction, and on the other in the rebuilding of Jerusalem and the restoration of its worship at the close. For a contemporary of the Maccabæan struggles Palestine alone would have come into consideration.

The interest felt at one and the same time in the far East and in the city of Jerusalem finally reaches pointed expression in the parting speech of Tobit to his son (chap. 14). 'For a time' Jerusalem shall be desolate and God's worship be suspended there. During this period 'in Media there shall rather be peace for a season.' But at last the fulness of time shall be accomplished, the Jews shall be restored, and the gentiles turn from their idolatries. Jerusalem shall rise in glory and with her the house of God, 'but not like unto the first.' This prophecy clearly refers to the last times. The temple, which is to be built anew, will not be the production of human hands, but in contrast to the first will be God's own workmanship. Jerusalem will be the splendid city of the latter days, the heavenly Jerusalem, the temple of God's glorious building, not to be likened to any building of former times, not even to that of a Herod. It is therefore a mistake to attempt to determine from this passage the historical standpoint of the writer as if he had lived sometime within the period between the post-exilic building of Zerubbabel and the work of Herod (so Schürer in *PRE*(3) 1644). Rather are all temples of former times brought into contrast with this splendid structure destined to be raised in the end of the ages. The writer of this prophecy discloses himself by his simultaneous interest in the far East and in the West. A characteristic note is that he takes pains to make out the events of the future as fulfilment of prophetic prediction. We can perceive from this how important the time in which he lived must have been for the text of our prophetical books. In particular we must attribute to it a large share in the enlargement by way of commentary of our book of Jeremiah, the Hebrew text of which is much more copious than that of the Greek translation.[1]

This peculiar method, of filling out the ancient story with the prophecies, hopes, and interests of a later time, strikes the reader just as much as does the introduction of universal history into a tale of family life. The mixture of styles resulting from this combination is neither elegant nor pleasing. Beautiful or attractive it can have been only to an age which found reflected in it its own expectations and wishes. Here once more we come to the conclusion that a redactor has been at work whose inherent weaknesses escaped notice for but a short time. The moment the interest which has dictated the procedure relaxes, we inevitably perceive the violence it has done to the ancient story by the improbabilities which it has forced upon it.

III. Conjectural Reconstruction

If we pursue our inquiry as to the original form of the book of Tobit which lay before the redactor and was operated on by him, we shall find the story to be somewhat as follows:—

13. Reconstruction.

In Nineveh there lives a pious man, Tobit by name,: his wife is Anna, and his son Tobias. He is one of the Jewish exiles. On a certain occasion, at Pentecost, just before sitting down to meat, he sends out his son to invite any needy one from among his brethren. Tobias returns with the news that a Jew who has been strangled is lying dead in the market-place. Tobit buries the body, and as incidental to this loses his eyesight. He thus becomes dependent on his wife; on one occasion a misunderstanding arises between them and she casts his alms and his righteous deeds in his teeth. Deeply stirred, he falls into great sadness and prays for death. In Ecbatana, Sara the daughter of Raguel is cherishing the same wish. An evil spirit, Asmodeus, has slain seven successive husbands of hers on the wedding-night. Her father's maidservants reproach her with having herself put her husbands to death. In answer to the prayers of Tobit and Sara God sends forth the angel Raphael to cure Tobit of his blindness, and bring about a union between Tobias and Sara and thus deliver the virgin wife from the evil spirit.

Such, in brief outline, is the scheme of the story; the scene is laid at Nineveh and Ecbatana, and the theme is the deliverance from undeserved misfortune of two families living in these two places. The solution is brought about by the direct intervention of God and Raphael, the powers of the celestial world.

The occurrences in Nineveh are related at some length, but only one scene is devoted to the story of Sara. At Nineveh we are first of all introduced to the pious, benevolent Tobit. His benevolence leads him to show an act of mercy to a dead man and this act of mercy in turn becomes the cause of misfortune to himself. The development of this scene indicates that Tobit's misfortune is wholly undeserved. A pious man such as this—so the reader is given to understand from the very beginning—cannot possibly remain unhappy, if there is a righteous God.

In the second scene we see how poverty comes on the back of misfortune. Tobit's wife becomes dependent for her own and her husband's support upon the kindness of aliens. And, strange to say! to the benevolent Tobit who now finds himself in the same position as those whom he has so often formerly befriended there never occurs the thought of any possibility that his former kindnesses may now be requited to himself and to his house. In the end Tobit, after the misunderstanding with his wife,

[1] Cp Erbt, *Jeremia und seine Zeit*, 1902, and see Jeremiah ii., § 21.

finds himself completely isolated. Where is he to look for either comfort or support? The good deed which has been the outward occasion of his misfortune is cast in his teeth. Must he remain an innocent sufferer throughout all the rest of his life? His prayer is the answer to either question; it is thus of vital importance for the course of the narrative. Forsaken by men, Tobit turns to God from whom alone comfort and help can come. He prays that death may come to his rescue. We are deeply moved by the spectacle of the aged sufferer. Any other man would have prayed for recovery. Thus our feelings are kept in tension. In what way will God intervene?

The composition of the two scenes at Nineveh can almost be characterised as faultless. We are greatly moved as we see this pious man brought to misfortune by an act of kindness. In the train of the original calamity comes poverty. It is the indirect cause of a misunderstanding between Tobit and his loyal wife. A venial fault leaves the old man absolutely friendless; it instantly brings its own punishment, but at the same time drives him into the arms of Him who alone can help. For the time being we are reassured, and free to turn our attention to the other scene of action.

Sara scourges her maids, whether with reason or without, we are not told, nor does it matter. Her maids know how to avenge themselves on her passionate temper. They reproach her with her undeserved misfortune. Misfortune, scorn, and open contempt; we are touched by the maiden's fate. She would fain lay down life's burden; another proof of her passionate nature. The aged man bears his troubles quietly; only when they pass the limits of endurance does he pray to God to take away his life. For a moment Sara thinks of ending her troubles with her own hand; but it is only for a moment: she is too good a daughter; she remembers her father. In the one case, Tobit's difference with his wife throws him into the arms of God; in the other case, the same effect is wrought by the daughter's reflection on what would be the sorrow of her father.

The narrator relieves the fatiguing similarity of the two scenes by contrasting the motives. Sara's prayer is framed after the same model as Tobit's: invocation and adoration; petition for deliverance from distress. Whilst, however, the prayer of the old man moves quietly towards its climax, Sara's emotion is manifest throughout. Thus her prayer is much more concrete. She had just been on the verge of suicide, and now she implores God to let her die. But again the image of her father rises before her eyes. The love of life breaks in once more upon this passionate nature, the secret, unuttered wish that God may help her in some other way.

Thus the narrator has still further prepared us for the divine intervention. The scene that follows is laid in heaven—God sends down Raphael to deliver the two petitioners out of their distress. The reader at once perceives how the business is to end. Our story is no drama that gradually unfolds itself before the eyes of the spectator; the various personages henceforth lose their dramatic interest, for we know what the end must be. All that remains still unknown is merely the working out of the details. With disclosure of the final issue the question is at the same time started as to how God will bring it about. To this the reader is intended to give his undivided attention. God's wisdom has to show itself in the skill with which the result is effected; from this point onward the story will be an illustration of the wisdom of divine providence. And the illustration being so naive, our interest in it is but small. The art of the narrator, which we were able to admire in the opening chapters, seems to leave him. This, however, is only because he has attempted too ambitious a task and not kept within the bounds of his limited abilities. He laboriously seeks to keep up our interest by a succession of minor artifices.

Tobit sets his house in order before his death to which he is looking forward. At Rages in Media he has deposited a sum of money with Gabael, and Tobias must go and fetch it. We are not now able to say whether this element figured in the original form of the Book of Tobit. In the present text we have word of it as early as in 1 14. To Rages the way lies through Ecbatana; we are thus able to divine that God is about to make use of the journey of Tobias for fulfilment of his plans. But we must have patience.

First the father has to give wise instructions to his son; they are, he may well believe, the last words he will ever speak to Tobias. We for our part know that Tobit is to be rendered happy once more by this journey, and thus, touched by the old man's love, we are tided over the delay in the action. Next, the father provides for the safety of his son as best he can: he chooses for him the most trustworthy travelling companion he can find. Again the narrator discloses too much. The companion is no other than Azaria, the angel Raphael in human shape. It is touching to read how strictly Tobit examines the stranger, so strictly that he has almost to apologise for his zeal. With our minds fixed on the blind father and his affectionate solicitude, we again forget that we are being detained. At last an agreement is come to, even in the matter of wages. A start can be made at last. The father gives his blessing, and wishes that the angel of God may go with his son. We smile to ourselves, knowing that the father's prayer is already fulfilled. With the narrator, the religious interest, that of showing his readers how God guides the destinies of men beyond all human thinking, predominates over the æsthetic interest which should have taught him not to relieve the tension prematurely. At the parting, there are tears; the blind old man has faith in God and remains calm, but not so the mother, whose one thought is that her only child is leaving, and when she reflects that some sacrifice has to be made if the money is to be recovered, she deems the present one too great; 'We have enough to live on.' Has the narrator forgotten that Tobit is reduced to poverty? Or is it his intention to touch us still more deeply by putting into Anna's mouth the sentiment that she would rather go on with her present life of care and toil, if only her dear son might stay at home? Tobit attempts to divert his wife from her sorrow by 'gently trying to excite her pity for himself; thine eyes shall see him! He himself is blind: even should he survive till his son's return, still he will not see him!' (M. Plath).

We see how the author's main endeavour is to keep up the reader's interest by touching his heart. He tries to reach his audience where it is most susceptible; it is one of the artifices he employs to maintain the life of a narrative which has lost the element of suspense.

The departure in its various scenes—the decision, the parting instructions, the choice of a companion, the farewell—occurs in Nineveh. The next scenes, describing the journey, naturally are laid in a variety of places; the most important are the encampment by the Tigris, and the stay at Raguel's house, so important that the original object of the journey, the recovery of the money entrusted to Gabael at Rages, becomes a mere episode, appended to the scene in Ecbatana. We know beforehand the real providential purpose of the journey, and thus are not surprised at the turn it takes. But that in the end the angel, not Tobias, should fetch the money, seems a small but charming variation: 'things fall out quite differently from what we imagine' (M. Plath).

Before going to sleep one night young Tobias bathes in the Tigris. A fish leaps out upon him and snaps at his foot. A and B have aggravated the natural situation, in order to make the story as marvellous as possible. With them the fish threatens to swallow the youth. And yet, at the angel's bidding, he is forthwith able to seize hold of it and to cast it on the bank so that there is no real danger. At Raphael's request he takes with him the heart, the liver, and the gall of the fish. The pair continue their journey and draw near to Media, the true goal predetermined by God.

The decisive stay at the house of Raguel is led up to by two preparatory scenes—conversations between the angel and Tobias in the course of their journey—and is followed by two others relating to the recovery of the money from Gabael, and the arrival of the latter at Ecbatana. The two dialogues, on the borders of Media, before Ecbatana is reached, are intended to shorten the long story of the journey and to relieve the reader. Again the artist deprives us of all the pleasure of suspense by elaborately describing beforehand everything that is going to happen.

Tobias himself gives occasion for this before Media is entered (so א; A and B less effectively have substituted Ecbatana) by his question as to the object in carrying with them the heart, gall, and liver of the fish they had killed on the evening of their first day's journey. When we learn that an evil spirit can be driven away by the fumes of this liver and heart, we at once perceive exactly how it is that Sara is to be

delivered. All that remains in doubt is as to whether Tobias will make up his mind to marry her, and whether Raguel is going to give him his daughter in marriage. That the son, however, should not think at once of his blind father when he hears that with the gall the malady Tobit is suffering from can be cured, astonishes us, especially when we see later how mindful Tobias is of his father: 'My father counts the days!' are the words with which he sends the angel to Gabael. Nor does he linger with his parents-in-law an hour beyond the exact time he had promised. Clearly the narrator took no special interest in the characterisation of his various personages; his main interest is in exhibiting and proving the wise governance of God: 'God rules supreme and rules all things well' is his central theme.

The way having been prepared by an explanation of the healing virtues of the various parts of the fish, the angel proceeds to disclose his plans. They are now before the gates of Ecbatana (A and B again read, wrongly, Rages). Their next lodging-place is to be Raguel's house. He has but one child, a daughter, who is fair and wise. Azaria will speak to her father that she may be given in marriage to Tobias. The wedding will be held after the return from Rages. ('Afterwards things turn out differently from what had been thought.')

To Tobias, more than to any other, does the right of inheritance belong. This proposition, which doubtless originally simply meant that Tobias, the son of a poor but pious father, was the husband chosen for the girl by the wise counsel of God ('she is appointed unto thee from the beginning,' 6 18) was only at a later date thought out in the manner of commentary to the effect that the two were nearly related, and their marriage as near relations would be well-pleasing to God and to the Jewish nation.

Had Tobias known nothing of Sara's misfortune, he would now have consented on the spot. As it is, he pleads that, being the only son of his parents, he dare not lightly risk his life. In itself considered the plan which the angel unfolds is not to be rejected.

He is already strongly prepossessed in favour of it. The young man's love for his parents is most touching. He thinks only of their sorrow, and does not fear the evil spirit except on their account. That Sara's story should be known even in Nineveh, presupposes a lively intercourse between the two places. And such there may have been, not only in the narrator's own time but also in former days; we must not fall into the error of underestimating the trade of antiquity.

To repel his scruples, the angel reminds the youth of his father's injunctions. Unquestionably his reference at present is to the one injunction which bade him marry a woman of his own kindred. Originally, perhaps, no such reminiscence may have stood in this place.

Or possibly, as is also supported by tradition, the reference may have been simply to the father's injunctions generally. In that case we shall perhaps have to think of some such precepts as those in א: 'They who practise sincerity, shall be blessed in their works; and to all that work righteousness, God shall give good counsel.' In this case the angel will have seen an act of righteousness in the deliverance of Sara. To the present writer this explanation seems the best.

The argument brought forward by the angel constitutes the main point to which the whole dialogue leads up; the means exist, by which the evil spirit can be driven away.

Once more we get a description of the virtue that lies in the heart and liver of the fish. The narrator tries to make it interesting by giving Tobias at the same time precise directions as to the manner in which the remedy is to be applied. Tobias now changes his mind; he is in love with Sara, or, we should say, he finds the proposed marriage with the fair and wise daughter of the rich man most acceptable. Such sentiments to the ancient conception furnish foundation enough for a happy union.

The second scene before the stay at Ecbatana represents a dialogue of persuasion, the first one of instruction. Judged from our æsthetic standpoint the whole of the preliminary scene ought to have been given in the form of a single dialogue of persuasion. The narrator's tendency is to break up the action into as many scenes as possible. In the discussion as to the derivation of the material, we shall have to keep this consideration in mind (§ 16).

There is no agreement in the rendering of the principal scene, that at Ecbatana. All that can be clearly seen from the varying versions of it is the emphasis that is everywhere laid on Raguel's hospitality. In the end the betrothal comes about as planned by the angel.

Here again, according to A and B, which may reproduce the oldest reading, Azaria takes the most important part, inasmuch as it is he who communicates to Raguel the wish of young Tobias. In א, where, exceptionally, in these scenes the relationship between Sara and Tobias is particularly dwelt upon, Raguel overhears the young man talking to the angel about the marriage, and is at once captivated by the idea.

A marriage contract is drawn up in writing. Thereupon Edna prepares the bridal chamber for her daughter. Again tears are shed; the intention is to move the heart of the reader; there is something pathetic about the lot of the maid who has already buried seven spouses. The effect of the scene, however, has been destroyed from the outset as we already know of the impending happy issue. In the bridal chamber Tobias, at last, makes use of the angel's prescription. The fumes put the demon to flight. That he should be fettered by the angel in Upper Egypt is something we were not prepared for. From all we have been told so far, we should have expected the mere fumigation to suffice for complete deliverance from the evil spirit. The prayer the young man now offers is specially Jewish. In arrangement it resembles those previously recorded.

Meanwhile Raguel is digging a grave for his daughter's betrothed. The bridal is to be in secret; the unhappy man dreads his neighbours' evil tongues. This proceeding shows that Sara's latest betrothal does not differ in any way from those which preceded it. No relationship, therefore, between the couple is presupposed. For the rest, we are at a loss to understand the feelings of the actors now before us who with cold hearts dig graves out of fear of their neighbours, who send a maidservant quickly into the bridal chamber to see whether the grave shall be needed; nor yet the feelings of the readers who felt edified by the prayer of thanksgiving offered immediately afterwards by the digger of the grave. Instead of a funeral there is now a wedding. In the end it is the angel who has to collect the money for the happy bridegroom. Gabael himself comes to Ecbatana to the wedding. It is probable that א has here the more original text; in A and B the phraseology is so curt as to be almost unintelligible.

Gradually the story draws to an end. Two scenes prepare for the close. Again the narrator keeps his readers waiting. He takes us first to Nineveh. The old people are awaiting their son's return in vain. Whilst Tobit is patiently resigned, the mother in her anguish spends her nights in weeping and her days in watching the road along which her son had passed. At Ecbatana, on the other hand, the son amid all his happiness has not forgotten his lonely parents. Vainly does the hospitable Raguel press him to tarry. Amid the blessings of his new relations Tobias takes his departure along with his wife and the angel. After he has given his blessing, the father reminds his daughter of her duty to her parents-in-law. The mother, on the other hand, urges her son-in-law to be kind to his wife.

Shortly before Nineveh is reached the angel once more takes the part of a faithful adviser; again, he gives instructions to Tobias how to heal his blind father. In a touching way the narrator brings before our eyes the helplessness of the blind old man before he is healed. The cure accomplished, Tobit praises God, and to the great astonishment of the neighbours, himself goes out to bring his daughter-in-law home. A seven days' wedding follows. At this point, now that the angel has brought Tobias safely back, rescued his wife, recovered his money, and healed his father, his task seems done, and we expect him to take his leave. But first he must carry out his rôle as travelling companion to the end. As trusty guide he must receive his wages. Tobias proposes to share equally with him the wealth he has acquired. Now at last the angel reveals to them

his true nature. In a long discourse which, as M. Plath has observed, recalls the style of the psalms and of Sirach, he makes himself known after declaring that he had been a witness to the burial of the dead. They are bidden praise God and commit everything to writing. 'After the angel's command to write in a book all the things that have happened, what we expect to read is: And they wrote everything down, and here is the book' (M. Plath).

14. History of story: time of greatest vogue.

(*a*) On a survey of the book and its history, it becomes clear in the first place that it must have greatly interested the reading world. This is shown by the varying MSS. Each individual possessor, copyist, and translator has by the introduction of certain turns and small alterations which commended themselves to him, given expression to his sympathy with the lot of those pious people who are the subjects of our story.

(*b*) Next we are carried back to a time in which this material was read with peculiar eagerness; the time, namely, about 150 A.D. The failure of the Jewish rebellion presented a temptation to abandon Jewish peculiarities and the ancient manner of life altogether. It was at this time that the pious exhortations of Tobit were amplified, and the duty of cohesiveness was insisted upon since pride towards one's own brethren brings only confusion. Quite recently these days of woe had been made to throw their dark shadows on the very pages of the book. Tobit the faithful Jew of the unhappy Assyrian days, the pious sufferer in evil times, was the man to speak an earnest word to those of the Jews who had escaped the oppression of the revolt. At the same time he could also give them a word of comfort, by telling them about the Jerusalem of the final future. In such manner was the original form of the book modified so as to adapt it to the needs of the time.

(*c*) The original form must at one time have had a separate existence—perhaps in a collection of legends, since it represents a complete story, artfully constructed.

IV. Ultimate Sources

15. Tendency of final redactor.

The form of a book depends on three factors: the character of the material, the personality of him who gives it shape, and the wants of him who reads. There must have been a public to welcome it if we find here a melting story, with characters doomed to suffer and to bear, to whom angels from heaven are familiar beings, whose lives are spent in prayer and pious contemplations. The readers rejoice over those who are compassionate, but only heaven can reward them. The story is not written for the rich but for the poor. These do not undertake long journeys; but they like to hear about them. They know well what anxiety a son's journey can cause to a father and mother. To be sure, everyone has heard of people who have travelled; these will be welcome as companions should necessity for travelling arise. Such things as these are not the staple in stories that circulate among traders and merchants. In those stay-at-home circles there is belief in magical medicaments such as are supposed to be found in foreign lands. In the great rivers of distant lands swim fish whose heart and liver can exorcise evil spirits, whose gall can heal blindness (cp § 6). Such readers are at the same time rigorously exacting. Each marriage has to be preceded by a written contract; money is not handed over without a document. A reading public of this sort could have been found in Palestine, but in Egypt, as also in Babylonia, the Jews were doubtless, for the most part, engaged in trade. Moreover, the knowledge of the regions of Mesopotamia is by no means exact, and we read that the evil spirit is chained in Upper Egypt. Only a writer living sufficiently far off could think of that country as the battlefield for contending spirits. Yet the men address their wives as 'sister,' in the Egyptian manner. Thus the flourishing period of Palestinian history under the rule of the Ptolemies about 300 B.C., and the influence they wielded, must have previously made itself felt. The year 200 B.C., therefore, may be suggested as the approximate date of the original form of our book.

In the analysis given above (§ 13) allusion has already been made to the tendencies shown by the individual who gave its final shape to the material before him. He is fond of breaking up the story into short separate scenes, of sharp contrasts, of elaborating particular scenes. Let us now try, on the basis of these observations, to ascertain what was the nature of his work upon the material handed down to him, and so to obtain approximately some idea of the story as it was when he found it.

16. His work.

First of all then, our attention is claimed by the artistic composition of the opening of the story. A popular legend does not deal in so complicated a manner with two separate scenes of action. The artful parallel composition of the scenes in Nineveh and in Ecbatana is the narrator's own work. The elaborate parting scenes in which we see the old man giving wise advice, the young man looking out for a travelling companion, the anxious father, the weeping mother, cannot be imagined otherwise than as a narrative definitely fixed in writing; it is impossible to regard it as a tale popularly handed down by word of mouth. The dialogues between the two travellers are also highly artificial compositions. The waiting parents as contrasted with Raguel hospitably pressing his guests to tarry, seem also to have been introduced by the narrator. There remain, accordingly, only the following elements (which perhaps, however, might be still further reduced) to be noted as appertaining to the material upon which the narrator has operated. (1) The burial of a dead body, and the blinding of a head of a family; (2) impoverishment, so that the blind man's wife has to work for their living; (3) a son, accompanied by a stranger, makes a journey to recover money; (4) on the way they have an adventure with important consequences; (5) a marriage with a rich heiress, whose lot has been made intolerable by the jealousy of an evil spirit who will not suffer her husbands to live; (6) the healing of the blind father; (7) the stranger declines to accept the acknowledgement offered to him (half of the entire estate) in order at last to disclose himself to be an angel who has been a witness of the burial of the dead.

17. Basis in folk-lore.

Since the appearance of Simrock's work *Der gute Gerhard und die dankbaren Todten* (Bonn, 1856) zealous efforts have continuously been made to trace back the raw material of the Book of Tobit to a widely-spread story of the gratitude of a departed spirit, of which several versions are collected by Simrock. A similar Armenian story has also been unearthed (originally published by A. v. Haxthausen in his *Transkaukasia*, Leipsic, 1 333 *ff.*, and recently again by M. Plath). In dealing with the question whether the story of Tobit goes back to a tale of this sort, we have to bear in mind that all the kindred stories hitherto brought forward, whether from Germany, Holland, France, Italy, Denmark, or Armenia, have in every case passed through a long development. They have been current in many lands, and been told in many tongues.

18. Armenian form of tale.

The Armenian tale knows nothing of the father of the hero. The hero pays the dead man's debts with a view to his burial and finally is himself reduced to poverty. Here the impoverishment is not so well accounted for as in the Book of Tobit. Just as in our tale the Armenian hero also wins a rich but unfortunate heiress in marriage. He is aided in this by a man who afterwards makes himself known as the spirit of the dead man whom he had buried. To him, too, half of the estate is assigned;

but, full of gratitude, he declines to accept the gift. Here, plainly, the tale is essentially simpler. There is no journey. This last feature may have been introduced by preference in places where people liked to hear about such journeys into foreign countries. Elsewhere this feature of the story came to be forgotten. In the Armenian tale the inner connection of the parts is not so close; oral tradition is not so strict about details as one who writes down his stories. The spirit fights with his sword against a serpent that on the wedding-night comes out of the bride's mouth and seeks to kill the bridegroom. The serpent, we may safely take it, represents an evil being. A reminiscence of a similar struggle is found also in the Book of Tobit; Raphael binds the evil spirit. We are therefore led to the conclusion that two variations can be shown; in the one the hero wins the bride by conflict with an evil spirit, in the other it is by a magical charm. The interest in magical effects was particularly strong among the Babylonian Jews.[1] Possibly the tale may have acquired this feature in the course of its journey westwards from the regions of the Euphrates. A third variation, of a specially Jewish character, tells of the hero's effective prayer on the night after his wedding. This variation, the most important from the Jewish point of view, has not been able to supplant the other two in the Book of Tobit. In the Armenian tale the blind father is forgotten. Popular tradition has thought only of the hero, whilst in the Book of Tobit the narrator who, we might almost say, is constantly occupied with the endeavour to find a motive for each separate incident in the narrative, has endeavoured also to account for the father's loss of sight; possibly it was he who gave to the story the turn by which the father who buries the dead man is made to become blind. In that case we must suppose him to have attributed the meritorious work of burial to the old man. The son it is, indeed, who obtains the reward, but the old man recovers his sight, and, according to a truly Jewish notion, is rewarded in his son. An important element may have been lost in transit—the payment of the dead man's debts. But M. Plath is right in pointing out that the Jews, who were painfully punctilious about such things, may have found themselves unable to take any special interest in this feature of the story. Thus the Jewish narrator may willingly have dropped the point, seeking instead to explain the hero's impoverishment in another way—namely, as caused by his loss of sight.

The stories collected by Simrock have one more feature in common: the hero runs the risk of losing his newly-won wife. She is restored to him by the aid of the spirit. What we have here is simply a favourite method of amplifying stories by repetition of the same motive.

19. Feature common to all.

People listened with such interest to the story of the manner in which a wife was won, that they were eager to hear it again and again. Hence the hero has to be in danger of nearly losing his wife; by some one—often a previous suitor, or several of them (here we find the circumstance still preserved that the maid had many suitors)—the attempt is made to kill the hero, drown, wound, burn him. Frequently it is only at the crisis of these perils that the grateful deceased is brought into action, and helps in restoring the lost wife to the hero by whom she has previously been won single-handed. To the first successful effort to win the maid there was added another, and it was sought to make the repetition attractive by introducing variations. In doing so, no hesitation was felt in omitting the spirit's share in the exploit if this was thought desirable. The influence of Christianity also occasionally makes itself felt.

In one form of the story the rebuilding of a ruined church of St. Nicholas takes the place of pious burial of the dead. The saint afterwards plays the part usually assigned to the helpful spirit.

In many forms of these stories the aged father of the hero is retained, only he does not come so much to the front as in the Book of Tobit. It is he who sends the son forth on a journey.

Also the trait which represents the old man as blind and recovering his sight by the skill of the departed spirit, occurs in one of the stories. We may conjecture this point to have been a characteristic one in the old story. As the adventures of the son were added, the father easily fell more and more into the background; the same interest was no longer felt in his fortunes, he became a secondary character, until he finally disappeared altogether in many variants of the tale. In Tobit the development has tended in precisely the opposite direction. The wife reduced to toiling for strangers is also a favourite figure in these stories; only it is the wife of the hero, often represented as reduced to poverty in winning her.

Finally, the spirit of the departed does not always appear in human shape; some of the stories introduce him as a mere ghost. In one of them 'a vast figure' supports the hero, in another a tiny, wrinkled mannikin, in a third a bird, in a fourth a raven, in a fifth a swan, in a sixth a talking wolf. In the Book of Tobit the rescuer appears in human shape; there are traces, however, which might seem to indicate that an animal-form appeared in one of the variations.

A dog follows the youth on his journey to and fro—in a meaningless way, one might almost say. Surely it would be exaggeration at least to call this, as M. Plath does, 'a charming touch of naive miniature-painting.' We should at least expect on the homeward journey, that the dog would go before and make known the travellers' return. It was only in a late redaction that this natural expectation was gratified (so Syr. and Jer.). Now, just as in the account of the maiden's rescue from the evil spirit traces are to be found of an older tradition, it is possible that here also we have a trace of the same sort. The dog which accompanies the hero when he starts may have been in one of the variations of the tale the spirit of the dead man. In another, which has a more historical air, there survives only a feeble recollection of this feature, to which afterwards increased importance came once more to be attached.

If we choose to lay stress on the fact that the demon bears the name of Asmodeus, which comes from the Persian Aēshma daēva, we might find further confirmation of the conjecture just offered when it is reflected that with the Persians a certain power over evil spirits was assigned to the dog. Thus we get four variations in the story of the winning of the maiden, somewhat as follows:—

(*a*) The myth of the fight of a radiant heavenly being with a demon (cp on Persian soil the Sraosha's combat against Aēshma daēva); (*b*) the story of a dog as a faithful protector and travelling-companion (cp the wolf in Simrock); (*c*) the story of the magic remedy against the impure spirit; (*d*) the edifying tale of the pious prayer on the wedding-night. Cp ZOROASTRIANISM, § 22.

We shall therefore have to attribute to the Tobit legend a foreign origin. Nor shall we be going too far if we suppose that abroad numerous variations were already afloat.

20. Foreign origin.

In the story as it spreads by word of mouth, the separate features get displaced; many are forgotten, new things are added. One idea, however, is firmly held: the idea, namely, that to have pity on the unburied dead is a meritorious work; it is sure of its reward; the buried one is grateful. The history of the Book of Tobit shows us how even in remote times the nations learned from each other, and how they worked up the material they had thus acquired, each in its own way. The Jewish nation also, which we are erroneously in the habit of regarding as so exclusive, takes up a foreign legend, goes on repeating it until it has got it into fixed oral form, in order next to pass it on to some story-writer who is able to shape it into an edifying household tale, capable, in subsequent adaptations suited to the requirements of each successive time, of ministering comfort to many succeeding generations.

Rendel Harris, and Agnes Smith Lewis. Nestle, review of *The Story of Aḥikar*, *Exp.T* 10 [1899] 276 *f.*, and 'Zum Buche Tobit,' *Septuagintastudien*, 2 [1899] 22 *ff.*; J. Rendel Harris, 'The Double Text of Tobit,' *Amer. J. Theol.*, July 1899, pp. 541-554; Moulton, 'The Iranian Background of Tobit,' *Exp.T*, March 1900, pp. 257-260.

21. Literature.

W. E.

TOCHEN (תֹּכֶן; θοκκα [B], -χχαν [A], ενθεκεμ [='ת עין?] and ιεχθεμ, perhaps a doublet, [L]), a village in Judah assigned to SIMEON (§ 10), 1 Ch. 4 32. It corresponds to the Ether of ‖ Josh. 19 7, which is probably a corruption of ATHACH (*q.v.*).

In Josh. (*l.c.*) 𝔊^B inserts θαλχα (var. in cursives θαακ, θααλ)—*i.e.*, Tochen,—before ιεθερ—*i.e.*, Ether. Bennett (*SBOT*, 'Josh.,' Heb.) follows 𝔊^B, but the insertion must be due to a later correction. תכן is perhaps a corruption of עתך. See ATHACH.

TOGARMAH (תֹּגַרְמָה, Gen. 10 3 [P], elsewhere תּוֹגַרְמָה: θοργαμα [BQD^sil EL], θεργαμα [B in Ezek. 38 6; but θαιργαμα in 27 14; Q in Ezek. and A everywhere except 1 Ch. 1 6 θορραμ]; *Thogormah* in Gen., elsewhere *Thogorma*, Pesh. *tūgarmā*).

Togarmah appears in Gen. 10 3 1 Ch. 1 6 as third son of Gomer, son of Japheth; also (as Beth-Togarmah) in Ezek. 27 14 as a people trading with Tyre in horses and mules, and in 38 6 as representing the far north, and forming part, with Gomer, of the army of Gog. Josephus thought of the Phrygians, who were famous for their horses (Hom. *Il.* 3 185); the Armenians, however, in later times claimed Haik the son of Thorgom for their ancestor. The name has been identified by Delitzsch and Halévy independently with Tel-garimmu, a city (mentioned by Sargon and Sennacherib) situated on the border of Tabali (see TUBAL). That *l* (ל) had become *o* in the document from which P drew, surprises Schrader (*KAT*(2) 85), nor can we blame him. The truth probably is that here, as elsewhere in Gen. 10, corruption and reconstruction are jointly the causes of the present form of the Table of Nations. 'Gomer' is one of the current corruptions of 'Jeraḥmeel'; Ashkenaz is a combination of Asshur and Kenaz; Riphath is a corruption of Zarephath (the southern Zarephath), and Togarmah represents either Gomer simply or Beth-gomer (=Beth-jerahmeel). This throws light on Ezek. 27 14 38 6. See *Crit. Bib.*

See Del. *Par.* 246; *Calwer Bib.-Lex.* 906; Hal. *REJ* 13 13; Lag. *Armenische Studien*, § 865. T. K. C.

TOHU (תֹּחוּ), b. Zuph, a name in the genealogy of Samuel (1 S. 1 1, θοκε [B], θοου [A], θωε [L]), corresponding to NAHATH (נַחַת; καιναθ [B], κ.ναθ [A], νααθ [L]; *nāḥāth* [Pesh.]) in 1 Ch. 6 26 [11], and to TOAH (תּוֹחַ; θειε=תיח [B], θοουε [A], νααθ [L]; *tāḥu* [Pesh.]; *Thohu* [Vg.] as in Sam.) in *v.* 34 [19]. The second of these forms (נחת) may have arisen out of תחת by a scribe's error. But this is not certain, for Nahath, in Gen. 36 13, is the son of Re'uel=Jeraḥmeel (Che.). Most (*e.g.*, Klost., Dr., Bu., Ki.) adopt the form Tohu; but, on the assumption that Zuph is really an Ephraimite place-name, some prefer תַּחַן or תַּחַת (cp We. *Prol.*(4) 220; Marq. *Fund.* 12, and see TAHATH, EPHRAIM, § 12).

[The subject, though small, is intricate, and the correct reading of the text can only be decided as a part of a larger inquiry, which includes the question whether Samuel was not really of a Jeraḥmeelite family, belonging perhaps to Benjamite territory in the Negeb. Textual criticism, too, has to be practised comprehensively. Cp RAMATHAIM-ZOPHIM.—T. K. C.]

TOI (תֹּעִי, θουου or θοου [B], θαει [AL], 2 S. 8 9 *f.*), or TOU (תֹּעוּ, θωα [Bא], θοου [A], θολα [L]; *Pul, king of the men of Antioch* [Pesh.], 1 Ch. 18 9 *f.*), king of Hamath, who sent his son Joram (or, as Ch., HADORAM) to 'salute' David (*i.e.*, to recognise his suzerainty) and to offer presents of silver, gold, and bronze, after David's victory over Hadad-ezer. If the text is correct, Toi's Hamath cannot be the great Syrian city of Hamath, whose king was too powerful to mind David, and indeed was not one of David's neighbours, but a second Hamath, on the W. of Zobah, which formed a state on the same minute scale as Maacah (=Geshur). So Winckler (*GI* 2 209 *f.*). More probably, however, both here and wherever a Hamath is spoken of as on the border of Israel, חמת (MT Hamath) should be מעכת (Maacath).

It is, to say the least, uncertain which of the two Maacahs is intended here (see MAACAH). The Hadad-ezer defeated by David may have been king of Zarephath (not ZOBAH). In this case 'Maacah' may be another name for the territory of REHOBOTH (*q.v.*), and תעי will perhaps be a corrupt form of תלמי, TALMAI (*q.v.*). Cp, however, Driver and Budde [*SBOT*] on 2 S., *l.c.* T. K. C.

TOKHATH (תָּקְהַת, *ḳrê*), 2 Ch. 34 22; see TIKVATH.

TOLA (תּוֹלָע, θωλα [BADFL]), b. Puah, b. Dodo, an Issacharite, a deliverer of Israel, who dwelt, and finally was buried, at Shamir in 'mount Ephraim' (Judg. 10 1 *f.*); the name also occurs with Puvah, Job (or Jashub), and Shimron as a clan-name of Issachar (Gen. 46 13: θωλαν [L]; Nu. 26 23 1 Ch. 7 1 *f.*: θολαεκ, θολε, θωλαει [B]; cp **Tolaite,** Nu. *l.c.*, θωλα[ε]ι [BAFL]). On these 'minor judges' in general, see JUDGES, § 9; and on the difficulties arising out of (1) the designation 'son of Dodo,' (2) the description of Tola's home as in Mt. Ephraim, and (3) the reading καριε (or καρηε) in eight minuscules which are, with one exception, without the reference to Issachar, see ISSACHAR, §§ 2, 7; lastly, on the coincidence between Tola, 'crimson worm, cochineal,' and Puah (פואה), a plant from which a red dye was obtained, see Moore, *Judges*, 273 (cp NAMES, § 68). All these questions are still open.

The problems may seem small; but they are not insignificant. To understand 'Tola' we must revise our notions respecting Abimelech, Jair, and Jephthah, between whom 'Tola, b. Puah, b. Dodo' is introduced. In reality the three former heroes all belong to the Jeraḥmeelite Negeb, Abimelech to Cusham (see SHECHEM), Jair and Jephthah to 'Ir-gil'ad' or 'Ir-jeraḥme'el.'[1] The personal names too have suffered change; here the alteration was to a great extent caused by the wearing down of the old names in the mouth of the people. 'Abimelech,' which, superficially regarded, appears to mean 'the heaven-god is father,' may be a modification of 'Arāb-Jeraḥmeel'; 'Jair' of 'Jether,' 'Jephthah' of 'Naphtoaḥ.'[2] On the analogy of these and similar restorations, we are methodically bound to read thus in Judg. 10 1, 'Eshtaol, b. Ephrath, b. Dodi, b. Jeraḥmeel, a Zarhite; he dwelt in SHAMIR (*q.v.*) in the highlands of Jeraḥmeel.' The least obvious of these restorations is אשתאול (Eshtaol) for תולע (Tola). The emendation, which is at any rate plausible, is suggested by the combination of Zerah and Shaul in Nu. 26 13 (Gen. 46 10). Eshtaol—*i.e.*, virtually Shaul—is, in fact, a N. Arabian clan-name of the Negeb;[3] indeed, in 1 Ch. 2 53 the Eshtaolites are expressly connected with Kirjath-jearim—*i.e.* (as one can now see), Kirjath-jeraḥmeel. Καριε or καρηε should, according to sound method, represent קרח (Kareah or Korah), and this is probably the expansion of a fragment of Jerahmeel, which came to be adopted as the name of one of the Jeraḥmeelite clans. That Shemer is a N. Arabian clan-name could easily be shown at length, but is plain enough from the combination of names in 2 Ch. 24 26 (2 K. 12 21). That there is a southern Ephraim (=Jeraḥmeel) has been repeatedly maintained by the present writer (cp MICAH, 1). As to the historical kernel of Judg. 10 1 *f.*, it is enough to remark that, though genuine historical evidence is wanting, it is at any rate probable that king Saul was not the first member of the Saul-clan to strike an effective blow for Israel, and that the earliest achievements of this clan were not in Benjamin but in the Negeb.

The same emendation (זרח for יששכר) should possibly be made in Judg. 5 15 (see *Crit. Bib.*). T. K. C.

---

[1] 'Kamon' in Judg. 10 5 might come from 'Mahanaim' (cp KAMON), but also from 'Jeraḥmeel' (which is moreover the probable original of 'Mahanaim' and 'Karnaim'). עָרֵי גִלְעָד in 12 7 can hardly in the present state of inquiry be regarded otherwise than as a corruption of עִיר גִלְעָד. There seems to the present writer to be evidence of a southern Gilead (another name for Jerahmeel?).

[2] Or, *vice versa*, Naphtoaḥ (cp Naphtuḥim) is a modification of Jiphtaḥ; cp Nathan and Ethan.

[3] 'Eshtaol' is probably a modification of the clan-name Shaul; the *t* is a transition-consonant—*i.e.*, it facilitates the transition from one articulation to another (cp Kön., *Lehrg.* 2 1, p. 472).

TOLAD (תּוֹלָד), 1 Ch. 4 29; in Josh. 15 30 ELTOLAD.

TOLBANES (τολβανης [BA]), 1 Esd. 9 25 = Ezra 10 24, TELEM.

TOLL (מִדָּה, Ezra 4 20; מִנְדָּה, Ezra 4 13 7 24). See TAXATION, § 7 n.; cp TRADE, § 83 (*f.*) (2).

TOLMAN (τολμαν [A]), 1 Esd. 5 28 RV = Ezra 2 42, TALMON.

TOMBS.[1] As already observed (see DEAD, § 1, col. 1041), the regular practice of the Hebrews was to bury their dead, the instances in which they burned them being exceptional and extraordinary.[2] The explanation is to be sought in the idea that the human soul remained even after death in some kind of connection with the body; in the case of unburied persons, as long as the body found no resting-place, the soul also had none. The spirits of such departed ones wander restlessly about, and even in the world of the dead, in Sheol, must hide themselves in holes and corners (Ezek. 32 23 Is. 14 15, etc.).

1. Religious conceptions.

These views being held, one would expect to find the Hebrews not only attaching great importance to burial but also giving special care to making their tombs as splendid and artistic as possible. It was by similar views, in point of fact, that the Egyptians were led not only to preserve—one might almost say, for ever—the bodies of their dead by embalming them, but also to build magnificent resting-places for them, dwellings resembling those of the living, and furnished with everything in which the soul when in life took most delight. Thus it was in the construction and adornment of its tombs that the art of Egypt found its most welcome tasks and the widest field for its development. With the Israelites, however, the case was quite different. With them, apart from cases where Greek or Roman influences interfered, the places of sepulture were always of the simplest description, without any resort to the arts of the painter or the sculptor. The cause of this is, naturally, to be sought in the first instance in the Hebrews' notorious deficiency in artistic endowment; in none of the fine arts did they ever make any important contribution of their own. Cp COLOURS, § 1. In the present case, however, we ought probably to take account also of the operation of a religious motive which prevented the Israelites, while borrowing from the Phœnicians in other respects, to imitate them in the architectural beauty and monumental grandeur of their tombs. The religion of Yahwè from the outset set itself against every kind of worship of the dead with the utmost emphasis.

However we may explain it, the fact is undeniable that Yahwism had at times to contend with a very strong inclination towards this form of worship. This could not fail to have its influence on the outward form given to places of burial. Everything that was fitted to promote worship of the dead in any form must have been antipathetic to Yahwism. And as the worship of the dead on the one hand led directly to the sumptuous adornment of the places where they lay, so on the other hand beauty and luxury displayed in these could not fail to promote that form of worship.

It was entirely in accordance with the spirit of Yahwism that the graves of the dead—though with all reverent piety towards the dead, and notwithstanding the existence of the view stated above—were kept as plain and simple as possible.

The whole of Palestine is rich in ancient burying-places. It would be natural, therefore, to expect full and accurate information as to the ancient Hebrew practice. This expectation, however, is not fulfilled; those which are known to us are far from having been sufficiently examined with respect to their origin and date, so that we are often unable (for example) to distinguish Christian from Jewish tombs. It lies indeed in the very nature of the case that there should be difficulty in dating these; by reason of their very simplicity they show no very characteristic architectural forms by which their period could be fixed, and inscriptions, too, are almost wholly wanting. It is not possible therefore to describe the sepulchral styles of the various ages in the order of successive periods,—in other words to sketch the development and history of this department of art. We must rest content with describing the ancient sepulchres still extant, classifying them according to the differences they show and deducing from these the characteristic features of this class of structure in the Hebrew domain.

2. Subterranean sepulchres.

The first generalisation which presents itself is that they are all of them rock-tombs, that is to say, hewn out of the living rock. Nowhere do we find any trace of built sepulchres. Of tombs above the level of the ground—mausoleums in which the sarcophagus was placed—no trace has reached us from ancient times nor do we hear of any such, any more than we hear of sarcophagi or coffins. With the Phœnicians, also, tombs above the surface are the exception, not the rule; but they are frequent in Syria in the Hellenistic period (cp, for example, the sepulchral towers of Palmyra). In so far as tombs above the surface occur in Palestine at all, they belong to the Hellenistic period; and even then the characteristic examples of this type of sepulchre are not buildings, but are hewn out of the solid rock. The same holds good of the subterranean tombs. Nor does the OT contain any hint of built sepulchres though this has often been supposed.[1] This is connected with the physical character of the country; the soft limestone of the mountains of Palestine presented many natural caverns which in the early period were used in the first instance as burial-places (see below). In particular, it was easily wrought, so that the excavation of vaults and chambers in it presented no difficulty too great for the technical skill of the Israelites to overcome.

There are indeed in Palestine (as already indicated) some examples of tombs above the surface. The best known are those of the Valley of Kedron; the so-called Tomb of Absalom and the Pyramid of Zacharias. These two, however, show quite clearly in their ornamentation the influence of Greek and late-Egyptian art; moreover, they too have been carved out of the living rock, and their arrangement is so analogous to that of the subterranean tombs as to make it quite clear that it has been copied from these.

A solitary exception would seem to be the so-called monolith of Siloam which, according to the unanimous judgment of archæologists, dates back to the pre-exilic period; but this great rock 'die' of 6.10 metres in length, 5.60 in breadth, and about 4 in height is also cut out of the living rock. It bears evidence of Egyptian influence, but on the other hand there is no trace of the Greek style. Perrot and Chipiez, however (*Hist. of Art in Jud.* 1 275 *ff.*), question for weighty reasons whether this monument really was originally and from the first intended as a tomb; more probably its purpose was formerly quite different (perhaps to serve as site for an altar) and the burial chambers and niches within must have been excavated later.

3. Phœnician models.

The model which served for the Hebrew tomb was unmistakably the Phœnician not the Egyptain type, alike as regards single sepulchres and collective groups. Here also a leading characteristic of Phœnician architecture comes clearly into the foreground (cp PHŒNICIA, § 8): the great part which is assigned to the perpendicular rock-wall. The individual tombs as well as the larger burial places were hewn by preference in steep rock-faces where nature offered these. For this purpose ready use was made of the walls of the caverns which are of such frequent occurrence in Palestine and which already furnish natural sepulchres (see below). Thus for example the hollow under the Ḥaram of Hebron—

[1] [For the various Hebrew and Greek terms, see below, § 9.]

[2] [Recent investigations at Gezer seem to show that cremation was regular among the earliest inhabitants of that district at least. But it is impossible to speak more decidedly until the excavations are completed; see *PEFQ*, 1902, pp. 347 *ff.*]

[1] On Job 3 15, see below, § 9 [5].

which has not as yet been explored with any detail—is a cave sepulchre. The finest example of a system of rock-hewn sepulchres of the type indicated is supplied by Petra, the 'City of Tombs.' There can be seen the most magnificent tombs, series upon series, with sumptuous portals, hewn at almost inaccessible heights in the perpendicular wall. These tombs, it is true, belong all of them to the later period, but thus they bear witness merely to the persistent survival of the practice. If no natural rock wall was available, then such a wall was artificially made by excavating from the surface downwards in a rocky bed a rectangular space with perpendicular walls. A quite characteristic example of this kind of burying-place is to be seen in the so-called 'Sepulchres of the Kings' at Jerusalem (fig. 1), though these also belong to the later period (1st cent. A.D.). Here we find a great enclosure (28 × 25.3 metres) excavated to a depth of 8 metres in the solid rock, and reached from the surface by a wide stair. The portal to the place of graves properly so-called, is on the western wall (see below).

On the other hand, no example has yet been found in Palestine of the shaft-tombs (tombs reached by a narrow perpendicular shaft),[1] so frequently met with in Egypt and so characteristic for this branch of architecture there. Yet it does not follow, of course, that this type of tomb was wholly unknown in Palestine in the olden time.

As regards the form of sepulchre proper in Palestine, the Phœnician type is closely followed. The extant examples fall into four classes: (1) Pigeon-hole tombs, usually called *kōkīm*,[2] rectangular recesses driven into the wall at right angles to the face, and measuring about 5-6 ft. in length by 1½ ft. in breadth and depth. Into these the body was thrust lengthways. (2) Sunken tombs which like

4. Form of tombs.

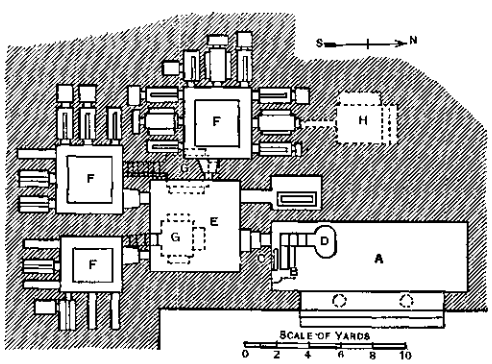

FIG. 1.—Plan of the tombs of the kings.

our modern graves were hewn out on the upper surface of the rock and closed with a flat stone. (3) Shelf tombs, that is to say benches or shelves on which the bodies were laid. These shelves either ran at a height of about 2 ft. round one or more walls of a sepulchral chamber, or else were hewn lengthways as niches in the rock wall (about 1½ ft. square, and of the length required for the body); in the latter case they were as a rule provided with an arch above. (4) Trough tombs, troughs hewn out of the perpendicular rock-wall, 1½ ft. wide and of the length of the body, some 2½ ft. above the level of the floor. These also are invariably arched. They thus represent a combination of the shelf tomb with the sunken tomb: a shelf tomb is hewn into the rock-wall and in this shelf a sunken tomb or mould like a coffin is hollowed out.

The observed departures from these four types are unimportant and in no case alter the fundamental type but relate principally to the measurements. In the *kōkīm* double resting-places are met with, that is to say, *kōkīm* of twice the ordinary width in which two bodies could be laid side by side; down the middle runs a little channel-like hollow about a handbreadth wide separating the two resting-places (see fig. 1); there are instances also of double benches for the reception of two bodies, though these are of rarer occurrence (see fig. 1 H).

In the trough-tomb class an interesting peculiarity is seen in a tomb near Ḥaifa. Here the trough-tombs are not, as is usually the case, like shelf-tombs hewn out lengthways along the wall, but like *kōkīm*, at right angles to its surface. In this case also double tombs occur corresponding to the double *kōkīm* mentioned above; a narrow slit nearly 1 foot wide separates the individual resting-places. Each pair of these is connected breadthways by a semicircular arch.

The tombs just described were not simply hewn out of the rock without further preparation. Even when it was but one grave for a single person that was in question, it was not the practice to excavate in the rock-surface a hollow like the graves we use; by preference a little subterranean chamber was made, and the grave was made in the floor or in the wall as the case might be. At first sight we might feel inclined to connect this general preference for subterranean sepulchral chambers with the original custom of using caves for purposes of burial. There was yet another element, however, which contributed to this result, namely the desire to keep the dead members of a family, or clan, still united even in the grave. In such a sepulchral chamber many graves of all the different kinds could easily be brought together. Subsequent stages were the adding of a second chamber to the first, or several chambers might be connected by passages, or great subterranean constructions made. Thus the places of burial fall into three distinct classes: (1) simple chambers for one body only which is buried in a sunken tomb in the floor. These burial chambers are frequently unclosed. (2) Single chambers with several graves of the different sorts mentioned, particularly *kōkīm* and shelf tombs. (3) Larger complexes embracing several chambers. Examples of all three classes are numerous in Palestine. To the first class, that of single chambers with only one grave, belong

5. Form of sepulchral chambers and groups of chambers.

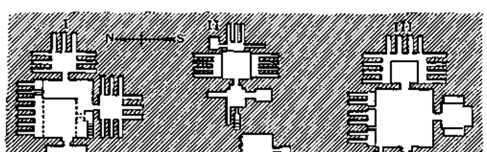

FIG 2.—Plan of the tombs of the judges.

many of the tombs on the southern slope of the Valley of Hinnom. In agreement with the purpose they serve, these chambers are for the most part rather small. Amongst these, on the side of the Hill of Evil Counsel, are also some belonging to the second class: single chambers with several graves. For a fuller account of these see Tobler (*op. cit.*, § 11 below). Very instructive examples of the third class of larger complexes are found in the so-called Sepulchres of the Kings and of the Judges in Jerusalem. Both examples indeed are of late date, but the Hellenistic influence (so far as it

[1] [Two examples of the shaft-type, however, have been found at Tell ej-Judeideh. A cylindrical shaft over 2 metres deep is hollowed in the rock, and at the bottom a small doorway leads to an irregular chamber about 1.80 metres by 1.50 (Bliss and Macalister, *PEF Excavations*, 1898-1900, p. 199 *f.* (1902).]

[[2] With the post-biblical כּוֹכִים (Dalman כּוּכִים), are connected the גוחין and גמחין of Nabatean and Palmyrene inscr. respectively; ultimately the word seems to come from the Ass. *kimaḫḫu*. For a discussion of other Nabatean terms, see De Vogüé, 'Notes d'Épigraphie araméenne,' 1175 *ff.*, *J. As.* (extrait), 1896.]

appears at all) is shown only in the ornamentation, particularly in the portal, not in the arrangement of the complex as a whole. The Sepulchres of the Kings display best the quite regular type. From the porch with a portal in Greek style a quite low narrow passage which was closed by a disk of stone leads into the approximately cubical antechamber which has no graves. Opening out of this on three sides are the three sepulchral chambers proper—also approximately cubical, with shelf and shaft tombs. Each of these chambers has a side-chamber also; of these two (fig. 1 G) are at a lower level and partly go under the principal chamber—plainly on account of the configuration of the site.

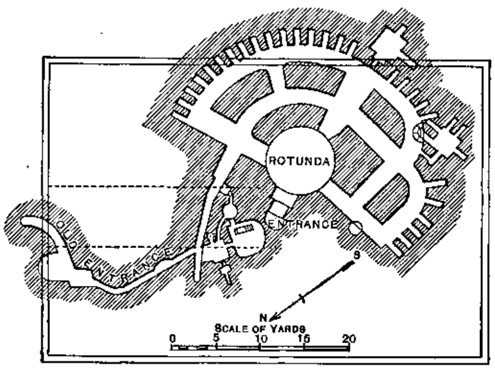

FIG. 3.—Plan of the tombs of the prophets.

This difference of level in the various chambers is the characteristic feature of the sepulchres of the Judges. These (see fig. 2) are on two different levels and, besides, in the upper sepulchral chamber, above the graves on the ground level at a height of about 3 ft. from the surface, there is a second set of chambers and graves.

A complete departure from this regularity is shown in a very interesting way by the so-called Sepulchres of the Prophets on the Mount of Olives, which hitherto are quite unique among the tombs of Palestine. They belong to the ancient—that is to say, at least pre-Grecian—period, and exhibit no trace of Hellenistic influence. Their original feature (see fig. 3) is that instead of various chambers of square or rectangular plan opening into each other, two semicircular passages round a rotunda are hewn out of the rock, and connected with one another and with the rotunda by means of ray-like passages radiating from the rotunda. In the wall of the outermost passage are 27 *kōkīm* arranged in ray-fashion, hewn out of the solid rock. Connected with this passage moreover are two side-chambers, also with *kōkīm*.

The principal difference between single tombs and family sepulchres is to be sought not so much in comparative size (for even the single tomb can have its antechamber, etc., as well as its chamber proper) as rather in the number and description of the separate resting-places.

6. Age of these forms.

So far as we are at present in a position to judge, the single tombs (*i.e.*, tombs with room for one or at most two occupants) have either shelf or trough tombs, and according to the pretty generally accepted opinion of Tobler, Mommert, and others, such tombs are to be regarded as ancient Jewish. On the other hand, according to the same authorities the single burying-place with grave hollowed in the ground is not to be dated earlier than the beginning of the Christian era. No instances are known of sepulchral chambers with only one or two *kōkīm*. This is easily accounted for: the use of this description of tomb, which demanded the smallest amount of space, was only desirable or necessary where the problem was to provide a relatively large number of resting-places within the same sepulchre. In the case of a single tomb even the smallest sepulchral chamber was always able to furnish room for a trough or shelf tomb (or alternatively a sunken tomb). *Kōkīm* are thus peculiar to family sepulchres, which in other respects have the same characteristics as single graves. The sunken tomb is also, in the case of family burying-places for the most part regarded as a sign of a relatively late date. Until, however, all the known tombs shall have been systematically examined, this question ought not to be regarded as definitely settled. So also the other questions as to the age of the shelf-, niche-, and shaft-tomb, and the frequency of their occurrence respectively at the different periods remain open.

Of one form only, namely of the *kōkīm*, can it be definitely affirmed that it was already extensively in use in the older period, as we can also say that the single chambers (mentioned above under § 5 [2]) are shown by the excavations to be, properly speaking, the oldest, and at all times the most usual type of tomb among the Israelites. These *kōkīm* placed at right angles to the wall surface, take up least room and permit the introduction of a large number of bodies into one chamber.

This arrangement appears as that most commonly in use in the Mishna also, where it alone is mentioned and precise regulations are laid down as to its size and the like (*Bābā Bathrā*, 6 8). The sepulchral chamber (מְעָרָה, *mĕʿārāh*, see CAVES) has to be 4 cubits in breadth and 6 in length; the entrance is to be on the short side; the other short side is to have two *kōkīm*, each of the longer sides three, making eight in all. It need not, however, cause any surprise to discover that the sepulchres which have been explored do not accurately answer these prescriptions (the nearest approach to them is found in a tomb at ed-Duweimeh and another on the Hill of Evil Counsel); practical necessities were stronger than prescriptions, and, in particular, the number of resting-places in each tomb greatly varies. In reality no rule is observable, but complete freedom prevails, as in the instances already cited.

That we may safely assume for the older period the employment of large complexes is made evident by the fact that the kings of Judah had two great burial-places of this description. In the first and oldest of these were buried the kings down to Hezekiah's time; Manasseh appears to have prepared a new sepulchre of the Kings (2 K. 4 18). We may safely suppose these tombs to have been of great extent, yet simpler than those of later date, and without much elaboration of ornament.

Not each separate resting-place was closed, but only the entrance to the sepulchral chamber. The sunken tombs on the surface of the ground were doubtless as a rule covered with a flat stone, but the *kōkīm* on the other hand were often left open.

7. Protection of tombs.

At the same time there was no special difficulty in this case also in closing the entrance with a stone, and this may frequently have been done. In the case of bench tombs, however, shutting up was impossible, for there the body, enveloped only in grave-clothes—coffins were not usual—was simply laid upon the shelf. All the more carefully therefore in these circumstances must the sepulchral chambers have been closed and protected against the entrance of wild beasts. The passages to these chambers are therefore for the most part very low and narrow, so that in entering one has to creep rather than walk. Even in the case of great sepulchres with fine large porches, as for example in the Sepulchre of the Kings (see fig. 1), the accesses are of this narrow sort. The external opening in such cases was closed either by a regular stone door turning on hinges, or—the more frequent case—by a round stone disk which could be rolled and placed before the entrance. Such a disk closed for example the entrance to the Sepulchres of the Kings and is still preserved. For this purpose, naturally, large and heavy stones were employed, such as one man alone could hardly move (cp Mt. 27 60: 'he rolled a great stone'). In order to ensure against slipping, another large stone, and doubtless also an underpin was frequently placed against the stone that properly constituted the door (*ZDPV*, 1878, pp. 11 *f.* 14; 1890, p. 177).

Such a method of closing served to guard the tomb against the ravages of wild beasts, but not against human visitants. This last protection, however, was

quite as necessary as the other. For nothing was so much dreaded as the desecration of the tomb by wilful violators—a dread which is easily explained from what has been said above (§ 1). And yet, it was not mere plundering of the graves, which often contained things of more or less value, or yet injury to the bodies or their disturbance (Jer. 8 1 2 K. 23 16) or even the total destruction of the tomb, that was feared. For the Hebrews it was already a great and wicked outrage if a corpse not belonging to it was laid in a grave, the dead body of one who did not belong to the family. Against such desecration at human hands full protection was certainly difficult. In some cases it was possible to hew out the sepulchre at an inaccessible height on the steep rock wall (Is. 22 16). But generally speaking it was found necessary to rely simply on the power of established custom which condemned any such wickedness in the strongest possible way. In another direction protection was sought by means of an inscription invoking the severest curses on any who should disturb the repose of the sleeper or introduce a strange body into the grave.[1]

With the Phœnicians it was a frequent custom to mark the site of a subterranean tomb by the erection of a memorial above ground. Various very interesting Phœnician monuments of the kind are still extant. On the other hand we have none that date from Old Hebrew times, and nowhere in the OT is any such practice indicated. The custom existed indeed of piling a heap of stones over the body in cases where it had been simply covered with earth; the purpose of this, however, was merely to protect from wild beasts (cp 2 S. 18 17). The pillar in the Valley of Kedron which Absalom raised for himself in his lifetime to keep his name in remembrance (2 S. 18 18) was not strictly speaking a monument but rather a pillar (*maṣṣēbāh*) having a religious purpose.[2] The memorial also at the grave of the anonymous prophet spoken of in 2 K. 23 17 may also have the same meaning. That the Hebrews at a later date adopted foreign customs in this respect also is shown by what we read of the magnificent mausoleum of the Maccabees at Modin (1 Macc. 13 27 *ff.*). See MODIN, § 3.

8. Monuments.

Hitherto little account has been taken of the notices of the subject contained in the OT. These also leave us quite in the dark as to the form and description of the sepulchres of the Hebrews.

9. Biblical data.

[The following Hebrew and Greek terms require mention:—

1. *ḳéber*, קֶבֶר, EV 'grave,' the commonest term, Gen. 23 4, etc. (Is. 22 16 with חצב, pre-supposing a rock-hewn sepulchre [cp HANDICRAFTS, § 1]); cp KIBROTH-HATTAAVAH.

2. *ḳebūrah*, קְבֻרָה, EV 'grave,' Gen. 35 20, etc.

3. *gādīš*, גָּדִישׁ, Job 21 32 † (see BDB; σωρός).

4. *nĕṣūrīm* (‖ no. 1 in Is. 65 4) AV 'monuments,' 𝔊 σπήλαιον suggests a burial-cave, but RV 'secret places' is preferable.

5. *ḥŏrābōth*, חֳרָבוֹת, Job 3 15 †, 'desolate' (RV 'waste') 'places.' Che. (*Exp.T*, Apr. 1899) reads קְבָרוֹת, following Hitz., Budde, Duhm, etc., who see an allusion to the treasures in royal sepulchres. The view that the pyramids in particular are referred to, is maintained by Budde and Duhm, but controverted by Che. in *Expositor*, 1897 *b*, 407. Ol. and formerly Che. read ארמנות, 'palaces.' But the reference seems to be to the splendour of the Sepulchre of the Kings (so at least Budde, Che., etc., but not Di. Davidson).

6. τάφος (in Ecclus. 30 18 = גליל, a stone placed over a grave), Mt. 23 29 AV 'tomb' (RV 'sepulchre,' and so EV in *v.* 27), etc.

7. μνῆμα, Mk. 5 5 Lk. 8 27.

8. μνημεῖον, Mt. 23 29 RV (AV 'sepulchre'), 27 52 *f.* (AV 'grave'), *ib.* 60*a* (in 60*b* AV 'sepulchre').

Nos. 6-8 are frequently used by 𝔊 indiscriminately to translate *ḳéber* and *ḳebūrāh*.]

The data supplied establish before aught else the great importance that was attached to having the members of the same family united even after death in a common tomb.

(Cp Gen. 15 15 2 S. 17 23 1 K. 4 31 15 8 24 22 51 2 K. 15 38, and often.) Barzillai desires to die beside the grave of his father and mother (2 S. 19 38 [37]); David in his magnanimity causes the bones of Saul to be buried in the tomb of Saul's father Kish (2 S. 21 14); Nehemiah gives it as his reason for wishing to go to Jerusalem that the fathers are buried there (Neh. 2 5). Jacob and Joseph lay upon their descendants an oath that they will bring their bones to the sepulchre of their fathers, in the cave of Machpelah at Hebron (Gen. 47 29 *f.* 49 29 *ff.* 50 25). Hence P's constantly repeated phrase 'to be gathered to one's fathers' (Gen. 25 8 17 35 29 Nu. 27 13 31 2 Dt. 32 50) with the corresponding expression of Kings ('he slept with his fathers' (1 K. 14 31 15 8 24 22 51 2 K. 15 38, etc.), expressions both in the first instance to be understood literally of their being gathered to the sepulchre of their ancestors.

Not to be buried with one's ancestors is a great hardship, a punishment with which conspicuous offenders are threatened by God; as witness the case of the disobedient prophet (1 K. 13 22), of Ahaz (1 K. 21 24), and others. Poor people, indeed, who had not the means to procure family graves of their own, strangers from a distance—pilgrims, for example—as also criminals, had to be content to find a last resting-place in the common public burial-place (2 K. 23 6 Is. 53 9 Jer. 26 23 Mt. 27 7). In family tombs naturally none but members of the family came to be laid; to bury in it a stranger who had no title to the privilege was equivalent to desecrating it (see above). At the same time, on this point the views of a later age seem to have grown laxer, and instances are not wanting in which a stranger was admitted to the family tomb. But it is always a great sacrifice and a token of special esteem or regard for the deceased or for his people that is implied (Gen. 23 6 1 K. 13 30 *ff.* 2 Ch. 24 16 Mt. 27 60).

These family tombs were made in the oldest times on the family property in the vicinity of the family abode, an arrangement which is easy to understand in view of the fact that community of family life was held to continue after death.

Thus Samuel is buried beside his house in Ramah (1 S. 25 1), Joab in his own house in the wilderness of Judah (1 K. 2 34). The sepulchres of the kings of Judah lay quite close to the palace within the citadel in the immediate neighbourhood of the temple, as we see from Ezekiel's sharp rebuke (cp Ezek. 43 7). From Manasseh onwards, the kings were buried in the 'Garden of Uzza' (see UZZA ii.); the old burying-place was probably full, but of course the new one was made not far from the old. The 'Garden of Uzza' (if Uzza = Azariah) may well have been a garden laid out by that king within the citadel, and thus the allusion may be to a palace built by Manasseh in the garden of Uzza, in or near which he also prepared his burial-place.

It will be readily understood, however, that this very soon became an impossibility in the towns, and that for practical reasons the sepulchres had to be placed outside the walls.

10. Impurity of tombs.

This became the case all the more as with a later age the idea of the impurity of sepulchres came into increasing prominence. The law of P enacts that everyone who has come into contact with a dead body or with a bone of a man, or even with a grave, shall be unclean for a period of seven days (Nu. 19 16). Since, as remarked above (§ 8), the underground tombs of the Israelites were for the most part not marked out by means of monuments above ground, and it was not altogether easy at once to recognise from a safe distance a sepulchre or the entrance to one, the custom arose of white-washing afresh the stone at the door every spring. In this manner a grave was made recognisable from afar and the passer-by could guard himself against defilement (Mt. 23 27).

Descriptions of particular tombs are to be met with in almost all books of travel in Palestine. Of researches of scientific value the most important will be found in the works named below. Titus Tobler, *Golgotha*, 1851, and *Zwei Bücher Topographie von Jerusalem*, esp. 2 227 *ff.*; Robinson, *BR*; Sepp, *Jerusalem und das heilige Land*,(2) 1873, esp. 2 273 *ff.*; Karl Mommert,

11. Literature.

[1] Cp, for example, the inscription in the Ešmunazar sarcophagus, *l.* 6, and various Nabatæan inscriptions (Euting, *Nabatäische Inschriften aus Arabien* [Berlin, 1885], no. 2); or the inscription of Darius Hystaspis. Unfortunately no ancient Hebrew tomb inscriptions have come down to us.

[2] For *maṣṣēbāh* (in Ph. 'gravestone') see col. 2975, and for *ṣiyyūn* (ציון), 2 K. 23 17, etc. (RV 'monument'), col. 2978 (*e*).

TOPARCHY (τοπαρχια [ℵ^{c.a.}V]), 1 Macc. 11 28 AV, RV PROVINCE (*q.v.*).

TOPAZ (פִּטְדָה, τοπαζιον). The precious stone called *piṭdah* occurs in the list of stones on the high priest's breastplate (Ex. 28 17 *ff.* = 39 10 *ff.*); also in the list (derived by an interpolator from that in Exodus) of the gems with which the king of Tyre (צוֹר) or perhaps Miṣṣur (מִצּוֹר; see PARADISE, § 3) is said in a prophetic poem to have been adorned in Eden (Ezek. 28 13). Lastly, a τοπάζιον (EV 'topaz') is represented as one of the foundation-stones of the wall of the New Jerusalem (Rev. 21 20).

1. Topaz of Strabo and Rev. 21 20?

Strabo (16 770) describes the topaz as diaphanous and emitting a gold-like light (λίθος . . . διαφανὴς χρυσοειδὲς ἀποστίλβων φέγγος), not easily seen in the daytime for it is outshone (ὑπεραυγεῖται γάρ), and as obtained only in the Ophiodes island off the Troglodytic coast of the Red Sea, about the latitude of Berenice.[1] The monopoly was carefully guarded by the Ptolemies. Pliny (*HN* 37 8, cp 6 34) describes the stone as green, meaning doubtless olive green (e virenti genere), and calls the island Cytis or Topazus. This agrees with the Targum's rendering מרגלא ירקא, 'yellow-green gem,' in Job 28 19, and with the phrase פִּטְדַת כּוּשׁ, '*piṭdāh* of Ethiopia,' in the (traditional) Hebrew text of this passage.

The stone intended by the Greek geographers was almost certainly the transparent variety of olivine now generally known as peridote, which is usually some shade of olive-pistachio or leek-green (on the yellow variety see CHRYSOLITE, TARSHISH [STONE]). The topaz of modern mineralogists (yellow, blue, or colourless) was unknown to the ancients.

This may no doubt be a correct identification of the τοπάζιον of Rev. 21 20. It is much less certain whether

2. Assyrian ḫipindu in OT.

'topaz' (explained as above) is the right rendering of *piṭdāh*. Is the theory more than a superficial conjecture,[2] based on the metathesis of *p* and *t*? Can we give any satisfactory philological account of *piṭdāh*? A Sanskrit etymology (*pita*, yellowish, pale; von Bohlen) is still to be found in some books of reference; but for such a case there is no sure analogy (ברקת is surely not a Sanskr. loan-word; see EMERALD), and no tradition mentions India as the home either of the τοπάζιον or of the *piṭdāh*. Experience leads us to suspect that there may be a transcriptional error, and if so it is reasonable to look to Assyria for a word out of which פטדה may have been corrupted. Using this key we may very plausibly assume that פטדה is an early corruption of חפנד—*i.e.*, *ḫipindu*, or perhaps of **ḫipiṭdu* (whence **ḫipiddu*, *ḫipindu*).

This is the name of a precious stone referred to in the Ass. inscriptions (see Del. and Muss-Arnolt, *s.v.*), and explained there by *aban išâti*—*i.e.*, not literally 'a stone of fire,' but 'a flashing stone' = אֶבֶן אֵשׁ, *'ében 'ēsh*, in Ezek. 28 14 (‖ אֶבֶן יְקָרָה = 'precious stone,' *v.* 13).[1] Not only in Exodus and Ezekiel, but also in Gen. 2 12 (in the penultimate form of the text),[2] in Nu. 11 7, and in Is. 54 12 a thorough textual criticism permits us to restore the word חפנד (Ass. *ḫipindu*). In the first of these passages, the statement, 'there is bdellium and the onyx-stone,' certainly misrepresents the writer's meaning. As the text stood at a comparatively early period it must have referred rather to the *ḫipindu* and the *šōham*.[3] In the second passage, we are bound to hold that the *appearance* (עַיִן) of the manna was likened, not to any resinous substance like BDELLIUM (*q.v.*), but to something which would at once strike the imagination. A precious stone like the *ḫipindu* satisfies this condition,[4] and we may plausibly adopt the view of 𝔊 that crystal is intended; the transparence of rock-crystal (see CRYSTAL) would make it an appropriate comparison. In the third, we can hardly rest satisfied with the purely conjectural rendering 'carbuncles' for אבני אקדח; experience of corruption elsewhere leads one to emend the first of these words into חפנד (*ḫipindu*), disregarding the second as a corruption of a dittographed כדכד (see *v.* 12*a*). Read, therefore, in Is. 54 12, ושעריך לחפנד, 'and thy gates of *ḫipindu*.' It only remains to be added that in Job 28 19, פִּטְדַת־כּוּשׁ also probably presents two corruptions —*i.e.*, not only has פטדת come out of חפנד, but כּוּשׁ is a mutilated and corrupt form of (וְ)חַלְמִישׁ 'and *ḥalmiš* (see TARSHISH, STONE OF), where *ḥalmiš* may perhaps be the white sapphire, a suitable stone to be combined with the *ḫipindu*, which seems to be the rock-crystal (see above). If this correction be accepted, together with the correction of *v.* 18*a* given under TARSHISH [STONE], § 3, it will be plausible to identify the 'Edomite stone' mentioned in *v.* 18*a* with the *ḫipindu*-stone referred to in *v.* 19*a*. It is also at any rate possible that the *ḫipindu*-stone should displace the very questionable 'apes and peacocks' in 1 K. 10 22 (see OPHIR).

RVmg. 'topaz' for *taršîš* in Cant. 5 14 can hardly be justified, except as a warning of the Revisers not to be sure that *taršîš* is rightly rendered 'beryl.' See BERYL, TARSHISH (STONE OF).

T. K. C.

TOPHEL (תֹּפֶל; τοφολ [BAL]), a locality near the wilderness, mentioned with Laban, Hazeroth, and Di-zahab (Dt. 1 1†). See SUPH, WANDERINGS, § 10.

TOPHET, TOPHETH (הַתֹּפֶת), Is. 30 33 Jer. 7 31 etc. The Aramaic connection (see MOLECH, § 3), rejected by Delitzsch (*Isaiah*, ET, 2 40) has been brilliantly defended by Robertson Smith (in *RS*(2) 377 n.). We must not, however, lay too much stress on the supposed description of a Topheth (תפתה becomes in EV 'Topheth') in Is. 30 33, for, as well as its context, it is (not incurably) corrupt; see *Crit. Bib.*, *ad loc.* The ancient etymologies (from תֹּף, 'tympanum' or פתח, 'aperuit') need only bare mention. Cp MOLECH, § 3.

T. K. C.

TORCH (לַפִּיד, *lappīd*; λαμπας), Nah. 2 4[5] Zech. 12 6 Jn. 18 3 (λαμπας). Cp LAMP. The military use of torches was common in ancient warfare; cp Statius, *Theb.* iv. 6.

On פְּלָדוֹת, *pĕlādōth*, Nah. 2 3[4], see IRON, § 2.

TORMAH (תָּרְמָה; for 𝔊 see ARUMAH, and cp Moore, 'Judges,' *SBOT* [Heb.]), mentioned in the story of ABIMELECH (*q.v.*), Judg. 9 31 EVmg. Moore and Budde identify it with ARUMAH (*q.v.*).

Very possibly both ארמה (Arumah) and Tormah (תרמה) are corruptions of ירחמאל. Underlying the present story of Gideon, who was of Ophrah near Shechem (so Moore), there seems to have been an earlier tale with different geography. The districts of Ophrah and Cusham-jerahmeel were among those which the 'children of the East' (or rather [col. 1719, n. 4] the Amalekites) devastated, and which Gideon set free from their

---

[1] Cp Diod. Sic. 3 39: λίθος διαφαινόμενος ἐπιτερπής, ὑάλῳ παρεμφερὴς καὶ θαυμαστὴν ἔγχρυσον πρόσοψιν παρεχόμενος—'a stone of a pleasing diaphanous ["glowing," see L. and S.] character, somewhat like glass, and presenting a wonderful golden appearance.'

[2] Precisely such a guess led to the rendering of פַּז by τοπάζιον in 𝔊 Ps. 119 127, unless indeed τοπ. there is a corruption of παζ. But in 𝔊 Cant. 5 11, פַּז is transliterated as φαζ.

[1] See CHERUB, col. 742, n. 2. The same transition from 'burning' to 'flashing' occurs in the use of *ḫamâṭu*, (1) to burn, (2) to flash. Cp *ḫimṭu*, 'bright, shining.' See Del. *Ass. HWB.*

[2] For the most probable original form of the text, see PARADISE, § 5.

[3] Read שם אבן החפנד והשהם. Cp GOLD, § 1; ONYX. 𝔊, it is true, gives ἄνθραξ, perhaps reading אקדח instead of ברלח.

[4] *I.e.*, for כעי הברלח read כעין החפנד.

raids, and Mt. Jeraḥmeel (not Gilboa, see SAUL, § 4) was the place where the hero encamped. Cusham-jeraḥmeel was the city of which Abimelech made himself king, and Jeraḥmeel (or rather, no doubt, some popular shortened form of it) was the name of the place (in the Jeraḥmeelite region) where Abimelech resided when Zebul sent word to him of Gaal's intrigues. Cp SHECHEM.

It is important to notice (1) that P knows of Gideoni as a Benjamite name (Nu. 1 11, etc.), (2) that the list of David's heroes (2 S. 23 27) contains the name of Abiezer the Anathothite, and (3) that an Ophrah is known to have existed in the land of Benjamin; Gideon was, upon this theory, a hero of S. Palestine. Cp MEONENIM, MOREH. T. K. C.

TORTOISE (צָב, *ṣāb;* ο κροκοδειλος ο χερσαιος; *crocodilus*). The Heb. word thus rendered by the AV in Lev. 11 29, has been supposed by some to mean a kind of crocodile (cp 𝔊 Pesh., etc.), whilst, according to the Talmudists, it denoted a 'toad.' Most, however, take the word, like its Ar. equivalent *ḍabb*, to mean some kind of LIZARD (*q.v.*); RV renders GREAT LIZARD.

The tortoise, which AV preferred, belongs to that group of the Reptilia called the Chelonia, which is represented in Palestine by two species of land tortoise, and several aquatic. *Testudo ibera*, the Mauritanian tortoise, is the commonest species; it is widely distributed independent of soil, and is found from Mogador to Persia. In S. Palestine its place is taken by *T. leithii*, which prefers a sandy soil. The terrapins, *Clemmys caspica*, var. *rivulata*, are frequent in the streams and pools of Palestine, and *Emys orbicularis*, a synonym for *E. europæa*, is found in the lakes of Gennesaret and Ḥûleh. The Egyptian soft tortoise, *Trionyx triunguis*=*T. ægyptiacus*, an African species, has been taken in the Liṭānī and the Nahr-el-Kelb. A. E. S.—S. A. C.

TORTURE (ετυμπανισθησαν), Heb. 11 35. See MACCABEES (SECOND), § 8.

TOU (תֹּעוּ), 1 Ch. 18 9 *f.*; in 2 S. 8 9 TOI.

TOW. (1) פִּשְׁתָּה, *pišteh*, Is. 43 17, RV FLAX. (2) נְעֹרֶת, *nĕʿōreth*, Judg. 16 9 Is. 1 31; √נער, 'to shake,' so 'that which is shaken off' from the flax (see BDB).

TOWER. The psalmists compare God to a lofty, impregnable tower or fort; מִשְׂגָּב, *misgāb*, and מְצוּדָה, *mĕṣūdāh*, occur in combination, 18 3 [2], also separately. *Misgāb* conveys the idea of height; *Mĕṣūdāh* that of ambush (David's מְצוּדָה, EV 'hold,' may have suggested the application of the term[1]). But the ordinary word for 'tower' is מִגְדָּל, *migdāl*, an old Canaanitish term, also found as a loan-word in Egyptian[2] (see MIGDOL, and cp NAMES, § 106). Towers were used both for the defence of cities (see FORTRESS, § 5) and for the protection of flocks and vineyards (see CATTLE, § 1, and cp 'tower of the watchmen,'[3] 2 K. 17 9; 'tower of the flock,' Mic. 4 8, cp EDER). These protecting towers were probably adjoined by the rude houses of peasants, and out of these groups of dwellings larger places would arise.

The towers of Babel (Gen. 11 4), Penuel (Judg. 8 9 17), Shechem (Judg. 9 46 *ff.*), and Siloam (Lk. 13 4, πύργος) are especially mentioned; also in AV of 2 K. 5 24, a tower which, from *v.* 8, we might believe to be that of Samaria. But though עֹפֶל, *'ōphel*, will bear the meaning 'tower' in Is. 32 14 (‖ בַּחַן), the primary sense of the word is 'hill' (lit. 'swelling'). Hence RV renders 'hill.' The versions all render as if they read אֹפֶל, *'ōphel* (*e.g.*, Tg. לְאַתַר כְּסֵי, 'to a secret place'; 𝔊 εἰς τὸ σκοτεινόν). Pesh., however, implies אֶל־אֹפֶל הָהָר. Cp OPHEL. We also hear of a 'tower of David' (Cant. 4 4), which may be a slip for 'tower of Solomon' (cp 1 K. 7 2), and, at least in the EV, of the 'tower' of SYENE (*q.v.*), and cp MIGDOL.

A third word for 'tower' is בַּחַן, *báḥan*, Is. 32 14 (RV 'watch-tower'), or בַּחִין (Kr. בַּחוּן), Is. 23 13 (of siege-towers), and a fourth is מָעוֹז, *mā'ōz*, which unites the meanings of 'fortress' and 'refuge' (Ps. 27 1 31 5 [4], etc.); see Del. on Ps. 31 5 [4].

TOWN in EV sometimes corresponds to (1) עִיר, *'īr* (see CITY)—*e.g.*, in 'unwalled town' (Dt. 3 5 RVmg. 'country town'; Esth. 9 19), or 'town [RV city] in the country' 1 S. 27 5 (בְּאַחַת עָרֵי הַשָּׂדֶה); also to four of the terms [(2), (3), (4), (8)] also rendered VILLAGE (*q.v.*).

TOWNCLERK (γραμματευς), Acts 19 35. See EPHESUS, § 2.

TRACHONITIS. The name of the region surrounding and including the 'Trachon,' a remarkable volcanic formation, beginning about 25 m. S. of Damascus, and 40 m. E. of the Sea of Galilee, mentioned in the Bible only once, Lk. 3 1 (τῆς Ἰτουραίας καὶ Τραχωνίτιδος χώρας), as part of the 'tetrarchy' of Philip, one of the sons of Herod the Great (see vol. 2 col. 2033 *f.*, 2041 *f.*). The word itself is a derivative of Τράχων, the name given by the Greeks to the 'rough' and rugged areas, formed by lava deposits, which are characteristic of the region S. and E. of Damascus (see Fischer's Map of this district in *ZDPV* 12 [1889] *H.*, 4). Strabo (xvi. 2 20) speaks of two 'hills' called Τράχωνες beyond Damascus (ὑπέρκεινται δ᾽ αὐτῆς δυὸ λεγόμενοι λόφοι Τράχωνες): the more remote and easternmost of these is the rugged basaltic area, bare and uninhabited, now called *Tulūl eṣ-Ṣafā* ('the hills of stone'), 55 m. SE. of Damascus:[1] the other is the nearer and better known 'Trachonitis' of Philip, corresponding to the modern *Leja* (*i.e.*, *lajā'ah*, refuge, retreat), so called because, from its physical character, it forms a natural fortress or retreat, where bandits could feel themselves secure, or which could be held by a small body of defenders against even a determined invader.[2]

1. Name.

The entire region S. and SE. of Damascus was once actively volcanic, and the SE. corner of the Leja is contiguous to the NW. end of the *Jebel Haurān* range—called also now, from its having been largely colonised by Druses migrating from Lebanon, the *Jebel ed-Drūz*—with its many conical peaks (Ps. 68 16 *f.* [15 *f.*]), the craters of extinct volcanoes; and it is to the streams of basaltic lava, emitted in particular by the *Gharārat el-Ḳibliyeh*, and the neighbouring *Tell Shīḥān* (see view in Merrill, 15), at the NW. end of this range, that the Leja owes its origin. In shape, the Leja resembles roughly a pear; it is about 25 m. long from N. to S. and 19 m. broad from E. to W.; and it embraces an area of some 350 sq. m. It rises to a height of from 20 to 40 ft. above the surrounding plain, so that it looks from a distance like a rocky coast; its surface is rugged, and intersected by innumerable crevices and fissures. 'In its outline or edge the bed is far from being regular, but sends out at a multitude of points, black promontories of rock into the surrounding plain. Through this rugged shore there are a few openings into the interior, but for the most part it is impassable, and roads had to be excavated to the towns situated within it.' The appearance of the Lejā is very strange. 'Its surface is black, and has the appearance of the sea when it is in motion beneath a dark cloudy sky, and when the waves are of good size, but without any white crests of foam. But this sea of lava is motionless, and its great waves are petrified. In the process of cooling the lava cracked, and in some cases the layers of great basalt blocks look as if they had been prepared and placed where they are by artificial means. In other

2. Description.

[1] In 1 Ch. 11 7 12 8 16, we find מְצָד (EV 'hold,' except in 11 7, where AV 'castle,' RV 'stronghold'); the 'city of David' is meant, for which 2 S. 5 7 has מְצוּדָה (EV 'strong hold').

[2] It also exists in Liḥyan (an offshoot of Sabæan), and in MI; but there is no trace of it in Assyrian.

[3] The difficult phrase rendered in EV 'as a besieged city' (Is. 1 8) means rather, as Hitz. and Ges. (*Thes.*) suppose, 'a watch-tower' (מגדל נצרים=עיר נצורה). Nearly so thinks Duhm. But this has no solid basis. Perhaps we shoud read עִיר עֲזוּבָה, 'a forsaken city,' or the like (see 'Isaiah,' *SBOT* (Addenda).

[1] See Wetzstein, *Hauran*, 6 *ff.*; Porter, *Damascus*,(2) 152 *f.*; Burton and Drake, *Unexplored Syria* (1872), 1 207-250; v. Oppenheim, *Vom Mittelmeer zum Pers. Golf* (1899), 1 229-33 (with photographs).

[2] In 1838, 6000 Druses defended it successfully against Ibrahīm Pasha, who lost 20,000 men in the attempt to force it.

cases, the hillocks have split lengthwise, or sometimes into separate portions; and thus seams have been opened, forming great fissures and chasms which cannot be crossed. Elsewhere again the lava bed has not been broken into such small hillocks, but has more the appearance of what we call a rolling prairie. There are between the hillocks, and also in the rolling parts, many intervals of soil, free from stones, which are of surprising fertility' (Merrill, *E. of Jordan*, 11 *f.*). The soil in these depressions is still cultivated in parts, and affords pasture for flocks: remains of ancient vineyards have also been found in them. At many points (*ibid.* 14) there are copious springs, though not, apparently (Rindfleisch, 15), in the interior. Besides the seams and fissures that have been spoken of, there are also many caves, which have been occupied as dwellings. Bands of robbers lurk in them at the present day (cp how Porter was attacked, *Damascus*,(2) 273 *ff.*). Outlaws from the settled portions of the country flee hither, and are comparatively safe. In the vicinity of Dāmā (the highest point in the Lejā) 'so rough and rugged is the country, so deep the gullies and ravines, and so lofty the overhanging rocks, that the whole is a labyrinth which none but the Arabs can penetrate' (Porter, 283).[1]

It is worthy of note how closely these descriptions agree with Josephus. He says, in connection with the order given by Augustus (see below, § 4) to check the depredations of the Trachonites, how difficult it was to do this:—

'For they possessed neither cities nor fields, but lived together with their cattle in subterranean retreats and caves. They had however, constructed reservoirs for water, and granaries for corn, and being invisible could long resist a foe. The entrances to the caves are narrow even for persons entering one at a time, whilst within they are incredibly large and made spacious. The ground above the dwellings is not high, but as it were a plain. The rocks are everywhere rugged and difficult to find a way among, except when a guide points out the paths; for even these are not straight, but have many windings' (*Ant.* xv. 10 1).

But, though this was the character of the population of the Leja in Josephus' time, before long it changed (see § 5): civilisation entered, and cities were built, the remains of which are in many cases standing to the present day.

3. Cities and civilisation.

Thus on the N., just within the Leja, we have Burāḳ (Porter,(2) 164 *f.*); then (going southwards) on, or a little outside, the E. edge, eṣ-Ṣuwārah (P. 169), el-Ḥazm, and (inside the Leja) Ṣahr (Heber-Percy, 31-39, 43 *f.*: p. 32 'the track to Ṣahr winds amongst the fissures, gaps, holes, and waves of the lava, that now extends in an undulating unbroken sheet for a few yards, and then is cracked and broken up into every conceivable form. Even the semblance of a track soon faded away'), Dēr Nīleh (HP 47), and Shuhbah, between the Leja and J. Ḥaurān (P. 190 *ff.*; HP 59 *ff.*); on the S., Nejrān and Buṣr el-Ḥarīrī (P. 266 *ff.*); on the SW. Ezra' (P. 271; Merrill, 26 *ff.*); on the W., Ḳirāteh, Mujeidel, Ḳhubab (Chabeb), and Kureim (P. 279 *ff.*; M. 24-32); on the NW., Mismīyeh (M. 16-22, with illustration of temple: the ruins, according to Porter, 284, are 3 m. in circuit, and contain many buildings of considerable size and beauty); and in the heart of the Leja, Dāma (or Dāmet el-'Alyā, Wetzst. 25), the largest town in the interior, with about 300 houses, mostly in good preservation (Burckh. 110).[2]

Mismīyeh (the ancient *Phænæ*) is interesting on account of an inscription found there by Burckhardt in 1810 (*Travels in Syria*, 1822, p. 117; also Merrill, p. 20, and Waddington, No. 2524), which demonstrates the identity of the Leja with the Trachon. Julius Saturninus, consular legate of Syria, under Alex. Severus, issues a public notice informing the inhabitants that, there being temporary barracks in the place, they are not liable to have soldiers billeted upon them; and the inscription begins: *Ἰούλιος Σατούρνινος Φαινησίοις μητροκωμίᾳ τοῦ Τράχωνος χαίρειν.* Two other *μητροκωμίαι*, or capital cities, of the Trachon are also known, viz. *βορεχαθ*, now Bureikeh (Wadd. 2396), and Zorava, now Ezra' (Wadd. 2480, cp 2479).

It must not, however, be supposed that such cities are peculiar to the Leja. The entire region, including the slopes of the J. Ḥaurān, and the plains bordering on the Leja, is studded with deserted towns and villages, testifying to a once flourishing and prosperous civilisation. Thus we have Hīt, Hēyāt, Buthēneh, Shuḳa (Shaḳḳā, *Σακκαία*), E. of the Leja; Suleim, Ḳanawāt, Sī' (with an inscription on a statue erected to Herod the Great: Wadd. 2364), 'Atīl, Suwēdā, Ḥebrān, 'Īre, Ḳureiyeh, and Ṣalḥad, with its great castle (see SALCAH), on the W. and SW. slopes of J. Ḥaurān; the important city and fortress of Boṣrā, 20 m. S. of the Leja,[1] described by Porter (173-189, 200 *ff.*, 218-239, 248 *ff.*) and Merrill (32-58); Der'āt (see EDREI) 20 m. SW. of it; as well as many other places (Wetzstein says there are 300 on the E. and S. slopes of J. Ḥaurān alone). The general character of all these deserted places is the same: the Leja supplied the building material; and this determined the style of the architecture. The dwellings are constructed of massive well-hewn blocks of black basaltic lava, with heavy doors moving on pivots, outside staircases, galleries, and roofs, all of the same material (see the descriptions just quoted, and the photographs in Heber-Percy, frontispiece, 41, 46, 61, 65, 69, etc.). Many of these cities are in such a good state of preservation that, as Wetzstein observes (49), it is difficult for the traveller not to believe that they are inhabited, and to expect, as he walks along the streets, to see persons moving about the houses. The architecture of these deserted sites (which include temples, theatres, aqueducts, reservoirs, churches, etc.) is of the Græco-Roman period, and is such as to show that, between the first and the seventh century A.D., they were the home of a thriving and wealthy population.

The Targums of Onḳelos and Jonathan, followed by some moderns (as Porter, Merrill, and Heber-Percy), identify Trachon with the 'region of Argob' (Dt. 3 4 13 *f.* 1 K. 4 13). See, against this view, ARGOB and BASHAN (col. 497), above; also Driver on Dt. 3 4 5, and 'Argob' in Hastings' *DB*.

Trachon, or the Trachonitis,[2] is mentioned frequently by Josephus, chiefly in connection with the predatory practices of its inhabitants.

4. History.

In 25 B.C. one Zenodorus, a bandit-chief, held, on payment of tribute to Cleopatra, the former domain of Lysanias (see col. 2841); and he, to increase his revenues, so encouraged the lawless Trachonites in their raids upon the people of Damascus, that the latter appealed to Varro, the governor of Syria, to lay their case before Augustus. Augustus sent back orders that this 'robbers' nest' (*λῃστήριον*) should be destroyed; and Varro accordingly made an expedition against them. Afterwards, in order more permanently to reduce them to order, Augustus placed the country under the control of Herod the Great, who, with the help of skilful guides, successfully invaded it, and secured, at least for the time, 'peace and quietness for the neighbouring people' (*Ant.* xvi. 10 1 cp 3; more briefly, *BJ* i. 20 4). The Trachonites, however, dissatisfied with being obliged to 'till the ground and live quietly,' and finding also that it rewarded their labours but meagrely, took advantage of Herod's absence in Rome (about 9 B.C.) to revolt, and resumed their raids upon the more fertile territory of their neighbours. Herod's generals inflicted a defeat upon them; but about forty of the robber-chiefs escaped into 'Arabia'

1 The soil of Ḥaurān *outside* the Leja, it should be remarked, is singularly rich and fertile (cp BASHAN, § 2).

2 See further the list of places in Ḥaurān (including the Leja), with explanatory remarks in *ZDPV*, 1889, p. 278 *ff.*

1 Both Eus. (*OS* 268 269 298) and the Talm. (see Schürer,(2) 1 353, (3) 1 426) speak of Trachon as in the neighbourhood of, or bordering on, Boṣrā.

2 Josephus uses both terms.

(*i.e.* Nabatæa, S. of Ḥaurān), whence they raided both Judæa and Coele-Syria. Herod, upon his return to Syria, finding himself unable to reach the robbers themselves, invaded Trachon and slew many of their relations there, in retaliation for which they still more harassed and pillaged his territory (*Ant.* xvi. 9 1). In the end, Herod threw 2000 Idumæans into Trachonitis (*ib.* 2), and placed a Babylonian Jew named Zamaris, a leader of mercenaries, in command of the surrounding districts. Zamaris built fortresses, and a village called Bathyra, and protected the Jews coming up from Babylon to attend the feasts in Jerusalem against the Trachonite robbers. The consequence was that, till the end of Herod's reign, the country around Trachonitis enjoyed tranquillity (*Ant.* xvii. 2 1-2).

Upon Herod's death, his son Philip (4 B.C.-34 A.D.) received, by his father's will, the 'tetrarchy' of Gaulanitis (Jaulān), Batanæa (the 'Bashan' of the OT), *Trachonitis*, and Auranitis ('Ḥaurān'), as well as a part of the former domain of Zenodorus (*Ant.* xvii. 8 1 11 4; cp xviii. 4 6 5 4 *BJ* xi. 6 3). Under Philip's just and gentle rule (*Ant.* xviii. 4 6) the same tranquillity was no doubt maintained; for Strabo, writing about 25 A.D., says (xvi. 2 20) that since the robber bands under Zenodorus had been put down, the country round had, through the good government of the Romans, and as a result of the security afforded by the garrisons stationed in Syria, suffered far less from the raids of the barbarians. After Philip's death (34 A.D.), as he left no sons, his tetrarchy was attached by Tiberius to the province of Syria (*Ant.* xviii. 4 6). In 37 A.D., however, Caligula bestowed it upon Herod Agrippa I. (*Ant.* xviii. 6 10 *end; BJ* ii. 9 6), who held it—as an inscription commemorating his safe return from Rome (41 A.D.), found at el-Mushennef, shows (Wadd. 2211)—as far as the E. slopes of the Jebel ed-Drūz. The rule of Agrippa seems to mark the beginning of a new stage in the civilisation of the entire district: Greek inscriptions now begin to multiply, and we have many records in stone of the building of public edifices. Agrippa I. died (Acts 12 23) in 44 A.D., and, as his son was still a minor, Trachon and the neighbouring parts were administered by a procurator under the governor of Syria. From 53 to 100 the old tetrarchy of Philip formed part of the kingdom of Herod Agrippa II. (Acts 25 13 *ff.*), inscriptions and buildings dating from whose reign are numerous both in the Leja itself and in other parts of Ḥaurān.[1] The most important step in the history of the civilisation of this entire district, however, was taken in 106, when Trajan created it into the new province of 'Arabia,' with Boṣrā as its capital. Trajan's agent in accomplishing this was Cornelius Palma, governor of Syria from 104 to 108, whose work in bringing an aqueduct into Kanata (now Kerak) is commemorated in an inscription found at el-'Afīneh (Wadd. 2296-2297; cp 2301, 2305). It does not fall within the scope of the present article to pursue the history further: it may therefore suffice to remark generally that the direct influence of the Romans began almost immediately to make itself felt: roads and aqueducts were constructed; during the second and third centuries basilicas, temples, theatres, and other buildings rapidly multiplied; inscriptions, sepulchral, dedicatory, architectural, become more abundant; and a new and unique civilisation, externally Roman, but including within it a strange combination of Greek and Semitic elements, is the result (see further details and references in GASm. *HG* 624 *ff.*). A Roman road, it may be added, starting from Damascus, runs through the Leja, passing Mismīyeh in the N., and Bureikeh in the S.; and going on to Boṣrā, Philadelphia (Rabbath Ammon), Moab, etc. (cp Rindfleisch, 24).

5. Literature. Burckhardt, as cited above, 51 *ff.* (Ḥaurān), 110 *ff.* (the Leja); J. G. Wetzstein, *Reisebericht über Hauran u. die Trachonen*, 1860 (epoch-making), especially pp. 25 *ff.*; Porter (=P, § 3), *Five Years in Damascus* (2); Merrill (=M, § 3), *E. of Jordan*, and Heber-Percy (=HP, § 3), *A Visit to Bashan and Argob*, 1896, as referred to above; the account of Stübel's 'Reise,' with map, in *ZDPV*, 1889, pp. 225-302 (important)[2]; Rindfleisch, 'Die Landschaft Ḥaurān in römischer Zeit u. in der Gegenwart,' in *ZDPV*, 1898, pp. 1-58 (on the Leja, 5-7 14 *f.* 17 24 45); v. Oppenheim, *op. cit.* 1 87 *ff.* (chaps. 3 5 on Ḥaurān generally; chap. 4 on the Druses). The standard authority on the *architecture* of Ḥaurān is de Vogüé's fine work, *Syrie Centrale, Architecture Civile et Religieuse du ie au viie siècle* (1867), containing 150 plates, with explanatory descriptions (though little relating specifically to the Leja); see more briefly GASm. *HG* 629 *ff.*

For inscriptions (from Ḥaurān generally, as well as the Leja) see the works cited under BASHAN, § 5; and add Burton and Drake, *op. cit.* 2 379-388.

When Israel settled in Palestine they came into touch with lines and movements of commerce which had been extant throughout Western Asia from a remote antiquity. The economic development of the nation

1. Introductory. —apart from their adoption of agriculture—consisted in their gradual engagement in this already ancient, elaborate, and world-wide system. Many of its consequences, as seen in Egypt or Babylonia, repeat themselves in Israel; indeed at some periods they are the only evidence we

[1] For a list of inscriptions naming Herodian kings, see Wadd. 2365 *end.*

[2] See also the map of Ḥaurān and Jebel ed-Drūz, accompanying Schumacher's 'Das südliche Basan' in *ZDPV* 20 (1897) 67-227. In both these maps, however, there is an error in lat. and long.: Damascus is placed correctly; but by a fault in the triangulation the whole of Ḥaurān and surrounding parts are

have of the presence of commerce as a factor in the national life. It is, therefore, necessary to review the rise, progress, and fashions of trade in W. Asia—with its relations to religion—down till the end of the second millennium B.C., or just as Israelite commerce began to develop.

I. TRADE IN WESTERN ASIA

From the most remote epochs there were present throughout W. Asia the conditions not only of local exchange, but also of a wide international commerce, viz.: (*a*) the great differences of soil, fertility, and animal and vegetable products (§§ 3-6); (*b*) the unequal distribution of stones and metals (§ 7); (*c*) the rise, at the two extremes of the region, of empires of vast wealth and culture (§§ 8-11); (*d*) the specialisation of commerce by particular tribes and nations (§§ 12-16); (*e*) the central position of W. Asia between the Indian Ocean and the Mediterranean—India and Europe (§ 17 *f.*); (*f*) the existence of natural lines of traffic both by land and by sea (§§ 9, 28 *ff.*); (*g*) the development of the means of carriage (§ 19); and (*h*) the rise of common standards of value (§ 20). To our survey of these it is necessary to add some consideration of (*i*) the relation of commerce to religion (§§ 21-24); as well as a sketch of (*k*) those political movements which so powerfully influenced the trade of Syria just before Israel settled in Palestine (§§ 25-27).

2. Conditions of trade.

(*a*) W. Asia is unsurpassed in any quarter of the globe for its extraordinary contrasts of soil and fertility: between the Syrian and the Arabian desert on the one hand, and the river-valleys and deltas of Babylonia and Egypt, with the garden lands of Syria and S. Arabia, on the other; whilst most of the ordinary contrasts—between sea-coast and 'Hinterland,' lowlands and highlands, with very different temperatures and soils, pastoral and arable regions—were also present throughout. All these formed different grades and necessities of human life, between which the currents of commerce were as inevitable as the winds which pass between spheres of differing temperature in the world's atmosphere. The various populations of W. Asia were dependent on each other for some of the barest necessaries of life, as well as for most of its simpler comforts and embellishments, and such dependence was the beginning of trade. At the same time, we must be careful not to exaggerate either the amount of the trade, or its influence on the minds of men at so early a period. Had commerce then been a dominant feature of human life, we should have found more traces of its influence on religion than we shall be able to discover (§ 21).

3. Soil and fertility.

The elements of early commerce between the deserts and the fertile lands are easily determined from the conditions of to-day. There are still nomads who live for months or even years on milk and flesh (Palmer, *Desert of the Exodus*), varied by dates from the oases in the centre of Arabia (Doughty, *Ar. Des.*, *passim*). From the earliest times, however, the need of cereal foods must have drawn the Bedouins into commerce with the agricultural populations; and this need would increase with the settlement of nomads from the interior of Arabia on the borders of fertility. From Syria, Mesopotamia, and Egypt the nomads would seek grain, fruit (*e.g.*, almonds), cloth, oil, and (after its invention) pottery,[1] with (in course of time) weapons.[2] In exchange they would give dates,[1] curdled milk, wool, occasionally cattle, honey, salt, alkali (obtained from the ashes of the Ḳilu and other plants),[2] 'Mecca balsam' (BALSAM), and other medicinal herbs. Commerce between Syria and Egypt included oil, mastic (BALM), wool, etc. (EGYPT, § 8), and (later) Syrian manufactures; whilst traffic between Babylonia and Egypt was frequent even in pre-historic times (*ib.* § 43). Trade in SALT (*q.v.*) was not only local—as from the salt-pans N. of Pelusium, in el-Jōf, and elsewhere, or from the deposits at the S. end of the Dead Sea;—probably also rock-salt was exported to a distance as to-day: *e.g.*, from W. Kaseem in Arabia (Palgrave, *Centr. and E. Arab.* 180 [ed. 1883]).

4. Elements of commerce.

The most isolated of the fertile lands of W. Asia lies on the S. of Arabia under the monsoon rains. Arabia Felix (Ar. 'el-Yemen'—*i.e.*, 'the south') has ever been famous for fertility, and was the seat of the Minæan and Sabæan civilisation (below, § 14). Its chief repute, however, was for frankincense (see FRANKINCENSE, where its late appearance in the OT is noted, and its probably earlier use in Egypt). Erman[3] says this was common under the Old Empire. Sprenger calls the incense-country 'the heart of the commerce of the ancient world' (*Geog. Alt. Arab.* 299). Theodore Bent (*Nineteenth Cent.*, Oct. 1895, pp. 595 *ff.*) describes 'the actual libaniferous country,' Dhofar, as 'perhaps not now much bigger than the Isle of Wight,' and 'probably in ancient days not much more extensive.' It lies on the coast some 800 m. NE. from Aden, about half-way to Muscat. 9000 cwt. of the gum are exported annually to Bombay. Other products are cocoanuts and cocoanut fibre (not yet identified under any ancient Semitic name), myrrh, *ghee*, fruits, and vegetables. Pasturage is rich. Dates and weapons are imported. There is a fine harbour, perhaps Moscha of the *Periplus* (§ 32), and numerous Sabæan remains. Camels are the animals used for carrying purposes; horses are unknown. Cp SEPHAR. On another incense country see § 8.

5. The incense country.

At times primitive commerce in the necessaries of life must have been enhanced by local famines, though in the less settled conditions of early history these would result not so much in increased trade as in migrations of tribes. Such migrations, however, would also stimulate trade by communicating across the region a better knowledge of its remoter parts, as well as familiarity with the various routes thither. We shall see that most of the great trading tribes had been immigrants to the districts which became the centres of their flourishing commerce.

6. Distribution of timber.

The early distribution of woodland in W. Asia is uncertain; but from Syria into Egypt, as well as from the wooded districts of Palestine, not only to the treeless desert borders, but also to Babylonia, there was always some traffic in timber. Cedar was brought from 'the West' to Babylonia in the reigns of Sargon I. and Gudea (4th mill.), and rafts of other woods must have descended the Euphrates and the Tigris.[4] Round the

shifted unduly S. and W., so that Boṣrā is 32° 30′ 5 N., and 36° 26⅝′ E., instead of, as it ought to be, 32° 33½′ N. and 36° 32′ E. (see *MNDPV*, 1899, pp. 17-14). This error has been corrected in Fischer's *Handkarte von Pal.* 1899, and also in the map in the present article (which is based upon the three maps named).

[1] As they do now from Gaza and Damascus.

[2] To the early Egyptians the nomads were the people of the boomerang. But the story of Senuhyt proves that during the Middle Empire the Egyptian weaponsmiths carried their goods on asses among the Asiatic nomads: WMM, *As. u. Eur.* 1, n. 2.

[1] Still imported from Arabian oases to Baghdad, Damascus, and Yemen (Palgrave, *Centr. and East. Arabia* [ed. 1883], 43, 149, 364); also from oases in Turkish Arabia to Bushire. See Consular Report on Trade and Commerce of the Persian Gulf in 1901 by Lt.-Col. Kemball. Forder (*With the Arabs in Tent and Town*, 119 [1902]) describes caravans from Ḥaurān to Kāf taking wheat and barley to be bartered for salt and dates. He reports among the industries of the Jôf saddle-bags, carpets, abbas and other clothing; cp 145: imports—coffee, cooking utensils, clothing from Damascus, etc.

[2] Cp *ZDPV* 20 89 for present export of alkali from steppes S. of Ḥaurān to the soap factories of Nāblus.

[3] *Life in Anc. Eg.* (tr. by Tirard; 1894), p. 507.

[4] *E.g.*, under Ur-ninā of Lagash (BABYLONIA, § 44); cp Radau, *Early Baby. Hist.* [1900], and Howorth, *Eng. Hist.*

TRADE AND COMMERCE

Persian Gulf there is said to be no timber for shipbuilding. For the period between the Old and the Middle Empire in Egypt see Erman, *op. cit.* 452.

(*b*) The distribution of useful stones and metals through W. Asia is now tolerably clear. The marble and alabaster found in early Babylonian deposits came from the Assyrian hills, the diorite from Arabia (BABYLONIA, §§ 18, 21).[1] The basalt of Ḥaurān must always, as to-day, have been used for millstones for all Syria. Egypt was without copper, which it brought from Sinai and the Lebanons (COPPER). Gudea imported copper from Kimaš in N. Arabia (Hommel in Hastings' *BD* 1 225; cp Gen. 10 23, and see *Eng. Hist. Rev.* 17 221). Cyprus was a later source; on bronze see below, § 17. Iron, copper, and lead were found in the hills W. of Nineveh (see ASSYRIA, § 6), and iron in parts of Syria and Central and S. Arabia (Doughty, *Ar. Des.*). Iron, however, except in Babylonia, does not appear till the close of our period (see IRON). There was a little gold in the desert E. of Egypt and in Nubia (see EGYPT, § 50); but its chief sources were in Arabia, on the E. of Sinai, and on the far S. coast[2] (see GOLD, OPHIR). Silver, which was rare in Egypt till 1600 B.C., came from Asia (EGYPT, § 38). Precious stones (turquoises, etc.) were found in Sinai. Cp STONES. The love of ornament is one of the earliest motives to barter among primitive peoples, and we may assume that traffic in metals and jewels had begun in W. Asia even before the rise of the great civilisations in Egypt and Mesopotamia.

7. Of stones and metals.

(*c*) It is, however, in the growth and organisation of these great civilisations that we must seek for the most powerful of the factors of ancient commerce. Trade always advances by leaps and bounds where two great states face each other (cp the sudden increase between the Hittites and Egypt after their treaty in the reign of Ramses II. [Erman, 537]).

8. The great empires.

By the end of the fifth millennium B.C., both Babylonia and Egypt possessed a developed civilisation, for the growth of which we must assume many centuries if not some millennia (see BABYLONIA, § 46); both had elaborate systems of writing, always a proof of and a help to commerce. That between them there were close communications, is proved by the strong Babylonian elements in pre-historic Egyptian culture (see EGYPT, § 43). The rapid rise of their wealth, doubtless largely due to discoveries of new sources of the precious metals, must have increased trade throughout W. Asia, and complicated it beyond previous conditions. The monument (discovered at Susa by De Morgan) of Maništu-irba, ruler of Kiš (4th mill. B.C.), records his purchase of lands, grain, wool, oil, copper, asses, and slaves, which were paid for in silver; and among the officials mentioned are 'a mariner,' 'scribe,' 'surveyors,' 'miller,' 'jeweller,' and 'merchant' (*Damḳar*).[3] The growth of wealth hastens the demand, not only for articles of luxury, but also for better qualities of food-stuffs. For example, both the Nile and the Euphrates valley produce dates; but if then, as at the present day, the Arabian oases, including Sinai, produced a special quality of dates,[4] these would be imported into Egypt and Babylonia then as now (see above, § 4, third note). The records of the kings of Lagaš (BABYLONIA, § 44) report the building of storehouses beside the temples, and the construction of canals.

With the increase of wealth came the expansion and consolidation of empire. It is not always possible to decide whether objects of foreign origin found in early Egyptian or Babylonian remains were fruits of conquest (spoil or tribute), or of trade, though probably they are mostly due to trade; even where the records boast of tribute this is really the fruit of barter.[1] Even if any of the early expeditions from Egypt and Babylonia were for conquest (which is very doubtful; see note), they found their motives in a previous trade; and they would open up routes and increase commerce. The expeditions of Sargon I. and Gudea to 'the west' for timber, and to Arabia for stone and metal (above § 6 *f.*) were repeated by other monarchs (see BABYLONIA, § 15[2]); and the various conquests of, and immigrations into, Babylonia by fresh tribes must have powerfully developed trade. To the NE. lay Elam, a seat of culture by the fourth millennium B.C., with avenues of traffic into central and eastern Asia; and Elam overran Babylonia. Again, the Canaanite supremacy synchronised with a growth of commerce especially under Ḥammurābi (see BABYLONIA, § 54[3]; though there was an increase of trade preceding this, at Ur, § 50[4]); while the rapid subjection of the Canaanite dynasty to a Kaššite is proof of the luxury consequent on commerce under the former power. From Egypt expeditions were sent in the earliest times to secure the copper and turquoise mines of Sinai—*e.g.*, Dyn. III., Zoser (EGYPT, § 44); Dyn. IV., Snefru(i) (§ 45: about 3000 B.C.; but acc. to Fl. Petrie, 3998-3969 B.C.), and Ḥufu (Petrie, *Hist. of Egypt*, 1 42); Dyn. VI., Pepy I. 'the founder of Memphis proper' (EGYPT, § 47). There were also early expeditions to Nubia for gold, to the Sudan, the W. oases, and above all down the Red Sea to Punt—either Somali-land, or the coast between Suakim and Massowah).[5] Erman (*op. cit.* 507) mentions the picture of a native of Punt as early as Ḥufu (Dyn. IV.); but the 'earliest recorded expedition to Punt' was under Assa, Dyn. V. (EGYPT, § 48, Fl. Petrie, 100); Pepy I. (Dyn. VI.) sent to the Sudān and farther (EGYPT, § 47); S'anḥ-ka-rē (Dyn. XI.) by Koptos, Ḳoṣēr, and the Red Sea to Punt; and several kings of Dyn. XII., the Amenemha'ts and Usertesens, to Nubia, the Sudān, and Punt. Under this dynasty (2800 Fl. Petrie, 2100 WMM) trade flourished exceedingly. The Hyksos migration and conquest of Egypt must have developed her Asiatic commerce; but this, especially with Syria, reached its height after the conquests of the New Empire. For lists of the many Syrian products introduced, see WMM, *As. u. Eur.* (chaps. I, etc.), and Erman (516 *ff.*), who remarks: 'we almost feel inclined to maintain that really there was scarcely anything

Rev. 17 7. For Gudea's imports see *PSBA* 11, *RP*(2) 2 75 *ff.*, and Rogers' *Hist.* 1 370.

[1] The diorite of Gudea and Ur-bau was brought from Magan on the NE. coast of Arabia (Amiaud, *RP*(2) 2 15 n. takes it to be Sinai); but see note to *Eng. Hist. Rev.* 17 211 for another source.

[2] Burton, *Land of Midian.* 2 Ch. 3 6, speaks of 'gold of פרוים,' which Glaser (*Skizze*, 2 347) identifies with el-Farwarri mentioned by Hamdāni; cp Sprenger, *Alt. Arab.* 49-63. Gudea brought gold-dust from NW. Arabia and Khākh SE. of Medina (Hommel in Hastings' *BD* 1 225; *Eng. Hist. Rev.* 17 221).

[3] Howorth, *Eng. Hist. Rev.* 17 11 *ff.*

[4] The fine dates of el-Ḥasa (E. Arabia) are still exported—to Mosul, Bombay and Zanzibar, Palgr. *Cent. and E. Arab.*, ed. 1883, pp. 364, 383.

[1] See the instance given by Erman, 512; and cp Naville, *Deir el Bahari* (Eg. Expl. Fund), Pt. III., 11. Referring to the same expedition to Punt, W. E. Crum (Hastings' *DB* 1 660*b*) says: Queen Ḥa'tšepsut's 'fleet had, like its predecessors from the 6th dynasty onwards, solely a commercial object.' So, too, Budge, *Hist. of Eg.* (1902), 4 11 144 158. Similarly in Babylonia under Gudea, who according to Hommel (Hastings' *DB* 1 225*b*), did not conquer the distant regions, but by treaties secured passage for his caravans with their products.

[2] En-anna-tuma I. of Lagaš imported cedar 'from the mountain'; Radau, 72.

[3] See also L. W. King, *Letters and Inscr. of Ḥammurabi about* B.C., 2200, i., Introd. and Text, iii., Translation; and G. Nagel 'Die Briefe H.'s an Sin-idinnam' in *Beitr. z. Assyr.* 4 434 *ff.* with notes by F. Delitzsch 483 *ff.*

[4] On the favourable position of Ur for commerce, on the Euphrates, near the W. Rummein (which connected it with Central Arabia), and with a road to Sinai, see Rogers, *Hist. of Bab. and Ass.* 1 371 *ff.*

[5] So Naville (*Deir el Bahari*, Pt. III. 11; Eg. Expl. Fund), who says that in any case Punt lay N. of the Straits of Bab-el-Mandeb: 'not a definite territory,' but a vague geographical definition. Some include under the name both sides of the Red Sea. 'The region which produces frankincense is situated in the projecting parts of Ethopia and lies inland (*i.e.*, from Adulis on the Red Sea) but is washed by the ocean on the other side'; Cosmas, *Christ. Topog.* Bk. II, ET by M'Crindle, 51.

which the Egyptians of this period did not import from Syria.' Syrian slaves were a constant subject of traffic (Erman, 517 *f.*, WMM, *As. u. Eur.*). The New Empire also opened up Nubia, and elaborated the trade with Punt, and that with Cyprus (see EGYPT, §§ 53-61). For the trade of Ramses III. with fleets on the Mediterranean and Red Sea see the Harris Papyrus (end) and the summary in Budge, *Hist. of Eg.* 5 159 *ff.*

9. Security of travel.

From the third millennium there is evidence of a royal service of despatches into Asia (WMM, *As. u. Eur.* 1 *f.*); the regulation of imports by the Egyptian government; the making of roads; and the supply of desert routes—*e.g.*, that between Koptos on the Nile and the Red Sea (below, § 29)—with water (by Mentûḥotep, Dyn. XI. [Erman, 506]).[1] It was easy and safe for even individuals to travel to tribes as far as Edom and the 'Arābah: witness the tale of Se-nuhyt, which, whether historical or not (see EGYPT, col. 1237), must have been founded on a knowledge of the actual conditions of travel.[2] In short, by the third millennium travel must have been frequent and tolerably secure (of course with interruptions) from the mouth of the Red Sea and the Sudan to the Euphrates; and the commercial activity and wealth of Babylonia in at least the second half of that millennium, can hardly have failed to create similar conditions for much of the rest of W. Asia. Cp § 26, end.

We must not suppose, however, that all this produced, even for intervals, anything like a parallel to what prevails in modern times, or even to what was achieved under the Roman Empire. The roads of W. Asia were never so secure as under the Pax Romana, nor were they so well laid down. In the period with which we deal there were frequent interregna; the nomads of Arabia often burst the frontiers of civilisation; and even in peaceful times the well-developed habits of traffic cannot have produced such order or sense of safety as we find at the beginning of the Christian era.

10. Trade and political power.

Before we pass from the influence of the great empires on commerce, three other phenomena require to be noticed. One is the effect of the exigencies of commerce in the transfer of political power within the empires from one site to another, and the rapid growth of new capitals. Of this both Egypt and Babylonia furnish instances. The centre of government in Egypt came down the Nile, from positions commanding the highways to the S. and the Red Sea, to Memphis[3] at the neck of the Delta, where great trade-routes converge from all quarters. We find a similar case under the New Empire, when the increase of trade on the Syrian frontier drew, for a time, the centre of the political power from Thebes into the Eastern Delta.[4] On the Euphrates and Tigris the same causes worked in an opposite direction—upstream. The central position of Ur with regard to commerce is well known; how elaborate that commerce was is proved by the titles of the third dynasty of Ur, and the number of contract tablets from their time.[5] The transference of power from the lower Babylonian cities to Babylon itself and the independence of that great centre from about 2400 B.C., was probably assisted by commercial influences, for Babylon proved its fitness as a centre for trade by the extraordinary persistence of its commerce and wealth, in spite of frequent political disasters, for nearly 2000 years (cp Is. 47); and it is possible that some memory of the city's early fame as a gathering place for men of all tongues may lie behind the Hebrew story of the founding of Babel (Gen. 11). One has only to look at the map to see how much more advantageously Babylon lies for the trade through Elam into Persia, than do the cities which preceded her in power. The rise of Assyria was doubtless aided by her command, closer than that of Babylon, over the lines of trade to the W.; the transference of the Assyrian capital from Ašur to Calah and Nineveh was, in fact, one from a less to a more suitable centre for commerce, both with N. and W. These are but instances, which will doubtless be multiplied as our knowledge of ancient history is increased.

11. Mercenaries; royal traders.

Another phenomenon to be noted in the commercial development of the Great Empires—we shall find something analogous in Israel—is the exchange of native militia, proper to agricultural conditions of life, for a mercenary soldiery, which generally followed a great increase in trade. The soldiers of the Middle Empire in Egypt were such a militia; but after the great growth of trade, especially with Asia under the dynasties of the New Empire, the Egyptian armies were mainly composed of mercenaries (Erman, 542). The same thing happened in Egypt under Psameṭik. It happened also in Babylonia under Ašur-bani-pal and Nebuchadrezzar.

Again, it is to be remarked that the initiative of the great commercial expeditions from Babylonia and from Egypt is recorded on the monuments as due not to private enterprise, but to the reigning monarch.[1] This is no pretence of royal arrogance or of the court scribe's flattery. We see the same motive at work in the great explorations and commercial expeditions of the Middle Ages from Spain and Portugal.

12. No trading classes.

(*d*) The earliest societies of men did not contain a special class or profession of traders; farmers and manufacturers exchanged their own goods. In the story of Se-nuhyt the weaponsmith himself carries his goods to the Asiatic nomads. As we shall see (§ 21), trade did not exercise any influence on the formative period of the religions of W. Asia; a proof that it was not then specialised as a separate vocation. There is no mention of trade in the proverbs of Ptaḥ-ḥotep (from the 4th mill.), and when they appeared in Egypt 'sailors, merchants, and interpreters of foreign origin were despised' (EGYPT, § 31); that is to say, the special class was a late and a foreign upstart in that civilisation.

13. Tribal monopolies.

The rise of international commerce, however, and the peculiar character of the deserts which separated the centres of civilisation favoured—in place of the growth of special classes of traders within those centres—the gradual absorption of whole tribes outside them in the business of trade and the carriage of goods. Especially was this the case with certain Arabian nomads, whose familiarity with the desert and possession of the means of crossing it, furnished them with the price (in their trading services) for purchasing the products of civilisation. Thus, in the OT, some of the earliest names for traders are tribal: Ishmaelite (Gen. 37 25 27 *f.* 39 1,—all J), Midianite (the parallel E passages; Gen. 37 28*a* 36), and (later) Canaanite, of which the first two were Arabian and the last the inhabitants of that land which is well described as the 'bridge' between Egypt and Mesopotamia. This evidence is confirmed by the Egyptian records. Part of the contempt of the Egyptians for traders was probably due to the traders being foreigners. The Beni-Hasan paintings represent thirty-seven Asiatics from the desert, traders from near Sinai (see EGYPT, § 50;

[1] Also 'it is probable that Seti I. caused a series of water stations to be established from the Nile to Berenice' (Budge, *HE* 5 10); and Ramses III. built a fortified well between Mt. Casius and Raphia (*ibid.* 159); on Ramses IV. *ibid.* 187.

[2] Under Dyn. xii.; cp 'Travels of an Egyptian' under Dyn. xix., xx. ET in *RP* 2 102 *ff.*

[3] Under Menes, 4500 or 4000 B.C., and his successors: EGYPT, §§ 44, 47; MEMPHIS. See also Fl. Petrie, *HE*, vol. i.

[4] Cp Erman, 516.

[5] Cp for references Rogers, *Hist. of Bab. and Assyr.* 1 377.

[1] Similarly the letters of Ḥammurabi (above, § 8 n.) show how that king personally superintends the *internal* trade of Babylonia.

WMM, *As. u. Eur.* 36). So, too, Ḥannu the leader of the expedition to Punt under S'anḫ-kā-rē' of the eleventh dynasty (EGYPT, § 48) appears to have a Semitic name (cp, however, Erman, 506). Thus, by the third millennium B.C., the Semites from their central position between the two most ancient civilisations, their command of the lines of communication, and their frequent migrations, had developed those habits of trading which distinguish them to the present day.[1] Among the Semites, again, there were especially four families which concentrated the racial adaptableness and tenacity upon commerce, and, not content with the share in that which their central positions brought to them, devoted themselves to the pursuit and organisation of many lines of traffic, till they developed, in the case of one of them at least, a wider commercial influence than the world ever saw till the most recent epoch. These were the Minæans, the Aramæans, the Phœnicians, and the Nabatæans, of whom the first three had begun to develop their commerce within our period—the Minæans and the Aramæans by land, the Phœnicians by sea.

14. Minæans. It is only upon indirect and somewhat precarious evidence (summarised by Weber, *Arabien vor Islam*, 22 *ff.*)[2] that to the Minæan kingdom a date is assigned so early as the second half of the second millennium B.C. The centre of the Minæan power lay in the S. part of Arabia—not in the incense-bearing regions of Ḳatabān and Ḥaḍramōt (above, § 5), though it commanded these, and by its hold on the central Arabian routes (below, § 31) and its colony in Muṣrān or Muṣri (*i.e.*, Midian) and northwards (MIZRAIM, § 3)[3] possessed the Arabian land traffic, and sent its caravans by Ma'ān and Petra to Gaza. The capital was Karnawu, the Karna of Eratosthenes,[4] in immediate connection with the ports of the S. coast. Thus Minæan trade extended at least from the Indian Ocean to the Levant. But see § 17.

15. Aramæans. After what has been said elsewhere (ARAM, ARAMAIC LANGUAGE; cp PHŒNICIA, § 7) it is only necessary to say that in the second millennium B.C. we find the Aramæans succeeding the Hittites in a country on the upper Euphrates which is the meeting-ground of many trade-routes—from Syria, Asia Minor, Armenia, and Babylonia (below, § 39 *f.*). They gradually extended over N. Syria, a land more suited for trade than for agriculture or industries,[5] and embraced Damascus, the principal Syrian 'harbour,' a depôt of the Arabian Desert (*Hist. Geogr.* 642 *f.*). The earliest notices reveal Aramæans as nomads, perhaps traders, in Mesopotamia; in Syria the small states they founded round cities were such as those founded by other trading peoples. The strongest proof of their commerce is the gradual spread of their dialect till it became the *lingua franca* of W. Asia. In Babylonia it was spoken in daily life from the eleventh to the ninth century (Wi. *Völker Vorderasiens*, 11); by the tenth it had taken the place which Babylonian held in W. Asia in the fifteenth, and was used as far as Egypt as a commercial tongue (WMM, *As. u. Eur.* 234). How long and how far this commercial supremacy of the language lasted is proved by inscriptions in Teima and Nabatæan towns up to 100 A.D. It was the Aramæan trade, from the Tigris to the Levant, which formed the temptation to the Assyrian campaigns in the ninth and following centuries (below, § 52). Cp SYRIA, §§ 16 *ff.*

16. Phœnicians. The commercial influence of the Phœnicians appears to have risen at an earlier period than that of the Aramæans; but how early it is impossible to say. The absence of all reflection of trade not only from the names of their earliest cities—these may have been named before the Phœnician occupation[1]—but also from all except presumably late strata of their religion[2] (see below, § 22), is significant. The coincidence between a great influx of Canaanite population and religion into Babylonia (about 2500 B.C.), and the rise of a 'Canaanite' dynasty there, with a great increase of commerce and wealth, is interesting as indicative of a racial capacity for trade. On the whole, however, we may assign the rise of the commerce of the Phœnicians to a period subsequent to their arrival on the coast between Lebanon and the Levant, somewhere in the third millennium B.C., and therefore subsequent to the appearance of international commerce in W. Asia; and we may trace it to the central position of that coast, to the mines and forests of the neighbourhood, and to the greater facility for traffic by sea than by land, between the various Phœnician settlements. Probably the Phœnicians did not invent ships as the Greeks were led to suppose from their subsequent supremacy in navigation; for the first boats must have been invented by a people with long slow rivers. But the Phœnicians, with their towns near to large forests and disposed within a day's sail of each other on a coast full of obstacles for land traffic, must have been early forced to the improvement of the means of navigation; whilst the harassing land march across the desert to Egypt must have led to a speedy extension of that navigation to the Egyptian delta. So great an adventure, if it did not produce, amply proves the existence of, those qualities of hardihood and enterprise, which were to lift Phœnicia to the command of the world's trade. The less adventurous Egyptians,[3] who had in the earlier periods of their history reached Punt by their own merchants, had left the trade through Nubia to negroes (Erman, 498);[4] and now might be easily tempted to resign a commerce which they disliked (§ 13) to the peaceful invaders of the Delta. The process may have been hastened during the Hyksos supremacy. In any case, from the beginning of the second millennium B.C. the trade of Egypt appears to have been in Phœnician hands. In the fifteenth century, according to the Amarna Letters they had fleets of merchant ships, and a fresco in a Theban tomb depicts them as importers of goods from Asia (Budge, *HE* 4 163)

17. Foreign trade: with India. (*e*) The ancient trade of W. Asia, however, was not confined within that region. W. Asia lies between the Indian Ocean and the Mediterranean; both of which, the one by its regular winds the other by its islands, offer easy access to sources of wealth beyond them. In the later Phœnician and the Greek epochs of trade both seas were regularly navigated, and the far East united with the far West (§§ 63, 71).

[1] The Syrians depicted on the tomb of Ḥui, about 1400 B.C. (see Budge, *HE* 4 144), are traders. Cp Strabo xvi. 4 23 on the commercial qualities of the Arabs.

[2] None of the S. Arabian, so-called Himyaritic, inscriptions are dated before second century B.C. For a detailed argument against the high antiquity claimed for the Minæan kingdom, see Budge, *HE* 6, Preface, xvi *ff.* His conclusion is that Glaser's Inscr. 1155 belongs to the time of Cambyses and that 'the Minæan kingdom cannot be shown to be older than the sixth century B.C.,' p. xxii.

[3] The strong reasoning of Budge (*HE* 6 xxi *ff.*) against Winckler's frequent identification of the biblical Miẓraim with the Arabian Muṣr is not conclusive against the existence of the latter. For if, as generally admitted, Ghazzat of Glaser's Inscr. 1083 be Gaza, the Minæan caravans from S. Arabia would scarcely pass through Egypt to Gaza, or through Gaza to Egypt (notwithstanding Budge's note on p. xxii). The mention of Gaza, therefore, is, so far, evidence in favour of a N. Arabian Muṣri. Cp also SIMEON, § 6. Even if the Muṣri of the Assyrian and Minæan inscriptions be proved to be Egypt, this only means an extension of the Minæan trade.

[4] Or Karnana: Strabo (xvi. 4 2) who mentions besides the Sabæans at Mariaba, the Kattabanians at Tamna, the Chatramōtitai at Sabata.

[5] M'Curdy, *Hist. Proph. Mon.* 1 155.

[1] Sidon, usually understood as 'Fishertown' (but see PHŒNICIA, § 12); Tyre = rock; Beyrout = springs, etc. Contrast the Philistine Ashkelon and the Canaanite Kiriath-sepher, the former of which certainly, and the latter possibly, has a commercial origin.

[2] The chief Phœnician gods do not differ from those of other Canaanites.

[3] Cp the commercial superiority of Syrians at the present day to Egyptians.

[4] Cp inscription of Pepy of the sixth dynasty.

Whether in the period we are now treating there was already a trade with India is a question to which we can get only probabilities in answer. It was quite possible.

The *Periplus* of the Erythræan Sea[1] (1st Christian cent.) lays down the line of a coasting voyage along the S. of Arabia, across the mouth of the Persian Gulf, and so (in the direction opposite to that taken by Nearchus, the admiral of Alexander) to the Indus, and thence down the Malabar coast. It adds (§ 39), however, that a speedier, though more dangerous, voyage may be made by those who set out to sea from Arabia with the Monsoons (μετὰ τῶν Ἰνδικῶν *sc.* ἐτησίων). These winds blow across the Indian Ocean from the SW. from April to October, from the NE. from October to April, and make the voyage possible for vessels even of a primitive type.

By the seventh century B.C., if not long before, there was in India a developed and organised trade; great ships were already built, and long sea-voyages undertaken. From the very earliest times merchants had been held in high repute (Lassen, *Ind. Alterthumskunde*, 2 573 576 579). The island of Sokotra has a Sanscrit name (*ib.* 580). The Babylonian Nimrod epic reflects a journey through Arabia to Sabæa; and Sokotra has been suggested as the island which was its goal (Hommel, Hastings' *DB* 1 216 *a*). On the reliefs of Deir-el-Baḥri, Punt is pictured as a place of barter where several nationalities meet and deal with the Egyptians in different sorts of goods. It is, therefore, more than possible that Indian traders met those of W. Asia at the mouth of the Red Sea and the ports of S. Arabia during our period. Weber indeed (*Arab. vor Islam*, 22; cp 23) calls the Minæans the intermediaries of the Indian as well as of the S. Arabian trade, and dates the origin of this trade before 1300 B.C. (more than a millennium before the later Ptolemies). But see § 14. It is remarkable that no Indian faces or goods are found pictured on the reliefs of Deir-el-Baḥri (Naville, *op. cit.* 12 *ff.* and the corresponding plates), nor have any Indian products been discovered in Egyptian remains. As for Babylonia, the earliest Sumerian deposits (BABYLONIA, § 18) contain both ivory ornaments and bronze. The ivory may have been taken from elephants which were extant on the Euphrates till towards the close of our era.[2] But for the tin, needed to make the bronze, no source is known at that time save India,[3] and some have derived the Phœnician name for the metal from the Sanscrit.[4] This, however, is a precarious ground on which to found a conclusion with regard to so early an epoch; for reasons for the opposite view—that there was no sea-trade between W. Asia and India till the seventh century B.C.—see INDIA and OPHIR, § 2; cp also Sprenger, *Alt. Geog. Arab.*, §§ 51-60, 139. We must not forget the possibility of land-trade between Babylonia and India through Elam and Persia.[5]

18. With Europe.

As for the trade of W. Asia with Europe in this era, that is much less problematical. Cyprus, which lies in sight of the Syrian coast (*HG*, pp. 22 135), was reached by some of the earliest Babylonian monarchs; and in the course of the second millennium B.C. was in frequent communication both with Egypt and with Syria (Budge, *HE* 4 167 *f.*); and Cyprus can hardly ever have been out of touch with the islands to the W. Evidence of an extremely early knowledge of Europe in Egypt is given in WMM, *As. u. Eur.* ch. 28.[6]

1 Περίπλους τῆς Ἐρυθρᾶς θαλάσσης. Anonymous, but attributed to an author named Ἀρριανός. *Geogr. Græci Minores* by C. Müller, ed. Paris, 1882, vol. i. 257 *ff.*, cp p. xcv.

2 Thotmes III. killed elephants on the Euphrates; Naville, *op. cit.* 17; Budge, *HE* 4 40 48.

3 The islands of the Persian Gulf were visited by Babylonians at a very early period; and thence the coasting (?) voyage to India was not difficult.

4 Götz, *Die Verkehrswege im Dienste des Welthandels*, 101 *ff.* This is not certain; cp O. Schrader, *Handelsgeschichte*, etc., 71, quoted by Götz.

5 For imports and exports of W. Asiatic trade with India in Roman times see *Periplus* (of Erythræan Sea), §§ 49, 56.

6 According to the American explorers of Nippur (Peters, *Nippur*, 2 133 *f.*) some evidence of trade with Greece (Eubœa) was found in remains of the fourteenth century B.C.; cp Budge, *HE* 4 168 *ff.* 177.

(*f*) For the natural lines of traffic and trade-routes, see below, Part II. of this article (§§ 28-40).

19. Means of carriage.

(*g*) The various means of carriage in the ancient world having been for the most part dealt with elsewhere, the treatment here may be brief. Porterage, the employment of human beings for the carriage of burdens both for building purposes and for trade (as we find it still in Central Africa), was common in early Egypt according to the monuments. It was not altogether confined to local traffic. Under one of the Amenemha'ts (middle of 28th cent. according to Fl. Petrie; but 2100 according to W. M. Müller) 200 men with only 50 animals were employed for carrying stone through the desert.[1] From the earliest times, however, the ass and the bullock were in common use, and (especially the ass) constituted the principal means of conveyance. The ass was employed for distant desert journeyings; cp the Beni-Ḥasan pictures (under the 12th dyn.). The camel was apparently unbred and unused even to a late date in Egypt, but must have appeared early in Arabia. The horse and the mule came much later; the horse not till the time of the Hyksos and then, for long, only for fighting and hunting; the mule from Pontus not till towards 1000 B.C. (see ASS, CAMEL, HORSE, MULE, CATTLE, § 8; BABYLONIA, § 5; EGYPT, § 9). The carrying power of these animals was increased by the invention of pack-saddles, open litters (already during the 4th dyn.), sleighs or draw-boards, and carts—first with solid, and then with spoked, wheels. A luxurious chariot with horses appears in the Izdubar legend (Tab. 6) about 2000 B.C. Still less, however, than at the present day, were the wheeled vehicles suited for distant carriage, which was mainly performed on the backs of animals (CHARIOT, § 2). There were practically no international roads for carriages till the Persian Empire. Carriage by water arose first in timber rafts or constructions of reed coated with bitumen, on rivers, especially the Euphrates (BABYLON, § 6; early legends). From these developed rowing and sailing boats, with which ventures were made through river-mouths into the sea; and so arose coasting voyages in the Persian Gulf, the Levant, and the Red Sea (SHIP). By the time of Thutmosis I. (about 1560 B.C.) and Queen Ḥa'tšepsut (EGYPT, § 53) the Egyptians had developed elaborate ships with oars, rigging, and sails for the Punt voyages (cp SHIP). The ships of this (18th) dynasty were not mere fighting galleys; they were transports carrying considerable cargoes (Naville, *Temple of Deir el Bahari*, 3, with plates).

20. Barter; value.

(*h*) Early trade consisted of barter, in which various communities or states of culture exchanged the necessaries or embellishments of life.[2] When a superior civilisation met an inferior it paid for solid goods, as at the present day, with gaudy trinkets and ornaments, as for instance the Egyptians in their commerce with the negro and other tribes whom they met in Punt[3] (Naville, *op. cit.*). Gradually, however, there arose common measures of value: *e.g.*, cattle, slaves, or metals, especially the precious metals.[4] As among other early races[5] orna-

1 For porterage in Babylonia, cp a letter of Ḫammurabi, *Beitr. z. Assyriologie*, 4 474.

2 In the East barter has always survived alongside well-developed systems of money and finance. Cp under Cambyses, *Beitr. z. Assyr.* 4 429, § 9. Palgrave (*Central and E. Arab.* ed. 1883, p. 368) found barter more common 'throughout Arabia . . . among the villagers, and even the poorer townsmen, than purchase.'

3 For an account of curious methods of barter in this region in Greek times, cp Cosmas Indic., *Christ. Topogr.*, Bk. II., ET by M'Crindle, 52.

4 In the 4th mill. silver was used as currency in Babylonia. Cp above, § 8, on Maniš-tu-irba. In the time of Ḫammurabi both barter and money were extant; cp his letters above, § 8, fifth note. For electron in Egypt and silver see EGYPT, § 38, and n. 2, col. 1229.

5 Babelon, *Les Origines de la Monnaie*; W. W. Carlile, *The Evol. of Modern Money*, Pt. II. especially chap. 2.

ments and the material for ornament displaced the useful metals and other commodities as the favourite media of exchange and standards of value. In aid of this, there was not only the common and universal passion for ornament, but also its convenience for hoarding,[1] the family's wealth being most easily 'saved' in the form of its women's ornaments, even after money proper came into existence; and in W. Asia the process would be further hastened by the prevailing custom of purchasing a wife, for an instance of which in Israel, cp Gen. 24, and see below, § 43. These primitive 'moneys,' however, were not always actually given in exchange for goods; but the value of the goods exchanged was reckoned in terms of them. For this usage in the case of copper wire[2] see Erman (494 *ff.*), and later of silver and gold, EGYPT, § 38. Stamped weights of the precious metals were in early use in Babylonia; but money proper appears *in* W. Asia first in the Persian period. For further details see MONEY, and the articles and books quoted there.

21. Trade and religion.

(*i*) The most interesting of all the questions arising in connection with the commerce of W. Asia during this early period is that of its relations to religion. So far as is known to the present writer there exists no adequate treatment of this, nor even a full appreciation of its significance. The hint has already been given (§§ 12, 16) that trade appears to have exercised no influence on the human mind during the formative period of the different religions. In Egypt and Babylonia, or among the Syrian and other Semites, there were gods who reflected or sympathised with every other human activity. The memory of the various peoples went back to divine or semi-divine kings, lawgivers, physicians, teachers, hunters, and fishers (PHŒNICIA, § 12), artisans (cp the Egyptian Ptaḥ and the attribution of the invention of pottery and metal-working to various gods), and musicians. But, except for certain isolated and apparently late instances, to be noted presently (§ 22), there seems to have been no god or hero who was a trader. This cannot have been due to dislike of trading habits, such as prevailed in Egyptian society (§ 13); for the want was not confined to Egypt; nor was it due to any of the moral objections to trade, which are so common in modern times. There is only one explanation: in the formative period of the religions of W. Asia, commerce was not yet specialised as a separate vocation[3] (§ 12). Perhaps the most striking proof of its want of religious influence at an early period is found among the Phœnicians.

22. In Phœnicia, Egypt.

Their most ancient deities were practically identical with those of the general Canaanite stock (Pietschmann, *Gesch. der Phön.* 190). When at last the Phœnicians took to the sea they invoked for their new occupation the blessing of their accustomed deities, and principally of the various local forms of 'Aštart. The other divine beings, who appear connected with Phœnician ships, and in later times were credited with the discovery of navigation, the Kabiri, were of secondary rank in the Phœnician pantheon, and had been originally connected with the mining and working of metals (*Ib.* 188, 190; but see PHŒNICIA, § 11, col. 3774, with footnote). The legends which attribute distant travels to the Tyrian Herakles and divers gods are of late origin (Pietsch. 191). The only other possible instance of a trading Canaanite deity is that concealed under the ambiguous name מסכר (PHŒNICIA, § 12, ISSACHAR, §§ 3, 6). Similarly in Egypt the expeditions to Punt under the eighteenth dynasty were commended to the patronage of Amon of Thebes, who gave the conquest and tribute (*i.e.*, as we have seen, § 8 n. 3, the trade) of that distant land to his own people, and was thanked by them for help in the exploration and opening up of roads (Naville, *Deir el Bahari*, pt. iii. 14, 19 *ff.*). We may assume that other nations of W. Asia when they took to trade also dedicated it each to their own tribal deity. But once this was done, the reaction upon their conceptions of their deity must have been one of the most considerable forces in the transformation of the primitive religions.

23. Reaction of trade on religion.

The deity, originally local and identified with purely local phenomena (PHŒNICIA, § 11), must, when carried abroad by his people, have expanded in their belief to an identification with the principal cosmic forces, especially those of the sea and the heavens. It may, therefore, be to trade that the religions of W. Asia partly owe the association of their gods with the stars—always the guides of travellers—as well as their identification with the natural forces, or even with the gods, of distant lands.[1] But besides thus enhancing the power of native deities, the foreign trade of their worshippers brought back the cults of other gods. This is very evident in Egypt. A number of instances are given by Erman. Usertesen III. (Dyn. xii.) dedicated a temple on the S. frontier to the Nubian god, and only in the second place to Ḥnum the Egyptian (500); Besa, honoured by the New Empire 'as a protecting genius,' probably owed 'his introduction to Egypt to this (incense) trade' (514); and consequent upon the great increase of Asiatic commerce under the eighteenth and the nineteenth dynasty a number of Syrian divinities were admitted to the Egyptian pantheon (517). Similarly there was an export of the gods of W. Asia to Europe by Cyprus: 'merchants of Citium brought the cult of their goddess with them to Athens' (PHŒNICIA, § 11), and the general influence of Phœnician traders on the religion and mythology of Greece is notorious.

24. Sanctuaries and markets.

Again, gatherings to religious centres, great or small, have always been convenient for trade—as we see even in mediæval and modern times. Stated and famous markets grew about the sanctuaries of W. Asia and festivals became fairs. Where trade, as in N. Syria and Arabia, had to pass through many tribal territories, treaties were necessary and were accompanied by religious rites at border (or other) sanctuaries, at which it would be natural to exchange goods. In our period and that which followed it, Babylon, Carchemish, Bethel, Sinai (perhaps), Mecca, and various Egyptian towns are instances.[2] Exchanges were effected under religious direction; it was the interest of the guardians of the sanctuaries to prescribe forms, and fees to the temple were charged.[3] The supervision by priests of Babylonian commerce is evident from a multitude of contract tablets;[4] and the rise of priestly families and castes to kingly power, both in Babylonia and in Egypt, was made possible by the wealth which accrued to them from their direction of commerce.

Before we proceed to Israelite commerce one other study is necessary.

25. Syria.

We have seen that during the New Empire and especially under the eighteenth and nineteenth dynasties there was a great increase of trade between Syria and Egypt, in which Syrian products and manufactures played a very important part (above, § 8). We are now to examine the details of this, happening as it did on the eve of Israel's settlement in Palestine. The first evidence

[1] Carlile, *op. cit.*

[2] As in Calabar and other parts of Africa, probably for ornament; Carlile, *op. cit.* 240.

[3] For an illustration of the very opposite take Buddhism, which 'was a merchant religion par excellence; there are few parables or birth-stories in which a Buddhist merchant does not figure'; *JRAS*, 1902, p. 387.

[1] For an identification of Ḥathor with the deity of the *anti* or incense of Punt, see Naville, *op. cit.* 20.

[2] For another, cp ISSACHAR, § 2; Dt. 33 18.

[3] WRS, *Rel. Sem.* 441.

[4] Delitzsch in a note to No. 28 of Nagel's translation of Ḥammurabi's letters to Sin-idinnam (*Beitr. z. Assyr.* 4 458 493) illustrates the Babylonian custom of making valuations 'before God'—*i.e.*, in presence of the priests—and compares Ex. 21 6 22 8 [7] *f.*

is found in the records of Thutmosis III. (1503-1449).[1] Coats of mail do not appear in his reign till he takes 200 from the Canaanites at the sack of Megiddo. The Syrian chariots are the finer, and generally Syrian artisans appear more skilful and artistic than those of Egypt. Large numbers of them are transported to Egypt. In the same reign there are records of importations of grain into Egypt; these cannot all have been tribute (above, § 8 n. 3); also of oil, wine, honey, dates, incense, timber for masts and beams, and cattle.

It is in the period after Thutmosis III., however, that we obtain our fullest evidence of the commercial condition of Syria before Israel entered it. The Amarna Letters (1400 onwards) reveal, if by no more than the cuneiform script in which they are written, the already prolonged and close commercial intercourse between Babylonia and Egypt across Syria. Their contents are still more significant.[2] The kings of Babylonia and Egypt propose an exchange of the products of their lands. Gold is sent from Egypt to Babylonia, 'painted wood,' golden and wooden images, and oil. From Babylonia to Egypt come manufactured gold, precious stones, lapis lazuli, enamel, skins, wooden chariots, horses, and slaves. Some of these, of course, pass as presents between the kings; but that they are also articles of commerce is proved by the complaint of one of the Babylonian kings that his merchants (*dam-garu, dam-karu or tamkaru*: cp Del. *Ass. HWB*, Aram. *taggār*, whence Arab. *tâgir, tuggâr*) had been plundered in the territories of the Pharaoh. Letters from Alašia, either Cyprus (Winckler) or the extreme N. of the Syrian coast (Petrie, WMM), tell of the exportation from that country of copper, bronze, ivory, ship-furniture, and horses to Egypt, and the receipt of silver, oil, and oxen. Merchants go from Alašia to Egypt by ship; a writer begs the king of Egypt not to allow them to be injured by his tax-gatherers (no. 29). The king of Alašia complains of the Lukki, a pirate people who disturb the Mediterranean, and invade his land (28). A prince of N. Syria sends slaves and begs for gold (36). The letters from Egyptian tributaries and officials in Palestine, during its invasion by the Ḥatti and Ḥabiri, ask for wheat from Egypt for besieged towns and districts that have not been able to grow their own corn (cp the story of Jacob and Joseph); or report the sending of timber, oil (cp Hos. 12 2 [1]), honey, cattle, and slaves. One letter (122) asks for myrrh as a medicine. Another (124), but obscurely, speaks of purple (?). Abd-ḫiba of Jerusalem complains that he cannot prevent the plundering of the King of Egypt's caravans in Ajalon (180). Horses and asses are supplied to travellers (51), and provisions to the royal caravans (242) and troops (264, 270). One letter reports payment of '300 pieces of silver to the Ḫabiri, besides the 1000 into the hand of the king's officer' (280). We read of no passage of glass either way, though glass had been known in Egypt from 3300 B.C. and was also made in Phœnicia from an early date. It was immediately after the period of the Tell-el-Amarna Letters—*i.e.*, in the fourteenth century B.C.—that Kadašman-Ḫarbe (BABYLONIA, § 57) of Babylon, being shut off from Ḫarran and the upper Euphrates by Assyria, opened a direct route across the desert to Phœnicia (Wi. *Politische Entwickel. Bab. u. Assyr.* 15).

26. Amarna Letters.

Egyptian records confirm the frequent importation of slaves from Syria into Egypt, where the girls were prized in the harems, and, in addition to articles mentioned in the Amarna Letters, indicate that Syrian pottery and metal work were prized; also ointments for embalming, oils, wine, woollen cloths, and embroideries. The characteristics of Syrian clothing as depicted on the monuments were embroidery, tassels, and fringes. There is an extremely interesting account of an expedition sent about 1100 B.C. by Ḥer-ḥeru of dynasty twenty-one to Lebanon for cedar in one of the Golénischeff Papyri (*Recueil de Trav.* 21 74 *ff.*; cp WMM, *As. u. Eur.* 395; Budge, *HE* 6 13 *ff.*).

27. Other Egyptian records.

[1] WMM, *As. u. Eur.* 24; Flinders Petrie, *HE* 2 146 *ff.*

[2] The following facts are taken from the German translation (with transliteration of the original into Roman characters) by Hugo Winckler, *Die Thontafeln von Tell el-Amarna*, Berlin, 1896: for some corrections see Knudtzon in *Beitr. zur Assyriologie*, iv. 2 3.

II. TRADE ROUTES IN W. ASIA

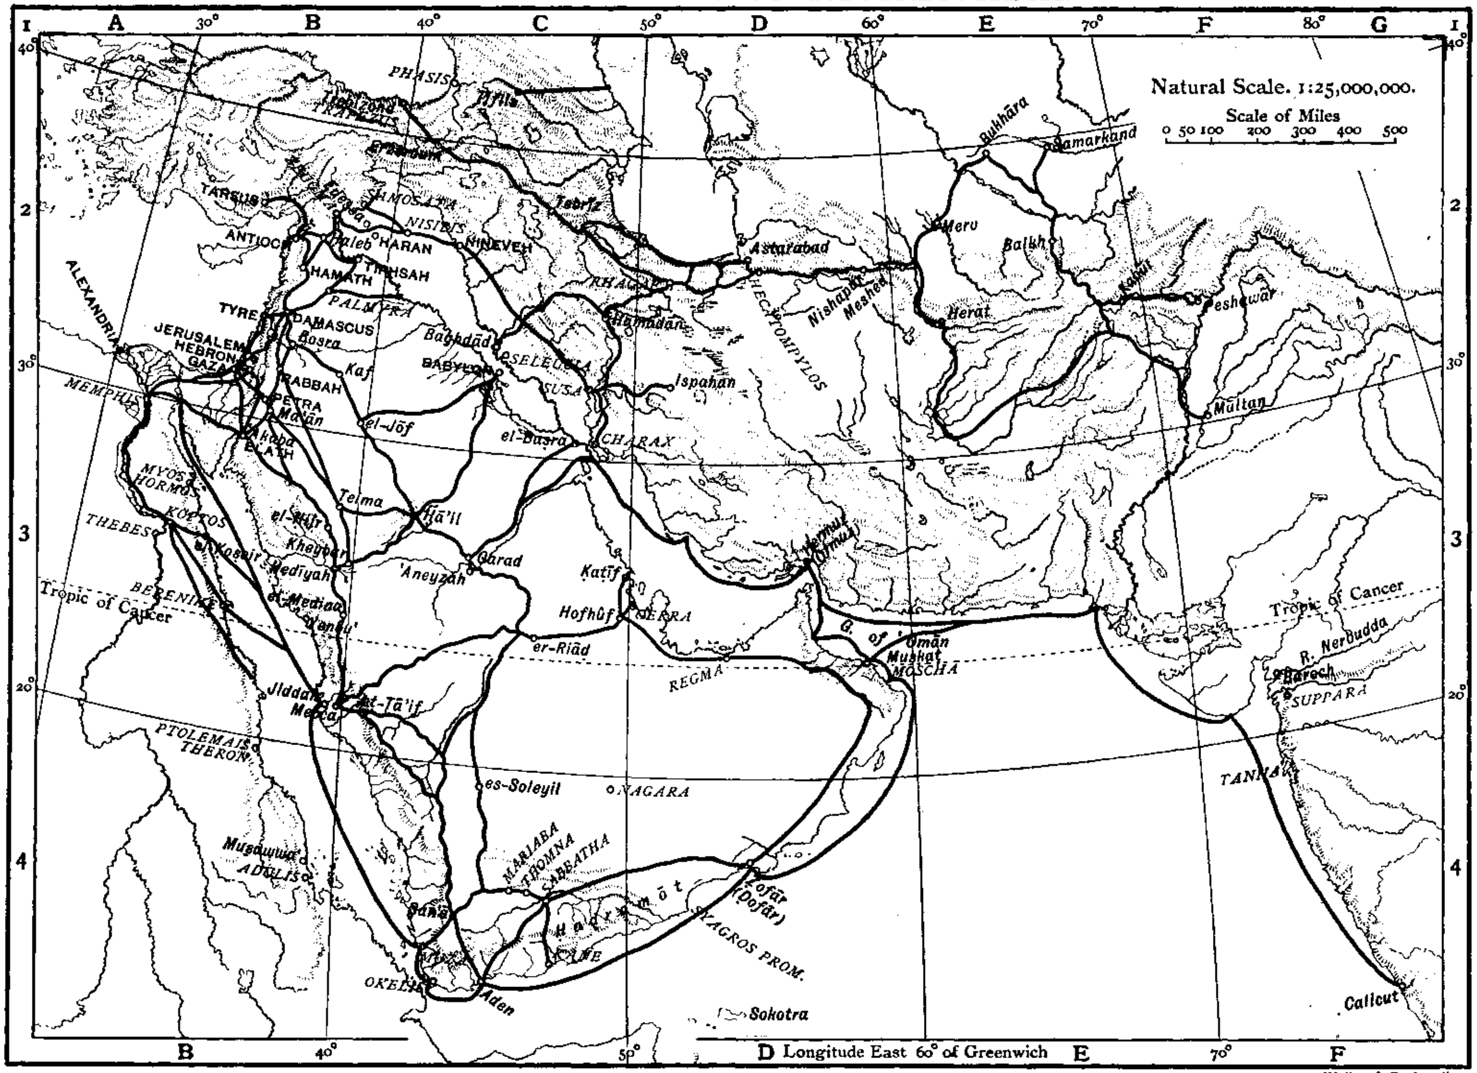
We may now indicate the physical facilities for commerce in W. Asia, and trace the main lines of trade and cross routes by land and sea. On the map the eye at once marks the following natural directions of traffic: two long and navigable rivers, the Nile and the Euphrates; two long narrow seas with more or less harboured coasts, the Red Sea and the Persian Gulf; whilst from the most westerly point touched by the Euphrates, a fertile and well-populated country, passable on several lines through Syria, stretches to the Nile Delta, with one break of desert about six or seven days' march from Gaza to Pelusium. Inside all these lie the great Arabian deserts, isolating the fertile Arabia Felix from W. Asia; but even across these deserts, lines of oases and valleys, in which, though there is no cultivation, water is procurable, render passage possible by land from the Indian Ocean to the Levant. The many routes created along and across these natural lines we shall take in order as they lie from the south northward, and we shall include the directions of traffic with India.

28. Lines of trade: Egypt.

Egypt's inland trade, and her traffic with Nubia, the Sudān, and farther south, went up the Nile by Yēbu (Elephantine, 'ivory island') and Suênet (Syene, Aṣwān: 'commerce,' Erman, *op. cit.* 498 *f.*), at which exchanges were made with the barbarians. 'It is difficult,' says Erman (479), 'to find a word in the language which means to *travel*; the terms used were *ḫont*=to go up stream, and *ḫod*=to go down stream.' The river flows northwards; but, as if in compensation, the prevailing winds are in the opposite direction. From Memphis by the Fayoum, or from the present Assiout and other Nile-ports, caravans reached the western oases (ὄασις from Eg. *uaḥ*=station).

So far as concerned the trade with Punt, the Nile and the Red Sea, running nearly parallel for some thousands of miles, and at one point only 90 m. apart, wonderfully supplemented each other's defects. As on the Nile, the prevailing winds in the Red Sea are from the north: in the upper half the N. wind seldom flags, and the Gulf of Suez is often stormy. The Egyptians, therefore, divided their route from the Delta to Punt and back again between the river and the sea. Their traffic southward was borne on the Nile[1] as far as Koptos,[2] and then struck E. over the desert about 90 m. to Sauu, at the mouth of the W. Gasûs,[3] a little to the N. both of the later Greek harbour Leukos Limen,[4] and the modern el-Ḳoṣēr (Erman, 586).

29. Nile and Red Sea.



[1] Naville (*op. cit.* 16) points out that the pictures of Ḥa't-šepsut's Punt expedition on Deir-el-Baḥri, which show the Punt goods arriving at Thebes by ship, suggest that there was 'an arm of the Nile in communication with the Red Sea,' at that time; and that the same ships carried cargo all the way. But the picture may only intend the short passage from Koptos to Thebes.

[2] To-day not Ḳafṭ (Koptos) but the neighbouring Ḳeneh is the starting-place for el-Ḳoṣēr.

[3] The way is almost waterless (cp above, § 9), but the present writer knows it for only a day E. from Ḳeneh. This road was supplied with reservoirs by many Pharaohs (above, §§ 9 19 n.). It was much used for trade in the reign of Xerxes (Budge, *HE* 7 75) and in Roman times. It is of interest that in 1801 Major General Baird and his army took 16 days from el-Ḳosēr to Ḳeneh (Anderson, *Journ. of Secr. Exped. to Medit. and Eg.*, London, 1802, p. 357).

[4] Also called Myos Hormos by the *Periplus*, 1, and by Strabo (xvi. 4 24 xvii. 1 45), apparently through confusion with Myos Hormos on the Gulf of Suez. Cp Agatharchides, *De Mari Erythr.* in *Geogr. Gr. Min.* 1 167 *ff.* with Tab. VI. in Atlas.

TRADE-ROUTES OF HITHER ASIA.

Walker & Cockerell sc.

ENCYCLOPAEDIA BIBLICA 1903.

MAP OF TRADE-ROUTES OF HITHER ASIA

INDEX TO NAMES

Aden, C4 (TRADE, § 5)
Adulis, B4 (TRADE, § 29)
'Aḳaba, B3 (ELATH)
Alexandria, B2 (EGYPT, § 72)
'Aneyzah, C3 (TRADE, § 31)
Antioch, B2 (TRADE, § 80)
Astarabad, D2

Babylon, C2
Baghdād, C2 (BABEL, § 7)
Balkh, E2
Baroch, F3
el-Baṣra, C2 (BABYLONIA, § 14)
Berenike, B3 (TRADE, § 29)
Boṣra', B2 (BASHAN, § 3)
Bukhāra, E2

Calicut, F4
Charax, C2 (TRADE, §§ 63, 69)

Damascus, B2
Ḍofār, D4 (TRADE, § 5)

Edessa, B2 (ARAMAIC, § 11)
Elath, B3
Erzeroum, C2

Garad, C3
Gaza, B2 (TRADE, § 70)
Gerra, D3 (TRADE, § 31)

Ḥadramōt, C4, D4 (HAZARMAVETH)

Ḥā'il, C3 (TRADE, § 50)
Ḥaleb, B2
Hamadān, C2 (TRADE, § 58)
Hamath, B2 (TRADE, § 39)
Hebron, B2
Hecatompylos, D2 (TRADE, § 58)
Hedīyah, B3
Herat, E2 (TRADE, § 58)
Hermuz, D3
el-Ḥijr (TRADE, § 31)
Hofhûf, C3

Ispahan, D2 (TRADE, § 58)

Jiddah, B3 (TRADE, § 29)
Jerusalem, B2
el-Jōf, B2 (ISHMAEL)

Kabūl, E2
Kaf, B2
Kane, C4
Ḳaṭīf, C3
Kheybar, B3
Koptos, B3 (EGYPT, § 14; TRADE, § 29)
el-Ḳoṣeir, B3 (TRADE, §§ 8, 29)

Ma'ān, B2 (TRADE, § 14)
Mariaba, C4
Mecca, B3 (GAZELLE)
el-Medīna, B3 (TRADE, § 31)

Memphis, B3 (EGYPT, § 47; TRADE, § 10)
Merv, E2 (TRADE, § 58)
Meshed, D2
Moscha, D3 (TRADE, 30)
Mūltan, F2
Muṣawwa', B4 (TRADE, § 8)
Musḳaṭ, D3 (TRADE, § 5)
Muza, C4 (TRADE, § 29)
Myos Hormos (ALEXANDRIA, § 1; TRADE, § 29)

Nagara, C4
R. Nerbudda, F3
Nineveh, C2
Nishapur, D2
Nisibis, C2 (DISPERSION, § 6; TRADE, § 40)

Okelis, C4 (TRADE, § 29)
G. of 'Omān, D3
Ormuz, D3

Palmyra, B2 (ARAMAIC LANGUAGE, § 2; TRADE)
Peshawar, F2
Petra, B2 (TRADE, § 14)
Phasis, C1
Ptolemais Theron, B4

Rabbah, B2 (MOAB, § 9)
Regma, D3

Rhagæ, D2
er-Riāḍ, C3

Sabbatha, C4
Samarḳand, E2 (TRADE, § 58)
Samosata, B2 (CAPPADOCIA; TRADE, § 69)
Ṣan'ā, C4 (HADORAM)
Seleucia, C2
Sokotra, D4
es-Soleyil, C4
Suppara, F3
Susa, C2 (CYRUS, § 1; TRADE, § 58)
Syagros Prom., D4 (TRADE, § 30)

eṭ-Ṭā'if, C3 (NAZIRITE, § 2)
Tanna, F4
Tarsus, B2
Tebrīz, C2
Teima, B3 (MIDIAN; TRADE, § 31)
Thebes, B3 (EGYPT, §§ 56 *f.*)
Thomna, C4
Tiflis, C1
Tiphsah, B2 (TRADE, § 39)
Trapezus, B1
Trebizond B1 (TRADE, § 69)
Tyre, B2 (TRADE, § 70)

Yenbu', B3

Zeugma (SYRIA, § 6 · TRADE, § 69)
Ẓofār, D4

Other harbours on the S. coast of the Red Sea were Myos Hormos at the mouth of the Gulf of Suez, about 120 m. from the Nile,[1] probably used in the early period for sea traffic, more frequent than the land traffic, with Sinai; the Ptolemaic Berenike due E. from Syene but usually reached by caravan from Koptos—twelve days' journey according to Pliny (*HN*, 6 26); Ptolemais (ἡ τῶν Θηρῶν καλουμένη: *Peripl.* § 3) near the modern Massowah; Adulis[2] (*id.* § 4), etc.; with Muza and Okelis on the Arabian coast just inside the Straits of Bāb-el-Mandeb (*id.* §§ 21 *ff.* 25 *ff.*).

If we reckon by the voyages of Arab dhows,[3] it would take the Egyptian ships about a month to sail from el-Ḳoṣēr to the Straits of Bāb-el-Mandeb. Pliny (*l.c.*) gives thirty days from Berenike to Okelis, but Herodotus (2 11) only forty for the voyage down the whole Red Sea.[4]

30. Indian Ocean.

In the Indian Ocean the routes down the E. coast of Africa and up the Arabian coast were known and mapped in Greek times. For the African coast see the Atlas to *Geogr. Gr. Min.* xii. The Arabian coast route is described in the *Periplus*. From Okelis to Arabia Felix (Aden), to Moscha (Ẓofār) and the Syagros promontory (Rās Fertak) would take at least a month, with probably twenty days more to the mouth of the Persian Gulf. Thus the whole voyage from 'Akabah or Suez to the mouth of the Persian Gulf cannot have occupied less than three months. Thence to the mouth of the Indus and down the Malabar coast the ports and distances are described in the *Periplus*. For the voyage direct from Okelis, 'ad primum emporium Indiæ, Muzirim,'[5] Pliny (*HN* 6 26) gives forty days, and adds that a ship leaving Berenike about the end of July reached Muziris about the middle of October, and leaving again in the end of December or January returned to Egypt within the year. The coasting voyage from Babylonia down the Persian Gulf, and so to the Indus, may be followed in the *Periplus* (§§ 35 *ff.*), or in Arrian's *Hist. Indica* (§§ 20 *ff.*).[6]

31. Arabia.

Coming now to Arabia, we find in the Minæan inscriptions hints, and in the Greek geographers data, of the long trade routes, which traversed the peninsula.

Sprenger (*Alte Geogr. Arab.*, chap. 2) describes nine of these routes, with Ptolemy's map of Arabia; and Wüstenfeld (*Die von Medina auslauf. Hauptstrassen*, and *Die Strasse von Baçra nach Mekka*; Gött. 1862 and 1867 with maps) has laid down the routes in the N. half of Arabia from the data of the Arabian geographers.

The principal roads were those by which frankincense was brought to Syria and Mesopotamia from the Sabæan country.

Pliny (*HN* 12 33 éd. Delph.) gives the distance from Thomna to Gaza as sixty-five daily marches for camels.[7] The route held to Mecca, from remote antiquity a great centre of trade. There it divided. One branch turned NE. through Nejd (a present pilgrim-route) and again divided, one arm E. through el-Ḥasa to the ancient Gerra, or other port on the Bahrein Gulf,[8] the other NE. towards Baṣrah. The main branch from Mecca continued N. to Medīnah (whence a tolerably watered road

[1] At Keneh. For the route, past granite and porphyry quarries with Greek and Roman remains, see Baedeker's *Eg.*(4) 348. Myos Hormos. now Abu Ṣar el-Ḳibli, lay in the lat. of Manfaluṭ, and from there or Assiûṭ was about 150 m. distant.

[2] Or Adulé (near Annesley Bay) the port for Axum, 120 m. distant; in the Gk. period the market for trade with Central Africa, 'much frequented by traders from Alexandria and the Elanitic gulf'—Cosmas Indicopleustes, *Christ. Topogr.* (6th cent.), Bk. II. ET by M'Crindle, 54.

[3] Cp Burton, *Pilgrimage to Al-Med. and Mecca*, chap. 11.

[4] This appears also to have been the datum of Timosthenes, the Ptolemaic admiral, in Pliny, *HN* 6 33 ed. Delph., where for *quatridui* read *quadraginta dierum*.

[5] Muziris, on the Malabar coast, either Calicut, or more probably, Mangalore; see the *Periplus* and Ptolemy. For voyages to different ports in India, cp Sprenger, *Alte. Geog. Arab.* 98 *ff.*

[6] *Geogr. Gr. Min.*, ed. Müller, Paris, 1882, vol. i., 284 *ff.* 332 *ff.* with Tabb. XI. and XIII.-XV.

[7] Palgrave (144) gives his day's march as twelve to fourteen hours, at about 5 m. an hour, 'the ordinary pace of a riding camel.' This seems even for such rather much, and freight camels certainly go more slowly.

[8] Palgrave (369) gives the time for the Persian pilgrims from Abu-Shahr (Bushire) across the gulf and through Nejd to Mecca as two months.

TRADE AND COMMERCE

strikes NE. by 'Aneyza[1] and the Lower Kaseem to Baṣra on the Euphrates) and Ḥijr (Egra),[2] where it divided into one NE. by el-Teimā (Thaima), round the northern Nefūd and along the Wādy Sirḥān to Boṣra for Damascus[3] (or to Tadmor), and another NNW. to Ma'ān, Petra, and Gaza; with a branch doubtless to Elah on the Gulf of 'Aḳabah. A Minæan inscription (Glaser, 1155; Halévy, 535) mentions a caravan route from Ma'ān to Ragmat, probably the OT RAAMAH (*q.v.*), either 'Ρεγμα on the Persian Gulf or the seat of the 'Ραμμανιτοί of Strabo (xvi. 4 24) near Mariaba in Sabæa. From Gerra (Ger'a), on the Persian Gulf, one route swung round by 'Omān to the incense country on the S. coast; another crossed probably by el-Ḥaṣa, Nejd, and Lower Kaseem to Kheybar and Teyma for Syria (or from Kaseem crossed more directly by Ḥā'il and el-Jôf to Ma'ān; Palgrave [p. 2] gives the distance from the Jôf to Ma'ān at 200 m. as the crow flies). Forder (145) gives the present population of the Jôf at 40,000 (!). The town is 2 m. long, ¼ m. wide; three rainfalls annually; water-supply good from deep springs; warm sulphur springs; clothing, cooking-utensils, coffee, etc., by caravan from Mecca, Baghdād, and Damascus. Another route across N. Arabia, probably used by Babylonian expeditions to Muṣri and Sinai, led from the Euphrates to the Jôf and so by Ma'ān to 'Aḳabah; but the longer route given above—Baṣra-'Aneyza-Teyma-'Aḳabah—was easier and less dangerous. On the S., easy routes connected the interior of the Minæan territory with the ports on the Red Sea and the Indian Ocean. So much for Arabia.

32. Egypt through Syria.

We have now to trace the routes from Egypt across Syria towards Damascus for the Euphrates. Of these there are in the main four.

1. *E. of Jordan.*—The first, from the E. westward, left the Delta by Suez for Nakhl, on the plateau of Tih, and thence reached Elath at the head of the Gulf of 'Aḳabah,[4] where it joined the routes S. and E. through Arabia. From 'Akabah it turned up the W. el-Ithm to the E. of Edom (Israel's track) and struck Ma'ān (where it crossed the route Mecca to Petra). From Ma'ān it is ten journeys to Damascus (Doughty, *Ar. Des.* 1 48); the present Ḥajj route keeps to the E. of Moab, to avoid the deep cañons (for routes through Moab, see MOAB, § 8) to Ḳal'at ez-Zerḳā, on the upper waters of the Zerḳā, the biblical Jabbok. Thence it holds due N. to Rimtheh and el-Muzērib, thence upon the west of the Lejā to Damascus. An older branch struck from the Zerḳā NE. to Boṣra (to which other routes came up from Arabia), Kanatha, and so by the E. of the Leja to Damascus.

2. *Up the 'Arābah.*—The second route, from Elath to Damascus, followed the great trench of the 'Arābah by the foot of Mt. Seir to the Dead Sea, and then up its west coast and the Jordan valley. This has great disadvantages in heat and want of water; but the traffic along it (at least as far as the Dead Sea) was considerable in the early Mohammedan period, and the same stretch of it may have been used by Jewish trade with Elath in the days of the kings.

3. *By Hebron.*—A third line of road from Egypt through Syria—perhaps that called the way of SHUR (*q.v.*, Gen. 16 7)—started from the middle of the Isthmus, struck E. through the desert till it crossed Jebel Maghārah,[5] turned N. round J. Helāl, crossed W. el-'Arīsh (from which onwards there are not a few wells and waterpits), passed el-Birein, Ruḥaibeh, and Khalaṣa to Beersheba and Hebron (PALESTINE, § 20).

4. *By maritime plain.*—The fourth route left the Delta at Pelusium or some station near the present el-Kanṭara on the canal, for Rhinokolura (el-'Arīsh), Raphia, and Gaza—six to seven marches from the Delta.[6] Thence by Ashdod up the Maritime Plain.

[1] So Doughty. For the mercantile qualities of the inhabitants, see Palgrave, 117 (Oneyza; v. Oppenheim [2 54], 'Onēze).

[2] Or Medain Ṣaliḥ.

[3] Palgrave. A description of the route between the Jôf and Boṣra, along the W. Sirhân is given by Forder (*With Arabs in Tent and Town*, chaps. 5-8). It is apparently 5½ days from the Jôf to Ithera; thence four hours to Kāf, thence 6 days to Orman, thence 1 to Boṣra.

[4] Palmer, *Desert of the Exodus*; Trumbull, *Kadesh Barnea*; consult Palmer also for routes from Suez to Sinai.

[5] To the N. of Jebel Yeleg: see Drake Holland's Map, *PEFQ*, 1884, p. 4.

[6] Napoleon, *Guerre d'Orient: Campagnes d'Égypte et de Syrie*, vol. ii.; Wittmann's *Travels*, 128 *ff.* Archduke Sal-

These four roads from Egypt to Syria were crossed by others from Arabia to the Levant and S. Palestine.

33. Cross-routes: Tih, Negeb. The direction of these, across the desert of Tih and the Negeb, must have varied according to season and rainfall. This desert, so important both in the wanderings and in the trade of Israel, is in the main a high, hard plateau, the Plateau of Tīh, bearing short, irregular ranges of hills, and is mostly barren, but its valleys contain alluvial soil. The rainfall in January and February is considerable, and then there is much grass. Perennial springs are infrequent; but in the longer wādies water can nearly always be had by digging. Horses may be taken everywhere, provided camels accompany them with water-skins for the long intervals between wells (Wilson, *PEFQ*, 1887, pp. 38 *ff.*). The ruins of vineyards and villages, with forts, in the NEGEB (*q.v.*) prove that it was once easy of traverse. The most inaccessible portion is immediately W. of the 'Arabah and S. of the Palestine frontier—some 60 m. N. and S. by 50 E. and W.—steep ridges, the home of the wildest of the Arabs of this region, the 'Azāzimeh. This part throws the roads between Palestine and the Red Sea to the W. and E. of itself. These naturally bend to the best sources of water, of which we may note the following:—'Ain el-Weibeh[1] in the Arabah, about 80 m. from Elath, and 30 from the Dead Sea; 15 m. N., 'Ain Hasb;[2] S. of the 'Azāzimeh country, well-watered wādies round the famous 'Ain Ḳadis (KADESH, 1); but this district is so shut off by Jebel Magrah and other hills that it is not visited by through roads; wells at Hathirah, Bīrein, el-'Aujeh, and elsewhere afford a well-watered line of travel N. and S. on which most of the routes converge; N. of the 'Azāzimeh country, 'Ain el-Mureidhah, W. el-Yemen, and Kurnub. Taking these facts with the evidence of the ancient geographers and of travellers like Robinson, Palmer, Clay Trumbull, Holland, and Wilson, we can determine the following lines of traffic across the desert of Tih and the Negeb.

1. The chief line of traffic is that which from the head of the Gulf of 'Aḳabah strikes NW. over the plateau of Tīh to the conspicuous mountain 'Arāīf en-Nāḳah,[3] and bending N. coincides near Bīrein with the trunk road from the middle of the Isthmus of Suez to Hebron. It leaves the trunk road again near Ruḥaibeh and strikes NW. on Gaza. For camels it is about eight days' journey by this route from 'Aḳabah to Gaza. To the E. of the S. half of it, but coinciding with its N. half, are several pilgrim routes between Sinai and Gaza much used in the Middle Ages;[4] it is ten days from St. Catherine's Convent to Gaza.[5]

2. The route from Ma'ān and Petra to the Negeb descends by Petra and the W. el-Abyaḍ, crosses the 'Arabah NW. to 'Ain el-Weibeh, and thence strikes up through the hills by several branches, the best known being that which leaves the 'Arabah a little to the N. of 'Ain el-Weibeh, passes 'Ain el-Mureidhah and 'Ain el-Khuran to the great mountain barrier, pierced by the Naḳb el-Yemen, Nakb eṣ-Ṣufāh (thought by some to be ZEPHATH or HORMAH, through which Israel attempted Palestine from the S., Nu. 14_{45} 21_3 Dt. 1_{44} Judg. 1_{17}) and Naḳb es-Sufey.[6] Still another pass to the W. of Naḳb el-Yemen is said to carry a road to Gaza. On the high region to the N. of these passes the routes reunite, and, passing a little to the E. of Kurnub[1] and 'Ar'ārah, the road divides into two, one N. of Beersheba to Gaza, the other by Kh. el-Milḥ to Hebron. By this road from Ma'ān to the Negeb pilgrims and supplies from Gaza and Hebron meet the Ḥajj at Ma'ān, and it is probable that from Hebron to 'Ain el-Weibeh and thence down the 'Arabah the same road carried the trade of the kings of Israel to Elath or Ezion-geber.[2]

3. Finally, there was a less important line of traffic from Gaza along the S. frontier of Palestine and round the S. end of the Dead Sea to Kerak.

For the main and cross routes through Palestine

34. Palestine. itself, see PALESTINE, § 20, to which may be added the following:—

1. *From Dead Sea.*—The great 'Arabah road and the salt deposits at the S. end of the Dead Sea were connected with Jerusalem by a route through el-Milḥ and Hebron, by another which left the Dead Sea at Engedi and deployed up the W. Ḥuṣāṣah to Jebel Fureidis (Herodium), or crossed W. Ghuweir and ascending W. Jerfân struck NW. to Jerusalem. The second of these is a very bad road. To-day the salt-carriers, in preference to both, follow the Dead Sea coast to a point N. of Engedi before striking up to Jerusalem.

2. *Across W. range.*—N. of the Dead Sea the routes across the W. range were two: *first*, that mentioned in PALESTINE, § 20, by the Beth-horons, past the great sanctuary and market at Bethel, down to Jericho; 'Ain ed-Dūk on one branch of this route is probably a Philistine station (DAGON, DOCUS) of the days when the Philistines commanded the traffic on this line (it was also used by the Crusaders, who did not hold Gaza, for their traffic with Moab, Edom, and 'Aḳaba; Rey, *Les Colonies Franques dans les XII. et XIII. Siècles:* ch. 9); *second*, the road which, ascending NW. from Jaffa, crosses the watershed at Shechem in the pass between Ebal and Gerizim, and descends the wādies el-Kerād and Fāri'ah to the ford at ed-Dāmieh. That the trading Philistines also used this route is certified by the presence to the E. of Shechem of a Beit Dejan—*i.e.*, Beth-Dagon. So also Vespasian marched (*BJ* iv. 8_1).

Carmel was turned by four routes N. from Sharon.

35. Sharon to Esdraelon. (1) The most westerly follows the coast; it connected the Phœnician settlements S. and N. of Carmel, and in later times Cæsarea with Ptolemais. (2) A road leaves the N. end of Sharon and strikes N. by Ṣubbarīn and E. of Carmel to Tell Keimūn; it is the shortest line from Egypt to the Phœnician cities. (3) Another leaves Sharon at Kh. es-Sumrah, strikes NE. up the W. 'Ārah to 'Ain Ibrahīm and enters Esdraelon at Lejjūn (Megiddo), from which roads branch to Nazareth, Tiberias, and, by Jezreel, to Beth-shan and the Jordan. (4) The fourth leaves Sharon by the W. Abu Nâr, emerges on the plain of Dothan, and enters Esdraelon at Jenīn (En-gannim); for the Jordan valley and the road to Damascus across Ḥaurān it is shorter than the route by Lejjūn (cp Gen. 38_{25}). On these roads and their significance see *HG* 150 *ff.*

The valleys of S. Galilee, disposed E. and W., carried some of the most famous roads of Palestine. These

36. S. Galilee. started from Akko (PTOLEMAIS). (1) One struck SE. by another Beth-Dagon,[3] climbed to Sepphoris, passed near Nazareth, and descended by the W. esh-Sharrār to the Jordan at the Roman bridge, Jisr el-Mujāmi', the main Roman road to the trans-Jordanic provinces. (2) Another crossed by the valley N. of Sepphoris and descended on Tiberias. (3) Another climbed E. probably by W. Wasriyeh, held along the foot of Upper Galilee to Ramah, from which one branch descended to join a

Walker & Cockerell sc.

N. and S. trunk road at Capernaum, whilst a second proceeded by Ṣafed to the present Bridge of the Daughters of Jacob across Jordan. These are probably the roads reflected in the parables of Jesus (*HG* 425 *ff.*). The most northerly is the most natural (or easiest) route for traffic from the sea-coast to Damascus (PTOLEMAIS, § 3).

More difficult roads, however, crossed the highlands behind Phœnicia:—(1) from Tyre, by Burj el-Alawei through the valley near Abrikha (where pavement is still found) down to the N. of Rubb Thelāthīn, across the Ḥāṣbāny to Bāniās; (2) from Tyre, or (3) from Sidon, to the elbow of the Liṭāny and so down to the Ḥāṣbāny bridge and Bāniās. The importance of these roads is testified by the lines of crusading castles upon them.

37. Tyre and Sidon.

On the E. of Jordan (N. of Moab) the cross-routes are best illustrated by the position of the cities of DECAPOLIS (*q.v.*). From the Jordan opposite Scythopolis (Bethshan) start three roads:—(1) one to the S. by Pella (with a variation a little to the N.) and thence SE. over the hills of Gilead (by the lost Dion) to Gerasa and Philadelphia (with branches). (2) A second climbed to Gadara, and thence along the ridge to Abila of the Decapolis, and by Abila to Kanatha or by Edrei to Bosra and Jebel Ḥaurān. (3) A third climbed from the E. coast of the Lake of Galilee by Hippos (Sūsiya opposite Tiberias) and crossed Jaulān and Ḥaurān by Nawa (with variants) to Damascus. To the N. of these ran other two: (4) from the Bridge of the Daughters of Jacob by el-Ḳuneiṭrah, and (5) from Bāniās by Kefr Hawar—both to Damascus.

38. E. of Jordan.

The lines of trade through N. Syria from Damascus and Phœnicia to the Euphrates are determined by the desert, the long parallel lines of hills, and the Orontes valley. The shortest route from Damascus to Mesopotamia is NE. by the Palmyra or TADMOR oasis; but its difficulties, due to the want of water and the wild character of the nomads, diverted the main volume of traffic through the settled country to the E. of Jebel Anṣārīya. Here the road from Damascus struck due N. on the E. of Anti-libanus, by Riblah, Hemessa (Ḥomṣ), Hadrach, to Hamath (Ḥamāt), where it was joined by a road from the Phœnician coast up the Leontes and down the Orontes valleys. From Hamath the routes were two: one NE. to Tiphsah (Thapsacus), 'the ford,' on the Euphrates; the other, and more frequent, N. by Ḥalwan (Ḥaleb, Aleppo) and Arpad (Tell Arfād) to Carchemish (Jerābīs), a great sanctuary and market.[1] From this rafts descended the Euphrates to Babylon, and a road travelled E. by HARAN [*q.v.*] (Ḥarrān), again a famous sanctuary and market, and Nisibis (Naṣībīn) to the Tigris at Nineveh. On Carchemish and Ḥarrān converged routes from Asia Minor and Armenia; upon Nineveh from Armenia by the Upper Tigris and from the Caspian by the Greater Zāb and other valleys. On the Mesopotamian routes with their extensions into Asia Minor, Persia, and farther E., see below §§ 58 (Persian Imperial roads), 63 (Greek), and 69 (Roman). The Euphrates is navigable for 1200 m. from its mouth, and is said to be, as high up as its junction with the Khābūr, 18 ft. deep, a depth that sometimes falls, lower down its course, with the dissipation of its waters, to 12 ft. (Rogers, *Hist. of Bab. and Ass.* 1 271 *ff.*). The Tigris, much more rapid, and of more uncertain volume, is less fitted for navigation; but to-day small steamers proceed as far up as Baghdād, and boats even to Mōṣul (Nineveh).[2] The convenience of Babylonia for trade through Elam with the interior of Asia has already been noticed. For the land routes from India to Babylon, see Lassen, *Indische Alterthumskunde*, 2 529; for the ancient sea route, Arrian's Ἰνδική, §§ 20 *ff.* For both under Babylonians, Persians, Greeks, and Romans, see below, §§ 56, 58, 63, 71.

39. N. Syria.

40. Assyria: Babylonia.

[1] See map to ASSYRIA, between cols. 352 and 353.

[2] From Mōṣul to Baghdād, by raft down the Tigris, takes from five to six days according to the state of the river; from Baghdād to Mōṣul a caravan takes twenty to twenty-two days (*The Pioneer*, May 29, 1902).

III. HISTORY OF TRADE IN ISRAEL

In Part I. (§§ 1-27) we have surveyed the vast and intricate system of commerce which prevailed throughout W. Asia by the close of the second millennium B.C. On their settlement in Palestine, between 1300 and 1150 B.C., Israel came into contact with this system upon two of its most ancient and crowded pathways through Syria: between the Euphrates and the Nile, and between Arabia and the Levant. Before we follow the details of their gradual engagement in this system, we have to examine (1) the traditions which they brought with them, or adopted from the Canaanites, in order to discover what reflection of trade these may contain (§ 42 *f.*). We shall then (§§ 44 *ff.*) treat of the history of Israel's own trade under (2) the Judges (§ 46 *f.*); (3) the early monarchy (Saul to Solomon, §§ 48-51); (4) the divided kingdom till the end of the ninth century (§§ 51-53); (5) the eighth and seventh centuries till the fall of Jerusalem in 586 (§§ 53-57); (6) the exilic and Persian Period till 332 B.C. (§§ 58-62); (7) the Greek Period (§§ 63-67); and (8) the Roman Period till the destruction of Jerusalem by Titus (§§ 68-81).

41. Periods.

It is interesting that the earliest Hebrew traditions of primitive man are—with a few doubtful exceptions—as destitute of references to trade, as we have found those in W. Asia in general to be. According to JE passages in the early chapters of Genesis, the founders of civilisation were hunters, shepherds, tillers of the soil, inventors of weapons and musical instruments, and builders of cities. There is no recognition of a special class of merchants; nor is there any reflection of such in Israel's earliest conceptions of the Deity. This agrees with the results of an examination of other religions (§§ 23-27). Certain of the stories, however, appear to take for granted the existence of commerce among early men. As in early Egypt the weaponsmith himself carried his goods abroad for sale (§ 12), so the Kain of Gen. 4, perhaps the 'forger,' is the founder of the first city—*i.e.*, market or centre of trade (see CAINITES, § 5 *f.*)—and it is possible to trace the mixed story of the Kain of Gen. 4—an agriculturist who became a wanderer—to (among other sources) an attempt to describe the origin of commerce; for, except for commerce, agriculturists do not take to travel (but see CAIN for other explanations). Again, some reflection of Babylon's early position as a world market has already (§ 10) been suggested in the story of the tower of Babel. Whatever significance in this respect we assign to such traditions—the very doubtful exceptions alluded to above—we may see in the fate imputed to Babylon a symptom of that horror of building and of cities which marks the unsophisticated nomad, and is observable among the desert-bred portions of Israel to a comparatively late period (*e.g.* in Amos).

42. Early traditions.

The tales of the fathers of Israel assign to the people an Aramæan origin—that is to say, among a people, and in a land in which trade flourished from an early period (§ 16). No mercantile pursuits are imputed to the patriarchs by the JE passages; but these take for granted the existence in their days of a developed commerce (*e.g.*, Gen. 20 16, '1000 silver pieces'; 24 22, 'shekels' as weights; and the position of the 'cities of the plain' on a well-known knot of traffic at the S. end of the Dead Sea; cp the importance of Zoar as a trading centre in early Mohammedan and crusading times: MOAB, § 9)—an assumption which the data given in Part I. (esp. §§ 2-20) assure us is not anachronistic. A price paid to

43. Patriarchs.

Abraham is estimated in the most primitive forms of currency, cattle and slaves (Gen. 20 14; cp 21 27, perhaps as blackmail). A wife is purchased with precious metals, in the form of ornaments (24); a kid is given as a harlot's wage (38 17); and silver is paid by Jacob's sons for corn in Egypt, and also by the Egyptians till it fails, when the price is paid first in cattle and then in land (47 14 *ff.*). Thus the JE stories of the Patriarchs present us with instances of practically every stage in the primitive evolution of money.

44. Arrival of Israel.

The passage of Israel northwards to Palestine brought them along and across ancient and much-frequented lines of commerce (§§ 31-34), whilst the traditions of their early conquests and settlements in Palestine relate their inheritance of the fruits of the rich Babylonian-Egyptian trade which, as we have seen (§§ 25 27), filled Syria on the eve of their arrival. Cp 'the goodly Babylonish mantle,' '200 shekels of silver,' and 'the gold ingot of 50 shekels' among the spoil of Jericho (Josh. 7 21, JE), and the Dt. tradition that besides the fruits of the long-developed agriculture of Palestine the incoming Israelites inherited 'houses full of all goods' (Dt. 6 10 *f.* Josh. 24 13 Neh. 9 25).

45. Distance from sea.

Yet these accounts abstain from asserting that Israel at the same time entered on the carrying trade of Canaan. Israel was confined to the hills. None of the tribes reached the sea coast except Asher, and the probably sarcastic reference in Deborah's song (Judg. 5 17) to his 'creeks' (AV 'breaches') is borne out by the harbourless character of the coast between Accho (held by the Phœnicians) and Rās en-Nāḳūrah. The fact is that, down almost the entire length of Israel's history, a belt of foreign territory separated the people from the sea: nor did the spectacle of the sea, breaking on what was generally a lee shore, and entirely without natural harbours, excite any temptation to reach it. The first coast town taken by Israel was Joppa, and that not till 144 B.C. In Hebrew literature down to exilic times and even later, the sea is only used (1) for the W. horizon, (2) as a symbol of arrogance against God (Is. 17 12 *ff.* and Pss.), and (3) as a means to attempt escape from him (Am. 9 3; Jonah). The word for harbour in (the late) Ps. 107 30 is a general term for 'refuge': in Hebrew there is no word for 'port,' and the later Jews had to borrow one from the Greeks—*limen* (see *HG* ch. 7). Even if Ps. 107 refers to Israelites, it describes merchants, not sailors. It is remarkable that even to this day Jews, who have risen to eminence in every other department of the life of nations among whom they have settled, have never been known to fame as admirals or ship-captains, and are very seldom found as sailors (so far as the present writer knows, only in the Black Sea).[1]

Inland waters.—As for inland waters: the Dead Sea was not navigated till the time of the Romans; there were only fishing boats on the Lake of Galilee;[2] and on the Jordan only a ferry (2 S. 19 19 [18]) or two [cp FORD]. Boats on the Jordan are not mentioned till the Talmud.

46. Land traffic.

Early Israel was not so wholly shut off from the lines of land traffic which traverse Palestine. The Canaanites continued to hold positions commanding these—like Bethshan,[3] and even others (sometimes in a line) across the Western Range (Gezer, Gibeon, Jerusalem); while the Philistines entered on possession of Gaza and the S. end of the maritime plain. Still the *connubium* which Israel indulged in with Canaanites (Judg. 3 5 *f.* 'substantially J,' Moore) and Philistines (Samson) certainly proves

1 Jos. (*BJ* iii. 9 2) mentions Jewish pirates at Joppa. There was a Jewish naval officer in the U.S. civil war; *Spectator*, Jan. 3, 1903.

2 And in Greek times galleys. Cp the galley on some of the coins of Gadara.

3 The list in Judg. 1 contains a number of towns on the main routes.

commerce. The possession of old Canaanite sanctuaries on the cross-routes would carry with it the superiority of the markets connected with them (§ 24); thus we find Ephraim at Shechem, or the neighbouring Gilgal (Julejil), Benjamin at Bethel, and Judah at Hebron—one of the great markets for the desert. But other tribes gradually settled across the chief lines of through traffic—Issachar, Zebulun, and Dan; and these are the only tribes to whom any portion of OT literature that can be called early, appears to assign any international trade. Issachar, on Esdraelon, is described as the guardian of some great fair (Dt. 33 18 *f.*: ISSACHAR, § 2); and Zebulun farther W. as commanding the coast-trade (Gen. 49 13 Dt. 33 19; ZEBULUN); while some interpret Deborah's reference to Dan of their connection at Laish with Sidon (cp DAN, § 3). However that may be, Dan's position there commanded one great line of traffic N. and S. and another E. and W. Further, it is interesting that some of the battles and expeditions under the Judges were on the line of these and other ancient lines of traffic—Esdraelon, Dan, Jericho (3 12 *ff.*), and the route from Jordan into Arabia, Succoth, Jogbehah, on which it is Ishmaelites with ear-rings of gold (in other words traders) whom Gideon defeats (8; cp *v.* 24). There is, too, a possible mention of pearls (הנמיפות, *v.* 26; cp Moore's note, p. 233), as well as one of purple (?). In 10 12 are mentioned the Maonites, probably the Minæans; even if we should read with 𝔊 Midian, it is traders who are meant. Along with these, the reference to the disturbance of travel in the land in Judg. 5 (*v.* 6 *f.*) must not be overlooked. It is interesting to note the distinction already observed between trading and non-trading communities in the case of Laish (18 7). Laish on a small scale illustrated the military carelessness which rendered (*e.g.*) the great trading dynasties of Babylonia so easy a prey to the nomadic hordes who conquered them.

47. The 'Judges.'

The elements of trade in the period of the Judges must have been simple; still, we are not warranted by the data in minimising them. Salt would come from the Dead Sea, and asphalt; fish from the coast towns. That the useful metals came from the outside is clear both from their absence from Israel's earlier possessions and from the Philistine policy (1 S. 13 19) of banishing from among them the smiths. That is to say, metal-work was not familiar to the Israelites themselves; it was probably pursued, as in so many parts of Syria and Arabia at the present day, by certain nomadic families. A little gold, probably in the shape of small rings and other ornaments, would be bought from the Arabian caravans (Judg. 8 and 10 as above); and silver pieces are mentioned (9 4 16 5 17 2 *ff.* 10). In exchange, the Hebrews could give their surplus wool and oil, figs, raisins, and perhaps wine (Judg. 9 13; cp the early use of the phrase 'every man under his own vine and fig tree': 1 K. 5 5).[1] But the foreign character of the international trade of this period is seen in the use of gentilic names for merchants alluded to above (§ 13) and in the meaning of the earliest Hebrew terms for trader (סחר and רכל = traveller).[2]

48. Early monarchy.

It is usually assumed by modern writers that Solomon was the real father of trade in Israel; yet the conditions, actual symptoms, and consequences of a considerable commerce are present from the very beginning of the monarchy—which by all W. Asian analogies, would itself be sufficient proof of the organisation and rapid increase of Israel's trade. The Philistines not only held the main line of commerce between Egypt and Phœnicia-Babylonia; their encounters with Israel at Michmash and Gilboa (cp Bēt Dejan E. of Shechem, and Dagon near Jericho, § 34) appear to imply a struggle for the

1 Cp Buhl, *Die socialen Verhältnisse der Israeliten*, 12.

2 Note the sanctuary as the treasury, and the hire of mercenaries (Judg. 9 4).

TRADE AND COMMERCE

cross-routes to the E. as well. In connection with Saul's earlier successes over the Philistines on one of these routes, David's praise of him, that 'he brought up adorning of gold on the garments' of the daughters of Israel (2 S. 1 24) is very significant.

In W. Asia the rise of a power like David's always means an intentional increase of commerce, of which a very good illustration is found in Palgrave's description of the policy of Telal ibn-Rasheed of Ḥāyil, who by the security of his dominions and the surrounding desert, by liberal offers to merchants at a distance, and the introduction of good commercial families, created a considerable external trade among his people (*Central and E. Arab.*, 93 112 133 [ed. 1883]). David united, pacified, and partly organised all Israel; finally threw off the Philistine yoke (and perhaps carried his power into Philistia itself); subdued the Canaanites who had hitherto held several of the towns in Hebrew territory; and founded a capital whose population must (as Buhl points out, p. 16) have been dependent on commerce for their livelihood. He stamped shekels used in weighing (2 S. 14 26), which we may take as evidence of other regulations of commerce. The considerable number of foreign names among his servants is partly significant of trade; but if they were all military mercenaries, we have seen (§ 11) that in W. Asia the substitution of such for a native militia (ARMY, § 4)—and this is the first appearance of mercenary troops in Israel (yet cp Judg. 9 4)—was always the consequence of an increase of trade. David subdued Moab, Ammon, and Edom (with command of the SE. trade routes); extended his influence as far N. as Hamath (DAVID, §§ 7-9); and made an alliance with Hiram of Tyre, with whose help he built a royal house of stone and cedar. On these data, some of which are conclusive, we may assume that in David's reign trade in the real sense of the word had already begun to grow in Israel.

49. Foreign trade. It was under Solomon, however, that, as in the building of the temple so in the organisation of a considerable commerce, the full consequences of David's policy were first realised. The mixed and much edited records of the reign of SOLOMON [*q.v.*] have behind all their later additions the facts, not only of an increase of wealth in Israel (1 K. 3 13), which was comparatively enormous, but also of foreign enterprises and of internal provisions for trade which can alone account for such increase. David's alliance and commerce with Hiram of Tyre were continued. Whatever historical value be assigned to the story of the Queen of Sheba's visit to Jerusalem (1 K. 10 1-13), there is at the bottom of it at least the fact of a land trade with the S. of Arabia; whilst the inherent probability of the record of voyages down the Red Sea (on the state of the text of 1 K. 9 28 10 11 see Benzinger) is obvious from Solomon's position between Phœnicia and Arabia and the command which his father's conquest of Edom gave him of the route to Elath. Without Solomon's aid the Phœnicians could not have voyaged from the Gulf of 'Aḳaba to Ophir. That the sailors and ships are described as Phœnician, not Israelite, proves that the story has not been at least wholly idealised by later writers. If Ophir, as is most probable, lay on the S. coast of Arabia (see OPHIR),[1] three months would amply suffice for the voyage there, and the expedition would be back within a year; the datum of the record that a voyage was made only every third year is another symptom of the absence of exaggeration. It is, indeed, a difficulty with many scholars that the small kingdom of Israel had too little to furnish in exchange for the vast and valuable imports described as coming from Ophir; and the reporters are at a loss to name the gifts from Solomon to the Queen of Sheba in return for hers to him (1 K. 10 13). But it must be kept in mind that the king of all Israel could always pay in the assurance of security for the Arabian Phœnician traffic across his dominions, and that when this service, and Israel's surplus corn and oil (1 K. 5 25 [11]: 20,000 kor of wheat and 20,000 bath of oil annually to Hiram) and perhaps wool, failed to meet the value of the timber and other imports from Phœnicia, Solomon paid the balance in land (1 K. 9 11 *ff.*). Buhl (77) thinks it doubtful that the expeditions to Ophir were undertaken for trade. But for what else could they have been undertaken? Early Egyptian and Babylonian expeditions to distant lands had no other aim (§ 8, third note). We have seen that some products of Europe were in Babylonian shops by 1400 B.C.; the Phœnician ships may have carried these or others to Ophir. There were also Syrian dates, and corn, the Syrian woven robes, the Tyrian purple, and Phœnician modifications of Babylonian and Egyptian art, weapons and perhaps silver; whilst we have also seen (§ 20) that the early Egyptians exchanged trinkets (as civilised peoples do to this day among barbarian tribes) for the valuable products which they found in the markets of Punt. Solomon's servants may have done the same with the unsophisticated natives of Ophir; and we have seen that dates and weapons are still imported to the S. coast of Arabia (§ 5). 1 K. 10 28 *f.* records Solomon's trade in horses. The text restored from 𝔊[1] is to be read: 'The export of horses for Solomon was out of Muṣri and Ḳuë: the dealers of the king brought them out of Ḳuë for a price.' Muṣr is the N. Syrian state of that name (MIZRAIM, § 2 *a*); Ḳuë is Cilicia (see CILICIA, § 2). Horses came from N. to S. in W. Asia: probably first from Asia Minor into Syria. The Hebrew text which introduces them to Palestine from Egypt, is impossible: horses were not indigenous in Egypt nor were the pastures there sufficient for breeding and rearing them for export. Yet notice the reference in Dt. 17 16 which implies that some horses came to Israel from Egypt.

50. Duties, etc. 1 K. 10 15 (see Benzinger, for the correct text) states that Solomon derived part of his wealth from tolls levied on the transit trade between Arabia and the Levant.[2] If 1 S. 8 15 *ff.* be, as is probable, of post-Solomonic date, and therefore reflect the evils of a monarchy already experienced, it is notable that nothing is said, among the taxes imposed *on native Israelites*, of one imposed for trade. But this will only mean that, as in early Egypt (§ 11) and partly in Ḥāyil, when Palgrave was there in 1863, the trade of Israel was directly carried on by the king himself through his servants: it was not private enterprise but part of the royal administration (cp 1 K. 10 28 'the dealers of the king'). Further, Solomon is said to have 'built' or fortified cities on trade routes (9 17 *f.*): 'Gezer, Beth-horon the nether, Baalath, and Tamar in the wilderness, and all *the store-cities* (עָרֵי הַמִּסְכְּנוֹת; cp CITY [*f*], STORE-CITIES) which Solomon had.' TAMAR (*q.v.*) is most probably Tamara to the S. of Judah, on the route to Petra or Elath. Other signs of Solomon's far-spread commercial influence are his alliance with Egypt, which carried with it the possession of Gezer that commands more than one line of traffic (3 1 *ff.* 9 17 *f.*); the description of his dominion as stretching from Tiphsah ('the crossing') on the N. Euphrates, to Gaza (4 24 [5 4]), with dominion over all the kings beyond the river, which can only mean commercial influence; and the datum 'the entering in of Hamath' (8 65)—*i.e.*, the issue from Israel between the Lebanons towards the most important mart in N. Syria. There is no allusion to trade in Solomon's prayer to Yahwè

[1] The most recent proposal for Ophir is the Malay peninsula, where there are ancient and deserted gold mines. See *The Pilot*, Oct. 1902.

[1] After Wi. *AT Unters.* 168 *ff.*; cp MIZRAIM, § 2 *a*; HORSE, § 1 (5); and, on the other side, CHARIOT, § 4, col. 726 n. 1. [On 1 K. 10 28 *f.* see also *Crit. Bib.*, and cp SOLOMON, § 8].

[2] [Kittel also touches the MT; but, like Benzinger, he may appear to some to be almost too moderate. Cp SOLOMON, § 7, on 'the singular statement' in 1 K. 10 14 *f.*, and *Crit. Bib.* That עֶרֶב should be read instead of עֲרָב is undeniable (Che.).]

(ch. 8); but in the exigencies of foreign trade, and the introduction of guilds or groups of foreign merchantmen we may see the cause of the multiplication of altars to strange gods in Jerusalem, especially Phœnician, Moabite, and Ammonite (2 K. 23 13). With this compare the universal custom illustrated in §§ 21-24. [Cp SOLOMON, §§ 4, 8 *f.*]

In David's and Solomon's time the land trade of N. Syria as far S. as Damascus was already in the hands of the Aramæans (as we have seen, § 15), a people still in their early vigour and therefore unlikely to rest content under the commercial supremacy which, as we saw above (§ 49, on 1 K. 4 24 and 86 5), Solomon had established as far as Hamath and the Euphrates. It was, therefore, from the Aramæans that the first blow came to Solomon's wide empire (11 23); and this happened even before he had passed away. The disruption of the kingdom after his death would cause a further shrinkage of Hebrew trade from its distant extremities, as well as lead to a severe competition between Israel and Judah for the possession of so much of it as crossed Palestine. In this the N. kingdom had all the advantage: in its neighbourhood to Aram and Phœnicia, the possession of Gilead and of all the routes across W. Palestine—even that by Ajalon, Beth-horon, and Bethel, which lay just within its S. frontier. Bethel and Dan, and even Jericho, with entrance to Moab and the SE. routes, were thus in its possession. Against all this Judah, already impoverished by the invasion of Shishak, had almost nothing to offer; and Baasha of Israel sought by the building of Ramah to create a blockade against his southern neighbours (15 16 *f.*). It was Judah's constant effort to push this frontier N. beyond Bethel (see *HG*, ch. 12, 'The History of a Frontier'). During peace with Israel Jehoshaphat attempted to resume Solomon's trade with Ophir; but his ships were wrecked at Ezion-geber (22 41 48). These commercial ambitions had been started by Omri's commercial alliances with Tyre (in connection with which the capital of N. Israel was removed across the watershed to Shomeron, on the W. esh-Sha'ïr, with its issue to the coast [16 24]; the site was purchased by Omri for two talents of silver), and with Damascus (20 34[1]); and but for Jehoshaphat's misfortune the extent of Solomon's trade from the N. Euphrates to the mouth of the Red Sea might have been recovered. In 2 K. 5 17 mules, hitherto described only as used in riding (2 S. 18 9, etc.), are mentioned as beasts of burden. The revolution of Jehu meant the triumph of the Puritan party in Israel, who detested the foreign idolatries which the commercial alliances of Omri's dynasty had introduced; and Israel's trade must have shrunk with Jehu and then collapsed under the weight of the Aramæan invasions, which, with the instincts of that race, followed the great lines of traffic by Dothan (2 K. 6 13), and Aphek in Sharon (1 K. 20 26 30 2 K. 13 17), to Philistia (2 K. 12 17), and even included a siege of Samaria itself (2 K. 6 24 *ff.*).

51. The Aramæans.

Meantime the Assyrians were gradually robbing the Aramæans of the trade through N. Syria. Ramman-(Adad)-nirari III. (see ASSYRIA, § 32) had reached the Mediterranean and besieged Damascus by the end of the ninth century. His successor opened the roads towards the Caspian and Īrān. Nineveh's central position had already made her the political capital (§ 10): by 850 B.C. Syria was, therefore, now in communication with Central Asia, under the shield of one political power—the invariable cause of a great increase of commerce. Tiglath-pileser III. (745 *ff.*) and his successors were to confirm and extend this empire to the Persian Gulf (over Babylonia), to the borders of Egypt and into Arabia, all before the end of the eighth century; and by 670 Esarhaddon had taken Memphis. Thus, for the first time since the fifteenth century, W. Asia lay under one political power, yet the *lingua franca* which prevailed throughout was not that of her conquerors but of the Aramæans (§ 15). For the internal business of Assyria at this time, see Johns, *Ass. Deeds and Documents* (Camb. 1901): a large collection chiefly of seventh century; also *RP* 1 139 *ff.* 7 111 *ff.*

52. Advance of Assyria.

The advance of Assyria in the ninth century enabled N. Israel not only to recover her lost territories from Aram, but also, along with Judah, to revive her trade and carry it, through the long contemporary reigns of Jeroboam II. and Uzziah, to a pitch of wealth and luxury which the Hebrews had not before reached. The economic difference between the time of Elisha (died about 797) and Amos (*fl. cir.* 755) is vast; and the annals of the two kingdoms in the interval enable us to explain it. Amaziah of Judah had once more defeated Edom (2 K. 14 7); and Jeroboam II. restored N. Israel's influence from the entering in of Hamath to the Dead Sea and in Damascus (14 25 28). Uzziah took Gath (2 Ch. 26 6), subdued the Arabians of Gur-Baal and the Meunim (*v.* 7), fortified the roads on the S. frontier of Judah (*v.* 10), and held Elath (2 K. 14 22). The Hebrew prophets from Amos onward bear witness to an extraordinary increase of trade, and to the tempers which grow with it. There is in all of them proof of the widening geographical knowledge and acquaintance with the internal life of other peoples which commerce brings. Amos himself was probably a wool-seller as well as a wool-grower, and, Judæan as he was, learned the state of the N. kingdom by his journeys to its markets, especially Bethel.[1] He condemns its covetousness and zeal for trade, which threatened the new moons and sabbaths instituted among the people when they were almost purely agricultural (8 4 *ff.*). Hosea calls Israel a very 'Canaanite'—*i.e.*, 'trader' (12 7; cp 7 8 8 10); and Isaiah's references show that Judah was not in this respect much behind her sister: Judah is 'filled from the East and strikes hands with the children of strangers' (2 6), 'full of silver and gold, neither is there any end of their treasures; their land also is full of horses neither is there any end of their chariots' (7); 'ships of Tarshish' are mentioned among the triumphs of their civilisation (16); caravans are described (30 6); yet, in conformity with what we have seen in other nations, trade is not noticed among the principal professions of the national life (3 1-3). Besides the texts already quoted (there are others: *e.g.*, Am. 4 4 *f.* Hos. 12 8) indicative of an increase of wealth, there are others which speak of the popular enterprise in building—always a sure proof of commercial prosperity (Am. 3 15 5 11 Hos. 8 14 Is. 2 15 9 10 [9], etc.; cp 2 Ch. 26 9 *f.*). The (foreign?) name *armōn* (PALACE, § 1 [3]), hitherto used of royal castles, is applied to private dwellings (*Bk. of Twelve Prophets*, i. p. 33, n. 3); and the builder's plummet is used as a religious figure (Am. 7 7 *f.*, cp Is. 28 16 30 13). Again, the old agricultural economy is disturbed; farmers give place on their ancestral lands to a new class of rich men, who can only have been created by trade; and the rural districts are partly depopulated (Is. 5 8 *ff.* Mic. 2 1-5 9). The sins of trade: covetousness, false weights, and the oppression of debtors and of the poor, are frequently castigated (Am. 2 6 4 1 8 4 *ff.* Hos. 12 7 Is. 3 5 15 5 23 Mic. 2 and 3). In certain passages, particularly in Amos and Micah, such condemnation of the trading classes is no doubt partly due to the conservative zeal of the desert shepherd and agriculturist, against the growth of a new economy.[2] But in Isaiah this is associated with a real sympathy with

53. Eighth century.

[1] Aram's right to bazaars in Samaria, and Israel's in Damascus. We see from this that a conqueror earned the claim to the active and foremost part in trade between himself and his rival.

[1] See GASm. *Book of the Twelve Prophets*, 1 79.

[2] It is from the shepherd village of Bethlehem that Micah predicts the coming of Israel's saviour (5 1 [2] *ff.*).

the serviceableness of commerce, and appreciation of its bigness and even of its serviceableness to religion: cp Isaiah on Cush (ch. 18), on Egypt (19), and especially on Tyre (23) 'whose merchants are princes, whose traffickers are the honourable of the earth' (*v.* 8), and who, although likened to a harlot in commerce with all the kingdoms of the earth, may yet bring her merchandise and hire as holiness to the God of Israel.

The public works of Jotham, Ahaz and Hezekiah indicate considerable wealth and activity; but it must have been under Manasseh that Judah first benefited commercially by the great extension of the Assyrian empire (see above, § 52), and the comparative security of trade from the Caspian and Persian Gulf to the Red Sea and Memphis under one power. The Assyrian influence upon the ritual, and probably the literature, of Israel under Manasseh, is significant of close and frequent intercourse with Mesopotamia. Zephaniah describes the Phœnician quarter in Jerusalem, the Fish Gate, and a new or second city (MAKTESH, MISHNEH). Cp the multiplication of gates on the walls (JERUSALEM, §§ 23 *f.*). The most conclusive proof, however, of an increase of trade in Judah during the eighth and the seventh century is found in a comparison of the Book of the Covenant with the Deuteronomic code. The Book of the Covenant makes no provision for trade.[1] Deuteronomy contains a considerable number of regulations. To begin with, there are the regulations necessitated by the main Deuteronomic law, the centralisation of worship at Jerusalem (14 24 *ff.*), which must have meant a great increase of trade in that city at the seasons of the three annual festivals (*v.* 26). Pilgrims from a distance had to turn some of their goods into money before leaving home, and purchase at Jerusalem the materials for sacrifice. Then there are regulations for debt (15 1); interest may be taken from a foreigner but not from a fellow-Israelite (23 20 [19] *f.*). International banking is provided for (15 6 *f.*); and among the divine blessings to be bestowed upon the people in reward for their obedience to the Law is one, that they shall lend to many nations but not borrow—as it is phrased, they shall be 'the head and not the tail' in their trade (28 12 *f.*, cp 43 *f.*). Hebrews are not to become objects of the nation's slave trade (24 7); and the enfranchisement of any that have fallen through debt into slavery is provided for (15 12). Unjust weights and measures are condemned (25 13-16). Hired labourers must not be oppressed (24 14 *ff.*). Most significant of the extreme contrasts between wealth and poverty which the trade of the eighth and seventh centuries has produced are the regulations for the treatment of the poor (15 1-11). The king is not to multiply horses or silver and gold (17 16 *f.*), another echo of the prophetic teaching. Yet indicative as all these laws are (when contrasted with their absence from the Book of the Covenant) of the commercial development of Israel, it is remarkable that no money dues are yet prescribed for the priests (18 1-8) nor are fines permitted in expiation of murder (19 1 *ff.* 21 1-9).

54. Seventh century.

To the pre-exilic period, though written after the fall of Jerusalem, belongs Ezekiel's description of Tyrian commerce (26 *ff.*). It opens (26 2) with an interesting epithet of the Judæan capital as the 'gate of the peoples,' justified by the fact that the pre-exilic Judah lay, as we have seen, across the nearest path of the Phœnician trade with Arabia, over which Manasseh, as the tributary of Assyria, may well have held a supremacy which Josiah, in part at least, continued. According to Ezekiel Phœnician trade extended from Tarshish (27 12) and the coasts of Greece (Elishah, *v.* 7) in the W. to Sheba (*v.* 22) in the E., and from Tubal-Meshech (cp the Moschi and Tibareni of Herod. 3 94) between the Black Sea and the Caspian in the N. to Egypt and Phut (or Punt) in the S.[1] Tarshish sent silver, iron, tin, and lead (12); Greece, coloured stuffs (7); the isles of the Levant, inlaid ivory (6) and ivory and ebony articles (from Rodan = Rhodes, 15). From Ionia and Tubal-Meshech came slaves and copper vessels (13); from Beth-Togarmah, probably Armenia, horses and mules (14). Egypt furnished fine embroidered linen (7). Cypresses and cedar were to hand in the Lebanons (5), and oaks in Bashan (6). The Aramæans, in command of the land trade immediately behind Phœnicia, brought a great variety of goods: carbuncles, purple, embroidery, fine linen, pearls (from the Persian Gulf) and jasper (16: see Toy's note, *SBOT*; cp STONES, § 21)—evidently the wealth of the Babylonian markets—with Helbon wine, white wool and other wares from Damascus (18). From Israel came only natural products: wheat, spicery, wax (MINNITH, PANNAG), honey, oil, and balm (17). Arabia supplied wrought-iron, cassia, and calamus from UZAL (19); saddle cloths from DEDAN (20);[2] lambs, rams, and goats from KEDAR (21); the best spices, precious stones, and gold from Sheba and RAAMAH (22). The trading centres on the N. Euphrates (where it begins to be navigable), HARRAN and EDEN (*qq.v.* round Bīrejik between Edessa and 'Ain-tāb), Assyria itself, and Canneh or CALNO, and CHILMAD in Babylonia, furnished dyed mantles, and stuffs with skeins of wool (? 23 *f.*). The shipbuilders and sailors were native Phœnicians (8 *f.* 11); but Tyre had also a mercenary army (cp §§ 11, 48)—Ethiopians (read כוש for פרס, PARAS), Lybians, and men of Phut (10). It is an imposing catalogue, and worthy of the enthusiasm of the prophet: the fruit of centuries of enterprise and organisation for Assyrian trade; see Johns, *op. cit.*

55. Ezekiel's Tyre, etc.

The destruction which Ezekiel beheld as imminent on Tyre, fell immediately. In 572, after a siege of thirteen years, Nebuchadrezzar took the island city (cp NEBUCHADREZZAR, TYRE). It was the final triumph of a policy sustained through many annual campaigns to the Levant, designed to divert the rich trade with the E. from the Red Sea and the Arabian land-routes to the Persian Gulf and the Euphrates. Proofs of this are found not only in Nebuchadrezzar's own annals, but also in the Greek accounts of great works in Babylonia which are most probably attributed to the son of Nabopolassar. Famous as a soldier, Nebuchadrezzar was still more eminent as a builder and organiser: his peaceful labours bulk in his own records over his military expeditions. He cleared the mouths of the two great streams of Babylonia into the Persian Gulf, and deepened their channels, so that they were still navigable for sea-going vessels in the Greek period. Arrian (*Anab. Alex.* 7 7) reports that the ships of the Gerrhæans (from the Arabian coast of the Gulf) sailed up the Tigris as far as Opis: and Götz (*Verkehrswege*, 151) is justified in assigning the measures which made this possible, as well as the founding of Derodotis, a port at the mouth of the Euphrates, to Nebuchadrezzar. The two great rivers were connected by a system of canals which in Xenophon's time (*Anab.* 2 4) were still navigable by great grain-ships; the largest, the Nahar Malka, is still in use. By campaigns against 'Kedar and the kingdoms of HAZOR [*q.v.*]' (Jer. 49 28), Nebuchadrezzar ensured the security of the desert routes S. of Babylonia; and he himself on one occasion used the short but difficult road from Syria to Babylon by Tadmor. Yet, these Arabian campaigns must have

56. Nebuchadrezzar.

1 In the Book of the Covenant there are laws of deposit (22 7), and of the lending of money (22 25) Fines are paid in shekels.

1 In the close of the seventh and opening of the eight centuries the trade of Egypt, both internal and foreign, was very prosperous, especially under Psameṭik, Necho II., Apries (Hophra), and Amasis II. Coincident with this was the usual increase of mercenaries. Greek commerce, which had founded Milesion about 700 (Hall, *Oldest Civilisation of Greece*, 271) took a firm hold of the Delta. Amasis II., besides encouraging the Greeks, entered into a close alliance with Cyrene. Cp Herodotus, 2 182.

2 Cp saddle-bags exported from el-Jôf to-day; § 4, third note.

had as their end not so much the use of the desert routes (except perhaps to Egypt) as the diversion of the Arabian and eastern traffic up the Gulf to the Euphrates, and so to the Levant, whose coasts were now an integral part of the Babylonian empire. We have seen the Gerrhæan ships far up the Tigris: they brought incense for the temples in Babylon.[1] But sea-trade with India may also have been at this time in full course; it has to be noticed, however, that no SILK (*q.v.*) is mentioned in the commercial lists of the period.[2] From India, then, to Tarshish, and from Egypt to Central Asia (through Persia and the Medes), the trade of the world now centred in Babylon. Hence the vast increase of the city's size and wealth so wonderful to the Greek writers (Herod. 1 178 *ff.*; Diod. Sic. 2 2). The exilic passage Jer. 50 mentions its 'storehouses' (*v.* 26); its 'mingled people' and 'treasures' (37); and Is. 47 15 'those that have trafficked with thee from thy youth.' Throughout these prophecies there is the same imputation of 'wisdom' and 'enchantments' and 'sorceries,' which we find imputed by Israel to other commercial peoples—the 'sons of the East,' the Edomites, and the Philistines. The recent discovery and deciphering of Babylonian documents from the end of the Babylonian period and the beginning of the Persian have revealed an organisation of commerce so thorough that J. Kohler justly declares it to exhibit the greatest similarity to the conditions of modern banking and exchange, and to have been the origin of the commercial system which has descended to modern times through the Greeks and Romans (*Beitr. z. Assyr.* 4 430). He has given in the volume just cited a number of interesting instances (in addition to those given in Kohler and Speiser, *Aus dem Babyl. Rechtsleben*, etc., and *Bab. Verträge*). There were banks and banking firms (the most famous of which was the house of Egibi—cp *RP* 11). 'Anweisungen ('assignments,' 'bills of exchange') und Zahlung des Angewiesenen an den Anweisungsempfänger waren das tägliche Brod des Babyl. Verkehrs.' Money was paid into the agencies of a bank, and by its head office or other agencies paid out again to the assignee, exactly as by our system of cheques. Discount was known. Property was pledged. In cases of sale or debt suretyships were accepted (again cp Johns, *op. cit.*). Sales were made on approval. Partnerships were formed between freemen, and between freemen and slaves—*i.e.*, between capital and labour. Money was still reckoned by weight. The depreciation in use of metal-pieces was understood and accounted for (cp Hrozny, 'Zum Geldwesen der Babylonier,' *Beitr. z. Assyr.* 4 546 *ff.*).

57. Jews in Babylonia.

At the heart of this commercial empire the best part of the Jewish people—including its industrial classes ('craftsmen and smiths': 2 K. 24 14)—were established, and probably found a large number of their own race already intimate with, and benefiting by, the trade of the land (see DISPERSION, § 4). They must have taken the advice of Jeremiah to settle into the life of their new surroundings, their comparative independence in which his letter takes for granted (Jer. 29 4 *ff.*).[3] That many of them became engaged in Babylonian commerce needs no argument. After fifty years the great prophet who arose to announce to them their return, not only promised the restoration of their command of the trade from Egypt and Arabia (Is. 45 14, cp *v.* 3), but seems to have found it difficult to tear them from the profitable conditions of Babylonian life (cp his many calls 'to go forth,' and in particular his appeal 55 2: 'Wherefore do ye weigh your money for that which is not bread and your earnings for that which satisfieth not'; cp Buhl, *Soc. Verhältn.* 88, n. 1). Whether few or many returned when Cyrus opened the way (see DISPERSION, § 5), those who remained in Babylon were the prosperous and wealthy (Zech. 6 10 *ff.*). They must have been introduced to the thorough Babylonian methods of doing business, though it is striking that (as we shall see, § 60) the Priestly Code bears no reflection of the Babylonian subjection of commerce in its smallest details to priestly regulations, nor of the temples as registering, banking, and appraising centres (Johns, *op. cit.* 3 254). New horizons, however, appear in Hebrew literature; and the Jews' knowledge of the world was immensely widened (GEOGRAPHY, § 18).

58. Persian empire.

With the rise of the Persian empire all these processes, from Babylon as the centre, were quickened and extended (DISPERSION, § 6). The conquests of Cyrus in Asia, and of Cambyses in Africa, were thoroughly organised by themselves and their successors and chiefly by Darius Hystaspis before 515. The empire was divided into provinces and the policy was to connect these by as speedy means of conveyance as were possible. Some of the ancient lines of traffic were made into solid roads, capable of carrying two- and four-wheeled carriages, and new lines were opened up, especially through Iran to Eastern and Central Asia. The greatest of all the roads for which we have now exact data was that from Susa the capital to Sardis; see the careful survey and argument of Götz (*Die Verkehrswege*, 165-184). He reckons the distance at sixty-five daily stages, which with eight days of rest on the way occupied seventy-three days in all.

The road led NW. from Susa, past the now deserted Nineveh, crossed the N. stretches of the Tigris, and the Euphrates (the latter a little to the N. of the later Samosata) and so through Cilicia by Ancyra to Sardis, whence it was a short journey either to Smyrna or Ephesus.

Another road from Susa led N. by Ecbatana (Hamadān) to Rhagae (close to Ṭeherān) where, in the ninth century after Christ, lay the Levant market for Chinese silk;[1] thence to Hekatonpylos[2] (probably the present Shahrud: Götz) where it divided into one branch by Magaris (Merv) to Marakanda (Samarcand) the capital of Sogdiana, and another to Herat.

A third road from Susa led E. to Persepolis and Aspadana (Ispahan). Susa was, of course, directly connected with Babylon, from which the land road up the Euphrates was freshly laid down and furnished with bridges over the canals.

Greek sources (Xenophon and Herodotus) give us for the first time exact data for this ancient line of traffic between Babylon and the Gulf of Issus (above, § 39 *f.*).

It was 8 days from Babylon to Hīt, thence 20 to the mouth of the Ḥābūr, thence 5 to Tiphsah or Thapsacus (Raḳḳa) where the road crossed to the S. bank of the Euphrates, thence to Balis 3, to Aleppo 3, and to the coast 4, or 43 in all (not 73: Götz, 190) from Babylon to the coast.

From the coast the Phœnicians, according to Marinus of Tyre (Götz, 190), carried their goods to Hierapolis (Bambyke) near the Euphrates, and thence direct to Ecbatana and Hekatonpylos for the Central Asian markets. There was also a road from the Gulf of Issus to Tarsus (12 days); thence through Cilicia to Iconium (see further Ramsay, *Hist. Geog. of Asia Minor*).

Persian roads were, according to the Greeks, well supplied with stations, furnished with horses and khans for travellers (Herod. 5 52 8 98), and with a government service of swift couriers (*Id.* and Xen. *Cyrop.* 8 18),[3] which is said to have accomplished the distance between Susa and Babylon in a day and a half, and that between Susa and Sardis in 10 (Götz, 198). Cp Esth. 3 13 8 14. Whilst the Persians thus organised and accelerated the land-traffic, they suffered the water-traffic, developed by Nebuchadrezzar (§ 63), to fall into disuse. Nebuchadrezzar's port at the mouth of the Persian gulf decayed, and it is even doubtful whether the *Periplus*

[1] Herod. 1 183 reckons the amount used annually at the chief temple of Babylon at 1000 talents.

[2] The earliest mention of silk appears to be by Aristotle in the beginning of the fourth century.

of Skylax (*Geogr. Gr. Min.* 1, ed. Müller) round Arabia to the Red Sea occurred as asserted in the time of Darius (thirty months is the time assigned to it). See Götz, 203 *ff.* Darius attempted, without success, to carry out the plan, which Necho II. is said to have initiated, of connecting the Red Sea with the Nile (Herod. 2 158 4 42).[1] Further, we have under the Persian kings the first appearance in W. Asia of MONEY (*q.v.*) in the true sense (see also WEIGHTS AND MEASURES). The present writer has purchased several darics and also silver coins of Sidon under Artaxerxes Ochus which were found in N. Palestine.

The trade of Syria must have enormously benefited by all this policy of the Persian kings; not only in the security ensured—though this was not perfect (cp the note of Ezra on the journey from Babylonia to Jerusalem: Ezra 8 21 *f.* 31)—but also in the means taken by the satrap of Memphis for furnishing the desert route between Gaza and the Delta with water (Herod. iii. 46). Incorporated in the Persian empire, and still without rivals in the Delta, the Phœnician ports continued to flourish (cp their coinage of Aradus and Sidon under Persia; Head, *Hist. Num.* 666, 671). Damascus and Gaza flourished with them; but Götz (164) is wrong in adding to this list Jerusalem, to which we now turn. The destruction in 586 had reduced Jerusalem and her people to the 'off-scouring and refuse in the midst of the peoples' (Lam. 3 45). Her 'breach was great like the sea' (2 13); the luxury of former days had become starvation (4 7 *ff.*, etc.); the people had to buy even their wood and water (5 6, cp *vv.* 9 13). The Edomites and Arabians recovered the transit trade. The exiles who returned in 537 were a weak and starveling community. The statement that they bought for the temple timber from the Tyrians who brought it to Joppa in return for meat, drink, and oil (Ezra 3 7) belongs to the less authentic portion of the Book of Ezra, and seems a reflection of Solomon's trade. It is difficult to see how the hunger-bitten colony raised wine and oil for export. Haggai and Zechariah tell a different story. There was no hire for man or beast (Zech. 8 10); no thrift (Hag. 1 6); a blight lay upon agriculture (*ib.* 11). The silver and gold were still in the hands of Yahwè (2 8), and other nations had not yet brought their 'desirable things.' Timber for building the temple was hewn by the Jews themselves in the neighbouring hill-country (1 8). What gold and silver arrived in Jerusalem came as contributions from rich exiles in Babylon (Zech. 6 9 *ff.*). Agriculture was only partially resumed; its prosperity was still, after twenty years, a thing of promise (Zech. 3 10). In Malachi there is no reflection of trade. The *connubium* practised with the surrounding heathen and semi-heathen implies, of course, a certain amount of local traffic; and this would gradually increase with the resumption of Jewish life in 'the cities of the Negeb' (Neh. 11). Nehemiah pictures corn, wine, grapes, figs, etc., brought into Jerusalem from the country (13 15 *ff.*), and fish sold by the Tyrians (16); on the Sabbath the gates have to be closed against these traders (20). But there was no through traffic, as in olden times. Indeed, according to Ezra 4 20, one of the objections made by the enemies of the Jews against rebuilding Jerusalem was that it would resume the customs and toll which were formerly imposed by Jewish kings and made them great—a very interesting glimpse into the pre-exilic trade of Judah. The Jews were themselves subject to the general imposts of the Persian kings (Ezra 4 13 20 Neh. 5 4) who, however, in pursuance of their usual policy, exempted from duty the goods required for the temple (Ezra 7 24; see EZRA-NEH., § 5, col. 1480). In spite of their poverty the Jews, with the new horizons which the exile and the increased extent of the trade of their Phœnician neighbours opened to their eyes, indulged vaster hopes than ever of the mastery of the world's trade. Not only would the wealth of Arabia return to them (Is. 60 6 *f.*: Midian, Sheba, Kedar, Nebaioth); the new coasts of the West should send them tribute (8 *f.*); from foreigners and the sons of the Diaspora alike (9-17). It is remarkable that in this passage Jerusalem, the mother of far-scattered and wealthy sons, is represented, not in her inland, secluded position, but as standing on the sea shore, the abundance of the seas and the wealth of the nations drifting to her feet (60 5; cp G. A. Smith, *Bk. of Isaiah, II.*). Contrast the picture given above, § 45. So much had the Persian roads and Phœnician ships achieved in the scattering of trading Jews, and the widening of the mercantile hopes of the people. On Is. 65 11 see FORTUNE.

59. Post-exilic Jerusalem.

At this point we may conveniently take the attitude to trade of the Priestly Narrative and Code. Between these two in this respect there is a distinction. Whilst P's stories of primitive man are as destitute of any reflection of trade as those in JE (§ 42), its narratives of the patriarchs contain more allusions to commerce than JE does. Abraham, bargaining in the usual oriental fashion,[1] buys Machpelah for 400 silver shekels (Gen. 23 15 *f.*); Hebron is thus pictured as it always was—a market and 'harbour' for the nomads to the south. The treaty with Hamor (34 8 *ff.*) covers settlement, *connubium*, and commerce—the last definitely stated (*vv.* 10 21). The distances of the marches in the wilderness are suitably given, not in the daily stages achieved by traders, but in those (4 to 6 or 7 m.) of nomad camps (Nu. 33). The rich offerings for the tabernacle imply a people of far trade as well as one skilled in handiwork (Ex. 25 3-7, etc.; cp the oblations of the princes in Nu. 7). Incense is for the first time mentioned in the Hebrew ritual (Ex. 30 22 *ff.* etc.; cp Jer. 6 20); along with sweet calamus (REED), myrrh, CINNAMON, storax (?), ONYCHA, GALBANUM. On the other hand, the Priestly Law is very meagre in references to trade; puzzlingly so in contrast with Deuteronomy (above, § 54), when we consider the intervening residence in Babylon. The laws against fraud in money matters, loans, and deposits (Lev. 6 1 *ff.*), and false measures and balances (19 35 *ff.*), are similar to the warnings of post-exilic prophecy. There are laws for the selling of land (25 14 *f.* 23 *ff.*), against interest (*v.* 36), and concerning foreign and native slaves (*v.* 39: H; cp Dt. 23 *ff.*). No ransom is allowed for the life of a murderer (Nu. 35 31). On transactions necessitated by the restorations of the Jubilee Year, see Jos. *Ant.* iii. 12 3. But these are almost all that have to do with commerce. Unlike those of Deuteronomy, the blessings and curses pronounced in connection with the Law contain no reference to trade (Lev. 26). The priests value land (etc.) used for sacred purposes (27); but their revenues, unlike those of Babylon and Egypt, appear to include none derived from trade (Nu. 18). The religious feasts (Lev. 25 *ff.*) are purely agricultural; there is no inclusion of the directions for farmers at a distance selling their produce and buying material for sacrifice at the central sanctuary, such as we saw in Deuteronomy (§ 54). On the whole, the comparative silence of the Priestly Code as to trade is to be explained either by the effort of the compilers to hold themselves to the wilderness conditions, or else by the sadly diminished trade of the post-exilic Jews as compared with the commerce which flourished in the deuteronomic period. On the monetary standards of P, see SHEKEL, § 3 *f.*

60. Priestly Code.

The Book of Joel (about 400 B.C.) reflects a purely

[1] On the various canals and attempted canals with this aim, see Budge, *HE* 6 219 *f.* 7 63 *f.*

[1] Forder (*With Arabs in Tent and Town*, 219 *ff.*) illustrates the details of Abraham's purchase. 'In buying land from the Arabs some such terms as the following are used:—"A buys from B land in such a place, also all that can be seen on the land, trees, and stones, also all that shall be found under the ground." This custom makes Abraham's action very understandable.'

agricultural community with no resources when their harvests fail. Their children are the victims of the Phœnician slave-trade to Ionia (3[4]6): they shall have revenge some day in selling Phœnicians to Sheba.

61. Other post-exilic literature.

Instead of commanding the transit trade, Jerusalem is unwillingly overrun with foreigners (3[4]17). Cp Zech. 14 21: 'no more a trafficker in the house of Yahwè.' We have here traces of the feeling against association with foreigners, which the new legalism continued to enforce through subsequent centuries, and which must have seriously hampered any revival of trade in Judah. Compare the account which Palgrave gives of the effect of the Wahābi religious rigour on commerce.

Of course, there were other tempers in post-exilic Judaism, and these appear in the Wisdom literature. With all its reproof of greed of gain (1 19, etc.), the Prologue to Proverbs employs the methods and tempers of commerce to illustrate the ideal of man's search for, and intercourse with, Wisdom (3 14 8 2 *ff.* 18 *ff.*; cp 23 23). Like so much else in the Books of Wisdom, this also reappears in the parables of Jesus (below, § 79). The temptress in Prov. 7 is the wife of a merchantman on a long journey; it is interesting that, at the present day, among the Syrians of Lebanon, such immoralities are almost entirely confined to the wives of men trading abroad. We see in this another cause of the dislike of conservatives in Israel to trade; cp Pr. 27 8: 'as a bird wandering from her nest, so is a man that wandereth from his place.' There is also in the Prologue the strong warning against suretyship (6 1 *ff.*). But its most striking feature is the recognition of the highest divine Wisdom as identical with that which appears in the common ways, bazaars, traffic, and concourse of men.

In Job the references to trade are very few. The land of Uz is on the path of the men of Sheba; they are represented as marauders (1 15). Mention is made of desert-journeys of the caravans of Teyma, and the companies of Sheba (6 18 *f.*); of the Egyptian ships of reed (9 26); of (gold of) Ophir and silver as the reward of righteousness (22 24 28 16; contrast 31 24); of beryl, sapphire, gold, glass, coral, crystal, pearls, and the topaz of Ethiopia (28 16 *ff.*; see STONES, PRECIOUS)—an interesting list of what, at the time the book was written, were regarded as precious metals and stones; and in 28 1 *ff.* there is the vivid picture of mining, and in 21 29 an appeal to the wide experience of travellers. As a whole the book shows a knowledge of the far world and its wonders, only to be derived from the situation of the writer on the line of a widespread commerce.

In Ecclesiastes there is hardly any allusion to trade among all the ambitions and labours of men: but see 2 8: 'I gathered silver and gold and the peculiar property of kings and princes I made for myself.'

Apart from the prologue, the Book of Proverbs probably reflects the life of many centuries in Israel; yet even here the possible references to trade are proportionately few: warnings against suretyship (11 15 17 18 20 16 22 26 27 13), false balances (11 1 16 11, weights and balances are the work of Yahwè, 20 10 23), bad ways of gain (11 18), greed of gain (15 27; it brings bad luck to a house: עֹכֵר בֵּיתוֹ בּוֹצֵעַ בָּצַע; 28 20 22 25), the withholding of corn (from the market?) (11 26), and sluggishness in business (22 13: the reference is to the bazaars); some satire on oriental methods of bargaining (20 14), notes on the helplessness of the debtor (22 7), on wealth from wisdom in trade (24 4), and on the deep contrasts between rich and poor and the woefulness of poverty which appear only in commercial communities (19 4 7 22 7, etc.). 26 10 is an obscure verse on hiring. The picture of the strong woman portrays her searching for wool and flax; she is like 'a merchant ship that bringeth goods from afar'; 'she perceives that her merchandise (סַחְרָהּ) is profitable' and she delivers the linen and the girdles made by her household to the Canaanite—*i.e.*, Phœnician pedlar or trader—a glimpse into the home-industries of Israel (31 13 *f.* 18 24).

By the end of the Persian period (about 340) the trade of the civilised world reached the following limits. In the east the Persian roads were in communication with India, and it is extremely probable that the Chinese silk, 'Seric stuff,' which the Greeks found in 325 in Afghanistan, was already there. The Arabian land routes were still regularly used. CINNAMON came from the east beyond Media, and GALBANUM from Persia (?). In the south the Egyptians, if it is not certain that they had circumnavigated Africa (in Necho's time), were at least in communication with the E. coast of Africa (so much basis must we allow to the story), traded with Nubia, with the W. oases, and Cyrene. Egypt began to send large supplies of corn across the Mediterranean (Diod. Sic. xiv. 79 4). In the N. the Greeks had opened up the Black Sea; in the W. and NW. the Phœnicians had long exploited the mines of eastern Spain and the Rhone region with its communications with N. Gaul and perhaps Britain. They had also penetrated the Atlantic, whilst Carthage had reached Lake Tchad and the Niger. Massilia was a flourishing depôt, soon to send out Pytheas (about 300 B.C.) to the sources of amber round the Baltic (cp AMBER, § 3), and to the N. of Scotland (for the truth of the tale see Götz, 291). How far across this enormous sphere of communication Jews were scattered it is impossible to say—probably everywhere in the Persian empire as traders and settlers, and in Greece, Italy, and Carthage as slaves (cp Joel, as cited in beginning of § 61), some of whom might regain their freedom, and, like their kind, take up some form of industry or commerce. Except in the Semitic names of slaves, and in a tale told by Aristotle, and reported by Claudius of Soli (Jos. *c. Ap.* 1 22; cp *Frag. Hist. Græc.*, ed. Müller, 2 323), Jews do not appear in Greek literature before the very end of the fourth century B.C.

62. Summary: end of Persian epoch.

With the conquests of Alexander the Great a new epoch began in the trade of the world. The land-traffic which the Persians had developed was sustained and their roads extended eastward. There was little change in the lines of traffic; but new cities were founded upon them—*e.g.*, LAODICEA; and both Alexander and the Diadochoi increased the speed of marching (Götz, 191, etc.). The Persian neglect of the rivers (§ 58) was rectified; Alexander cleared the Tigris of its dams and weirs, founded a new port at its mouth, Alexandria, later Charax, and redug the canals. The foundation of Seleucia on the Tigris was a great blow to Babylon, which began to decay. For reasons why the Tigris displaced the Euphrates as a line of route, see Götz, 411 *ff.* On sea the changes were enormous. Hitherto the Phœnicians had encountered powers whose resources were confined to the land, to whom their sea-power was indispensable, and by the growth of whose empires the trade and wealth of Tyre and Sidon only the more increased. But the Greeks were a people who were of equal maritime capacity with themselves, and had long been preparing for the mastery of oriental trade by their occupation of the sea-boards of Asia Minor, and their settlements in the Delta,[1] who had fleets, and knew how to found new harbours and establish colonies. Alexander rivalled his land march to the Indus by the naval expedition which he sent back from there up the Persian Gulf, thereby reopening (if not for the first time founding) direct maritime communication between India and Babylonia (*Geogr. Gr. Min.* ed. Müller, 1).

63. Alexander and successors.

It was, however, his foundation of the Egyptian Alexandria which made the greatest change, and in this Tyre and Sidon found their first successful rival. For with

[1] There were Greek mercenaries, soldiers, and scribes in Egypt under Psametik, and Greek settlements and trade since Amasis.

the exploration of the Red Sea, already intended by Alexander and carried out by Ptolemy II., and the founding of new harbours—at Arsinoe near Suez, Leukos Limen near el-Ḳoṣēr, Berenike, and others (see above, § 29), there was opened a new route (or an old one was re-opened) to S. Arabia and India which must have drawn away some proportion of the land-traffic through Arabia and the sea-traffic up the Persian Gulf, on which Tyre and Sidon depended.[1] The Greeks had now a line of their own from Europe to Hindostān all the way on sea except for the small stretch of land-traffic through what was now a Greek kingdom. Alexandria was its main depôt and exchange; and in proportion as Alexandria flourished Tyre and Sidon grew less. The doom, therefore, which Zech. 9 1 *ff.* saw imminent upon Hamath, Hadrach, Damascus, Tyre, and Sidon was pregnant with more than the merely military overthrow which is all that the writer seems to perceive in it. As the Seleucid power grew, the Phœnician ports and Damascus found themselves threatened by northern in addition to their southern rivals. The growth of ANTIOCH (*q.v.*) has always meant the diminution of Damascus (*HG* 643, 647, and article 'Antioch' by the present writer in Hastings' *DB*); and the new Seleucid ports in N. Syria must have diverted the Euphrates trade from Tyre and Sidon. The usual result of a wealthy commerce appears in the large mercenary armies of the Seleucids (*e.g.*, Jos. *Ant.* xii. 10 1, and other passages).

64. Nabatæans. One of the earliest of the Seleucid campaigns was that undertaken in 312 B.C. and repeated later against the NABATÆANS (*q.v.*, cp Schür. *GVI* 1 app.) who had become possessed of the seats of the Edomites, and had already filled Petra with wealth derived from the transit trade. The new Red Sea commerce did not wholly destroy the land-traffic in Arabia; and the Nabatæans—successors both to the Aramæans, whose language (though themselves Arabs) they adopted, and to the Edomites—made themselves masters of all the routes from Teyma and Egra (Medāin Ṣāliḥ) (the S. limit of their inscriptions) to the Persian Gulf, Babylon, Damascus, Gaza, Elath, and Egypt (§§ 29-33). But they had also industries of their own. The first appearance of SE. Palestine in Greek letters is made by the Dead Sea as a source of asphalt; and it is to the Nabatæans that Diodorus Siculus (2 48) ascribes the collection of asphalt and its conveyance to Egypt. The Seleucid campaign of 312 had had for one of its aims the possession of the Dead Sea and its asphalt (Diod. 19 100). The Nabatæans must also have grown dates, and, when they came into possession of Ḥaurān, wheat sufficient for export. These with camels, the Arabian incense, coral and pearls from the Gulf, alkali, medicinal herbs, and what proportion of goods from Africa they were able to draw to Elath, would form their exports to the W. Their port for this was the harbour of Gaza, with perhaps Anthedon—other new rivals to Tyre and Sidon. The Nabatæans were land traders; but three of their inscriptions from the first decade of the Christian era have been found in Puteoli and Rome (*CIS* Pt. II. vol. i., Nos. 157-159).

These then were the new commercial currents within which the Jews lay during the Greek period. The contests of the Diadochoi must at first have ruined trade in Syria. Soon we find Jewish settlers receiving civil rights from the Ptolemies in Alexandria and from the Seleucids in Antioch and other N. Syrian cities. These settlers were probably for the most part merchants. There was constant intercourse between Jerusalem and Egypt and N. Syria—both Greek powers bade for Jewish friendship by granting at various times remission of dues on goods into Jerusalem (*e.g.*, Jos. *Ant.* xii. 3 3), or by regulating trade to suit Jewish religious laws (*ibid.* 4). The financial abilities of individual Hebrews found individual opportunity in the farming of the Syrian taxes for the Greek kings and were great enough to form almost legendary stories (*id.* 4 7; cp Schürer, ET, ii. 1 160). Thus the nation grew in affluence (Jos. *Ant.* xii. 4 10). Ecclesiasticus finds it necessary to make many warnings against fraud in trade (especially 26 20 *ff.*, cp 37 11 and 7 15; 8 13 29 4 *ff.* 14 *ff.* 41 18 42 3). Then came the overthrow of Jerusalem by Antiochus Epiphanes (169 B.C.), and the bitter struggles of the Maccabees during which, at first, Jewish trade must have been utterly destroyed. We read of merchants (probably Phœnician) accompanying Syrian troops against Judæa to purchase the captives (*Ant.* xii. 7 3). The friendliness of the Nabatæans to the Jews is noted twice (*ibid.* xii. 8 3 xiii. 1 2). In the campaigns of Judas and Jonathan the regard paid to lines of trade and conspicuous centres upon them is manifest; the wonder is that it has not been noticed. Bacchides fortified Jericho, Bethhoron, Emmaus (xiii. 1 3); then Jonathan garrisoned Michmash (6); the three toparchies which Demetrius the younger presented to the Jews were all necessary to the command of trade; they were accompanied by remission of dues on saltpits, etc.; as soon as Jonathan cleared Judæa of the Syrians he took Ashdod and made treaties with Ashkelon and Gaza (5 5). Then he turned against the Ammonites and the Nabatæans, while Simon fortified a line of places as far as Ashkelon, and broke to the sea at Joppa (5 10). How much this meant for the commercial ambitions of the little Jewish state is seen in the eulogy on Simon, 1 Macc. 14 5: 'With all his glory he took Joppa for a haven, and made an entrance to the isles of the sea.' At last Judah had a port. Beside it the small river harbour of Jamnia (JABNEEL) was also occupied, and Gezer fortified in connection with both. The increased wealth brought about by these means is seen in the rebuilding of Jerusalem which followed (*Ant.* xiii. 5 10). In 142 B.C. Simon set Judæa free from Seleucid tribute, and commercial documents were dated from that year (6 7). Jewish coinage began. The campaigns of Judas into Gilead had not been so successful in restoring communication between the Jewish settlements there and Judæa—he had to bring the Jews away with him (1 Macc. 5)—whilst between Galilee and Judæa lay Samaria (*Ant.* xiii. 10 2 *ff.*) which John Hyrcanus subdued, and opened the way to the S. desert routes by Hebron through the subjection of the Idumæans (xiii. 9 1). When Simon appealed to the Romans it is significant that he asked for the restoration of 'Joppa, the havens, Gezer, and the springs (? of Jordan)' (*ibid.* 2). During the subsequent years of peace John amassed an immense sum of money (*ibid.* 10 1); in so barren a land as Judah it must have come from trade and dues on trade. Josephus reports as much as 3000 talents in money, deposited in the tombs of David (*BJ* i. 2 5). Tombs were a usual place of deposit. Aristobulus added part of the Ituræan country (*Ant.* xiii. 11 3) with the entrance to the Hamath route (cp *HG* 414, n. 4); but it is in the campaigns of Alexander Jannæus that we see most proof of commercial ambitions. He took Gadara (?), Raphia, Anthedon, Gaza (which was disappointed in help from its Nabatæan ally Aretas; *Ant.* xiii. 13 3), Moab, and Gilead (but had to give them back to the Nabatæans; 14 2), held Samaria (15 4) with its command of routes to the coast, and made a treaty

65. Jewish trade.

66. Maccabees.

[1] For Ptolemy II.'s policy in regard to trade, and the trading expeditions he sent, see the inscription on the 'Stone of Pithom' in Naville, *The Store-city of Pithom, etc.*, also *l.* 12 of the Philæ inscription of the same king (translated by Budge, *HE* 7 209 *ff.*). The trade of Egypt was very prosperous under the Ptolemies, and the consequence is seen in the apparently inexhaustible wealth of that royal house. Their mercenary armies were always easily raised; their expenditure on buildings was enormous. Of late years a considerable number of commercial documents of the Ptolemaic and Early Roman period have been discovered in Egypt. Those given by Messrs. Grenfell and Hunt (*The Oxyrhynchus Papyri*, pts. i. and ii.; *Fayûm Towns and their Papp.*; etc.) comprise appeals for justice against trade defaulters, bankers' receipts, acknowledgements of loans, declarations of sales, and registrations of contracts, sales, loans, mortgages etc.—for which registration there were special officials in each nome.

with the Nabatæans (15 2). The lines of positions held by Jannæus as laid down by Josephus are very significant; first along the coast from Rhinokolura to Straton's Tower (afterwards Cæsarea) and then through Esdraelon from Mt. Carmel by Tabor and Bethshan to Gadara with a number of cities E. of Jordan (15 4). Both he and his widow aimed at Damascus (16 3). Later, the Nabatæans retaliated by a siege of Jerusalem (xiv. 2 1); Josephus describes them as 'no very warlike people' (*ibid.* 3). All the later Hasmonæan kings[1] had mercenaries in their army—another sure proof of their commerce.

Meantime Jewish settlements abroad increased in all the great towns; but they do not appear to have excited remark from the greatness of their trade. Their business, except in the case of a few prominent individuals, must have been petty and parasitic. The Nabatæans appear better known to the Greeks, whose earliest notices of the Jews are confined to their hatred of men (Posidonius of Apamea, born about 135 B.C., *Fr. Hist. Gr.*, ed. Müller: through Diod. Sic. 34, *fr.* 1; Apollonius Molon a teacher of Cicero, *Fr. Hist. Gr.* 111 213; cp Eus. *Præp. Evang.* 9 19). Apollonius also charges them with making no useful invention (quoted by Jos. *c. Ap.* 2 15). With the civil rights granted to them in so many large cities (Jos. *Ant.* xii. 3 2, etc.), however, they must have risen to considerable commercial power, especially in Antioch, Alexandria, and Cyrene (for the last cp Strabo quoted by Jos. *Ant.* xiv. 7 2). The Jews of Asia Minor deposited in Cos 800 talents, about £292,000 (see Reinach's n. 2 on p. 91 of his *Textes d'auteurs Grecs et Rom. relatifs au Judaisme*).

67. Jews and Greeks.

We now pass to the last of our periods—the Roman. The effects of Roman policy on the trade of the world were more revolutionary than those of any of the empires which preceded them, and may be summed up under the following five heads:—

68. Roman period: Rome.

(i.) The centre of trade was shifted from W. Asia to the other end of the Mediterranean and fixed at Rome. This was rendered inevitable: politically by Rome's rank as the capital of the Roman state; commercially by the Phœnician and Greek exploitation during the previous periods of the W. Mediterranean, N. Africa, Spain, and Gaul; geographically by the position of Rome well down the great Italian promontory, which runs so far out upon the Mediterranean, with its attendant isle a day's sail from N. Africa, and its SE. cape a few hours from Greece. Even in Republican times Rome's central character had been assured both by the roads which gathered to her from all parts of the peninsula, and by the sea-traffic which filled her harbour of Ostia or came up the Tiber to herself (even triremes and penteremes reached the city under the Republic, and under Augustus ships of 78 tons; Götz, 319).

(ii.) Above all the nations which preceded them, the Romans excelled in the making of long lines of firm roads—first in Italy, towards Gaul, and Spain, and then, as their empire extended, to the middle of Scotland in the N., and to the farthest borders of Mesopotamia and the Arabian province. By Cæsar's time sixteen paved roads led into Rome—the oldest the Via Appia S. by Capua with branches to PUTEOLI (APPII FORUM, THREE TAVERNS), RHEGIUM (*q.v.*), and Brundisium. From Dyrrhachium (another branch from Apollonia) the great route to the E. made for THESSALONICA with a continuation to Byzantium. For the Roman system of roads through Asia Minor from Byzantium, Ephesus, and Smyrna, see Ramsay, *Hist. Geog. As. Min.* and the summary with map in Miss Skeel's *Travel in First Century after Christ* (Cambr. 1901); also ASIA, CAPPADOCIA, CILICIA, EPHESUS, GALATIA, LAODICEA, PHRYGIA, SMYRNA, etc. From Asia Minor to the Persian Gulf the lines were little altered from those of the Greek period (§ 69). The Euphrates was bridged at Samosata, and there was a bridge of boats at Zeugma (Bir) (Tac. *Ann.* 12 12). From the Euphrates as from Byzantium the Pontus was more easily reached. Antioch grew in influence as a knot of trade-routes.[1] The road by Palmyra to the Euphrates was more frequently used. Charax was still the port on the Persian Gulf. The distances were approximately these:—

69. Roman roads.

From Tarsus to Antioch 5 to 7 days; thence to Zeugma 6; thence to Seleucia (Ctesiphon the Parthian capital) 23 or 24; then to Charax 13; Seleucia to Artaxata (for Central Asia) over 32; to Trapezus (Trebizond) over 40; from Antioch by Emesa (Ḥomṣ) to Palmyra 9 days; thence to the Euphrates at Circesium 5 or 6 (to Vologesias, lower down the river, 16, and thence to Charax 29 or 30); Antioch to Damascus 7 to 9; thence to Palmyra 5 or 6; Boṣra to Charax across the desert 5 to 6 weeks; Damascus to Petra 9 days, to Gaza 7 (at least); Petra to Gaza not less than 5; to Elath 3 or 4; and to Leuke Kome 11 or 12. Gaza to Pelusium was 6 or 7 days (Götz 5); Pelusium to Alexandria, 5 or 6 by land, 1 to 2 by sea; Alexandria to 'Babylon' (later Cairo) 4, to Arsinoe (Suez) 6, to Cyrene 20.[2]

In Syria and Palestine the ancient routes were followed with no important variations; and here we must remember that, with the possible exceptions of a few short stretches in the neighbourhood of the Coloniæ and other centres, none of the characteristic Roman roads were laid down till the times of the Antonines, nor, so far as the present writer has been able to examine them, was the structure consistently so perfect as in the Roman roads of Italy and the W. (for these latter, see Götz, 322 *f.*; and Skeel, 45). Along these roads an imperial service of post-horses and carriages was developed by Augustus; later known as the 'cursus publicus,' which civil officials, returning or emigrating veterans, and of the soldiery all who carried special passes, had the right to use. Each of the *mansiones* or chief stations was supplied with an inn,[3] stables, and about forty horses; the intermediate *mutationes* had about twenty (Götz, 336 *ff.*; cp Skeel, 4 *ff.*). The variety, capacity, and speed of wheeled vehicles was greatly increased; and it is to the Romans that we owe the first real development of the carriage of goods on wheels, though pack animals, camels, mules, asses, and even oxen, were still generally used (cp Jos. *Vit.* 24 26). Horses, mules (cp Horace's journey to Brundisium, *Sat.* 1 5), and asses were employed for riding. On the breeding of horses, for different purposes, the Romans bestowed great care. The security of the roads was a constant matter of trouble to the provincial governors. In semi-independent principalities (as we shall see under the Herods, § 75), brigandage was always more rife; but even under purely Roman government it frequently reappeared. Yet, on the whole, the security of land-travel at the beginning of the empire had immensely improved: cp Strabo, vi. 4 2; Pliny, *HN* 27 1, who calls the 'immensa Romanæ pacis majestas,' 'velut alteram lucem . . . rebus humanis.'

(iii.) At sea the greatest change was the reduction of the whole of the Mediterranean under one political power. Then followed its clearance of pirates, first by Pompey and then by Augustus (who also cleared the Red Sea from the same pest). The consequence was an enormous increase of the Mediterranean traffic, which is described by many writers of the period in glowing terms (Juvenal, 14 278 *ff.*, 'the sea as thronged as the land'; Philo, *De Leg.* 21: 'filled with merchantmen'). Perhaps the most significant illustration is found in the contrast between the Hasmonæan princes, who, till after Jannæus, never set foot on shipboard, and the

70. Mediterranean.

[1] Josephus (*BJ* i. 2 5) says that John Hyrcanus was the first to have mercenaries.

[1] Josephus (*BJ* iii. 2 4) reckons it the third city of the Roman empire.

[2] Calculated from the Antonine Itinerary and the Peutinger Table; Götz, 424 *ff.* gives slightly different calculations. Titus took only 5 days to march from Pelusium to Gaza; *BJ* iv. 11 5.

[3] For inns, used mostly by poorer travellers, see Jos. *Ant* xvi. 5 1.

TRADE AND COMMERCE

Herods who were constantly passing to and from Italy. See below, § 75. But this applies only to the summer season; ships were laid up (even in the middle of a voyage) from November to March. Philo (*De Leg.* 29) explains the exceptional character of a winter voyage (cp Jos. *Ant.* xvi. 2 1).[1] The size of the ships was considerably, and their speed somewhat, developed. War-vessels and the lighter (mostly private) passenger ships carried many oars; cargo-transports had but a few oars, chiefly to turn the head of the ship in its tacking, and depended on sails. They also carried passengers: Josephus went to Rome in a ship with 600 souls on board (*Vit.* 3); and over 200 were reckoned on Paul's ship (Acts 27 37; see, however, SHIP, § 8). For a further description see Skeel, 81 *ff.*

The three principal ports on the Mediterranean were Rome (with Ostia and Puteoli, the latter the goal of the grain ships from Egypt), Alexandria,[2] and Carthage. Smyrna with the Asia Minor trade, as well as some from Central Asia, came next. Delos was the great centre of the slave trade; Strabo (xiv. 5 2) mentions 10,000 slaves there. Rhodes maintained the flourishing condition ascribed to it by Ezekiel (27 15): it lay on the Alexandria-Byzantium-Black Sea line. THESSALONICA (*q.v.*) had grown since the time of Alexander, and now increased through its connection with Dyrrhachium. Byzantium commanded the Black Sea, though much of the traffic from the E. portion of this went by land across Asia Minor. Corinth and Athens rather fell behind; but Corinth grew again under Trajan. On the Syrian coast Berytus, a colonia of Augustus, grew into prominence (see below, § 75); PTOLEMAIS (*q.v.*) became the chief port for Rome—especially for the soldiery, but also for commerce; and Herod founded Cæsarea (75); Gaza and, to a lesser degree, Anthedon still flourished with the Nabatæan trade from the far E. The importance of Tyre and Sidon was, therefore, relatively (though not absolutely) diminished.

Strabo (iii. 2 5 x. 4 5, etc.), Pliny (*HN* 15 29 19 1, etc.), Acts (20-28), Lucian (*Navig.* 1-6), and others, furnish us with data as to the time occupied by Mediterranean voyages. If we take the sea from W. to E., from Gades to Ostia was 7 days, from Carthage 2 to 3, from Puteoli to Alexandria 9 days, from Athens to Smyrna 2½. These may be taken as express or even 'record' voyages. For cargo boats with favourable winds we may add 25 to 50 p.c. Even when storms did not intervene, it must have taken the grain ships of Alexandria well on to a fortnight to reach Puteoli. From Cyprus to Tyre and Sidon (to judge from the voyages of mediæval galleys) 24 hours would suffice; the Syrian ports were mostly within 12 hours of each other. But the uncertainties were great. Herod sailing from Alexandria to Pamphylia was driven by a storm, with loss of the ship's cargo, to Rhodes, where he built a three-decked ship and sailed to Brundisium for Rome (Jos. *Ant.* xiv. 13 3). Lucian, who reached Cyprus from Alexandria in 7 days, took 63 more (having been driven to Sidon) to reach the Piræus (*Navig.* 1-6). For winds on the Mediterranean, see Pliny, *HN* 2 117 *ff.*; Smyth's *Mediter.* 230 *ff.*

71. Trade with India.

(iv.) The trade down the Red Sea and across the Indian Ocean was immensely increased;[3] and indeed it is to this period that we owe the first approximately exact data with regard to it (Strabo, 60 B.C. to about 21 A.D.; Pliny senior, 23-79 A.D., and the anonymous *Periplus* of the Erythræan Sea, 1st cent.; Ptolemy, *fl. circa* 140). But even though the discovery of the 'monsoons' was attributed to Hippalus, of the time of Augustus, we must not suppose that these had not been employed by navigators in earlier periods (above, § 17). The E. coast of Africa was known as far as Madagascar. The way to India was fairly opened up (Horace, *Epp.* i. 1 45 *f.*). Ceylon had been known before the geographer Pomponius Mela (about 150 B.C.), and now, with its markets for the farther E., became quite familiar (Strabo, 2 1, Ptol. 7 3); an embassy came from it to Claudius (Plin. *HN* vi. 24 5). The time required from the Malabar coast to Alexandria was 90 days. The Tiber and the Indus were thus less than 3½ months distant. Pliny (*HN* 12 41) estimates that every year 'India, Seres, peninsulaque,'—*i.e.*, Arabia—withdraw from the Empire 100,000,000 sestertii (about £885,416). When Strabo went up the Nile with Ælius Gallus he learned that 120 ships left Myos Hormos (? Leukos Limen; see § 29, n. 4) for India, as contrasted with 'extremely few under the Ptolemies' (*Geogr.* ii. 5 12). Yet these regular voyages did not destroy the Arabian land-traffic. For reasons for this (*e.g.*, the preference of the age for land-routes and the loss to the value of incense and spices when on the sea), cp Götz, 436 *ff.* We are now able to appreciate the growth, under the Romans, of Alexandria. The bulk of the Indian trade passed through its warehouses, as well as that from inner Africa. Besides its exports of Egyptian grain, paper, linen, and glass to Rome, it sent proportional quantities (except of grain) to Syria, especially to Antioch, and in times of famine supplied Syria with food-stuffs. These were also brought thither from Cyprus.[1]

72. Law, money, language.

(v.) The civilised world found itself for the first time under a common system of law—administered with western consistency; and even a maritime law began to exist. With the law there spread a common coinage. Less extensive was the use of the Latin language. Except in the names of the coins, official designations, and a few other terms, it did not in W. Asia displace Greek; the *Periplus* is written in Greek, the harbours on the Red Sea continue to have Greek names. We shall see a similar state of affairs among the Jews.

73. Summary: Rome.

Thus though the Romans, unlike the Phœnicians, and the Greeks, did not increase the bounds of the known world, for they were not explorers, they reduced it to peace, and by this and their thorough administration of every department of life, enormously increased its commerce and wealth. The life of the world is everywhere found in the most rapid circulation, against the throng and change of which voices from an older day appeal in vain. The mixture of nationalities on all the main lines and centres is bewildering. Wealth and luxury increase by leaps and bounds.

74. Antipater.

The Roman arms came into touch with the Jews on the arrival of Pompey at Damascus 64-63 B.C. Among the first results were several which are properly commercial. The Greek cities E. of Jordan had been founded on the main trade routes with a connection by Scythopolis with the sea. Under Roman protection they were able for the first time to carry out a trade-league, such as was already instanced by Greek cities in Europe. See DECAPOLIS, §§ 1 *f.* Pompey also appears to have been attracted by the trade of the Nabatæans (Jos. *Ant.* xiv. 3 3 *f.*), with whom, as we have seen, the western world was already more familiar than it was with the Jews. An expedition to Petra ended in a treaty with the Nabatæans (*ibid.* 5 1). Josephus (*ibid.* 4 1) also notes already the palms and balsam of Jericho. Gabinius rebuilt cities on trade lines which had been destroyed (5 3). The policy of Antipater (cp HEROD, FAMILY OF, § 2)

[1] Cp Jos. *BJ* vii. 1 3 (last clause).

[2] Cp *ibid.* iv. 10 5. See, too, *The Mediterranean* by Admiral Smyth (London, 1854), pp. 274 6.

[3] This was partly due, of course, to the obstructions to trade raised upon the Mesopotamian and Persian Gulf route to India, by the rise of the Parthian empire and its frequent wars with Rome. Had the Seleucids continued to hold all Mesopotamia, the trade down the Red Sea in the Ptolemaic period, and the consequent wealth of the Ptolemies, could not have been so great as it was.

[1] The Crusaders also used Cyprus as a base of supplies; *L'Estoire de la Guerre Sainte*, 2100 *ff.* 2367 *ff.*

included treaties with Nabatæans, Gaza, and Ashkelon (13 *f.* 73), and he supplied the army of Gabinius with corn, weapons, and money (62, cp 51). The wealth not only of the temple, through the contributions from Jews of the Diaspora, but also of Jerusalem and Judæa as a whole, was considerable (71 *f.* with quot. from Strabo). A limited freedom from taxes was granted to the Jews (85 106; cp 1010), and Hyrcanus was allowed the dues on corn (20,675 modii every year) exported through Joppa to Phœnicia (106). The Senate restored to the Jews possessions taken from them by the Phœnicians (106).

75. Herod. Herod's earliest efforts (cp HEROD, FAMILY OF, §§ 3-5) as governor of Galilee were directed towards the dispersion of brigands (92 154) who made the conveyance of even the necessaries of life a difficulty (162). From the first Herod continued, and after each of his reverses he renewed, the policy of his father. When he sought a loan, it was to the Nabatæans that he turned (141; *BJ* i. 141): he sought their friendship; but on the extension of his power E. of Jordan, he and they became bitter rivals (xvi. 92). When Antony had given Cleopatra the revenues of Jericho, Herod farmed them for her (xv. 42). He got the coast-towns from Cæsar, with Gadara, Hippos, and Samaria (all trade centres, 73); and having fortified and embellished Samaria, he created, 25 m. distant from it at Straton's Tower, CÆSAREA (*q.v.*), the one real port between the Delta and Ptolemais (85 96). Thus the line across the Samarian mountains was in his hands; at its farther end lay Phasaelis (and in the next reign Archelais) with palm-groves reaching to Jericho, and easy fords across Jordan, commanded probably by the fortress Alexandrium (Jos. *BJ* i. 65; Strabo, xvi. 241; cp *HG* 352 *ff.*). Further, Herod built ANTIPATRIS (on the line Cæsarea-Jerusalem as well as on the inland route N. and S. over the maritime plain) (xvi. 52), and greatly improved the fertility of the Jordan valley (*ibid.*). The trade of W. Palestine, at least S. of Carmel, thus lay in his hands; at Gadara, and Hippos, and Jericho he intercepted the trade of E. Palestine, but there his hold was precarious and temporary; whilst at Gaza he held the tolls for Arabia *via* Petra, and for Egypt. Herod mightily increased his opportunities, both of wealth[1] and of expense, by his many voyages to the W. (see above, § 70): (*a*) to Rome, *Ant.* xiv. 142 *ff.*, and back to Ptolemais, 151; (*b*) to Italy for his sons, xvi. 12; (*c*) to Ionia to M. Agrippa, 21; (*d*) by Rhodes, Cos, Lesbos, Byzantium, to Sinope, to Agrippa, returning through Asia Minor to Ephesus and thence by Samos 'in a few days to Cæsarea,' 22-4; (*e*) to Italy to accuse his sons, and back by 'Eleusa,' off Cilicia, and Zephyrium, 41 *f.*, *BJ* i. 234; (*f*) to Italy (? *Ant.* xvi. 91); (*g*) to Berytus to the trial of his sons and back to Cæsarea (xvi. 112 *ff.*). Herod was able to estimate the resources of his countrymen of the Diaspora, and no doubt to draw upon these in return for services rendered them (*e.g.*, xvi. 53). He also received, among other imperial donations, the revenues of copper mines in Cyprus (45). But, on the whole, as Josephus points out (54), Herod's expenditure constantly exceeded his income. He would send money and provisions for the imperial armies, and provide water (no doubt with the help of the Nabatæans) on the desert marches between Egypt and Palestine (xv. 67), and an auxiliary[2] regiment (*e.g.*, xv. 93). His lavish gifts to foreign cities resemble the donations of an American millionaire (xvi. 53). At home, besides rebuilding the temple in eighteen months (xv. 111), and constructing other public edifices on a western scale (81, etc.), he had to bring corn from Egypt, not only for bread for the cities of Jerusalem, but also for seed for the peasants on the occasion of a famine (92). While, no doubt, his policy increased the trade of his dominions, he must at the same time have hampered trade by his growing exactions. On this Josephus speaks cautiously but emphatically (xvi. 54); cp the complaint of the Jewish embassy to Augustus after the accession of Archelaus (xvii. 112)[1] and the many seditions both in Herod's life-time and later (104 *ff.*).

76. Procurators, later Herods. Commercial events and processes under the Roman procurators, or under the descendants of Herod (see HEROD, FAMILY OF, §§ 6-13), do not call for special mention, beyond these facts. Herod Antipas by his domains in Perea was brought into special relations with the Nabatæans and the Decapolis; and his building of Tiberias must have increased the traffic of Galilee. The policy of Agrippa I. was milder towards the Jews than that of Herod; his revenues were about three-fourths of Herod's (xix. 82). He sailed from Anthedon for Alexandria, and thence to Puteoli (xviii. 63). The completion of the works on the temple created a large number of unemployed for whom work had to be found (xx. 97)—a striking instance of the complications brought into Jewish life by the Hellenic policy of the Herods. Josephus gives an interesting account of the trade, wealth, and finance of the Babylonian Jews (xviii. 9; xx. 23). Queen Helena of Adiabene brought food from Egypt and Cyprus for Judæa during a famine (25). As the troubles with Rome drew to a head (from 60 A.D.), brigandage increased (54 85 93 *ff.*, etc.).

77. Syrian trade. As to the conditions of Syrian trade in the first Christian century, we may say, in general, that it suffered everywhere for periods, and in some of the more desert parts always, from robbers;[2] and that, besides the exactions noted, it was greatly hampered, especially among the Jews of Judæa, by the strictness of the Law, and above all by the provisions relating to the Sabbath and to things clean and unclean (for a list of these see Schürer, *GJV*, ET, ii. 296 *ff.*, 106 *ff.*). The Sabbath prohibitions reflect almost wholly an agricultural people; yet those against writing and carrying and putting a value on anything on the Sabbath (*ibid.* 102) must have made trade on that day impossible except by desperate subterfuges. The laws against unclean things affected trade more deeply; for trade everywhere brought Jews, in any large ways of doing business, into contact with the Greeks and other foreigners. In spite of themselves, however, Hellenism poured into their life through commercial channels. For the very large list of trading terms and names of objects of trade borrowed by the mixed Hebrew of the time from the Greek language, see Schürer, *GJV*, ET, ii. 133 *f.* 36 *ff.* Inns, different names for dealers, foreign provisions and materials for dress, some raw stuffs, and vessels for eating, carrying, etc., are Greek. So with some of the coins; the rest are Roman (PENNY, etc.); but the superscription—for the Greek cities had their own coinage with Cæsar's image—was mostly in Greek. The large number of very small coins in use (*ibid.*) betrays the great poverty of the bulk of the population. Yet, here and there, very rich individuals outside the official classes were found (*e.g.*, *Ant.* xiv. 135).

78. Objects of trade. It is easy to form an idea of the objects of trade. The transit trade from Arabia to the Levant, and from Egypt to N. Syria, avoided Judæa (hence the ambition of the Herods for coast-towns from Gaza northward), but was

[1] Cp the large sums obtained later by the Pseudo-Alexander from Jews in Crete and Melos (*Ant.* 17 12).
[2] Herod's foreign mercenaries are frequently mentioned; *e.g.*, *BJ* i. 183.

[1] He embellished foreign cities at the expense of his own; and 'filled the nation with poverty.'
[2] Under the procuratorship of Cumanus they seized the furniture of 'a servant of Cæsar' on the Beth-horon Road (*BJ* ii. 122; cp 1836).

frequent and heavy across Galilee, especially between Ptolemais and the Greek cities beyond Jordan. Josephus (*Vit.* 26) describes the wife of Ptolemy, the king's procurator, as crossing Esdraelon with '4 mules' lading of garments and other furniture'; a 'weight of silver not small,' and '500 pieces of gold.' Palestine continued to export from the Jordan valley dates and the balsam of Jericho (the passages already cited from Jos. *Ant.*;[1] Diod. Sic. 11 48*a*; 19 98 4; Dioscorides 1 18; Plin. 12 25; Theophr. *Hist. Plant.* 9 6). Whether the flax of Beth-shan, later so famous ('Totius Orbis Descr.' in *Geogr. Gr. Min.*, ed. Müller, 2 513 *ff.*), was already grown there is uncertain. Wheat and oil were also exported to Phœnicia; but, lavish as Josephus describes the fertility and agriculture of Galilee to have been, it was not thence but from Egypt and elsewhere that Judæa brought her food and seed in times of famine. In 66 A.D. John of Gischala had the monopoly of exporting oil from Galilee, by which he made great sums of money (*BJ* ii. 21 2). Josephus mentions artificial snow (*BJ* iii. 10 7). There was also exportation of pickled fish from the Lake of Galilee, as far as Italy (Strabo, xvi. 2 45). Tarichеæ, the chief port on the Lake, means 'pickling-places'; Josephus describes it as full of artizans and of materials for shipbuilding (*BJ* iii. 10 6). The temple of Jerusalem was, even on ordinary days, an immense centre of trade; incense, spices,[2] priests' garments, and the supplies for the daily sacrifices (cp Schür. *Hist.* ii. 1 269 298) alone necessitated enormous markets, largely in the hands of the priesthood (Keim, *Life of Jesus*, ET, 5 117 *f.*). The temple-finances—not only the sacred revenues[3] but also private deposits[4]—were managed by special officials (Schür. *id.* 261). All this business was heightened enormously at the time of the great festivals—when food (largely pickled fish from the Lake of Galilee and the Levant) had to be supplied for the incoming multitudes; and no doubt much private business also was transacted. Among the traders of Jerusalem, Josephus enumerates those in wool, brass, cloth (*BJ* v. 8 1), timber (ii. 19 4), and all kinds of artisans.

In the NT there is a considerable reflection of all this life. The Gospels, relating large catches of fish in the Lake, which must in that climate have been immediately cured, are curiously silent about the conveyance of the fish for this purpose by the Jewish fisherman to the Greek curer.

79. Trade in the Gospels.

But of other business, so thriving in Galilee, they give us many glimpses. One of the disciples keeps toll on the transit-trade at Capernaum (Mt. 9 9). Many of the hearers of Jesus are publicans (PUBLICAN). Zacchæus was probably farmer of the state revenues of the balsam gardens of Jericho. The use of the objects, means, and tempers of trade by Jesus is very instructive (cp above, on Proverbs, § 61). The parables reflect the roads and journeys, mostly of Galilee but also of Judæa: a merchant seeking goodly pearls; a Samaritan traveller, rescuing a Jew fallen among thieves, and paying for him at an inn; the prosperous farmer and his new barns; the woman with her little store of silver; the rich man and his steward; the farming of estates to husbandmen by absentee landlords; and other of the economic relations of the time. In the light of what we have seen in previous periods (§§ 11 48 *f.*), it is interesting that the Parable of the Pounds imputes trade to kings through their servants. From the early Pharaohs to the Herods trade had always been a royal business. And the teaching of Jesus is full

[1] Also *BJ* i. 6 6; cp Hor. *Ep.* ii. 2 184. For the farming of the groves by the Romans, see W. Pressel's *Priscilla an Sabina.*

[2] 'Sweet-smelling spices with which the sea replenished it': *BJ* v. 5 5. There were thirteen kinds.

[3] *BJ* ii. 3 3 vi. 5 2.

[4] Such are mentioned in *BJ* i. 13 9 iv. 5 2, etc. There were also the public treasures (cp § 66) held in the royal palace (*BJ* i. 13 9, iv. 3 4), where also business contracts were deposited (ii. 17 6).

TRADE AND COMMERCE

of appreciation of the bigness of its methods and of the brave tempers required in it (Mt. 13 45 *f.*, Lk. 16 9 *ff.*). He frequently likens to its pursuit the search after the true riches. At the same time his warnings are many against covetousness and the temper of the trading Gentiles. Galilee was a place where a man might gain the whole world and lose his own soul. The temple courts had become a fraudulent market—the house of God a den of thieves.

On the social life of the early Christian societies see COMMUNITY OF GOODS, DEACON, etc. The progress of the new faith was along the lines of trade and in the great trade centres—

80. Acts and Epistles.

LYDDA, JOPPA, CÆSAREA, ANTIOCH, DAMASCUS, the cities of ASIA MINOR, THESSALONICA, CORINTH, ROME. Paul worked at his own trade (Acts 18 3 20 33 *ff.*), and other commercial pursuits are mentioned among the early Christians ('Erastus the treasurer of the city,' Rom. 16 23; 'Alexander the coppersmith,' 2 Tim. 4 14; Zenas 'the lawyer,' Tit. 3 13; 'Simon a tanner,' Acts 9 43; Lydia 'a seller of purple,' 16 14; Aquila and Priscilla, like Paul, tentmakers, 18 3). The Apostolic letters, however, contain, besides the general warnings against covetousness, extremely few references to trade, either for illustration or warning:—Jas. 4 13 *ff.*, 5 1 *ff.* 1 Thess. 2 9 2 Thess. 3 8 (Paul's own example of industry) 1 Thess. 4 11 2 Thess. 3 9 *ff.* (exhortations 'to do your own business and to work with your hands . . . that ye may walk honestly towards them that are without and may have need of nothing') Rom. 13 7 *ff.* (taxes, and debt) 1 Cor. 7 30 ('those that buy as though they possessed not'). The fewness of such references is the more conspicuous when the many passages on the relations of masters and slaves are contrasted with it. The lifting of the burdensome law from the lives of the Jewish converts to the new faith must have given them fresh advantages in trade; cp Peter's vision at Joppa,[1] in which the sheet, let down from heaven, full of things clean and unclean, has been compared to the sails of the merchant ships in the roads visible from the Joppa house-tops (see *HG* 141 *f.*), 'What God hath cleansed call not thou common' (Acts 10 9 *ff.*). We may take for granted that the rise of Christianity had far-reaching economic effects—*e.g.*, upon the fortunes of certain trades (cp the outcry of the Ephesus silversmiths, Acts 19 24 *ff.*), and still more deeply—as in parts of India to-day where a rise in wages has been known to follow the adoption of the new faith—upon the wage-earning slaves and freedmen.

In the Book of Revelation the peculiar traders of LAODICEA (*q.v.*) are referred to. On the mark, the name of the beast, which gave license to buy and sell (13 17), see the commentaries.

81. Book of Revelation.

In the picture of Rome, Babylon the Great, as in the prophet's account of her namesake of old, her vast trade is included: Rev. 18 3, 'the merchants of the earth waxed rich by the power of her luxury'; *v.* 11, 'the merchants of the earth weep and mourn over her, for no man buyeth their cargo.' Then follows a list of her imports. Compared with those assigned to Tyre and Babylon by the prophets, there is nothing new except SILK (*q.v.*); but note the emphasis in *v.* 13 on 'bodies and souls of men.' Rome's fall means the destruction of commerce and industry (18 15-23). With this acknowledgement of Rome as the centre of the world's trade, we may finish our survey of the Roman period. In the prophecy of her fall there may be traced a just sense of the precariousness of her commercial, apart from her political, position. Less than a couple of centuries saw the gradual disappearance of her trade to other positions naturally more fitted to attract it.

[1] For a description of Joppa, see Jos. *BJ* iii. 9 3.

IV. TERMINOLOGY IN OT

An account of the terminology of trade among the Israelites will complete our survey, by giving a number of names both of agents and processes not touched on in the preceding history. The appended list is as nearly as possible exhaustive so far as the OT is concerned. It ought to be noted that a great many of the terms and phrases given are used only metaphorically; yet, in the case of nearly all of these, the metaphorical (generally a religious) use implies a previous direct employment in common life. The list presents many points of historical interest of which the following may be summarised by way of preface to it.

82. Terminology of trade in OT.

i. The OT terms are all Semitic. Down to the Greek period there are in fact no others—none of Egyptian and none of Persian or Indian origin. This is the more striking in that so many of the names of articles and objects which trade introduced into the Hebrew vocabulary are Egyptian or Persian—plants, raw materials, garments, etc.; and that from their Persian masters Israel also adopted a number of political terms. That none of the agents or processes of trade even in the Babylonian and Persian periods are of non-Semitic origin is clear proof that till the advent of the Greeks the trade of W. Asia remained in Semitic hands (witness the dislike of the Egyptians to trade, § 12) and that all the foreign commerce of Israel was achieved through Semitic tribes or nations who spoke a Semitic tongue; further evidence that the non-Semitic PHILISTINES (*q.v.*, § 5 *f.*), with whom the early Hebrews did so much trade, had adopted 'the lip of Canaan.' As soon as the Greeks come to Syria we perceive a change: the purely Semitic words for trade and trader are displaced in MH by Greek terms; and there is a great influx of Greek names for specialised forms of trading, and for the articles and objects of trade (see above, § 77; also HELLENISM, § 5).

ii. The OT terms all belong to the common Semitic stock and are native to Hebrew except in the case of a small number borrowed from the Assyrian probably through the Aramæan (*e.g.*, מִדָּה, זְבַן), and these are chiefly in P and the post-exilic writings. Of course, some others may be of Phœnician or Aramæan origin; but this it is impossible to prove.

iii. There is clear evidence in the OT terminology of a gradual growth and organisation of commerce in Israel. For (*a*) the number of terms, and the frequency of the instances of each increases from Dt. onwards and rapidly in P and Ezra-Neh. (*b*) Especially are there more words for 'property,' 'wealth,' 'substance,' or at least these occur more frequently; (*c*) terms of general significance (עבר, פקד, and the like) have specially commercial meanings attached to them in the later writings; (*d*) the shades of meaning increase in the case of some words, or the various processes (cp 'valuation' and the like) are carefully differentiated; (*e*) the mention of deposits of money becomes more frequent; (*f*) old processes of a primitive type are displaced by more formal and by written deeds; cp the sale of land in Ruth 4 with that in Jer. 32; (*g*) and yet in spite of all this, Hebrew trade remains somewhat simple; there is, *e.g.*, no mention in the OT of a trading company.

The Hebrew names for trade, traders, and merchants, and for the various processes and conceptions included under trade are as follows:—

83. Detailed vocabulary.

(*a*) *National names specialised to mean traders.*[1]

1. *kĕna'ăni*, כְּנַעֲנִי 'Canaanite' or 'Phœnician,' means 'trader' in Job 40 30 [41 6], Prov. 31 24 (but 𝔊 Φοινίκων, Χαναναίοις). There is a plural form with suff. כִּנְעָנֶיהָ in Is. 23 8; and in Zech. 11 7, 11 כן עניי is, after 𝔊, to be read כנעניי with the same sense. In Hos. 12 8 North Israel is described as a כנען (𝔊 Χαναάν); in Zeph. 1 11 כָּל־עַם כְּנַעַן is probably used of the mercantile portion of Jerusalem generally (𝔊 πᾶς ὁ λαὸς Χαναάν); in Ezek. 16 29 (𝔊 om.) and 17 4 (𝔊BQ Χαναάν, 𝔊A Χαλδαίων) Chaldea is called a 'land of כְּנַעַן'—*i.e.*, 'trade.' (Cp CANAAN, § 2, col. 639 [and on the text-critical questions arising out of the passages referred to, cp *Crit. Bib.*].)

2. *mĕdānim*, מְדָנִים for *midyānim*, מִדְיָנִים, Midianites, Gen. 37 28 36, and

3. *yišmĕ'ēlim*, יִשְׁמְעֵאלִים, 'Ishmaelites' (Gen. 37 25 39 1), may also (as we can see from a careful observation of these passages) have been used in the sense of traders. On the other hand there is no provable connection (tempting as it might be to suppose one) between עָרַב in its sense 'to do trade' (see below) and עֲרָב 'Arabians.'

(*b*) *Names for Traders and Trade in General.*—For these the Hebrews used four terms, the radical meaning of all of which was the same: viz., 'to go about':—סחר, רכל, תור and שׁוּר. Of these the first three when applied to trading are practically synonymous.

1. *s-ḥ-r*, סחר (cp Assyr. *saḫâru* 'to turn round'; Syr. 'to go about as a beggar': in MH 'to go about as a pedlar'), in the OT used exclusively (with metaphorical applications) of travelling, making circuits or tours, for trade: Gk. ἐμπορεύεσθαι by which 𝔊 renders it.[1] Gen. 42 34 (JE) of the right to trade in Egypt granted by Joseph to his brethren, Gen. 34 10, 21 (P?): סְחָרוּהָ 'traverse, or trade in, it'—*i.e.*, the land. Jer. 14 18: metaphorical of prophet and priest, 'trafficking' (𝔊 ἐπορεύθησαν). The pt. *sōḥēr* (סֹחֵר) is one of the usual terms for 'merchant,' 𝔊 ἔμπορος. Gen. 37 28 (JE) 'men, Midianites, *merchants*.' 1 K. 10 28 (‖ 2 Ch. 1 16) סֹחֲרֵי הַמֶּלֶךְ: either the Israelite agents through whom Solomon did trade with the N. Syrian Muṣri and Ḳuë, or (more probably) horse-dealers of those lands who traded with his agents; cp Is. 47 15 סֹחֲרַיִךְ not 'thy native merchants' but 'those (foreigners) who trade with thee,' Babylon (cp 𝔊). Ez. 27 36: 'the merchants among the peoples'; 38 13: 'the merchants of Tarshish'; 2 Ch. 9 14: 'the chapmen and merchants.' Other phrases:—Ez. 27 21: 'the merchants of thy hand'; Gen. 23 16 (P): 'money current with the merchants' (כֶּסֶף עֹבֵר לַסֹּחֵר); cp KESITAH; Prov. 31 14: אֳנִיּוֹת סוֹחֵר (*sic*) 'a merchant-ship'; Is. 23 2: 'the merchants (𝔊 μεταβόλοι) of Sidon that pass over the sea.' The fem. pt. *sōḥĕreth* (סֹחֶרֶת) is used of cities, etc.—Tarshish, Aram, Damascus—trading with Tyre; Ez. 27 12 16 18. Derivatives:—(*a*) סַחַר: Is. 23 3 18; 45 14 RV 'mart' and 'merchandise,' but (cp the parallel אֶתְנַן in 23 18) more probably 'profit,' cp Prov. 3 14, 31 18.[2] For *misḥar* (מִסְחַר in constr.), 1 K. 10 15, taken by the lexicons as a separate word, Klost. reads מִסְחַר. (*b*) *sĕḥōrāh* (סְחֹרָה), 'trade,' is used collectively of 'traders': Ez. 27 15.

2. *rākal*, רכל (cp רגל 'to march' or 'go about': Aram. רוֹכְלָא, Syr. *rakkālā*, 'travelling merchant,' 'pedlar') is also used in the OT of trade exclusively. The pt. *rōkēl* is synonymous with *sōḥēr*, but, except in 1 K. 10 15, is found only in later writers:[3] Ez. 17 4: 'a city of merchants' (עִיר רֹכְלִים)—*i.e.*, Babylon; 27 13 15 17 22-24 (of various nations trading with Tyre); Cant. 3 6, 'powder of the merchant'; Neh. 3 31 *f.*: 'the house of the Nethinim and of the merchants': this was opposite the Gate Ham-Miphḳadh (see JERUSALEM, § 24 [10]). The fem. pt. *rōkéleth* is used in Ezek. 27 20 (of Dedan) 23 (collectively of five peoples: omit רֹכְלֵי שְׁבָא). Although the root רכל (like רגל) was used as in רָכִיל = slander (cp MH רְכִילוּת) in a bad sense, there is no reason for supposing that any derogatory meaning was intended by its employment for trading. Deriv.:—(*a*) *rĕkullāh*, 'trade': Ez. 26 12, 28 5 16 18. (*b*) *markōleth* 'market': Ez. 27 24 (but see Cornill).

3. *tūr*, תּוּר (Assyr. *târu* 'to turn' *refl.*; Ar. *tāra*, 'to go about') is used in the OT in Kal of exploring a land, Nu. 13 2 etc.; in Hiph. of exploring or spying, Judg. 1 23 (J). Cp SPIES. The pt. ḳal in the phrase אַנְשֵׁי הַתָּרִים is used of traders parallel with רֹכְלִים, 1 K. 10 15, and with סֹחֲרִים, 2 Ch. 9 14.

4. שׁוּר, Targ. 'to run' (Ass. *šâru*, 'to go about'; Ar. *sāra*, 'to go about' esp. in trading caravans). Is. 57 9: 'thou didst travel with ointment' (but see 'Isaiah,' *SBOT*, note to Is. 57 9, where existence of the verb שׁוּר is denied); Ez. 27 25: 'ships of

---

1 These have been alluded to already, § 13.

1 [On 1 K. 10 28, cp MIZRAIM, § 2 *a*; also throughout cp *Crit. Bib.*]

2 Similarly in modern E. Syriac *bâzâr* means both 'trade' and 'profits'; Maclean, *Dict. of Vernac. Syr.* [1901].

3 [On the difficult phrase in 1 K. 10 15 cp SOLOMON, § 10, SPICE MERCHANTS; on Neh. 3 31 *f.*, MERCHANT, 2, and *Amer. Journ. of Theol.*, July 1901 ('Nethinim' = 'Ethanites,' and rōkĕlīm = Jeraḥme'elim); see also *Crit. Bib.*]

Tarshish were שָׁרוֹתַיִךְ,' RV 'thy caravans,' but Cornill reads שֵׁרְתוּךְ, 'served thee.'

With these we may take the following terms signifying way or going as applied to trade or business.

(1) *dérek*, דֶּרֶךְ. Is. 58 13, עָשָׂה ד׳=to do business;

(2) *hălīkāh*, הֲלִיכָה, 'caravan' (but perhaps metaph.: lit. 'going'; also procession): of Sheba, Job 6 19; cp Bibl. Aram. הֲלָךְ, 'way-money,' toll, Ezra 4 13, etc.

(3) *'ōrĕḥah*, אֹרְחָה, 'caravan' always of merchants, Gen. 37 25, or of mercantile tribes; Is. 21 13: Dedan; Job 6 18 *f.*: Tema. *'Ōrēăḥ*, אֹרֵחַ, the pt. is used of travellers in general: Jer. 9 1 [2] מְלוֹן אֹרְחִים (but Giesebrecht after 𝕲 אַחֲרוֹן [cp also *Crit. Bib.*]), a 'caravanserai.' אֲרֻחָה=provision for journey: נסע and מסע refer to the journeys of nomads' camps (cp TENT, § 2); he who prepares the camping ground, the quarter-master, שַׂר מְנוּחָה, Jer. 51 59. [But see SERAIAH, 4.]

(*c*) *Merchants' Quarters.*—Travelling merchants took up their quarters in special parts of the towns to which they took their goods.

ḥūṣōth, חֻצוֹת, 'streets' or 'bazaars,' were what Ben-hadad's father was allowed by treaty to build in Samaria, and Ahab in Damascus (1 K. 20 34), probably for their merchants; cp the 'bakers' street' in Jerusalem, Jer. 37 21. The MAKTESH (*q.v.*, cp also JERUSALEM, col. 2424) appears to have beeen a quarter of the city where the כנענים or 'merchants' (?) resided (Zeph. 1 11). For 'the house of the merchants' see above, under רֹכְלִים; for the fish-, sheep-, and horse-gates see JERUSALEM, § 24, coll. 2424 *ff.* For market see מַרְכֹּלֶת above (*b* 2 [*b*]); for caravanserai, מְלוֹן אֹרְחִים, see *b* (3).

(*d*) *Trading Companies.*—There is no mention of these in the OT; but we can hardly doubt that they existed.

(1) *ḥéber*, חֶבֶר, 'a company of priests for robbery,' Hos. 6 9; 'a house held by a number of people,' Pr. 21 9 25 24 (but Gk. and Toy read רחב). (2) *ḥabbār*, חַבָּר, 'a guild' or 'society' of fishermen, Job 40 30 [41 6], (cp Phœn. חבר and Assyr. *ebru*, 'a comrade').[1] (3) *mišpāḥāh*, מִשְׁפָּחָה, lit. 'family,' or 'clan'; but 'a guild' of scribes, 1 Ch. 2 55; 'of linen workers,' 4 21.

(*e*) *Various Processes included under Trade.*

1. Barter and exchange. (1) נָתַן בְּ, 'to give one thing for another,' Joel 4 [3] 3 (בְּ before the object taken in exchange; cp Lam. 1 11), Ezek. 27 13 (בְּ before the object given in exchange), 16 (בְּ before both objects), 14 (without בְּ; both objects in the acc.); cp Dt. 14 25, 'to give for money': בַּכֶּסֶף; Ps. 15 5, 'for interest': בְּנֶשֶׁךְ. (2) The antithesis of נָתַן is לָקַח; and so in Neh. 10 32, מַקָּחוֹת (Ba. מַקּ״), lit. 'things to be taken,' are 'wares for sale'; cp Talmud מַקָּח or מִקַּח, buying' or 'article bought.'

(3) מוּר, 'to exchange', does not appear in the OT in the sense of barter (Lev. 27 10 33, the substitution of one beast for another; Ezek. 48 14, of one piece of land for another); yet the fact that the Syr. *mūr* means 'to import victuals' proves that at one time among the Aramæans it was used in the sense 'to barter.' Deriv. תְּמוּרָה, 'exchange,' Ru. 4 7, Job 28 17; 'the thing exchanged,' Lev. 27 10 33 (P); 'gain' or 'profit' as a result of trade, Job 20 18; also 'compensation,' 15 31.

(4) Nor does חלף, 'to exchange,' appear in the OT for barter; yet חֵלֶף is used twice: Nu. 18 21 31 (P) in the sense of 'returns,' 'rewards *for*' service rendered; and Hoffmann (*Phöniz. Inschriften*, 20) gives חלפת as = equivalent (in exchange); (Bloch, *Phön. Gloss.*) 'payment,' לשלם ח׳, 'to reward.' (5) עָרַב, usually 'to pledge' (see below, 3 [6]), is used in Ezek. 27 9 27 as='to exchange.' In other Sem. languages it is to 'furnish security,' or 'to pledge.' The original meaning seems to be to mix or 'mingle,' as in NT, Aram., Syr., and Heb. Hithpael; yet this may be a secondary meaning, through 'having intercourse with. Deriv. מַעֲרָב, sg. and pl. 'wares.' (6) It is possible that the difficult עִזָּבוֹן (see below, 7 [8]) in Ezek. 27 means 'exchange.'

2. Bargain, contract, etc. (1) The very wide use of *bĕrīth*, בְּרִית, to express a 'covenant' between men (see COVENANT), and its application in Job 40 28 [41 4] to an engagement between master and servant, are evidence of the probability of its employment for business contracts;[2] (2) *ḥāzūth*, חָזוּת, is used in Is. 28 18 as a synonym for בְּרִית; cp חזית in Levy, *NHWB*. (3) *tĕšūmeth yād*, תְּשׂוּמֶת יָד, Lev. 5 21 [6 2] (P), lit. 'something

[1] In MH the root is used apparently only of societies for religion or learning. See further HANDICRAFTS, col. 1955.

[2] Yet in MH it seems to be used only in a theological sense.

TRADE AND COMMERCE

placed in the hand' or 'trust' of another, is translated by EV 'bargain': 𝕲 κοινωνία.[1] (4) *dābhār*, דָּבָר, 'affair,' in Ruth 4 7 in sense of transaction; לְקַיֵּם כָּל־דָּבָר, 'to confirm any transaction.' (5) This confirmation, in cases in which the object bought and sold could not be handed over, appears to have been symbolised by the seller drawing off his shoe or sandal, שָׁלַף נַעַל, Ruth 4 7 *f.*; cp Dt. 25 9 *ff.*; where it symbolises the giving up of one's right; WRS *Kin.* 269. Cp RUTH, SHOE; also, for a similar action among the Arabs, Burton, *Land of Midian*, 2 197; and Goldziher, *Abhand. z. Arab. Philol.* 1 47 (quoted by Buhl, *Die social. Verhältnisse der Israeliten*, 94, n. 2). The antithesis 'to take possession' was symbolised by 'throwing one's shoe over' the object, Pss. 60 10 [8] 108 10 [9]. (6) *tĕ'ūdāh*, תְּעוּדָה, 'attestation,' Ruth 4 7. (7) In Jer. 32 9 *ff.* we find another mode of conveyance (which probably displaced the primitive one just noticed). A deed of sale (סֵפֶר הַמִּקְנָה) was signed by the buyer כּוֹתֵב בַּסֵּפֶר, and witnesses were called who also signed. The deed was in two copies, one sealed (הֶחָתוּם), and one open (הַגָּלוּי), and placed in an earthen vessel; cp Johns, *op. cit.* 34. 'The terms and conditions of the sale' (?)=הַמִּצְוָה וְהַחֻקִּים. (8) 'They strike hands,' Is. 2 6, יַשְׂפִּיקוּ; espec. if with Hi. and Du. we read בידי for בילדי. But see Che. *SBOT* 'Isaiah,' and Ges.-Buhl, *Lex.*(12) *s.v.* שׂפק.

3. Buying and selling. The commonest words are *ḳānāh*. קנה, and *mākar*, מכר, Is. 24 2; כַּקּוֹנֶה כַּמּוֹכֵר, 'like buyer like seller'; Ezek. 7 12, cp Zech. 11 5. (1) *ḳānāh*, lit. 'to make, or obtain,' is applied to purchasing either with בַּכֶּסֶף, Am. 8 6 Is. 43 24, or alone, Gen. 39 1, 𝕲 ἐκτήσατο (JE); 2 S. 12 3 Jer. 13 1 19 1 32 7 *ff.* 15 43 Gen. 49 30 50 13 (both P). Also in a more general sense of purchasing a Hebrew slave through his falling into one's debt; Ex. 21 2 (JE). Also metaphorically; Ex. 15 16 Is. 11 11, etc.; *ḳōneh*, 'the buyer,' Is. 24 2 Ezek. 7 12, is used also as owner, Is. 1 3. Bib. Aram. קְנָא, 'to buy,' Ezra 7 17. Deriv.:—(*a*) *miḳneh*, but only in sense of 'property,' cattle (Ex. 10 26, etc.) or land (Gen. 49 32, κτῆσις); cp CATTLE, § 8 end. (*b*) *miḳnah*, besides meaning 'possession' is used for 'sale'; סֵפֶר הַמּ״ =deed of sale, Jer. 32 11 *ff.*; or object sold מִקְנַת כֶּסֶף, 'a purchased slave,' Gen. 17 12 *f.* 23 (ἀργυρώνητος), Ex. 12 44; or 'purchase-price,' Lev. 25 16 (ἔγκτησις) (all P); also כֶּסֶף מִקְנָתוֹ, Lev. 25 51, 'the money for which he was bought' (ἀργύριον τῆς πράσεως αὐτοῦ). (*c*) *ḳinyān*, 'property' in widest sense; קִנְיַן כַּסְפּוֹ, 'the produce of his money' (ἔγκτητος ἀργυρίου), Lev. 22 11 (P_h).

(2) *mākar*, 'to sell,' with בְּ *pretii*: of selling persons; Gen. 31 15 (JE), 𝕲 πέπρακεν; of selling a bride; so also the Aram. *mĕkar*, or men and women as slaves, Gen. 37 27 *f.* (𝕲 ἀποδίδωμι), and Ex. 21 7 (JE), Ps. 105 17 Ezra 7 4; cattle, Ex. 21 37 [22 1] (JE), Lev. 27 27 (𝕲 πραθήσεται, P); land, Lev. 25 23 34 (etc., P); birthright, Gen. 25 31 (JE); land, Ezek. 7 12 *f.*, or any property, Lev. 25 25 27, or any wares, Neh. 13 16. So generally, *mōkēr*, 'seller,' Is. 24 2. The same general sense attaches to מכר in Phœn., MH and Assyr.; in the latter *damgaru* or *tamkaru*, Syr. *taggārā*,[2] = 'merchant,' Del. *Ass. HWB*, 222. Derivv.:—(*a*) *méker*, 'price' or 'value,' Nu. 20 19 (JE); cp Pr. 31 10; also 'wares' or 'things for sale,' Neh. 13 16. (*b*) *mimkār*, 'act of sale'; Lev. 25 27, 𝕲 πρᾶσις, 29 50, etc.; 33 (בַּיִת מ״='house that was sold'), or 'thing sold,' 25 25 Ezek. 7 13; or 'wares for sale'= מֶכֶר, Neh. 13 20. (3) *kārāh*, כרה, 'to buy,' Dt. 2 6, μέτρῳ λήμψεσθε, Hos. 3 2 Job 6 27, 'to make merchandise of a friend' or 'haggle,' 40 30 [41 6] with עַל. Acc. to Talm. *R. haSh.*, *kīrah* was used on the coast, Levy, *NHWB* 2 323; Ar. *karā*= to hire, *kirā*, 'wage.' (4) *mĕḥīr*, מְחִיר, 'price' or 'payment, 2 S. 24 24 1 K. 10 28, בִּמְחִיר; 1 K. 21 2, כֶּסֶף מְחִיר; cp Pr. 17 16 27 26; also 'wage,' Dt. 23 19 [18] Mi. 3 11; cp the phrase לֹא רִבִּיתָ בִּמְחִירֵיהֶם, 'thou hast not gone high with their price,' Ps. 44 13; Pr. 22 16 appears to have a different sense. Assyr. *maḫīru*, cp Del. *Prol.* 93, *Ass. HWB* 400, 404, from *maḫâru*, 'to be opposite'—*i.e.*, mutual. כֶּסֶף alone means price, Gen. 31 15, 'the money paid for us.' (5) *māhar*, 'to buy a wife,' 𝕲 φερνιεῖ; Ex. 22 15 [16]. Deriv. *mōhar*, 'price of a wife,' Aram. *mōhărā*, Syr. *mahrā*, Ar. *mahr* (MARRIAGE, § 1). (6) *šābar*, שָׁבַר, 'to buy corn'; Gen. 41 57 42 5 47 14, 𝕲 ἀγοράζειν, 42 2, 𝕲 πρίασθε; 'to buy victuals,' with *'ōkel* (אֹכֶל), Gen. 42 7 10, etc., Dt. 2 6. Hi. 'to sell corn,' 𝕲 ἐπώλει, Gen. 42 6 (𝕲 ἐμπολᾶν ἐμπορεύεσθαι) Am. 8 5 *f.*; with אֹכֶל, Dt. 2 28, 𝕲 ἀποδώσῃ. (7) *pādāh*, פדה, 'to buy free' or 'ransom,' 𝕲 λυτρόω, Ex. 34 20 (JE); 13 13 (P); Dt. 7 8, etc., Ar. *fadā*, Assyr. *padû*, 'to buy free.' Eth. to 'pay.' Derivatives *pidyōm*, *-n*, *pĕdūyīm*, 'ransom money.' (8) *gā'al*, גָּאַל, 'to redeem.' Barth, *Etym. St.* 18, gives Ar. *ju'ālat*, 'price.' Derivative *gĕ'ūlāh*, usually

[1] שׁוּם in MH is 'to appraise,' 'value.'

[2] [So Jensen, *ZA* 6 349; for another view of the derivation of the Syriac see Nöld. in Fraenkel's *Aram. Fremdw.* 181 *f.*]

'redemption,' but also, Lev. 25 51, 'the sum paid.' 𝔊 τὰ λύτρα. (9) *kōpher*, כֹּפֶר, 'quit-money,' 𝔊 λύτρον. (10) Bibl. Aram. *zeban*, זְבַן, 'to buy,' is used metaphorically, Dan. 2 8; found also in MH, Targums Nab., Palm., and Syr. Supposed to be from Assyr. *zibānītu*, 'balance' (see Ges.-Bu.). Ar. *ṯaman*, 'price' 'value' (Spiro, *Ar. Eng. Vocab.*).

4. Hiring, lending, pledging.

(1) *sākar*, שָׂכַר, 'to hire,' with בְּ *pretii* (μισθοῦσθαι), mercenary troops, Judg. 9 4 2 S. 10 6 1 Ch. 19 6 *f.* 2 Ch. 25 6; a priest, Judg. 18 4; a workman, Is. 46 6 2 Ch. 24 12; a husband, Gen. 30 16; cp Pr. 26 10 [Heb.]. Ar. *šakara* = 'to thank.' Derivatives:—(*a*) *śeker*, 'wage,' Pr. 11 18. עֹשֵׂי שֶׂכֶר, 'makers of wages,' Is. 19 10. (*b*) *śākār*, the commoner word for 'wage,' 𝔊 μισθός. Gen. 30 28 32 *f.* 31 8, etc. (JE); Ezek. 29 18 (metaph.); 'hire,' for an article, Ex. 22 14 [15] (JE); for man and beast, Zech. 8 10. (*c*) *śākīr*, 'let on hire'; cattle, Ex. 22 14 [15]; persons, Ex. 12 45 Lev. 22 10 25 50 (all P), Dt. 15 18 24 14 Mal. 3 5 Job 14 6, etc.; mercenaries, Jer. 46 21. Note that the hirer asks the servant what his wage will be, Gen. 29 15 30 28; yet the master changes the wages, 31 7 41. The wages are here in kind. (*d*) *maśkōreth*, 'wage,' Gen. 29 15 31 7 41 (JE), 𝔊 μισθός; Ruth 2 12 (metaph.); cp Ass. *iškar*, Johns, *op. cit.* 360. Other words for wage are *pō'al*, פֹּעַל, *pĕ'ullah*, פְּעֻלָּה.

(2) *lāwāh*, לוה, 'to borrow,' δανίζειν הִלְוָה, 'to lend,' Dt. 28 12 Is. 24 2; כַּמַּלְוֶה כַּלֹּוֶה, Pr. 22 7, etc., Ex. 22 24 [25] (JE [ἐκδανίζειν]), Ps. 37 21 112 5 (κιχρᾶν) Neh. 5 4. In MH לוה = 'lend'; Ar. *lawā*, 'to delay payment of debt.' (3) *nāšāh*, נשה, and נשא, 1 S. 22 2 Is. 24 2, etc., 'to lend,' Is. 24 2 Jer. 15 10 Dt. 24 11 Neh. 5 7 10 (with כֶּסֶף), 11 (with other goods). The *pt. Ḳal* = 'creditor,' Ex. 22 24 [25] (JE with bad signification). 𝔊 ὁ δανειστής (in Ex. κατεπείγων). Ar. *nasa'a*. The use of the Aram., Syr., and Ar. cognates and the Heb. use of Ḳal (once Lam. 3 17), Niph., and Hiph. in the meaning 'to forget,' proves the origin to lie in delaying payment. Yet Ass. *ittiši* = 'to take,' Johns 36 10 *ff.* Derivatives:—(*a*) *nĕšī*, 'debt,' 2 K. 4 7, τοὺς τόκους σου. (*b*) *maššā*, 'usury,' acc. after נשא, Neh. 5 7; cp 10; 'debt' or 'exaction of debt.' (4) שׁאל, 'to borrow.' (5) נָתַן בְּנֶשֶׁךְ, Ezek. 18 17, etc., 'to lend on interest.' (6) לָקַח תַּרְבִּית, parallel phrase, Ezek. 18 8, etc. On borrowing and lending, see LAW AND JUSTICE, § 16. (7) עבט, (8) חבל, Ass. *ḥabulu* = 'interest,' (9) ערב, 'to pledge.' See PLEDGE. (10) תָּקַע, Niph., is to 'pledge oneself as security for another by striking hands,' Job 17 3.

5. Debt.

(1) *ḥōb*, חוֹב, 'debt,' Ezek. 18 7 (Co. שׁוּב), Syr. *ḥaubĕthā*, Ar. *ḥāba*, 'to be in debt'; cp Pi. 'to make guilty,' Dan. 1 10. (2) מַשָּׁא, Neh. 10 32 [31]; (3) מַשָּׁאָה, Dt. 24 10 Pr. 22 26; (4) מַשֶּׁה, Dt. 15 2, 'debt'; בַּעַל מ״, 'creditor.'

6. Payment, reckoning, etc.

(1) *šāḳal*, שָׁקַל, lit. 'to weigh,' Ezra 8 25 *f.* 29, so 'to pay' with כֶּסֶף, Ex. 22 16 [17] (JE); Gen. 23 16 (P), 2 S. 18 12 Is. 55 2 Jer. 32 9; with כִּכַּר־כֶּסֶף, 1 K. 20 39; or with שָׂכָר, Zech. 11 12. שׁקל is used with עַל יְדֵי ,לְ ,עַל כַּפֵּי (of persons), and עַל (of treasuries, Esth. 4 7). Phœn. שקל, 'a weight,' Aram. תקל, Ass. *šaḳālu*, 'to weigh,'—the last also 'to pay.' See MONEY, SHEKEL, WEIGHTS AND MEASURES. (2) *nāśā'*, נָשָׂא, is used poetically of weighing, Job 6 2. (3) *neḥšab* (חשב in Niph.), of 'the reckoning' of money, 2 K. 22 7. (4) *mānāh*, מָנָה, 'to count' is used of money, 2 K. 12 11. Deriv. MANEH (*q.v.*). (5) The root *kāsas* (*kas*) כסס, 'to count' (Ex. 12 4) is used commercially in the deriv. *miksāh*, 'sum' or 'value,' Lev. 27 23. Del. (*Ass. HWB*, 407) gives *miksu* as 'toll' or 'duty.' Heb. *mékes* is used only of tribute to Yahwè, Nu. 31 28 37 41.[1] (6) *sāphar*, ספר, may have been used of the counting of money; cp Is. 33 18. (7) *šillēm*, שִׁלֵּם, lit. 'fulfil,' is used of 'repayment' of debt, 2 K. 4 7; Ass. *salamu* = 'to pay.' (8) On *késeph*, כֶּסֶף, see MONEY, SILVER. It is used in the sense of 'price,' כֶּסֶף הַשָּׂדֶה, Gen. 23 13 (P); cp above under מִקְנָה. (9) *ḳĕśīṭāh*, קְשִׂיטָה, see KESITAH. (10) *kikkār*, כִּכָּר, see TALENT. (11) *'ăgōrāh* (אֲגוֹרָה), in constr. before כֶּסֶף, 1 S. 2 36, is usually taken after 𝔊 (ὀβολοῦ ἀργυρίου) and Tg. as 'a small coin'; but Syr. *aggīrtā*, 'payment' and Ar. *'aggar*, 'to let' or 'to hire,' *'ugra*, 'wages.' (12) *'ethnan*, אֶתְנַן, usually of a 'harlot's' wage, but applied in Is. 23 18 to the profits of Tyre's trade; perhaps metaphorical, but the original general meaning of the word makes it possible that the commercial application of it was direct. In Ezek. 16 41 the tribute which Israel pays to foreign idols or nations (?). For other terms see above, under *Buying and Selling*, 3.

7. Profit, gain, etc.

(1) *hō'īl* (Hiph. of יעל), 'to profit,' in a general sense, Job 21 15 35 3; except (perhaps) in Is. 47 12 it is not used of commercial profit. (2) יתר, 'to be over.' Derivv.:—(all late words), (*a*) *yithrōn*, Eccles. 1 3, etc., 'profit,' in general, MH *yuthran*; (*b*) *yōthēr*, 'profit,' Eccles. 6 8 11; (*c*) *mōthār*, 'profit,' Pr. 14 23 of labour, 21 5. (3) עָשַׁר, 'to be rich.' Deriv. עָשָׂה עֹשֶׁר, 'to make riches,' Jer. 17 11.[1] (4) *hōn*, הוֹן, 'riches,' 'goods,' Ezek. 27 12 18 33 and Pr. (5) *ḥáyil*, חַיִל, 'substance' or 'wealth,' עשה ח׳, Dt. 8 17 *f.* Ezek. 28 4. (6) *nĕkāsīm*, נְכָסִים, 'wealth' of various sorts, Josh. 22 8 (D), 2 Ch. 1 11 *f.* See CATTLE, § 8, end. (7) *rākaš*, רָכַשׁ, 'to gather,' and *rĕkūš*, 'substance' or 'goods,' in general; Gen. 12 5, 𝔊 τὰ ὑπάρχοντα αὐτῶν ὅσα ἐκτήσαντο, and frequently elsewhere in P, also in Ezra and Ch. Of the royal property, 1 Ch. 27 31 28 1 2 Ch. 31 3 35 7. (8) *'izzābōn*, עִזָּבוֹן, in Ezek. 27 12 14 etc. means 'wares,' but in *v.* 27 it is parallel to *hōn*. Hoffm. *Phön. Inschr.* 15 gives the original meaning as 'produce' or 'results of trade,' from עזב = עצב. The Assyr. *ezēbu* is 'to leave over,' *uzub(b)u*, 'a payment.' See also above, under סַחַר ,מִקְנֶה ,קִנְיָן ,מְחִיר ,תְּמוּרָה ,אֶתְנָן. (9) *bāṣa'*, בצע, lit. 'to break off,' 'take unjustly,' Pr. 1 19 15 27 Ezek. 22 12 27, Pi. 'to finish' a work, Is. 10 12, etc. Deriv. *béṣa'*, generally of 'violent' or 'unjust gain,' Judg. 5 19, taken in war, 1 S. 8 3 (𝔊 τῆς συντελείας, EV 'lucre'), Ezek. 22 27 (RV 'dishonest gain'), Pr. 15 27, cp Is. 57 17 Ezek. 22 13. But 'profit' in general, Gen. 37 26 (JE), 𝔊 χρήσιμον. Cp above, § 61. (10) *'ōšeḳ*, עֹשֶׁק, 'unjust gain,' Eccles. 7 7.

8. Value, valuation, etc.

(*a*) Prepositions.—(1) בְּ *pretii*, in the giving of one thing 'for' another. (2) כְּפִי ,לְפִי ,עַל־פִּי, 'according to the number' or 'the rate of.' (3) עֵקֶב, 'for' a reward, Is. 5 23; cp עֵקֶב, Pss. 40 16 70 4. Phön. עקב, 'profit,' 'reward.' (4) בַּעֲבוּר, Am. 2 6.

(*b*) Verbs, nouns, adjectives.—(1) *'ārak*, עָרַךְ, 'to compare,' also 'to equal in value'; Job 28 17 19. Hi. 'to tax,' 2 K. 23 35, 'to value' (𝔊 ἐτιμογράφησαν), Lev. 27 8 12 14, 𝔊 τιμήσεται. Deriv.:—*'érek*, 'valuation,' for purposes of royal taxation, 2 K. 23 35 (𝔊 συντίμησις), or for priestly sacrifices and fines, Lev. 5 15 18 25 [6 6] 27 2 *ff.* 12 16 *f.* Nu. 18 16 (𝔊 τιμή, συντίμησις, etc.); 'the sum at which a thing is valued,' Lev. 27 13 18 23 27 (𝔊 τιμή, συντίμησις); this is also rendered by כֶּסֶף עֶרְךְּ, *vv.* 15 19, and by מִכְסַת עֶרְךְּ, *v.* 23. Note that the valuation was made at the sanctuary; cp above, § 24 n. (2) *sillah*, סלה (only in Pu'al), 'to weigh,' rightly rendered 'to value,' by EV Job 28 16 19. (3) *gādal*, גָּדַל, constr. with בְּעֵינֵי, 'to be worthy in mine eyes' (EV 'much set by'), 1 S. 26 24 parallel to יקר in *v.* 21 (𝔊 ἐμεγαλύνθη); *giddēl* was probably used of 'setting a high value on' anything, cp Job 7 17. (4) *yāḳar*, יָקַר, 'to be valuable' or 'dear,' 1 S. 26 21 (𝔊 ἔντιμος); also 'to be valued at. Derivv.:—*yĕḳar*, 'price,' Zech. 11 13, הַיְקָר אֲשֶׁר יָקַרְתִּי מֵעֲלֵיהֶם, *yāḳār*, 'valuable,' 'dear,' and *yakkīr*. (5) *rāḥōḳ*, רָחוֹק, 'far,' is used metaphorically in Pr. 31 10 of value; EV 'far above rubies.' (6) *maḥmād*, מַחְמָד, anything 'desirable'; pl. applied to 'costly things,' Hos. 9 6, silver, Is. 64 10 [11] Joel 4 [3] 5 2 Ch. 36 19 Lam. 1 10—all of the costly vessels and treasures of the temple. (7) אֶבֶן חֵן, 'costly stone,' Pr. 17 8. (8) חֵפֶץ, in pl. 'costly things' Pr. 3 15 8 11; אַבְנֵי ח״, 'precious stones,' Is. 54 12. (9) מִגְדָּנוֹת, 'costly things,' Gen. 24 53 (JE), but 𝔊 δῶρα, Ezra 1 6 (𝔊 ξενίοις) 2 Ch. 21 3 (𝔊 ὅπλα) 32 23 (𝔊 δόματα). See also above, under מְחִיר.

(*f*) *Customs, dues, toll, etc.*

(1) In Gen. 43 11 (JE), Israel commands his sons, going to buy corn in Egypt, 'to take a *minḥah*, מִנְחָה, or 'present' to the governor of the land; elsewhere *minḥāh* is applied to sacrificial 'offering' and political 'tribute'; see SACRIFICE, § 30. (2) *middāh*, מִדָּה, Heb. of 'tribute' or 'tax' to the king, Neh. 5 4; Bibl. Aram. מִדָּה or מִנְדָּה, Ezra 4 13 20 7 24, 'dues' or 'customs,' cp 6 8. This term is said to be borrowed from Assyr. *mandattu*, 'tribute,' from *nadan*, 'to give' (Del. *Ass. HWB*, 451), but cp *nadītu*, 'deposit,' 'treasure.' (3) *bĕlō*, בְּלוֹ, Bibl. Aram. Ezra 4 13 20 7 24, 'customs' or 'dues.' Assyr. *biltu*, 'tax.' (4) *hălāk*, הֲלָךְ, Bibl. Aram. Ezra, *id.* 'way-money,' 'toll.' See further, TAXATION, § 7 *n.*

(*g*) *Deposit, banking, hoarding, etc.* See DEPOSIT, etc.

(1) לִשְׁמֹר . . נתן, 'to give to keep' money, tools, garments, or any beast, Ex. 22 6-12 [7-13], (E). (2) *pāḳad*, פָּקַד, 'to store' or 'deposit,' 2 K. 5 24 of money, etc. Hi. 'to lay up' a roll or baggage, 'to commit' people to any one, 'to muster.' Ho. 'to be deposited' of money or other property, Lev. 5 23 [6 4], (P). Deriv. *piḳḳādōn*, 'store' of corn, Gen. 41 36, (JE), 'deposit' of money or other property, Lev. 5 21 23 [6 2 4], (P);

---

[1] [In Aram. *maksā*, 'tribute,' *mākēsā*, 'tax-collector.']

[1] עשה is also used with חיל and זהב וכסף, Ezek. 28 4.

𝔊 παραθήκη. (3) תְּשׂוּמֶת, Lev. 5 21 [6 2], is 'trust' or 'deposit' parallel to פִּקָּדוֹן; see above *e* 2 (3). (4) In the east the hoarding of money is common and in Heb. this is *maṭmōn*, lit. 'place where one hides' or 'hoards,' Jer. 41 8, pits for 'storing' corn, oil, honey (cp Ar. *ghabāghib*); Gen. 43 23 (JE), 'money' (𝔊 θησαυρούς), cp Pr. 2 4 Job 3 21. מַטְמוֹן is one old derivation of MAMMON (*q.v.* § 4 3), recently favoured by Deissmann. Banking is not mentioned in OT, where one individual lends money to another. But we saw that in the Roman period the temple contained, besides the sacred revenues, sums deposited by private individuals (§ 78); cp the gate HAMMIPHKAD, close to Temple. See also Johns, *op. cit.* 3 254.

(*h*) *Various other terms.*

(1) *'ābad*, עָבַד, 'to work' (used frequently (*a*) of cultivation, (*b*) of serving as slave, (*c*) of working by means of another; עָבַד בְּ, Lev. 25 39, (P), Jer. 22 13, etc.) is not applied in the OT to commercial business, nor is the deriv. *'ăbōdāh* (all other kinds of work). Bibl. Aram. *'ăbīdā* is 'work,' Ezra 4 24, etc.; and state 'business,' Dan. 2 49 3 12.

(2) *mal'ākāh*, מְלָאכָה, 'work' or 'business' (lit. 'mission'), Gen. 39 11 Ex. 20 9 *f.* (JE) cstr. with עָשָׂה, cp Neh. 2 16; of handiwork, Jer. 18 3 2 K. 12 12 [11]; of the superintendents of royal treasures, Esth. 3 9 9 3; also of worked articles, Lev. 13 48; מְ׳ עוֹר, 'leather-work,' in Ex. 22 7 10 [8 11], 'goods,' 'possessions.'

84. Literature. Besides the works cited in the course of the article, the student may consult on (*a*) the trade of the Jews, Herzfeld, *Handelsgesch. der Juden* (not seen); the brief summaries in Benzinger and Nowack's manuals of Hebrew Archæology; Bennett, art. 'Trade' in Hastings' *DB*; several works given under DISPERSION. (*b*) for the Persian and Greek periods, Rennell's *Illustrat. of Hist. of Exped. of Cyrus*, etc. (1816); Sayce's *Herodotus*. World under Roman Sway*; Hausrath, *NT Zeitgesch.*; Ramsay, *St. Paul the Traveller and Roman Citizen*. Consult also Tozer, *Hist. of Ancient Geog.* See W. W. Hunter, *Hist. of British India*, vol. i.

G. A. S.

TRADITION (παράδοσις), Mt. 15 2 etc. See SCRIBES, § 6.

TRAGACANTH (נְכֹאת) Gen. 37 25 RVmg. See STORAX.

TRANCE (1) Nu. 24 4 AV, and (2) Acts 10 10 (ἔκστασις); see PROPHECY, § 19 *b*.

TRANSFIGURATION. See SIMON PETER, § 8.

TRANSLATION (μετάθεσις), Heb. 11 5 [same word, but not used of change of *place*, in 7 12 12 27, also in 2 Macc. 11 24 †]. See ENOCH, § 1.

TRANSLATIONS OF SCRIPTURE. See TEXT AND VERSIONS.

TREASURE CITIES (עָרֵי מִסְכְּנוֹת), Ex. 1 11 AV, RV STORE CITIES (*q.v.*) [*f.*]); cp CITY.

TREASURER. The word renders:

1. A denom. verb of *ōṣār*, אוֹצָר, 'treasure,' in Neh. 13 13. See TREASURE-HOUSE, 1.

2. *sōkēn*, סֹכֵן, Is. 22 15; see SHEBNA.

3. *gizbār*, גִּזְבָּר, Ezra 1 8 (γασβαρηνου [B], γαρβ. [A], γανζαβραιου [L]), and in plur. Bibl. Aram. *ib.* 7 21 (γάζαι). The word is of Persian origin (*ganjabara*), and if a current restoration of a passage in an Egyptian-Aramaic papyrus be adopted, the first part of the word גנז[1] had already become Aramaised by at least the fourth century B.C. (*CIS* 2, no. 149 A, *l.* 3). According to Meyer (*Entst.* 23), Ges.-Buhl (*Lex.*(13)), and others, the word is identical with:—

4. The plur. *gĕdābĕrayyā*, גְּדָבְרַיָּא, Dan. 3 2 *f.* (𝔊? but γαζαρηνους, Symm. in Syr. Hex.). So also Bludau (*Alex. Uebersetz. Dan.* 98) who, moreover, takes the presupposed original גזבריא to be a gloss to דתבריא (cp COUNSELLOR, 2). An alternative view, that of Graetz, which is favoured by Bevan (*Comm.* 79), treats the word as purely a scribe's error for הדבריא (cp COUNSELLOR, 3), chiefly on the ground that the word recurs in the similar but much smaller lists of officials in Dan. 3 27 6 8. It is more plausible, perhaps, to suggest, with S. A. Cook, that הדבריא (the true meaning of which is quite obscure) is a corruption of the perfectly intelligible דתבריא. [See also *Crit. Bib.*]

5. οἰκονόμος, Rom. 16 23 RV, AV CHAMBERLAIN (*q.v.*).

TREASURE HOUSE, TREASURY, occur as the rendering of several Hebrew and Greek terms.

[1] Cp TREASURY, (3).

(1) אוֹצָר, *ōṣār* (√ 'to heap up'), 1 K. 7 51, etc., and בֵּית אוֹצָר *bēth 'ōṣār*, Neh. 10 39 [38] Dan. 1 2, with which

(2) בֵּית נְכֹתֹה, *bēth nᵉkōthōh* (2 K. 20 13 = Is. 39 2) is clearly a synonym (EV, by guess, 'the house of his precious things'; οἶκος τοῦ νεχωθα [in 2 K. τῆς ὑπάρξεως αὐτοῦ καὶ τοῦ ν. L, in Is. -τα ℵ*]). *Nĕkōth* is possibly an Assyrian loan-word; *bīt nakamti* = treasure-house, Del. *Prol.* 141; *ZDMG* 40 731; cp Haupt, *ZA* 2 266, who plausibly reads בֵּית נְכֻתָיו = *bit nakavâti* (for *nakamâti*, plur.). Very possibly too the same word should be read in Nah. 2 9 [10] (*i.e.*, נְכֹתֶיהָ for תְּכוּנָה, EV 'store').

(3) גַּנְזַךְ, *ganzak* (1 Ch. 28 11†; ζακχω [BA a?, see Sw.], ἀποθηκῶν [L]), like the NH גנזכה, perhaps Pers. origin with the addition of O. Pers. *ak* (Lag. *Ges. Abh.* 27). The simpler form occurs in Ezra 6 1 גִּנְזַיָּא, *ginzayyā*, EV 'treasures,' or in combination with בית in Ezra 5 17 7 20, EV 'treasure house' (𝔊BA γάζα; 𝔊L in 5 17 7 29 γαζοφυλάκιον; but it is used alone in the last-mentioned sense in Esth. 3 9 4 7[1] (γαζοφυλάκιον, γάλα [BNAL]), a usage which is paralleled by Gk. θησαυρός (treasure, store-house, casket, etc.).

(4) κορβανᾶς, Mt. 27 6 (cp Jos. *BJ*, ii. 9 4); see CORBAN.

(5) γαζοφυλάκιον, 1 Macc. 3 28 14 49 2 Macc. 3 6 *ff.* 4 42 5 18 Mk. 12 41 43 Lk. 21 1 Jn. 8 20; see TEMPLE, § 36 (*a*).

TREE OF KNOWLEDGE (עֵץ הַדַּעַת), Gen. 2 9, and **TREE OF LIFE** (עֵץ הַחַיִּים), Gen. 2 9; see PARADISE, § 11. **TREES, SACRED.** See NATURE-WORSHIP, § 2 *f.*

TRENCH 1. חֵיל, *ḥēl*, 2 S. 20 15, RV 'rampart.' See FORTRESS, § 5.

2. מַעְגָּל, *ma'gāl*, 1 S. 26 5 7; and 3. מַעְגָּלָה, *ma'gālāh*, 1 S. 17 20. See CAMP, § 1.

4. גֵּבִים, *gēbīm*, 2 K. 3 16 RV, AV 'ditches.' See CONDUITS, § 1 (3, 5).

5. תְּעָלָה, *tᵉ'ālāh*, 1 K. 18 32 *ff.*, 2 K. 18 17 20 20 Is. 7 3 36 2 Ezek. 31 4 Job 38 25. See CONDUITS, § 2.

6. יעזק, Is. 5 2, 'made a trench' RV, AV 'fenced.' See VINEYARD.

7. χάραξ, Lk. 19 43, RV 'bank,' RVmg. 'palisade.' Cp SIEGE, § 2.

TRESPASS-OFFERING (אָשָׁם), Lev. 5 6. See SACRIFICE, § 27 *f.*

TRESSES (רְהָטִים), Cant. 7 5 [6], RV. See GALLERY, (2).

TRIAL, TRYING. See TEMPTATION. The words are:

1. מַסָּה, *massāh*, Job 9 23. Cp MASSAH.

2. בֹּחַן, *bōḥan*, Ezek. 21 13; see BDB; but also Toy (*ad loc.*), who follows RV 'for there is a trial,' and refers to Jer. 20 12 Ps. 66 10 139 23 Is. 29 16; add Ps. 17 3, בחנת, ἐδοκίμασας.

3. צרף, ἐπύρωσας, Ps. 17 3.

4 and 5. δοκιμή 2 Cor. 8 2, RV 'proof [of affliction],' and δοκίμιον, 1 Pet. 1 7 Jas. 1 3 (AV here 'trying,' RV in both passages 'proof'); cp Ps. 17 3, ἐδοκίμασας (בחן). But is δοκίμιον really a substantive? In the Greek Egyptian papyri δοκίμιος is an adj. = 'genuine.' Deissmann (*Neue Bibelstudien*, 88) proposes to adopt this sense here—'that which is genuine in your faith'; cp 2 Cor. 8 8, τὸ τῆς ὑμετέρας ἀγάπης γνήσιον.

6 and 7. πεῖρα, Heb. 11 36, and πειρασμός, 1 Pet. 4 12 (cp 1 6 *f.*).

On 'trial' in the sense of a legal process (a sense not found in EV) see LAW, § 10, GOVERNMENT, § 16 etc. For the 'trial' of Jesus see, further, PROCURATOR, ROMAN EMPIRE, § 5, SYNEDRIUM, § 3 *ff.*

TRIANGLE (שָׁלִישׁ), 1 S. 18 6, RVmg. See MUSIC, § 3 (4).

TRIBES

TRIBES OF ISRAEL

Words (§ 1).
Clans (§ 2).
Tribes (§ 3).
Number and origin (§§ 4-8).
Lists: order (§ 9 *f.*).
Current theories (§§ 11-13).
Criticism (§ 14).
Conclusion (§ 15).

1. Words. The well-established Hebrew words for 'tribe' are *šēbeṭ*, שֵׁבֶט, and *maṭṭeh*, מַטֶּה (see ROD, STAFF), to which φυλή corresponds in 𝔊 and in the NT.

[1] Apparently also in Ezek. 27 24, see CHEST (2).

Maṭṭeh is characteristically post-exilic; on the possibility of exceptions in 1 K. 7 14 Mic. 6 9 see Giesebrecht, *ZATW* 1 239 *ff.*[1] *Šēbeṭ* occurs throughout the OT, from JE to Ch.; but its use in post-exilic writings may be archaic. *Šēbeṭ* also appears to bear the sense of 'clan' (a tribal division) in Nu. 4 18 Judg. 20 12 1 S. 9 21; in all these passages, however, the text may be questioned.[2] A third word, according to some, is *mišpāḥāh*, מִשְׁפָּחָה = δῆμος, συγγένεια (for probable etym. see Ges.(13)); see Josh. 7 17 Judg. 13 2 17 7 18 11. But here again critical scepticism is legitimate.[3] *Bēth āb*, בֵּית אָב = οἶκος πατριᾶς ('fathers' house'), and *éleph*, אֶלֶף = χιλιάς ('thousand'?) may also perhaps be added. For the one see Nu. 7 2 (cp 1 4), Josh. 22 14; for the other, Nu. 1 16 10 4 (cp 7 2) 35 Josh. 22 21 30 (cp *Ps.*(2) on Ps. 68 18). *Mišpāḥāh*, *bēth āb*, and *éleph*, however, are properly terms for subdivisions of the tribes. Using them for 'tribe' would seem to be in a certain qualified sense a relic of the old nomadic times before the groups of clans could become consolidated into the later tribes. *Mišpāḥāh* and *bēth āb* might apparently be used synonymously (see Ex. 6 14 Nu. 3 24); more properly, however, the משפחה (the Gk. φράτρα or φρατρία, or, to use the word somewhat vaguely, 'clan'; EV 'family') was made up of *beth ābōth* 'fathers' houses' (so EV) or 'families.' *Éleph* (EV generally 'thousand'; Nu. 1 16 RVmg. 'families') is perhaps = *mišpāḥāh*; cp Judg. 6 15, 'my thousand (אַלְפִּי, EV 'my family'; Moore, 'my sept') is the poorest in Manasseh,' meaning the clan of the Abiezrites; also 1 S. 10 19, 'by your tribes and by your thousands,' but *v.* 21, 'the tribe of Benjamin by its clans' (למשפחתיו). According to the prevalent view, the assumption is that the normal number of the אֶלֶף is 1000; nevertheless Buhl (Ges.(13)) is probably right in supposing that the true meaning of the root of *éleph* is 'to bind together' (cp Ass. *ulāpu*, 'band'). Naturally the members of the אלף or 'union' (?) fought together under a שַׂר or 'captain' (1 S. 17 18 18 13 2 S. 18 1, which passage, to be sure, presupposes the meaning 'thousand' for אֶלֶף). Lastly, many scholars would add חַי, 'kinsfolk' (=Ar. *ḥayyun*, 'a group of families united by vital ties' in 1 S. 18 18, if not also in Gen. 3 20 (see ADAM AND EVE, § 3), and 1 S. 25 6 (so H. P. Smith). It is remarkable that this view should have become an unquestioned tradition among critics,[4] for it seems to imply a confidence in the received text which, in the present state of textual inquiry, must be called excessive.

2. Clans. Before we consider the question of the 'twelve tribes' we must endeavour to do justice to the arrangement by clans, which represents the form of social system natural to Semitic nomads. The 'tribe' was no doubt composed of 'clans,' but there was a stage of development in which there were 'clans,' but not in the fuller sense of the word 'tribes.' What, then, was a 'clan' (משפחה)? It was an association of 'brothers' (Gen. 24 27 29 15 1 S. 20 29)—*i.e.*, of kinsmen, or more strictly of kinsmen on the father's side. This appears from Judg. 9 1, where Abimelech speaks to 'the whole clan' of the family of his mother, from which his own clan was distinct.[5] That the kinship was largely based on what seems (but wrongly seems) to Westerns fiction, and not on literal descent from the same father, need only be remarked in passing. The 'clan' might form the whole (or nearly the whole) body of citizens. Hence place-names and clan-names are often identical; hence, too, such a phrase became possible in an early legend as 'Ophrah of the Abiezrites' (Judg. 6 24).[6] Of course, however, it was also possible that more than one clan might dwell in the same city, as in the case of the Shechem of Gideon's son Abimelech. The special characteristics of clansmen are summed up in the often misunderstood phrase גִּבּוֹרֵי חַיִל, which is really a technical term, and not to be rendered literally.[1] When in 2 K. 15 20, Menahem, king of Israel, is said to have exacted the money for the tribute of all who were גִּבּוֹרֵי חַיִל, the persons who are meant are not merely mighty warriors, nor merely 'mighty men of wealth' (EV), but those who were at once holders of property and subject to the obligation of military service. For in Israel, as elsewhere, those who did not belong to the propertied class were excluded from the ranks of the warriors (cp ARMY, § 4 *f.*). It is equally true that the propertied class, which formed the *mišpāḥāh* or clan, and consequently also the *šēbeṭ* or 'tribe,' alone had political rights. Represented by their heads—the so-called זְקֵנִים 'ancients,' חֹרִים 'freemen' or 'nobles,' and שָׂרִים 'princes'[2]—they must, in the pre-regal period, have monopolised the supreme power, both in peace and in war. Under kingly government, however, the political authority of the collections of territorial 'clans,' denominated 'tribes,' naturally faded away more and more. Nothing is said about 'tribes' in 2 Kings, and none of the statistical passages in Ezra and Neh., with two exceptions, mention a tribal connection. The exceptions are Neh. 11 3-24 and 11 25-36, both certainly late passages, though with an artificial antique tinge. It should, however, be added that the lists in the Books of Ch. and Ezra-Neh. produce the impression, that when these books were compiled the tie of the clan had by no means disappeared. This is surely natural, for this tie had the sanction, not merely of antiquity, but of religion. Two proofs of this are preserved, viz. (1) the notice of the yearly sacrifice of David's *mišpāḥāh* (1 S. 20 6 29), and (2) the direction in the law of the Passover in J (Ex. 12 21; see Baentsch, *ad loc.*) that the paschal lamb was to be provided by each *mišpāḥāh* (קחו צאן למשפחתיכם), which contrasts with the legal direction given in a secondary stratum of P (Ex. 12 3) that every 'father's house' (בית אב) should provide a lamb for itself.

3. Tribes. The designation 'tribe' belongs specifically to the Israelites, and means, in its fullest sense, an association of clans and families, living near together, and conscious of a closer mutual affinity than that which united them to 'Israel' as a whole. If we are not misled through relying too implicitly on the traditional text, we nowhere find the term שבטים, 'tribes,' applied to any of the peoples with which Israel was most closely connected.

The Edomites ('sons of Esau') are said in Gen. 36 15-19 40-43 (cp the *'allūphīm* of the Horites in *vv.* 29 *f.*) to have had אלופים (*'allūphīm*), a term which presupposes the existence of אלפים (*'ălāphīm*)—*i.e.*, following Buhl, 'unions.' Evidently, in some sense of the word, 'tribes' are meant. The Ishmaelites, too, are said in Gen. 25 16 to be divided into אֻמּוֹת—*i.e.*, 'populations'; and in Nu. 25 15 Ṣūr (צור) is said to have been 'head of a people (אֻמּוֹת; read אֻמָּה?), of a father's house in Midian.'[3] Strangely enough, in Is. 19 13 we hear of persons who are called 'the cornerstone' of Egypt's 'tribes.' Duhm wilfully makes these 'tribes' into 'nomes'; not less wilfully his predecessors explain 'castes' (Herod. 2 164). Now, however (see MIZRAIM, § 2 *b*), it is almost beyond the possibility of question that the Miṣrites of N. Arabia are referred to, so that here, at least, in a late literary production we have the word *šēbeṭ* applied to a neighbouring non-Israelite people. But, as a rule, it is only Israel that has *šĕbāṭīm.*.

Though both *šēbeṭ* and *maṭṭeh* might conceivably have been used by early writers in speaking of the primitive stage of Israel's social development, the probability is that both terms arose after the Israelites had begun to acquire territory by conquest. We may

1 On Driver's view see below, § 3.

2 In Nu. MT has אֶת־שֵׁבֶט מִשְׁפְּחֹת, and in 1 S. מִשְׁפְּחוֹת שִׁבְטֵי. Probably, however, both שֵׁבֶט and שִׁבְטֵי come from משפחת, which seems to have been dittographed. In Judg. שבטי should probably be שֵׁבֶט (see Moore, *ad loc.*).

3 In Josh. מש׳ should obviously be שבט (see *v.* 16); after יהודה read למשפחתיו (𝔊 κατὰ δήμους). So Steuernagel (alt.). It is a mere slip of the scribe. In Judg., however, there is deep-seated corruption (see *Crit. Bib.*).

4 It is or has been held by Ewald, Böttcher, Thenius, Wellh., Robertson Smith, Driver, Kittel, Löhr, Budde, Siegfr.-Stade, and BDB. משפחת אבי is commonly omitted as a (correct) gloss. See, however, a different explanation in *Crit. Bib.*

5 In Judg. 9 3 18, however, there are indications of another view of kinship. For here 'brother' = son of the same mother. Cp KINSHIP, § 6.

6 From Judg. 6 24, compared with 8 2, we gather that Gideon's clan could muster 300 able fighting men.

1 See E. Meyer, *GA* 1 449; *Entst.* 152 *f.* (cp 109 *f.*).

2 On Judg. 8 14, where the שָׂרִים are apparently distinguished from the זְקֵנִים, see Moore's commentary.

3 Stade, however, would read אֲלָפִים for אַלּוּפִים, which is probably right. Similarly in Ex. 15 15 אַלְפֵי may be read for אלופי.

therefore concede to Driver[1] that though *maṭṭeh* may be in OT usage only post-exilic, it was scarcely invented by P, and that, like *šēbeṭ*, when used in a metaphorical sense, it is at any rate suggestive of high antiquity. 'Archaic,' however, which is Driver's word, seems to claim too much.[2] At the time that we here suppose the metaphorical use of *šēbeṭ* (and of *maṭṭeh*?) to have arisen the creative tendency of language was still strong. As to the precise date when the usage was initiated, who can venture to dogmatise? We can only say that it must have been a fairly ancient, though not archaic period. When the Blessing of Jacob was written in its original form, the usage must have been already in existence, not because Gen. 49 16 speaks of Dan as 'judging his people, like any of the tribes of Israel' (for the text of *v.* 16*b* is questionable),[3] but because the contents of the series of blessings require this view. The union of clans must, at this time, have been closer than in the nomadic age, owing to the pressure of new conditions arising out of changed circumstances. And even though it cannot be historical that the first king was chosen by lot (1 S. 10 20 *f.*)—first Benjamin being selected from the other 'tribes,' then Saul's 'clan' and then Saul himself—we can believe that there was in that hero's time not only a 'clan' of Matri, but also at least the beginnings of a 'tribe' of Benjamin (cp SAUL, § 1 *g*).

It is probable that the tribal association was strengthened by the sanctions of religion. The names of some at least of the Israelitish tribes can be more or less plausibly explained as borrowed divine names[4] (see ASHER, DAN, GAD, MANASSEH, REUBEN), and though it would be natural that some specially famous sanctuary should draw pilgrims not only from the tribe on whose territory it stood, but also from other tribes, yet we may presume that every tribe had some sanctuary of its own in which, besides Yahwè, some tribal god or divine hero was implored to give his blessing to the tribe.[5]

If we ask how many 'tribes of Israel' historically existed together, the answer must be that, apart from a

4. Number and origin.

hieratic and literary convention which only in quite a late period can be shown to have become a popular belief, the number must, from the nature of the case, have been variable. A clan may (1), through the adhesion of other clans and through favouring fortune, become so large as to be called a 'tribe,' or (2), through acquisition of fresh territory may be inevitably impelled to bifurcation; again, a tribe may (3), through persistent ill-fortune, sink so low that its constituent clans, or those of them which survive, may seek protection in a fresh tribal attachment. In a word, there is no sharp division between clans and tribes.[6] An example of the first of these cases may be found in the growth of the tribe of Judah (see CALEB, § 2 *f.*; JUDAH, § 5); of the second, as some think, in the division of Joseph into Ephraim and Manasseh; of the third, in the attachment of Simeonite clans to the tribe of Judah (see SIMEON). The gradual disappearance of Reuben and the destruction of a tribe or clan called DINAH (*q.v.*, but cp § 12, below), and of Simeon and Levi, regarded as territorial tribes, should also be mentioned here, though with regard to Levi it has to be once more pointed out that the city of ZAREPHATH (*q.v.*) in the Negeb, with which in the

[1] *JPhil.* 11 214 (in the course of an answer to Giesebrecht, *ZATW* 1 242).

[2] B. Luther's phrase (*ZATW* 21 14), 'dass der Begriff kein hohes Alter hat,' may be accepted in so far as it rejects the idea that the term *šēbeṭ*, 'tribe,' is archaic.'

[3] See *Crit. Bib. ad loc.*

[4] K. Kohler (*Der Segen Jacob's*, 1867) presses the theory that a tribal name may indicate the god anciently worshipped by the tribe to an impossible extent.

[5] Dt. 33 19 is often supposed to refer to a mountain-sanctuary, common to the tribes of Zebulun and Issachar. Mt. Tabor has been thought of. See, however, *Crit. Bib.*

[6] Cp Grüneisen, *Ahnencultus* (1900), p. 242.

TRIBES

earlier form of the tradition Moses is most probably connected (see MOSES, § 4), appears to be referred to, in the appendix to the Book of Judges, as the headquarters of the Levites.[1]

The convention referred to, however, definitely represents the tribes of Israel as twelve in number. There

5. Number twelve.

is a similar convention with regard to the clans or tribes whose origin was traced to Nahor (Gen. 22 20-24), to Ishmael (Gen. 17 20 25 13-16), and to Esau (Gen. 36 15-19 40-43) respectively.[2] Its artificiality is obvious. Never can the 'twelve tribes' of Israel have been all in existence together. When, *e.g.*, Benjamin came into prominence as an independent tribe, Simeon and Levi presumably had long suffered the fate poetically prognosticated in Gen. 49 7. What, then, was the origin of the numeration? More than probably it had a mythological character. Diodorus Siculus (2 30), in his account of the Babylonian astronomy, after speaking of the thirty-six star-gods, tells us that the κύριοι of the gods are twelve in number, to each of whom are allotted a month and one of the signs of the zodiac. In mythological style the twelve months and the twelve signs of the zodiac could be called 'sons of the moon.' It is probable that, either directly or indirectly (through some other people), a faint echo of this had reached the primitive Israelites. The most plausible view is that the priests at the chief sanctuaries of the people, from whom Israel derived a pale reflection of a mythology, knew of a myth of the moon-god who had twelve sons (the months, or the signs of the zodiac);[3] and it is further probable that they connected the ancestor of their race with the moon-god, and the constituent tribes of their people with the moon-god's sons. To what people Israel was indebted for its semi-mythic tales, is matter for investigation.

Elsewhere, however (see PARADISE, SODOM), we have seen that other semi-mythic stories of the Israelites were most probably borrowed from the N. Arabian people of Jerahmeel, and it is reasonable to suppose that the semi-mythic figure of Jacob (יעקב), the ancestor of the Israelites, is a reflection of the mythic ancestor of the Jerahmeelites, who was presumably called Jarḥam (from ירח, 'moon,' perhaps with the Arabic mimation). Cp col. 2363, n. 2. Jacob's wife Rebekah (רבקה, 'Ribhkah') may also owe her name to popular corruption of 'Jarḥam,' just as Isaac's wife Rachel owes hers to popular distortion of 'Jeraḥme'el.' See REBEKAH, § 2.[4]

Gunkel, with his wonted penetration, remarks, 'There must be a line leading from the twelve Babylonian zodiac-gods to the twelve tribes of Israel; but of what nature and how long the line is, cannot at present be said' (*Gen.*(2), 293). It is much to see a problem, even if its solution be hidden. But the evidence already adduced makes it difficult to doubt that the earliest conveyors of Babylonian myths to the Israelites were the N. Arabian Jerahmeelites.

Another view has been put forward by B. Luther,[5] and though this scholar does not deny that the number

6. Solomon's twelve departments.

of the months may lie at the root of the numeration of the tribes, his theory may perhaps be welcome to those who would sooner admit the post-Solomonic origin of the 'twelve tribes' than grant the possibility of mythological influences on biblical representations. It is well-known that, according to the received text of 1 K. 4 7 *ff.*, Solomon divided the land of Israel into

[1] No harder section than Judg. 17 *f.* can be found among the early narratives. Methodical correction is the only remedy for the otherwise insuperable difficulties of the text. Cp MICAH, 2, and *Crit. Bib.* Grüneisen's view (*op. cit.*, 241) that ממשפחת יהודה (EV, 'of the family of Judah') describes the Levite as one who sojourned for his livelihood in the tribe of Judah, is certainly wrong. Budde, at any rate, gives effect to a right impression when he substitutes as the original text ממשפחת משה 'of the clan of Moses.' For the Levites who dwelt at Zarephath were the clan of Moses. See MOSES, § 17.

[2] Cp Ewald, *Hist.* 1 369, GENEALOGIES, § 5, n. 2.

[3] For Winckler's form of the lunar theory, see his *Geschichte Israels*, 2 57. The credit of originality as well as learning is due to him.

[4] That ירחם is a shorter form of ירחמאל is indisputable. See JEROHAM.

[5] *ZATW*, 21 34 [1901].

twelve departments, each of which had to supply provision to the king and his house for a month in the year. Now B. Luther is of opinion that the Solomonic division of the land into departments was at least a principal cause of the later theory of twelve tribes. Solomon, it is held, found a division into tribal provinces (not as yet twelve) already in existence, and adopted it so far as it was geographically suitable for his purposes. It was natural that a later generation should follow the precedent set by this king, and reckon twelve tribal provinces. The reason why Solomon fixed upon the number twelve was its supposed sacred character. (Cp NUMBER, § 7, and note that in the Amarna letters [81, 8] we find the expression, not to be taken literally, 'twelve of my men').

This view derives its plausibility from the mention of the months—'each man had to provide victuals for a month in the year' (1 K. 47). But is this notice critically acceptable?

Kittel indeed says that the providing spoken of (cp 4 22-28 [5 2-8]) is equivalent to the collection of taxes.[1] But this is by no means natural. 'To provide victuals for the court month by month' is not the same as 'to enable Solomon to do whatsoever his soul desired.' Stade accordingly[2] criticises the whole statement in 1 K. 47. He thinks that there were not twelve but thirteen 'prefects' (נִצָּבִים), and that the reference to Solomon's magnificent scale of living is due to the editor who inserted the old list of prefects in the main body of chaps. 3-11, and whose object was to enhance the glory of the king. This object he effected, but in doing so he correspondingly diminished the importance of the prefects, who became commissariat officers. It is now possible, however, to go beyond this, and to say that, text-critically, the statement in 1 K. 47*b* may be regarded as absolutely wrong,[3] and that the whole of it has most probably arisen (thanks to an ingenious editor) out of a gloss on the incorrect word ישראל (Israel). The region over which the נצבים presided was, not the land of Israel, but the land of Jerahmeel or Ishmael, *i.e.*, the Negeb (see SOLOMON, § 6).

The number of the prefects may coincide with the number conventionally given to the tribes, but either the coincidence is accidental (twelve, as we have seen, was a sacred number), or the number of the prefects was suggested by that of the tribes, not *vice versa*.

We must, therefore, still hold that the traditional number of the tribes is due to a hieratic theory respecting the ancestor of the Israelites and his sons.

7. Another early theory.

To this it may perhaps be objected that, as statistics show, Israel is 'the older and the original designation of the tribes united by Moses,'[4] and that the OT prose-writers of all ages use 'Israel' and, less frequently, the phrase 'b'nē Israel,' as the name of the people. If this may be taken to imply that Israel, not Jacob, was originally regarded as the name of the ancestor of the Israelites, must we not question the originality of the representation of the tribes as descended from sons of Jacob? This criticism may plausibly be supported by the remark that 'Jacob' as a designation of the whole people is nowhere found in prose-writings, and that the phrase 'b'ne Ja'akob' occurs only twice in prose literature, viz. —in 1 K. 1831 and 2 K. 1734, both which passages are to be assigned to redactors. The right answer perhaps is, not that 'Israel' was preferred to 'Jacob,' as the higher or religious name, but that according to the original view 'Israel' and 'Judah' were both sons of Jacob[5]—*i.e.*, of Jarḥam or Jeraḥmeel. For the earliest accounts of the historical relation between Israel and Judah exclude the idea that Judah was even theoretically regarded as a part of Israel; 'Israel and Judah,' as B. Luther remarks, 'are opposed as two equal powers.' If this relation were to be expressed in genealogical style, it would, in accordance with analogy, be stated that 'Israel' and 'Judah' were brothers, and precisely such a genealogical description Luther finds unmistakably implied in the fierce words of the 'man (*i.e.*, men; איש collective) of Israel' to the 'man (men) of Judah' in 2 S. 1943 [44]. 'I have ten parts in the king, and moreover I am the firstborn (בכור, as 𝔊) rather than thou.'[1] It was not till long after the breaking up of Solomon's kingdom that Judah became a 'son,' *i.e.*, a dependent, of Israel. The genealogy which represents Judah as a son of Jacob can, it would seem, have arisen only at a time when Judah, not less than any one of the 'ten tribes,' owned the supremacy of the central Israelite power, and, one must of course add, when the identification of Jacob and Israel had been effected by those who recast and refashioned the old tradition. Luther, therefore, holds (p. 33) that 'the genealogy of J, if not his own work, can at any rate not be much older than the time of Ahab, when Judah became the vassal of Israel.'

To accept this, however, as the approximate date of the representation of the tribes as twelve sons of Jacob, simply because in the forms in which it has reached us Judah always appears, is somewhat hasty. It is possible that there were reckonings, now lost, of the twelve sons of Israel in which Judah was not included. As a matter of fact the number of the tribes whose origin is accounted for genealogically by JE is not twelve, but thirteen, so that if we take away 'Judah,' the number left will be twelve. The reckoning which underlies JE is as follows,—

(*a*) The Leah-tribes (Reuben, Simeon, Levi, Judah)	4
(*b*) The Bilhah-tribes (Dan, Naphtali)	2
(*c*) The Zilpah-tribes (Gad, Asher)	2
(*d*) The Leah-tribes (Issachar, Zebulun)	2
(*e*) The Rachel-tribes (Manasseh, Ephraim)	2
(*f*) A Rachel-tribe (Benjamin)	1
	13

It is true, there is evident trace (in J) of an earlier arrangement, which included Dinah and excluded Benjamin. This, however, does not affect our present argument, which is that if we are counting tribes, we cannot speak of Joseph, but only of Manasseh and Ephraim. That there ever existed a tribe which included the later (?) Ephraim and Manasseh, and passed under the name of Joseph, cannot be shown with any certainty; we cannot appeal to Nu. 1311 because the text there is evidently in disorder (see JOSEPH [TRIBE], § 1, n. 1). Winckler's conclusion may here be mentioned without of course committing him to more than he has said. 'That Joseph is not a tribal name, but a genealogical form [creation] is proved by the circumstance that his domain [Shechem] is in possession of the tribe of Ephraim, who therefore has to be Joseph's son' (*GI*, 268). Mr. Hogg, on the other hand, thinks that not improbably 'Joseph and Ephraim are simply two names, older and younger, tribal and geographical, for the same thing' (JOSEPH, § 2).

We may here refer to the possibility of other reckonings of the tribes—ten, eleven, and thirteen. (*a*) Ten sons of Israel may perhaps be referred to in 2 S. 1943 (see above).

8. Other reckonings.

(*b*) Eleven sons seem to be implied by 1 K. 1131 *f.*,[2] where Ahijah the Shilonite bids Jeroboam take only ten of the rent pieces of his garment, symbolising ten tribes, because one tribe was to be left for Rehoboam. Kittel indeed alters 'ten' into 'eleven' (cp *v.* 30), whilst 𝔊 as arbitrarily reads 'two tribes' for 'one tribe' in *v.* 32.

[1] *Kőnige* (*HK*), 32; cp *Gesch.* 2 161 (*Hist.* 2 186).

[2] *GVI*, 1 305. Ewald and E. Meyer also adopt the number thirteen. Cp, however, Benzinger and Kittel *ad loc.*

[3] The section 5 2-8 [EV 4 22-28] also calls for the application of a keener textual criticism. See SOLOMON, § 6, n. 1, and *Crit. Bib.*

[4] Staerk, *Studien zur Religions- und Sprachgeschichte des AT*, 270.

[5] B. Luther, *op. cit.* 32, of course without any reference to Jerahmeel.

[1] Budde, however (*Sam. KHC*, 295), thinks it safer to explain thus; 'the North is conscious of its unity, and therefore feels itself not a row of brothers but one brother, under the name Israel, as opposed to Judah.' On the reading בכור see Driver, *TBS*, *ad loc.*

[2] On the geography of the statement in its original form, see SHILOH, 2. It may be added that in Dt. 336-25 the number of the tribes is left doubtful. *V.* 13 opens with the words, 'And of Joseph he said;' this implies that there are eleven tribes. But *v.* 17*b* introduces a reference to Ephraim and Manasseh.

TRIBES

Since, however, we must take some liberty with the text, is it not least hazardous to read 'eleven' for 'twelve' in *v.* 30, and to suppose either that, as in Dt. 33, Simeon is omitted, as having early disappeared, or that Levi is omitted as not being a territorial tribe?[1] (*c*) The adoption of Ephraim and Manasseh by Israel (Gen. 48 13 *ff.*, E) makes the number of Jacob's sons thirteen (see above). Similarly the sons of Joktan (Gen. 10 26-29) and Keturah[2] (Gen. 25 1-4) appear to be reckoned as thirteen. T. K. C.

[As to the different biblical arrangements of the tribes, it is strange but true that there are more than twenty. In the following section, these twenty are tabulated, and a brief indication will be given of the relative influence of the different principles that govern them. The earlier and more interesting extra-biblical lists are included in the examination. For a fuller treatment see G. B. Gray, 'The Lists of the Twelve Tribes,' *Exp.*, March 1902, pp. 225-240. It will, it is hoped, become abundantly clear that in spite of the great variety of arrangement there is always some controlling principle.]

The twelve tribes, or 'sons' of Jacob, are mentioned by name together some twenty-five times in OT and NT; and except in Nu. 2 7 10 14-29 the arrangement of the names is always different. In all there are upwards of twenty different arrangements. Early extra-biblical literature, such as the Book of Jubilees and the writings of Philo, repeat some of the biblical arrangements, but also contain fresh variations.

9. Lists: geographical orders.

In Charles's *Book of Jubilees* (1902), pp. 170 *ff.*, the text of the dates given for the birth of the several children is discussed. In the present text of Jubilees, the birth of Dan is placed in an earlier year than the birth of Judah; but this must be due to textual corruption, for it is out of accord not only with the order in which the tribes are mentioned, but also with the express statement of 21 17 *f.* There are several similar errors in the text of Jubilees and later works dependent on it.

In a few cases where the tribes are mentioned in connection with the conquest or distribution of the country, geographical considerations have overridden all others; and in two other instances (Jos. 13 15 *f.*, 1 Ch. 4-6) these considerations constitute the main principle of arrangement. These lists are not included in the following table and may be briefly discussed at once. The most perfect geographical arrangement is found in Jos. 21 4-7 (cp 1 Ch. 6 54 *ff.*): here the tribes are mentioned in four groups, the southern first, then the midland, then the northern and then the eastern. In Nu. 34 18 *ff.* Judg. 1 and Jos. *Ant.* v. 1 22 only the western tribes are included; the order of mention is from S. to N., but in Judg. and Jos. Dan is mentioned last, either in consequence of its subsequent position in the extreme N., or as being descended from a handmaid. In Jos. 13 15 *f.* the eastern tribes Reuben and Gad are treated apart (13), but in the discussion of the western tribes (15 *f.*) a strict geographical order is not followed; considerations of the importance of the tribes appear to have modified the tendency of the arranger to follow a S. to N. order. In 1 Ch. 4-8 the southern tribes Judah and Simeon come first, then the three eastern tribes and the rest in an order governed by no obvious principle. The one common feature of these arrangements is the marked tendency to survey the tribes from S. to N.; of the contrary tendency there is nowhere the slightest trace.

The main considerations that have governed the order of the remaining and far more numerous lists of the tribes are obviously the traditional order of births and the several 'mothers' or 'wives' of Jacob from whom the tribes traced their descent. On this account these lists are here tabulated by means of symbols that will show at a glance the extent to which these principles have exerted their influence; so far it will speak for itself. It will only remain to consider how far and with what results the two principles conflict with one another and what other influences over the arrangements can be detected.

10. Other orders.

The two wives of Jacob, Leah and Rachel, are indicated by L and R respectively; Leah's handmaid, Zilpah, by l, Rachel's handmaid, Bilhah, by r. The order of birth from the same mother is indicated by index figures, and the grandsons of Rachel by Joseph, who also fall to be considered, by an additional index letter, thus:—

L^1 = Reuben.	R^1 = Joseph.
L^{1a} = Henoch (eldest son of Reuben.	R^{1a} = Manasseh.
	R^{1b} = Ephraim.
L^2 = Simeon.	R^2 = Benjamin.
L^3 = Levi.	r^1 = Dan.
L^4 = Judah.	r^2 = Naphtali.
L^5 = Issachar.	l^1 = Gad.
L^6 = Zebulun.	l^2 = Asher.

The sources whence the lists are derived are indicated to the right hand, the references are given at the foot of the list.

20. Jubilees 8 5 *ff.*

The last four lists (17-20) are somewhat different in character from the first sixteen; for in them the tribes are distributed for various purposes into two or more groups, which are marked above by the perpendicular line.

The two principles that have obviously influenced the various arrangements conflict with one another; for the sons of the handmaids, in virtue of seniority, come between the first four and the last two of Leah's children. Since the simple order of birth is never adopted except in the story of the births, the tendency to group the tribes according to their respective mothers was clearly stronger than the tendency to group according to age.

Further, the least departure from the order of birth, required in order to maintain the maternal groups intact, would be to place the children of the handmaids immediately after Leah's six children. This, however (except in the later lists—NT, Philo, Jubilees), is a comparatively infrequent arrangement; far more frequently the children of the full wife Rachel, though younger, precede the children of the handmaids. An obvious cross principle is adopted but once (no. 6; see also Nu. 26 𝔊).

The tendency to keep the children of the two full wives in two distinct groups is far stronger than that to keep the children of the two handmaids distinct; indeed, a tendency to keep the children of the two handmaids in two distinct groups can hardly be said to exist. The handmaid tribes are to be regarded as constituting a single class in which considerable freedom of arrangement prevailed.

It will only be possible to refer briefly to some of the

[1] Cp GENEALOGIES, § 5 (on the reason for the enumeration of the priestly tribe of Levi).
[2] The 'sons of Dedan' in *v.* 3 are interpolated.

chief apparent or real violations of the principles just indicated.

In some lists Judah, though the fourth son of Leah, stands first (13, 19, 20; cp Nu. 34 19 Josh. 21 4 and other geographical lists). The reason, it can scarcely be questioned, is the pre-eminence of the tribe.

In the camp order (19), Judah is given the superior eastern position; otherwise, the four groups are constituted and arranged in such an order as to do *least* violence to the principle that sons of the same mother should be kept together and in the order of their birth. Since Levi is necessarily omitted from the scheme, Leah's sons fail to make two complete groups of three, the second group is completed by Gad, the eldest son of Leah's handmaid. Lists 9, 10 seem to be so far influenced by this list that Gad follows Simeon. On the other hand, the separation of Dan from the other handmaid tribes in 11 and 12 is not easy of explanation.

In lists 2 and 3 Zebulun, exceptionally, precedes Issachar. As both these lists occur in poems of earlier origin than JE, it is possible that the arrangement represents an earlier theory of the relative ages of the two tribes, according to which all the sons of Leah were older than any of the sons of other mothers, Zebulun was older than Issachar, and the relative ages of the handmaid tribes were not the same as in the later scheme.

Benjamin precedes Joseph (R^{21}) in only one (no. 3) of the twenty lists; in another (no. 8) it stands between Ephraim and Manasseh (R^{1b21a}). Both these arrangements are extremely anomalous, and each occurs in a list that contains other anomalies. In the case of no. 8 the anomalies are almost certainly due to an accidental transposition in the text. If in Nu. 13 *vv.* 11 *f.* be placed before *vv.* 8 *f.*, *three* anomalies are at once removed and an entirely normal list restored (L^{12456} R^{1ab2} r^1 l^2 r^2 l^1). In Dt. 33, unless the text has suffered very serious dislocation, the order was originally altogether anomalous.

In no. 13 also, a simple transposition, by which *vv.* 5*c* 6 should be made to follow *v.* 8 in Rev. 7, would restore a far more normal list (L^{412356} R^{12} l^{12} r^2 R^{1a}) where R^{1a} (Manasseh) is an intentional or accidental substitute for Dan (r^2).

In 17 and 18, and to a much slighter extent in 20, the tendency to maintain the traditional groups still exerts itself, but is checked by other considerations. The second group in 17 consists of the tribes whose duty it was to curse; the tribes selected for this purpose are, not unnaturally, the less eminent handmaid tribes and the youngest son of Leah; why Leah's eldest son completes the group is not clear, unless the curse pronounced on him in Gen. 49 has influenced the selection. In Ezek. a similar slightness of regard for the handmaid tribes has given them positions most remote from the holy district.

G. B. G.

11. Current theories: Wellhausen.

The problems which have just been stated and illustrated, differ in their degree of importance, and the most interesting of them advance but slowly towards a satisfactory solution. More particularly, opinions are divided relative to the inner meaning of the first list of the tribes (that of JE), and of the traditions which are connected with it. Ewald long ago expressed the conviction[1] that, rightly understood, such a list must convey important information relative to the 'pre-Egyptian period of Israel's history,' and we may, at any rate, agree with him that, even allowing for the extreme uncertainty of tradition with regard to details, and for the probability of the intermixture of elements derived from the circumstances of later ages, something of value may be obtainable by the historical critic from the genealogical narrative of JE. Wellhausen and Stade deserve special gratitude for the acuteness with which they have studied both this and the other traditional narratives relative to the origin of the tribes. According to Wellhausen,[2] with whom Guthe (*GVI*, 1899, p. 41) and probably Bennett (Hastings' *DB*, *s.v.* 'Tribes') and Paton (*Syria and Palestine*, 1902, pp. 124, 138, etc.) agree, the original Israelitish tribes were seven in number, six of which belong to the group represented by Jacob's wife Leah, and one to that represented by his other wife Rachel. It was the latter tribe—viz., Joseph, which (according to these critics) alone sojourned in Egypt (cp EXODUS, § 2). The combination of the Leah and the Rachel tribes was probably effected by Moses, who came from the Sinaitic peninsula to conduct the Hebrews thither from Goshen. The sons of the concubines (Bilhah and Zilpah)—viz., Dan, Naphtali, Gad, and Asher—are not in the same full sense sons of Jacob or Israel; these tribes were

[1] *GVI*(3) 1 519 *ff.* (*Hist.* 1 362 *ff.*).
[2] *IJG*(1), 11-13, 18; *Prol.*(4), 322-329.

TRIBES

probably of very mixed origin, and joined the b'ne Israel later. On what principle the Bilhah and Zilpah groups were arranged, is not clear. Guthe thinks that these two couples of tribes had come into specially close relations with Joseph and with either Reuben or Issachar and Zebulun respectively, and that this was expressed genealogically by the statement that their mothers were the handmaids, in the one case of Rachel, in the other of Leah. For the further movements of the tribes, according to Guthe, see ISRAEL, § 7.

12. Stade.

Stade[1] is of opinion that the legend of Jacob and Joseph in its present form presupposes the division of the kingdoms. Leah, the legitimate but slighted wife, represents the kingdom of Judah, Rachel that of Israel. The assignment of a tribe to Leah or to Rachel depends on the question whether the tribe came earlier or later into the country W. of the Jordan.[2] The details of the legend cannot, for the most part, be interpreted historically. Bilhah was probably connected with Rachel for geographical reasons; but not so Zilpah with Leah. Why the insignificant Reuben is made the firstborn, is obscure. 'If the precedence given to Reuben reflects actions of this tribe, these actions must go back to the most remote antiquity.' Why, too, are Issachar and Zebulun grouped with Judah, and Gad with Asher? Here again, political circumstances may be reflected. It is only Joseph and Benjamin whose position is quite clear; they reached distinction only at a late period. Benjamin branched off from Joseph (cp 2 S. 19 21, 'I [Shimei] have come the first of all the house of Joseph') before Joseph split into Ephraim and Manasseh. Dinah is merely a genealogical creation. She represents an Israelitish minority in the population of the Canaanite city of Shechem in the pre-regal period (cp DINAH, § 1). The story of Dinah (Gen. 34) and that of Tamar (Gen. 38) are the oldest parts of the tribal legend, and indicate on what lines the occupation of Palestine really proceeded. In the formation of the tribes, not only the vicinity of Israelite clans, but the intermixture of non-Israelitish elements were important factors. As we find them in the historical period, they arose on this side of the Jordan. On the question of the sojourn in Egypt, Stade is in agreement with Wellhausen.

13. Steuernagel.

A new impulse has been given to these inquiries by Steuernagel, who has made a very thorough and critical study of the legends of the immigration of the tribes of Israel into Canaan.[3] According to him, it is the Rachel-tribes which have the first right to be called sons of Jacob. They arose through the fusion of the 'genuine Israelitish' tribe Jacob, and the Aramaic tribe Rachel. The Jacob-tribe thus lost its independent existence, and by degrees the tribal name Jacob gave way to the new name Joseph. The name Jacob itself, however, did not disappear. The facts of the origin of the Joseph-tribe led to the traditional statement that Joseph was the son of Jacob and Rachel. Steuernagel, however, also seeks to throw light on the early history of the Jacob-tribe, which was led out of Egypt by Moses, and dwelt in the eastern steppe-country to the S. of Canaan, by Sinai, where the tribe allied itself to the Horite clan Bilhan (= Bilhah), but, together with other tribes, was driven further by the Edomites, who had formed a

[1] *GVI* 1(2) 145 *f.*; 'Lea und Rahel,' *ZATW* 1 112-116; 'Wo enstanden die genealogischen Sagen über den Ursprung der Hebräer'? *ZATW* 1 347-350; 'Entstehung des Volkes Israel,' *Akad. Reden*, 97-121.

[2] *ZATW* 1 113. In *GVI* 1 147, however, Stade cautions us against looking to the genealogical legend for any disclosures as to the course of events in the immigration into Canaan. For a criticism of Stade's view on the combination of two systems, one representing them as wives of Jacob, and the other as sons, see Steuernagel, *Die Einwand.* 9 *f.*; Robertson, *Early Religion of Israel*, 499 *f.*

[3] *Die Einwanderung der Israelitischen Stämme in Kanaan* (1901). For criticisms of this able work see Gunkel, *Gen.*(2), 285; J. C. Matthes, 'Israels nederzetting in Kanaan,' *Th.T* 36 517 *ff.* [1902].

TRIBES

kingdom to the N. or the Sinaitic peninsula (Gen. 36 31); this the legend describes as Jacob's flight from Esau. From Mesopotamia, where the fusion with 'Rachel' took place, the mixed tribe now called 'Joseph' was pushed by Aramæan tribes (under Assyrian pressure) southward. On the N. border of Gilead the Aramæans made a temporary halt, while the Jacob-Rachel tribe occupied N. Gilead. Not improbably, the boundary between them was fixed by a compact near the Yarmuk. 'If this be correct, it will follow, not only that the migration of Jacob should receive a place in general history, but also that it is to be assigned to the fourteenth century' (p. 60). The story in Gen. 32 21*b*-32 tells of the duel between Jacob and the god of the conquered N. Gileadites. 'Israel' means 'El (= Yahwè) fights,'[1] *i.e.*, for Jacob; it became a war-cry and, later on, the name of the people. The sequel is related, according to Steuernagel, in two forms—in the Jacob-story and in the Book of Joshua. Attacks of the Bedouin tribes (probably) forced the Jacob-Rachel tribe to cross the Jordan, to the S. of the point where the Yarmuk enters it. The tribe goes to Shechem, where it acquires land by payment (a reminiscence of ancient payment of tribute to the Shechemites). The narrative in Gen. 35 belongs to a later time when, as a consequence of the extension of the Rachel-tribe to the S., the Benjamin tribe made itself independent. The Jacob-Rachel tribe now disappears; in future the two tribes, Joseph and Benjamin, appear in its place. In the legendary style, this is expressed by saying that soon after the arrival at Bethel, and the founding of a sanctuary there, Benjamin was born, and Rachel died. As to the Leah-Zilpah tribes, Steuernagel's view is that they reached Canaan before the Jacob-Rachel tribe, and came into connection with that tribe in Canaan, on which account legend represented Leah as the wife who was foisted upon Jacob.

All these theories are ably defended. The least satisfactory is the third, precisely because it is the most elaborate, and aims at the fullest historical results. Almost everything in the patriarchal narratives turns out to be a typical or anticipative history of the settlement of the tribes in Canaan. Unfortunately Steuernagel, under the presence of theory, has here and there to alter the traditional statements. The tradition states that Jacob married Leah and Rachel at the same time, and afterwards Bilhah and Zilpah, and that the place was in Mesopotamia. This critic, however, alters the order of the marriages and the places, and represents that the Bilhah tribe joined Jacob in the S. of Canaan, and the Rachel tribe in Mesopotamia; Leah and Zilpah however only joined after the immigration.[2] This is one great drawback. Another is that Steuernagel treats his traditional material very undiscriminatingly, the connections between the legends being made as much use of as the legends themselves. For instance, the order of the events related in Jacob's progress through Canaan surely does not rest on early tradition; there is no real traditional authority for placing the foundation of Bethel before the death of Rachel at Ephrath. Nor does Steuernagel allow for the probability that the historical circumstances of the regal period have found a reflection in the patriarchal legend, and throughout he shows a confidence in the vitality of the earliest tradition which is not justified by the experience of historical critics elsewhere.

14. Criticism of theories.

But even Wellhausen's and Stade's theories cannot either of them be accepted without important modifications, and it remains for future investigators to use the works of the three eminent critics mentioned rather as mines of suggestions than as records of results. Two things seem to be required in order that we may take a genuine step forward. (1) We must criticise the Hebrew text more keenly and with more adequate methods, and (2) we must look out for further help from archæological research. Many perhaps will shake their heads at the first of these requirements. But without a more thorough investigation of the text we shall not be in a position to use archæological discoveries aright when we get them. Steuernagel for instance refers (113 *f.*; cp ASHER, § 1) to W. Max Müller's statement (*As. u. Eur.* 236 *ff.*) that in the inscriptions of Seti I. and Rameses II. a land of Aseru or As(s)aru is often mentioned as occupying W. Galilee. It is true, he declines to lay any great stress upon this, though, if the land of Aseru were named after the tribe of Asher, it would fit in with his view, independently obtained, that the Jacob-Rachel tribe was forced by the Aramæan migration into N. Gilead in the fourteenth century B.C. Others, however, are less cautious. Paton (*Syria and Pal.* 126) tells us that 'in an inscription of Sety we meet for the first time 'A-sa-ru (Asher), a Canaanite or Amorite tribe that subsequently was adopted into the Hebrew confederacy, and was classified as a son of Jacob by his concubine Zilpah.' Hommel too (*AHT* 228, 237) thinks that the Egyptian notices can be utilised for the history of the tribe of Asher. All this is precarious until the Hebrew texts have been more thoroughly explored. It must be admitted, indeed, that Hommel (as well as the present writer) has made a beginning in examining those OT passages which may have a bearing on the origin of the tribe of Asher; but here as elsewhere nothing short of a complete survey of the biblical texts (such as is begun in portions of the present work and will be continued and completed in *Critica Biblica*) will enable us to give a fairly satisfactory solution even of this comparatively small problem.

Very much more importance is attached by Steuernagel to the references to people called the Ḥabiri in the Tell el-Amarna letters (cp ASHER, 1, § 1; HEBER; HEBREW LANGUAGE, § 1; ISRAEL, § 3). These Ḥabiri are identified by Steuernagel with the Israelites, or at least with the Leah-tribe. This too fits in with his chronological theory; he infers from it that the Negeb was occupied by the Leah-tribe about 1400 B.C., and that the extension of this tribe over the central highlands of Ephraim took place towards 1385. Now in itself this dating of the conquest of central Canaan is plausible enough; it approximates to that given more vaguely by Winckler in 1895[1] (*GI* 1 14). It must, however, be stated that there is so much uncertainty about the names in the early Hebrew traditions, and such tricks are constantly played us by the ancient narrators who use the same name in different senses that for the present all such theories can only be put forward with great reserve.

It may be stated in conclusion that this is the reason why we have made no use in this article of the references to Israelitish tribes in the song of Deborah. Negatively, previous critics have done much for the text of this song—*i.e.*, they have pointed out many corruptions as probable. But very little of a satisfactory character has been done for the correction of the text; the old methods have once more proved their inadequacy. Here as elsewhere a fresh start in criticism must be made by the application of a broader text-critical method.

15. Conclusion.

We are also precluded from taking up any position

[1] Another explanation of 'Israel' is offered elsewhere (p. 62). But both 'El fights' and 'man of Rachel' must be incorrect. אל in names of the type ישראל does not mean 'God,' and no sound analogy can be offered for such a tribal name as איש רחל, out of which Steuernagel (as an alternative theory) doubtfully brings ישראל.

[2] On Steuernagel's view (p. 47) of the traditional representation of the Leah-Zilpah tribes, see ZILPAH, col. 5418, n. 2.

[1] For Winckler's latest statement of his view on the Ḥabiri see *AOF*(3) 90-94. Budde (*The Religion of Israel to the Exile* [1899], 6) may produce an impression that Winckler identifies the Ḥabiri with the Israelites. This, however, of course is not the case. Winckler expressly guards himself against being supposed to mean that the Ḥabiri are to be limited to 'Israelitish' tribes or clans.

as to the question, what traces (apart from any in the Jacob legend) the narrative books contain of changes in the dwelling-places of the migrating Israelitish tribes. A number of such traces are pointed out by Steuernagel. Asher, for instance, according to this critic (p. 30), may once have dwelt on what was afterwards the border-region of Ephraim and Benjamin. Issachar and Zebulun (p. 12), dwelt anciently in the central highland country (Mt. Ephraim). Dinah, Simeon, and Levi (p. 14 *f.*) were once settled near Shechem in Mt. Ephraim. (Steuernagel might plausibly have referred, in proof of Simeon's having belonged to N. Israel, to 2 Ch. 15 9; see, however, *Crit. Bib.* on Is. 9 7-10 4). Reuben (p. 15) once had his home NE. of Judah, in what was afterwards Benjamite territory. All these problems, however, assume a fresh aspect as the result of a continuous text-critical investigation of the Hebrew texts. To enter, at this point, on a piecemeal examination of selected passages would require too great an extension of this article, and the conclusions would not have the best chance of making a due impression on the reader.

The special articles in this work on the tribes, on the tribal 'mothers,' and on Jacob, should be consulted. The conclusions, sometimes tentative, may not always be in harmony, but in the present unsettled condition of the subject this could not be otherwise. The present writer is responsible for the view that the first war of Israel was for the possession of the Negeb, and that much in the OT which has been supposed to refer to districts of Canaan proper really refers to the 'Holy Land of the Israelites'—the Negeb, or N. Arabian border land. For a full critical monograph on the tribes of Israel see 'Die Israelitischen Stämme,' by B. Luther, *ZATW* 21 1-76 [1901]; cp also Bennett's article 'Tribe,' in Hastings' *DB* vol. iv.

T. K. C., §§ 1-8 11-15; G. B. G., § 9 *f.*

TRIBUNAL (κριτηριον: 1 Cor. 6 2 4 RVmg.; same word also in Jas. 2 6, EV 'judgment seat,' and in Ex. 21 6, Judg. 5 10 [not 𝔊A], Sus. 49 [Theod., not 𝔊87]; in 1 K. 7 7 for מִשְׁפָּט, *mišpāṭ* and in Dan. 7 10 26 for דִּין, *din*, ἡ κρίσις 𝔊87 in *v.* 26). Cp GOVERNMENT, § 15, LAW AND JUSTICE, § 8 *ff.*

TRIBUNES, MILITARY (χιλιαρχοι), Rev. 19 18, RVmg. See ARMY ('chiliarch'), § 10.

TRIBUTE. See TAXATION, and cp SOLOMON, § 6.

TRIPOLIS (τριπολις [VA]). It was at the haven at Tripolis (τοῦ κατὰ Τρίπολιν λιμένος) that Demetrius I., son of Seleucus, mustered the 'mighty host' and 'fleet' of which we read in 2 Macc. 14 1 *ff.* Cp MACCABEES, § 5. As its name indicates (see PHŒNICIA, § 21, col. 3759), Tripolis was divided into three quarters (separated by walls); it had been founded (not earlier probably than 700 B.C.) by Aradians, Tyrians, and Zidonians, and in Persian times Zidon, Tyre, and Aradus held a federal council in it. From 197 B.C. onwards it belonged to the Seleucidæ; but towards the end of that period it fell under usurpers or 'tyrants,' and was plagued by robber tribes from whom it was delivered by Pompey in 64 (see PHŒNICIA, § 22, col. 3763-4).

The modern Tripoli or Ṭarābulus, on the river Ḳadisha or Abu 'Ali, is situated in a fertile maritime plain covered with orchards and dominated by a castle overhanging a gorge of the river, some parts of which are, perhaps, the work of the crusaders. The port (el Mīnā) is about 2 m. distant, on a small peninsula (see PHŒNICIA, map).

TRIUMPH. Twice the Roman 'triumph' is referred to figuratively, and if the general meaning in one passage (Col. 2 15) is plain, in the other (2 Cor. 2 14) it is by no means plain. God, we are told in Col. *l.c.*, 'triumphed over' the angels opposed to Christ in the henceforth annulled bond of ordinances which had been directly hostile to men, and so had justified those angels (who had in fact promulgated those ordinances?) in their opposition. The words are—*ἀπεκδυσάμενος τὰς ἀρχὰς καὶ τὰς ἐξουσίας ἐδειγμάτισεν ἐν παρρησίᾳ, θριαμβεύσας αὐτοὺς ἐν αὐτῷ*, which the RV renders, 'having put off from himself the principalities and the powers, he made a show of them openly, triumphing over them in it.' In 2 Cor. *l.c.*, however, the rendering is disputed. The words are—*τῷ δὲ Θεῷ χάρις τῷ πάντοτε θριαμβεύοντι ἡμᾶς ἐν τῷ Χριστῷ καὶ τὴν ὀσμὴν τῆς γνώσεως αὐτοῦ φανεροῦντι δι' ἡμῶν ἐν παντὶ τόπῳ*, which the RV renders, 'but thanks be unto God, which always leadeth us in triumph in Christ, and maketh manifest through us the savour of his knowledge in every place,' whilst the AV gives to *θριαμβεύοντι* the sense 'causeth (us) to triumph,' in spite of the fact that the causative sense does not appear elsewhere. But, unless we desert the paths of natural exegesis, how *can* God be said to lead Paul and his companions in triumph? Does not *δι' ἡμῶν* in the following clause prove that Paul himself is supposed to be a member of the triumphal procession? Another point has to be mentioned. J. C. M. Laurent has pointed out that *vv.* 12 *f.* do not help our comprehension of the context; according to him, they are a marginal note (by Paul himself) on the statement in 1 16. 'The subject of *ἀγνοοῦμεν* (*v.* 11) and the nominative of *ἡμᾶς* (*v.* 14) are the same man, the apostle. The verb *θριαμβεύοντι* is excellently accounted for by the *αὐτοῦ* which precedes in *v.* 11.' It is over Satan that Paul 'triumphs.' The reference to a 'sweet odour' which follows harmonises with the figure of the 'triumph.' For during a triumph, sweet spices were burnt; as Plutarch (*Æmil.*) says, the streets were *θυμιαμάτων πλήρεις*. Paul's preaching of God, or of Christ, is as penetrating, as all-pervading, as the smell of incense. It was a brave sight—that of a Roman triumph—and worthy to be chosen by such an enthusiast for Christ and his victory as Paul. 'Rome was *en fête*, the streets gay with garlands, the temples open.' The procession, it is true, presented reminders that the Christian principle was not yet supreme. The best part was the end, when 'on reaching the temple of Jupiter on the Capitol, the general placed the laurel branch (in later times a palm branch) on the lap of the image of the god, and thus offered the thank-offerings' (see *EB*, art. 'Triumph').

TROAS (τρωας, Ti. WH, Acts 16 8 11 20 5 2 Cor. 2 12 *f.* 2 Tim. 4 13).

1. Name. The full name of the town was Alexandria Troas (Ἀλεξάνδρεια ἡ Τρῳάς, Strabo, 581; Ptol. v. 2 4; Liv. 35 42. The order ἡ Τρῳὰς Ἀλεξάνδρεια is found in Polyb. 5 111). One or other part of the full form was very commonly used to designate the place (Alexandreia in Strabo, 599 *et pass.*; cp Polyb. 5 78. Troas alone in NT, and Pliny, *HN*, 5 33, *ipsaque Troas*).[1] Troas is simply an adjective, which distinguishes the 'Trojan Alexandria' from the many other towns called after the great conqueror. Apparently the simple ἡ Τρῳάς is not used by Greek writers before the NT period, as leading to ambiguity. For ἡ Τρῳάς is the correct Greek equivalent for 'the Troad'—*i.e.*, the region between Mt. Ida and the Hellespont, which was the centre of the Trojan power in Homeric tradition. The 'Troad' (as the word is adopted in English) was spoken of by the Greeks as ἡ Τρῳάς from the time at least of Herodotus (5 122). In 2 Cor. 2 12 εἰς τὴν Τρῳάδα might therefore, so far as form goes, mean 'to the Troad'; but of course the word Alexandria must be supplied to limit the phrase to the city in question—unless we are prepared here to insist that Paul really meant the Troad and did not confine his visit to the Troad Alexandria.

2. History. Alexandria Troas (mod. *Eski-Stambūl*) was an important town and harbour on the coast of Æolis (Mysia) or NW. Asia Minor, opposite the SE. extremity of the island of Tenedos; it was half-way between Sigeium and Cape Lectum (which cape was rounded by the ship in passing from Troas to Assos, Acts 20 13). Alexandria was built by Antigonus, who gathered to it the population of the neighbouring small townships—Scepsis, Cebren, Neandreia, Larisa, Kolonai, Hamaxitos, and Chrysa (Strabo, 604; cp 593 597). The town was first named Antigonia Troas, after its founder; but subsequently Lysimachus changed this to Alexandria Troas (Strabo, 593; Pliny, *HN* 5 33, 'Troas, Antigonia dicta, nunc Alexandria, colonia Romana'). The importance of the city is seen

1 Many varieties are found—ἡ τῶν Ἀλεξανδρέων πόλις in Polyb. 21 10 *f.* In an inscription at Delphi (Ditten. *Syll.*(2), 268 = Michel, *Recueil*, 655) we have Τρὼς ἀπὸ Ἀλεξανδρείας followed almost immediately by Ἀλεξανδρεὺς ἐκ τᾶς Τρῳάδος. In Strabo, 134, we find Ἀλεξάνδρεια τῆς Τρῳάδος, just as in Paus. x. 12 4 we have Ἀλεξάνδρεια ἡ ἐν τῇ Τρῳάδι.

from the fact that, in the negotiations of Antiochus the Great with the Romans before the battle of Magnesia, the Syrian king offered to surrender 'the territories of Lampsacus and Smyrna as well as Alexandria Troas, which were the original cause of the war' (Polyb. 21 13); its extensive ruins, which for long have served as a quarry, bear testimony to its importance and prosperity. After the defeat of Antiochus the Great, Troas fell into the hands of the Romans and experienced many benefits from them. It was one of the few Roman colonies in Asia Minor (Strabo, 593; cp Plin. *HN*, *l.c.*). It dated from the time of Augustus; hence the coins bear the Latin inscription COL. TROAD.; COL. ALEX. TRO.; or COL. AUG. TRO., from which we may infer the name 'Colonia Alexandria Augusta Troas.'[1] Julius Cæsar was credited with a design of removing the capital of the Roman world to this place (Suet. *Jul.* 79), and perhaps Horace (*Od.* iii. 3 57) hints at the same design on the part of Augustus (cp also what is said of Constantine before he fixed upon the site of Constantinople, Zosim. 2 30; Zonar. 13 3). Augustus, Hadrian, and Herodes Atticus contributed to the beautification of the city. Herodes Atticus built the aqueduct of which remains can still be seen, and the baths were also probably his gift (see on the baths Koldewey, in *Athen. Mitth.* 9 36 *f.*).

Through Troas in Roman times ran the coast road which encircled the peninsula, and thus there was direct and easy communication with the interior by way of Adramyttium. From ADRAMYTTIUM (*q.v.*) a road ran NE. to Cyzicus on the Propontis, and thence towards the Bithynian frontier; a road also ran southwards to Pergamos. The former of these roads may well have been in the main that followed by Paul when he found it impossible to penetrate into Bithynia (Acts 16 7 *f.*); but the scantiness of the record here reduces us to conjectures which gain but little strength from the later traditions (see Ramsay, *Church*(5), 488, *Expos.*, Oct. 1888, p. 264; April 1894, p. 295). Similarly, when Paul was obliged to retire from Ephesus (Acts 20 1) to Troas (2 Cor. 2 12), he may have gone either by sea, or by the coast road which led through Adramyttium (more probably the coast road, if the circumstances of the departure from Ephesus are taken into account). The importance of Troas in the itineraries of the time in this region is shown by the references in 2 Cor. 2 12 and Acts 20 5—ships passing in either direction were certain to put in at Troas.

3. NT references.

In order to clear up all ambiguity, perhaps reference should here be made to a neighbouring town which also bore the name of Troy, *Novum Ilium*, which is quite distinct from Alexandria Troas. Novum Ilium (Grk. Ilion) claimed to occupy the veritable site of Homer's Troy, and all antiquity allowed this claim (cp Herod. 7 43; Strabo, 594; Diod. 18 4; Xen. *Hell.* i. 1 4) until it was disputed by Demetrius of Scepsis followed by Strabo; the discoveries of Schliemann have settled the question in the affirmative. In Alexander's time the site was a mere fortified post only occasionally occupied; but he designed the restoration of the town—a restoration finally effected by Lysimachus. Having been destroyed by Fimbria in 85 B.C., the town was once more restored by Sulla (Appian, *Mithr.* 53) as a favoured city exempt from tribute (Pliny, *HN* 5 33, cp Tac. *Ann.* 12 58, 'ut Ilienses omni publico munere solverentur,' in 53 A.D.). This generosity on the part of the Romans was due to their fond belief that the city was the original birthplace of their race; intrinsically the town was of no importance at all (cp Tac. *Ann.* 4 55) and in this respect was a great contrast to Alexandria Troas. W. J. W.

TROGYLLIUM (τρωγγλλιον, Acts 20 15 [TR], where, for παρεβαλομεν εις σαμον, τη δε εχομενη ηλθομεν εις μιλητον [WH], the TR has παρεβαλομεν εις σαμον και μειναντες εν τρωγυλλιω τη εχομενη κ. τ. λ. [For τρωγυλλιω there is the variant τρωγυλιω, which is apparently to be preferred: see WH 2 *App.* 98 n.]), Acts 20 15 AV, RVmg. (see end).

[1] In the time of Caracalla the coins bear the additional epithets 'Aurelia Antoniniana.' See Head, *Hist. Numm.* 470.

The island of Samos is separated from the mainland by a channel now called the Little Boghaz,[1] formed by the overlapping of its eastern promontory Poseidium (Cape *Colonna*) with the western spur of Mt. Mycale which was called Trogylium[2] (now Cape *Santa Maria*). The channel is about one mile wide (Strabo, 636, *ἐπίκειται δὲ τῇ Σαμίᾳ* [*sc.* Μυκάλη τὸ ὄρος] *καὶ ποιεῖ πρὸς αὐτὴν ἐπέκεινα τῆς* Τρωγιλίου *καλουμένης ἄκρας ὅσον ἑπταστάδιον πορθμόν*). Strabo (*l.c.*) also explains that Trogylium is a spur (*ἄκρα πρόπους*), of Mt. Mycale and that facing it there was an island of the same name. Pliny (*HN* 5 37) names three 'insulæ Trogiliæ,' viz., Psilon, Argennon, and Sandalion. The anchorage of Trogylium must have been well-known to sailors, for Strabo uses it as a point from which to measure the distance of cape Sunium in Attica (1600 stades to the W., *ibid.*; the two points lie practically on the same parallel of latitude). According to the maps, there is an anchorage a little to the east of the point, called St. Paul's Port (see Adm. Charts, 1530 and 1555).

Paul sailed through this channel on his way to Jerusalem at the close of his third missionary tour. After leaving the latitude of Chios the ship ran straight across to the eastern point of Samos (*παρεβάλομεν* in *v.* 15 need not imply stoppage at or off the harbour of Samos which lies 4 or 5 m. distant to the west of Trogylium: cp Thuc. 8 32). The night was spent in the anchorage of Trogylium, and Miletus was entered in the morning (see MILETUS). It is certain that there must have intervened a night between Chios and Miletus, and this can have been spent only at Samos or at Trogylium. The omission of the reference to Trogylium by the great MSS may be due to the idea that *παρεβάλομεν εἰς Σάμον* implied a stoppage during the hours of darkness at that port; this idea may have been strengthened by the existence of the variant *ἑσπέρᾳ* for *ἑτέρᾳ* in *v.* 15, for by implying that the passage to, or arrival at, Samos was postponed to a somewhat late hour, it made the further progress that same night to Trogylium impossible. The western text undoubtedly here preserves a true reading, and the reference to Trogylium should be retained (omitted, except in margin, by RV: 'touched at Samos; and [RVmg. many ancient authorities insert, "having tarried at Trogyllium"] the day after we came to Miletus.' See MILETUS, § 2. W. J. W.

TROOP. The words so rendered are:

1. גַּד, *gad*, Gen. 30 11 Is. 65 11; see FORTUNE, GAD, § 1.
2. גְּדוּד, *gĕdūd*, 2 K. 6 23, etc., 'band' (𝔊BA *μονόζωνοι*, 𝔊L *πειραταί*). See ARMY, § 3.
3. אֲגֻדָּה, *'ăguddāh*, 2 S. 2 25, RV 'band'. See above.
4. חַיָּה, *ḥayyāh*, 2 S. 23 11 Ps. 68 11 [10]. See BDB.
5. אֹרַח, *'ōraḥ*, Job 6 19, RV CARAVAN (*q.v.*). See also TRADE, § 83 [*b β*] col. 5195.
6. רֶכֶב, *rékeb*, Is. 21 7 RV. Cp CHARIOT, § 1.

TROPHIMUS (τροφιμος [Ti. WH]), an Ephesian disciple and companion of Paul, seems to have been with him in Greece during his third missionary journey, and along with Tychicus preceded the apostle to Troas, where he was joined by Paul and his party on their way to Syria. Trophimus was, apparently, a Gentile, and a mistaken impression that he had been introduced into the temple proper by Paul led to the uproar which resulted in Paul's being taken into custody and ultimately transferred to Cæsarea and Rome (Acts 20 4 21 29). The allusion to Trophimus in 2 Tim. 4 20 ('Trophimus I left at Miletus sick') is one of several which have made it necessary to postulate certain journeys of Paul of which the NT contains no direct record, if the genuineness of the Pastoral Epistles is to be maintained.

[1] The Great Boghaz is on the W. of Samos, separating that island from Icaria, and varies from 3 to 8 m. in width; this is the passage generally used by modern vessels of any size.

[2] Trogyllion is the form used by Ptol. 5 2; Strabo calls it ἡ Τρωγίλιος ἄκρα; Plin. *HN* 5 30 calls it Trogilia. Cp Steph. Byz *s.v.* Τρώγιλος. Trogylia in the Latin Western text.

The name of Trophimus closes the lists of 'the seventy' by the Pseudo-Dorotheus and Pseudo-Hippolytus, which state that he suffered martyrdom at Rome along with the apostle.

TRUMPET. 1. קֶרֶן, *ḳéren*, CΑΛΠΙΓΞ, Lev. 23 24, etc. See HORN, MUSIC, § 5 *a*.

2. שׁוֹפָר, *šōphār* (*i.e.*, 'ram's horn'; Ar. *sawāfir*, cp Egypt. *thupar*, Ass. *šapparu*, 'wild goat' and deriv. of *yōbēl*, below), Judg. 7 16, etc., *κερατίνη* (*τοῦ σαλπίζειν*, 7 20). See MUSIC, § 5 *a*.

3. חֲצֹצְרָה ,חֲצֹצֵר, *ḥăṣōṣēr*, *ḥaṣōṣerāh*, *σάλπιγξ*, 1 Ch. 15 24 2 Ch. 5 12 7 6 13 14 29 28†. See MUSIC, § 5 *b*.

4. יֹבֵל, *yōbēl*—*i.e.*, 'ram's horn,' so Ex. 19 13, RVmg., *σάλπιγξ*. See MUSIC, § 5 *a* and cp JUBILEE.

5. In Ezek. 7 14 MT has תָּקְעוּ בַתָּקוֹעַ, rendered in EV 'they have blown the trumpet' (𝔊 *σαλπίσατε* [*ἐν*] *σάλπιγγι*); תקוע, *tāḳōă'*, however, occurs nowhere else in the sense of trumpet. Cornill, therefore, followed by Toy, proposes to read תקעו תקוע, 'blaset nur.' See MUSIC, 5 *b*, end.

6. תְּרוּעָה, *terū'āh*, Nu. 29 1, etc., see TRUMPET-BLOWING.

TRUMPET-BLOWING, DAY OF (יוֹם תְּרוּעָה, EV 'day of blowing of [AV insert 'the'] trumpets'; ΗΜΕΡΑ CΗΜΑCΙΑC; *dies clangoris et tubarum*: Nu. 29 1), or, MEMORIAL OF (זִכְרוֹן ת׳; ΜΝΗΜΟCΥΝΟΝ CΑΛΠΙΓΓΩΝ; *memoriale clangentibus tubis*: Lev. 23 24). According to Lev. 23 24 P Nu. 29 1 P_2, the first day of the seventh month was to be 'a day of solemn rest' on which 'no servile work' was to be done, a holy convocation, a day, or memorial, of *terū'āh*. See further JUBILEE, § 1, NEW MOON, NEW YEAR, YEAR § 8 (near end), and, on the shape of the ritual trumpets, MUSIC, § 5 (cp fig. 10).

The word *terū'āh* is used sometimes in the sense of joyful shouting (Job 8 21 Ecclus. 39 15 [Heb.] 1 S. 4 5 Ezra 3 11 13 Nu. 23 21), sometimes in that of the battle-shout or alarm of war (Am. 1 14 Jer. 4 19 49 2 Josh. 6 5 20). Nu. 31 6 speaks in this connection of 'the trumpets for the alarm' (חצצרות התרועה). That *terū'āh* in the passages cited means 'trumpet-blowing' (cp Nu. 10 10 Ps. 27 6 89 16 [15]) follows from the law which enjoined that trumpets were to be blown at each new moon.

TRUTH. The Heb. אֱמֶת, *'ĕmeth* (√אמן, 'to be firm'), requires to be rendered differently according to the context; the EV, sometimes so needlessly addicted to a variety of rendering, is here as needlessly consistent in its adherence to the rendering 'truth.' As a general rule, 'faithfulness,' 'trustworthiness,' 'permanence' 'sureness,' 'sincerity,' are at least as likely to be the right rendering of *'ĕmeth* as 'truth'; indeed, where *'ĕmeth* is spoken of as a divine attribute, we may constantly substitute 'faithfulness' for the 'truth' of EV. In the NT a different group of renderings is called for. The NT was not written, nor were the discourses on which, ultimately, portions of it are based,[1] spoken in biblical Hebrew; it is a Greek book, though with more or less Semitic colouring. Besides this, the religion which its writers support was a struggling religion; its writers are conscious of antagonism to other forms of religion which has a direct bearing on the sense or senses in which they use the word *ἀλήθεια*. A complete examination of passages containing the word 'truth' in the EV is impossible.

1. Heb. and Gk. terms.

A few may, however, be referred to, and alternative, even if inadequate, renderings may usefully be suggested.

Gen. 32 10, 'I am too small for all the lovingkindnesses and for all the faithfulness' etc.; Ex. 18 21, 'trustworthy men'; Dt. 32 4, 'a God of faithfulness' (so RV); 1 K. 2 4 2 K. 20 3, 'walk in sincerity'; 2 K. 20 19, 'peace and permanence'; Ps. 25 5, 'Direct me with thy faithfulness' [personified]; Ps. 31 5, 'faithful God'; Ps. 51 6, 'Thou desirest sincerity'; Ps. 85 10, 'Lovingkindness and faithfulness are met together' (similarly always, for 'mercy and truth'); Ps. 119 142, 'Thy law is sureness (itself)'; Is. 42 3, 'he shall declare the law faithfully'; Jer. 5 3, 'Are not thine eyes upon sincerity?'

Both in OT and in NT the duty of truth-speaking is urged; and the Psalter shows how deeply the teaching of the prophets had penetrated Jewish minds. This is one of the points in which Judaism and Zoroastrianism manifest their inward affinity. The substitution of 'faithfulness' for 'truth' in no degree obscures this; and of course there are passages enough in which 'truth' is the only possible rendering of *'ĕmeth* (*e.g.* Ps. 15 2 Prov. 8 7 12 17 19 23 23 Dan. 8 12). In Dan. 8 12 the 'truth' spoken of is apparently the religion of Yahwè. No complete parallel to this occurs in the NT, because 'the truth of the gospel' (Gal. 2 5 14) is not bound up with an elaborate cultus, but is simply life in Christ. Certainly this life is impossible without an act of obedience to the divine will. There is a lawgiver who bids us repent and believe, in order that we may have life in Christ. Consequently we have the singular phrases, 'those who disobey the truth' (*τοῖς . . . ἀπειθοῦσι τῇ ἀληθείᾳ*, Rom. 2 8) and 'those who do not obey the gospel' (*τοῖς μὴ ὑπακούουσι τῷ εὐαγγελίῳ*, 2 Thess. 1 8).

The difficulty in grasping the sense to be assigned to *ἀλήθεια* is greatest in the Johannine gospel and epistles.

2. ἀλήθεια in Jn.

This and the connected forms occur not less than eighty times in this literature. The writer's individuality is very manifest in this; he is almost like a Zoroastrian in his intense love of truth and hatred of falsehood. 'The father of the liar is the devil in whom there is no truth' he says (Jn. 8 44).[1] And in the address of a letter to friends he thinks it worth while to say 'whom I love truthfully' (*ἐν ἀληθείᾳ*, 2 Jn. 1). This hatred of shams suggests the peculiar form of his theology or Christology. Christ is *ἡ ἀλήθεια* (Jn. 14 6); he is full of *ἀλήθεια* (Jn. 1 14). How shall we render *ἀλήθεια*? As Jn. 14 6 shows, it is one aspect of *ζωή*, 'life,' and as its combination with *ὁδός*, 'way,' in that passage and with *χάρις*, 'liberality,' in Jn. 1 14 shows, it is something which God in and through Christ generously communicates to man. It is therefore not a bundle of intellectual truths; it is a share of the divine nature; it is real as opposed to seeming existence. *ἀλήθεια* then is strictly 'reality,' and 'full of grace and truth' means 'full of self-communicating divine life'; or, in plainer English, 'full of a gift of real life.'[2] Certainly this can be given only to those who have some inward affinity to it, to those at least who are hungry for 'the bread of life' (Jn. 6 35). Such persons are 'of the truth,' *ἐκ τῆς ἀληθείας* (Jn. 18 37; cp *ἐκ τοῦ θεοῦ* 8 47); it is their destiny to become free; the 'truth,' manifested in the Son, can make them free, make them 'sons of God' (Jn. 8 32 36 1 12, cp Rom. 8 21). The work of Jesus is to 'bear witness of the truth' (Jn. 18 37); and when he 'goes away to the Father' he will ask the Father to send a never-failing representative of himself, 'the spirit of truth' *τὸ πνεῦμα τῆς ἀληθείας* (Jn. 14 17). This 'spirit' also bears witness, because the spirit is *ἡ ἀλήθεια* (truth itself), 1 Jn. 5 6. Still the fact remains that it is 'he that has the Son' that 'has life' (1 Jn. 5 12), and the Son (*i.e.*, the Christ), even when he has 'gone away,' 'comes' to the disciples, indeed to each individual disciple (Jn. 14 18 21). The spirit of *ἀλήθεια*, therefore, by abiding in the disciples, enables them to 'behold' him (*θεωρεῖτε*, Jn. 14 19) in a degree in which this would otherwise be impossible. And through this supreme vision, they will make ever fresh progress in 'life' and in 'reality' (Jn. 14 19).

To return to this *ἀλήθεια* or 'reality.' It has primarily to do with moral life; it is not an idea to be thought, but a deed to be done (Jn. 6 29, *τὸ ἔργον τοῦ θεοῦ*, 'the work which God wills'; Jn. 3 21 1 Jn. 1 6 *ποιεῖν τὴν ἀλήθειαν*). Its opposite, when so regarded, is 'to practise ill,' or 'to walk in darkness,' for the writer has almost a Zoroastrian's love of the symbol of Light (see LIGHT). But 'reality' extends from the moral to the intellectual sphere. There is but one

[1] Cp Dalman's remark, *Die Worte Jesu*, 15 (foot), 16 (top).

[1] Lachmann's conjecture (*Test. Gr.* 2, Præf. p. vii) *ὃς ἂν λαλῇ τὸ ψεῦδος* should probably be accepted; 'Whoever speaks a lie speaks of that which is his own, for his father also is a liar.' The verse now becomes intelligible. It belongs probably to the editor, who rightly explains *vv.* 41, 44 (cp *v.* 55).

[2] The *καί* in *χάρ. καὶ ἀληθ.* is the *καί explicativum*. So, in Jn. 4 24, *ἐν πνεύματι καὶ ἀληθείᾳ* means 'in the spirit, with reality.'

'Light' (Jn. 1_4), and in bearing witness of this 'Light' the 'spirit of reality' is insensibly led on to the disclosure of great intellectual truths. 'He shall teach you all things' (Jn. 14_{26}), 'shall guide you in the whole truth' (Jn. 16_{13}), the truth of the primeval Reason (λόγος), and also the truth of things that are to come (Jn. 1_1 *ff.* 16_{13})—in accordance with the longing of the primitive age for an apocalypse of the winding-up of the world. There is one other writing in which ἀλήθεια, real as opposed to merely speculative truth, is specially prominent—the Epistle to the Ephesians. Certainly ἀλήθεια is still somewhat restricted in its application. The full scope of 'real truth' is so wide that it needed another name—σοφία, 'wisdom,' or γνῶσις, 'knowledge.' The fear of the Lord is the beginning of wisdom, said the wise man of old; this fear of the Lord to the Christian teacher is ἀλήθεια. To it δικαιοσύνη, 'righteousness,' and ὁσιότης, 'piety,' are ascribed (Eph. 4_{24}); and the fruit of righteousness is 'in righteousness and reality' (Eph. 5_9). 'The word of real truth' (τὸν λόγον τῆς ἀληθείας) is the 'Gospel of your salvation' (Eph. 1_{13}; cp 2 Tim. 2_{15}). Hence disciples are 'taught in Christ, even as real truth is in Jesus' (Eph. 4_{21}). Naturally, truth-speaking is one of the chief duties of such disciples (Eph. 4_{25}), but only as one expression of that 'truth' or 'reality' which is the first part of their 'panoply' (Eph. 6_{14}). In Eph. 4_{15} ἀληθεύειν ἐν ἀγάπῃ (RV 'speaking truth [mg. dealing truly] in love') means more than 'speaking truth charitably'; it is both speaking and practising that real truth which Christ embodied.

3. ἀληθής, ἀληθινός in Jn. etc.

The use of the adjectives (ἀληθής, ἀληθινός) should also be studied. Both are specially frequent in the Johannine Gospel and Epistles. Note especially Jn. 6_{55}, 'my flesh is a true meat' ἀληθής ἐστι βρῶσις—*i.e.*, 'a food which really, permanently nourishes'; Jn. 1_9 'the very light' ('very' as in the Nicene Creed, 'very God' = θεὸς ἀληθινός), 'the true light' τὸ φῶς τὸ ἀληθινόν; Jn. 15_1 'the vine rightly so-called,' ἡ ἄμπελος ἡ ἀληθινή; Jn. 17_3 'the only, veritable God,' τὸν μόνον ἀληθινὸν θεόν. Trench[1] compares Plato, *Tim.* 25*a*, πέλαγος ὄντως ἀληθινὸς πόντος, 'an ocean worthy of the name.' But Hebrew has similar phrases, אֱלֹהֵי אֱמֶת, *ĕlōhē 'ĕmeth*, 'a real God' (2 Ch. 15_3); לֶחֶם אֱמֶת, *léḥem 'ĕmeth*, 'true, unfeigned hospitality,' חֶסֶד שֶׁל אֱמֶת, *ḥésed šel 'ĕmeth*, 'true, unfeigned charity' (quoted in Jastrow, *Dict.* 79). ἀληθινός is also frequent in Revelation, but, except in 3_7, always with the meaning 'trustworthy.'

The use of ἀληθινός (EV 'true') in Jn. 1_9 4_{23} 15, etc. Heb. 8_2 (cp 𝔊 Jer. 2_{21} ἀληθινήν = זֶרַע אֱמֶת) is very characteristic of the writers' belief in heavenly patterns of earthly things. Wycliffe has the fine phrases 'a verey light,' 'a verrei vyne,' 'the verrei tabernacle'; but in Jn. 4_{23} 'trewe worshippers.'

On the Johannine use of ἀλήθεια (reality) see H. Holtzmann, *NT Theol.* 2 378; Wendt (*Die Lehre Jesu*, 2 200 *ff.*) gives the term perhaps too prominently an ethical sense ('righteous'). Further, on the presuppositions of the Johannine term, see Holtzmann, *op. cit.* 2 374 *f.* T. K. C.

TRYPHENA, or rather, as in RV **Tryphæna** (τρυφαινα), and **Tryphosa** (τρυφωσα), 'who labour in the Lord,' are saluted in Rom. 16_{12}. They appear to have been deaconesses, and not improbably were sisters.

The name Tryphosa is met with in Carian inscriptions (cp *CIG* 2 2819 2839), and among the monuments of the imperial household in the first century; Tryphæna appears in the apocryphal *Acts of Paul and Thecla* as the wife of Polemo king of Cilicia. Gutschmidt has shown that there really was a queen of that name, of Mauretanian origin; she was repudiated by her husband Polemo II. of Cilicia about 40 A.D. She afterwards lived under the emperor Claudius in Roman territory at Antioch in Pisidia (see Lipsius, *Apokr. Ap.-Gesch.* 3 464-5).

1 *New Test. Synonyms*, 31.

TRYPHON[1] (τρυφων [ANV]; cp τρυφων, Waddington, no. 2711 and perhaps טרפון the name of a Rabbi upon a Hb. inscr. quoted by Euting, *SBAW* 16th July, 1885, no. 47), of Apamea, formerly an adherent of Alexander Balas, took advantage of the disaffection prevailing among the troops of DEMETRIUS II. to obtain the person of ANTIOCHUS (*q.v.* 4), the young son of Balas, whom he used as a puppet to gratify his personal ambitions. Supported by the soldiers of Demetrius, Tryphon was enabled to defeat his rival and win over Antioch (1 Macc. 11_{39} *ff.*). The allegiance of Jonathan and the Maccabæan party was gained (*vv.* 57 *ff.*), and his position became gradually stronger. At last he was able to throw over Antiochus; but fearing lest the power of the Maccabees might be inimical to his interests, he found it necessary to march against Jonathan. They met at Bethshan, and, by a stratagem, Jonathan was captured. Taking his prisoner with him Tryphon proceeded to Jerusalem, but was intercepted at Adida by Simon, Jonathan's brother. Tryphon pretended that the detention was due to the non-payment of revenues, and thus obtained a ransom for his prisoner, whom, however, he failed to hand over; and, at last, irritated by two futile attempts to reach Jerusalem, slew Jonathan at Bascama (143 B.C.; 13_{1-23}); see JONATHAN. Tryphon's next step was to seize the throne,[2] a proceeding which resulted in Simon and Demetrius II. forming an alliance against their common enemy (13_{31} *ff.*). When Demetrius was a prisoner in Persia his younger brother (Antiochus Sidetes) continued the struggle, and Tryphon was forced to flee to Dora, and thence by successive stages to Ptolemais, Orthosia, and finally to Apamea, where after a brief reign of three years he perished (Jos. *Ant.* xiii. 7_2). See SELEUCIDÆ, § 14.

TUBAL (תֻּבַל, תּוּבַל; θοβελ, once [A Ezek. 39_1] θοβερ; once [Ezek. 27_{13}] η συμπασα [B], τα σ[υμ]παντα [A; see also Q[mg.] Ezek. 32_{26} 38_2]; *Thubal*) and MESHECH (מֶשֶׁךְ; Sam. מושך, מושיך; μοσοχ [in Ezek. 27_{13}, τα παρατεινοντα]; *Mosoch*). We shall first of all collect the exegetical data presented in MT, and state the current theory based upon these data; we shall then endeavour to put the question in a new critical light. As the text stands, Tubal and

1. Tubal = Tibareni?

Meshech are always mentioned together except in Is. 66_{19} (but see 𝔊), where Tubal and Javan are mentioned together as distant nations, and in Ps. 120_5, where, strangely enough, 'Meshech' (𝔊 ἐμακρύνθη) is ∥ to 'Kedar,' the second in order of the sons of Ishmael, and in 1 Ch. 1_{17} (om. 𝔊[B]) where Meshech is introduced as last in order of the sons of Shem. In Ezek. 27_{13} Tubal and Meshech appear as supplying Tyre with slaves and vessels of brass. In 32_{26} they are among the nations which have gone down to Shĕōl—*i.e.*, have suffered some great reverse. In 38_2 *f.* (μεσοχ [BQ], μοσοκ [A *v.* 3]) 39_1 (μεσοχ [B]) they are mentioned as under the rule of Gog. Since Bochart they have been usually identified with the Moschi (μόσχοι) and Tibareni (τιβαρηνοί) who are named together by Herodotus (3 94 7 7). In the Ass. inscriptions (see Schrader, *KAT*[(2)] 82 *ff.*, *KGF* 155 *ff.*; Del., *Par.* 250 *ff.*; Winckler, *GBA* 172) their territory is extended farther S. than in Herodotus, the *Tabali* up to Cilicia, and the *Muški* NE. of the Tabali. According to Gelzer and Schrader, a part of the Tabali, together with the Muški, had been driven N. by the Gimirrai (the Κιμμέριοι; see GOMER) to the seats where they were in the time of Herodotus. Ašur-bani-pal's inscriptions report that the tribute of Tabal consisted entirely of 'great horses.' Cp HORSE, § 3 (Tabal was close to Cilicia).

1 This name (which means *débauché*) was given to Diodotus, for that was his real name, after his victory over Demetrius II.

2 Whether he really slew the young king at this juncture (so 1 Macc. 13_{31}) is uncertain; see *Camb. Bible, ad loc.*

It so happens, however, that all the passages in which Tubal and Meshech are mentioned are among those which labour under a strong suspicion of having been manipulated by editors, who approached the already corrupt texts with most inaccurate preconceived opinions.

2. A N. Arabian Tubal?

In the true text of Is. 66 19 the nations referred to are probably those which bordered on S. Palestine, viz., Ashḥur (Geshur), Zarephath, Jeraḥmeel, Cusham, Tubal, Jaman; the names are used conventionally, and drawn from earlier sources. 'Cusham' corresponds with the μοσοχ of 𝔊, and means the N. Arabian Cush (see CUSH, 2). 'Tubal,' as 'Tubal-kain' (where -kain [see TUBAL-CAIN] is equivalent to 'Kenites') the name of a son of Lamech (=Jeraḥmeel), suggests, is a N. Arabian ethnic; we meet with it in 1 K. 16 31 under the disguise of אתבעל (see PROPHET, § 7, col. 3862, n. 1), and in Is. 7 6 under that of TABEAL [*q.v.*], and there is an echo of it in the name of the patriarch Bethuel, in the place-name Bethul (Josh. 19 4), also in Tob (land of), and in the personal names TEBALIAH, TOBIEL, TOBIJAH.

Ps. 120 5 has been very much misunderstood; but none of the critical commentators affects to suppose that the explanation which he gives is quite satisfactory. The reference to N. Arabian oppression in the Psalms is so pervasive (see PSALMS, §§ 28 *ff.*) that we cannot hesitate to read, 'Woe is me that I sojourn in Cusham' (for parallels see SHECHEM). On 1 Ch. 1 17 see below. In Ezek. 27 13 the right reading is approximately 'Jaman (or Jamin = Jeraḥmeel), Tubal, and Cusham.' Their merchandise is, besides 'vessels of brass (or, bronze),' not 'human persons,' but ivory (read שֶׁנְהַבִּים, cp 1 K. 10 22). In Ezek. 32 26 'Tubal' and 'Cusham' (so read) are beyond doubt N. Arabian peoples; 'Asshur' and 'Elam,' or rather Ashḥur and Jeraḥmeel, precede, 'Edom' and 'the Zidonians,' or rather 'Edom' and 'the Miṣrites' follow. In 38 2 39 1 Gog is the representative of the collective N. Arabian power—the 'Zephonite' of Joel 2 20; 'Tubal' and 'Cusham' are again required.

We have reserved for the end the Chronicler's representation of Meshech as a son of Shem in 1 Ch. 1 17 (μοσοχ). In Gen. 10 23 MT gives MASH (*q.v.*). Critics (*e.g.*, Kittel, Benzinger) agree in rejecting the Chronicler's reading. In truth 'Meshech' *is* wrong, but not more wrong than 'Mesheh' in *v.* 5. The right reading in both passages is 'Cusham.' The same names occur in Gen. 10 from which the Chronicler borrows more than once. The significance attached by critics to the Table of Nations is out of all proportion to its real worth. See *Crit. Bib.* T. K. C.

TUBAL-CAIN (תּוּבַל קַיִן; θοβελ [AEL]; *Tubal-cain*), one of the sons of Lamech (Gen. 4 22)†. See CAINITES, § 10, where the view is taken that Tubal-cain is a humanised god (cp Gunkel, *Gen.* 48, 'vielleicht verklungene Götter'?), and the text is emended in accordance with Kautzsch and others, omitting לטשׁ (*lōṭēš* = a hammerer??) and inserting אֲבִי, 'father of.' The theory of a N. Arabian Tubal (see TUBAL, § 2), however, compels us to recommend another view in preference. Tubal-cain = Tubal of Ḳain—*i.e.*, the Kenite Tubal—is the eponym of a N. Arabian people of mercantile habits, who brought 'ivory and vessels of brass' to the market of the great Miṣrite capital (cp Jer. 15 12, as explained under ZAPHON). That the home of Tubal *is* in N. Arabia, we cannot pause here to show (see TUBAL, § 2); but the result seems unassailable. The mysterious word לטשׁ (MT *lōṭēš*) can now be explained. Like קין, it is a collective term for a N. Arabian people—viz., the LETUSHIM, mentioned in Gen. 25 3 among the sons of Dedan, between the Asshurim (= Ashḥur or Geshur) and the Leummim, or rather the Jeraḥme'elim. The name of the third son of Lamech (*i.e.*, Jeraḥmeel), therefore, is possibly Tubal of Kain and Leṭesh (to distinguish him from any other Tubal). The alternative is, not any of the renderings mentioned by Dillmann and Delitzsch, but a still more searching criticism (see *Crit. Bib.*).

𝔊 has καὶ ἦν instead of Καιν; originally perhaps it had all three words. καὶ ἦν would make up for the loss of אֲבִי, which analogy requires us to supply. Cp Budde, *Urgesch.* 139 *f.*

T. K. C.

TUBIENI (ΤΟΥΒΙΑΝΟΥϹ [V]), 2 Macc. 12 17, RVmg 'men of TOB' (*q.v.*).

TUMOURS (עפלים), 1 S. 5 6 9 12 6 4 *f.* 11 17 RV, AV EMERODS (*q.v.*).

TUNIC occurs only in Dan. 3 21 for the Aram. פטשׁ (see BREECHES, 2), and in Jn. 19 23 RVmg for χιτών, (EV 'coat'); but 'tunic' admirably suits the Heb. *kuttōneth*, כֻּתֹּנֶת, from which, indeed, the Lat. *tunica* has possibly arisen by metathesis through the medium of the Greek χιτών (cp PHŒNICIA, § 7).

1. Ordinary tunic.

The Hebrew *kuttōneth* (of uncertain derivation; but cp probably Ass. *kitinnê*, linen, cloth; see Zehnpfund, *Beitr. z. Ass.* 1 532), commonly rendered 'coat,' was a short, sleeveless garment worn next the body and held together by a girdle of linen, leather, etc. (GIRDLE, 2). As a garment for females it was doubtless longer, and appears to have answered to the *śimlah* worn by men (in Cant. 5 3 it is put off at night-time); see MANTLE. The *kuttōneth* has evidently been derived in the first instance from the GIRDLE (1), and in Gen. 3 21 is a simple covering made of skins. In later times it was made of wool or flax, but would naturally vary in fineness according to the wearer's taste and means. Besides being a priestly garment (see below, § 2), the *kuttōneth* is worn also by men of distinction as an official 'robe' (Is. 22 21 EV). A distinctive garment of this nature is implied in Joseph's *kĕthōneth passīm*, כְּתֹנֶת פַּסִּים (Gen. 37 3 23 32), which, as we learn from a gloss in 2 S. 13 18, was worn also by the maiden daughters of a king. It appears to have been a long garment with sleeves (cp RVmg. Gen. *l.c.*),—thus resembling the Ionian χιτών—and was perhaps of Canaanite origin.[1] It is difficult to determine from the monuments whether an inner garment or tunic was worn as well as the outer robe or mantle. On the whole, everything points to a very general simplicity in matters of dress. See further MANTLE, § 1.

Other varieties of the tunic were adopted by the Jews in the Roman period (DRESS, § 4 end), among them the *ḥālūḳ* (חָלוּק), an under-robe reaching to the heels. It was commonly made of wool; but linen and even papyrus was used.

The Greek χιτών[2] (in NT 'coat,' Mt. 10 10 Acts 9 39 etc.; 'garments,' Jude 23), like *kuttōneth*, is applied to an under-garment and thus distinguished itself from ἱμάτιον, the richer outer garment (see MANTLE). This forms the point of the Logion in Mt. 5 40; it is otherwise in Lk. 6 29, where the transposition (χιτ. 'coat' following ἱματ. 'cloke') indicates the order in which the garments would be torn off. In its appearance the χιτών was sometimes a short woollen shirt without sleeves (Dorian), and sometimes a long linen tunic reaching to the feet (Ionian); see *Dict. Class. Ant.*, *s.v.* 'Tunica'.

2. Priestly tunic.

The *kuttōneth* was worn by all priests (Ex. 29 8 40 14 Lev. 8 13 10 5).[3] It was made of fine linen and is described by Josephus (*Ant.* iii. 7 2) as a fine linen vestment διπλῆς σινδόνος βυσσίνης called χεθομένη, from χέθον 'linen.' It

[1] Sleeves appear to be referred to also in Is. 52 10 Ezek. 4 7. Joseph's 'coat of many colours' ('pieces' mg.) is highly improbable and must be given up, although with regret. פס seems to mean (as in Aram.), palm (of hand) or sole (of foot); so 𝔊 (in Sam.) χιτὼν καρπωτός [BA, Aq.], χ. ἀστραγαλωτός [L], χ. χειριδωτός [Sym.]. See also Nestle, *ZNTW* 1902, p. 169, who suggests the meaning 'seamless coat,' and points to the parallel with Jn. 19 23.

[2] In 𝔊 it regularly renders כֻּתֹּנֶת, but also בֶּגֶד (thrice), and (once each) מַד (see DRESS), and מעיל (MANTLE, § 2 [6]).

[3] Plur. of all the priestly garments, Ezra 2 69 Neh. 7 70 72 EV 'garments'; cp χιτῶνες Mk. 14 63 EV 'clothes.'

reached down to the feet (ποδήρης) and fitted close to the body, and had sleeves which were tied fast to the arms. The garment was girt to the breast by a girdle (cp GIRDLE, 5), and had a narrow aperture about the neck. Josephus adds, moreover, that it was called μασσαβάνης (var. *massabazan*, etc.). The high priest's *kuttōneth*[1] was, according to Josephus (*Ant.* iii. 7 4), the same as that of the rest of the priests; but the name given to it in Ex. 28 4, *kĕthōneth tašbēṣ* (כתנת תשבץ, 'broidered coat,' RV 'coat of chequer work'), shows that some particular kind of tunic is meant.

Unfortunately the exact signification of תשבץ is uncertain. It is to be connected doubtless with the משבצות of Ex. 27 11 etc. on the one hand, and probably with the *massabazan* (=משבץ) of Josephus (*l.c.*), on the other. The root-meaning of שבץ is supposed to convey the idea of intertwining (cp Dr. on 2 S. 1 9), in which case the משבצות would be some kind of filigree-work for jewels (see OUCHES, and cp EMBROIDERY, § 3), whilst the priestly garment might well represent some woven garment, not necessarily seamless,[2] but ornamented and adorned with various patterns. The Targ. on Ex. 28 4 renders כתונא מרמצא—that is, perhaps, a garment woven into patterns, but this is not certain. In Assyrian *ramāṣu* seems to mean 'set with jewels' (see Del. *HWB* 624 *b*). 𝔊BAL read χιτ. κοσυμβωτόν,[3] which suggests a tasseled or fringed garment. Cp FRINGES.

I. A.—S. A. C.

TURBAN. Instead of restricting ourselves to the voluminous cloth-wrapper with which the word turban is associated, it will be convenient under this heading to deal generally with head-coverings of all kinds.

1. Varieties.

A head-covering is not an indispensable protection, like the GIRDLE (*q.v.*) for instance. It does not appear to have been worn in Europe in the earliest times, and the monuments of Egypt and Babylonia clearly prove that even in those countries, too, it was not in habitual use. Not unfrequently, a narrow fillet encircles the head and binds the hair close. This custom is widespread among both sexes, and is frequently met with in Assyria and adjacent countries. Shishak's Hebrew prisoner at Karnak is thus depicted. Naturally this fillet varied in material and ornamentation, and a good example of the elaborate nature of an Assyrian fillet is seen in Perrot-Chipiez (*Art in Chald.*, etc., 1 105); cp CROWN, DIADEM. Some covering like the modern *keffīyeh* must, however, have been in use among the Hebrews. The *keffīyeh* is a square or oblong piece of wool or silk, folded triangularly and tied by a cord, *'agāl*, which protects not only the head, but also the neck, cheeks, and throat. Coverings more or less approximating to this are seen in monuments from Assyria (*op. cit.* 2 129, fig. 62; cp WMM *As. u. Eur.* 139), and were worn in Palestine (*As. u. Eur.* 294 *f.*). The turban proper was perhaps a later introduction among the Hebrews, although a certain variety of it seems to have been worn at an early time by the nomad inhabitants of the Sinaitic peninsula (*As. u. Eur.* 138 *f.*).

A specifically feminine attire, confined (it would seem) to Palestine, is the long garment worn by the women of Lachish. It covers the head, with the exception of the face, and descends over the back to the feet, thus bearing a general resemblance to the classical *flammeum*.

A covering of the nature of the turban is no doubt implied in the post-exilic term *ṣānīph*, צָנִיף (√to wind in a coil, cp Is. 22 18), which was worn by the noble of both sexes (Job 29 14 'diadem,' RV^mg. 'turban,' Is. 3 23 'hoods,' RV 'turbans,' cp Is. 62 3 'diadem,' and Ecclus. 47 6 *c* of David [διάδημα]), and even by priests (Zech. 3 5 κίδαρις

2. Hebrew terms.

[1] For the 'tunics' (כתנות) mentioned between the 'breeches' and 'robe' in Ecclus. 45 8 *c*, the sing. should doubtless be read with 𝔊BNA ποδήρης.

[2] The *mĕ'īl*, we know, was seamless; cp MANTLE, § 2 [7]. The meaning of בִּגְדֵי הַשְּׂרָד (Ex. 31 10, etc.), too, is obscure; cp col. 1137, n. 1, and see Baentsch, *ad loc.*

[3] Cp κοσυμβοι [AFL; -ωτοι, B] for the verb שבצת Ex. 28 39 (treated as a plu. constr.), and for the שביסים of Is. 3 18 (see CAUL, and NECKLACE, 2 n.).

'mitre,' RV^mg. 'turban,' 'diadem').[1] A similar allusion is found in Ezek. 16 10 (וָאֶחְבָּשֵׁךְ בַּשֵּׁשׁ, RV^mg. 'I bound thee with *a tire of* fine linen,' cp Orelli, Co., etc.).[2] The *ḥăbālīm* (חֲבָלִים, σχοινία, EV 'ropes') of 1 K. 20 31 sometimes taken to represent a primitive substitute for a fillet for the hair (so Nowack, *HA* 1 125, Benzinger, *HA* 104), may be taken otherwise to express the submissiveness of the men referred to. Ahab might drag them away as captives, and they would not resist.[3] This agrees with the mention of sackcloth girt around their loins, as a sign of humiliation. Of the particular form of the *'ăphēr*, אֲפֵר, of 1 K. 20 38 41 † RV ('headband') we are ignorant; the context, however, shows that the wearer could cover his face with it, in which case it may have resembled the *keffīyeh* (cp Ass. *aparu*, *apru*, covering, head-gear).[4]

A head-dress of some elaborate nature and of Babylonian origin is alluded to in Ezek. 23 15 סְרוּחֵי טְבוּלִים בְּרָאשֵׁיהֶם (EV 'exceeding in dyed attire' RV^mg. 'dyed turbans'). According to Delitzsch (Baer, *Ezek.* p. xii.), *ṭĕbūlīm* = Ass. *ṭublu*, 'turban,' but the word does not seem to be substantiated.[5] Another head-dress more ornate than the ordinary turban is the *pĕ'ēr* (פְּאֵר), which may have tapered to a point. It is worn by people of distinction, male (Ezek. 24 17 23, EV 'tire') and female (Is. 3 20 AV 'bonnet,' RV 'head-tire'), by priests (Ex. 39 28 Ezek. 44 18, AV 'bonnet,' RV 'tire'), and by the bridegroom (Is. 61 3 10), see CHAPLET.

It is not unlikely that we may find in the *pĕ'ēr* the well-known conical head-gear worn by warriors, kings and gods of Assyria, Babylonia, and of the Hittites?[6] At all events it is exceedingly probable that this particular covering is the kind alluded to in the *karbĕlā*, כַּרְבְּלָא, of Dan. 3 21 (AV 'hat'[7] mg. 'turban,' RV 'mantle') which, from its shape, signifies in later Jewish-Aramaic and Syriac 'cock's comb.' The Gr. Ven. correctly renders by κυρβασία, which is actually likened to a cock's comb in Arist. *Av.* 487. The RV rendering 'mantle' relies too much upon the doubtful מְכֻרְבָּל of 1 Ch. 15 27.[8] In the same passage (Dan. 3 21) 'turban'

[1] With *ṣānīph*, cp the high priest's *miṣnépheth* (MITRE, § 1 [2]), and cp col. 3157, nn. 2 and 3. In Job 29 14 (above) the *ṣānīph and mĕ'īl* are emblems of justice, and possibly typify the high priest.

[2] For this use of חבשׁ cp Ex. 29 9 Lev. 8 13, and perhaps Ass. *ḥibšu*, head-band (*Beitr. z. Ass.* 1 499 525 *f.*).

[3] Cp the representations on the Assyrian and Egyptian monuments where captives are dragged away by ropes round their necks.

[4] See Barth, *Etymolog. Stud.* 19. The Ass. parallel (Del. *Prol.* 54) greatly increases the probability that אפר, in spite of the ease of corruption in more than one way, is the correct reading. The vocalisation, however, is uncertain. The Ass. root *aparu*, 'to cover, clothe,' permits us to assume that the garment was a mantle which could be drawn over the head (see further, note on פְּאֵר, below). Targ. J. מעפרא 'cloak' (cp Syr. ܡܥܦܪܐ) may come from a different root (ܥܦܪ = غفر, or perhaps ܨܦܪ = צפר in MH to plait, weave = ضفر?).

[5] 'Turban' is traced back to Ar., Pers., and Hind. *dulband*; it is the same word as 'tulip,' Ital. *tulipano* (prop. a turban-like flower). With this cp the similes used by Josephus in his description of the high priest's mitre (col. 3156, § 2). If *ṭublu* can be proved (it is not cited by Del. *HWB*, or Muss-Arnolt), the resemblance between the two becomes significant.

[6] [It is difficult not to conjecture that פאר is really the Ass. *apru*, which (cp Jensen, *Kosmol.* 105, n. 2) is a synonym of *agū* the royal cap (not crown). See Creation-Epic 7 11, 'Let him make the *aprāti*, or royal caps, to shine.' This view makes it still easier to accept the theory that אפר in 1 K. 20 38 41 is the Ass. word referred to. For אפר will then no longer be isolated. —T.K.C.] See Perrot-Chipiez, *Art in Chald.*, etc. 1 106; *Art in Jud.* 2 27 145, etc., and for the view that *agū* is a crown or tiara, Hommel, *Südarab. Altert.* 37 (Munich, 1899).

[7] From this rendering Fox deduced the well-known Quaker doctrine prohibiting the removal of the hat even in the presence of royalty (Bevan, *Dan.* 84).

[8] A head-covering of this kind may have developed into the Roman *pileus* which, it has been suggested, was first introduced through the medium of Carthage (O. Schrader, *Realency. d. Indogerm. Altert.* 455).

occurs in the RV^mg. for פַּטִּישׁ (AV 'hosen,' RV 'tunic'). This rendering, implying an identification with πέτασος, 'broad-brimmed hat,' is extremely improbable; see BREECHES, 2.[1]

For the sake of completeness it may be useful to note (*a*) the primitive straw hat worn by Sinaitic Bedouins (see WMM *As. u. Eur.* 295), (*b*) the characteristic Hittite head-gear, curiously resembling, in its outline, the modern silk hat. Without the brim the Hittite hat resembles the elaborate crown of Marduk-idin-aḫi (see Perrot-Chipiez, *Art in Chald.*, etc., 2 fig. 43), a variety, which, surmounted by a knob, recurs in several forms in representations of Assyrian monarchs (see *op. cit.* 1 fig. 22). Finally (*c*) reference may be made to the use of feathers in head coverings. The Ethiopians of Tirhakah, as represented upon slabs in the British Museum, wear a feather in front, which is held in position with a ribbon or band, and Ašur-bani-pal's Arabians are adorned with a peculiar feathered crown which recurs in one shape or another, not only in S. Arabia (Hommel, *Südarab. Altert. d. Wiener Hofmuseums*, 32 *ff.*; Munich, 1899), but also in Ararat (Brit. Mus.), and Lycia, and other regions of Western Asia Minor (W. M. Müller, *As. u. Eur.* 364 *f.*).

See CAP, CHAPLET, CROWN, DIADEM, HELMET, and, for the priestly head-dresses, MITRE. I. A.—S. A. C.

TURPENTINE TREE (τερεμινθος [B]), Ecclus. 24 16 AV, RV TEREBINTH (*q.v.*).

TURRETS (תַּלְפִּיּוֹת), Cant. 4 4 RV^mg., EV ARMOURY (*q.v.*).

TURTLE (תּוֹר) Cant. 2 12), **TURTLE DOVE.** See DOVE.

TUTOR (επιτροποс), Gal. 4 2, RV 'guardian'; in Mt. 20 8 Lk. 8 3 † EV 'steward.' See STEWARD.

TYCHICUS (τυχικοс [Ti. WH]), one of the companions of Paul, was 'of Asia' (Acts 20 4) and seems to have joined the apostle at some point on his 'third' missionary journey, preceded him from Greece to Troas, and accompanied him thence, it would appear, to Jerusalem (Acts 20 5). He is mentioned in Eph. 6 21 and Col. 4 7 as the 'beloved brother and faithful minister and fellow-servant in the Lord' who was the bearer of the epistles to the Ephesians and to the Colossians to their respective destinations. 2 Tim. 4 12 represents him as having been sent by the apostle from Rome to Ephesus, and in Tit. 3 12 the apostle proposes to send either Tychicus or Artemas to Titus in Crete.

In the lists of the 'seventy' in Pseudo-Dorotheus and Pseudo-Hippolytus he is twice enumerated—once as bishop of Colophonia and once as bishop of Chalcedon. In the work of the Pseudo-Epiphanius on the twelve apostles he is represented as a disciple and attendant of the apostle Andrew, by whom he is appointed bishop of Chalcedon.

TYRANNUS, THE SCHOOL OF, the place where Paul, after his separation with his disciples from the synagogue at Ephesus, reasoned daily (Acts 19 9: καθ' ἡμέραν διαλεγόμενος ἐν τῇ σχολῇ Τυράννου [Ti. WH]). There is nothing to indicate who this Tyrannus was—whether himself a rhetorician or philosopher, or merely the hirer of the premises. D, Syr., p. marg. (see ACTS, § 17) has the reading T. τινός, ἀπὸ ὥρας πέμπτης ἕως δεκάτης. Cp EPHESUS, § 4.

TYRE (צֹר, צוֹר, τυροс, Ass. *Ṣurru*, Egypt. *Dara* [*As. u. Eur.* 185]), the most famous of Phœnician cities.

1. Two Tyres; references. For its history, see PHŒNICIA; cp NEBUCHADREZZAR. Though never in the possession of the Israelites, Tyre is mentioned in the delimitation of the territory of Asher, in Josh. 19 29, as the 'fenced city of Tyre' (עַר־עִיר מִבְצַר־צֹר), or perhaps rather (following 𝔊^B, ἕως πηγῆς, עַר־עַיִן) '[the fountain of] the fortress of Tyre,' the landmark referred to being the fountain, not the city,[2] and also in the geographical sketch of the operations of Joab at the census, 2 S. 24 7 (𝔊^BA μαχαρ, 𝔊 βοσόρραν Τύρου), where, however, the mention of Tyre as on the mainland must be due either to a late hand or to corruption of the text.[1] From the present text of the OT it would appear that Tyre and Israel had close relations in the time of Solomon (1 K. 5 7 9; but see SOLOMON); it is also mentioned in the times of Zerubbabel and Nehemiah (Ezra 3 7 [𝔊^B σωρεων = men of Tyre] Neh. 13 16 [𝔊^BNA om.]). A prophecy on Tyre finds a place in the Book of Isaiah (Is. 23); and another in that of Amos (Am. 1 9 *f.*); and three times in our Psalter glances are taken at Tyre (Ps. 45 12 [13] 83 7 [8] 87 4). Unfortunately in all these prophetic and poetic passages—not excepting Is. 23—and also in Joel 3 [4] 4 Zech. 9 2 *f.*, the reading 'Tyre' is open to doubt (cp MIZRAIM, § 2 *b*, SIDON, § 3). Where Tyre is certainly referred to (*i.e.*, in Josh., and Ezra-Neh., and in Ezek. 26-28, as redacted by the editor?), it is the island-city that is meant. So also in 2 Macc. 4 18 *ff.* Mk. 3 8 Mt. 11 21 *f.* (Lk. 10 13 *f.*) Mk. 7 24 (Mt. 15 21) 31 Acts 12 20, passages of great interest, but not to be dealt with in a geographical article.[2] Palætyrus had an ancient name of its own, which Prašek has detected in the name Ušu; possibly the Israelites may have known it as Ḥōs or Ḥōsah (see HOSAH). This city appears to have been ruined by the cruel Ašur-bani-pal; all the buildings that remained were demolished by Alexander, when about to construct the mole by which he was enabled to reach the island city. T. K. C.

2. Later notices and present state. The modern Tyre (*Ṣūr*) lies at the NW. end of the former island, which is now, owing to the widening of Alexander's mole by deposits of sand, connected with the mainland by a tongue of land ¼ m. broad. The greatest length of the ancient island, from N. to S., is about ⅝ m., and its area about 142 acres—a small surface for so important a town. The researches of Renan seem to have completely refuted the once popular idea that a great part of the original island has disappeared by natural convulsions, though he believes that the remains of a line of submerged wall at the S. end indicate that about 15 acres more were once reclaimed from the sea and have been again lost. Confined to this narrow site—on which, moreover, place was found for the great temple of Melḳarth with its courts, and for all the necessities of a vast trade, for docks and warehouses, and for the great purple factories (see PURPLE) which in the Roman time were the chief source of wealth and made the town an unpleasant place of residence (Strabo, 16 2 23; Pliny, 5 76)—Tyre was very closely built; Strabo tells us that the many-storied houses were loftier than those of Rome. In the Roman period the population overflowed its bounds and occupied a strip of the opposite mainland, including the ancient Palætyrus. Pliny gives to the whole city, continental and insular, a compass of 19 R. m.; but this account must be received with caution. In Strabo's time the island was still the city, and Palætyrus on the mainland was 30 stadia off, whilst modern research indicates an extensive line of suburbs rather than one mainland city that can be definitely identified with Palætyrus. The topography of Tyre is still obscure owing to the paucity of Phœnician remains. The present harbour is certainly the Sidonian port,

[1] τίαρα, *tiara* (Theod., 𝔊 Vg.) and the corresponding readings of Pesh. and Ar. seem to refer properly to כרבלא and not to פטיש; see S. A. Cook, *Journ. Phil.* 26 310 *ff.* (1899), followed by Marti, *KHC*, *Daniel*, 23 (1901).

[2] It is very possible, however, that the description in *vv.* 25-30 is based upon a list of places in the Negeb (cp SHIHOR-LIBNATH), and that מבצר־צר is a corruption of מְצוּר (cp following note).

[1] It is probable (see TAHTIM-HODSHI) that the present narrative in 2 S. 24 is an expansion of an earlier narrative, which represented the census of David as limited to the fighting men of Miṣṣur and Jeraḥmeel, regions which David had recently brought under his sway (2 S. 8 2, and cp MOAB, § 14). מבצר־צר is a corruption of מְצוּר—*i.e.*, probably, the capital of Miṣṣur (cp MIZRAIM, § 2 *b*).

[2] On 2 Macc., *l.c.*, see HERCULES, JASON, 2, and on the connection of Jesus with the 'borders of Tyre,' see Keim, *Gesch. Jesu von Nazara*, 2 534 *ff.*

though it is not so large as it once was; the other ancient harbour (the Egyptian port) has disappeared, and is supposed by Renan to have lain on the other side of the island, and to be now absorbed in the isthmus. The most important ruins are those of the cathedral, with its magnificent monolith columns of rose-coloured granite, now prostrate.

The water supply of ancient Tyre came from the powerful springs of Rās el-'Ain on the mainland (perhaps the 'fountain' of Josh. 19 29—see § 1), one hour S. of the city, where there are still remarkable reservoirs, in connection with which curious survivals of Adonis worship have been observed by Volney and other travellers. Tyre was still an important city and almost impregnable fortress under the Arab empire. From 1124 to 1291 it was a stronghold of the crusaders, and Saladin himself besieged it in vain. After the fall of Acre the Christians deserted the place, which was then destroyed by the Moslems. The present town has arisen since the Metāwila occupied the district in 1766.

See Pietschmann, *Gesch. der Phönicier*, 61-72 (1889); F. Jeremias, *Tyrus bis zur Zeit Nebukadnesars* (1891); Prašek, *Forschungen zur Gesch. des Alterthums*, 2 21-39 (1898); Winckler, 'Assyrien u. Tyrus seit Tiglath-pileser III.' *AOF* 265 *ff.* T. K. C., § 1; W.R.S., § 2.

TYRE, LADDER OF (κλιμακος τυρου, 1 Macc. 11 59); see LADDER OF TYRE.

U

UCAL (אֻכָל), Prov. 30 1. See ITHIEL AND UCAL.

UEL (אוּאֵל, § 39) one of the b'ne BANI (*q.v.*); Ezra 10 34 (ουηλ [BabA], θυ. [B*vid.א], ιωηλ [L]). In 1 Esd. 9 34 the name appears as JUEL (ιουνα [BA], ιουηλ [L]), cp ουηλ [B], ιουηλ [A], ιωηλ [L] in *v.* 35.

UKNAZ (וּקְנַז), 1 Ch. 4 15, AVmg., AV 'even Kenaz,' RV 'and KENAZ' (*q.v.*). 𝕲 does not represent ו.

ULAI (אוּלַי; in Dan. 8 2 𝕲 [87] αιλαμ; Syr. of 𝕲 ουλαμ, Theod. [BAQΓ] του ουβαλ; in *v.* 16 𝕲 ουλαι, but with ωλαι superscr. 87 *a*; Theod. as in *v.* 2), mentioned in Dan. 8 2 as a river near 'Shushan the palace (?),' in Elam; cp *v.* 16 'between [the banks of?] Ulai.' Presumably the (nâr) U-la-a of the Assyrian inscriptions, described as 'a river whose banks are good' (for a battle-field). The word for 'river' in Dan. 8 2 (אובל,[1] *ūbāl*), which in *vv.* 2 16 Theod. (BAQΓ) gives instead of 'Ulai,' occurs nowhere else, and is commonly viewed as a parallel form to יובל, *yūbal* (see Kö., *Lehrgeb.* 2 88 460), Jer. 17 8 (EV 'river'; 𝕲 ἰκμάς 'moisture'), though 𝕲 gives the Aramaic sense of 'gate' (πρὸς τῇ πύλῃ Αἰλαμ). So in Dan. 8 3 Theod. [BAQΓ] has ουβαλ where 𝕲87 has πύλης. In Judith 1 6 the Syriac has 'Ulai,' where the Greek has 'HYDASPES' (*q.v.*); can 'Hydaspes' be an error for 'Choaspes'? At any rate, Herodotus (1 188; 5 49 52), followed by Strabo (15 728), places Susa on the Choaspes; but Pliny (6 135) makes the Eulæus the river which flows by that capital. According to Nöldeke, though it is possible that Susa in the days of its glory may have stretched from the Eulæus to the Choaspes (if we assume these rivers to be different), it is more probable that the two names represent the same river. Frd. Delitzsch, however, infers confidently from the cuneiform evidence that the Eulæus is not the Choaspes (the Ass. Uknû = mod. Kercha), but the Kārun, which is the Pasitigris (*i.e.*, Lesser Tigris), up which sailed Nearchus and the Macedonian fleet to join Alexander. In all this, however, the uncertainty of the original text of Daniel and of Judith must be remembered. [On the reading 'Ulai,' see SHUSHAN, and cp *Crit. Bib.* The question of an underlying text in which the geography was different must here be reserved.]

Cp Nöldeke, 'Ulai,' *Bib. Lex.* 5 576 *f.*; Del. *Paradies*, 177 193 *ff.*, 329; Loftus, *Chaldæa and Susiana*, 423 *ff.*

ULAM (אוּלָם; ουλαμ [BAL]). 1. A Machirite name; 1 Ch. 7 16 17 (ηλαμ [L]). Ulam's brother is called Rekem. Both names mean the same thing—viz., Jeraḥmeel. Cp REKEM, and for 'Ulam' cp Elam = Jeraḥmeel in Ezra 2 7 31, and probably Is. 21 2 Jer. 49 34 *ff.*

2. Ancestor (in a genealogy of Benjamin [*q.v.*, § 9 ii. β]) of the B'ne Ulam [*i.e.*, Jeraḥmeel] who were distinguished for their archery; 1 Ch. 8 39 *f.* (αιλαμ, αιλειμ [B]). See *JQR* 11 110 112 *f.*, §§ 9 and 12, and for Jeraḥmeelite archers, Jer. 49 35, 'Behold, I will break the bow of Elam [Jeraḥmeel], the chief [source] of their strength.'[1] T. K. C.

[1] According to Jensen however אובל is a loan-word from Ass. *ubbal* 'carries down'; cp the phrase in the Ass. inscriptions, 'which (*i.e.*, the Ulai) carries down [*ubbalu*] its full waters to the sea,' Ges. *Lex.*(18), *s.v.*

ULLA (עֻלָּא; cp Palm. עלא [fem.] and Sin. עלי; ωλα [BA]), an Asherite whose sons are named in 1 Ch. 7 39. Possibly therefore he is to be identified with one or other of the preceding Asherites—*e.g.*, Shual (שועל), *v.* 36, or ARA (ארא), *v.* 38. 𝕲L, however, omits the names of Ulla and Ara, and makes Hanniel and Rizia sons of ITHRAN. See ASHER, § 4, ii. and note.

UMMAH (עֻמָּה), one of a group of place-names in Josh. 19 29 (end), 30, which, since they produce great stylistic awkwardness, may have been introduced from Judg. 1 31 (Steuernagel). It is usual to emend עמה (MT Ummah) into עכו (MT in Judg. *l.c.* 'Acco'). See PTOLEMAIS. Geographically this can be made plausible (see Moore, *Judg.* 51); but whether it can be said to be favoured by a study of the variations of the MSS of 𝕲, is at any rate doubtful.

There is a strong probability that parts of the geographical survey in Josh. have been based upon earlier texts which referred to the Negeb, where accordingly we may have to suppose that the clans or tribes of Israel originally dwelt. Also that עמה, עמק[2] (Pesh.), עכו (MT in Judg.), and αρχωβ, ακκω, ακκωρ, and ακκωβ, all ultimately come from ירחמאל (Jeraḥmeel). Notice that the valley of Achor (עכור) in Josh. 7 24-26 is near 'Jericho'—*i.e.*, Jeraḥmeel (Kadesh?; see JERICHO, § 4). How the final editor of Josh. 19 24-31 read the name given in MT as Ummah, may be left uncertain. The passage has but a doubtful geographical value.

As to the Versions, Pesh. and 2 Heb. MSS (de Rossi) read עמק. Of the Gk. MSS, B has αρχωβ (*i.e.*, αχωρ, modified by ροωβ?). A group of MSS which as a rule agree with B (16 52 53 57 77 85 131 144 236 237) read ακκω; another group (44 74 76 84 134) ακκωρ, and the related MSS 54 75 ακ[κ]ωβ; A and V (Holmes and Parsons, III XI) and related cursives with L, Compl., Ald. and Syro-hex., in which the names are generally corrected after the Hebrew, αμμα. See conspectus in Hollenberg (*ZATW*, 1 100 *f.*). T. K. C.

UMPIRE (מוֹכִיחַ), Job 9 33 EVmg., EV DAYSMAN. See MEDIATOR.

UNCLEAN. See CLEAN AND UNCLEAN.

UNCTION (χρισμα), 1 Jn. 2 20; RV ANOINTING.

UNICORN (רְאֵם,[3] also רֵים [Job 39 9 *f.*], רְאֵים [Ps. 92 11], cp plur. רֵמִים [Ps. 22 21]; μονοκερως;[4]

[1] Originally Jer. 46-51 appears to have referred to the peoples on the S. and SE. of Palestine. Owing partly to confusions of geographical names, the original prophecies have been filled up and expanded so as to appear to have a wider scope. This is a highly probable, though a new, result. See PROPHET, § 45.

[2] Cp Jer. 21 13 47 5 where העמק and עמקם both probably come from ירחמאל (see *Crit. Bib.*).

[3] The Nab. pr. n. רימן (*CIS*, 2 316) may possibly be connected with רְאֵם.

[4] With regard to the rendering of 𝕲, it should be noticed that a belief in the existence of a one-horned animal goes back to Aristotle (*Part. An.* 3 63), who mentions as such the oryx, and the Indian ass. Later accounts such as that of Ælian (*Nat. An.* 16 20) are largely influenced by the accounts of the rhinoceros; cp Houghton in *Ann. and Mag. of Nat. Hist.*, Nov. 1862, and art. 'Unicorn' in *Ency. Brit.*(9)

Rhinoceros unicornis), a much-debated and somewhat unhappy rendering of the AV,[1] occurs some nine times in the OT, where it regularly gives place in RV to WILD-OX (mg. OX-ANTELOPE, cp Nu. 23 22 etc.). It appears as a wild untamable animal, the most unlikely of all to submit to the plough (Job 39 9-12), of great strength (Ps. 22 21, parallel to *aryēh* אריה 'lion'), and agility (*ib.* 29 6, parallel to *'ēgel*, עגל 'calf'), whose horns were lofty and a symbol of power and might (Nu. 23 22 [2] 24 8 Dt. 33 17 cp Ps. 92 11 [on which see Che., *Ps.*⁽²⁾]). From Is. 34 7 (οἱ ἁδροὶ AVmg. 'Rhinoceros') it was apparently used also in sacrifices. The Heb. *re'ēm* is the same as the Ass. *rīmu*,[3] which is a strong-horned, fierce-looking wild bull depicted with shoulders fully-arched, images of which were often placed at the entrances of Assyrian palaces.[4] Among the Assyrians it was often employed in metaphors of strength, and at times occurs in parallelism with *pīru*, elephant. Hence it is not improbable that the animal referred to is the Aurochs, the *Urus* of Julius Cæsar (*BG* 6 28), who mentions it as existing in the forests of Central Europe, and the *Bos primigenius* of naturalists. Its teeth were found by Tristram in Lebanon, in the valley of the Nahr-el-Kalb, which is just in the neighbourhood where Tiglath-pileser I. (1120-1100 B.C.) claimed to have killed the *rīmu*. The Aurochs was of great size and, to judge by records, of great ferocity; it was hunted and killed by prehistoric man, as skulls which are occasionally found pierced with flint instruments testify. It probably lingered in remote parts of Europe till the middle ages, and it is believed to have been the ancestor of the domesticated breeds of cattle. Probably its least altered descendants are the wild herds of certain English parks such as Chillingham, though these have certainly fallen off in size, in which they compare unfavourably with fossil remains of the *B. primigenius*.[5] See Fr. Del. *Heb. Lang.* 6 *ff.*; Schr. *KAT*, 256; Hommel, *Säugethiere*, 227.

A similar animal is the 'wild cow' or wadiha which, according to Doughty (*Ar. Des.* 1 328), may probably be the רְאֵם. Though of no great size it has dangerous horns measuring sometimes 23 inches (cp illustration *op. cit.* 327), with which when maddened with wounds it will inflict fatal injuries. The animal goes in herds of three to five, and only the keenest hunter can hope to catch one.

The literary history of the unicorn in classical and mediæval ages has been treated by C. Cohn, *Gesch. d. Einhorns* (Berlin, 1896-7).

A. E. S.—S. A. C.

UNKNOWN GOD, ALTAR TO THE (αγνωστω θεω [Ti. WH]; AV, RVmg. 'to *the* Unknown God' RV 'to an Unknown God' Acts 17 23). It is of little moment which rendering we adopt; difference in interpretation cannot be based upon a distinction between definite and indefinite article here, but must be derived from ἀγνώστῳ alone. The word is translated 'unknown,' or 'unknowable.' Whichever be accepted we must be careful to exclude all non-Athenian connotation. To suppose an allusion to the God of the Jews is clearly impossible, in spite of the fact that the epithet 'wholly hidden' (πάγκρυφος) was applied to Yahwè by gentile writers (Just. Mart. *Ad Gr.* 38; *Apol.* 2 10; Phil. *Leg.* 44). On the other hand, it is equally unjustifiable to read into the inscription the signs of 'a want of something deeper and truer.' Both notions would be anachronisms. Although we have no example of an inscription in the precise terms quoted in Paul's speech, there is no difficulty in illustrating and verifying the passage. Pausanias (i. 1 4), on his way from Phalērum to Athens, remarks the altars of 'gods called unknown, and of heroes' (βωμοὶ δὲ θεῶν τε ὀνομαζομένων ἀγνώστων καὶ ἡρώων). It would be most natural to take this to mean several altars, each with the inscription in the singular; but it is difficult to do this in the face of what Pausanias says at Olympia, 'beside it is an altar of Unknown Gods' (πρὸς αὐτῷ δ' ἐστὶν Ἀγνώστων θεῶν βωμός, v. 14 8). Philostratus in his life of Apollonius (6 3) writes, 'it is more prudent to speak well of all the gods, and especially at Athens, where are found also altars of unknown deities' (σωφρονέστερον τὸ περὶ πάντων θεῶν εὖ λέγειν καὶ ταῦτα Ἀθήνησιν, οὗ καὶ ἀγνώστων δαιμόνων βωμοὶ ἵδρυνται); where again it is impossible to say whether the altars bore the words Ἀγνώστοις θεοῖς or Ἀγνώστῳ θεῷ. The significance of such altars is clear from Diog. Laert. 1 110. Epimenides in his purification of Athens is said to have turned out some black and white sheep on the Areopagus, directing attendants to follow and watch them, and on the spot where the animals lay down altars were built τῷ προσήκοντι θεῷ. This expression cannot be translated, 'the appropriate local deities' (Grote), indicating that in each instance the divinity was a recognised and familiar one: this is clear from the words which immediately follow (ὅθεν ἔτι καὶ νῦν ἔστιν εὑρεῖν κατὰ τοὺς δήμους τῶν Ἀθηναίων βωμοὺς ἀνωνύμους). The people on this and possibly on subsequent occasions knew not what divinity had been offended and required propitiation. In Rome in precisely the same way it often taxed the inventive powers of the College of Pontifices to say what god had sent prodigies. Sometimes they named him from the manifestation itself—*e.g.*, Aius Locutius, the Voice which forewarned the city of the approaching Gauls; sometimes, being in doubt, they used the formula 'sive dei sive deæ' (Aul. Gell. 2 38). It is on this principle that we find a woman imprecating curses on her rival and praying to the deities of the hot spring, 'uti vos aquæ ferventes, sive vos Nimfas (Nymphas) sive alio quo nomine vultis appellari, uti vos eam interimatis' (*Ins. Urb. Rom.* 141). In a well known passage of Horace we have 'Matutine Pater, seu Iane libentius audis' (*Sat.* ii. 6 20). In the passage quoted from Diog. it is possible, however, that by ἀνωνύμους we should understand the altars to have been altogether without inscription. If so, we see that our examples fall into three classes, according to the degree of doubt in the worshipper's mind. The altar may be left without inscription; whether it is god or goddess that claims it cannot be guessed. Or again, it is inscribed 'to the unknown god,' in the singular or plural. In the third case the deity is known, but the votary is ignorant of the proper mode of address.

We may mention, but only to dismiss it, the theory that in the case of Athens these altars dated from a time when writing was unknown and were subsequently inscribed when men no longer knew to what god they had been raised. We must reject also Jerome's statement (*ad Tit.* 1 12) that the inscription ran 'to the gods of Asia and Europe, to unknown and strange gods'; the whole point of the reference in the speech lies in its being an exact quotation. Jerome may indeed have seen such an inscription as he mentions; but it was certainly not that alluded to in Acts.

[1] In Dt. 33 17 the *horns* of the unicorn are spoken of, and to evade the difficulty AV has to render the sing. רְאֵם by the plural.

[2] By תּוֹעֲפוֹת רְאֵם, Nu. *l.c.*, RV 'strength of the wild-ox,' we should rather understand the reference to be to the animal's horns (so RVmg.). תועפות, lit. 'eminences,' from יפע=יעף, cp Ar. *yafa'*, a hill, and *yafa'a*, to ascend. [For a conjecture, see *Crit. Bib.*]

[3] According to its ideogram, a 'mountain-ox,' cp Del., *Entst. Schrift*, 56.

[4] The old conventional representation of the unicorn is ingeniously explained by Haupt ('Psalms' *SBOT*, ET, 173). On the reliefs from the N. palace of Assur-bani-pal we see the king grasping a lion by the ear and piercing his body with a spear. Another represents an arrow fixed in the lion's forehead. The existence of the unicorn seems to be derived from Persian sculptures at Persepolis and Susa, and these in turn were undoubtedly influenced by Assyro-Babylonian sculptures. The conception of the horn, according to Haupt, has accordingly arisen from the imagination of the Persian artist who combined the arrow and ear!

[5] In Arabic the cognate *ri'm* is applied to the *Antelope Leucoryx*, a meek and graceful animal, an inhabitant of the deserts of Arabia and NE. Africa—the very opposite of the Ass. and Heb. רְאֵם. When the older wild bull became extinct, the oryx from its size and general aspect was the natural legatee of its name (cp Che. on Is. 34 7). Cp the similar variation in the meanings of כְּפִר and חֲבַצֶּלֶת in Heb. and the cognate languages.

If we take the far less probable rendering 'to the unknowable god,' we must understand the words to refer to the mysteriousness of God. We may then compare the inscription on the figure of the Egyptian Isis—'I am, and was, and shall be; no man hath lifted my veil' (Plut. *De Is. et Os.*). Still better is the inscription on an altar of Mithra found at Ostia—'signum indeprehensibilis Dei.' (For analogies, see Frazer, *Paus.* 2 33.) W. J. W.

UNLEAVENED BREAD (מַצָּה), Gen. 19 3, etc. See BREAD, § 1, LEAVEN, § 2, and PASSOVER, § 1 *f.* 15.

UNNI (עֻנִּי; perhaps shortened from עֲנָיָה [=either the probable gentilic 'Anānī (so Che.; cp *Crit. Bib.* on 1 Ch. 3 24 15 18), or 'Yahwè answers,' § 52]).

1. A Levitical door-keeper, a musician (1 Ch. 15 18; ελιωηλ [B], ιωηλ [א], ανι [A], ανανιας [L]; *v.* 20: ωνει [Bא], ανανι [A], ανανιας [L]). Cp Ki. 'Chron.' *SBOT*, *ad loc.*

2. RV **Unno**, a Levite, temp. Nehemiah (Neh. 12 9 Kt. ענו; om. Bא*A, ιαναι [א^{ca.mg.}] [L]). In L ιαναι is a doublet of ἀνεκρούοντο =עֹנִים. Omitting 'And Bakbukiah' (as a gloss from Neh. 11 17), render, 'And their brethren took up the strain (ranged) over against them.' So Guthe (*SBOT* [Heb.], *ad loc.*); cp Be.-Rys. *ad loc.*[1]

UPHAZ (אוּפָז) in the phrases 'gold from Uphaz' and 'gold of Uphaz' (זָהָב מֵאוּפָז, *zāhāb mē'ūphāz*, Jer. 10 9, כֶּתֶם אוּפָז, *kĕthem 'ūphāz*, Dan. 10 5) is an imaginary place-name. Both passages are corrupt, the former most probably, the latter certainly. Later scribes, who knew the rare phrase זָהָב מוּפָז, *zāhāb mūphāz* (1 K. 10 18; see GOLD, § 1 [*f.*] and n.), imagined this to mean 'gold from Uphaz' (ז׳ מֵאוּפָז, *z. mē'ūphāz*), and read this or (in Dan. 10 5) a phrase like this, in the indistinctly written text which they were copying.

(*a*) The MT of Jer. 10 9 is not well supported. Vg. has *aurum de Ophaz*, but 𝔊 χρυσίον μωφαζ [BAQ], χ. μωφας [א]—*i.e.*, זהב מופז: while Tg., Pesh., Syr.-Hex. (mg.), and Theod. presuppose מֵאוֹפִיר. Giesebr. (but not Co.) reasonably adopts this; cp בזק for ברק Ezek. 1 14. (*b*) The phrase in Dan. 10 5 is rendered ἐν χρυσίῳ ωφαζ by Theod. [BAQ]; 𝔊^{87}, however, instead of rendering it, translates what is really a corrupt form of two dittographed words from the line above, except that it appends to this פז, *i.e.*, it gives ἐνδεδυμένος βύσσινα καὶ τὴν ὀσφὺν περιεζωσμένος βυσσίνῳ καὶ ἐκ μέσου αὐτοῦ φως (where φως is simply a Græcised פז; cp φαζ Cant. 5 11). 𝔊's Hebrew MS must therefore have had, not כתם אופז, but בדים ומתניו פז. The second word was indistinctly written, and was read by him ומתוכו. But we must not suppose that MT is really more correct. 'Girded with gold of Uphaz' (or, as 𝔊's text ran, 'with refined gold') is not a natural expression. We should almost if not quite certainly correct בכתם אופז into בְּרִקְמַת פָּז, 'with embroidery of gold.' A magnificently embroidered girdle is what we expect to hear of; the correction is easy, self-evident. Probably מופז is an earlier reading than אופז; מתניו פז would resemble מת מופז. It is also of course more plausible; the context does not suggest the mention of a locality. It is worth noting that J. D. Michaelis explained זהב מופז as זהב מאופז; also that in Cant. 5 11 𝔊 read כתם ופז; Theod. כתם אופז (Lag.). Cp GOLD. T. K. C.

UR OF THE CHALDEES, lit. Ur Kasdim (אוּר כַּשְׂדִּים; [Η] χωρα[2] [ΤΩΝ] χαλδαιων [BאADEL]; cp Acts 7 4, ἐκ γῆς χαλδαίων; Syr. *'ur dᵉkaldayyā*; *Ur Chaldæorum*, but in Neh. (*de*) *igne Chaldæorum*, alluding to the Rabbinic explanation of 'Ur' as=fire, with which a singular Aggadic legend is connected; see *Jewish Encyclopædia*, I 91, and cp Koran, Sur. 21), Gen. 11 28 31 15 7. The place whence Abram set out on the journey to Canaan, also mentioned in Neh. 9 7†. That Ur is the

1. Prevalent theory.

old Babylonian city of Uru (mod. *Mukayyar*, on the right bank of the Euphrates, about 40 m. SE. from Warka and about 135 m. SE. from Babylon) is altogether more likely than Rawlinson's identification with Erech (אֶרֶךְ), the mod. *Warka*,[1] and is generally accepted; even Dillmann in 1892 (*Gen.*[(6)], 214), after holding out long against the view, substantially adopted it. The chief opponent of the theory at present is Kittel (*Hist.* 1 181 *ff.*; and earlier, *Theol. Stud. aus Württ.* 7 215 *ff.*). The fact that there is no other known Ur in the territory of the Kasdim than the Babylonian Ur is a great difficulty in the way of rejecting the identification, especially since language and literature point so decisively to close relationship between Hebrews and Babylonians. If it is difficult to reconcile with other statements of J or of P—who mentions Ur Kasdim (Gen. 11 31)—that only points more strongly to the strength of the tradition in favour of the Babylonian Ur. But in fact the difficulties are not so formidable as Kittel thinks, [and the comparative antiquity of the tradition is shown by Judith 5 6 Jubilees 11 Acts 7 4. Cp Francis Brown, *JBL*, Dec. 1887, pp. 46 *ff.*; Del. *Par.* 226 *f.*; Budde, *Urgeschichte*, 433 *f.*; Schrader, *HWB*[(2)], 1729 *f.*; and see references in Dillmann's note on Gen. 11 28].

2. Greatness of the S. Bab. city Uru.

The greatness of the city of Uru in politics, religion, and commerce is well brought out by Hommel, *GBA* 212-218 325-329 (cp his *Die semit. Völker u. Sprachen*, 204-211); see also BABYLONIA, § 48. Rogers (*HBA* 2 371 *f.*) thus describes its situation.

'The river Euphrates flowed just past its gates, affording easy transportation for stone and wood from its upper waters, to which the Lebanon, rich in cedars, and the Amanus were readily accessible. The Wady Rummein came close to the city and linked it with central and southern Arabia, and along that road came gold and precious stones, and gums and perfumes to be converted into incense for temple-worship. Another road went across the very desert itself, and, provided with wells of water, conducted trade to southern Syria, the peninsula of Sinai, and across into Africa. This was the shortest road to Africa, and commerce between Ur and Egypt passed over its more difficult but much shorter route than the one by way of Haran and Palestine. Nearly opposite the city the Shatt-el-Hai emptied into the Euphrates, and so afforded a passage for boats into the Tigris, thus opening to the commerce of Ur the vast country tributary to that river. Here, then, were roads and rivers leading to the N., E., and W., but there was also a great outlet to the southward. The Euphrates made access to the Persian Gulf easy. No city lay S. of Ur on that river except Eridu, and Eridu was no competitor in the world of commerce, for it was devoted only to temples and to gods—a city given up to religion.'

The local god of Uru was Nannaru or Sin, the moon-god; cp Eupolemus (Eus. *Præp. Ev.* 9 17), according to whom the Babylonian city Καμαρίνη (Moon-city) was called by some πόλις Οὐρίη.

These details are doubly interesting if Abraham was a historical personage, or even if the tribe which regarded him as its ancestor once lived a pastoral life in the neighbourhood of Uru (cp Tomkins, *Life of Abraham*[(1)], 7 *ff.*). Certainly it is still the average opinion of scholars that the Ur-kasdim, with which P at any rate, if not also JE, closely connects Abraham, is this S. Babylonian city. Why '-kasdim' was added, is not indeed plain; for no other Ur is mentioned in the OT. That, however, is a mere trifle. The considerations which induce Kittel[2] to reject the prevalent theory are as follows:—

3. Kittel's opposition.

(1) The genealogy given by P in Gen. 11 10 *ff.* assumes that the Semites of Arpachšad's time migrated gradually from N. Armenia to Mesopotamia. They then moved on to Ḥarran. (2) In harmony with the above fact P states (Gen. 8 4) that the ark 'rested on the mountains

[1] The following word אחיהם, if not a corruption for אחריהם 'after them,' may have been introduced to give a meaning to ב׳ and the already corrupt ענו. אחיהם לנגדם, as Be.-Rys. point out, is unnecessary here; cp *v.* 24.

[2] [Probably 𝔊 read ארץ for אור, rather χωρα is a transliteration of אור confused (?) with עיר.]

[1] [This view was adopted by Loftus, *Chaldea and Susiana*, 126 (1857). The Syrian Christians, however, maintain Edessa to be the Ur-casdim of the patriarch.]

[2] The English translation of the *History* (1 181, n. 4) gives an important modification of view as regards 'Armenian Chaldæans'; Kittel now withdraws one of his original arguments.

of Ararat,' which must be on the N. or NW. of Assyria. Here is the starting-point of the subsequent history. Can we imagine him suddenly transporting the Semites to the mouth of the Euphrates, and making this their starting-point, simply to bring them back to the place where they once stood with Serug?

(3) We also meet with 'Ur-kasdim' in the J_2 stratum (11 28 15 7). Now J does not state where the ark grounded. Budde therefore conjectures that J must have meant a mountain in the S. of the land of the Two Rivers, corresponding to Mt. Niṣir in the Babylonian story. From this point Noah's descendants will have pressed on to Ur, in S. Babylonia. Terah and Abraham are then supposed to have migrated to Ḥarran. This conjecture is not a very solid one; but in any case 'what a marvellous zigzag we must ascribe to J_2, if we make him take the Semites from the mountain in the S. on which they landed, to Mesopotamia in the N. (Peleg, Serug), thence to Ur-Mugheir, and thence to Haran!'

4. And Gunkel's.

Gunkel, too (*Gen.* 145 [1901]), does not accept the favourite identification.[1] 'The Kasdim,' he says, 'are not the Chaldæans of the "land of the sea" [S. Babylonia], but the people of the same name reckoned in 22 22 among the Nahorids; cp also Job 1 17 2 K. 24 2 and see Winckler *AOF*(2), 2 250-252. From the description in Gen. 11 31 we can only infer that the way from Ur-kasdim to Canaan passed by Ḥarrān. Against this location of Ur-kasdim it may be objected that we know both Uru and Ḥarranu to have been famous seats of moon-worship, so that these two places appear to have an inner connection. But this coincidence may be accidental. At any rate the statement that Abraham came from Ur-kasdim will be a very primitive tradition—a variant to the other statement that he came from Ḥarrān. In P both traditions are united in such a way that two journeys are distinguished, the first from Ur-kasdim to Ḥarrān, the second from Ḥarrān to Canaan.'

5. New solution of problem.

The riddle, as usually stated, admits of no satisfactory solution, for the simple reason that the texts of the narratives in Genesis, after having been partly corrupted in transcription, were re-edited by men who had different geographical presuppositions from those of the original writers. It is becoming more and more probable that the original scene of the primary Hebrew legends was in the Negeb. From 'Adam' to Joseph this can be traced, sometimes with virtual certainty, sometimes with considerable probability. The geographical changes introduced were owing partly (as we have seen) to corruption, and partly to the perplexing similarity of the names in different parts of the ancient East (cp Schr. *KGF* 29 247). There was a Ḥarrān in the N.; there was also in all probability a Ḥarrān in the S. (referred to, *e.g.*, in the phrase, 'Sanballat the Ḥarānite,' החרני, Neh. 2 10, see SANBALLAT). There was an Aram in the N.; there was also an Aram in the S. The later scribes unfortunately forgot all about the southern Ḥarrān and Aram, though they were conscientious enough to leave abundant half-concealed evidence of their existence. Transcriptional errors too were easy.

כשר and קרש, קרש and כוש were very easily confounded, and beside כוש there was a form כּוּשָׁם, which was liable to be miswritten קרשם and even דמשק (see PROPHET, col. 3861, n. 2). It would not be right at the opening of a large field of inquiry to assume that such confusions in any particular case were more than probable. But we are *not* at the opening of an inquiry. Sufficient evidence has been produced by the present writer to justify him in the assertion that there is a strong probability in favour of any correction which brings any particular legend referred to away from the N. into the S. (*i.e.*, into the Negeb). In a continuous survey of the sagas or legends of Genesis it would be possible to make this clear to virtual demonstration. All that can be done here is to point out that, given the presuppositions obtained by the study of other passages, we have a right to make the following emendations which affect the question of 'Ur-kasdim.'

1. Arpachšad (אַרְפַּכְשַׁד) } come from עֲרַב כּוּשׁ, 'Arab-cush(im)
2. Ur-kasdim (אור כַּשְׂדִּים) } —*i.e.*, 'Cushite Arabia.'
3. Chesed (כֶּשֶׂד) comes from כּוּשׁ—*i.e.*, 'Cush' in N. Arabia (see CUSH, 2).
4. Damméseḳ (דַּמֶּשֶׂק) sometimes comes from כּוּשָׁם 'Cusham.
5. Kĕna'an (כְּנַעַן) sometimes comes from קְנַז 'Kenaz.'

In spite of the attempts of Gunkel and Winckler[1] to justify the traditional reading, it remains for us no mere struggling hypothesis but a fact that the 'Kasdim' of Job 1 17 2 K. 24 2, are the N. Arabian Cushites (see JOB, BOOK OF, § 14; OBADIAH (Book), col. 3460, n. 1). We are now bound to go farther, and to assert that according to the original tradition Abraham (the Jeraḥmeelite patriarch) first dwelt in 'Arab-cush, and thence went to Ḥarrān in the land of Kenaz. It will be remembered that Caleb was known as a Kenizzite, and as the hero of Hebron, which name appears to have supplanted the original name REHOBOTH (*q.v.*). Abram or Abraham too migrated to Hebron, or rather Rehoboth—the well-known Rehoboth in the Negeb; he retained however a 'son of Cusham,' 'a Cushamite,' whom he had brought from 'Arab-cush (Gen. 15 2; see *Crit. Bib.*). In the same chapter which states this circumstance we read (*v.* 7) a solemn assurance of Yahwè that he had brought Abraham from 'Arab-cush to possess the land of Kenaz. It is difficult to believe that the original writers (or schools of writers) whom we symbolise as J and E were unaware of this. On Neh. 9 7 we must content ourselves with referring to *Crit. Bib.* It is enough to have stated distinctly here the original tradition.

F. B. § 1; T. K. C. §§ 2-5.

UR (אוּר), one of David's 'thirty' (1 Ch. 11 35†; ϲθυρ [B], ϲουρ [א], ωρ [A], ουρ [L]). One would have expected Uri (אוּרִי); but see ELIPHELET, 2.

URBANE, or rather, as in RV, **Urbanus** (ΟΥΡΒΑΝΟϹ [Ti. WH]), is saluted as 'our fellow-worker in Christ' in Rom. 16 9. The name is a Latin one. When, or in what capacity, Urbanus helped the apostle in his missionary labours is not known.

Urbanus figures as bishop of Macedonia in the list of 'the seventy' compiled by Pseudo-Dorotheus. The ὑπόμνημα of Peter and Paul as given by the Pseudo-Symeon Metaphrastes represents him as consecrated bishop of Tarsus by Peter.

URI (אוּרִי, perhaps a clan-name, shortened and corrupted from Jeraḥme'eli [so Che.], but see NAMES, § 52, and cp URIAH).

1. b. Ḥur—from 'Ashḥur'? [Che.]—the father of BEZALEEL (Ex. 31 2 35 30 2 Ch. 1 5: ουρ[ε]ιου [B, and A in 2 Ch.], ουρ[ε]ι AFL]; 1 Ch. 2 20: ουρ[ε]ι [BAL]).

2. Father of GEBER [*q.v.*, no. 2] (1 K. 4 19: αδαι [𝔊BA], αδδαι [L]). Cp SOLOMON, § 6, third note.

3. A post-exilic door-keeper temp. Ezra; Ezra 10 24 (ωδουθ [Bא], ωδουε [A], ουριας [L]) = 1 Ch. 9 17 (AHIMAN; אֲחִימָן; αιμαμ [B], -ν [AL]); probably corrupt [Che.]) = 1 Esd. 9 25† (ουριας [L]; om. EV with BA, unless the name is buried in αυης of τολβαυης = תלם + αυης or in βακχουρος of *v.* 24).

URIAH, and in Mt. 1 6 AV, **Urias** (אוּרִיָּה, but no. 3 אוּרִיָּהוּ; ΟΥΡ[Ε]ΙΑϹ [BאAL]).

The name might mean 'Yahwè is a fire,' § 35; cp ARIEL, 1. It is strange, however, that a Yahwistic name should be borne by a Hittite. The difficulty disappears if we accept Jastrow's theory (*JBL* 13 101 *ff.*; see NAMES, § 109, n. 3) that the element יה is often only an emphatic afformative. It is equally non-existent on the theory that this element has generally arisen out of י, the common termination of gentilics. אוריה, like אוריאל, URIEL, אוּרִי, URI, is in fact most probably a corruption either of יְרַחְמְאֵלִי, Jeraḥmeeli, or of עֲרָבִי, 'Arābī. Cp also Uru in the Phœnician Urumilki (*KAT*(2), 185). The amount of evidence for such corruptions is too great to be disregarded.

1. A 'Hittite,' one of David's heroes (2 S. 23 39 [ουρει L], 1 Ch. 11 41 [ουρει Bא]), who took part in the war against the Ammonites under Joab, and was got rid of by David in a most cowardly way to cover over his adultery with BATHSHEBA (*q.v.*), Uriah's wife (2 S. 11 12 9 *ff.* 1 K. 15 5).[2]

---

[1] In *Gen.*(2) 139 [1902], however, Gunkel falls back on the average opinion of scholars. After stating the view mentioned in the opening sentence of the quotation, he continues, 'against the latter location of Ur-kasdim it may, with justice (*mit gutem Grund*), be objected, etc.'

[1] See *AOF*, 2 250-252.

[2] The qualification in *v.* 5 (end) is wanting in 𝔊B, and is no doubt a gloss. The redactor himself elsewhere gives David an absolute eulogy (11 34 38). So Benz., Kittel.

Our view of the notices of Uriah in 2 S. 11 *f.*, however, needs revision in the light of the facts; (1) that the list of David's heroes, which includes 'Uriah the Hittite,' makes no allusion to the reported treachery of David; (2) that the story of this treachery has undoubtedly been manipulated (see BATHSHEBA, JEDIDIAH, SOLOMON, § 2), out of a regard for edification; and (3) that, חתי being most probably a mutilated form of רחֹבתי, 'Rehobothite,' and 'Rabbah of the b'ne Ammon' being not less probably a corruption of 'Rehoboth of the b'ne Jerahmeel' (cp REHOBOTH), it is not conceivable that 'Jerahmeel the Rehobothite' (misread in the traditional text, 'Uriah the Hittite') should have fought in the ranks of the Israelites on the occasion referred to. Obviously Uriah's true designation had been forgotten when the story of the siege received its present expanded form. To this we must add that stories similar to that of the baleful letter to Joab are familiar to students of primitive folklore.[1] Even apart from this, it is plausible to hold, on grounds of literary criticism, that 2 S. 11 1 was originally followed by 12 26 (S. A. Cook, *AJSL* 16 156 [April 1900]; so, independently, Winckler). Cp, however, Budde in *KHC*, 'Sam.' 250.

It is not difficult to see how Uriah may have come into the story of Bathsheba. BATHSHEBA (*q.v.*) was apparently a 'Jerahmeelite' by origin. ירחמאל, when broken up by the carelessness of scribes, furnishes material for the two words אליעם (Eliam) and אוריה (Uriah). Errors like this often have strange results in the production of legends.

2. A priest, temp. Ahaz, who acted as a witness for Isaiah (Is. 8 2). He is presumably the Uriah (AV URIJAH) who built an altar for Ahaz after a Damascene pattern, 2 K. 16 10 *f.*

3. b. Shemaiah of Kirjath-jearim, slain at the command of Jehoiakim for prophesying against Jerusalem (Jer. 26 20 AV **Urijah**).

4. Father of MEREMOTH (1), a priest temp. Nehemiah, Ezra 8 33 (*αρειου* [L]), 1 Esd. 8 62 (IRI, RV **Urias**; *ουρ[ε]ια* [B], *ουρι* [A], *ουριου* [L]), cp Neh. 3 4 21 (AV **Urijah**, *σουρια* [א]), possibly the Uriah present at the reading of the law under Ezra (Neh. 8 4 AV **Urijah**; *ουρεια* [Bא^c.a.A] = 1 Esd. 9 43 EV URIAS).

T. K. C.

URIEL (*Vriel*), 'the angel that was sent' to Ezra, according to 4 Esd. 4 1 36 (?) 5 20 10 28.

In 4 36 he is called an archangel, but RV prefers the reading JEREMIEL (*q.v.*), a name which occurs nowhere else in this literature, but is most probably, like 'Jeremiah,' one of the many distorted forms of 'Jerahmeel'[2] (cp 𝔊^BA, Jer. 36 26). Possibly 'Jeremiel' (ירמאל) is a variant to 'Raphael' (רפאל); Raphael, according to Enoch 20 2, is the 'angel of the spirits of men.' Uriel, under the corrupt form 'Adoil,' occurs in Tg. Jon., and in the Slavonic Enoch 25 2, not, however, as an angel. This passage presupposes the explanation 'flame of God,' which is hardly the original meaning. The Jerahmeelite connection of some of the chief angelic names in -el is noteworthy. See MICHAEL, and, in illustration, note the facts which point to Jerahmeelite influence, both healthful and the reverse, on the religion of Israel (MOSES, § 14, PROPHET, § 6 *f.*). T. K. C.

URIEL (אוּרִיאֵל; ΟΥΡΙΗΛ). A plausible explanation of the name is 'flame of God,' § 35, or, 'God is a light,' cp נורבל, Nūrbel, a Palmyrene name, de Vogüé, *Syr. Centr.* 124; Baeth. *Beitr.* 86. But (1) the analogy (contested, no doubt) of many similar names, (2) the occurrence of the regularly formed ethnic Uri, and (3) the connections of the bearers of the name, may be held to favour an explanation similar to that given above of URIAH—*i.e.*, it is a Jerahmeelite or N. Arabian name [Che.].

1. The father of Michaiah, the mother of Abijah, king of Judah (2 Ch. 13 2). (For *ουριηλ ἀπὸ γαβαων* 𝔊^L has *αβεσσαλωμ*.) But see MAACAH, 3.

2. Chief of the Kohathites, mentioned at the bringing up of the ark to Jerusalem under David (1 Ch. 15 5 11: *αριηλ* [B]).

3. A name in the Kohathite genealogy of ELKANAH (*q.v.*) (1 Ch. 6 24 [9]: *οριηλ* [B]).

4 and 5. Perhaps a collateral form of ARIEL, 1 (=ARELI) and ARIEL, 2.

URIJAH (אוּרִיָּהוּ), Jer. 26 20 AV, RV URIAH (3).

URIM AND THUMMIM (הָאוּרִים וְהַתֻּמִּים[3] 𝔊 ΔΗΛΩϹΙϹ, or ΔΗΛΟΙ, ΚΑΙ ΑΛΗΘΕΙΑ [1 S. 14 41 ΟϹΙΟΤΗϹ]; Aq. Sym. Theod. ΦΩΤΙϹΜΟΙ [Sym. 1 S. 28 6 ΔΗΛΟΙ, Dt. 33 8 ΤΕΛΕΙΟΤΗϹ ΚΑΙ ΔΙΔΑΧΗ, cp Jerome] and ΤΕΛΕΙΟΤΗΤΕϹ, ΤΕΛΕΙΩϹΕΙϹ, ΤΕΛΕΙΟΙ; Vg. *doctrina* and *veritas* or *perfectio*), the apparatus of the priestly oracle (Dt. 33 8 cp 10; Nu. 27 21 Ezra 2 63 [𝔊^BA ΤΟΙϹ ΦΩΤΙΖΟΥϹΙΝ ΚΑΙ ΤΟΙϹ ΤΕΛΕΙΟΙϹ, 𝔊^L . . . ΤΕΛΕΙΩϹΕϹΙΝ] = Neh. 7 65 [𝔊^BאA ΦΩΤΙϹΩΝ, 𝔊^L ΤΟΙϹ ΦΩΤΙϹΜΟΙϹ ΚΑΙ ΤΑΙϹ ΤΕΛΕΙΩϹΕϹΙΝ]). The only passage which throws any light upon the nature and use of the Urim and Thummim is 1 S. 14 41 *f.*

Emending after 𝔊, we read: 'And Saul said, "O Yahwè, God of Israel, why dost thou not answer thy servant to-day? If this fault be in me or in Jonathan my son, give Urim, and if it be in thy people Israel, give Thummim." Thereupon Saul and Jonathan were taken and the people went free. Then Saul said "Cast between me and Jonathan my son; he whom Yahwè takes shall die" . . . So they cast between him and Jonathan his son, and Jonathan was taken.'

It is evident from *v.* 41 that the question, which in both cases is put as a simple alternative (cp 39), was decided by casting lots; and from *v.* 40 that Urim and Thummim were the names respectively of two objects with which the cast was made.

Comparing 1 S. 14 41 *f.* with 36 𝔊 (cp 3 18 𝔊) we see that the casting of lots with the Urim and Thummim was part of the method of divination by the ephod; in other places where the ephod is employed (23 6 9 30 7) the procedure is so exactly the same as in 1 S. 14 36 *ff.* that there is hardly room for doubt that in these cases also the decision was by the same sacred lots (see EPHOD); and in many others, though neither the ephod nor the Urim and Thummim is named, the same inference may confidently be drawn (see 1 S. 10 20 *ff.* 2 S. 2 1 5 19 *ff.* Josh. 7 16 *ff.* Judg. 20 27 *f.*).[1] In the article EPHOD (§ 4) it has been surmised that the Urim and Thummim were kept in the ephod, and with certain manipulations *secundum artem* drawn or thrown from it. Moslem writers describe a similar mode of divination among the Arabs before Islam. Two arrow-shafts (without heads or feathers), on one of which was written 'Command,' on the other 'Prohibition,' or words of similar purport, were placed in a receptacle, and according as one or the other of them was drawn out it was known whether the proposed enterprise was in accordance with the will of the god and destined to succeed, or not (cp Prov. 16 33 Acts 1 26). At Mecca, it is said, these lots were in the keeping of the guardians of the Holy House, one of whom drew an arrow when a man wished to decide whether to go on a journey, to marry, etc. Sometimes three arrows were used, one of which was blank; if this was drawn the god refused a response (cp 1 S. 14 37 28 6). Other objects, such as white pebbles, similarly marked, were also used; and the interrogatory could be framed in other and more complex ways.[2] That the divination by Urim and Thummim was of this kind is the opinion of J. D. Michaelis (*Mos. Recht*, 1, § 52—three pebbles), Ewald (*Alt.* 390 *ff.*), and many others. The form of the Urim and Thummim is unknown; that they were little images (De Castro, Spencer, Gesen., and others) is a conjecture which rests solely upon an erroneous identification with the teraphim. If it were safe to draw an inference from the size and shape of the receptacle provided for them in P's description of the high priest's vestments, we should imagine them as small flat objects, perhaps tablets of wood or bone; but it may be doubtful whether P, who, strangely enough, gives no directions for the making of the Urim and Thummim, had any definite notion what they were.

In P the Urim and Thummim are in the keeping of the high priest (Ex. 28 30 Lev. 8 8 Nu. 27 21); they are preserved in a square pouch which is worn upon his breast, the חֹשֶׁן מִשְׁפָּט, *ḥōšen mišpāṭ* (EV 'breastplate of

[1] Mücke (*Vom Euphrat nach Tiber*, p. 75, n. 1) refers to the stories of Bellerophon, Pausanias, and Otto von Wittelsbach.

[2] Similarly Gunkel, in Kau. *Apokr.* 357.

[3] Urim alone, Nu. 27 21 1 S. 28 6; Thummim and Urim, Dt. 33 8. On the derivation and meaning see below.

[1] It is, of course, not imagined that in all cases in which lots are used the Urim and Thummim are meant.

[2] See Ibn Hisham, 197 *ff.*; Lane, *Arab.-Engl. Lex.* col. 1247; cp Tac. *Germ.* 10, and in general Van Dale, *De divinationibus idolatricis in VT memoratis*, chap. 4; We. *Heid.*(1) 126 *f.* (2) 133 *f.* An example of belomancy in the OT, Ezek. 21 21 [26]; see Jerome *ad loc.*, and cp DIVINATION, § 2 (ii.).

judgment'; rather 'of [divine] decision, oracle';[1] see BREASTPLATE). This pouch was permanently attached by chains and cords through rings at its corners to the ephod; the association of the Urim and Thummim with the ephod which we found in the historical books is thus preserved in P (EPHOD, § 3). Whether this form of consulting Yahwè was actually practised in the post-exilic period is doubtful. There is no mention of it in the historical books after the time of David and Solomon (1 K. 2 26 read 'the *ephod*'); but Hos. 3 4 shows that in the prophet's day the ephod-oracle was one of the things which the popular religion could not be thought of as existing without. In Neh. 7 65 (Ezra 2 63 1 Esd. 5 40), however, an important question affecting the rights of certain priestly families is reserved for decision 'when a Urim and Thummim priest shall arise,' proving that this mode of divination was then disused—the art seemingly lost. A reference like Ecclus. 33 3 [*δικαίων* (B), *δήλων* (A); cp 45 10 *δήλοις ἀληθείας*, where, moreover, *λογίῳ κρίσεως* also corresponds to חשן משפט] does not prove that it was practised in the writer's day. Josephus says that the breastplate had ceased to light up (*λάμπειν*, his understanding of the Urim) two hundred years before his time (*Ant.* iii. 8 9 [§ 218]); while according to the Mishna (*Sōṭāh* 9 12)[2] the Urim and Thummim ceased with the death of the pre-exilic prophets; but this is apparently only an inference from Ezra 2 63.

The names Urim and Thummim as vocalised in MT mean 'Lights' and 'Perfection.' This pronunciation is, however, unknown to the translators of 𝔊, who read the former 'Ōrīm, and derived it from הוֹרָה, 'to give decision, tōrāh' (cp Dt. 33 8 10)—an interpretation to which Sym. adheres (*διδαχή*). Modern scholars have not succeeded in giving a satisfactory explanation of the words. If Urim and Thummim were the names respectively of two lots which were of opposite presage, it is natural to infer that the names had a corresponding significance; and this presumption is still stronger if, as seems not unlikely, the words were actually written upon the objects used for casting or drawing the lot. If, then, תמים is derived, as there is no need to question, from the root תמם 'be without fault,' its opposite might well be a derivative of ארר 'curse,'[3] the one signifying that a proposed action was satisfactory to God, the other that it provoked his wrath. This contrast would be still more natural if we might suppose that the Urim and Thummim were originally employed in a kind of ordeal such as is described in 1 S. 14 36 *ff.*, where the real question was one of guilt or innocence; and it is perhaps not without significance that Saul asks that if the fault be in himself or in Jonathan the lot Urim may come out. If this view is sound, the words should probably be pronounced 'ōrīm and tāmīm. But all such conjectures are subject to the greatest reserve.

Literature.—For the older literature see J. G. Carpzov, *Apparatus historico-criticus antiquitatum*, 1748, p. 75 *f.*; for the history of opinion esp. Kautzsch in *PRE*(2), *s.v.* 16 226-233. The most important of the earlier monographs are Joh. Buxtorf, 'Historia Urim et Thummim,' in his *Exercitationes*, 267 *ff.*, reprinted in Ugolini *Thes.* 12 375 *ff.*; and Spencer, 'De Urim et Thummim,' in *De leg. rit.*, lib. 3 diss. 7 (and in Ugolini, 12 453 *ff.*); see also Braun, *De vestitu sacerdotum*, p. 593 *ff.* See also the literature under EPHOD; [also Haupt, 'Bab. elements in the Levit. Ritual,' *JBL* 19 58 *f.* 72 *f.* (1900); W. Muss-Arnolt, 'The Urim and Thummim,' reprinted from *AJSL*, July 1900]; T. C. Foote, *JBL* 21 27 *ff.* (1902). G. F. M.

USURY. See LAW AND JUSTICE, § 16; PLEDGE; TRADE AND COMMERCE, § 83 (*e*) 4 (2).

1. The commonest word is נֶשֶׁךְ, *nešek*, √נשך, lit. 'something bitten off': *τόκος*, *usura* (Ex. 22 25 Lev. 25 36 *f.* Dt. 23 19 *f.* Ps. 15 5 Prov. 28 8 Ezek. 18 8 13 17 22 12).

2. The verb נָשָׁא, *nāšā*, *ἀπαιτεῖν*, *ὀφείλειν* (Neh. 5 7 (Kt.) Is. 24 2), gives the substantive מַשָּׁא, *maššā*, *ἀπαίτησις* (Neh. 5 7 10).

3. The verb נָשָׁה, *nāšah*, *ἀπαιτεῖν* (Kr.) (Neh. 5 7, *ὠφελεῖν*, Jer. 15 10, etc), gives נֹשֶׁה, *nōšēh*, *κατεπείγων*, Ex. 22 25, AV 'usurer,' RV 'creditor,' and נְשִׁי, *nešī* (Kr.), 2 K. 4 7, EV 'debt' (𝔊BA *ἀποτίσεις τοὺς τόκους σου*, 𝔊L *ἀπότισον τὸ δάνειον*).

4. *τόκος* in Mt. 25 27 Lk. 19 23, RV 'interest.'

UTA (ΟΥΤΑ [BA]), a post-exilic family of Nethinim (1 Esd. 5 30), unmentioned in || Ezra (2 45), or Nehemiah (7 48).

UTHAI (עוּתַי[1]; ΟΥΘΙ [BAL]).

1. 1 Ch. 9 4 (*γωθ*[*ε*]*ι* [BA]) = Neh. 11 4, ATHAIAH.

2. One of the b'ne BIGVAI (*q.v.*); Ezra 8 14 (*ουθαι* [A], *ωθαι* [L]) = 1 Esd. 8 40†, **Uthi** (*ουτου* [B], *ωθαι* [L]), son of Istalcurus, on which see ZABUD, 2.

UZ (עוּץ; with art. הָעוּץ, Jer. 25 20†; on origin of name, see GEOGRAPHY, § 20, and note suggestion below that 'Uz' may be due to an early transcriber's error). According to the traditional view, the name is connected both with a region to the N. and with a region to the S. of Palestine. The facts of MT are as follows: (1) Eldest son of Aram, Gen. 10 23 (*ως*, AEL), cp 1 Ch. 1 17 (*ως*, A [17-23, om. B], *ουζ*, L), where Uz, Hul, etc., are among the sons of Shem, but 𝔊A agrees with MT of Gen. 10 23 (so Cappellus, Houb., Ki.). (2) Eldest son of Nahor, Abraham's brother, Gen. 22 21 (*ωξ* [A], *ωζ* [L]). (3) Grandson of Seir the Horite, Gen. 36 28 (*ως* [ADL], *ους* [E]), 1 Ch. 1 42 (*ως* [BA], *ους* [L]). (4) A land between מצרים (Egypt? Muṣri in N. Arabia?) and Philistia, Jer. 25 20 (not in 𝔊). (5) An Edomite land, Lam. 4 21 (not in 𝔊).[2] (6) A land of uncertain situation, where Job dwelt, Job 1 1 (*ἐν χώρᾳ τῇ Αὐσ*[*ε*]*ίτιδι*; and in 𝔊's addition to 42 17). See, further, GEOGRAPHY, § 20.

Let us consider these data in the following order:—(4), (5), (3), (6), (1), (2). Not much need be said on (4). The clause relative to Uz (?) is omitted by Graf, Cornill, Giesebrecht, and Duhm as a gloss. It seems more probable, however, that העוץ is a corruption of הארץ, which a thoughtless scribe wrote instead of פלשתים, which follows in the list of peoples. As to (5), it is plain from metrical considerations that עוץ is superfluous; most probably it is a corruption of a dittographed ארץ (𝔊, *ἐπὶ γῆς*); the first ארץ seems to have come from מצור (see LAMENTATIONS, BOOK OF, § 8; MIZRAIM). As to (3), for 'Dishon' 𝔊 appears to have read 'Rishon,' which suggests Aššūrān[3] as the original. Now the first-mentioned son of Dishan (a mere double of Dishon) is Ḥemdan—*i.e.*, probably Jeraḥmeel. The corresponding place in the list of Dishon's children ought to be occupied by some not less important ethnic. Ozem (אצם), 1 Ch. 2 25, appears therefore to be excluded. Miṣṣur is what we expect, and if עוץ is a name of purely literary origin, and has come by an early transcriber's error from מצר,[4] our expectation is justified.

We now come to (6), and ask, Where was the land of Uz, where Job dwelt? The data appear at first sight to be conflicting. Job was one of the בני קדם. It seems therefore as if he ought to be placed in the E. or NE. of Palestine, and this can be supported by the mention of the Kasdim in Job 1 17, and possibly by the ethnics 'Shuhite' (?) in 2 11, and 'Buzite' in 32 2, also by the references to Uz in (1) and (2), according to the ordinary view. No stress, however, can be laid on the tradition connecting Job with the district of Ḥaurān called the Nuḳrā (see Wetzstein's valuable excursus in Del. *Hiob*(2), 551-604), since it can only be traced back to the fourth century A.D. On the other hand, the names Eliphaz, BILDAD (*q.v.*), and ZOPHAR (*q.v.*), and the ethnic 'Temanite' in 2 11, suggest placing the home of Job in a region S. of Palestine, and 'Kasdim' in 1 17 should probably rather be 'Kušim' (Cushites of N. Arabia), while the representation of Job and his friends as cultivators of 'wisdom' indicates that this was really the view of the writers of our present Book of Job (cp JOB, BOOK OF, §§ 4, 9). This latter view is also confirmed by the apocryphal appendix to Job in 𝔊 (see GEOGRAPHY, § 20), and, according to the present writer's theory, by the phrase *benē ḳedem* in Job 1 3, which is a corruption of *benē reḳem*—*i.e.*, sons of Jeraḥmeel (see

---

[1] The meaning of the word חֹשֶׁן is not known; something like 'receptacle' best suits the context.

[2] See also the Talmud, *Sōṭāh* 48 *b*, *Jōmā* 21 *b* (Urim and Thummim lacking in second temple), and Maimonides, *Kělē ha-miḳdāsh*, 10, § 10.

[3] That ארים is perhaps to be connected with ארר was suggested by Wellhausen, *Prol.*(2) 419 n.

[1] For עותיה cp de Vogüé, *J. As.* 1897, 10 202 (no. 355).

[2] Unless *γῆς* represent not only ארץ but also a transliteration of עוץ. See next paragraph.

[3] So ראש in Ezek. 38 2 probably comes from אשור, 'Asshur' (the southern Asshur). See ROSH.

[4] In Lam. 4 21 ארץ seems to have come from צר—*i.e.*, מצר; see above, on (5).

Rekem). As to (1) and (2), we have seen elsewhere (see, *e.g.*, Mizraim) that Gen. 10 has been largely recast, so that 'Aram' originally meant the N. Arabian tribes known collectively as 'Jerahmeel,' and it is possible that the names 'Nahor' and 'Haran' were originally attached to the Negeb.

To sum up. The two sets of data do not really conflict, if Aram and Nahor are primarily names of clans and districts in the Negeb, and not where later writers placed them in the NE. of Palestine. This is not a mere struggling hypothesis, but accords with a large series of parallel phenomena. If, however, we hesitate to admit this view (which implies that 'Aram' comes from 'Jerahmeel'), we may still find a plausible reconciliation of the data (see Job, Book of, § 4). At any rate, a new critical treatment of the name may not be altogether unwelcome. Theories that are simple frequently prove to be erroneous. Cp Budde, *Hiob*, 'Vorwort,' pp. ix-xi. T. K. C.

UZAI (אוּזַי, ευει [BN], ευζαι [A], ουζ. [L]), father of Palal (Neh. 3 25).

UZAL (אוּזָל; Sam. איזל; αιζηλ), son of Joktan, Gen. 10 27 (om. E), 1 Ch. 1 21 (om. B, αιζην [A], ουζαλ [L]), and, by a necessary correction, Ezek. 27 19, where ironwork (*i.e.*, sword-blades?), cassia, and calamus (spice) appear among the articles of trade from Uzal. The name is obscure. Ar. tradition makes *Azāl* the ancient name of the capital of Yemen, later known as *Ṣan'ā* (see Di. *ad loc.* and reff.). The connection of the two names is disputed by Glaser (*Skizze*, 2 277 310 427 434), who prefers to seek for Uzal near Medina.[1]

On the text of the whole verse see Cornill (*Ez.*, *ad loc.*). מֵאוּזָל for מְאוּזָּל is supported by some MSS, 𝔊, Pesh., and nearly all moderns. AV renders 'going to and fro'; RV strangely relegates the above reading ('from Uzal') to the margin, and translates 'yarn,' based apparently on a passive formation of אזל=Aram. עזל, 'to spin.' This weakening of ע to א does occur in Heb., but not often enough to warrant such a rendering (cp W. Wright, *Comp. Gr. Sem.* 48 247). [See also *Crit. Bib.* on Gen. 10 27 Ezek. 27 19.] F. B.

UZZA, THE GARDEN OF (גַּן עֻזָּא, . . . κηπος οζα [BAL]; Pesh. *g'nth gzza*; *hortus Aza*), the spot where Manasseh and Amon, and according to 𝔊^B (see below) Jehoiakim were buried (2 K. 21 18 26). The most important passage is 2 K. 21 18, because the Chronicler, too, refers to the spot where Manasseh was buried; he makes no such statement in the case of Amon. Manasseh was buried 'in the garden of his house, in the garden of Uzza' (2 K. 21 18): the ‖ passage, 2 Ch. 33 20, simply says, 'in his own house,' or (𝔊) 'in the garden of his house.' Most scholars suppose that near Manasseh's palace was a plantation named after Uzza (Uzziah?) where Manasseh had made a family grave, but this is not quite satisfactory.

In 2 K. 21 18 בגן is written twice over in parallel phrases. Omit the second בגן, and read בְּגַן בֵּית צוּר, 'in the plantation of the mausoleum' (lit. 'rock-house'—*i.e.*, grave in the rock, cp Is. 14 18 22 16*b*). עז in the Psalter is repeatedly miswritten for צר. Note also that in 2 Ch. 36 8 𝔊^B has . . . καὶ ἐκοιμήθη Ἰωακειμ . . . καὶ ἐτάφη ἐν γανοζαὴ (γανοζαν [A], Γαν Οζα [L]) μετὰ τῶν πατέρων αὐτοῦ. T. K. C.

UZZAH (οζα [BAL]). 1. (עֻזָּה, 2 S. 6 6-8, § 51; αζζα[ν] [A]) or **UZZA** (עֻזָּא, 2 S. 6 3 [αζα, A] 1 Ch. 13 7 9-11), one of the sons of Abinadab who took part in the bringing up of the ark from Kirjath-jearim under David (see Ark, § 5; Kirjath-jearim). He and his brother (אַחְיוֹ; cp Ahio) were driving the cart upon which the ark was placed, when, upon reaching a certain threshing-floor (see Nachon), the oxen 'stumbled' (see below), whereupon Uzzah put forth his hand to steady the ark (emend 2 S. 6 7 after 1 Ch. 13 10 with We., Dr., Bu., and others). For this 'God smote him,' and the place received the name Perez-uzzah (*q.v.*). The Chronicler, however, accounts differently for the calamity; 'none ought to bear the ark of God but the Levites' (1 Ch. 15 2; cp *v.* 12 *f.* and col. 3463, n. 1). The narrative can hardly be understood by itself; it must be taken in connection with 2 S. 5 17-25. It would

[1] Ašur-bani-pal speaks of a city called Azalla, in the far-off land of Mas (see Mesha i.); see Del. *Par.* 243, 298 *f.*

appear (see Rehoboth, Zarephath) that, according to the story which underlies this passage and 2 S. 21 15-22 and 23 8 *ff.*, David and his *gibbōrīm* won a great victory over the Zarephathites and the Rehobothites, and by textual corruption Zarephath-'azzah (the name in the original text) became Perez-uzzah, and so an imaginary person was produced, called Uzzah. The corrupt word Perez naturally suggested a divine judgment (cp Ex. 19 22 Ps. 60 3 [1]). The story is recognised as historical by Wade (*Old Test. Hist.* 248), but it is perhaps wiser to regard it as artificial. See Perez.

'Stumbled' is evidently the sense required in 2 S. 6 6, though AV gives 'shook' (RV 'stumbled'; with margins). שָׁמְטוּ, however, is not the right word; perhaps it is the residuum of הִתְמַטְמְטוּ, 'wavered violently.' For other views see Dr. and Bu. (*KHC*).

2. AV Uzza (עֻזָּה), a Merarite (1 Ch. 6 29 [14]: αζα [A], οζια [L]). Cp Genealogies i., § 7 (ii. *d*). T. K. C.

UZZEN-SHEERAH, UZZEN-SHERAH. See Sherah.

UZZI (עֻזִּי, a perfectly regular abbreviated form of עֻזִּיָּהוּ [for Cheyne's view see Uzziah], cp Palm. עזי; οζ[ε]ι [BAL] generally).

1. b. Bukki, in the genealogical list connecting Eleazar and Zadok (1 Ch. 6 5 [5 31], cp *v.* 51 [36], οζιηλ [L]). This list is given also in Ezra 7 2 *ff.* (σαουια [B], οζιυι [A], οζιου [L]), but with the omission of all names between Meraioth and Azariah (the father of Amariah). In 1 Esd. 8 2 the name appears as Savias (om. B, σαουια [A], οζιου [L]); for Ozias (AV Ezias) here represents Azariah (οζ[ε]ιου [B], εζιου [A], ζαραιου [L]), and 𝔊^B by further omitting Uzzi and his son Zerahiah makes Azariah the son of Bukki—a proceeding which is based on a confusion between עזריהו and עזי. Jos. (*Ant.* viii. 1 3) replaces Uzzi and Zerahiah by ιω[α]θαμος. See Genealogies i., § 7 [iv.].

2. b. Tola, a chief of Issachar (§ 7, end), 1 Ch. 7 2 *f.* (ζειρρει [B *v.* 3]).

3. b. Bela b. Benjamin (§ 9, ii. *a*), 1 Ch. 7 7; cp Uzza (1 Ch. 8 7).

4. b. Michri of Benjamin (§ 9, iii.), 1 Ch. 9 8 (οζιου [L]).

5. b. Bani, an overseer, temp. Nehemiah (Neh. 11 22, om. ℵ^{c.a}).

6. A chief of a father's house of Jedaiah (Neh. 12 19 42 om. Bℵ*A in both places, οζει [L], οζι [ℵ^{c.a} mg.]). S. A. C.

UZZIA (עֻזִּיָּא; οζ[ε]ια[ς] [BℵAL]), the Ashterathite (very possibly Og's city of Ashtaroth [Dt. 1 4 etc.] was really Zarephath, a city on the N. Arabian border probably conquered by David, see Zarephath; but for the received view see Ashtaroth), one of David's heroes (David, § 11 *a*, i.); 1 Ch. 11 44.† T. K. C.

UZZIAH (עֻזִּיָּה[וּ] in 2 K. 15 32 34 Is. 1 1,[1] etc., 2 Ch. 26 1 *ff.* 27 2; see also 5, below], either an expansion of the clan-name Uzzi (see *Crit. Bib.* on 1 Ch. 5 31) or a religious utterance = 'Yahwè is strength,' or 'my strength' (§ 29); there is the same difference of

[1] That 'Uzza' in 2 K. 21 18 26 has anything to do with 'Uzziah,' as Wellhausen once suggested, is far from probable (see Uzza). Nor has the name Azriya'u of Ya'udi anything to do with our Uzziah or Azariah. With regard to the authentication of the names in the OT, 'Azariah' has on the whole the support of Kings, 'Uzziah' of Chronicles. More particularly, the form עזיה (Uzziah) occurs in 2 K. 15 13 (?) 30 Hos. 1 1 Am. 1 1 Zech. 14 5, but in 2 K. 15 32 34 Is. 1 1 6 1 7 1 2 Ch. 26 1 *ff.* 27 2 עזיהו (Uzziahu); עזריה (Azariah) in 2 K. 14 21 15 1 7 17 23 27, perhaps 13 (see Ginsb.), 1 Ch. 3 12, but עזריהו (Azariahu) in 2 K. 15 6 8. From the point of view of the study of clan-names Azariah is the most to be preferred of these forms. An examination of the occurrences of Eleazar, Eliezer, Azariah, Azarel, Ezri, shows indisputably that there was till quite late times a consciousness that Azar or Ezer represented a clan of the Negeb. It is noteworthy that by their mothers the kings of Judah were much connected with the Negeb. Very possibly the mothers of Amaziah and Uzziah came, not from 'Jerusalem,' but from 'Ishmael' (ירושלם and ישמעאל being liable to confusion). When a queen-mother was of Jerusalem, it was possibly not stated; take, *e.g.*, the cases of the mothers of Hezekiah and Manasseh. In 2 K. 15 13 𝔊's readings are οχοζιου [A] (cp οχοζειαν, B, 2 Ch. 26 1); 30 αχας [B], αζαριου [A] (om. L); 32 αζαριας [BAL]; 34 (οζ[ε]ιας [B], αζαριας [AL]).

opinion as to 'Uzziel.' The question is hardly decided by the existence of the Phœn. pr. names עזבעל, עזמלך, or the Palm. עזי and Nab. עזיו, or by the name found on old Heb. seals—עזיו, 'uzziyā'ū, for which see Wright, *Comp. Sem. Gr.* 72 *f.*—[Che.]).

1. Son of Amaziah, king of Judah, whom he succeeded at the age of sixteen (2 K. 14 21 = 2 Ch. 26 1).

1. Earlier criticism. That the name Uzziah was changed to Azariah at his accession is highly improbable. Both names are equally religious or rather perhaps equally non-religious, and from 1 Ch. 6 24 [9] and 36 [21] we see how easy it was for עזיה to become עזריה, or for עזריה to become עזיה. The form Azariah is the more accurate, but Uzziah may have been a popular corruption; it is hardly worth while therefore to disturb the modern usage, and substitute Azariah for Uzziah. According to Stade[1] in 1887, there is very little information respecting Uzziah at the disposal of the historian. After stating that Azariah or Uzziah was proclaimed king by a popular assembly, he adds that 'the Book of Kings knows nothing of any warlike achievements of Uzziah. The king had the misfortune to become a leper, so that in functions like that of pronouncing judgment, the discharge of which would have brought him into contact with the people, he had to be represented by his son Jotham, who was invested with the office of a prefect of the palace. Where the leper-king resided (see 𝔊) did indeed originally form a part of the tradition; but the word in question (15 5) has become disfigured beyond recognition.'

In further explanation Stade adds, 'bet hachophschit [הַחָפְשִׁית], 2 K. 15 5, chopschût [החפשות], 2 Ch. 26 21, cannot possibly mean an infirmary [RVmg., 'a lazar house']. The aphphûsôth [αφφουσωθ; but in 2 Ch. αφφουσιων B, απφουσωθ A] of 𝔊 seems to suggest that it is not the original reading. It is, however, equally obscure what is the Hebrew word underlying it. Probably some building in the royal fortress is meant.'[2]

Stade concludes with the remark that 'the sixteen years which the Book of Kings gives to Jotham, include the period during which Jotham was the regent for his father.' Elsewhere (567) Stade further mentions that Uzziah rebuilt Elath, which his father had probably recovered. It is clear, however, that fresh investigations of the Book of Chronicles and of the Hebrew text both of Kings and of Chronicles do not favour this extreme historical sobriety. Considering that the Book of Kings gives Uzziah a (nominal) reign of not less than fifty-two years, an augmentation of our scanty material is of importance. Let us consider our situation.

As to the accession of Uzziah, and the assumed conquest of Elath, we can hardly rest satisfied with the

2. Circumstances of Uzziah's accession. ordinary view of the circumstances of the time. As Kittel has pointed out, these are contained in portions of two different documents, viz., 2 K. 14 7-14 and *vv.* 19-22;[3] each source, in a carefully revised text, must be separately studied. From the former we infer (cp JOKTHEEL), that the contest between Jehoash and Amaziah was for the possession of the NEGEB (*q.v.*), a part of which Jehoash had recovered for Israel,[4] but which Amaziah wanted for Judah. A decisive battle took place 'at Beth-cusham which belongs to Jerahmeel,' and Amaziah was worsted and (according to this stratum of the narrative) taken captive. We now have to turn to our second fragment of narrative, remembering (this we learn from *v.* 7, where read 'Arammites,' and for the rest see JOKTHEEL, SELA) that Amaziah had excited the bitter animosity of the Arammites or Jerahmeelites by his cruelty at the rock of Kadesh. The notice (*vv.* 19-22) is very meagre, and the text is imperfect. We can, however, venture to infer from *v.* 19 that, according to this document, Amaziah had not been carried away by Jehoash, but had sought refuge at some place in the independent, non-Israelitish portion of the Negeb.[1] Thirsting, as it would appear, for vengeance, some of the inhabitants conspired against the fallen king. He fled to Eshcol[2] or Ḥaluṣah (?), an important city in the Negeb, but the dagger of the assassin found him there. The actors in the following scene (*vv.* 20-22) are the non-Israelites of the Negeb.

'And all the Cushites bore him [to Jerusalem], and he was buried in Jerusalem. . . . And the Jerahmeelites took Azariah (16 years of age) and made him king instead of Amaziah his father, and imposed oaths upon him. And they returned to Jerahmeel, after the king had lain down with his fathers.'[3]

The humiliation of Judah was now complete. First Israel, and then Jerahmeel, had treated it as a subject state. The only comfort was that Israel and Jerahmeel were foes, and in a struggle between the two the wishes of Judah would naturally accompany Israel. (It will be seen that the statement of the conquest of Elath has arisen out of a corruption of the text.[4])

As to the wars of Uzziah. According to the Chronicler, the king warred successfully against the Philistines, the

3. Wars of Uzziah? Arabians, and the Meunim, and strengthened the fortifications of Jerusalem, which must have suffered greatly at the capture of the city by Jehoash (2 Ch. 26 6-9). The Book of Kings (as we have seen) is entirely silent as to this national aggrandisement; but elsewhere valuable information has been found underlying the statements of Chronicles. Still, great exaggeration there must at any rate be, as Guthe (*GVI* 186) remarks. Unless we could bring ourselves to identify Azariah of Judah with Azriya'u of Ya'udi, we could not possibly imagine the sudden and unexpected revival of the martial prowess of Judah. M'Curdy, it is true, assumes this;[5] he also thinks that the relation of Hezekiah to the Philistine city of Ekron in the time of Sennacherib, and the statement of Sennacherib that the cities which he had cut off from Judah he gave to the kings of Ashdod, Ekron, and Gaza, imply a period of Judahite expansion which we can only place in the reign of Uzziah. Winckler, on the other hand, remarks, 'Such successes as those which are described would be possible only if Azariah acted as the vassal of a more powerful prince. Muṣri could not be such, for it is certain that the Philistine cities would have enjoyed its special protection. There was Assyria, no doubt; but Azariah could have taken part in the Assyrian campaign of 773 [the last year of Shalmaneser III.] only as a feudatory of Jeroboam II.' (*KAT*(3), 262).

There is no difficulty in supposing that either the Chronicler has misread his authority, or the text of Chronicles itself has suffered corruption. There is no difficulty in supposing that Uzziah after a time broke his 'oaths' and made war on the Jerahmeelites—*i.e.*, on that section of the Jerahmeelites which neither Jehoash nor (2 K. 14 28, explained in col. 3861, n. 1) Jeroboam II. had subdued. That he 'broke down the wall' of Rehoboth and Ashḥur,[6] is improbable, but he

1 *GVI* 1 569 *f.*

2 For Stade's fuller expression of opinion, see *ZATW* 6 156-159 (1886), where, *inter alia*, it is suggested that the true reading may have been בֵּית הַחֹרֶף, Jer. 36 22 (Am. 3 15)—*i.e.*, the winter palace.

3 Kittel wrongly detaches *v.* 22, and assigns it to the same document as *vv.* 7-14. The text, in its true form, does not appear to allow this.

4 In 2 K. 13 25 the reference is to cities in the Negeb; the present text of 10 33 is full of distortions of names of districts and places in that region. See *Crit. Bib.*

1 In *v.* 19 we read, 'And they conspired against him in Ishmael' (ישמעאל, as elsewhere, for ירושלם).

2 Reading אשכל for לכיש. The same change may be required in Mic. 1 13.

3 For the corrections see *Crit. Bib.*

4 The emendation in 2 K. 14 22*a* (ויבא אחו באלות; cp Ezek. 17 13) has already been suggested by Klostermann, who, however, makes Jeroboam II. the subject of the verb. To connect *v.* 22, either in whole or in part, with *v.* 7 (as most propose), is very difficult.

5 *Hist. Proph. Mon.* 1 312, n. 1; 'Uzziah and the Philistines' *Expos.* 1891 *b*, pp. 388-396.

6 So read for 'Gath' (as often) and 'Ashdod' (as Am. 3 9). A

may have made successful incursions into the Jerahmeelite land,[1] and have inflicted a check on his enemies. More than this we cannot say, and underlying the account of Uzziah's leprosy there is probably a record of a great humiliation sustained by the king.

As to Uzziah's leprosy (cp LEPROSY, § 5, iv.). In 2 Ch. 26 16-21 he is said to have been struck with leprosy

4. Reported leprosy.

as a punishment for attempting to usurp the office of the priesthood by burning incense in the temple, in spite of the well-established fact that the ancient kings from time to time exercised sacerdotal functions. But in 2 K. 15 5 all that is said is, 'And Yahwè smote the king, so that he became a leper unto the day of his death, and dwelt in the house * *' (the last word appears untranslatable). Has something been omitted by the compiler of Kings, and if so, did it agree with Chronicles? To answer the latter question in the affirmative is difficult, the story in Chronicles being so clearly post-exilic. The case is parallel to that of 2 K. 14 22. The true text probably runs nearly as follows:—'And Jerahmeel led the king away to Miṣṣur to the day of his death, and he dwelt in Beth-zarephath of Miṣṣur.'[2]

The mother of Jeroboam I. was called in error 'a leper,' whereas really she was a Miṣrite (col. 2404, n. 2); Naaman in the earlier form of his story was called, not a leper (2 K. 5 1), but a Miṣrite.[3] And Uzziah, too, in the narrative from which the compiler of Kings drew, must have been brought into connection with the Miṣrites. Like Manasseh (probably), Uzziah was carried into captivity by the Miṣrites or Jerahmeelites of N. Arabia; but unlike Manasseh he did not return. Meantime, his son Jotham was necessarily regent at Jerusalem.

As to the earthquake, a detail so romantically used by Josephus (*Ant.* ix. 10 4). In Zech. 14 5 Am. 1 1 (title)

5. Earthquake.

we find obscure references to an earthquake in Uzziah's reign, and the suggestion has been hazarded that this earthquake may have suggested the imagery of Is. 2 19-21 and Am. 4 11. It is true, the available evidence for the fact is very late, and Wellhausen throws doubt on its historical character (cp AMOS, § 4). In Zech. 14 5 we should probably read, 'as ye fled before Ashḥur' (אשחור), and in Am. 1 1, 'two years before Ashḥur was rooted out.' The Zech. passage alludes to the frequent raids of Jerahmeelites or Ashḥurites from N. Arabia, and the Am. passage probably to the events attending the successes of Jeroboam II. in the Negeb (see § 2).

As to references to Uzziah in Isaiah. That there is such a reference in Is. 6 1, is unquestionable. In Is.

6. Uzziah in Isaiah.

26-8 12-16, however, it is only to Jotham, first as regent and then as king, that the prophetic writer's descriptions can be safely held to apply. Exegesis, of course, is unaffected by this result. T. K. C.

We have no further information respecting Uzziah, unless we may venture to identify Azariah of Judah

7. Azriya'u, is he Uzziah?

with an important personage in an inscription of Tiglath-pileser III. This monarch informs us that in his reign (738 B.C.) nineteen districts situated in the neighbourhood of Hamath banded themselves against him under Az-(or Iz-)ri-ya-u of Ya-u-di, but were eventually overcome (see *KAT*(2) 217 *ff.*, *KB* 2 25 *ff.*, Tiele, *BAG* 229 *f.*). The identification of Azriyau of Ya'udi with Azariah (= Uzziah) of Judah proposed by the late George Smith the Assyriologist, and after him by Schrader (*KGF* 399 *ff.*), who ably supported it against A. von Gutschmid, was accepted by Winckler in 1892, and is even now defended by M'Curdy (*HPM* 1 348 *f.*), C. F. Kent (*Hist. Heb. People*(2), 2 126), and Rogers (*HBA* 2 119 *f.*). A strong opposition has, however, been raised to it (see, *e.g.*, Wellh. *JDT* 20 632; Klo. *Sa.-Kö.* 496; Wi. *AOF* 1 1 *ff.*; *KAT*(3) 54, and, following Winckler, Che. *Intr. Is.* 4). Ahaz, it has been urged, was reigning four years later (734 B.C., see AHAZ), and the deaths of Uzziah and Jotham must therefore have been almost contemporaneous. The assertion that Jotham himself may have possibly taken the field, and not Uzziah (M'Curdy, *Hist. Proph. Mon.* 1 414), on the theory that *qui facit per alium facit per se*, is scarcely borne out by the precise wording of the cuneiform text. But a far greater objection is the difficulty of supposing that Uzziah of Judah should ever have wished to interfere with Tiglath-pileser, that he should ever have been in a position to undertake such an expedition, and that he should have been the leader of a band of tribes representing a district extending from the Orontes to the sea, and from the northern flanks of Lebanon and Anti-libanus to the sea of Antioch;[1] for whatever his relations with Jeroboam II. may have been, it is at all events clear that the statement in 2 K. 14 28 cannot be called in to support the identification (see JEROBOAM ii.).

These objections are urged with great force by Winckler (*AOF* 1 10 *ff.*), who, dismissing the old identification, would explain Ya-u-di as the well-known יארי of the Zenjīrli inscriptions mentioned in the steles of Panammu and Hadad, a view which is favourably quoted by Kittel (*Könige*, 263), and unreservedly accepted by Hommel (art. 'Assyria,' Hastings' *BD*).[2]

S. A. C.

2. One of the b'nē Kohath, in the genealogy of HEMAN, 1 Ch. 6 24 [9] = 36 [21] AZARIAH, עֲזַרְיָהוּ.

3. One of the b'nē HARIM, Ezra 10 21 = 1 Esd. 9 21 AZARIAS (but οζιας [L]).

4. Father of Athaiah in list of Judahite inhabitants of Jerusalem (EZRA, ii., § 5 *b*, § 15, 1 *a*) (Neh. 11 4, αζεδ [B], αζεδνα [ℵ]).

5. Father of JONATHAN, 9 (1 Ch. 27 25, עֻזִּיָּהוּ).

T. K. C., §§ 1-6; S. A. C., § 7.

UZZIEL (עֻזִּיאֵל, § 29; either a clan name [cp UZZIAH], the *-el* being only formative, or = 'God is my strength,' § 29; οζ[ε]ιηλ [BAFL]), a name found only in post-exilic writings, and in connection with names capable of being regarded as clan-names of the Negeb (Che.).

1. b. Kohath (cp JAHAZIEL, 3); mostly mentioned last in the list of sons (Ex. 6 18 Nu. 3 19 1 Ch. 6 2 [5 28] 18 [6 3]). According to Lev. 10 4 he was the uncle (דֹּד) of Aaron (αζιηλ [B]). Of his sons who are mentioned in Ex. 6 22 (see also 1 Ch. 23 20 [𝔊[B] identifies Uzziel with Jahaziel of 5 19] 24 24) the most important was Elzaphan (cp ZAPHON), who was the chief of all the Kohathites (Nu. 3 30).

region in or near the Negeb was called Ashḥur, and there must also have been a city bearing the same name (cp the place-name Jerahmeel).

1 The 'Philistines' are our old friends the 'Zarephathites' (see ZAREPHATH), and the 'Arabians of Gur-baal' are the 'Arabians of Jerahmeel.' The 'Maonites' should be the 'Ammonites,' which, as often, is a corruption (which obtained an independent existence) of 'Jerahmeelites.'

2 וינהג ירחמאל את־המלך מצור עד־יום מתו וישב בבית־ערפת מצור. The final word is restored from 2 Ch. 26 21. The strange word החפשית comes from האשפות, 'the dung-hill,' and אשפות (as in the phrase שַׁעַר הָאַשְׁפֹּת, Neh. 2 13, etc.) is a corruption of צפת = צרפת.

3 The rendering of 2 K. 5 1*b* and accompanying note in the OT of Kautzsch should open the eyes of some readers. 'But the man was . . . leprous.' 'The two omitted words mean elsewhere, "an able (or valiant) man"; either they have arisen from a mutilation of the text or they have got in here by mistake.' מצרי, however, if we restore this word, is in apposition to גִּבּוֹר חַיִל.

1 Among the districts named are *Ḫatarikka*, *Arḳa*, *Ṣianna* (see HADRACH, ARKITE, SINITE).

2 See, on the other hand, M'Curdy, *Hist. Proph. Mon.* 1 413 *ff.* It has also been plausibly suggested that יארי may be meant in the famous title of Sargon at the opening of the Nimrūd inscription (*KB* 2 37), 'the subduer of Ya'udu, whose situation is far off.' Elsewhere, Sargon calls Canaan *bît Ḫumri* (cp *KAT*(2) 189, and see OMRI). See SARGON, § 17.

The b'nē Uzziel are mentioned in 1 Ch. 15 10 with Amminadab their chief as amounting to 112; and it is noteworthy that Elzaphan appears in *v.* 8 as a separate clan. From Uzziel come the UZZIELITES (הָעָזִּיאֵלִי, Nu. 3 27 ὁ οζειηλεις [B], ὁ οζιηλ'εις [A], οζιηλ 'εις [F], οζιηλ εἰς [L]; 1 Ch. 26 23). See GENEALOGIES i., § 7.

2. b. Ishi, a captain of SIMEON (§ 5) in the raid against the Amalekites and Meunim (1 Ch. 4 42).

3. b. Bela, in a genealogy of BENJAMIN (*q.v.*, § 9, ii. *a*) (1 Ch. 7 7).

4. A Hemanite musician (1 Ch. 25 4 *αζαραηλ* [B], who in *v.* 18 is called AZAREL (L, however, *οζιηλ*).

5. In 2 Ch. 29 14 Uzziel figures as a son of Jeduthun, not of Heman (as above). It is also noteworthy that the name occurs here in close connection with that of Elzaphan (*v.* 13).

6. 'Uzziel, the son of HARHAIAH (*q.v.*) goldsmiths,' in list of wall-builders (see NEHEMIAH, § 1 *f.*; EZRA ii., §§ 16 [1], 15 *d*), Neh. 3 8 (𝔊^{BNA} omits). See Ryle, Be.-Ry., Siegfr. *ad loc.*

[Various explanations have been given of this strange phrase. Apart from the 'Jerahmeelite theory,' we may be grateful for S. A. Cook's ingenious suggestion (*Exp. T* 10 280, and HARHAIAH). But in the light of many other passages in which 'Jerahmeel' and 'Zarephath' put on strange disguises, and, in particular, of *vv.* 31 *f.* (on which see *Amer. Journ. of Theol.* 5 440 [1901], and PERFUMERS), it is difficult not to decide somewhat positively in favour of the following restoration, 'Next to him repaired Uzziel, son of Jerahmeel, a Zarephathite. And next to him repaired Hananiah, son of Jerahmeel.' The historical inference of Meyer (*Entst.* 153) that artisans with no landed estate had no *gens*, the guild taking the place of the *gens*, is therefore hardly justified.—T. K. C.]

V

VAHEB (וָהֵב [אֶת־]; but MSS and Gr. Ven. אתוהב), apparently a locality in the Amorite country, towards Moab, described as being 'in Suphah' (בְּסוּפָה); Nu. 21 14 RV.

AV (following Onkelos) gives the indefensible rendering, 'What he did in the Red Sea'; Vg. 'sicut fecit in mari rubro';[1] Gr. Ven. *ετεβαεβη ἐν λαίλαπι.* The rendering of 𝔊^{BA}, however—*τὴν ζωοβ* (*ζοοβ* [FL]) *ἐφλόγισε*[2]—presupposes the reading את־זהב סרף, and studying this in the light of suggestions elsewhere made with regard to the 'stations' of the Israelites and the place-names in Dt. 1 1 Gen. 36 31-39, we see that 'Vaheb' is probably a corruption of 'Miṣṣur' and 'Suphah' of 'Ṣarephath' (see DI-ZAHAB, SUPH). If the quotation really comes from a poetical record of the ancient wars we may further suppose that a verb has dropped out, and render '(he conquered) Miṣṣur and Ṣarephath' (two places in N. Arabia on the border of S. Palestine; see MIZRAIM, § 2 *b*, ZAREPHATH). It is much more probable, however, that instead of 'the book of the wars of Yahwè' (ספר מלחמת יהוה) we should read 'the list of Jeraḥmeel' (ספר ירחמאל), and suppose that the Priestly Writer here introduces us to one of his chief sources of information for N. Arabian place-names.

The passage then becomes, 'Wherefore it is said in the list of Jeraḥmeel, The land of Miṣṣur and Ṣarephath; the land of Jerahmeel which stretches towards the city of Zarephath, and is adjacent to the border of Miṣṣur' (עַל־כֵּן יֵאָמַר בְּסֵפֶר יְרַחְמְאֵל אֶרֶץ מִצּוּר וְצָרְפַת וְאֶרֶץ יְרַחְמְאֵל אֲשֶׁר נָטָה לְעִיר צָרְפַת וְנִשְׁעַן לִגְבוּל מִצּוּר).' See *Crit. Bib.* T. K. C.

VAJEZATHA, RV **Vaizatha** (וַיְזָתָא; ζαβουθαιον [BL^{b}], ζαβουδεθα [ℵ], ζαβουγαθα [A], ιζαθουθ [L^{a}]), a son of HAMAN, Esth. 9 9. The names of Haman's sons put a heavy strain on the traditional theory respecting the Book of Esther. In the case of Vaizatha the form itself is not certain, the ו being exceptionally long and the ז exceptionally short (a trace of an early corrector's work?). Benfey conjectures as the Persian original Wahyaz-dâta.

If, however, the story has been remodelled, and in its original form the names were such as a Hebrew writer might regard as Jeraḥmeelite (see PURIM, § 7), one might venture to restore זיתר (cp יתר, I 10), behind which may lie צרפתי, 'Zarephathite.' Haman, being an Agagite, was an Amalekite (*i.e.*, Jeraḥmeelite). T. K. C.

VALE, VALLEY, occurs in AV as the rendering of the following Heb. words:

1. עֵמֶק, *'ēmeḳ* (etym. 'depth'; κοιλας, φαραγξ, πεδιον, etc.), for which, in geographical designations, RV, followed by G. A. Smith, gives 'vale,' is the most natural antithesis to הַר, *hār*, 'mountain' (cp Mic. 1 4 1 K. 20 28, מִישׁוֹר, *mīšōr*, *v.* 23, cp PLAIN, 5). It is applied to wide level spaces opening out of a mountainous country. About the names of most of these 'vales' considerable controversy has gathered (see ACHOR, ELAH, ESDRAELON, MULBERRY-TREE, REPHAIM, SIDDIM, SUCCOTH). The vales of Hebron and Aijalon, however, are well-known, and may be taken as typical. 'Ēmeḳ is also applied to parts of the Jordan valley (Josh. 13 27 [cp 𝔊] 17 16, and, if the text is correct, Ps. 60 6 [8], but see SUCCOTH), and to the lateral valleys of the Jordan (1 Ch. 12 15 [*αὐλών*] Cant. 2 1). In Ps. 65 14 Job 39 10 'vales' are apparently referred to, not as the antithesis of mountains, but as containing fertile arable land. But the text of these passages is disputed. AV has VALE in Gen. 14 3 8 10 37 14, and DALE in Gen. 14 17 (RV 'vale') 2 S. 18 18 (EV). On the difference between the *'ēmeḳ* and the *biḳ'ā* (see 2), see ESDRAELON.

2. בִּקְעָה, *biḳ'āh* (etym. 'split,' 'cleft'; *πεδίον*) is also used in contrast to 'mountain' (*e.g.*, Dt. 8 7 11 11, [*πεδινή*], cp Ps. 104 8). The etymological meaning explains Is. 40 4, 'Every *biḳ'ah* (EV 'valley'; 𝔊 *φάραγξ*; Di. 'ravine') shall be exalted'—*i.e.*, filled up. The modern Arabic equivalent *el-Buḳā'* is the name given to the valley situated between the Lebanons. The same word is rendered PLAIN (*q.v.*) by AV in Am. 1 5 (RV 'valley'), Ezek. 37 1 *f.* (AV$^{mg.}$ 'champaign'), and by EV in Neh. 6 2 Dan. 3 1 (Aram. בִּקְעָא), Gen. 11 2 Ezek. 3 22 *f.* (RV$^{mg.}$ 'valley') 8 4, etc. On Dt. 34 3 (EV inaccurately, 'the plain of the valley of Jericho') see JORDAN, § 2.

3. גַּיְא (also גֵּיא, גַּי, גֵּי; see the Lexicons), *gai*, *gē*, etc. (etym. perhaps 'depression'; *φάραγξ*, also *νάπη*, *κοιλάς*, etc., once *βουνός*, 2 K. 2 16 [om. A]). A frequently occurring word for a somewhat narrow opening in the mountains, gorge, ravine; see (*e.g.*) JIPHTHAH-EL, HARASHIM, SAMARIA, ZEBOIM, ZEPHATHAH, HAMONGOG, and especially HINNOM. In 1 S. 17 3 (*αὐλών* [𝔊^{AL}]) it apparently designates the deep channel, dug by the turbid water torrents in the middle of the vale (*'ēmeḳ*) of Elah. Relatively to the *gai*, or lower valley, the *'ēmeḳ* might be called *hār*, 'mountain,' unless we suppose in 1 S. 17 the combination of elements from two sources. See ELAH, EPHES-DAMMIM.

4. נַחַל, *náḥal*, denotes both a winter torrent and the valley it flows through. It occurs in both senses 1 K. 18 5. See BROOK.

5. הַשְּׁפֵלָה, the *shĕphēlāh*, AV 'vale,' 'valley,' 'low plain,' RV 'lowland.' See JUDÆA, SHEPHELAH.

6. *αὐλών*, Judith 4 4 (see SALEM, VALLEY OF) 7 3 17 10 10 *f.* (see BETHULIA).

7. *φάραγξ*, Judith 2 8 (*φάραγγας . . . χειμάρρους*, 'ravines . . . wâdys') 7 4 11 17 12 7 13 10 Lk. 3 5 (= Is. 40 4).

VAMPIRE (עֲלוּקָה), Prov. 30 15 RV$^{mg.}$; see LILITH (§ 2).

VANIAH (וַנְיָה), of the b'nē BANI (*q.v.*), in list of those with foreign wives (see EZRA i., § 5, end); Ezra 10 36 (*ουιεχωα* [B], *-ερεχω* [ℵ], *ουουνια* [A], *ουαν.* [L]), apparently the ANOS (*ανως* [BA], ? om. L) of ‖ 1 Esd. 9 34.

VASHNI (וַשְׁנִי), 1 Ch. 6 28. See JOEL i., 2.

VASHTI (וַשְׁתִּי; αcτιν [BℵAL$^{\beta}$], ουα. [L^{a}], ετι [? Bℵ$^{c.a}$AL in 1 19]), the name of the consort of Ahasuerus, who was divorced on account of her refusal to present herself before the guests of the king on the seventh and last day of his great banquet (Esth. 1 9-22).

[1] Vg. continues 'sic faciet in torrentibus Arnon. Scopuli torrentium inclinati sunt, ut requiescerent in Ar, et recumberent in finibus Moabitarum.'

[2] 𝔊 continues *καὶ τοὺς χειμάρρους Αρνων καὶ τοὺς χειμ. κατέστησεν κατοικίσαι Ηρ, καὶ πρόσκειται τοῖς ὁρίοις Μωαβ.*

According to Herodotus (5 18; cp 9 110) it was the custom of the Persians to have their wives and concubines present at great feasts. This, however, hardly illustrates the story of Vashti, for it was evidently by an arbitrary command of the king, whose heart was 'merry with wine,' that Vashti was summoned to the banquet. Indeed, Vashti had made a feast of her own for the women of the palace (*v.* 9).

Vashti's name used to be connected with the Persian *vahista*, 'optimus,' but, according to a very clever hypothesis of Jensen, Vashti, Haman, and Zeresh are pale reflections of Elamite divinities, named respectively Mashti (or Vashti?), Humman, and Kĕriša (see ESTHER, § 7; Jensen, *WZKM* 6 70; Wildeboer, 'Esther' in *KHC* 17 173). This view, however, is not very probable.

Ahasuerus (?) and Vashti (?) are as much a couple as Haman and Zeresh, and both ought to be explained on the same principles. Moreover, the text of Esther ought to be not less carefully criticised than that of Samuel before any hypothesis as to the origin of the story is formed. There is no issue out of the perplexities caused by the book as it has come down to us. But revising the text on the same principles as we revise the text of Samuel we see that (as in parts of Samuel) a story underlies the present story of Esther and Mordecai which has a different geographical and historical setting. The Jewish people, doubly represented by Esther (=Israelith) and by Mordecai (Carmeli=the Jerahmeelite Jews), are in captivity in the land of the hostile Jerahmeelites (see OBADIAH, § 7; LAMENTATIONS, BOOK OF, § 7 *f.*; PSALMS, §§ 28 *ff.*)—*i.e.*, the Edomites and other Arabians, whose king is described as 'Ashhur, king of Jerahmeel and Cush' (for אחשורש הוא אח׳ המלך מהדו ועד־כוש read אַשְׁחֻר מֶלֶךְ יְרַחְמְאֵל וְכוּשׁ׳). Vashti, therefore, ought to be a representative of the Asshurite, Jerahmeelite, and Cushite people, that the nation of the oppressors may, like the nation of the oppressed, have double and therefore complete representation. That the name Vashti is corrupt is plain; cp VANIAH, VOPHSI. Most probably it comes from Asshurith, 'Asshur' being often used as a synonym for 'Jerahmeel' Cp MORDECAI, PURIM. T. K. C.

VAULT (נָצוּר), Is. 65 4 RVmg.; see TOMB.

VAULTED CHAMBER (גַּב; οικημα πορνικον; *lupanar*), Ezek. 16 24, etc., RVmg.; see HIGH PLACE, § 6. A mound or shrine for illicit worship is obviously intended; but the rendering of 𝔊 and Vg. (after analogy of *fornix*) is 'without sufficient proof, and needless' (BDB).

VEDAN (וְדָן), Ezek. 27 19 RV. See JAVAN, § 1 *g*.

VEIL (VAIL). It is not easy to distinguish between the veil and the mantle in the OT. As in the East at the present day, the Hebrew veils were mostly ample wraps which protected the head and shoulders against exposure, and sometimes reached the feet. Though veils were part of the ordinary attire of Hebrew women, unmarried girls did not muffle their faces, nor did married Jewesses usually wear veils even out of doors (1 Cor. 11 5 *f.*). In the Talmud we find that only Jewesses of Arabia wore veils (*Šabbāth*, 65 *a*) to cover their whole face, the eyes excepted. The bride, however, veiled herself (cp *nubere viro*) in presence of the bridegroom, both before marriage and at the wedding ceremony (Gen. 29 25); see MARRIAGE, § 3.[1] The modern Oriental *yashmak*, which hangs in a narrow strip from below the eyes to the feet, was not used by the Hebrews.

The terms rendered 'veil' are:—

1. *ṣā'īph*, צָעִיף, Gen. 24 65 38 14 19†, which, as Lagarde (*Sem.* 24) has shown, was not a veil (EV), but an ample wrap square in shape. 𝔊(ADEL) renders θέριστρον, a light summer garment; cp MANTLE, § 2 [12].

2. *ṣammāh*, צַמָּה, Is. 47 2 RV (κατακάλυμμα [BℵAQ]; AV 'locks'), Cant. 4 1 3 6 7† RV (σιώπησις [BℵA]; AV, RVmg. 'locks').[2]

3. *rĕdīd*, רְדִיד, θέριστρον [BℵAQΓ], EV Is. 3 23; AV, RVmg. Cant. 5 7† (RV mantle); and

[1] On the *ṣā'īph* of Gen. 24 65, see the first of the Hebrew terms.

[2] According to Delitzsch from √צמם, *constringere*. 𝔊's reading seems to rest upon a confusion with צמת, 'be silent' (cp in Syr.).

4. *miṭpáḥath*, מִטְפַּחַת, Ruth 3 15 AV (περίζωμα [BAL], σινδόνιον [Sym.]; AVmg. 'apron,' 'sheet,' RV 'mantle') were all ample wraps; cp Is. 3 22 and see MANTLE, § 2 [3].

5. *massēkah*, מַסֵּכָה, EV Is. 25 7 (perhaps the reading should be מְסֻכָּה, a covering, as in Ezek. 28 13); most moderns render 'covering' (cp Is. 28 20, EV).

6. The term *lōṭ*, לוֹט,[1] in Is. 25 7 (EV 'covering') is usually explained as a veil. The figure in this passage is derived from the custom of covering the face as a token of grief (see MOURNING).

7. *rĕ'ālāh*, רְעָלָה, Is. 3 19†, is either a soft shawl (EV 'muffler,' AVmg. 'spangled ornaments'), or a fine veil (so Che.). The root רעל is cognate to רעד (tremble), and the form of veil was so called from its loose, clinging material.

8. περιβόλαιον, 1 Cor. 11 15 AVmg., EV preferably 'covering'; cp MANTLE, § 2 [19].

The face of the king or other chief was sometimes covered to hide the divine halo; thus Moses wore a *masweh*, מַסְוֶה, Ex. 34 33 *ff.* (κάλυμμα [BAFL], cp 2 Cor. 3 13), with which Dillmann compares *sūth*, סוּת, Gen. 49 11.[2] It will, however, be noted that, according to MT, Moses seems to have worn his veil only in private, and to have removed it not only when seeking an oracle but also when addressing the people. I. A.

VEIL (OF THE TEMPLE). See TABERNACLE, § 5, and cp TEMPLE, § 33.

The words are *pārōketh*, פָּרֹכֶת, Ex. 26 31 etc.; καταπέτασμα, Mt. 27 51 Lk. 23 45. Jerome (in Mt. 27 51; also Epist. 18 9; and again Epist. 120 8) affirms that in Matthew's Hebrew Gospel he read, not 'veil,' but 'lintel'—*superliminare templi infinitæ magnitudinis fractum esse atque divisum* (also *corruisse*, also *sublatum*). Nestle infers that Jerome found, not פָּרֹכֶת, 'veil,' but כַּפְתֹּר, 'capital' (of the column supporting the roof; see CHAPITER, 4), though Jerome less accurately gives *superliminare* (*Expos.* 1895 *b*, 310 *ff.*). Cp TEXT, § 65 n. 2.

VENISON (Fr. *venaison*, Lat. *venatio*, 'a hunting'; Heb. צַיִד, *ṣayid*, √צוד, 'to hunt,' cp Ar. *ṣaydun*, Syr. *ṣaida*). The Hebrews, as described by the OT writers, had already reached the stage of pastoral nomads when 'the hunting which is the subsistence of the ruder wanderer, has come to be only an extra means of life' (to quote Tylor, *Anthropology*, 220). ESAU (*q.v.*) is probably meant to represent nothing more than this ('a man acquainted with hunting,' אִישׁ יֹדֵעַ צַיִד, Gen. 25 27; cp 25 28 27 3), since later he seems to be himself possessed of flocks and herds (Gen. 33 9; for Nimrod see the special article).

As weapons used for this purpose or for driving off wild animals, mention is made of the bow and arrow (Gen. 27 3 Is. 7 24; see WEAPONS, § 2) and the SLING (*q.v.*, 1 S. 17 40). Dt. 14 5 enumerates amongst the animals that might be eaten several belonging to the venison class. These are some species of fallow deer (*'ayyāl*, *ṣĕbī*, *yaḥmūr*; see HART, ROEBUCK), two kinds of wild goat (see GOAT, § 2, CHAMOIS), the PYGARG (*q.v.*, the Addax?), and the ANTELOPE (*q.v.*; so RV).

One of the Hebrew terms for 'provision' is actually reminiscent of the hunting stage (צֵדָה, *ṣēdāh*, Gen. 42 25 45 21 Ps. 132 15 [|| לֶחֶם], Josh. 9 5 [לחם צ׳]; cp the use of the verb in Josh. 9 12, 'this our bread we provisioned ourselves [הִצְטַיַּדְנוּ] with it hot from our houses').[3] But, although both as a necessity and as a pastime the pursuit has in general played an important part in the education and evolution of mankind,[4] the Hebrews, hampered[5] again (see COLOURS, § 1) perhaps by certain peculiarities in their religion, after they had passed through the stage were not often induced 'to revert for amusement to what their ancestors had been compelled

[1] The expression פני הלוט shows that the outside of the veil differed from the inside. Cp פני לבושו, Job 41 5 [13].

[2] In the Talmud מסואה, מסוא is both 'covering' and 'veil.

[3] Elsewhere we find the verb כִּלְכֵּל, *kilkēl*, used (1 K. 4 7), and the noun לֶחֶם, *leḥem* (1 K. 4 22 [5 2]).

[4] As to its value in this respect Charles Kingsley's *Glaucus* is suggestive in parts.

[5] In view, that is to say, of the struggle of the nations.

to practise from necessity' (to quote M. G. Watkins, *Gleanings from the Natural History of the Ancients*, chap. 10). Assyrian,[1] Egyptian,[2] Chaldæan,[3] and Persian monarchs, on the other hand, boasted of their exploits in hunting; the Assyrians and Persians even maintained private hunting-grounds, called *παράδεισοι*.[4] The Greeks and Romans pursued the pastime vigorously.[5] Their writers describe it frequently (Homer, Horace, Cæsar), and in some cases whole treatises were written on the subject (Xenophon, Appian).

Solomon's table, it is true, was, we are told, supplied with species of fallow-deer (*'ayyāl, ṣĕbī, yaḥmūr*; see HART, ROEBUCK); but there is nothing to indicate that they were taken in the hunt. We know that in other cases traps were used for the purpose (see NET, SNARE). In 1 S. 26 20, too, according to EV we have a figure of hunting a partridge, but the Hebrew term is *rādaph*, 'pursue,' and in any case the meaning of the context is not clear (see PARTRIDGE; and for the methods of capturing birds see FOWLING). M. A. C.

VENUS, TEMPLE OF (το ατεργατιον [AV]), 2 Macc. 12 26, AV^mg. See ATARGATIS.

VERMILION (שָׁשַׁר), Jer. 22 14 Ezek. 23 14†. See COLOURS, § 14.

VERSIONS. See TEXT AND VERSIONS.

VESTMENTS (לְבוּשׁ, etc.), 2 K. 10 22, etc. See DRESS.

VESTRY (מֶלְתָּחָה; τω επι του οικου μεσθααλ [BL], τοις επι του μισθααλ [A]; . . . του στολισμου [Aq. Sym.]), in the phrase 'him that was over the vestry' (2 K. 10 22†), is generally supposed to mean the place where the holy vestments supplied to the worshippers of Baal were kept; see DRESS, § 8; JEHU, col. 2356. The ancient versions differ; there was no fixed traditional interpretation. The moderns have defended 'vestry' or 'wardrobe' by a far-fetched comparison of Ethiopic *e'ltâḥ*, 'tunic, coat.' The text must be corrupt.

Read probably אֲשֶׁר עַל־הַלִּשְׁכָּה, 'him that was over the hall' (*Exp. T*, Nov. 1899). That there were several 'halls' or 'chambers' (לְשָׁכוֹת) attached to the Jerusalem temple we know (Jer. 35 24 Ezra 10 6 Neh. 13 5, etc.); and from 1 S. 9 22 (cp I 18 𝔊) we gather that close to the altar on a *bāmāh*, or 'high place,' there was a *lishkāh*, or 'hall,' in which those who partook of the sacrificial meal assembled. It was in such a *lishkāh* that the Baal-worshippers assembled in expectation of a sacrificial feast[6] (*v.* 19). Cp TEMPLE, §§ 24, 32.

This view does justice to the context, and accounts for 𝔊's τῷ ἐπὶ τοῦ οἴκου (μεσθααλ = μελθαα is a correction from the later [?] Hebrew text); that 𝔊 did not fully understand לשכה is plain from 1 S. (see above). ש and כ are liable to be confounded with ת and ח; מ may come from ה, repeated in error. To correct מִרְקַחַת, 'the composition of the (sacred) perfumes,' or מְלָאכָה, 'the ceremonial' (cp Klo.), gives a less suitable sense. On the guesses of the other versions see commentators. T. K. C.

VESTURE (ιματιον), Rev. 19 13 16 AV, RV 'garment.' See MANTLE, § 2 [17].

VETCHES, WILD (חָרוּל), Job 30 7 RV^mg., EV NETTLES (*q.v.*).

VIAL. 1. פַּךְ, *pak*, 1 S. 10 1; also 2 K. 9 1 3 RV (where AV has BOX [*q.v.*]; φακός). Cp also CRUSE.
2. φιάλη, Rev. 5 8 15 7, etc., where RV always BOWL (*q.v.*, 9).

VILLAGE. 1. A 'village' as distinguished from a 'town' or 'city' (עִיר, *'ir*) is properly כָּפָר, *kāphār* (Cant. 7 11 [12] 1 Ch. 27 25), or כֹּפֶר, *kōpher* (1 S. 6 18 in combination with הַפְּרָזִי, *happĕrāzī*, 'village of the peasantry,' EV 'country village),' or כְּפִיר *kĕphīr* (Neh. 6 2, plur., if MT is correct; see CHEPHIRAH). Like the Arabic *kefr*, the word enters into compound place-names—*e.g.*, Chephar-ha-ammonai; cp Capernaum.

2. חֲצֵרִים, *ḥăṣērīm*, is the name given to villages which grew out of the early settlements of nomads, Gen. 25 16 (‖ טִירוֹת, *ṭīrōth*; cp CASTLE, 4), Lev. 25 31 ('villages [enclosures] which have no wall around them'), Josh. 19 8 ('villages which lay around their cities'; see CITY), Neh. 12 28 *f.* See HAZOR, HEZRON, HAZERIM, HAZEROTH.

3. In AV 'villages' is now and then given for בָּנוֹת, *bānōth*, 'daughters'—*i.e.*, the dependent towns of a city; Nu. 21 25 32 (RV 'towns'), 1 Ch. 2 23 (so too RV). Cp DAUGHTER.

4. On חַוֹּת, *ḥawwōth*, a less distinctly Hebrew term than 2, and properly synonymous with it, see HAVOTH-JAIR, HIVITES.

5. פְּרָזוֹת, *pĕrāzōth*, properly 'level country.' RV renders 'villages' (AV 'towns') 'without walls' in Zech. 2 4 [8], and in Ezek. 38 11 Esth. 9 19 EV gives 'unwalled villages,' 'unwalled towns.' פְּרָזוֹת should possibly be restored for חרשים in 2 Ch. 27 4 (see FOREST), unless we hold that it was in conquered portions of the Negeb (read בָּאַשְׁחֻרִי, 'in the Ashhurite') that Jotham, like REHOBOAM (*q.v.*), built 'castles and towers.' In Esth. (*l.c.*) the noun *pĕrāzīm* is rendered in EV 'of the villages'; cp EV of Dt. 3 5 1 S. 6 18. Some connect PERIZZITES (*q.v.*) with this word.

6. פְּרָזוֹן, *pĕrāzōn*, too, is conjecturally rendered 'villages,' 'villagers' by AV and some recent scholars (cp Moore and Budde) in Judg. 5 7 11, but by RV, not less conjecturally, 'rulers,' 'rule.' For Judg. 5 11 Robertson Smith in 1892 suggested 'in the redemption of Israel' (see Black, *Judges*, 42); but more probably the true reading in Judg. 5 7 11, and Hab. 3 14 is רֹזְנִים (רוֹזְנִים); cp 𝔊 δυνατοί [B], φραζων [AL], δυναστῶν (but in Judg. 5 11 αὔξησον [B], ἐνίσχυσαν [AL]). So Cheyne, and (in Hab. *l.c.*) Vollers.

7. פרזים Hab. 3 14 AV, 'the head of his villages' (RV 'of his warriors'; mg. 'hordes'; or, 'villages'). But see 6.

8. κώμη in NT is uniformly rendered village in RV (Mk. 8 27—the villages of Cæsarea Philippi; Jn. 7 42—the village of Bethlehem). In 𝔊 it sometimes represents not only בַּת, חַוָּה, חָצֵר, טִירָה, כָּפָר, כְּפִיר, and כֹּפֶר, but also even עִיר and קִרְיָה.

It is given as a Rabbinical view that a city, as distinguished from a village, was a community with ten learned men in it—*i.e.*, a sufficient number to entitle it to have a synagogue. According to Furrer (Schenkel, *BL* 2 12) the modern criterion in Palestine is the possession of a separate market. In Esth. 9 19 οἱ κατοικοῦντες ἐν ταῖς μητροπόλεσιν (om. B*), and οἱ διεσπαρμένοι ἐν πάσῃ χώρᾳ constitute the two categories to one or other of which every Jew is assumed to belong.

VINDICATOR (גֹּאֵל), Job 19 25 RV^mg. See GOEL, and JOB ii. col. 2474.

VINE (גֶּפֶן, more fully גֶּפֶן הַיַּיִן Nu. 6 4 Judg. 13 14). Like the name of the grape (עֵנָב), the word is common to Heb. Aram. Arab. and Ass.—from which Guidi infers (*Della Sede primitiva*, etc. 40 *f.*) that the vine was known to the people who formed the original Semitic stock. But from the names for pruning, vintage, winepress, and wine being distinct in the different languages he concludes that the primitive Semites were unacquainted with the making of wine, their original 'strong drink' (שֵׁכָר, a word common to the four languages and Ethiopic) being probably made from barley.

1. Hebrew Terms.

Gĕphen (גֶּפֶן) denotes the grape-vine everywhere but in 2 K. 4 39, where *gĕphen śādeh* (גֶּפֶן שָׂדֶה) is used of some plant resembling the vine in form, but bearing poisonous or bitter gourds; see WILD GOURDS. Another word *śōrēḳ* (שֹׂרֵק, Is. 5 2 Jer. 2 21†) or *śōrēḳāh* (שֹׂרֵקָה, Gen. 49 11†) seems to denote a superior sort of vine. Probably it derives its name from the rich dark hue of the grapes (cp Ar. *šaḳira* or *šaḳura*; Lag. *Uebers.* 31 *f.* explains differently). Its grapes were called

[1] See Ball, *Light from the East*, 161 *ff.*
[2] See Maspero, *The Dawn of Civilisation*, 61 *ff.*
[3] *Ibid.*, 766 *ff.*
[4] See Warre-Cornish, *Dict. of Gk. and Rom. Antiq. s.v.* Παράδεισος.
[5] *Ibid.*, *s.v.* 'Venatio.'
[6] Moore (*Judges*, 361) suspects that the 'house' which Samson pulled down by leaning against its two pillars was the banqueting hall of the temple of Dagon.

śĕrūḳīm (שׂרוקים, Is. 16 8, though RV's 'choice plants' is a possible rendering). According to Jewish tradition, they were very sweet, with almost invisible kernels *ḥarṣannīm* (חַרְצַנִּים; see GRAPE, 7). The vine branch or shoot is called *zĕmōrāh* (זְמוֹרָה), from זמר to 'prune'; or *śārīg* (שָׂרִיג, Gen. 40 10 12 Joel 1 7†), from שׂרג to 'interweave.' *Zalzallīm* (זַלְזַלִּים,[1] Is. 18 5) seems to denote low branches or clusters that lie on the ground. The gathering of grapes is expressed by the verb בצר (Lev. 25 5, etc.), the vintage or vintage-season being *bāṣīr* (בָּצִיר, Lev. 26 5, Judg. 8 2†); to prune the vine is זמר (Lev. 25 3 *f.* Is. 5 6†); the pruning-hook is *mazmērāh* (מַזְמֵרָה). The 'pruning of vines' (Budde, Siegfried) is a more likely interpretation of *zāmīr* (זָמִיר) in Cant. 2 12 than the 'singing of birds' (Del., König). The obscure word *zimrath* (זִמְרָת) in Gen. 43 11 is by Frd. Delitzsch connected with this root, and interpreted as 'fruits cut (from the plants that bear them)'; but Dillmann rightly objects that זמר is used only of pruning away that which is useless: probably the word must be traced to some other source; 𝔊 renders τῶν καρπῶν. In Talm. *zĕmer* (זֶמֶר) = dessert-fruit (grapes, etc.).

2. Biblical references. The Israelites traced the planting of the vine to Noah (Gen. 9 20; see Budde, *Bibl. Urgesch.* 306 *ff.*, 407, and cp NOAH); and Budde thinks that the 'comfort' spoken of in Gen. 5 29 refers to the invention of wine. Noah was not a dweller in Palestine; thus the Israelites preserved the tradition of the introduction of the vine from another land. Palestine, as described in the OT, was a great wine-producing country. Joseph (Ephraim) in Gen. 49 22 and Israel in Ps. 80 8 [9] (cp Is. 5 2 Hos. 10 1, etc.) are compared to a vine. Delitzsch, in his charming essay 'The Bible and Wine' (*Iris*, 1888, essay 9), sees in the fact that Jesus compares himself to a vine (Jn. 15 1), an allusion to his being the Messiah, the Second David—which illustrates a passage in the early Christian *Didachè*. The phrase to 'sit under one's own vine and one's own fig-tree' occurs constantly in descriptions of a time of peace (1 K. 4 25 [5 5] Mic. 4 4 Zech. 3 10). Passages like Judg. 9 13 Ps. 104 15 show with what simplicity men thanked God for the gift of wine. But the vine supplied another figure. There were wild vines—not of a 'genuine' stock (Jer. 2 21). Israel, when unfaithful, is compared to these (Jer. *l.c.* cp Is. 5 2), and the enemies of Israel are even likened (Dt. 32 32) to a 'vine of Sodom'—*i.e.*, one whose juices and fruit were tainted by the corruption typified by Sodom (Driver). Cp SODOM, § 3, n. 2.

3. Natural history. The vine (*Vitis vinifera*, L.) 'grows spontaneously'[2] (according to de Candolle, *L'Origine*, 151 *ff.*) in W. temperate Asia, S. Europe, Algeria, and Morocco; but its spontaneous growth is most marked in the region S. of the Caspian, and between that and the Black Sea. Its original home was most probably in Transcaucasia, though traces of it have been found in deposits of prehistoric and probably prehuman age in other quarters—as in N. Italy, Switzerland, and S. France. It has been cultivated from the most ancient times in W. Asia and in Egypt; in the latter country there is evidence reaching back five or six thousand years. The 'soma' of the Vedas appears to have denoted primarily a beer made from grain, but subsequently *wine*: and it is probable that wine was one of the earliest discoveries of the Aryan race and that they carried the vine with them as they migrated westward. Of the condition of vine-growing in modern Syria an account is given by Anderlind in *ZDPV* 11 160 *ff.* Cp also Tristram, *NHB* 407 *ff.*, and see WINE. N. M.—W. T. T.-D.

[1] Possibly סַלְסִלּוֹת in Jer. 6 9† has a similar meaning.

[2] This phrase does not necessarily imply that it is a native of these districts.

VINEGAR (חֹמֶץ √ 'be sour,' 'leavened,' Nu. 6 3; ὄξος, Jn. 19 29). Cp cols. 959 n. 3, 2752, 5309.

VINEYARDS, PLAIN OF THE (אָבֵל כְּרָמִים), Judg. 11 33 AV, RV ABEL-CHERAMIM (*q.v.*).

VIOL (נֶבֶל), Is. 5 12 AV. See MUSIC, § 2, 6-9.

VIOLET (תְּכֵלֶת), Esth. 1 6 AV^mg.; EV 'blue.' See PURPLE and COLOURS, § 13.

VIPER (אֶפְעֶה, Is. 30 6; ἔχιδνα, Acts 28 3). See SERPENT, § 1 [1].

VIRGIN (παρθένος). There is no clear trace of an Order of Virgins in the Apostolic Church. The four daughters of Philip the Evangelist [cp PHILIP], who exercised the gift of prophecy, were virgins (Acts 21 9). In 1 Cor. 7 25-38 Paul declares that he has 'no commandment of the Lord' respecting virgins: they may marry, or not marry, without sin. On the whole he is inclined to recommend for them and for all the unmarried state, 'on account of the present necessity,' which should make all Christians sit loosely to the world.

A later age, which valued virginity as a superior virtue, peopled the Apostolic age with virgins living in community and presided over by the Virgin Mary: see, for example *Dormitio Mariæ* (Tischendorf, *Apocal. Apocr.* 1861) pp. 96 *f.*; *Coptic Apocr. Gospels*, F. Robinson, 1896. But this picture has no historical authorisation, and is simply the reflex of a subsequent institution. On the difficult passage in Ignatius, *Smyrn.* 13, 'I salute . . . the Virgins, who are called Widows,' see Lightfoot's note *ad loc.*: he is probably right in interpreting it as 'I salute the Widows, whom I prefer to call Virgins, for such in God's sight they are by their purity and devotion.' [Cp MINISTRY, § 41 end.] J. A. R.

VISION (מַחֲזֶה etc.), Gen. 15 1, etc. See PROPHECY.

VISION, VALLEY OF (גֵּיא חִזָּיוֹן, or גַּיְא, τῆς φάραγγος [ὧν ℵ* in *v.* 5] ἐν φάραγγι Σ[ε]ιών), a place called Valley of Ḥizzaion, from which the Assyrians were expected to make an assault on the fortifications of Jerusalem, Is. 22 1 (late heading), 5†. That Ḥizzaion is a proper name, and that the phrase does not mean 'valley of vision' (or, prophetic revelation) is generally admitted. According to Dillmann, some part of Jerusalem is referred to, perhaps the Tyropoeon, where the fortification may have been specially weak. This implies the Massoretic division of the verse, which, however, must surely be wrong (see Duhm; Marti; *SBOT*). No such name as Ḥizzaion being known, it has been proposed to read —גֵּי הִנֹּם 'the valley of Hinnom,' comparing Zech. 14 5, where גיא הרי ('valley of my mountains') and גיא הרים ('valley of mountains') may be miswritten for גֵּיא הִנֹּם 'valley of Hinnom' (see 'Isaiah,' *SBOT* [Heb.], 112; Marti).

It is, however, by no means improbable that Is. 22 1-14, in its original form, referred to an expected blockade of Jerusalem by the Jerahmeelites (cp SENNACHERIB, § 5), and that בני חזיון should be בְּנֵי כוּשָׁן 'the sons of Cushan.' The next metrical line begins with עֵילָם, where עֵילָם (Elam), as also probably in 11 11 21 2 Jer. 25 25 49 34 Ezek. 32 24, is a misunderstood corruption of ירחמאל (Jerahmeel). Such is the position of the undecided question respecting the reference of Is. 22, and the meaning of 'Valley of Ḥizzaion.' T. K. C.

VOPHSI (וָפְסִי; ιαβ[ε]ι [BAFL]; *Vapsi* [Vg.]), father of Nahbi (Nu. 13 14†).

VOWS, VOTIVE OFFERINGS. A vow is a voluntary obligation solemnly assumed toward God to do something not otherwise required, but believed to be acceptable or influential with him. The promise may be either simple or conditional. In the former case it is usually a pledge to perform at a future date—for example, at the next recurrence of a feast—an act of worship which is less convenient or suitable at the time the vow is made; and the motive may be any which would prompt man to the act itself, such as gratitude to God, the desire to secure his favour, etc.

1. Definition, etc.

VOWS, VOTIVE OFFERINGS

A conditional vow is commonly made in circumstances in which the urgent need of God's protection or help is felt, as in illness, an attack by the enemy, or for the obtaining of a greatly desired end, such as the birth of a child, the increase of flocks and herds, victory in battle, and the like. In such a case a man solemnly binds himself, if God does for him what he wishes, to do such and such a specified thing for God.

Vows of the latter kind were in ancient religions the common accompaniment of prayer, and were believed to contribute greatly to its efficacy. The transaction seems to us commercial in even a higher degree than the familiar motive of sacrifice, *Do ut des;* this may be formulated, *Dabo si dederis.* We have to remember, however, that man's gift was not conceived as an equivalent by which the service of God was purchased, but as a present, just as in similar transactions among men when an inferior sought the aid of a great man. The thing vowed might be anything with which it was conceived that God would be pleased—a sacrifice, a service, a dotation of gold and silver, houses and lands, cattle, or persons to God, that is, to the temple. It might also be an interdict imposed by the maker upon himself for a time or for life in the use of things otherwise lawful; thus fasting, abstinence from particular kinds of food—as the grape and its products in the Nazirite's vow—from the wearing of ornaments, sexual intercourse, etc., were often vowed. Such arbitrary self-denial was thought, like the scrupulous observance of the similar restrictions imposed by religion itself, to be a proof of devotion.

The general word for vow is נֶדֶר, *néder*, 𝔊 *εὐχή*. For a vow of abstinence specifically, Nu. 30 employs אִסָּר, אֱסָר, *issār*, *ĕsār* (𝔊 *ὁρισμός*), from אָסַר, 'bind.' The meaning of this word is especially clear in Dan. 6 7 12 *f.* 15, where RV well renders 'interdict'; cp also the rabbinical use of the verb in the sense of prohibit, and Mt. 16 19 18 18.

The vow, being a solemn promise freely made, was a most binding obligation; it had the force of an oath, with which, indeed, it was frequently associated (see Nu. 30 2 Acts 23 21). Even a rash vow or one which entailed unforeseen and terrible consequences, like Jephthah's (Judg. 11), must be fulfilled to the letter. To break faith with God in such a matter was to invite destruction. Men, nevertheless, often tried to slip out of their obligation by subterfuges, or practised deceit in paying their vows. Malachi (1 14) pronounces accursed the fraudulent man who had vowed a male victim and had one in his flock, but sacrificed a blemished beast.[1] The Deuteronomic law enjoins the prompt payment of vows according to their tenor, for God will strictly exact it; it is no sin not to make a vow, but being voluntarily made it must be fulfilled (Dt. 23 21-23 [22-24]; cp Prov. 20 25 Eccles. 5 4 *f.* [3 *f.*] Ecclus. 18 22).

Examples of vows in the OT history are those of Jacob at Bethel (Gen. 28 20-22, cp 31 13, 35 2-7), Jephthah (Judg. 11 30 *f.* 34-39), Hannah (1 S. 1 11 *f.* 24-28), Absalom (2 S. 15 7 *f.*). Frequent references in other connections show how important a place vows had in all periods of religion: see Dt. 12 6 11 17 26 Ps. 22 25 50 14 56 12 61 5 8 65 1 66 13 76 11 116 14 18 Prov. 7 14 Is. 19 21 Nah. 1 15 Jon. 1 16 2 9 Judith 4 14 1 Esd. 2 7 2 Macc. 3 35 9 13 *ff.* Acts 21 23 23 21.

2. Laws. The only laws in the Pentateuch on the subject of vows in general,[2] Lev. 27 1-29 and Nu. 30, are both late. Nu. 30 determines who can make a binding vow, with especial reference to the vows of women (see *M. Nĕdārīm*). If a man makes a vow or imposes upon himself by an oath some abstinence, he must not 'profane his word,' but strictly fulfil his obligation. The vow of a widow or a divorced woman is similarly binding (*v.* 10); but the vow of an unmarried woman in her father's house, or of a married woman in her husband's, is null without his consent, which, however, is assumed to be tacitly given, if, being cognisant of the vow, he did not oppose her. If a woman marries while under a vow made in her father's house, the subsequent consent of her husband is necessary; if he annuls it she is free. If the husband lets the vow pass in silence when he first learns of it, but afterwards prevents its fulfilment, he makes himself guilty of the breach of obligation. The law does not say how it is with the vow of a minor son in his father's house, or with that of an Israelite slave.

Lev. 27 treats of the conditions under which persons or property that have been given to God in fulfilment of a vow may be redeemed. An animal of the kinds from which sacrifices are made to Yahwè is made 'holy' by the vow; no redemption, substitution, or exchange is allowed; if such a thing is attempted both animals become 'holy' (*v.* 9 *f.*). On an unclean animal a value is set by the priest, and it may be redeemed by the payment of this sum with one-fifth added (*vv.* 11-13). Human beings are redeemed at a price fixed by the law in accordance with their age and sex (cp Jos. *Ant.* iv. 4 4); a boy between one month and five years old, five shekels, a girl, three; from five years to twenty, twenty shekels and ten respectively; from twenty to sixty a man is valued at fifty shekels, a woman at thirty; after sixty this value fell to fifteen and ten. If a man was too poor to pay the price on this scale, the priest fixed a sum within his means. If a man consecrates a house to Yahwè by a vow, the priest estimates its value, and the owner may redeem it on payment of six-fifths of the sum. In the case of hereditary lands which revert to the family in the Jubilee year, the value depends on how far off this term is. The basis is, on an acreage seeded with one homer of barley, fifty shekels for the whole period, that is, one shekel for each year the tenure has to run. The surtax for redemption is, as in all other cases, one-fifth. If not redeemed, or if sold to another man, the reversion is cut off, and the land ceded to the priests.[1] Purchased land, in which the buyer has really only a leasehold till the next Jubilee year, is estimated by the priest.

Some things cannot be consecrated to God by a vow, either because they already belong to him, like the firstlings of animals fit for sacrifice (Lev. 27 26), or because they are abominable to him, as the hire of a religious prostitute of either sex (Dt. 23 18)—a kind of votive-offering frequent in that world.

A vow of abstinence of a peculiar kind is that of the NAZIRITE (*q.v.*), for which there are special laws in Nu. 6 1-21.

A man might not only vow to 'hallow' some object to God (הִקְדִּישׁ, *hiḳdīš*), he might devote it (הֶחֱרִים, ***heḥĕrīm***) by his vow so that it became ***ḥērem*** (see BAN, and cp Nu. 21 2). What was so devoted became intensely 'holy,' that is, God guarded his rights in it most jealously; it could neither be sold nor redeemed. Lands or animals so dedicated belonged irrevocably to the sanctuary, that is to the priests (Nu. 18 14 Ezek. 44 29); men thus devoted must be put to death (Lev. 27 28 *f.*). The last provision can hardly be an actual provision for a private ban.

Vows, like oaths, were frequently made rashly and about trivial matters; indeed, they often became a mere form of speech to fortify an asseveration or a declaration of purpose, as 'I vow, if I didn't see a snake as big as the beam of a wine-press' (*M. Nĕdārīm*, 3 2). With a lurking scruple such as among us gives rise to minced oaths, men in NT times said *ḳōnām*, *ḳōnāh*, or the like, instead of ***korbān***. The rabbis discouraged the practice by requiring the fulfilment of unadvised vows, and declaring the clipped formula equivalent in force to the proper word. They had to distinguish, however, between vows the fulfilment of which, though inconvenient, was a proper punishment for the rash undertaking, and such as ought not to be kept, and to provide some way of absolution for the latter (*M. Nĕdārīm*, 3 1 9 1 *ff.*). In this endeavour they were led into a casuistry not always accordant with sound ethics. The example given by Jesus in Mk. 7 10 *f.* Mt. 15 4 *f.* of the way in which they nullified the law of God by their traditions has been discussed under CORBAN (*q.v.*).

The commonest vow in all ages was doubtless a sacrifice, and votive offerings were probably the commonest of private sacri-

[1] Cp the Arab substitution of gazelles for sheep in payment of a vow, SACRIFICE, § 8.

[2] On the Nazirite's vow, see NAZIRITE.

[1] The provisions of the law are not clear; see the commentaries. For the rabbinical elaboration of these rules see *M. 'Ărākīn.*

fices. The votive sacrifice might, according to the terms of the vow, be a burnt-offering or a peace-offering, or both combined, and consist of any kind or number of sacrificable animals, or simply of an oblation. The rites were those appropriate to the species of sacrifice and the victim (see SACRIFICE); a votive peace-offering was subject to the ordinary rule that the flesh should be eaten on the day of the offering or the next, not to the narrower restriction of the thank-offering (*tōdāh*), and to the general requirement of ceremonial purity in those who partook of the feast (Lev. 7 16 *ff.*). Nu. 15 3 *ff.* prescribes an oblation with every victim in the case of votive as of other sacrifices. Offerings of wine and oil were also made in the fulfilment of vows (see SACRIFICE, § 31 *a*).

3. Bibliography. *M. Nĕdārīm*, *'Ărākīn*, cp also *Šĕḳālīm*, 46-8; the works on biblical archæology, especially Saalschütz, *Mosaisches Recht*, 1358 *ff.*; Nowack, *Hebr. Arch.*; Benzinger, *Hebr. Arch.*; articles 'Gelübde' in *PRE*(3), Riehm, *HBA*, Schenkel, *BL*, 'Vow,' Hastings, *DB*. G. F. M.

VULGATE. See TEXT AND VERSIONS, §§ 21, 59.

VULTURE. Of the four species of Vulturidæ described by Tristram from Palestine, three (*Gyps fulvus*, *Neophron percnopterus*, and *Gypaetus barbatus*) are treated under the headings (1) EAGLE [RVmg. 'Great Vulture'], (2) GIER-EAGLE and (3) OSSIFRAGE. The fourth species is the black vulture, *Vultur monachus*, the only living representative of its genus. This bird inhabits the countries surrounding the Mediterranean and extends eastward to China. It is not common in Palestine, and does not seem to be mentioned in OT or NT.

4. The 'vulture' (דָּאָה, *dā'āh*) in AV of Lev. 11 14† is in RV rendered 'kite.' Its identification can only be conjectural; but see KITE.

5. The 'vulture' (דַּיָּה *dayyāh*, דַּיּוֹת, *dayyōth*, another form of דאה above) of Dt. 14 13 (om. Di. after Sam. 𝔊), Is. 34 15† (ἔλαφος) is also rendered KITE in RV. See above.

6. אַיָּה *'ayyāh*, Job 28 7, AV (RV 'falcon), but elsewhere KITE (*q.v.*). A. E. S.

W

WAFERS. 1. רָקִיק, *rāḳīḳ*, Ex. 29 2, EV, etc., 1 Ch. 23 29 RV. See BREAD, § 2 (*c*).

2. צַפִּיחַת, *ṣappīḥath*, Ex. 16 31† ἐγκρίς; see BAKEMEATS, § 3 (3), where, however, צַפִּיחַת is to be read for 'רָקִיק . . . BREAD.'

WAGES. See, generally, TRADE AND COMMERCE, § 83 (*e*) 4. The words are:—

1. שָׂכָר, *śākār*, μισθός, *merces*, of the hire of a servant (Gen. 30 32 Ex. 2 9 Dt. 24 15 1 K. 5 20 [6] [𝔊B om. μισθόν], etc.), the 'reward' of priests (Nu. 18 31), passage-money (Jon. 1 3, ναῦλον), etc.

2. שֶׂכֶר, *śeker*, Prov. 11 18 Is. 19 10; on the latter passage see SLUICES.

3. מַשְׂכֹּרֶת, *maśkōreth*, μισθός, *merces*, Gen. 29 15 31 7 41 Ruth 2 12†.

4. פְּעֻלָּה, *pĕ'ullāh*, μισθός, *opus*, Lev. 19 13, etc.

5. μισθός, *merces*, Jn. 4 36, etc. See above, 1.

6. ὀψώνιον, *stipendium*, *stipendia*, 1 Esd. 4 56 1 Macc. 3 28 14 32 Lk. 3 14 Rom. 6 23 1 Cor. 9 7 2 Cor. 11 8 (cp ὄψον 'meat' Tob. 2 2 [ὀψάριον א] 7 8, [om. א] ὀψοποίημα Judith 12 1, ὄψος = דג Nu. 11 22).

WAGON. 1. עֲגָלָה, *'ăgālāh*; see CHARIOT, § 2.

2. צַבִּים, *ṣabbīm*, Is. 66 20, EV 'litters,' but better, following 𝔊 (ἐν λαμπήναις [ἡμιόνων]), 'cars' such as are drawn, for swiftness, by mules (cp Pind. *Pyth.* 4 94 *f.* ἀπήνη); cp Ass. *ṣumbu* (from *ṣubbu*), a car drawn by mules, as distinguished from *narkabtu*, a wagon drawn by horses. At the same time, the 'cars,' like the 'chariots and horses,' in Is. (*l.c.*) are very possibly due to an editor; the original text gave the names of the peoples whence the Jews were to be brought; see *Crit. Bib.* 49.

In Nu. 7 3 עֶגְלֹת צָב, EV 'covered wagons'; but this is merely a syn. for צַבִּים 'cars.' Cp ציבא Tg. Is. 49 22 Nah. 2 8 (the queen sitting in a ציבא).

3. רֶכֶב, *rékeb*, Ezek. 23 24 AV, RV CHARIOT (*q.v.*).

4. גַּלְגַּל, *galgal*, Ezek. 23 24 RV, Ezek. 26 10 RV, AV RVmg. 'wheel,' cp WHEEL.

On the 'place of the wagons' 1 S. 17 20 etc. RV, AV 'trench,' see CAMP, § 1.

WAIN, THRESHING (חָרוּץ), Job 41 30 [22] RV. See AGRICULTURE, § 8 *β*.

WALL. 1. On חוֹמָה, *ḥōmāh*, see FORTRESS, *passim*.

2. חֵיל, *ḥēl* (√חול), a surrounding wall, defined by Jews as בֶּן חוֹמָה—*i.e.*, 'a little wall' (see BDB), a *glacis*; see FORTRESS, § 5, end, col. 1557.

3. גָּדֵר, *gādēr*, is rendered 'wall' by AV in Nu. 22 24 Ezra 9 9 Is. 5 5 Ezek. 42 7 12 Hos. 2 6 where in each case RV or RVmg. prefers 'fence.' See HEDGE, 2, and cp the place-names Geder, Gederah, Gederoth, Gederothaim, Gedor. RVmg. suggests 'walls' for 'hedges,' גְּדֵרוֹת, in Nah. 3 17.

4. קִיר, *ḳīr*, of a town-wall in Josh. 2 15, etc.; of a house-wall in 1 K. 6 5 *f.*, etc., of a room-wall in 1 S. 18 11 20 25, etc., cp HOUSE, § 1.

5. שׁוּר, *šūr*; Gen. 49 22 Ps. 18 30 [29]†, 2 S. 22 30; in Jer. 5 10 for שָׁרוֹת, שֻׁרוֹת is suggested—*i.e.*, rows of vine-plants; see Ges.-Bu. *s.v.*, שׁוּרָה, and cp Duhm, *ad loc.*

6. כֹּתֶל, *kōthel*, Cant. 2 9† of a house-wall.

7. אֻשַּׁרְנָא, *'uššarnā'*, Ezra 5 3 9†. Word of uncertain meaning; see Ges.-Bu. who suggest 'Gebälk'—*i.e.*, 'timberwork.' 𝔊BAL has χορηγίαν; ‖ 1 Esd. 6 4 has τὴν στέγην ταύτην. See Marti, *KHC*, *ad loc.*

WALLET (πηρα), Mt. 10 10 RV, AV SCRIP (*q.v.*).

WANDERINGS, WILDERNESS OF. 'The Wilderness' (*ham-midbār*, הַמִּדְבָּר) was, in all periods, the

1. Term 'wilderness.' standing phrase among the Hebrews for the scene of that epoch in their history which immediately preceded the settlement in Canaan; in addition to the Hexateuchal narratives see, *e.g.*, Am. 2 10 Hos. 13 5 Jer. 2 6 Ezek. 20 10 Neh. 9 21 2 Ch. 24 9 Ps. 107 4. Undefined by reference to particular places, the Hebrew term is a wide one. Agreeably to its etymological signification, 'the place where (cattle) are driven,' it denotes country inhabited by nomads, and in actual OT usage includes the country stretching SW. of Canaan to Egypt, together with the Sinaitic peninsula, SE. to Arabia and E. to the Euphrates. (See CATTLE, § 5, DESERT, § 2 [3].)

2. Topographical problem. The topographical problem, with which alone the present article is concerned, is to discover the limited district within this larger area of wilderness to which the nomadic life of the early Hebrews was referred in the memory or imagination of the various biblical writers. The difficulties and uncertainties attending the solution, which probably will never be wholly overcome, are due mainly to the uncertainty in many parts (but chiefly in the case of J and E) of the analysis of the sources, our insufficient acquaintance with the actual historical conditions (cp SINAI), and the paucity of trustworthy identifications of particular sites. The literature of the subject, which is extensive, needs to be used with extreme caution on account of the general neglect of a critical employment of the sources and the utter insufficiency—in some cases also, the thoroughly unphilological character—of the reasons for the identifications. [Textual criticism, too, may have to be applied more methodically.]

3. Site of Kadesh. The sites of the Egyptian starting-point of the Exodus, of Sinai, and of the intervening stages, are discussed elsewhere (EXODUS, SINAI). We are here more immediately concerned with the district in which the people are said to have wandered for forty years between the first abortive attempt on

Canaan from the S. and the final successful attack from the E. For this the most important site is KADESH (*q.v.*); long a matter of almost hopeless dispute, it is now, by general consent, identified with 'Ain-Ḳadīs (50 m. S. of Beersheba), which was visited by Seetzen in 1807 (*Reisen durch Syrien*, 3 48 [1859]), and then by Rowlands, who first identified it with Kadesh (Williams, *Holy City*, 1 464 *ff.*), and by Clay Trumbull (*Kadesh Barnea* [1881]), who has elaborately and successfully vindicated the identification.

Now, what relation does Kadesh bear to the wilderness of Wanderings? In P, where the case is simplest,

4. Kadesh in P. Kadesh is the stage reached immediately before Mt. Hor (Nu. 20 22 [1] 27 14 Dt. 32 51 and P in Nu. 20 1-13). Apparently, therefore, it was not visited before the fortieth year—*i.e.*, the end of the nomadic period. For, according to P, the sentence of forty years wandering was given in the wilderness of Paran and was to be carried into effect in the same wilderness (Nu. 12 16*b* 13 1-3 26*a* 14 35), whereas Kadesh is in the wilderness of Zin (Nu. 20 1 22, cp 33 36), which is distinct from the wilderness of Paran (Nu. 13 21). Doubtless, the fortieth year was originally mentioned in Nu. 20 1 (cp 33 38), and was subsequently omitted for obvious harmonistic reasons. In P the whole people in the fortieth year moved as the spies had done a generation earlier out of the wilderness of Paran into the wilderness of Zin to Kadesh.

From the foregoing representations all the remaining narratives differ; for all these, in spite of other differences among themselves, agree in associating Kadesh with the beginning of the 'forty years'' wanderings.

In the combined narratives of JE—and probably also in both of the originally separate narratives J and E—

5. In JE. Kadesh is the place whence the spies were despatched (Nu. 13 26, from 'to Kadesh'; cp 32 8 *ff.*) and, presumably, where the condemnation to the forty years' wandering was pronounced (Nu. 14 33), where the people abode (וישב העם), and where Miriam died and was buried (Nu. 20 1 *b*), and whence, at the close of the period, they made their request to pass through Edom (Nu. 20 14 *ff.*).[2] In brief, Kadesh was the goal of the people after the Exodus and their visit to Sinai, their headquarters while they were shepherds (רעים) for 'forty years,' and their point of departure for the final attack on Canaan. Cp also Judg. 11 16.

In D Kadesh is the goal of the people after leaving Horeb (Dt. 1 19, cp 9 23 Josh. 14 6 *f.*), the place whence

6. In D. the spies were despatched (Dt. 1 20-24 Josh. 14 7), and the scene of their condemnation to a prolongation of the nomadic life (Dt. 1 34 *ff.*). There they abode for an indefinite period, not, however, exceeding a few months (Dt. 2 1, cp 7 14); but the main part of the period—thirty-eight years—was spent in compassing Mt. Seir (Dt. 2 1 14). Moreover, according to the only natural interpretation of Dt. 2 14, Kadesh, once left, was never revisited; there is no suggestion here (nor anywhere else) of a second visit to Kadesh after absence.

Thus in JE Kadesh is the (apparently) permanent *centre*, in D the *starting-point*, and in P the *final stage* of the nomadic wanderings which intervened between the defeat of the Hebrews on their first attempt to conquer Canaan from the S. and the commencement of that definite march which led to the actual conquest from the E. a generation later.

We must now consider what hints the various narratives contain for the closer definition of the district in

7. Sinai to Kadesh in JE. question. JE contains no reference to places which directly serve to define the district; for Ḥormah is not mentioned as a place in the wilderness of Wandering, but as a point connected with a definite attempt to gain an entrance into Canaan from the S., and all the other places referred to in JE are stages in the movements (1) from Egypt to Sinai, (2) from Sinai to Kadesh, which preceded the nomadic period proper, and (3) from Kadesh to the E. of Canaan, which succeeded it. For the first series, see EXODUS, i. §§ 10 *ff.* The second consists of Taberah (Nu. 11 3), Kibroth-hattaavah, and Hazeroth (Nu. 11 35). The identifications which have been offered of these sites have little more to recommend them than that they agree with a particular theory of a route from the spot identified as Sinai. In the only case where the similarity of the modern name ('Ain el-Ḥaḍra = חצרת; so Robinson, Palmer) appears to furnish an independent reason for the identification, this circumstance is far from conclusive, for names like Hazeroth were frequent (cp NAMES, § 105). The third series concludes with places

8. To E. of Canaan. which are obviously on the E. of the Arabah—'the wilderness before Moab toward the sun-rising' (Nu. 21 10), the valley of Zered (Nu. 21 12), 'the other side of Arnon' (Nu. 21 13), Beer, Mattanah, Nahaliel, Bamoth, 'the valley that is in the field of Moab'—Nu. 21 16-20, cp further 21 21 *ff.*; for details reference must be made to the several articles. An isolated fragment, apparently of E, in Dt. 10 6-8 preserves the names of four places—Beeroth-Bene-Jaakan, Moserah, Gudgodah and Jotbathah—which were probably stages in the earlier part of the march down the W. of the Arabah; but in the absence of identification, we cannot speak with certainty.

Indirectly and negatively, however, the district of the nomadic period is, within broad limits, thus defined

9. Result for JE. in JE. The country to the N. of Kadesh is implied to have been effectually held by other peoples[1] (Nu. 14 39-45; cp *v.* 25 13 29—to the NE. by Edom—cp Nu. 20 16; see more fully Buhl, *Gesch. der Edomiter*, 22-26, and EDOM). The wanderings, therefore, in JE are conceived as taking place from Kadesh as a permanent centre over an indefinite part of the wilderness stretching to the S. and W. of that place—in other words, over the desert of et-Tīh, and more immediately over that part now held by the 'Azāzimeh.

In D, as in JE, Taberah and Kibroth-hattaavah are stages on the journey from Horeb to Kadesh (9 22);

10. D's narrative. Hazeroth in Dt. 1 1 is either different from the Hazeroth of JE, or else the passage in question has ceased to be intelligible (cp Dr. *ad loc.*). D chiefly differs from JE in making the scene of the wanderings for the greater part of the period (thirty-eight years) distant from Kadesh, but immediately bordering on Edom. The command in Dt. 2 3 appears to be referred to the close of the period, and to have immediate reference to the final attack on Canaan; consequently, although the punitive wanderings extended up to the brook Zered (Dt. 2 14*b*) on the E. of Edom, we must conceive the greater part of the period to have been spent on the W. borders of Edom. Removing from Kadesh at the beginning, the people are found at the close of the period at the SE. end of the Arabah (Dt. 2 3). (In attempting to arrive at D's view, Dt. 10 6 *f.* must be disregarded; the verses form an isolated fragment out of relation to D's other statements; cp Dr. *ad loc.*)

[1] Nu. 20 22 has been generally assigned to P in its entirety. Carpenter, in the Oxford Hexateuch, assigns clause *a* to E. If this were certain, which it is not (see Gray in *Internat. Crit. Com.*), it would still be clear that 20 22*b*-29 in P, as in the present compilation, was preceded by P's story of the sin of Moses and Aaron at Kadesh; cp 20 24 with *v.* 23.

[2] It must suffice merely to draw attention to the theory recently advanced by Steuernagel (*Die Einwanderung der israelitischen Stämmen*, 1901) that in J one section of the people (the 'Leah' tribes, according to his denomination) actually made their way into Canaan from Kadesh, whereas in E the 'Jacob' tribes, leaving Kadesh at the beginning of the nomadic period, spent their years of wandering in the deserts *East* of the Jordan and the Arabah. [Cp EXODUS i., § 6, TRIBES, § 13 *f.*]

[1] Thus much it seems safer to affirm of JE. It is unnecessary here to discuss at length the analysis of the several sources as between J, E and editors, for which the Commentaries must be consulted.

When we turn to P we have to distinguish between the general narrative and the summarising chapter, Nu. 33.

11. P's narrative. In the narrative, the Hebrews journeyed from Sinai to the wilderness of Paran. Here they encamped, hence the spies were despatched, and hither they returned; and 'in this wilderness' (Nu. 14 35) the punitive wanderings took place. On the boundaries of the wilderness of Paran, see GEOGRAPHY, § 7. The remaining places in P's narrative appear to be referred to the final year. These occur in this order: wilderness of Zin (Nu. 20 1), Kadesh, Mt. Hor (20 22), Oboth, Iye-abarim (21 10), plains of Moab (22 1), pointing to a northward movement (Paran to Kadesh) followed by an eastward (to the plains of Moab); and the latter movement was in all probability regarded as being direct across the N. territory of Edom (cp We. *CH* 110, Buhl, *Gesch.* 23, Gray on Nu. 21 11), not, as in JE (*e.g.*, Nu. 21 4), or D (Dt. 2 3 8), by means of a march round the S. end of Edom; for although the site of Oboth is uncertain, and Iye-abarim unidentified, yet the latter certainly lay, as its name indicates, on the E. of the Arabah (cp ABARIM). Thus, the main narrative of P, like JE and D, contains no topographical details of the scene of the wanderings proper. The district suggested by P is more southerly than in JE, less easterly—*i.e.*, less definitely associated with the borders of Edom—than in D.

12. P's list. In Nu. 33 the point of view is different. We have here a succession of forty places at which the children of Israel encamped, between the time when they left Rameses and the time when they arrived at the Fields of Moab. Probably the number has been fixed at forty by artificial selection, to equal the number of the years of wandering; although the compiler clearly does not intend us to suppose that the people tarried at each place just a year, for seven of the stages clearly belong to the fortieth year (cp *v.* 38). The interpretation of the chapter must, to some extent, vary with our estimate of its historical value, and that, in turn, will depend on our general view of the antiquity of the priestly strata of the Hexateuch. One at any rate—and the chief—of Dillmann's arguments in favour of the antiquity of the itinerary is quite inconclusive (see below). Starting from the view that the chapter is a late compilation, the following points must be noted: (1) It is compiled from more than one of the literary strata of the Hexateuch; for it contains some names (*e.g.*, Pi-hahiroth, wilderness of Zin) peculiar to P, others unknown to him, but occurring elsewhere—*e.g.*, Kibroth-hattaavah (JE, D), Ezion-geber (D); (2) it also draws on an otherwise unknown source, for seventeen of the places are mentioned nowhere else; (3) it is dominated in its representation by P, for, like the main narrative of P, it makes Mt. Hor the death-place of Aaron (contrast Dt. 10 6 *f.*) and places the wilderness of Zin = Kadesh immediately before Mt. Hor; on the other hand, between Hazeroth and Kadesh, which are immediately connected in JE, this list inserts eighteen stages.

13. Its relation to his narrative. This being the case, the one striking divergence from P (claimed by Dillmann in favour of the high antiquity of the list) is all the more remarkable, and probably contains the true clue to the view of the period underlying the chapter. *The wilderness of Paran, so prominent in P, is not mentioned in the list.* This will be entirely accounted for, in complete accordance with the evident purpose of the list, which is to name, not large districts, but definite camping-grounds, if we assume that the stations mentioned between Sinai and Kadesh are conceived to have lain in the wilderness of Paran. Thus, the compiler derives from the other sources such places as are there naturally referred to the forty years between Sinai and Kadesh—viz., from JE Hazeroth, Kibroth-hattaavah, and the four places mentioned in the fragment Dt. 10 6 *f.*; Ezion-geber from D, and thirteen places mentioned only in this list from some sources unknown to us. Granted this single assumption, the view of the compiler is found to be in complete accord with P—thus *vv.* 3-15 contain the stages in the straightforward march from Egypt to Sinai; *vv.* 16-36 give the names of the camping-grounds during the forty years of punishment, the names of the individual places being substituted for that of the general district—Paran; *vv.* 37-49 describe the march from Kadesh to the plains of Moab, and this, as in the main narrative of P, is apparently across the N. end of Edom, not round Ezion-geber on the S. border. With a recognition of a double tradition as to the route of the final march, the old difficulty occasioned by a comparison of Dt. 2 8 10 6 *ff.* with Nu. 33 30 37, which was met by various unsatisfactory hypotheses (such as that there was a second Ezion-geber near Kadesh, or a backward and forward movement from Ezion-geber to Kadesh, or that Nu. 33 36*b*-41*a* originally followed immediately on 30*a*) falls to the ground. Ezion-geber was considered by the compiler of the itinerary to have been merely a camping-ground during the nomadic period, not a stage in the final march from Kadesh to the E. of Canaan.

14. Its origin. The question whence the compiler of this chapter derived the otherwise unknown names can only be met by conjecture. Possibly it was from a now lost written source; but it is, perhaps, more probable that they are names of places known in his own day as belonging to that region. That the names (or at least the great majority of them) are genuine names of places, there seems no reason to question; and if, as is far from unlikely, they are names of caravan stations (Masp. *Hist. Ancienne*, 2 475, n. 1) given by travellers, but never used by the inhabitants of the district, the failure to identify the sites would be accounted for (cp Doughty, *Arabia Deserta*, 1 49). It is, further, quite possible that Alush and Dophkah (*v.* 13), stages in the movement from Egypt to Sinai, and Zalmonah and Punon (*v.* 42), stages in the movement from Kadesh to the E. of Canaan, are only accidentally absent from some of our present sources in which they originally stood. That the eastern traditions had little or nothing to say of the places connected with the wanderings, is merely one side of the more general silence as to the period. In Nu. between the incident of the spies (13 *f.*) at the beginning and the events at Kadesh (20 1-21) at the end of the period, but five chapters intervene. Two of these (15 19) contain miscellaneous laws wholly unrelated to the period, and the remaining three (16-18) relate the revolt of Koraḥ (Dathan, and Abiram) and the laws which were the outcome of it. But whether even this incident was referred to this period in the sources, or only by the editor, it is impossible to decide.

15. JE's tradition. In conclusion, some of the general features of the country may be mentioned. In JE, as we have seen, Kadesh is the permanent centre. This harmonises with JE's view of the punishment as a postponement of the possession of the richer country of Canaan rather than the infliction of positive hardship. The people, for their unbelief, are to remain as they had been—nomads (רעים). That is all; the punishment is not aggravated by their being condemned to a peculiarly barren tract of country. For Kadesh ('Ain Ḳadīs) is a singularly fertile and attractive oasis; cereal crops even, in small quantities, can be raised in the neighbourhood. The Wādy 'Ain el-Ḳudeirat, to the W., with its important well, is also fertile; less valuable, but also worthy of mention, are the *themā'il* or shallow pits of water in the Wādy Ḳasaimeh, situated still farther W. Southwards and westwards, whither according to JE the Hebrews must have wandered, stretches the desert of et-Tīh; this, according to the description of Palmer (*Desert of Exodus*,

286-288), is an 'arid featureless waste' marked by scanty lines of vegetation along the shallow wadies, but for the most part waterless. The ground is hard and unyielding and covered with small flints, and only in spring, after the rains, becomes covered with grass; cp also Seetzen, *Reisen*. 3 48 *ff.*

16. Conclusion. Thus, the discovery of the true site of Kadesh and the literary analysis of the Hexateuch have brought to light a very noticeable difference of general representation. In the earlier traditions embodied in JE, the Hebrew nomads had as their common centre a large and fertile oasis in the neighbourhood of two other fertile valleys and a vast roaming ground southwards and westwards, barren for most of the year, but, as is usual in these deserts, abounding with grass in spring. On the other hand, the greater part of the time in D, the whole of it in P, is spent away from this fertile centre on the arid and barren plateau described above.

17. Literature. Guthe in *ZDPV*, 1885, pp. 182 *ff.*; Lagrange, 'L'itinéraire des Israélites du pays de Gessen aux bords du Jourdain,' *Rev. biblique*, 9 (1900) 273-287. On the literary analysis, the relevant works of Dillmann, Wellhausen, Kuenen, and Driver, should be consulted; Bacon's *Triple Tradition of the Exodus* is especially worthy of attention for his careful attempt to discriminate J and E; the frequent uncertainty in the analysis of these two sources may be seen by consulting the analytical tables in Holzinger's *Einl. in den Hex.* On the site of 'Ain Ķadīs (Kadesh) and on the character of this and the neighbouring valleys, see Clay Trumbull, *Kadesh Barnea* (which also contains a very full index of the literature), Seetzen, *Reisen durch Syrien*, 3 43-48, and on the character of the desert of et-Tīh, E. H. Palmer, *Desert of the Exodus*, pt. ii. chaps. 1-5.

G. B. G.

WAR. The ordinary word in Hebrew for 'war' is מִלְחָמָה, *milḥāmāh;* to 'fight' or 'carry on war' is נִלְחַם, *nilḥam* (*nif'al*), צָבָא, *ṣābā'*, קָרַב, *ķārab* (lit. 'advance to war,' followed by אֶל or עַל of the object), עָשָׂה מִלְחָמָה, *'āsah milḥāmāh*, etc., 'to advance to war' is also expressed by עָלָה (with עַל, לְ, or בְּ). The ordinary Greek equivalent is *πόλεμος, πολεμεῖν*.

1. Palestine as a theatre of war. Palestine and all its adjacent land bordering on the Mediterranean, including Tyre, Sidon, and Byblus (Gebal), was called by the Babylono-Assyrians (mât) Martu or Amurri, or, in its northern portion, mât Ḥatti, and by the Egyptians Rtnu (see WMM *As. u. Eur.* 147). All this country stood in a position of great strategic importance in the mutual relations that subsisted between the Euphrates and Tigris lands on the one hand, and the Nile territory on the other. For Palestine possessed a fairly well-watered and fertile belt of hills and plains extending from the Lebanon mountains on the N. to the el-'Arīsh stream on the S. Consequently Canaan became the natural highway for the trading caravans (Gen. 37 28 1 K. 10 15) that passed from N. to S. or from SW. to NE. (see TRADE). It would also be the most fertile route for the Egyptian army as it moved to the NE., or for the Assyrian army as it advanced to the SW. to attack Egypt along its short vulnerable frontier defended by frontier fortresses, N. of the Gulf of Suez. For the empire on the Nile, on the one hand, and the empire on the Tigris or on the Euphrates, on the other, were, to adopt the language of modern politics, the two first-class powers, protagonists in the drama of Western-Asian history, whose mutual relations overshadowed and dominated all other political interests and combinations among the minor Western-Asian states. Unless this controlling factor be kept clearly in view during the larger part of the regal period, the history of Israel in its external aspects can be but imperfectly understood. For a time—*e.g.*, in the days of David and Solomon—the power of Egypt or of Assyria may suffer decline, or lapse into quiescence, and the Hittite states or Syria (*e.g.*, in the 9th cent.), or Israel itself, may come into temporary prominence, but this is only a passing phase. The more permanent and dominating factor, to which we have referred, is nevertheless ever present and reasserts itself.

No land, therefore, felt the pulses and tremors of war more acutely than the plains and mountains inhabited by Israel. Of this the prophetic oracles bear abundant witness. The prophet of Israel—which geographically stood so central to western-Asiatic movements—could not but be deeply interested in foreign politics. Hence the earliest prophet of Judah whose oracles have come down to us in separate collections (Amos), as well as the latest of the closing years of the monarchy (Jeremiah), uttered his *Maššā* on foreign peoples. No other land was better situated as a watch-tower for the inspired seer. Probably no other country on the earth's surface has been more frequently traversed by armies or has oftener resounded to the shock of battle or suffered greater hardships from the ravages of war. Belgium has been called the 'cock-pit of Europe' from the days of Louis XIV. and Marlborough to those of Napoleon and Wellington. But in a far truer sense, during the millenniums that separate Thotmes III. from the age of the Saracens, Palestine has been the cock-pit of Western Asia.

It was at Elteķeh (Altakū), not far from Ekron, that the power of SENNACHERIB (*q.v.*) recoiled from the onset of his southern enemies, and it was on the fatal field of Megiddo that Pharaoh Necho slew JOSIAH (*q.v.*) who resisted the endeavours of the Egyptian monarch to capture the spoils of the defunct Assyrian empire. The Palestinian towns, Samaria, Jerusalem, Ekron, Ashdod, and Lachish, were regarded by the Assyrian kings as outposts on the path of the invader of Egypt, whilst the empire on the Nile, on the other hand, would naturally regard with apprehension their possession by a foreign foe. It is difficult to over-estimate the strategic importance of Palestine.

2. Religious significance of war. The close vital bond that existed between the clan or tribe and the clan or tribal deity profoundly affected the ancient Semitic conception of war. 'Religion,' as Wellhausen says, 'was patriotism.' Thus war against a foreign nation, like other national acts, was only undertaken under the favour or sanction of the patron deity or deities.

Thus the inscriptions of the Assyrian monarchs preface the annals of a campaign with phraseology like this:—'In my fourth campaign Ašur inspired me with confidence; then I summoned my mighty forces. . . .' (Sennacherib's prism inscription [Taylor cyl.] col. iii., 42. Cp Judg. 11 29.) Kings in all their public functions, whether of building temples or conducting wars, like to describe themselves as under divine favour and guidance. Sargon opens his cylinder inscription by describing himself as šaknu Bêl išakku na'id Ašur nišit inâ Anim u Dagan, 'Bel's officer, exalted priest of Ašur, favourite of Anu and Dagan.' Cp also Nimrud inscription 1. On the other hand, Sargon's enemy Merodach Baladan, son of Jakin, king of Kaldu, is described as being under the influence of an 'evil demon' (*gallu limnu*),[1] and 'showing no fear for the name of the lord of lords' (triumphal insc. 122). The Rassam cylinder of Ašurbani-pal continually recites the names of Ašur, Sin, Šamaš, Rammân, Bel, Nebo, Ištar of Nineveh, Ištar of Arbela, Nergal, and Nusku. In fact, the king (or his tablet-writer) seems possessed with a nervous dread of offending any deity by omitting his name. Doubtless in all these cases the magic potency of the name operated in the recital.

Ištar was the Assyrian war-goddess (Jastrow, *Rel. of Bab. and Assyr.* 83, 204; Driver, 'Ashtoreth' in Hastings' *DB* 1 168). The Canaanite war-deities, ac-

[1] It may here be noted that the deity of a defeated nation became relegated into the position of a demon, like the Titans overthrown by Zeus. It is to be observed in this connection that the Hebrews called the deities of the Gentiles *šēdīm* (שֵׁדִים) or demons (Dt. 32 17 Ps. 106 37, see DEMONS, §§ 2, 4), and we meet with several of their names as the demons of later Judaism—*e.g.*, Rešpâ is the flame demon, the old Canaanite flame-deity Rešeph, the Rešpu of the ancient Egyptians (Baethg. *Beitr.* 50, Wiedemann, *Rel. Aeg.* 83, and cp the present writer's article 'Demon' in Hastings' *DB*). Beelzebub is the most conspicuous example.

cording to Egyptian data, were the goddess 'Anat (represented as armed with helmet, shield, and lance, and in her left hand a battleaxe) and the god Rešeph (armed with helmet and lance). See Wiedemann, *Relig. der alten Aegypter*, 83. The warrior Shamgar was Ben 'Anat; see Baethgen, *Beiträge*, 52 *f.*, Judg. 3 31 5 6.

The Moabite stone yields us other parallels (see MESHA).

Chemosh, national deity of Moab, says to Mesha, 'Go, take Nebo against Israel.' This time it is Yahwè, national deity of Israel, who suffers. His vessels (?) are dragged before Chemosh, and Chemosh drives the king of Israel out of Yahaṣ, *ll.* 14, 18 *f.* A high place is made for Chemosh because he had saved Mesha from all his foes, and had caused him to see his desire on all them that hated him. In former times when Omri reigned over Israel Moab was oppressed because Chemosh was angry with his land (*l.* 4 *f.*). The biblical parallels to this language are very close both in Judges, Samuel, and the earlier Psalms—*e.g.*, Ps. 60, which may contain, as Ewald supposed, a Davidic fragment. (Cp MESHA; see also Wi. *GI* 2 204 *f.*)

The name Israel may not improbably have originated with the early Hebrew battle-cry of the desert 'El fights'; and the cry 'for Yahwè and for Gideon,' and 'the Sword of Yahwè and of Gideon,' are the echoes of old Hebrew battle-cries.[1] All Israel's victorious wars were therefore wars of Yahwè. He was called in comparatively early times יהוה אֱלֹהֵי צְבָאוֹת, 'Yahwè, God of Hosts.' The view of Wellhausen, Smend, and others, that this phrase originated with the prophets of the eighth century, is hardly probable. The conception of Yahwè as an atmospheric deity is obviously ancient, and the designation of the Hebrew god as Lord of the heavenly, as well as the earthly, armies is in full accord, Judg. 5 20 (Deborah's song). That Yahwè was closely identified with Israel's wars is clearly shown in Dt. 20 4 Josh. 10 11 Ex. 15 3, etc. Like other Semites the Hebrews inaugurated war by sacrifices. This was said to consecrate war (קִדֵּשׁ מִלְחָמָה, *ḳiddēš milḥāmāh*), Mic. 3 4 Jer. 6 4 cp Josh. 3 5.[2] Hence the burnt-offerings at the opening of a campaign (Judg. 6 20 26 20 26 1 S. 7 9 13 10). The sacrificial pieces sent round by Saul to the Israelites were probably intended not simply to inaugurate a war against the Ammonites (1 S. 11 7) but also to unite the warriors into a holy league of war under Yahwè by a covenant. Every war against a common foe thus tended to weld the scattered clans into a unity, and this union was cemented by the rites of sacrifice. Moreover, in war-time, in seasons of great anxiety or strife, special piacular sacrifices would be offered. In times of special danger a human victim might even be sacrificed. Of this we have a remarkable example in 2 K. 3 27, which is the more significant as it reveals the Hebrew dread of its potency. (On the Hellenic belief in the efficacy of human sacrifice see WRS *Rel. Sem.*(2), 402 *f.*, and n. 5.) In early Hebrew warfare the leaders would always be accompanied on the field of battle by the priest-soothsayer with the ephod and sacred lot, or, as in the early Philistine campaigns, with the ark of God (1 S. 4 3 *f.* 14 18 *f.* 23 6 9 *f.* 30 7 *f.*). What is probably meant by the use of his ephod in divination by the priest-soothsayer is that the sacred lot was used in the presence of the plated ephod image which gave the procedure divine sanction. Wellhausen reminds us (*Heid.*(2), 132, 136 *f.*) that nearly all the clan chiefs of the Ḳuraish consulted lots before they marched on their expedition to Badr, though requested by Abu-Sufiān, whom they sought to rescue, not to wait to consult lots. Similarly, though with more elaboration of detail, the Assyrian ruler questioned the deity before definitely entering upon a fresh expedition, all possible contingencies being enumerated, so that there might be no loop-hole of escape, just as in a lawyer's deed.[1] As Yahwè, Israel's national deity, was identified with the people, and especially with the national act of war which was undertaken in his name and under his auspices, so the booty, including the human captives as well as the cattle, belonged in a very special sense to him. This is evidently the underlying principle of the *ḥērem*, which surrounded the objects captured in war with a sacred ring-fence which forbade their appropriation for human uses. This explains Samuel's action in slaying Agag in 1 S. 15 7-33, the whole passage viewed from this aspect being exceedingly instructive.

The language of *v.* 18 is exactly parallel to that of the stone of Mesha', *ll.* 14 *f.* 32. In the latter case Mesha devotes to Aštar-Kemosh (*l.* 17, החרמתה) the entire population of Nebo, both men and women. The inscription makes it clear that this means wholesale slaughter (cp Josh. 6 17; see BAN). This tradition of ancient Semitism even persisted in Hebrew legislation. Dt. 7 2 20 13-17, however, limit its application to Canaanite towns which, near the close of the seventh century, practically meant nothing but the maintenance of an old formula. Women, children, and cattle were permitted to live and be divided as spoil of war (see SIEGE, end, and cp Nu. 31 7 *f.* Josh. 8 2 27 *f.* Judg. 21 11 *f.*).

The negotiations which precede a declaration of war are set forth in fuller form in Judg. 11 12-28 1 S. 11 1-10 1 K. 20 2-11.

3. Preliminaries of war.

The negotiations took place by word of mouth through messengers (Judg. 11 12 1 K. 20 2). Proverbs or parables might be employed (2 K. 14 9 *f.* 1 K. 20 11). Proceedings of this kind are regulated in Dt. 20 10 *f.*; but we have no precise information as to the form in which war was declared. Probably the cessation of negotiations would be the indication that war was in preparation.

4. Preparations for war.

(*a*) *Provisioning of troops.*—On this subject we have very slight information. The methods consisted in the rough and ready ones of providing sufficient for the sustenance of the army for a brief space until it entered the enemy's territory; each family, household, or local clan sending provisions sufficient for its own warriors. Of what these consisted we may gather from 1 S. 17 17. *Ḳālī* or roast (parched) corn was the usual diet of workers who led an out-door life (Ruth 2 14) and therefore of soldiers (cp 2 S. 17 28); and to this would be added curds and cakes ('rounds,' כִּכָּרוֹת, Judg. 8 5) of unleavened bread;[2] see BREAD and MILK. In one case (Judg. 20 10 *f.*) we read that a special corps, about one-tenth of the army, was told off for the express purpose of supplying the army with necessaries. These could be furnished without difficulty in ordinary circumstances, to an expeditionary force at a short distance from its base. But when the territory of the enemy was entered the simple method adopted was that of unlimited spoliation of the crops and fruit-trees, including the palm-groves and the vines, in the country through which the army passed (cp Is. 1 7). The Assyrian army was specially destructive and left a wide tract of desolation behind it. Is. 7 20 compares it to a 'razor

1 Judg. 7 18 20. Moore regards the introduction of חֶרֶב in the form given in *v.* 20 as due to a gloss.

2 This use of the Hithpael הִתְקַדֵּשׁ shows that warriors consecrated themselves for war just as they would for the performance of a religious rite. This idea seems to underlie Is. 13 3, and Benzinger in *PRE*(3) would connect with this the ancient Semitic custom of sexual abstinence which prevailed among the Arabs; WRS *Rel. Sem.*(2), 455. It is in this sense we should understand 2 S. 11 6 *f.*; Uriah refuses to come to his wife as long as the ark of God and the army of Israel are on the field. Evidently there was a taboo on sexual uncleanness in war-time. Hence the strict camp-regulations with regard to uncleanness in Dt. 23 10-14. These were manifestly old Tōrōth based on the conception that Yahwè was present in the camp (*v.* 14). Probably this is the underlying motive of Dt. 20 7. It is not easy, however, to follow Schwally (*Semit. Kriegsaltert.*) in his interpretation that in the other cases mentioned in Dt. 20 5 *f.* the individual was believed to be specially exposed to demons.

1 See Knudtzon's *Assyr. Gebete an den Sonnengott*, where examples are given of prayers of this kind addressed to Šamaš. An excellent illustration is quoted by Jastrow, *Rel. Bab.* 334 *f.* See also 'Soothsaying' in Hastings' *DB*.

2 Also round cakes of figs—summer figs dried into cakes, and used as an article of consumption, called *dĕbēlah* (1 S. 30 12 cp 25 18; see FRUIT, § 7)—as well as raisins (*ṣimmūḳ*; see FRUIT, § 4) which were also made into cakes (*'ăšīšāh*; see FRUIT, § 5). Moreover the grape juice which came from trodden clusters was boiled down to a syrup called 'honey,' in modern Arabic *dibs* (see FRUIT, § 3; HONEY, § 1 [3]). This may have been the honey which Barzillai bestowed on David and his warriors (2 S. 17 29); see Whitehouse, *Heb. Antiquities* (*RTS*), 102 *f.*

hired' by Yahwè for the infliction of his chastisements (cp Is. 16 9 *f.*). Even the flocks and herds were not spared (Jer. 5 15-17). Israel's practice was in reality the same in the spoliation both of sheep (1 S. 15 9) and of fruit (2 K. 3 19), the trees being cut down partly for the timber, which could be turned to account (see SIEGE), and partly to deprive the enemy of their use. This practice was forbidden in the Deuteronomic legislation (Dt. 20 19 *f.*); but it was recommended by Elisha to Israel in the war against Moab (2 K. 3 19).

(*b*) *Mustering of troops.*—Troops were summoned in early times by the blowing of the trumpet or war-horn whereby the clan warriors were rallied together (Judg. 3 27 2 S. 20 1; cp 1 Macc. 3 51).[1] An alarm of war was usually sounded in this way, and was the function of the watchman (צֹפֶה, *ṣōpheh*). Compare Ezekiel's use of this metaphor for the prophet's vocation in 33 2-11. Frequent messengers were sent if the forces were to be summoned from a large district (1 S. 11 7).

5. Varied details.

(*a*) Spring-time would be the natural season chosen for beginning a campaign. The annual expeditions recorded by Shalmaneser II. probably commenced at that time. The reasons are obvious, and have been partially indicated in the previous section (§ 4*a*). Troops on the march—especially in a hostile territory—were sustained by the crops and other fruits of the earth. Winter, to say nothing of its climatic rigours, was the time when the earth was bare of subsistence for man. By the close of the month Tišri (Ethānīm in the old Hebrew-Canaanite calendar) the troops would betake themselves to their homes. Thus in 2 S. 11 1 'at the return of the year, when the kings march forth' (cp 1 K. 20 20-26) does not mean the beginning of the year in the old pre-exilian calendar—viz., Ethānim or Tišri—but about the time of the spring months.

The expression בָּא שָׁנָה in 2 K. 13 20 cannot be cited in this connection since the passage should probably be emended, as Kittel suggests, into יָבֹאוּ בָאָרֶץ שָׁנָה בְשָׁנָה '(bands of Moabites) used to invade the land yearly.'

(*b*) Scouting was necessary in order to ascertain the strength and position of the enemy (1 S. 26 4 Judg. 1 24 7 10 *f.* Josh. 2 1 *f.*, שֹׁמְרִים, מְרַגְּלִים חֶרֶשׁ; cp SPIES); or strict inquiries would be made by the leaders of the army of those whom they chanced to meet (1 S. 30 11).

(*c*) The camp (מַחֲנֶה, *maḥăneh*) was carefully guarded, since it formed the base of operations (cp 1 S. 30 24). We have very few details to guide us as to its character or shape. Nu. 2 would lead to the conclusion that it was square; but as this passage is late (belonging to a considerable P section) it should be cautiously used. The Egyptian camp was, however, four-cornered. See Erman, 530—a vivid description (see, further, CAMP).

Probably the camp was round like the encampments of the Bedouins (cp TENT). It is hardly possible to draw any particular inference from the *ma'gal*, מַעְגָּל, of 1 S. 17 20 26 5. The word is found only in 1 S. in this particular sense of a 'waggon-laager.' Probably it would in many cases be fenced in with stones, like the *ḥāṣēr*, חָצֵר, of the nomadic tribes (Gen. 25 16) for purposes of protection. Dwelling in booths must have largely prevailed in the time of David, and the language of Uriah the Hittite (2 S. 11 11) shows that this was certainly the case in time of war. The camp was guarded by sentinels, who had three watches (Judg. 7 19 1 Macc. 12 27). To the rules for the maintenance of purity in the camp (Dt. 23 10 *f.* Nu. 5 1-4), we have referred already (§ 2, n).

6. Accoutrements and other appliances of war.

The arms or weapons used in warfare would vary considerably at different periods of Israel's history. In the early nomadic stage of the nation's development the arms would consist of the spear or lance, *ḥănīth* (חֲנִית), a wooden shaft with a bronze or, in later times, an iron head (see SPEAR). We also read of the smaller *kīdōn* (כִּידוֹן), or JAVELIN [*q.v.*] (1 S. 17 6 45; also a Babylonian weapon, Jer. 6 23 50 42) and of the *rōmaḥ* (רֹמַח, difficult to distinguish from the חנית; see SPEAR). The SWORD (*q.v.*), *ḥéreb* (חֶרֶב), would be fastened to the girdle, and we likewise find in use the dagger, *lâhab* (לַהַב; Judg. 3 22), so called from its glittering blade or point. The bow (see WEAPONS, § 2) and the SLING (*q.v.*) were also employed as weapons of offence, particularly by the Benjamites (cp 2 S. 1 22 1 S. 20 20 *f.*). The use of the bow by the Josephite tribes is clearly indicated in Gen. 49 23 *f.*, cp Ps. 78 9. The use of the sling is specially connected with the Benjamites whose left-handed slingers became famous (Judg. 20 16, cp SLING). That the tribe of Judah also possessed slingers is evident from 1 S. 17 40 etc., and the constant presence of slingers in Assyrian warfare is certified by the figures on the monuments (see SIEGE). They were specially formidable in sieges, and operated with the Israelite forces with potent effect against the Moabite stronghold, Ḳīr Ḥarāšeth. In early times we read little of defensive armour. The SHIELD (*q.v.*) in use was the smaller and simpler *māgēn* (מָגֵן, ἀσπίς) employed to defend the bowman on the chariot (cp CHARIOT, § 9, and fig. 7). Neither chariots nor horsemen, however, were used till the time of Solomon. The shield was probably carried only by the more important warriors (2 S. 1 21). The BREASTPLATE (*q.v.*) was likewise a rarity in ancient Israelite warfare and, like the bronze HELMET (*q.v.*), would be the privilege only of the chiefs (1 K. 22 34). Probably the Israelites were among the most backward among Semitic peoples in adopting these accessories of combat, and the story of David's proving the armour provided by Saul probably reflects old tradition and prejudice (1 S. 17 38 *f.*). The ordinary warrior wore only the *simlah* (see MANTLE, § 2, 1), which displayed the blood-stains of battle (Is. 9 4). Even Joab merely wears the *lĕbūs* (2 S. 20 8 text restored by Klostermann). We may therefore assume that in the earlier period of Israel's history, when the nomad clans were establishing their position on the hills of Canaan, all their fighting-men were light-armed. As soon, however, as they learned the arts and methods of the Canaanites and Philistines who inhabited the plain, the distinction began to arise between the light-armed (whose weapons would be the spear, bow, sling, sword, and smaller shield) and the heavy-armed, whose accoutrements were the larger shield (*ṣinnāh*, צִנָּה, θυρεός; see SHIELD), resembling that of the Assyrians, as well as the cuirass (*siryōn*, סִרְיוֹן) and the helmet. According to the statements of the Chronicler, which in this case McCurdy (*Expos.*, Nov. 1891) has shown to be worthy of credence in the main facts, it was Uzziah who first provided his army with helmet and breastplate (2 Ch. 26 14), to what extent is uncertain. Previously they had belonged to the captains or chieftains only.

It is not easy to determine how the Israelite forces in early times were shod. But it seems fairly probable that they wore the ordinary sandals consisting of soles of leather or wood tied under the feet by thongs (Gen. 14 23). From Isaiah's vivid description (5 27) as well as from the portrayal on Assyrian monuments, we gather that the soles were firmly and strongly made and the back was protected by leather, but the toes and upper part of the foot were bare, covered only by the thongs that were bound firmly and tightly across. Not improbably the Hebrews had by this time (740-700 B.C.) learned the value of a strong and serviceable military shoe, and the Hebrew word *seōn* used by Isaiah in 9 4[1] is probably a loan-word from the Assyrian *šênu*. See SHOES.

It is by no means easy to ascertain at what time the wheeled battering-ram of the Assyrians (Assyr. *arammu*, *šupû*) was first employed by the Hebrews. Probably it was quite unknown to Israel until the ninth century, when it was employed by Assyria against the Syrian towns in the N. See SIEGE.

[1] The trumpet was also used in sounding a halt or a return (2 S. 2 28 18 16 20 22).

[1] Regarded, however, as post-exilic by Hackmann and Cheyne.

It has been pointed out already (see CHARIOT) that one powerfully determining factor in the advance of Israel's military accoutrements and tactics was the great change brought about when the people ceased to be a band of hardy warriors armed with spear and bow who sallied forth from their mountain fastnesses, and became a disciplined force that waged aggressive wars upon the plain. It was the life and death struggle with the Philistines that first welded the Israelite clans into some semblance of unity under Saul, the representative of the hegemony of Benjamin, and subsequently under David of Bethlehem-Judah. The Philistines taught the Hebrews some severe lessons from the time of the destruction of Shiloh down to Saul's tragic overthrow at Gilboa. The Hebrews were able to hold their own with wonderful skill and persistence when the fighting was in mountain passes like that of Micmash (1 S. 14 5 *f.*) or in the forests of Ziph (1 S. 23 14) or Ephraim (2 S. 18 6), or when sudden night attacks were made (Josh. 10 9 *f.* Judg. 7 5 *f.*), or rocky citadels stormed (2 S. 5 6 *f.*); but their inability to forge their own weapons placed them at a great disadvantage (1 S. 13 19 *f.*), and their irregular guerilla tactics were utterly at fault when the Philistines managed at Aphek to concentrate immense forces around Saul (whose strength was weakened by David's defection), and to drive him from the open plain of Jezreel (where the methods of attack employed by Jonathan could not avail) into his last forlorn stronghold on Mount Gilboa.

7. Tactics.

The mountainous regions, where chariots and horsemen could not operate, afforded the best ground for the irregular tactics of the Israelites. Even as late as the time when the dynasty of Omri reigned (9th cent.), Israel's God, Yahwè, was regarded by the Syrians as god of the hills (1 K. 20 23).

A change, however, begins to be apparent in the reign of David, whose wars of conquest led him beyond his own borders and who was seconded by one of the ablest and most energetic generals that the Hebrews ever possessed, from the days of the Exodus to those of Judas the Maccabee. What Hannibal was to Carthage in the latter end of the third century, Joab was to David throughout his stormy reign in the tenth. We have already seen (see SIEGE) that it was Joab who first taught the Israelites the regular methods of reducing a fortified town (2 S. 20 15). Nevertheless, the equipment of Israel must still have remained primitive, for horses and chariots were not employed, and even the leader Absalom rides upon a mule (2 S. 18 9). In the reign of Solomon Israel began to enter into fuller intercourse with foreign peoples, and the dynasty of Omri united Israel closely with Phœnicia, and was able to wage successful wars with Syria and Mesha, king of Moab. Omri and Ahab were capable generals, and the strategic instinct of the former marked out Samaria as his royal fortress-citadel. Omri's name was dreaded by the Moabites, as the stone of Mesha clearly testifies (*l.* 4 *f.*), and became permanently identified by the Assyrians with the Ephraimite kingdom long after his dynasty had disappeared (see OMRI). Chariots and horsemen were now a recognised part of Israel's war-equipment, and in the Syrian coalition against Shalmaneser II. (as we learn from his monolith insc. col. 2 91) Ahab figures as Hadadezer's (see BENHADAD, § 2) most powerful ally, furnishing a contingent of 2000 chariots and 10,000 men. Probably Ahab had brought Israel to a level of military efficiency fully equal to that of any other Palestinian state, evidenced by his brilliant victory at Aphek over much superior numbers (1 K. 20 27 *f.*). In the last fatal battle of Ramoth Gilead Ahab's value is so highly esteemed that the word of command goes forth among the Syrian ranks that he must be slain at all costs. See AHAB, § 8.

The term *ma'ărākāh* (מַעֲרָכָה, 1 S. 17 8 10 etc., 23 3) and the phrase [מִלְחָמָה] עָרַךְ, *'ārak* [*milḥāmāh*] (Judg. 20 20 22 30 33 1 S. 4 2 17 21), show that in comparatively early times the fighters were drawn up in line.[1] Sometimes we read that they were disposed in three separate divisions (Judg. 7 16 20 1 S. 11 11). This seems to have been a favourite tactical arrangement of forces, and it was adopted by David against his son Absalom with complete success in a country of wide extent covered by forest (2 S. 18 2).

The Hebrews remained throughout their history without a navy manned by their own sailors. The geographical configuration of the sea-coast of Palestine S. of Tyre, with its almost utter absence of harbours, made the sea a strange element.[2] Naval warfare was therefore unknown to them. For even their rivers were insignificant, and thus we never read of river expeditions like those which proceeded up the Nile, or of such naval battles as those which were waged by Rameses III. in which he repelled the hordes of barbarians (who had defeated the Syrians and the Hittites) from their descent on the mouth of the Nile by sea (Erman, 540). It is true that Phœnician vessels were utilised by Solomon; but this was not for military purposes. On the other hand Sennacherib (like Xerxes more than two centuries later) employed Phœnician ships and sailors in his expedition to Elam in 697 B.C. A vivid relief, now in the British Museum, exhibits a Phœnician galley armed with shields and propelled by two banks of rowers (bas relief from Ḳuyunjiḳ). In the ninth century B.C. Shalmaneser II. describes in his annals how he crossed the Euphrates on boats of sheepskin (ina elippâni ša mašak taḫsi;[3] cp ASSYRIA, col. 356); but such details are entirely foreign to the military annals of Israel. Cp SHIP.

When we come down to the second century B.C. we are brought into contact with Græco-Asiatic civilisation and its military methods. 1 Macc. 6 gives us a vivid description, garnished with some luxuriance, of the warfare and equipment of king Antiochus.

The conquests of Alexander had extended to India, and Pyrrhus, in the preceding century, had made Italy familiar with the sight of Indian elephants in warfare. The army of Antiochus advanced against Judas the Maccabee in the phalanx formation. A thousand men, armed with coats of mail and bronze helmets, accompanied each elephant. The number of troops of Antiochus that were engaged is computed at 100,000 footmen and 20,000 cavalry and 32 elephants 'trained for war.' 400 horsemen were detailed for service around each elephant. Each elephant carried a wooden tower, 'strong and covered' and 'bound fast with cunning contrivances,' containing 32 warriors besides an Indian, probably the driver who managed the elephant. The remainder of the cavalry, amounting to 4000 men, were placed on the wings for the protection of the phalanxes. The whole army covering the hills and the plain moved with precision. One elephant was believed by Eleazar, surnamed Avaran, fourth of the Maccabæan brothers, to carry king Antiochus himself. It towered above the other animals and was protected by royal breastplates. Eleazar daringly broke through the protecting phalanx, crept beneath the elephant, stabbed it, and was crushed by its fall. Cp ELEPHANT.

8. Accompaniments of war.

(*a*) The conquerors were welcomed home with song and dance. Of this we have several examples in the literature of the OT; Ex. 15 and Judg. 5 (Deborah's song) are songs of triumph and thanksgiving after victory. 1 S. 18 6 *f.* gives only the brief refrain of the song of the maidens who greeted Saul and David (cp Judith 16 1 *f.* 1 Macc. 4 24). Of such a character is Hannah's song in reality (1 S. 2 [cp col. 2965]). Similarly Esarhaddon says (*Prism Inscr.* col. i., 53): 'With singers (*zammurê*) and playing on lutes I entered Nineveh.' See fig. 25

1 The procedure of battle even in the later regal period cannot be described in any but general terms, as we have no materials for an accurate and detailed portrayal. Perhaps the following description (by Sir G. Wilkinson) of ancient Egyptian warfare (1 264) will serve as the best illustration: 'The archers drawn up in line first discharged a shower of arrows on the enemy's front, and a considerable mass of chariots advanced to the charge; the heavy infantry, armed with spears or clubs and covered with their shields, moved forward at the same time in close array, flanked by chariots and cavalry, and pressed upon the centre and wings of the enemy, the archers still galling the hostile columns with their arrows.'

2 See Nowack, *HA* 1 247.

3 Monolith insc. col. 2 16.

in Music. The burial of dead warriors was a sacred duty (1 K. 11 15), and lamentations were composed and sung, 2 S. 1 17-27 3 31-36 (Ezek. 32 18-32).

(*b*) The darker reverse is presented when we deal with the treatment of the conquered. This was characterised by the utmost cruelty. The wars with the Canaanites are full of examples (Josh. 10 26 *f.*, and *passim*). Also we have instances of mutilation of the captives (Judg. 1 6 *f.*; cp 1 S. 11 2 and 2 S. 12 31). Captured kings or generals were frequently slain (Judg. 7 25). Too often we read of wholesale slaughter (Judg. 8 7 2 S. 8 2) indicated by the phrase הִכָּה לְפִי חֶרֶב (EV 'smote with the edge of the sword'). The feet were placed (in token of conquest) upon the neck or head of the conquered (Josh. 10 24). The dead were decapitated (1 S. 17 54 31 9 2 Macc. 15 30 Jos. *BJ* i. 17 2). The dead were often rifled of their property, and prisoners plundered (1 S. 31 8 2 Macc. 9 27). The horses of the enemy had their sinews severed ('houghed') that they might be rendered useless (Josh. 11 6 9). We also read of pregnant women ripped up, and infants dashed to pieces (2 K. 15 16 Is. 13 16 Am. 1 13 Hos. 10 14 Nah. 3 10 Ps. 137 8 2 Macc. 5 13). The land of the enemy was desolated, the trees cut down, and the wells stopped up (Judg. 6 4 1 Ch. 20 1 Dt. 20 19 *f.*). Towns and villages were burnt to the ground (Judg. 9 45 1 Macc. 5 28 10 84). The payment of large sums of money was imposed on the conquered, or a yearly tribute (2 K. 18 14 Is. 33 18), a custom which was universal and is constantly referred to in the Assyrian inscriptions.

A severe judgment, however, cannot be passed on the treatment by the Hebrews of their conquered. The universal custom of antiquity must be taken into consideration as well as the all-prevailing conception of war as a religious act in which the deity of the nation was deeply involved. The old Semitic conception of the *ḥērem* explains much of the practice. In comparison with Assyrian usage the Hebrews must be called humane. By far the larger proportion of the captured were made into slaves. The women became concubines, and were treated with consideration.

The Egyptians also, according to Wilkinson's judgment, were humane as compared with the Assyrians in their treatment of captives (*Anc. Egypt.* 1 264). 'The cruel custom of flaying alive and the tortures represented on the sculptures of Nineveh show that the Assyrians were guilty of barbarities at a period long after the Egyptians had been accustomed to the refinements of civilisation.' Just as the followers of David reckoned up the foreskins of the Philistines whom they had slain, so the ancient Egyptians reckoned up the severed hands which were placed in heaps before the king and counted by his secretary (Wilkinson, *ibid.* 1 266).

9. Attitude of Prophets. The attitude of the Hebrew prophets towards the wars of their people against a foreign foe was at first one of unquestioning sympathy. This was inevitable in consequence of the religious aspect of war above indicated. Elisha advises the allied monarchs of Israel and Judah to adopt a skilful ruse in their war against Moab (2 K. 4 15 *f.*), and on his deathbed he is greeted by Joash, king of Israel, with the same words 'The chariots of Yahwè and the horsemen thereof,' with which the prophet himself had greeted Elijah in the latter's closing hours (2 K. 2 12 12 14); and Elisha's last address to the king of Israel is one of passionate insistence on the need of persistent energy in prosecuting the war with Syria. More than a century later, Isaiah's powerful personality is Judah's strongest stay in the kingdom's darkest hour of conflict with Assyria. Towards the close of the eighth century, however, prophecy scanned more closely the religious and ethical aspects of national policy, and in the days of Jeremiah the divorce between nationalism and religion in its purest sense was complete, and the prophet saw nothing before the disordered and corrupt state but irrevocable doom. There gleamed also upon the distant horizon the vision of a pure, holy, and righteous rule, when men would 'beat their swords into coulters and their spears into pruning-knives' (Mic. 4 3 Is. 2 4), 'the image of Joel 3 10 reversed' (Cheyne), sustained also by the utterances of Is. 9 5 and 11 1-9; cp Zech. 9 10. These are the ideals which Christianity seeks to realise.

10. Metaphorical references. In the moral world there is a constant opposition between the powers of good and evil, both in the individual mental life and in the life of society. Both the Old and the New Testament, therefore, inevitably employ the material terms of earthly warfare as metaphors. God is repeatedly called a 'shield' in this world of strife (Gen. 15 1 Dt. 33 29 Ps. 5 12 59 11 84 9 11), or his truth (or faithfulness) is so called (91 4). These terms abound in the NT passages which deal with spiritual warfare. The apostle Paul is especially prone to their use (1 Cor. 9 26 2 Cor. 7 5 1 Tim. 6 12 2 Tim. 4 7 and in Eph. 6 11 *f.* [see Breastplate]). In the Book of Revelation, which moves in the language and ideas of Jewish apocalyptic and Messianic eschatology, we have a 'war in heaven' (πόλεμος ἐν οὐρανῷ) in which Satan and the Beast are finally quelled by God and his heavenly host, Megiddo being employed as the type of the great heavenly Armageddon (see Beyschlag, *NT Theol.* II. pp. 399-408).

11. War in Islām. War in Islām, on the other hand, is chiefly regulated by Ḳurān, *Sur.* 47, and is nothing but old Semitic warfare carried out beyond the distinctions of nationalism into that of believers and non-believers in the prophet. Allah is the Lord-protector of the faithful but not of unbelievers (*Sur.* 47 12). The Jihād should even be carried on against unbelievers during the four sacred months, while for all believers those months are exempt (*Sur.* 9 36 *f.*). Those who are slain in a Jihād have paradise as their reward (*Sur.* 47 5-7). See further Sell, *Faith of Islam*(2), 360 *f.*

12. Literature. The most important recent contribution is Schwally's *Semitische Kriegsaltertümer*, of which his first Heft, dealing with the religious side, has appeared. Especially important is his account of the taboos imposed during war, as well as of the apparatus of religious cultus in war. The writer, however, is somewhat in danger of finding religious motives connected with war where none such existed. See criticism by Volz (in *TLZ*, 13th Sept. 1902). Next in importance are the arts. 'Kriegswesen, etc.' by Benzinger in *PRE*(3), and § 72 in Nowack's *Heb. Arch.* (1 372 *f.*). Respecting war among the Assyrians the materials are found in the royal annalistic inscc. in Schrader's *KIB* i. and ii. For Egypt consult especially Erman's *Life in Ancient Egypt*, 20 (520 *ff.*).

WARD. See Prison. The words are:—

1. מִשְׁמָר, *mišmar*, Gen. 40 3 *f.*, מִשְׁמֶרֶת, *mišmèreth* (§ 1).
2. סוּגַר, *sūgar*, Ezek. 19 9† (§ 2 2).
3. פְּקִדֻת, *pekidūth*, Jer. 37 13† (§ 2 10).
4. τήρησις (§ 2 14).
5. φυλακή (§ 2 15).

WARDROBE, KEEPER OF THE (שֹׁמֵר הַבְּגָדִים; 2 K. 22 14, τοῦ ἱματιοφύλακος [BAL], 2 Ch. 34 22, φυλάσσουσαν τὰς ἐντολάς [BAL]), see Dress § 6, Huldah.

On 'vestry' (מֶלְתָּחָה) in 2 K. 10 22, see Dress, § 8, Vestry.

WARP (שְׁתִי), Lev. 13 48 *ff.* See Weaving.

WARS OF THE LORD [BOOK OF THE] (סֵפֶר מִלְחֲמוֹת יהוה), a book cited in Nu. 21 14 *f.* (E), according to RV, in the following terms. (We remove RV's poetical arrangement, however, and assume provisionally that the text of the formula of citation is correct; that the text of the passage quoted is not by any means correct, is maintained under Vaheb.) 'Wherefore it is said in the book of the Wars of the Lord, Vaheb in Suphah, and the valleys of Arnon, and the slope of the valleys that inclineth toward the dwelling of Ar, and leaneth upon the border of Moab.'

Kuenen gives the following brief statement of what is

WASHINGS, CEREMONIAL

supposed to be known respecting the 'book' referred to. 'Evidence of the date of the *Sepher Milḥamoth Yahwè* is supplied by the title itself: the "wars of Yahwè" are the wars of Israel against his neighbours in the period of the Judges, under David (1 S. 18 17 25 28), and later on. The collector of the songs referring to these wars presumably lived after their close, when Israel's heroic age was long gone by' (*Hex.* ET, p. 35, n. 5). According to Stade (*GVI* 1 50), the fragments of song in *vv.* 17*b* 18 and (probably) *vv.* 27*b*-30 come from the same source as *vv.* 14*b* 15. Dillmann, too, thinks it plausible to derive from this source *vv.* 17*b* 18 and perhaps also Ex. 15 1-19. The 'book' referred to was therefore, these scholars think, a collection of songs, similar to the Book of JASHER (*q.v.*), and its date is variously placed, in the time of Omri, about 900 B.C. (Stade), the latter half of the ninth century (E. Meyer, *ZATW*, 1881, p. 131), and the times of David and Solomon (Reuss, *Gesch. der heil. Schr. AT*(2), 172; Dillm.).

1. A historical song-book?

There is, however, only *one* express quotation from the 'book,' and it is not certain that it is poetical or even metrical.[1] Looking at the contents of the quotation, moreover, one would not judge it to come either from a history or from a collection of historical songs or ballads. Was the title of the 'book' really 'Wars of Yahwè?' 𝔊 at any rate did not so understand it, for it renders thus, *διὰ τοῦτο λέγεται ἐν βιβλίῳ*[2] [,] *Πόλεμος τοῦ κυρίου τὴν ζωοβ ἐφλόγισεν*. 'Another' version in the Hexapla agrees; it gives *διὰ τοῦτο εἴρηται ἐν καταλόγῳ τῶν πολεμούντων* ΠΙΠΙ [=יהוה] *πρὸς μὲν αυζαβ*. Nor is the title 'Book of the Wars of Yahwè' a probable one. It says either too much or too little. The phrase 'wars of Yahwè' occurs elsewhere (1 S. 18 17) of the wars of Saul, and (1 S. 25 28) of David in his earlier period. But can a historical work, such as a 'book of wars' must be supposed to be, have excluded the unsuccessful campaigns of the champions of Israel? 'Book of the Wars of Israel' is possible, but surely not the title which now stands in Nu. 21 14. What then is a possible title? The quotation suggests that it had reference to geography. Elsewhere (see VAHEB) it is maintained that the Jerahmeelite Negeb is the region spoken of, and we have reason to think that David, after conquering a large part of the Negeb, took a military census of its inhabitants (see TAHTIM-HODSHI). Both מלחמ[ו]ת and יהוה have sometimes arisen out of ירחמאל. The one word represents חמ[א]ל, the other ירח. Most probably the book quoted from by E in Nu. 21 14 was called *sêpher Yeraḥme'el—i.e.*, 'the book, or list, of Jerahmeel.' It was a geographical survey.

2. A geographical survey?

T. K. C.

WASHINGS, CEREMONIAL. On the subject generally see CLEAN (§§ 15 and 17) and SACRIFICE; cp also BAPTISM, JOHN THE BAPTIST.

The words for 'washing,' whether ceremonial or not, are:

1. רָחַץ, *rāḥaṣ*, Ass. *raḥāṣu*; *λούειν* (Ex. 29 4, etc.), *πλύνειν* (of the feet, Lev. 1 9 etc.), *νίπτειν* (of feet, Gen. 19 2 etc.; of hands, Ex. 30 21 etc.; of face, Gen. 43 31), *ἀπονίπτειν* (Prov. 30 12). Mainly in P

2. כִּבֵּס, *kibbēs*, *πλύνειν* (of garments, Ex. 19 14 Lev. 13 6 etc.), *ἀποπλύνειν* (of garments, 2 S. 19 24); Ass. *kabāsu*, to tread. See FULLER.

3. טָבַל, *ṭābal*, *βάπτειν*, 'to dip' (in blood, Lev. 9 9 14 51; in water, Nu. 19 18 [hyssop], 2 K. 8 15 [coverlet]; in oil, Dt. 33 24 [the feet], etc.). Cp MEALS, § 5.

4. דוּחַ, *dûaḥ* (in Hiph.), *ἀποκλύζειν* (of washing in the lavers, 2 Ch. 4 6), *πλύνειν* (burnt offering, Ezek. 40 38).

5. *βαπτιζόμενος*, Eccl. 34 30 ‖ Nu. 19 11 *f.*, מי נדה לא־זורק עליו.

6. *λουτρόν*, Ecclus. 34 30 [25], 'washing.'

7. *λούειν*, Jn. 13 10 (*ὁ λελουμένος*, RV 'he that is bathed').

8. *νίπτειν*, Mt. 15 2 Mk. 7 3 (hands) Jn. 13 5 etc. (feet) Jn. 9 7 (in healing).

9. *βαπτισμός*, Mk. 7 4 (cups).

It is well known that man in a primitive state, but at the stage at which he has become a religious being and some degree of reason has succeeded to what was little more than instinct, looks upon rivers, springs, and wells as the abodes of gods or as being themselves deities (cp SPRINGS).[3] To drink the water, to bathe in it, or merely to sprinkle the person with it, was to imbibe

1. Original ideas.

1 The arrangement in RV is misleading.

2 So BF; AL, *βίβλῳ*.

3 See Frazer, *Golden Bough*, and *Pausanias*; Grant Allen, *Evol. of the Idea of God*, 388 (cp 405); Clodd, *Primitive Man*, 182 *ff.* Cp WRS, *Rel. Sem.*(2), 135.

or to cover oneself with a divine and mysterious power. Bathing was a religious act. Water therefore was holy. Further evidence for the idea that a more than natural power was inherent in water would be seen in the refreshing, and sometimes healing, effect of this act. Water was refreshing and healing because it was holy. When a reason was sought for the fact that water cleansed, the explanation would again be the same: it cleansed because it was holy.[1] Then, water is looked upon as purifying, as washing away impurities or cleansing from a taboo; and finally the frequent use of water becomes a social and sanitary, as well as a religious act. The order of ideas can hardly have been otherwise. Primitive man fears water, therefore makes a god of it, worships it (cp *religio*); this fear must have been overcome before he could make frequent use of it for other than strictly religious purposes.

Benzinger tells us (*Heb. Arch.* 108) that in the ablutions of the Hebrews it is often difficult to distinguish between the washings performed purely for the sake of the body, and such as were purely religious. That is no doubt because originally no distinction was made. The Hebrews, however, when we make their acquaintance, had already forgotten the true origin of ablutions; it is the second idea that now prevails: cleansing or washing is a holy act, and water is holy because it cleanses.[2] In this sense for the most part ablutions play an important part in the religious and social life of the Hebrews, as in that of their neighbours (Egyptians, Arabians, etc.).[3]

2. Among the Hebrews.

The next step is for ceremonial washings to become symbolical. 'Water and fire,' says Jastrow, 'are the two great sources of symbolical purification that we meet with in both primitive and advanced rituals of the past' (*Rel. of Babylonia and Assyria*, 276). Thus amongst the Jewish ESSENES (*q.v.* § 4; cp De Quincey, *Works*, vol. vii.), as already amongst the Babylonians (Jastrow, 276; see also RITUAL, § 10) and Persians (see ZOROASTRIANISM, § 16), washing as a religious act received quite a special importance.[4]

The ablutions of the Jews may be divided, as far as it is possible now to distinguish them, as follows:—(1) The purely religious (magical)[5] (2 K. 5 10 cp Jn. 2 97). In these we can still detect the primitive idea. (2) The purely ritual, which were suggested by the first. In these the idea is now that of purification. Under this heading come (*a*) washings of initiation and consecration (Lev. 8 6). With this is connected the washing or baptism of the Jewish PROSELYTE (*q.v.* § 5). (*b*) Washings with a view to the performance of a sacred function (Ex. 30 17-21). The Egyptian priests, too, were required to bathe frequently in cold water (cp Herod. 2 37; also the Mohammedan *Wadu*).[6] (3) The semi-ritualistic washings for the purpose of cleansing from uncleanness. Examples are: Lev. 13 6 34 54-58 (leprous garments), 14 47 (clothes after contact with leprous house), 14 52 (house—with running water), 15 6-8 10 *f.* 13 16 *f.* (clothes and person), 15 12 (earthen vessel; wooden vessel) 15 18 (person), 15 22 27 (menstruous contact; cp Doughty, *Ar. Des.* 1 572); in D, Dt. 21 1-9 23 9-11; in JE, Ex. 19 10-15. Besides these, there arose (4) the purely social usage common to all eastern peoples. The hot climate and the wearing of sandals[7] made the practice

3. Occasions.

1 The writer in Schenkel (*BL*, *s.v.* 'Waschen') reverses the order of ideas. As a preparation for contact with holy things, the body must be cleansed. Because water was used for the purpose, streams, etc., were worshipped and men bathed in them as a religious act.

2 At a much later date, however, to perform ablutions was not always considered a virtue. Cp Stanley, *Christian Institutions*, 6 *f.*: 'Cleanliness is a duty which some of the monastic communities of Christendom have despised, and some have even treated as a crime;' also Socrates, *HE* 4 23.

3 For the Egyptians, cp Wilkinson, *Anc. Egyptians*, 2 48. For the modern Arabians, see Doughty, *Ar. Des.* 1 250; where water is lacking or scarce they use sand (cp Doughty, 1 536; Benzinger, *HA*, 108 note), but the act is here no doubt symbolical.

4 For the Greek practice see Hesiod, *Op. et Dies*, 722.

5 See Th. Frede, *Wunderglaube im Heidentum und in der alten Kirche*, 59 *f.*

6 For Mohammedan usage, see, further, Ḳoran *Sura*, 5 8, and Hughes, *Dict. of Islam*, under 'Ablution.'

7 The writer in Schenkel adds other reasons for washings of the clothing, of the whole body, or of particular parts of it in the East—viz., on account of the desert sand, and particularly as a protection against cutaneous diseases.

of feet-washing important, and the offering of water for the purpose a common mark of hospitality (Gen. 18 4 19 2 24 32). To the same category probably belong the washings before (Mt. 15 2) and after meals (*Berachoth* 8 4), on which see MEALS, § 5.[1]

To the first of the social usages (§ 3 [4]) Jesus no doubt conformed. The fourth gospel, which has to be used with the greatest caution, even tells us that he himself washed his disciples' feet (Jn. 13 2). To the second social usage, however, he seems to have attached little importance (Lk. 11 38). We are also told that he submitted to a ritual washing or baptism, and further showed his approval of such an act by making it a Christian institution. As, however, such a rite would be contrary to the general tenor of his teaching, so far as we can gather it from our imperfect sources (cp Tolstoy, *The Kingdom of God*, chap. 3), and cannot be certainly inferred from the passages in the Gospels which are generally adduced as evidence (see O. Holtzmann, *Leben Jesu*, p. 411; cp, on the other hand, BAPTISM), its adoption by Jesus himself must be considered extremely doubtful.[2] Moreover, Paul, or the Pauline school, does not mention it as an institution of Jesus. 1 Cor. 1 17 even makes Paul say 'Christ sent me not to baptize, but to preach the gospel' (cp Ernst von Dobschütz, *Die Urchristlichen Gemeinden*, 22 *f.*). Feine, indeed, thinks that Paul implies it, while not actually mentioning it because it was not a matter of controversy in the apostolic church (*Jesus Christus und Paulus*, 243). And Dreschen (*Das Leben Jesu bei Paulus*) takes a very similar view. But almost anything might be implied (or read into) the NT, and the simplest conclusion is that it had not yet become a Christian institution. It has been contended that the rite was a natural development of the Jewish practice of baptizing the proselyte (see Stanley, *Christian Institutions*, 5; cp Tylor, *Primitive Culture*, 2 440 *ff.*) or of the ceremonial washings of the Essenes (see E. Plauta Nesbit, *Christ, Christians, and Christianity*; De Quincey, *Works*, vol. vii.). The second suggestion is unnecessary (see von Dobschütz, p. 105). As to the first, it is much more probable that the rite, as in the case of the Eucharist,[3] was taken over from the Pagans.

4. Washings in NT.

This, with other rites, was adopted at a time when the new sect was trying to win over converts among the Gentiles, and when the gap between Judaism and Christianity had widened. With that wonderful power of adapting itself which it once had, the new religion admitted the pagan ceremony of initiation.[4] Cp ROME.

M. A. C.

WASHPOT, a term of abuse applied to Moab in the expression 'Moab is my washpot' (מוֹאָב סִיר רַחְצִי; ΜΩΑΒ ΛΕΒΗΣ ΤΗΣ ΕΛΠΙΔΟΣ ΜΟΥ; similarly Vg.; רְחַץ in Tg. = Heb. בָּטַח 'to trust'); Ps. 60 8 [10] 108 9 [10]. The commentators refer to the story told of Amasis (Herod. 2 72), or to the custom of Persian kings of having a footpan carried in their train when in the field. The latter illustration is preferred by Delitzsch.

This base image, however, is surely due to corruption of the text. Both סיר and רחצי are corruptions of מְצוּר, Miṣṣur, or of אַשְׁחוּר, Ashḥur. See Che. *Ps.*(2), *ad loc.*, and cp MOAB, § 14 ('Moab' and 'Miṣṣur' liable to confusion).

WASP (ΣΦΗΞ), Wisd. 12 8 AV, also RVmg., RV HORNET (*q.v.*).

WATCH (מִשְׁמָר), Neh. 7 3. See GUARD, 3.

WATCHER (עִיר, *'īr* [Aram.]; ΑΓΓΕΛΟΣ [𝔊87] ΕΙΡ [Theod.]; ΕΓΡΗΓΟΡΟΣ [Aq. Sym.]; *vigil*, in the Gk. Enoch ΕΓΡΗΓΟΡΟΣ); Dan. 4 10 14 [om. 𝔊] 20 [13 17 23]. The term reminds us of the שֹׁמְרִים, *šōmĕrīm* (Is. 62 6) whom Yahwè charges to watch over the ruined walls of Jerusalem, and to remind him of their sad condition. We find it again in Enoch and in Jubilees. In Enoch it is used in a double sense. In 1 5 10 9 15 12 2 4 13 10 14 1 3 15 2 16 1 2 91 15 it designates the fallen angels; in 20 1 39 12 13 40 2 61 12 71 7 it belongs to the archangels. In Jubilees 4 15 (cp 8 3 10 5), in the explanation of the name Jared (which agrees with that given in Enoch 6 6, except that Mt. Hermon is not mentioned as the place on which they descended) it is said, 'in his days the angels of the Lord descended on the earth, those who are named the *Watchers*, that they should instruct the children of men, and that they should do judgment and uprightness on the earth.' A myth of the watchers which differs somewhat from that in the Ethiopic Enoch is given in the Slavonic Enoch (18 3 cp 6 3; see Charles's notes in *Secrets of Enoch*); they are there called the *Grigori* (ἐγρήγοροι). In the Book of Adam and Eve (6th cent. A.D.) the watchers are also represented as the fallen angels, who, as long as they preserved their virginity, were called the 'sons of Seth.' See Charles's very full note on Jubilees 4 15.

WATCHES OF THE NIGHT. See DAY, § 4.

WATCHTOWER (מִצְפֶּה, *miṣpeh*; Is. 21 8). Cp MIZPAH, MIZPEH. For בַּחַן, *báḥan* (Is. 32 14†) and מִגְדָּל, *migdāl*, see TOWER. In Is. 2 16 RVmg. has 'pleasant watch-towers' for שְׂכִיּוֹת הַחֶמְדָּה, *śĕkiyyōth haḥemdāh* (AV 'pleasant pictures,' RV 'pleasant imagery'); but see 'Isa.' *SBOT* (Heb.), note *ad loc.*, and *Crit. Bib.*

WATER (מַיִם). On the 'holy' or 'bitter' water, called also the 'water of purifying' (AV) or 'of expiation' (RV) of Nu. 8 7 *ff.* see JEALOUSY [TRIAL OF]; on the water of 'separation' or 'of impurity' (RVmg.) in Nu. 19 9, see CLEAN AND UNCLEAN, § 17

WATERCOURSE. 1. *tĕ'ālāh*, תעלה, see CONDUITS, § 2.

2. *péleg*, *pĕlaggah*, פלג, פלגה, see RIVER, 5.

3. *mōṣā máyim*, מוצא מים, 2 Ch. 32 30 AV. See SPRINGS, § 2 [6], and cp GIHON.

4. *ṣinnōr*, צנור, 2 S. 5 8 RV, AV 'gutter'; meaning doubtful.

WATERPOT (ΥΔΡΙΑ), Jn. 2 7. Cp POTTERY, § 3 (1).

WATERS OF MEROM (מֵי־מֵרוֹם), Josh. 11 5 7. See MEROM [WATERS OF].

WATERSPOUT. (1) צִנּוֹר, *ṣinnōr*, Ps. 42 7 (RVmg. 'cataract'). Cp WATERCOURSE, 4. (2) תַּנִּין, *tannīn*, Ps. 148 7 RVmg. See SERPENT, § 3 *f.* n. 2; WHALE.

WAVE LOAVES (לֶחֶם תְּנוּפָה), Lev. 23 17. See SACRIFICE, § 34 *b*. **WAVE OFFERING** (תְּנוּפָה), Ex. 29 24. See SACRIFICE, § 14, and cp CLEAN AND UNCLEAN, § 3.

WAX (דּוֹנַג, *dōnag*; ΚΗΡΟΣ), Ps. 22 14 [15] 68 2 [3] 97 5 Mic. 1 4; also Judith 16 15 Ecclus. 24 20; also Ps. 58 8 [9] 𝔊 (see SNAIL, 2), Is. 64 1 [2] 𝔊BNAQ; and possibly Ezek. 27 17 (emended text; so Co.; but see PANNAG), and Ps. 118 12 [see 𝔊]. Beeswax, which is secreted by

[1] Cp, further, Kohler's art. 'Ablution' in the *Jewish Encyclopædia*.

[2] Colenso (*Natal Sermons*, 1866, No. 10) thought that 'the command in Mt. 28 19, "Go ye therefore, and teach all nations, baptising them in the name of the Father and of the Son and of the Holy Ghost," would be conclusive as to the fact of his having directly enjoined the practice, were it not that this formula, with its full expression of the name of the Trinity, betrays the later age in which the passage in which it occurs was most probably written.' Conybeare has recently shown (*ZNTW*, 2 275 *ff.* [1901]; cp *Hibb. Journ.* 1 102 *ff.*) very strong reasons for believing that the mention of the three Persons in the Trinity is not original (cp col. 3270 [top]). The passage as it stands, therefore, seems to have been edited for liturgical purposes, and it is likely that in the first instance there was no reference whatever to baptism. Apart from this we have no evidence, as Colenso again says (*ibid.* No. 9), that any of Jesus' disciples were baptised.

[3] This again has been looked upon as a development of a Jewish practice. See, especially, G. H. Box in the *Journal of Theological Studies*, 3 357-369, who thinks that the Last Supper was not a Passover, as is commonly supposed, but the weekly *Ḳiddūsh*, a service in the house.

[4] Cp Grant Allen, *Evol. of the Idea of God*, 388 405; Clodd, *Primitive Man*, 182 *ff.*; J. M. Robertson, *Short Hist. of Christianity* (see Index).

all honey-bees and formed into the cell walls of their comb is intended. It melts at 144° F. See BEE.

WAY. On 'the way' (Η ΟΔΟC), Acts 9 2, etc., see HERESY, § 1.

WAYMARK (צִיּוּן), Jer. 31 21 [20]. See MASSEBAH, § 1 *e*, col. 2978; also *Crit. Bib.*

WEAPONS. Cp WAR. Hebrew uses the general term *kēlīm* (Gen. 27 3), which means simply instruments or implements. In 1 S. 20 40 AV renders by the more ambitious word 'artillery.' In the NT (Jn. 18 3 Rom. 6 13 2 Cor. 10 4) the common Greek term ὅπλα is employed.

1. In general. Naturally at first any implement or instrument would be used as a weapon, a club or a STAFF ([*q.v.*]; cp Darwin, *Descent of Man*, 81 [1890]). But the natural weapons of the lower animals (horns, etc.; see Darwin, 500 *ff.*) would soon suggest to man the use of something more effective. Later, it is possible that one at least of the agricultural implements, the sickle (see AGRICULTURE, § 7, with figs.), gave rise to the scimitar or SWORD (*q.v.*). This would add force to the words in Is. 2 4. In no art, perhaps, has more ingenuity or more rapid progress been shown than in that of the manufacture of weapons (see Herbert Spencer, *Principles of Sociology*, 1(3) 59). As the Hebrews had no doubt to wage war continually, it would be no matter for surprise if they had displayed some skill in this art at quite an early date. Later, they would also be quick to note and to copy the equipment of more advanced neighbours (*e.g.* Canaanites, Egyptians, Assyrians, etc.), who realised more fully the value of well-equipped, organised, and disciplined armies. See ARMY and cp WAR. The more primitive weapons of offence, however, such as the CLUB (see STAFF) and SLING (*q.v.*) were perhaps never entirely displaced by the SWORD and DAGGER (see SWORD), JAVELIN (*q.v.*), BOW (see below, § 2), and SPEAR (*q.v.*); and instruments with flint edges or points, as has frequently happened, no doubt continued to be used side by side with those of metal. Of defensive weapons, a SHIELD (*q.v.*) of some kind was probably in use at a very early date; but we also hear in the OT of BREAST-PLATE, GREAVES, and HELMET (*qq.v.*).

2. The bow. On Egyptian and Assyrian monuments one of the weapons most commonly represented is the BOW (see CHARIOT, SIEGE, WAR).

The Hebrew term is קֶשֶׁת, *ḳéšeth*. With this are of course connected the ARROW, חֵץ, *ḥēṣ*, and the case for carrying it, תְּלִי, *tĕlī* (Gen. 27 3), or אַשְׁפָּה, *'ašpāh*—*i.e.*, the QUIVER (*q.v.*; cp also CHARIOT). This seems to have been one of the earliest of the more elaborate weapons. The throwing of a small SPEAR (*q.v.*) or DART, שֶׁלַח, *šĕlaḥ* (2 Ch. 32 5 AV, RV 'weapons'; cp Joel 2 8),[1] with the hand would soon give rise to a mechanical instrument (cp SLING), to which the dart would be suitably adapted, feathers being added to increase its flight (cp Tylor, *Anthropology*, chap. 8).[2] In this way we get the ARROW. The bow was commonly made of reed, wood, or horn. The Israelites used it both in war (Gen. 48 22), and in the chase (21 20); and seem to have bent it with the foot (for the Egyptian practice, see Wilkinson, *Anc. Eg.* 1 203). The strings, מֵיתָרִים, *mēthārīm* (Ps. 21 12), were probably made of gut or hide. Here we seem to have a case in which an implement of war suggested an instrument of music (see MUSIC, § 2; cp Tylor, *Anthropology*, chap. 12). According to the AV of 2 S. 1 18 David 'bade them teach the children of Judah [the use of] the bow' apparently an irrelevant notice where it stands in 2 S.; hence RV substitutes 'song' for 'use.' The remedy, however, seems inadequate, and it is open to methodical textual critics to devise something more radical and effective. See H. P. Smith, *ad loc.*, and cp *Crit. Bib.* The bowmen of Elam (Is. 22 6 Jer. 49 35, if the text is correct), of Kedar (Is. 21 17), and of an unnamed people from the land of צפון (Jer. 6 23) are specially mentioned in the OT.

1 Other words rendered DART are: שֵׁבֶט, *šēbeṭ*, 2 S. 18 14 EV, RVmg. 'staves,' see STAFF; תּוֹתָח, *tōthāḥ*, Job 41 29 [21] AV, RV 'clubs,' but see JAVELIN, 2; מַסָּע, *massā'*, Job 41 26 [18] EV; חֵץ, *ḥēṣ*, Pr. 7 23 AV, RV 'arrow' (see above); τὰ βέλη, Eph. 6 16; and βολίς, Heb. 12 20 (but the clause should probably be omitted; see Ti.).

2 In other respects the construction was no doubt similar to that of the SPEAR (*q.v.*).

WEASEL (חֹלֶד;[1] ΓΑΛΗ; *mustela*), the name of an unclean animal, Lev. 11 29† (EV, 𝔊, Targ. Jon.; Pesh., Vg., and most Rabbins). There is some little doubt, however, whether the weasel is really referred to, and various interpreters (Saadia, Bochart, Lag. *NB* 144) have preferred on philological grounds[2] the rendering 'mole' (but see below). The weasel is an animal hardly ever eaten, and its long body and short legs might be urged as justifying its position 'among the creeping things that creep upon the earth.'

Zoologically weasels are placed with the pole-cats, martens, and others in the family Mustelidæ of the order Carnivora. One species of each of the above-mentioned animals is recorded by Canon Tristram from the Holy Land. The southern weasel, *Mustela boccamela*, is found about Mount Tabor and probably in other wooded districts; the pole-cat, *M. putorius*, lives under Hermon and Lebanon, and the white-breasted or beech marten, *M. foina*, in the neighbourhood of Beyrout. It is unlikely that the Hebrews distinguished between these species, though from its habits and habitat they may have separated off the otter, *Lutra vulgaris*, which is common on the shores of the sea of Galilee.

WEAVING

Raw products and their preparation (§ 1).
Spinning (§ 2).
The horizontal loom (§ 3).
Two types of upright loom (§ 4).
Technique and terminology of weaving (§§ 5-8).
Warping (§ 5).
Shedding (§ 6).
Passing and beating up of weft (§ 7).
Direction of web (§ 8).
Final processes (§ 9).
Pattern and figure weaving (§ 10).

In the present study of the art of weaving as practised by the Hebrews from the earliest times to the opening centuries of our era it is proposed (1) to glance briefly at the raw materials and the manner of their preparation for the loom, which will include the process of spinning; (2) to explain the construction and *modus operandi* of the loom itself; and (3) to close with brief references to the further processes through which the web had to pass after leaving the loom, and to the more obscure subject of pattern and figure weaving.

1. The raw products and their preparation.[3] Throughout the whole period of their national existence, the needs of the Hebrew households in the matter of textiles were supplied for the most part by WOOL and FLAX (*qq.v.*)—frequently mentioned together in OT, Hos. 2 5 Prov. 31 13, etc.—with the addition, for coarser textures, of the HAIR (*q.v.*) of goats and camels, and, in the latest periods of their history, of COTTON and SILK (*qq.v.*). In an interesting passage of the Mishna treatise *Shabbāth* (7 2), among the various categories of work forbidden on the Sabbath—'forty save one' in number (cp 2 Cor. 11 24)—we find an enumeration of the chief processes in the manufacture of woollen cloth, including 'shearing, scouring, teazing, dyeing, spinning, warping, attaching the leashes to the leash-rods (for these technical terms, see below, § 5 *ff.*), weaving,' etc.

The fleece (גִּזַּת הַצֶּמֶר, Judg. 6 37), according to the statement in the Mishna, was first scoured (לִבֵּן) to remove impurities and restore the original white colour (hence the term), after which it was thoroughly teazed (נִפֵּץ) and carded (סָרַק) with a carding comb. The latter operation is done at the present day in the wool bazaars of the Levant (cp Jos. *BJ* v. 8 1 [§ 331] for an ἐριοπώλιον in Jerusalem, the שׁוּק שֶׁל צַמָּרִים of *Erub.* 10 9) by means of a bow and its string. At this stage the wool might

1 For proper names possibly derived from the name of this animal see HELED, HELDAI, HULDAH.

2 Cp Ar. *ḫuld*, Syr. *ḥūldā*, 'mole,' and חוּלְדָּה, an animal often mentioned in the Talm. (see Di. *ad loc.* A connection with חלד which means 'penetrate deeply' [cp החליד in Talm., 'to plunge in the sacrificial knife'], is probable); Lewysohn, *Zool. Talm.* 101, and Hommel, *Säugethiere*, 337. It is, however, to be observed that, now, at any rate, no true mole occurs in Palestine. See MOLE. On a later Heb. word for weasel, see col. 1210 n. 1.

3 The standard work on this subject is still *Textrinum Antiquorum, an Account of the Art of Weaving among the Ancients*: Part 1 [all published]: 'On the raw materials used for weaving,' by James Yates, 1843.

be dyed, or this process might be deferred till after the spinning or even until it could be dyed 'in the piece' after leaving the loom.

In the case of flax, we can follow the similar processes by the help both of literary references (Mishna, *passim*; Pliny, *HN* 19 3 etc.), and of the graphic representations on Egyptian tombs (see Yates, *op. cit.* [n. 3, above], pl. 7; Wilkinson, *Anc. Eg.* 2 173). Here we see the stalks being pulled up by the roots, laid in order and rippled with a rippling-comb, or beaten over a stick to free them from the seed capsules. After being exposed on the flat roof (see Josh. 2 6) or elsewhere until thoroughly dry, they were steeped in a trough to separate the inner fibres from the woody portions of the stalk, a process technically known as 'retting.' The stalks thus macerated were again dried in the sun or in an oven (*Shabb.* 16), and then beaten with a wooden mallet (Pliny's 'stupparius malleus') to complete the separation of the inner fibres. In the earliest period these fibres were sorted by the hand (Erman, *Egypt*, 450); later they were 'heckled' or combed by means of a comb (מַסְרֵק שֶׁל פִּשְׁתָּן, illustr. Wilkinson, 2 174), by which the longer and finer fibres were separated from those of inferior quality. Women as well as men were engaged in this process of heckling the flax, as appears from Is. 19 9, where the שְׂרִיקוֹת of MT (AV 'fine flax,' RV 'combed flax'; cp Symm. κτενιστόν) should be read שׂוֹרְקוֹת, the flax-combers (Vg. *pectentes*).[1] Linen was preferably worn in its native whiteness; but, if required, the flax might be dyed before being spun, as in the case of the Tabernacle curtains (Ex. 35 25), or the dyeing might be postponed to a later stage as explained above for wool. To judge from an incidental remark in *Bābā Ḳamma* 10 9, woollen garments were more favoured in Judæa, whilst Galilee preferred linen.

Goats' hair was employed for textures of the coarser sort, especially for the garb of mourning (see SACKCLOTH),[2] and like camels' hair was often mixed with sheep's wool (*Kĕlaim* 9 1). In later times COTTON and SILK (*qq.v.*) (Rev. 18 12 but not Ecclus. 45 10 [AV], see RV, nor Am. 3 12 [RV]) were introduced; the *hindewīn* (הנדוי, *Yōma*, 3 7) or Indian fabrics worn by the high priest were undoubtedly of cotton. To these the Mishna adds hemp (קַנְבּוֹס, κάνναβις—but the 'hempen frock' of Ecclus. 40 4 RV is an incorrect rendering of ὠμόλινον for which see below, § 9) and the fibres of a species of mussel, for which see Yates, *op. cit.* 152 *ff.*

2. Spinning. Whilst among the Hebrews, as among the Egyptians, both men (Ex. 35 35 1 S. 17 7 [and ||s], 1 Ch. 4 21) and women (Judg. 16 13 *f.* 2 K. 23 7 Prov. 31 24 1 Esd. 4 17; cp Jos. *BJ* i. 24 3 ἅμα ταῖς δούλαις) plied the loom, the art of spinning was peculiarly a feminine accomplishment (Ex. 35 25 *f.* Prov. 31 19 Tob. 2 11). The apparatus for spinning (טָוָה; νήθω Mt. 6 28 Lk. 12 27) both wool and flax consisted of the distaff (*kīšōr*, כִּישׁוֹר [see *BDB s.v.*] Prov. 31 19 RV; AV spindle—in the Mishna אַמָּה, ἠλακάτη, *colus*) and the spindle (*pélek*, פֶּלֶךְ, Prov. *l.c.* RV; AV 'distaff,' ἄτρακτος, *fusus*; Mishna, פּוֹשׁ). In 2 S. 3 29 we should render 'that holdeth the spindle' (Vg. *tenens fusum*) for 'that leaneth on a staff' (EV) [though here—see STAFF—the suitableness of the reading has been disputed].[3] The distaff generally consisted of a piece of cane round the open head of which the wool or flax was wound. It is held in the left hand or fixed in the girdle, while the spinner draws out and twists the yarn between the finger and thumb of the right hand,[4] with which also the spindle is kept rotating. The spindle consisted of three parts (see Maimon. on *Pārā* 12 8 ap. Surenh. *Mishna*): a hook by which the thread from the distaff was fastened, the wooden shank, 9-12 inches in length, and the circular or spherical whorl of clay, stone, or other heavy material which served to steady the rotatory motion of the spindle.[1] (For illustration of early Palestinian spindle-whorls see Bliss, *A Mound of Many Cities*, 82, cp 80.)

[1] So modern edd. For the technical process disguised under the following שחותה see below, § 5.

[2] For the variety of haircloth named by the Romans *cilicium*, and its interesting association with Paul, see CILICIA, § 3.

[3] From the original significance of the root פלך in Semitic, viz. 'to be round, globular,' *pélek* must originally have signified the round or spherical whorl with which the spindle was weighted, as the cognate fem. form still does in Arabic, then by metonymy the whole spindle (see Driver, *TBS* 192 *f.*). Cp DISTRICT, 1.

[4] Cp Jerome, *Ep.* 150 15 'habeto lanam semper in manibus, vel staminis pollice fila deducito,' etc.

The word 'yarn,' in Heb. מַטְוֶה (Ex. 35 25, lit. that which is spun [טָוָה], cp 𝔊 νενησμένα), occurs in AV only 1 K. 10 28 2 Ch. 1 16 as a curious rendering of מקוה, in which recent editors are unanimous in finding the name of the district of Ḳuē in Asia Minor (see MIZRAIM, § 2 *a*; and Benzinger and Kittel *ad loc.* but cp CHARIOT, § 5, col. 726, n. 1, and *Crit. Bib.*). It is introduced by the revisers in Prov. 7 16 as the rendering of the obscure אֵטוּן (for which see LINEN, 1), and Ezek. 27 19 where most scholars would read as in RVmg. 'from UZAL' (*q.v.*).

The art of spinning was carried to perfection in Egypt even under the earlier dynasties. Much of the linen used as wrappings for the royal mummies is composed of threads of almost incredible fineness. Thus it has been calculated that the bandages in which the hands of Thotmes III. were enveloped, and which shows about 150 threads of warp and 75 of weft to the square inch, was woven from yarn so fine that 60 miles of it would only weigh one pound avoirdupois (reduced to English measures from Braulik, *Altägypt. Gewebe*, 6; cp Birch's note, ap. Wilk. *op. cit.* 2 162). Such gossamer threads, however, cannot be identified with those of the 'fine twined linen' (*šēš mošzār*, שֵׁשׁ מָשְׁזָר) of Ex. 26-28 36-39, as a fabric of this sort would be entirely out of place as curtains for the court of the tabernacle (for the most probable explanation of the term, see LINEN, § 7).

3. The horizontal loom. Probably no department of the technology of antiquity is so beset with difficulties as that which deals with the art of weaving.

After all that has been done by Blümner (*Technol. u. Terminol. der Gewerbe*, etc., 1875) and Marquardt (*Privatleben der Römer*, 1879) for the Greek and Roman looms, by Braulik (*Altägyptische Gewebe*, 1900) for those of Egypt, and by Rieger (*Versuch einer Terminol. u. Technol. der Handwerke in der Mishna*: 1 Th., Spinnen, Weben, etc., 1894) and others, there remains much that is uncertain, not only as regards the terminology and *modus operandi*, but even as regards the details of construction. Were the ancients, for example, familiar with the mechanism of the treadles? Was the horizontal or low loom in use among the Romans of the republic and early empire? To the latter question Blümner and Marquardt reply in the affirmative, whilst Ahrens (*Philologus*, 35), Rich (in his excellent *Dict. of Gk. and Rom. Ant.*), Yates and Marindin (in Smith's *Dict. of Gk. and Rom. Ant.*,(3) *s.v.* 'tela') present a good case for the exclusive use of the upright loom. Certainly no monumental representations of the horizontal loom, or for that matter few of the upright loom, have come down to us from classical antiquity.

Treating the question from the point of view of the history of man's progress in the arts of civilisation, we find that weaving is merely a development of the art of plaiting, and has been correctly defined by Plato as πλεκτικὴ κρόκης καὶ στήμονος ('a plaiting of weft and warp,' cited by Marq. *op. cit.* 504). More precisely, the art of weaving, in its simplest form, consists in intersecting a series of parallel threads, called the *warp*, at right angles by another set of threads called the *weft* or *woof*, in such a way that each weft thread shall pass alternately over and under each of the warp threads. In plaiting, this interlacing is done by hand, and even at the present day in some parts of Arabia and N. Africa —no doubt also among many other half-civilised tribes —the art of weaving has not advanced beyond this stage. The late E. H. Palmer thus describes the very primitive work of an old Bedouin woman in the neighbourhood of Jebel Mūsa. 'On one of these occasions I noticed an old woman weaving at the tent-door. Her loom was a primitive one, consisting only of a few upright sticks upon which the threads were stretched;

[1] For illustration of Egyptian distaffs and spindles see Wilk. *op. cit.* 2 172; Gk. and Roman ap. Blümner, *Technologie*, etc. 1 118 *ff.*, and the Dicts. of Class. Antiq. *s.vv.* 'colus' and 'fusus.'

the transverse threads were inserted laboriously by the fingers, without the assistance of a shuttle, and the whole fabric was pressed close together with a piece of wood. Beside her stood a younger female spinning goats' hair to supply the old lady with the materials necessary for her task' (*The Desert of the Exodus*, 1 125). Between this incident and the first representations of the horizontal loom by Egyptian artists, there stretches a period of nearly 5000 years. Even at that early period, however, and, as the textile remains abundantly prove, for at least a millennium previously, the inventive genius of Egypt, which, according to Pliny, taught the ancient world the art of weaving, had furnished the loom with the apparatus necessary for more expeditious work. Putting aside the case illustrated by Wilkinson (*Anc. Eg.* 2 170), which furnishes no indication of any appar-

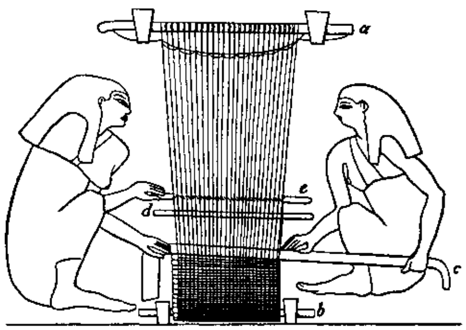

FIG. 1.—Women weaving

atus beyond a simple frame, and is therefore, in all probability, a case of mat-plaiting, we may take the familiar representation from the tombs at Beni Ḥasan of the two women squatting on the ground and engaged in the process of weaving (Wilk. *op. cit.* 1 317, Erman, *Anc. Eg.* 448, after Lepsius; Moore's 'Judges,' *SBOT* Eng., 86; Braulik, *op. cit.* Figs. 89-91, pp. 59 *ff.*). Till recently, it was assumed that this picture, which dates from the middle empire, represented an upright loom. It is evident, however, that this is a mistake due to the absence of perspective in Egyptian drawing. The loom is horizontal with a yarn-beam *a*, and a cloth-beam *b*, each fixed to the ground by a couple of wooden pegs. Between the beams the warp is stretched, and, if we can trust the artist in this detail, the cloth-beam is capable of revolving and winding up the finished web. The remaining parts of this instructive representation will require a more detailed examination in a subsequent section (§ 6).

Now, when we consider the antiquity and prevalence of the horizontal loom in Egypt,[1] and its prevalence in a variety of forms throughout the E., from Africa to India, at the present day,[2] it would be strange if the Hebrews were unacquainted with it. We have, however, no explicit testimony to the form and construction of the early Hebrew loom. Still, a study of the well-known passage which will engage our attention when we come to deal with the terminology of weaving (§ 7)—shows that the probabilities of the case are in favour of Delilah's loom being of the horizontal type. The operation of weaving the hair of a person asleep on the ground into the warp could be much more easily and naturally done on a horizontal loom such as that shown above.[1]

4. The two types of upright loom.

Of the upright loom, which consists essentially of two upright posts joined at the top by a cross-beam, the *jugum* of the Roman loom (for this view of the *jugum* see Smith's *Dict. of Gk. and Rom. Ant.*[(3)] 2 765), there are two main types, regarding which it is difficult to say which is the older. (1) There is first the type familiar to classical students from the representation of Penelope's loom on a Greek vase of the fifth century B.C. (see ill. *EB*[(9)] 23 206; Blümner, *op. cit.* 1 357, and often elsewhere), the distinguishing feature of which is the absence of a cross-beam below, the warp threads being kept taut by a series of small stone weights attached either to the individual threads, as in the case just cited, or to bundles of threads, as in the comparatively modern Icelandic loom (ill. Smith, *op. cit.* 2 766, less complete in Rich, *s.v.* 'tela'). The Roman looms were also of this type, as were those of the lake dwellers of Switzerland in the neolithic age (Buschan, 'Die Anfänge u. Entwickelung der Weberei in der Vorzeit' in *Verhandlg. d. Berlin. Ges. f. Anthropologie*, etc., 1889, pp. 227 *ff.*). In one of the strata of the mound of Tel-el-Ḥesy (*circa* 500-400 B.C.), Dr. Bliss found a large number of objects, some round, some pear-shaped, of unburnt brick, which he considers to have served as weaver's weights (*A Mound of Many Cities*, 113). On this view we must admit the existence of this type of loom in Palestine, although it has not yet been found in Egypt.

(2) The other type of upright loom is characterised by the presence of a second cross-beam below. Where, as usually in Egypt according to Herodotus (2 35), the web was commenced at the bottom of the loom, such a beam was indispensable and served as a cloth-beam; where, as was presumably the case in Palestine, the web was 'woven from the top' (Jn. 19 23), the lower beam served as the yarn-beam. In either type of upright loom, however, an additional cross-beam might be provided—usually constructed so as to revolve, thus rendering it possible to weave a length of web greater

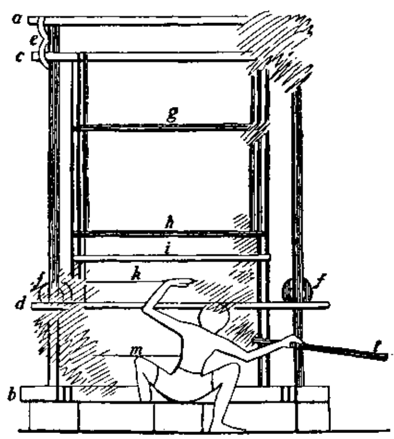

FIG. 2.—Upright loom. From Wilkinson, *Anc. Eg.* 2 171.

than the height of the loom—as is the case in the earliest representation of an upright loom that has come down to us by an Egyptian artist of the new empire (here reproduced from Wilk.-Birch, *op. cit.* 2 171).

This picture is unfortunately imperfectly preserved, and the details of the construction are in several points uncertain. The weaver sits on a bench in front of his

[1] The apothegm dating from the twelfth dynasty, quoted by Braulik (*op. cit.* 89)—'the weaver is more unfortunate than a woman, he has his knees for ever reaching to his chin'—proves, as he rightly observes (1) that men as well as women exercised the art, and (2) that they worked in a squatting attitude, and therefore, like the women of the Beni Ḥasan picture (Fig. 1), at the horizontal loom.

[2] This was also the type of loom in use among the Aztecs of Central America; see illustration in Tylor's *Anthropology*, 248. A full description of the modern Syrian looms, with a valuable list of the Arabic *termini technici* will be found in the *ZDPV* viii., 1885, pp. 73 *ff.*, 180 *f.*

[1] Moore (*op. cit. sup.*) gives this picture to illustrate Delilah's loom, but is in error in regarding both looms as consisting of 'a simple *upright* frame.'

loom, the frame of which is composed of two upright posts, kept rigid by two cross-bars, *a* and *b*. The roller *c* serves as a yarn-beam and is suspended from the upper beam by twisted loops of rope, *e*. But a revolving yarn-beam seems to imply a revolving cloth-beam as well, which makes it probable that the roller *d*, attached to the uprights by the loops *ff*, serves this purpose. The functions of the three rods, *g*, *h*, *i*, suspended from the yarn-beam will be discussed in a subsequent section (§ 6).

There is no indication of the date at which the upright loom, which, to judge from the existing repretations, was a later development in Egypt (Erman, followed by Braulik), was introduced into Palestine. It may have been in use from time immemorial alongside of the horizontal loom. That the ordinary Jewish loom in NT times was of the second type above described is evident from various indications.

Thus the upper and lower beams (reff. below) are referred to in the Mishna, where also there is frequent reference to the 'standing warp' (שְׁתִי הָעוֹמֵד, cp the classical *στήμων* and *stamen*, the warp, from the root *s-t-a*); weaving was done standing as well as sitting (*Zab.* 3 2); the Latin transference of *jugum* and *stamina* to the cross-bar and strings of the lyre is paralleled in late Hebrew and Aramaic by the transference, though in the contrary direction, of נֵבֶל (also נַבְלָא and נַוְלָא, Syr. *naulā*) to signify a loom, a phenomenon which points to the upright loom. The seamless robes 'woven from the top throughout,' finally, could only have been made on the upright loom, although this does not of necessity require that the looms for the manufacture of ordinary fabrics were of this type.

The loom in use at the present day in Palestine, as has been said, is uniformly of the horizontal type, and resembles our own handloom in being furnished with healds or heddles worked by a pair of treadles. The frame, however, is much lower, the weaver sitting on or near the ground, and the warp, instead of being wound round the yarn-beam at the opposite end of the frame, as with us, is usually carried upwards and passed over a roller attached to the opposite wall, a few stones fastened to the ends of the warp-threads serving to keep them taut. (For other forms with slightly different arrangement, see *ZDPV* viii., 1885, p. 73 *f.*)

To weave is, in the OT, generally אָרַג, *'ārag*, a weaver אֹרֵג, *'ōrēg* (masc. and fem.), the latter supplanted to a large extent in later Hebrew by the loanword גַּרְדִּי [1] (*γέρδιος*, *gerdius*). The loom is probably אֶרֶג, *'ereg* (Judg. 16 14 EV 'beam,' perhaps also Job 7 6 EV 'shuttle').

In commencing a new web the weaver's first care is to stretch the warp in parallel lines evenly between the upper and the lower beam (כּוֹבֶד הָעֶלְיוֹן and כ״ הַתַּחְתּוֹן, *Kel.* 21 1 *Neg.* 11 9), if the upright loom is adopted.

5. Warping.

If we assume that the web is commenced at the top of the loom, these become the cloth-beam and yarn-beam respectively. The cloth-beam apparently is intended by the דיוסטר, *διωστήρ* (a term used in the later chapters of Ex. to render בַּדִּים, the poles for carrying the tabernacle furniture; in Ex. 25 *ff.* the earlier translators of 𝔊 used *ἀναφόρευς*) of *Kel.* 20 3, from which we gather that it might either lie across the forked ends of the uprights or be passed through the latter.[2] Fig. 2 shows, as we have seen, that a roller (אַכְסָן, *ἄξων*, Tg. Judg. 16 14 1 S. 17 7) might be attached to the upper beam to serve as a cloth or yarn-beam, as the case may be. In five passages of our EV (2 S. 21 19 1 Ch. 11 23 20 5 and the two just cited) mention is made of a weaver's 'beam,' but in none of the cases is this rendering admissible, as will be shown in the following section.

The process of arranging the warp is technically known as 'warping,' the late Heb. הֵיסֵךְ (*Shabb.* 7 2, etc., from סכך), the Gk. *διάζομαι*, Lat. *ordiri*.

This verb occurs in OT only in the metaphorical sense of the beginnings of the human fœtus (Ps. 139 13, cp שׂכך in the same sense, Job 10 11 and the similar metaphorical use of the Lat. *ordiri*, *exordiri*, *exordium*). The cognate נָסַךְ (Is. 25 7 30 1) had originally the same signification. In Is. 30, in particular, as is shown by Aquila's and Theodotion's rendering *διάζομαι*, and Jerome's 'ordiremini telam,' we have a metaphor derived from the warping of the loom in commencing a new web for the beginning of political intrigue. So too *massēkah* (מַסֵּכָה Is. *ll.c.*) and *masséketh* (מַסֶּכֶת, Judg. 16 13 *f.*, Mishna, *passim*) are both primarily the 'warp,' then by metonymy the 'web.' Another technical term for warping was שָׁתָה (cp Ar. *sadā* in this sense), which is to be restored for the corrupt MT in Is. 19 10 (see modern edd. for reading שֹׁתֶיהָ, to be rendered 'those that warp it [in the loom]') as already by an early hand of 𝔊ℵ *διαζόμενοι*, which has every probability of being more correct than the non-technical *ἐργαζόμενοι* of the other copyists. Here we find an unexpected confirmation of the traditional rendering of שְׁתִי (Lev. 13 48 *ff.* †, cp Ar. *masdî*) as 'the warp,' the sense which it regularly has in the Mishna, but which the majority of commentators have refused to recognise here, a position reflected in RVmg. 'woven or knitted stuff'[1] for 'warp or woof.' The obscure word דַּלָּה (Is. 38 12 AV 'pining sickness,' RV 'loom') seems also, from its etymology (cp Cant. 7 6 [5] where it denotes the spreading tresses of a woman's hair), to have originally signified 'warp,' the שְׁתִי הָעוֹמֵד of the Mishna, then perhaps, by metonymy, the loom.

Now the essential movements in the process of weaving are three in number. These are (1) the 'shedding' of the warp, that is, in its simplest form, the dividing of the warp into two sets of the odd and the even threads respectively, to allow of the passage between them of the weft, the opening through which the latter passes being technically known as the 'shed,' (2) the passing of the weft through the 'shed' by means of a rod, needle, or other contrivance serving as a shuttle, and (3) the beating up of the weft to form with the warp a web of uniform consistence throughout. The first of these movements is the most complicated and demands a closer study. In the mediæval and modern horizontal loom, as found from the Atlantic to the Ganges, the operation of shedding is effected by a pair of heald- or heddle-frames worked by treadles underneath the loom. This arrangement, the result of a long process of evolution, is believed by some of the best authorities, as we have indicated in an earlier section, to have been adopted with the horizontal type of loom by the classical peoples before the Christian era. Rieger, in his frequently cited monograph on the arts of spinning and weaving in the period of the Mishna, even goes so far as to provide the upright Jewish loom with an arrangement of pedals (בֵּי נִירָא[2] *op. cit.* 30). The evidence, however, for the presence of the horizontal loom N. of the Mediterranean before the middle ages is of the slenderest character, and for the use of treadles is absolutely non-existent (see Ahrens, *Philologus*, 35 385 *ff.*; Yates and Marindin in Smith's *Dict. Ant.*(3) 2 768 *f.*).

6. Shedding.

The various stages in the evolution of the apparatus for rapid shedding may be thus briefly traced. In the earliest stage of all, when weaving was scarcely as yet differentiated from plaiting, 'the transverse threads were inserted laboriously by the fingers,' as in the case thus described by Palmer (see above, § 3). It was soon perceived, however, that by inserting a flat lathe or a rod over and under every alternate warp thread, so that, let us say, all the odd threads were above the lathe and all the even threads under it, a shed could be rapidly formed by turning the lathe through an angle of 90°,

[1] In the vocalisation of the many terms in the sequel found in Talmudic literature, the pointing adopted by Dalman in his *Aramäisch-Neuhebräisches Wörterbuch* has been generally followed.

[2] Rieger's suggestion that ר״ may be the shuttle (*op. cit.* 32) is inadmissible.

[1] The introduction of 'knitting' here is a curious anachronism, this art, according to Beckmann's *History of Inventions*, having probably been invented in Scotland not long before the year 1500 A.D. (Yates, *op. cit.* 6 *f.*).

[2] For what we believe to be the true explanation of this technical term, see below, col. 5285 *f.*

and the weft passed through by means of a pointed stick with which (or with the lathe) it was then beat up. This stage is represented by the Arab horizontal loom described by Burckhardt (*Notes on the Bedouin and Wahaby*, 67 *f.*): 'to keep the upper and under woof (read 'warp') at a proper distance from each other a flat stick is placed between them. A piece of wood serves as the weaver's shuttle, and a short gazelle's horn is used in beating back the thread of the shuttle.' With a single dividing rod, however, it must still have been necessary to insert every alternate weft thread by means of this primitive shuttle *over* the odd threads (in the case supposed) and *under* the even threads, since the formation of a second shed requires a second rod. This, however, was the next stage of the evolutionary process now being traced, and is already represented in the early Egyptian loom reproduced above (fig. 1). Here we note the presence of two rods in close connection with the warp; the one, *d*, a plain rod inserted between the two halves of the warp—let us say, as before, that the odd threads, 1, 3, 5, etc., pass over the rod,[1] the even threads, 2, 4, 6, etc., under it—the other rod, *e*, which must lie outside and above the warp, crossed by a series of threads which are represented in the picture by short diagonal lines. The invention of this simple device for expediting the operation of shedding deserves to rank with that of the 'flying shuttle,'[2] for by this means almost twice as much work could be done in a given time. A single rod, such as *d*, as we have seen, is capable of forming but one shed, which allows the weft to be passed *under* the odd and *over* the even threads of the warp only. Now in order that warp and weft shall be properly interlaced to form the web, it is necessary that in returning the weft shall pass *under* the even and *over* the odd warp threads. To effect this each of the even threads passing under the rod *d* is attached by a loop to the rod *e*. Therefore by simply raising this rod —in the upright loom by its being drawn *towards* the operator standing in front of the loom—all the even threads are pulled upwards (or forwards) so as to be above (or in front of) the odd threads and thus a second shed is formed through which the weft is passed. Rod *d* is again raised, then *e*, and so on alternately. But this cannot be done with the rods in the relative positions which they occupy in fig. 1, for if the reader will make the experiment on a model with twenty or twenty-four warp threads, he will find that the shed formed by raising the rod *e* with its attachment of loops will not reach to the edge of the web owing to the obstruction caused by the rod *d*. Braulik, who alone, apparently, of previous writers has attempted to describe the exact *modus operandi* of the Egyptian loom, has overlooked this defect in the artist's picture and has even gone so far as to assume, contrary to his own description of the drawing, that both rods were worked in the same manner as rod *e* (see Braulik, *op. cit.* fig. 92, p. 62). The true explanation is that the artist—if we assume the correctness of the reproduction in fig. 1—being unskilled in the technique of weaving, has reversed the true position of the rods, since it will be found by experiment that with two such rods, the one separating the two leaves of the warp, the other attached to the lower leaf by a series of looped threads, the latter rod must always be placed nearer to the edge of the web. This holds good of both types of loom and of both methods of weaving on the upright loom, namely from above or from below (see below, § 8).

The principle here enunciated for the first time will be immediately recognised as indispensable from the following diagrams in which the letters correspond to those of fig. 1, with the addition of *x* to denote the odd, *y* the even threads of the warp, and *z* the web.

[1] The prepositions 'over' and 'under' are here used with special reference to the horizontal loom, fig. 1; but the principle of the upright loom in fig. 2; is essentially the same; only in this case the prepositions 'before' and 'behind' must of course be substituted for 'over and 'under.'

[2] By John Kay of Bury in 1733.

WEAVING

Fig. 3 shows the formation of the first or natural shed at *s* through the raising of the odd warp threads by the rod *d*, fig. 4 the formation of the second or artificial shed at *s* through the raising of the even threads by the rod *e*.

The final stage, we are convinced, in the evolution of the shedding apparatus for plain weaving on the looms of antiquity was reached, when in the case of the upright

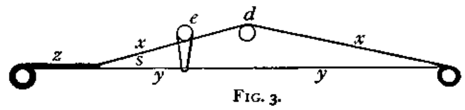

FIG. 3.

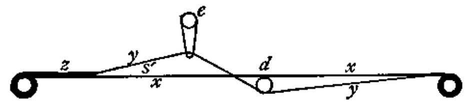

FIG. 4.

loom it was found expedient to attach *both* sets of the warp, the odd and the even threads alike, by loops or leashes to a couple of rods, which we shall henceforth call leash-rods, both being suspended in front of the warp from the *jugum* or upper crossbeam of the loom, or from the second of the top beams if there were two, as in the case of the Theban loom in fig. 2. Here, so far as the imperfect condition of the picture enables us to infer, we have a rod *g* near the top of the loom, doubtless dividing the warp into two sets ('stamen secernit arundo,' Ovid, *Met.* 6 55) to facilitate the attachment of the leashes to the leash-rods *h*,*i*, all three suspended from the yarn-beam *b*. By pulling forward *h* and *i* alternately, are formed the alternate sheds through which the weft-thread *k* is passed.

We come now to the perplexing question of the Hebrew terminology of the apparatus just described. The single reed of the more primitive loom was termed by the Greeks κανών, by the Romans *arundo;* in the more elaborate looms, such as fig 2, we find not only κανόνες and κάλαμοι but also in 𝔊 ἀντίον[1] (see below), in Latin *liciatoria*, as the names of the leash-rods to which the warp-strings were attached by means of loops or leashes of thread (hence called μίτοι, *licia*), corresponding to the healds or heddles of the modern loom. Now the *liciatorium* or leash-rod of the classical loom was named by the Jews of NT times not only *ḳāneh* קָנֶה (*Ohol.* 8 4, here mentioned along with the *spatha* [see *infra*], Jer. *Shabb.* 10 5), but also as Jastrow (*Dict.*, *s.v.*) and Rieger (*op. cit.* 29) have rightly perceived, *nīr* (נִיר *pl. nîrîm* and *-în*). Etymologically identical with the Assyrian *nîru*, a yoke, this term might be applied to any transverse rod or beam, hence to the leash-rods or shafts of a loom. This meaning alone suits the (textually corrupt) description of the veil of the temple in *Shĕḳālīm* 8 5, of which many wonderful renderings have been given by lexicographers and commentators.

This veil, we read, 'was a handbreadth thick and was woven upon 72 rods (נִירִין), and over each rod (ועל־כל נירא ונירא—so we must read for *nimin* and *nima* of the ordinary text) were 24 leashes (חוטין lit. 'threads,' cp Gk. μίτοι).'[2] These two *nīrīn* of the ordinary loom might be suspended by cords passing over the cross beam as in fig. 2, or from a peg (חָף) projecting from either end of the beam in question, 'two rods on one peg, and two pegs

[1] The conjecture may be hazarded that the ἀντίον was at first the rod which lay or hung outside, as if opposite to (ἀντί) the warp (see *e* of fig. 1), as distinguished from the κανών, *d*, which latter again may be the μεσάντιον of certain MSS. of 𝔊 (1 S. 17 7—for the strange variety of readings in 𝔊 see Moore, *Proc. of Am. Or. Soc.* 1889, p. clxxvii).

[2] The arrangement is not essentially different if we take חוּטִין here of the threads of the warp, in which case each *nir* would resemble not *e* but *d* of fig. 1. For the *modus operandi* of such complex looms, but of the horizontal type, with as many as 80 to 90 shafts see *EB*(9) 24 465. Moore's rendering of the above passage (*l.c.*), 'and on every thread (*nima* of *textus receptus*), namely of the warp, were 24 strings (connecting it with as many different heddles)' is unintelligible to the present writer.

for one rod' (Jer. *Shabb.* 7 2, so Rieger; cp illustr. *op. cit.*). This identification of the *nīrīn* with the *liciatoria* of the contemporary Roman looms must be maintained against that of Maimonides and other commentators who identify the *nīrīn* with 'the threads wound round the rods (קָנִים, *κανόνες*, *arundines*), by which the warp-threads are raised, etc.' (see *ap.* Surenh. *Mishna*, *Kēlim* 21 1), in other words with the leashes (*μίτοι licia*) to which we come presently. Equally impossible is Moore's identification of *nīr* (*PAOS*, 1889, p. clxxix) with the 'gear' of the developed horizontal loom—which certainly bears this name (*nīr*) in modern Arabic—consisting of two heddle-leaves, connected by spring-staves or otherwise with a pair of treadles. For not only have we no evidence, as has been already maintained, of the presence of treadles in the ancient looms, but it is difficult to see how they could be conveniently adjusted in the upright loom of the Mishna.[1]

The identification of the *nīr* with the shaft or leash-rod (*liciatorium*) of the ancient loom, here maintained, gives us a clue to the mysterious *mĕnōr 'ōrĕgīm*, מְנוֹר אֹרְגִים of 1 S. 17 7 2 S. 21 19 1 Ch. 11 23 20 5 to which the shaft of a giant's spear might be compared,[2] for מְנוֹר cannot be separated etymologically from נִיר (see BDB, *s.v.*). Now the shaft of a good-sized loom with a heavy warp must have been considerably thicker than the ordinary light spear-shaft (see the actual *ἀντίον* or *liciatorium* of a modern Lycian loom, apparently a branch of a tree, reproduced from Benndorf in Smith's *Dict. Ant.*(3) 2 769), and seems to satisfy all the conditions. In support of this view we have (1) the expression itself, 'like the weavers' shaft,' which suggests something usually in the weaver's hand, rather than a fixture of the loom such as the cloth or yarn-beam (see below); (2) the testimony of the oldest versions. 𝔊 in three places has *ἀντίον*, a synonym of *κανών* (see the authorities in Blümner, *op. cit.* 1 132); so also Aquila and Theodotion in 1 S. 17 7 where the MSS. of 𝔊 have a set of curious variants (see ref. to Moore above), all, however, identified by the later Greek lexicographers with the leash-rod, the *liciatorium texentium* of Jerome in all the passages cited.

The less probable rendering of EV 'a weaver's beam,' has the sanction of the Targum and of Jewish commentators of note. Thus Rashi (on 1 S. 17 7) quotes with evident approval the Tg. rendering אכסן הגרדאים (*i.e.*, *ἄξων γερδίων*, the weavers' roller) adding 'in the vernacular [French] it is *ensuble*.' The latter at once suggests the *insubuli* of the Roman loom, rightly explained by Yates and Marindin (Smith, *Dict.*(3), 2 765 *b*) as the yarn and cloth beams of the upright loom (*b* and *d* of fig. 2, above), an identification of which Rashi's comments, both here and on Judg. 16 13 *f.*,[3] supply a hitherto unnoticed corroboration.

The leash-rod, as we have seen, was passed through a series of loops or leashes of thread, each loop also passing behind every alternate warp-thread. These leashes, the *μίτοι* and *licia* of the classical looms, must be identified with the בָּתֵּי נִירִין (sing. בֵּי נִירָא *domus liciatorii*) of the Mishna (*Shabb.* 7 2 13 2), of which also many curious explanations have been offered, the latest being none the less objectionable that it is given without any qualification. 'The raising of the shafts,' says Rieger (*op. cit.* 30), 'was usually effected by an arrangement of treadles (בי נירא), the shafts being joined to pedals by cords,' a statement absolutely unsupported by the accompanying references. The key to this enigmatical expression will be found in the idiomatic use of *bēth* in compounds familar to every Semitic scholar. In the OT we have an exact parallel in בָּתִּים לְבַדִּים (Ex. 25 27 etc., lit. 'houses for the staves'), and בָּתִּים לִבְרִיחִים (Ex. 26 29 etc., lit. 'houses for the bars'), explained in each case by טַבָּעוֹת, rings. The *bātē nīrīn*, therefore, are the loops or rings of thread through which the *nīrīn* or leash-rods are passed. The identification here proposed suits admirably the passage *Shabb.* 7 2 where the operation of 'making two *bātē nīrīn*' intervenes between the warping (מֵיסֵךְ) and the weaving; so also in *Shabb.* 13 2 'he that fastens two leashes (*bātē nīrīn*) to the leash-rods (*nīrīn*)' before beginning to weave. *Bātē nīrīn*, in short, is the idiomatic equivalent of the loan-word לִיצִין *licia* (*Tos. Neg.* 5 10).

The shed having been formed as explained in detail above, the weaver proceeded to pass the weft (עֵרֶב; *κρόκη*; *subtemen*; cp Lev. 13 48 *ff.*, או בשתי או בערב 𝔊 *ἢ ἐν στήμονι ἢ ἐν κρόκῃ*, AV 'in the warp or woof'). This was done by means of a flat stick or lathe somewhat longer than the width of the web, carrying sufficient weft by a hook at the end, which also served, as in many places at the present day, for a batten to beat up the weft (so, most probably, in fig. 1 the curved stick *e* serves both purposes). Later the functions of shuttle and batten were differentiated; the rod which the Egyptian weaver holds in his right hand in fig. 2 serves to all appearance as a shuttle, and suggests the corresponding *radius* of the Romans (cp Ovid's 'inseritur medium radiis subtemen acutis'), the *κερκίς* of the Greeks. Even so early as Homer's time, this shuttle-rod appears to have been fitted with a revolving spool (*πηνίον*), on which the weft was wound, and from which it unwound itself in passing through the shed.

7. Passing and beating up of weft.

Rieger (*op. cit.* 31 34) has attempted, with doubtful success, to discover the various parts of the classical shuttle, regarding which there is still much uncertainty, in the Talmudic writings. It is scarcely safe to go beyond the conjecture that the מַחַט, or weaver's needle, and the pointed כֶּרְכַּר (*κερκίς*, *Shabb.* 8 6) may be the native and the imported names of the combined shuttle and batten. The *kerkid* was certainly used to beat up (שָׁבַט *κρούειν*) the weft. For this purpose the Greeks used a sword-shaped lathe, resembling a modern paper-cutter on a large scale, the *σπάθη*, adopted both by the Romans (*spatha*) and the Jews (אִסְפַּתִי *Ohol.* 8 4). When the older type of upright loom, in which the warp was stretched by means of weights, was superseded by the Egyptian type with the yarn and cloth beams, the Egyptian comb (*κτείς*, *pecten*, Martial's *Niliacum pecten*, illust. from Wilkinson in Rich, *s.v.*, with which cp the modern comb from Asia Minor, Smith, *Dict.*(3) 2 768 *a*) was introduced, and the weft driven home by inserting the teeth of the comb between the warp threads. The obscure קֵירוֹס (*καῖρος*) of *Shabb.* 13 2 *Kel.* 21 1 is identified by Maimonides (see on latter passage *ap.* Surenh.) and others with this comb, a very doubtful equation.[1] To judge from its original sense (for which see Blümner, *op. cit.* 1 126), the *ķērōs* was rather some arrangement of loops and cords, stretched across the loom to ensure that the web was kept of a uniform width.

One interesting reference to the beating up of the weft has been preserved in the OT, the recovery of which in modern times is due to G. F. Moore in the paper to which reference has frequently been made (*Proc. Am. Or. Soc.*, 1889). In Judg. 16 13 *f.*—a passage which has suffered considerable curtailment in MT (see Moore's *Comm.* and his editions [Heb. and Eng.] of Judges in *SBOT*, also Bu. and Now. *in loc.*)—Delilah is told to weave the seven braids of Samson's hair with the warp and to beat them up (תָּקַע) with the pin (יָתֵד, the batten or *spatha*).[2] The inadmissible rendering of EV, 'to fasten with the pin,' is due to the

1 This is the least satisfactory part of Rieger's attempted reconstruction of the Jewish loom in his monograph, *Versuch*, etc.

2 Ahrens, in *Philologus* (vol. 35 400 *f.*), gives an extract from an old Norse saga, in which also the shafts of the loom are compared with the warrior's spear.

3 Rashi, however, on this passage wrongly defines מַסֶּכֶת, which he takes as a *nomen instrumenti* from הֵימַךְ to 'warp' (see § 5), as 'the wooden beam on which the weaver mounts the warp, in the vernacular *ensuble*,' which may apply to either cloth or yarn-beam This comment has been entirely misunderstood by Moore (*l.c.* clxxvii), who strangely supposes Rashi to refer to the 'heddles' of the developed horizontal loom, and takes the מְנוֹר to be the cross-beam—the *jugum* of Marquardt and Blümner's untenable theory—from which the heddles are suspended.

1 Still more doubtful is Rieger's identification of the *ķērōs* with a fully developed modern 'reed,' an apparatus found only with the horizontal loom (*op. cit.* 34).

2 With this sense of יָתֵד as a flat instrument with a thin edge like a paper-cutter, cp Dt. 23 14 [13], also *Shabb.* 17 4, where it denotes the flat point of the ploughshare (illust. Vogelstein, *Die Landwirthschaft in Palästina*, 79). The ungrammatical form in which it occurs in Judg. 16 14*b* (הַיְתַד הָאֶרֶג) shows it to be an intruder here (Moore), so that we may dispense with the inquiry as to what is intended by 'the pin of the beam' (EV).

influence of the early translators, who had formed a quite erroneous, though intelligible and consistent, conception of the details of the incident.[1]

In the case of the older classical loom, the *tela pendula*, open below, the operator had no alternative but to commence his web at the top of the loom; he had also to weave standing. With the looms figured above, on the contrary, the web might be begun at either end of the low loom (fig. 1), and at either top or bottom of the high loom (fig. 2). According to Herodotus (2 35) 'other nations push the weft upwards,' *i.e.*, commence at the top of the loom, 'the Egyptians, on the other hand, push it downwards,' *i.e.*, commence at the bottom. The position of the leash-rods in fig. 2, relative to the weft at *l*, shows that Herodotus is right as regards the usual Egyptian practice, although absolute uniformity is scarcely probable. The operator, as we further see, was able to remain in a sitting posture while the lower half of the web, at least, was being woven, and if, as we have inferred is the case in Fig. 2, the loom was provided with a cloth-beam, he might at the expense of a yard of warp remain seated throughout. That the Jews in NT times wove from the top downwards is a probable, though by no means conclusive, inference from the description of the tunic of Jesus which was woven ἐκ τῶν ἄνωθεν δι' ὅλου (Jn. 19 23, for which see also below), a phrase which strictly means—as paraphrased by Delitzsch in his Hebrew rendering—'from collar to selvage.' That the inference is a correct one, however, is attested by Theophylact, archbishop of Bulgaria, about 1070, who, with reference to the passage just cited, comments thus: 'Others say that in Palestine they work their looms not as with us (among whom) the leashes and the warp are at the top, the web being woven at the bottom and thence upwards, but on the contrary, the leashes (μίτοι = *bātē nīrīn*) are at the bottom and *the web is woven from the top*' (*Ad Joann.* 18 25; cp the similar though less explicit testimony for Galilee, quoted from Isidorus Pelusiota by Ahrens: *Philol.* 35 390).

8. Direction of web.

The web having reached the desired length, it was severed from the remaining warp threads (בִּצַּע, Is. 38 12, ἐκτέμνειν, Tob. 2 12 𝔊), and rolled round the cloth-beam (hence the figure in Is. *ibid.*: קִפַּדְתִּי, RV 'I have rolled up like a weaver my life'), for removal from the loom. Linen in this undressed (ἄγναφος, Mt. 9 16 Mk. 2 21 RV—AV 'new cloth') condition was termed ὠμόλινον (Ecclus. 40 4, RV wrongly 'hempen frock'), and was exposed to less danger from shrinking, if exposed to wet, than cloth made from wool. The task of milling or felting the cloth (to use the modern terms) fell to the FULLER (*q.v.*), by whom it was steeped in water mixed with various alkaline ingredients, stamped and beaten to complete the felting process, then bleached with fumes of sulphur, carded to raise the nap, and finally pressed in the fuller's press. To enter into these processes in detail would extend this article unduly (see for full references Rieger, *op. cit.* 39-45, and cp Blümner, *op. cit.* 1 157-177).

9. Final processes.

In the preceding sections regard has been had only to the most ordinary sort of weaving, where the warp and weft are of the same material, the weft passing over and under each alternate thread of the warp. It remains now to refer briefly to a few of the more complex varieties of the textile art. The Hebrews were forbidden to follow a custom in vogue among all nations of combining a warp of flax with a weft of wool, which is probably what is signified by the obscure term שַׁעַטְנֵז (Lev. 19 19 Dt. 22 11). The reason for this taboo was certainly not that given by Josephus (*Ant.* iv. 8 11 [§ 208]), that garments of this sort were priestly wear, but must probably be sought in connection with illicit magical practices (see Goldziher, *ZATW*, 1902, pp. 36 *f.* for an Arab parallel, and cp the similar prohibition against seething a kid in its mother's milk: see COOKING, § 8 end). The simplest variation from the plain web hitherto discussed, was obtained by using alternately different coloured wefts, say white and black, or by mounting the warp in alternate bands of white and black yarn, by which striped fabrics were produced, similar to those so much in favour among the Syrian peasantry at the present day. It is very doubtful, however, whether the obscure and textually suspicious חֲטֻבוֹת אֵטוּן of Prov. 7 16 (see LINEN, 1) means 'striped cloth of the yarn of Egypt' (so RV). The coloured representations of Syrians on Egyptian monuments show that they 'wore narrow close-fitting, plain clothes, in which dark blue threads alternated with dark red, and these were generally adorned with embroidery' (Erman, *Eg.* 216 *f.*, where also illustration of Syrian ambassador with dress as just described, the embroidery being in the form of stars, a form of ornamentation called *oculi* by the Romans, Marq. *Röm. Privatleben*, 526 *f.*). By having the warp all of one colour and the weft all of another, what is known as a 'shot' fabric was the result. Thus we read of garments 'of which the warp is dyed and the weft white, or the weft dyed and the warp white' (*Neg.* 11 4). By alternating different coloured bands, both in warp and woof, further, a 'check' or chequered pattern is obtained. Such 'chequer work' was in great favour in antiquity, as may be seen from the extant coloured representations, not only for everyday clothes (see *e.g.*, in the procession of Semitic immigrants, part of which is reproduced in colours in Riehm, *HWB*(2), opposite p. 54), but as a pattern for the sails of vessels (see Wilk. *op. cit.*, frontispiece to vol. ii.). Among the Jews we find mention of 'a summer garment of white and coloured checks' (פְּסִיפְסִים [ψῆφος]; so read for פספסים, *Neg.* 11 7). Joseph's 'coat of many colours' (כְּתֹנֶת פַּסִּים), it need hardly be said, belongs, according to one line of tradition (𝔊, Vg., see Comm. on Gen. 37 3), to one or other of the categories just enumerated.

10. Pattern and figure weaving.

What precise style of weaving is denoted by *šibbēṣ* (שִׁבֵּץ, Ex. 28 39 AV 'embroider,' RV 'weave in chequer work') applied to the high priest's tunic—hence its description as כְּתֹנֶת תַּשְׁבֵּץ (*ib.* 4 AV 'a broidered coat,' RV 'a coat of chequer work') is quite uncertain. The revisers, as we see, indicate their preference for some kind of check. Braun (*de vestitu sacerdot.* [1680], 367-384) argues at great length in favour of Maimonides' view that a species of honeycomb pattern is intended, resembling the lining of the second stomach (*reticulum*) of ruminants.

From the earliest times in the E. we find evidence of the use of gold, and to a less extent of silver, to enhance the richness and value of textile fabrics. Thus, gold thread, prepared by cutting finely beat plates of gold into narrow strips (Ex. 39 3), was directed to be employed in the manufacture of the robes of the high priest (Ex. 28 5 *f.* 39 2 *ff.*). It was chiefly used as weft (cp Vergil's 'picturatas auri subtemine vestes,' *Æn.* 3 483), fabrics wholly of gold thread being of late and rare occurrence (Marq. *op. cit.* 519). The ghostly horsemen of 2 Macc. 5 2 were arrayed in 'cloth of gold' (AV, διαχρύσους στολάς), so, too, according to the Greek interpretation, was the royal bride of Ps. 45 9 [10] (ἐν ἱματισμῷ διαχρύσῳ = בְּכֶתֶם אוֹפִיר). Holofernes' mosquito curtain was of 'purple and gold' (Judith 10 21). Agrippa's royal robe (cp Acts 12 21), on the other hand, is described by Josephus (*Ant.* xix. 8 2) as woven throughout of silver thread.

The rectangular plaid-like upper garment or *simlāh* of the Hebrews (MANTLE, § 2 [1]) was, of course, woven in one piece; the undergarment, *kĕthōneth* (TUNIC), on

[1] The technical terms employed in the divergent renderings of 𝔊 show that the Greek translators thought of Samson's hair as *stretched with the warp* of the horizontal loom, the end of which was fastened by a pin into the opposite wall (see above, § 3), while in MT the braids are clearly intended to be used as *weft*.

the other hand, which had to be more in accordance with the stature of the wearer, was apparently made by sewing together two lengths of cloth cut more or less to measure. This we infer from Josephus' description of the high priest's tunic (χιτών), which was 'not made of two pieces, so as to be sewed together upon the shoulders and down the sides, but was woven in one long piece, etc.' (*Ant.* iii. 7 4 [§ 161]). The tunic worn by Jesus at the close of his ministry was also of this sort; ἦν δὲ ὁ χιτὼν ἄραφος (without seam) ἐκ τῶν ἄνωθεν ὑφαντὸς δι' ὅλου (Jn. 19 23). For the manufacture of such seamless fabrics it was necessary to mount a double warp which was woven with a continuous weft. The warp threads, that is, were so arranged as to lie on both sides of the upper beam, each face of the warp being provided with its own set of leash-rods. The operator, if there was but one, had to pass the weft across first one face, and then the other in succession by going round and round the loom, a procedure which, of course, could be obviated by having two operators for the same loom. In this way a cylindrical web was produced. Whether the sleeves were worked at the same time, as Braun in his classical treatment of this style of weaving maintains (*op. cit.* with illustration of specially constructed loom opposite p. 360) is less certain. It may also be noted that Braulik (*op. cit.* with technical diagrams, 28 *f.*, 77 *f.*, 89 *f.*) has discovered that the Egyptians from, at the latest, the time of the twenty-second dynasty, were familiar with a similar style of seamless fabrics, as indeed might have been inferred from the extremely tight-fitting garments represented on some of the Egyptian statues.

The finest products of the textile art known to the Hebrews are evidently intended to be represented as the work of the craftsman designated by the authors of the priestly code the *ḥōšēb* (חֹשֵׁב, Ex. 26 1 31, and often), literally, the designer, inventor, artist. Three grades of craftsmanship, it will be remembered, are mentioned together in the directions for the construction of the tabernacle and the priestly robes: the ordinary weaver (אֹרֵג), the *rōkēm* (רֹקֵם, Ex. 26 36, and often), and the *ḥōšēb*. The nature of the work (רִקְמָה) produced by the second of these has been the subject of much discussion. German scholars, as a rule, understand merely colour-weaving (Buntweberei), such as we have discussed above; but various considerations which cannot be detailed here (see EMBROIDERY, and the writer's forthcoming commentary on *Exodus* in the Intern. Crit. Series) lead to the belief that embroidery, the *opus plumarium* of the ancients, is intended. There is a greater consensus of opinion in favour of identifying the מַעֲשֵׂה חֹשֵׁב (Ex. 26 1, etc. EV 'work of the cunning workman') with tapestry. This differs from ordinary weaving in respect that the weft is not thrown across the warp by a shuttle, but the design is traced by inserting short coloured threads by the fingers, or by a 'broach' or needle, behind as many warp threads only as may be required. The high loom in use in the celebrated Gobelins factory is almost an exact reproduction of the Egyptian loom of fig. 2 above (E. Müntz, *A Short History of Tapestry*, 5 [where, however, the reference is to our fig. 1], and especially 356 *ff.* with illustrations). Indeed, it is by no means improbable that the picture in question is that of a tapestry rather than of an ordinary weaver. The curtains of the tabernacle are clearly intended to be of tapestry with cherubim figures; so too, the veil both of the tabernacle (Ex. 26 31) and of Solomon's temple (2 Ch. 3 14; cp Heb. וַיַּעַל with 𝔊 καὶ ὕφανεν κ.τ.λ.). Jewish tapestry was celebrated at a later period, and noted for the unnatural figures of animals designed by the Jewish artists (Claudian *in Eutrop.* 1 350 *ff.*, cited by Marquardt). The tapestry worker was known to the classical world as *polymitarius* (Jerome's rendering of *ḥōšēb*), and his work *polymita* (πολύμιτος, used by Symmachus Ezek. 16 13 27 16), because as explained by Pliny (*HN* 8 196) he wove 'plurimis liciis,' that is, with weft threads[1] of various colours (cp Isidorus, *Orig.* xix. 22 21: 'polymitus enim textus multorum colorum est'). In EV 'tapestry' is twice introduced (Prov. 7 16 31 22); but the sense and even the text of the original are doubtful (see the Comm.).

It only remains to add that the weavers as a class enjoyed a bad reputation among their countrymen, many curious illustrations of which have been collected by Delitzsch (*Jüd. Handwerkerleben*, 45 *ff.*). Like other craftsmen, however, in NT times, those of Jerusalem formed a strong guild, the beginning of which may be traced back to at least the days of the Chronicler (1 Ch. 4 21).

The literature of the subject has been referred to with some detail in the course of the article. A. R. S. K.

WEDGE. 1. לָשׁוֹן, *lāšōn*, Josh. 7 21 24.

WEEDS (סוּף), Jon. 2 5. See FLAG.

WEEK. The subdivision of the month into weeks, as also into decades (*'āšōr*, עָשׂוֹר)—the week representing approximately a fourth, the decade a third, of 29-30 days—is of great antiquity.

1. Origin.

The old Hebrew for the week of seven days is שָׁבוּעַ, *šābūă'* —*i.e.*, a seven, a heptad[2] (=Gk. ἑβδομάς, Lat. *septimana*); cp Gen. 29 27 (𝔊 τὰ ἕβδομα). In later times שַׁבָּת, *šabbāth*, also was currently employed, although only four instances of its use for 'week' are met with in OT—viz., Lev. 23 15 [cp Dt. 16 9] Lev. 25 8 Nu. 28 10 and Is. 66 23—and in Aramaic it became the ordinary word (שַׁבְּתָא or שַׁבָּא; cp also Arab. *sanba* and *sanbata* = 'a short space of time'). Similarly in NT the week is never called ἑβδομάς, but invariably only σάββατον or σάββατα (pl.); cp Mk. 16 9 Lk. 18 12 Mt. 28 1.

This quadripartite division of the month into weeks was naturally suggested by the phases of the moon and was far from being peculiar to the Hebrews. In particular it has been shown to have been an ancient institution with the Babylonians, and even in their case it had nothing to do with the number of the seven planets, after which at a later date the days of the week came to be named. Whether the Israelites used the week as a division of time even in their nomadic stage remains obscure. It is not impossible that they may have derived it from the Babylonians even before their settlement in Canaan, as the Canaanites also had done. However that may be, the development of the seventh day into a day of rest must certainly be referred to the time when the Israelites had already become an agricultural people (see SABBATH).

2. Mode of reckoning.

The mode of reckoning among the Israelites was originally doubtless the same as that of the Babylonians —viz., by dividing the first 28 days of each month into four weeks terminating respectively on the 7th, 14th, 21st, and 28th day, and by making the first week of the new month always begin with the new moon. This intimate connection, however, between the week and the month was soon dissolved (cp the expression 'feast of weeks' in Ex. 34 22 [J]). Whether the preponderance which the Sabbath day, as marking the close of the week, acquired over the day of new moon, was a cause or a consequence of the loosening of the connection it is impossible to determine; we are not precluded from supposing that quite other reasons may have contri-

[1] *Licium* (= μίτος), has this meaning here, not the special and technical sense which it had above.

[2] In view of this original meaning of the word it becomes possible for שָׁבֻעִים in Dan. 9 24-27 to mean a week of years (*annorum hebdomas*). Cp the corresponding use of שַׁבָּת with the explanatory addition of שָׁנִים (Lev. 25 8: שֶׁבַע שַׁבְּתֹת שָׁנִים, 'seven weeks of years').

buted to the increased importance attached to the Sabbath ; what is certain is that the week soon followed a development of its own, and it became the custom, without paying any regard to the days of the month that did not fit in with the four weeks, to reckon by regular periods of seven days so that new moon no longer coincided invariably with the first day of the week. After this the week of course, having no fixed point of attachment, became quite unsuited as a measure by which the dates of events could be fixed ; on the other hand, however, it became useful for the measurement not only of comparatively brief intervals of time but also of periods exceeding a month ; thus we not only have the week of marriage festivities (Gen. 29 27 *f.*), and periods of two weeks (Lev. 12 5) and of three (Dan. 10 2 *f.*), but also of a space of seven weeks (Dt. 16 9 *f.* [Ex. 34 22], Lev. 23 15).

When it was desired to specify the precise day of the week on which an event had happened or was expected

3. Specification of days. to happen, the ordinal numbers had to be used as long as the days remained unprovided with special names. Friday and Saturday are the only days that have names of their own ; in the OT—if we leave the Apocrypha out of account—Saturday only.

Thus for Friday in OT we have merely בַּיּוֹם הַשִּׁשִּׁי, *bayyōm haššiššī*, 'on the sixth day' (Ex. 16 5 22), and, for Sunday in the NT, [ἐν τῇ] μιᾷ τῶν σαββάτων (Mk. 16 2 Lk. 24 1 Acts 20 7 cp 1 Cor. 16 2 Mt. 28 1) or πρώτῃ σαββάτου (Mk. 16 9).

WEEKS, FEAST OF (חַג שָׁבֻעוֹת), Ex. 34 22. See PENTECOST.

WEIGHTS AND MEASURES. In view of the position of Palestine, lying between Egypt, Phœnicia, and Assyria, it was to be expected that the systems of weights and measures there in use would harmonise with one or other of the systems belonging to the neighbouring countries. According to C. H. Toy,[1] 'from Amos 8 5 we may perhaps infer that, as early as the eighth century B.C., the Israelites had a legal standard of weights and measures . . . it is possible, indeed, that the Babylonians had introduced this system into Canaan in or before the fifteenth century' [cp the Amarna correspondence as a proof of Babylonian predominance in Canaan]. The literary evidence from Palestine itself, however, is often very unsatisfactory, and we are accordingly reduced to choosing between mere probabilities.

The most important measure of length is the CUBIT (*'ammāh*, אַמָּה), which contains 2 spans (*zěreth*, זֶרֶת) or 6 palms (*ṭóphaḥ*, טֹפַח), or 24 fingers' breadths (*'eṣba'*,

Bible.	Bab. Planet Names.	Latin.	French.	German.	English.
	Šamaš	Dies Solis	Dimanche	Sonntag	Sunday
	Sin	,, Lunæ	Lundi	Montag	Monday
	Nergal	,, Martis	Mardi	Diens(=Zivis)-tag	Tuesday
	Nabu	,, Mercurii	Mercredi	Mittwoch (Wodanstag)	Wednesday
	Marduk (Bel)	,, Jovis	Jeudi	Donners(=Thors)tag	Thursday
παρασκευή, προσάββατον	Ištar (Beltis)	,, Veneris	Vendredi	Frei(=Freias)-tag	Friday
שַׁבָּת	Ninib	,, Saturni	Samedi	Samstag	Saturday

Saturday is, in the OT, called שַׁבָּת, *šabbath*, or יוֹם הַשַּׁבָּת *yōm haššabbāth* (*e.g.*, Am. 8 5 Ex. 20 8) ; in the NT [τὸ] σάββατον (*e.g.*, Mk. 6 2), ἡ ἡμέρα τοῦ σαββάτου (Lk. 13 16), [τὰ] σάββατα (Mt. 28 1 Col. 2 16) or ἡ ἡμέρα τῶν σαββάτων (Lk. 4 16). Friday, as preceding, or as preparing for, Saturday is called either προσάββατον (as early as Judith 8 6 ; cp Mk. 15 42) or παρασκευή (Mk. 15 42 Mt. 27 62 Jn. 19 31 ; cp also Lk. 23 54 ἡμέρα παρασκευῆς, and Jos. *Ant.* xvi. 6 2).

The naming of the days of the week after those of the seven planets (of which no instance occurs in OT or NT) has its explanation simply in the coincidence of number. The allocation of particular planets to particular days was, no doubt, determined by astrological considerations ; the planet that presided over the first hour, presided over, and so gave name to, the whole day. Amongst the Sabians of Ḥarrān in Mesopotamia we already find the seven planetary deities recognised as the deities of the days of the week in the order still current with ourselves : the sun, the moon, Nergal (Mars), Nabu (Mercury), Bel (Jupiter), Beltis (Venus), Kronos (Saturn).[1] It is worth noticing also that Jewish tradition assigned the care of a day of the week to each of the seven archangels (Raphael, Gabriel, Sammael, Michael, Izidkiel, Hanael and Kepharel).[2] The divine names of the day passed from the East to the various nations of Europe, native deities in some instances taking the place of foreign ones, just as among the Jews the names of archangels were substituted. See the above table.

2 Weber, *Altsynag. pal. Theol.* 164 ; ⁽²⁾ (1897), p. 169.

אֶצְבַּע). Above the cubit was the reed or *ḳāneh* (קָנֶה) of 6 cubits (Ezek. 40 5). The

1. Measures of length. foot and the fathom, characteristic of so many other systems, are foreign to the early Jewish scale.

The old Hebrew literary data are as follows :—

The bedstead of Og was measured 'after the cubit of a man' (Deut. 3 11)—which gives us no exact indication.

Solomon (2 Ch. 3 3) laid out his temple in cubits 'after the first (=ancient) measure.' Ezekiel (40 5 43 13) describes the cubit of the temple of which he foresees the restoration, as being 'a cubit and an handbreadth.' It may be presumed (Hultsch, *Metr.* 440) that this longer cubit is identical with the cubit of Solomon's temple, and that the common cubit of Ezekiel's time was only 6/7 of the cubit of Solomon's time.[2] Certain views of Talmudic writers which conflict with this explanation may be satisfactorily explained ; for instance, the idea that the short cubit contained only 5 hand's breadths (Zuckermann, *Das jüd. Maas-system*, 17) is due to an inverted conception of Ezekiel's meaning. The idea of a cubit of one finger's breadth more than the long cubit is also mistaken. This (to argue on the basis of the royal Egyptian cubit) would be .547 m., which is nearly a 'simple' hand's breadth (.0792 m.)

1 Note on Prov. 16 11 (*Internat. Crit. Comm.*).

2 In Egypt the short cubit (450 m. or 17.72 in.) was similarly 6/7 of the royal cubit (.525 m. or 20.67 in.).

more than the 'simple' cubit according to Julian of Ascalon (see below). This 25-finger cubit was therefore due to an attempt to interpret Ezekiel as speaking in terms of the 'simple' cubit.

It would be futile to discuss in detail the various attempts which have been made to ascertain the exact length of the Hebrew cubit. Since in Egypt the two cubits stood in the same relation to each other as the Hebrew (6 : 7) and were similarly divided into 24 fingers' breadths, it is natural to make an attempt to identify the two systems. Supposing the length of the Siloam canal, as stated in the inscription, to be really 1200 cubits, and accepting Conder's measurement (537.6 m.) we obtain a short cubit of .525 to .527 m.[1] Unfortunately, the distance stated in the inscription of Siloam is doubtful, and there is some reason to suppose that it is not 1200 but 1000 cubits (see, *e.g.*, *PEFQ*, 1890, p. 209*f.*), which yields .5376 m. for the short and .6272 m. for the long cubit. Among other attempts to deduce the cubit we may mention Petrie's measurements of tombs at Jerusalem (*PEFQ*, 1892, p. 28*f.*).

One set of tombs seems to be planned on a cubit which is the same as the Egyptian; another cubit which he deduces measures 22.6±.03 in. (about .575 m.); while there is one chamber which suggests 25.2 in. (about .641 m.). We must remember in dealing with deductions of this kind that it is not certain that buildings were always planned so as to contain an exact number of cubits in their various dimensions.

The method of ascertaining the length of the cubit from the measurement of grains of barley which, according to a recent attempt (*PEFQ*, 1897, p. 201), gives a cubit of 17.77 in. (.451 m.), is liable to objections (see Hultsch, *Metr.* pp. 434, 435); nevertheless the result helps to make the balance of the evidence incline in favour of the Egyptian cubit, although there may well have been other systems in use in early times. [For other discussions of the length or the cubit, see *e.g.* *PEFQ*, 1879, p. 181; 1880, p. 98; 1899, p. 226*f.*]

Assuming the short cubit to be .450 m., and the long cubit .525 m., as in Egypt, we obtain the following values for early Jewish long measures.

	Longer System.		Shorter System.	
	Metres.	Inches.	Metres.	Inches.
Finger's breadth.	0.022	.86	0.019	.74
Palm	0.087	3.44	0.075	2.95
Span	0.262	10.33	0.225	8.86
Cubit	0.525	20.67	0.450	17.72

The Hebrew measures of length of later times are explained in the Table of Julian of Ascalon, a Byzantine writer of uncertain date (Ἐπαρχικὰ ἀπὸ τῶν τοῦ Ἀσκαλωνίτου Ἰουλιανοῦ τοῦ ἀρχιτέκτονος ἐκ τῶν νόμων ἤτοι ἐθῶν τῶν ἐν Παλαιστίνῃ: Hultsch, *Metr. Scr.* 1 200*f.*). It appears that that table, or its original, was drawn up for the purpose of legally defining the measures of the province. From it we obtain the following measures and equivalents:—

1. The δάκτυλος or finger's breadth.
2. The παλαιστή or palm = 4 δάκτυλοι.
3. The πῆχυς or cubit = 1½ ft. = 6 palms.
4. The βῆμα or pace = 2 cubits = 3 ft. = 12 palms.
5. The οὐργία (ὄργυια) or fathom = 2 paces = 4 cubits = 6 ft. = 9 spans 4 fingers' breadths.
6. The ἄκαινα or reed = 1½ fathoms = 6 cubits = 9 ft. = 36 palms.
7. The πλέθρον = 10 reeds = 15 fathoms = 30 paces = 60 cubits = 90 ft.
8. The στάδιον or furlong = 6 plethra = 60 reeds = 100 fathoms = 200 paces = 400 cubits = 600 ft.
9. (*a*) The μίλιον or mile, 'according to Eratosthenes and Strabo' = 8⅓ stadia = 833 fathoms [more exactly, 833⅓ fathoms].
(*b*) The μίλιον, 'according to the present use' = 7½ stadia = 750 fathoms = 1500 paces = 3000 cubits.
10. The present μίλιον of 7½ stadia = 750 'geometric fathoms' = 840 [more exactly 833⅓] 'simple' fathoms; for 100 geometric fathoms = 112 simple fathoms, or more exactly, 9 geometric = 10 simple fathoms.

[1] Cp the dimensions of the grave in *Rev. Archéol.*, 1886, p. 225*f.*

There can be no doubt that the 3000 cubits (4500 ft.) which make up the mile according to 9 (*b*) are the royal Egyptian cubits of .525 m. We thus obtain the following values for the two scales (geometric and simple) according to Julian.

	Geometric.		Simple.	
	Metres.	Inches.	Metres.	Inches.
Finger's breadth.	0.022	.86	0.020	.79
Palm	0.088	3.44	0.079	3.11
Span	0.262	10.33	0.236	9.31
Cubit	0.525	20.67	0.473	18.62
Fathom . . .	2.100	82.68	1.890	74.49

In this table, the span is taken as half the cubit, as in the earlier system; the passage in Julian (5) which equates 9 spans to the fathom is either corrupt, or an attempt to express the fathom of one system in spans of another.

Of the measures longer than the cubit, the ḳāneh (ἄκαινα) is equated by Ezek. 40 5 to 6 cubits (3.150 m. or 10 ft. 4 in.). It will be noticed that in § 6 Julian gives the ἄκαινα 9 ft., whereas in § 8 he equates 60 ἄκαιναι to 600 feet. In the latter case he must be thinking of the ordinary Greek foot of .315 m., in the former of the Ptolemaic Egyptian foot of .350 m., the two standing to each other as 9 : 10.

Julian's plethron and stadion must be regarded as being on the Ptolemaic scale—*i.e.*, 100 × .350 m. and 600 × .350 m.—*i.e.*, 38 yds. 10 in. and 228 yds. 5 ft. respectively. The stadion thus corresponds very nearly to our furlong, by which it is generally translated. The mile of 7½ stadia on the same system is 1575 m. or 1722 yds. 1 ft. 5 in.

The 'pace' of Julian is a fixed measure of 2 cubits; but it probably did not belong to the original Hebrew scheme, and the pace (צַעַד) of 2 S. 6 13 is probably not intended for a definite expression.

The 'Sabbath day's journey' (Zuckermann, 27*f.*; cp Sabbath, col. 4175, n. 4) is equated by most Hebrew authorities to 2000 cubits; thus, too, Josephus gives us 5 stadia (= 2000 cubits) as the distance of the Mt. of Olives from Jerusalem, a distance which in Acts 1 12 is σαββάτου ὁδός. On the other hand the Talmud (Zuckermann, 27) equates Sabbath day's journey and *mil*—*i.e.*, the μίλιον of 3000 cubits or 7½ furlongs; and we meet with measurements (such as the 'threescore furlongs' of Lk. 24 13) which contain this distance an exact number of times. Hultsch (445) accordingly thinks that this (1721.475 yds.) was the distance originally permitted for a Sabbath day's journey, and afterwards shortened by one third. There was probably much vagueness in the term.

'Some way' (כִּבְרַת־הָאָרֶץ, Gen. 35 16 48 7 2 K. 5 19), if the text is correct [for criticism, see Rachel, § 2], is still vaguer than the preceding; the fact that it was compared by the Syrian and Arabic translators with the parasang hardly justifies us, even if we adhere to MT, in regarding it as a fixed measure (Hultsch, 446). The same, or even greater, indefiniteness attaches to the expression 'a day's journey' (1 K. 19 4 Lk. 2 44, etc.).

2. Measures of area.

Of measures of area, the only one which receives a special name in the OT is the *ṣémed* (צֶמֶד, 1 S. 14 14 Is. 5 10) or yoke of land, translated 'acre'—*i.e.*, as much as could be ploughed in one day with a yoke of oxen (on Winckler's different view, see Acre). The Egyptian ἄρουρα of 100 royal cubits square was equivalent to .2756 hectares, or .6810 acre; but we have no authority for identifying *ṣémed* with *aroura*.

3. Measures of capacity.

i. *Sĕ'āh.*—In Is. 5 10 𝔊 translates אֵיפָה (*ephah*) by 'three measures' (cp Mt. 13 33, and the Talmud, Zuckermann, 42*f.* 44). The 'measure' *par excellence*, or Hebrew modius, here mentioned is the *sĕāh* (סְאָה, μέτρον, cp δίμετρον [BA in 2 K.], σάτον [Hag. 2 17 (16), cp Mt. 13 33]; Gen. 18 6 1 S. 25 18 2 K. 7 1 16). This is described by Epiphanius (Hultsch, *Metrol. Scr.* 1 260) as a μόδιος ὑπέργομος—a modius of extra size—and is equated by him to 1¼ Roman modius—*i.e.*, 20 sextarii. Josephus

WEIGHTS AND MEASURES

on the other hand (*Ant.* ix. 4 5) gives σάτον = $1\frac{1}{2}$ mod. = 24 sextarii. Elsewhere, Epiphanius and other authorities equate the Hebrew modius with 22 sextarii. This last squares with the estimate of the Babylonian ephah at about 66 sextarii (Hultsch, 412). The sĕāh was used both as liquid and dry measure, but more commonly mentioned as the latter, especially in the biblical writings.

ii. *Ephah.*—Like *hīn* (see below, iv.) the word *ephah* is said to be of Egyptian origin (on which cp Hommel's remark, *AHT* 293, n. 1). The ēphāh (אֵיפָה, Lev. 19 36, etc., see EPHAH), as we have seen, was three times the sĕāh; the name was confined to dry measure, the corresponding liquid measure being called *bath* (בַּת, βάδος, βάτος, etc., Is. 5 10 [κεράμιον] Ezek. 45 11 [χοῖνιξ]—'the ephah and the bath shall be of one measure, that the bath may contain the tenth part of an homer, and the ephah the tenth part of an homer'). The ephah corresponds to the artabe (cp Is. 5 10 where, however, ἀρτάβαι ἕξ = a homer), or Attic metretes; and it, or rather the bath, is equated by Josephus (*Ant.* viii. 2 9) to 72 sextarii, in accordance with his estimate of the σάτον. The bath was divisible into tenths (Ezek. 45 14); but the name for this division is not mentioned. It corresponded, of course, to the dry measure *'ōmer* (see below). On the other hand, we find the ephah divided into sixths (Ezek. 45 13 46 14), which have no name, but correspond to the liquid *hīn* (see below, iv.).

iii. *Ḥōmer* and *'cōr.*—The *ḥomer* (חֹמֶר, Ezek. 45 11 14 Hos. 3 2 etc.) was ten times the ephah or the bath, being used for both dry and liquid measure. The name *cōr* (כֹּר, κόρος, Ezek. 45 14 [not in 𝔊] Lk. 16 7, etc.; see COR) is an alternative, though this term is used more especially for a liquid measure.[1] Epiphanius equates the κόρος, which he derives from Hebrew χορ, with 30 (Hebrew) modii. Josephus' statement (*Ant.* xv. 9 2) that it = 10 attic medimni contains a slip for metretæ; cp iii. 15 3. C. H. W. Johns (*Assyr. Deeds and Documents*, 2 245) suggests a connection between *cōr* and the Assyrian *gurru*.

The half ḥōmer (dry measure), according to the tradition adopted in Vg. and EV, was called *lethek* (לֶתֶךְ, λεθέκ). But the only occurrence is in Hos. 3 2, where 𝔊 reads differently;[2] indeed, the whole passage labours under the suspicion of corruptness (see below, on νεβελ). Epiphanius gives 'large omer' as another name for the λεθέκ, and equates it to 15 modii.

iv. *Hīn.*—Of measures smaller than the ephah-bath, we have first of all, for liquids, the *hīn* (הִין, [ε]ἱν, Lev. 19 36 [χοῦς]—'a just ephah and a just hīn'), a name apparently of Egyptian origin (see above, ii.). It is equated by Josephus (*Ant.* iii. 8 3 9 4) and Jerome (on Ezek. 4 11) to 2 Attic *choes* = 12 sextarii = $\frac{1}{6}$ bath = $\frac{1}{2}$ sĕāh = 12 lōg (cp Talmud, Zuckermann, 49). The hīn was divided into halves, thirds (= cab), quarters, and sixths (Nu. 15 9 *f.* 15 6 Ex. 29 40 Ezek. 4 11, etc.).

There is evidence (from Epiphanius and Eusebius) of the existence in later times of a sacred hīn (ἅγιον ἵν) = $\frac{2}{3}$ of the ordinary hīn, and a large hīn (μέγα ἵν) = $\frac{3}{2}$ of the ordinary hīn.

v. *'Omer.*—The *'ōmer* (עֹמֶר, γόμορ, Ex. 16 16 36, etc.) was $\frac{1}{10}$ ephah and hence is called assaron (*'iśśārōn*, עִשָּׂרוֹן, Ex. 29 40 Lev. 14 10 23 13 17 Nu. 15 4 9). Epiphanius puts it at $7\frac{1}{5}$ sextarii (= $\frac{1}{10}$ ephah of 72 sextarii), Eusebius at 7 sextarii (a mere rough statement). [The last calls it γόμορ μικρόν; as such it must be distinguished from the μικρὸν γόμορ of 12 modii, itself so called in distinction from the 'large gomor' of 15 modii, as Epiphanius calls the lethek—see above.] Josephus is apparently wrong once more when he makes it = 7 attic kotylæ (*Ant.* iii. 6 6). The name 'omer is confined to dry measure.

vi. *Căb.*—The *cab* (קַב, κάβος, 2 K. 6 25[1]) was used for both liquid and dry measure. Josephus (*Ant.* ix. 4 4) equates the fourth part of the cab with the ξέστης or sextarius; thus the cab would be $\frac{1}{3}$ of the hīn (so in the Talmud, see Levy and cp Zuckermann, 37, 40). The cab is divided into halves, quarters, and eighths. Other values given for the cab are: (*a*) 6 sextarii—*i.e.*, the Ptolemaic χοῦς (Heronian fragm. περὶ μέτρων, Hultsch, *Metr. Scr.* 1 258; Eusebian fragm. *ibid.* 277); (*b*) 5 sextarii: 'great cab' of the Talmud given as $1\frac{1}{4}$ cab, Zuckermann, 37; (*c*) Epiphanius calls the cab $\frac{1}{4}$ modius (Hultsch, *Metr. Scr.* 262), which may mean 4, 5, $5\frac{1}{2}$ or 6 sextarii according to the sense in which he uses 'modius'—*i.e.*, the Roman modius, or any of the three values given to the Hebrew modius (see above, sĕāh).

vii. *Lōg.*—The *lōg* (לֹג, Lev. 14 10 12) is mentioned as a measure of oil, and in the Talmud (Zuckermann, 49) is made = $\frac{1}{12}$ hin or $\frac{1}{24}$ sĕāh; if this is correct, it is the $\frac{1}{4}$ cab.

Finally, we may perhaps mention the νέβελ οἴνου, given by 𝔊 in Hos. 3 2 instead of the léthek of barley.[2] All the authorities agree in making it = 150 sextarii; but whether they mean ordinary sextarii, or the larger Syrian sextarii of which 50 went to the bath (Hultsch, *Metr. Scr.* 261, 271, etc.), so that the νέβελ (נבל) would = 3 baths, it is difficult to say. On נֶבֶל, 'wine-skin,' 'wine-jar,' see BOTTLE.

We thus obtain the following systems of dry and liquid measures:—

DRY MEASURES.

Homer (Cor)	1									
Léthek	2	1								
Ephah	10	5	1							
Sĕāh	30	15	3	1						
$\frac{1}{6}$ ephah	60	30	6	2	1					
'Omer (Issaron)	100	50	10	$3\frac{1}{3}$	$1\frac{2}{3}$	1				
—	—	—	—							
Cab	180	90	18	6	3	$1\frac{4}{5}$	1			
—	—	—	—							
$\frac{1}{2}$ cab	360	180	36	12	6	$3\frac{3}{5}$	2	1		
$\frac{1}{4}$ cab	720	360	72	24	12	$7\frac{1}{5}$	4	2	1	
$\frac{1}{8}$ cab	1440	720	144	48	24	$14\frac{2}{5}$	8	4	2	1

LIQUID MEASURES.

Homer (Cor)	1									
—	—	—	—							
Bath	10	1								
Sĕāh	30	3	1							
Hīn	60	6	2	1						
$\frac{1}{10}$ bath	100	10	$3\frac{1}{3}$	$1\frac{2}{3}$	1					
$\frac{1}{2}$ hin	120	12	4	2	$1\frac{1}{5}$	1				
Cab	180	18	6	3	$1\frac{4}{5}$	$1\frac{1}{2}$	1			
$\frac{1}{4}$ hin	240	24	8	4	$2\frac{2}{5}$	2	$1\frac{1}{3}$	1		
$\frac{1}{6}$ hin	360	36	12	6	$3\frac{3}{5}$	3	2	$1\frac{1}{2}$	1	
Log	720	72	24	12	$7\frac{1}{5}$	6	4	3	2	1
—	—	—	—							

It is obvious that we have here a mixture of two systems, the decimal and sexagesimal. The foundation of the whole seems to have been the sexagesimal portion, the 'ōmer (with the corresponding $\frac{1}{10}$ bath), and also the léthek (the occurrence of which, indeed, as we have seen, is doubtful), being foreign to the original system (Nowack, *HA* 202 *f.*).

To obtain the modern equivalents of these measures, there are two equations which may be chosen out of

[1] [Apart from Hos. 3 2, where, as shown in *Crit. Bib.*, the text is disputable, the *ḥōmer* is mentioned only in writings of late date.—T. K. C.]

[2] 'Neither is the text secure, nor, if לֶתֶךְ is genuine, do we know the capacity of the measure' (Nowack, on Hos. 3 2).

[1] [The statement (in 2 K.), however, depends on later notices and elsewhere (see CAB) a more probable reading of 2 K., *l.c.*, is indicated.—T. K. C.]

[2] [Here, as always, we are dependent on later notices, and elsewhere (*Crit. Bib.*) it is maintained that both לתך שערים ('a lethek of barley'?) and נֵבֶל יַיִן ('a nebhel of wine'?) are corruptions which conceal something very different.—T. K. C.]

the many set forth by Hultsch (pp. 453 *f.*). These are (1) the equation of the lōg with the Græco-Roman sextarius, of the bath with the metretes, of the 6-lōg cab with the Ptolemaic χοῦς. Assuming lōg and sextarius to be exact equivalents, we should have an ephah of 72 lōg-sextarii = 39.39 litres = nearly 8⅔ gallons. (2) On the other hand the connection of Hebrew with Babylonian and Egyptian measures makes it probable, in the eyes of many metrologists, that the lōg is only roughly equivalent to the sextarius, and is really the same as the Babylonian unit of .505 l. From this we obtain an ephah of 36.37 l., or very nearly 8 gallons, or about 66.5 sextarii.[1] It must be remembered that it is perhaps more common to confound closely resembling measures in cases of capacity than in cases of length, and that for most purposes the equation lōg = sextarius was near enough.

Assuming, then, the lōg to be .505 l., we obtain the following values in lōgs, sextarii, litres, and gallons.

	Lōgs.	Sextarii.	Litres.	Gallons.
Ḥṓmer (Cor) .	720	660	363.7	80.053
Léthek . . .	360	330	181.85	40.026
Ephah-bath .	72	66	36.37	8.005
Sĕāh . . .	*24*	*22*	*12.120*	*2.668*
Great Hīn . .	18	16.5	9.090	2.001
Hīn	12	11	6.060	1.334
Sacred Hīn .	9	8.25	4.545	1.000

The chief standards of weight in use in the East, *outside of Egypt, are explained elsewhere* (SHEKEL).

4. Weights. It is there shown that coins struck on the three standards, the gold shekel standard, the Babylonian, and the Phœnician, circulated in Palestine, and these standards must therefore have been understood by the Jews. It is curious that the influence of Egypt does not seem to have made itself felt in this sphere.

As already explained, the Phœnician and the Babylonian system both used the same scale of denominations—*i.e.*, (*a*) for ordinary purposes, the shekel as unit, the mina of 60 shekels, and the talent of 60 minas; (*b*), for weighing the precious metals, the shekel as unit, the mina of 50 shekels, and the talent of 60 minas. The mina, although it must have been well known, was, so far as we can judge from literary sources, not employed by the Jews until post-exilic times. The weights of the shekels of the Babylonian and Phœnician standards having been ascertained by the method already explained (SHEKEL), we obtain the following weights (in grains troy, and in grammes) for the three denominations, reckoning 60 shekels to the mina, and confining ourselves to the common norm, as this would presumably be used for ordinary transactions.

	BABYLONIAN.				PHŒNICIAN.			
	Heavy.		Light.		Heavy.		Light.	
	Grains.	Grammes.	Grains.	Grammes.	Grains.	Grammes.	Grains.	Grammes.
Shekel .	336.6	21.81	168.4	10.91	224.4	14.54	112.2	7.27
Mina .	20,196	1,308.68	10,098	654.34	13,464	872.45	6,732	436.23
Talent .	1,211,760	78,520.77	605,880	39,260.38	807,840	52,347.18	403,920	26,173.59

[1] Cp Epiphanius' equation of the sĕāh, or ⅓ ephah, with 22 sextarii.

[Cp Winckler in *KAT*(3) 1 337-342, and on the Ass.-Bab metrology Johns, *Assyrian Deeds*, 2 134-281.]

As regards the extant weights, it must be admitted that the evidence is somewhat unsatisfactory. A number of them have been discussed by Clermont-Ganneau (*Rec. d'Arch. Orient.* 4 24 *f.*). They are :—

(*a*) 3 stone weights from Tell Zakarīyā reading apparently *néṣeph* :—

A, 10.21 grammes = 157.564 grains troy.
B, 9.5 ,, = 146.687 ,, ,,
C, 9.0 ,, = 138.891 ,, ,,

(*b*) A weight with the same inscription from ʿAnātā near Jerusalem :—

D, 8.61 grammes = 134 grains troy.

(*c*) A weight from Samaria (now in the Ashmolean Museum, Oxford) reading apparently רבע נצף (¼ néṣeph) and רבעשל.

E, 2.54 grammes = 39.2 grains troy.

B and C are somewhat broken, D is pierced, and if this piercing was not an original feature of the weight, something must be allowed for the material removed. The meaning of the inscription on E, and even the genuineness of part of it, have been hotly canvassed, *Acad.*, Nov. 18, 1892, pp. 443 *ff.* (= *PEFQu.St.*, 1894, pp. 225 *ff.*); Driver, *Intr.*(6) 449, n.*; (see *PEFQu.St.* 1894, pp. 220 *f.* 284 *f.*, and especially König, *Einl.* 425, n. 1; Lidzbarski, *Ephem. f. Semit. Epigr.* 1, pp. 13 *f.*, cited in *Ann. Br. Sch. Athens*, 7, p. 13); but the fact that the weight represents a quarter of some denomination is not disputed. The denomination in question must be not less than 4 × 39.2 grains—*i.e.*, 156.8 grains. We need not concern ourselves with the meaning of the much-disputed word נצף, which has also been read נצג and כסף (*i.e.*, silver). The highest weight represented by these pieces is about 10 grains below the light Babylonian shekel; at the same time they are too high for the Egyptian standard (in which the *ket* weighed about 140 grains), and we must therefore assume that they are meant to represent either the *Babylonian shekel or a local standard approximating to* it. If the latter, it is a heavy standard corresponding to that which Petrie (*Nebesheh and Defenneh*, published by Eg. Expl. Fund, 1888, p. 92) describes as being usually 'smothered over' as a low variety of the Persian unit; he prefers to recognise in his 80-grain standard (which would be the light standard corresponding to the one we are concerned with) a separate standard, possibly 'Hittite,' from the fact that the tribute of the Ḥeta in the lists of Thotmes III. and Ramessu III. appears to conform to it.

Of other weights found in Palestine, we may mention those analysed by Petrie (*PEFQ*, 1892, p. 114) from Tell el-Ḥesy (Lachish). His results are as follows :—

STANDARD.	No. of Specimens.	Average Value in Grains Troy.
(*a*) Phœnician . .	27	217
(*b*) Aeginetan . .	18	192
(*c*) Attic	6	65.6
(*d*) Egyptian . .	4	151
(*e*) Assyrian . . .	3	128
(*f*) Hittite . . .	3	80.5

In estimating the value of such results, it must be

remembered that, in dealing with ancient weights, it is not so much the average of a number of specimens, as the highest, which must be taken as representing the normal. It is just possible that the 'Aeginetan' weights (*b*) are merely low examples of the Phœnician standard (*a*); that (*d*) and (*f*) are to be classed together as the unit and the half of the standard of something under 168 grains arrived at above; that (*e*) and (*c*) are the unit and the half of the gold-shekel standard of nearly 130 grains, or, if of comparatively late date, belong to the slightly higher Attic-Euboic standard to which Petrie attributes (*c*). In any case, he justly calls attention to the weakness of Egyptian influence in the very S. of Palestine.

Most of the extant weights are of stone, a fact which illustrates the well-established use of אֶבֶן ('stone'), for 'weight'—*e.g.*, 2 S. 14 26, 'after the king's stone' (EV weight); Pr. 16 11, 'all the stones (RV weights) of the bag.' Further, many ancient weights were made in the form of living creatures, such as lions and ducks. Probably this is the explanation of the fact that ḳěsītah (Gen. 33 19 Jos. 24 32, etc.) is translated 'lambs' by 𝔊. Ridgeway (*Origin of Metallic Currency*, 271) considers that the name was due to its representing an old unit of barter.[1]

See especially F. Hultsch, *Griechische u. röm. Metrologie* (2) (1882), and the Greek and Roman authorities in his *Metrologicorum Scriptorum Reliquiæ*, 2 vols. (1864-66).

WEST, WEST WIND. See EARTH, FOUR QUARTERS OF, § 3, and WINDS.

WHALE ([or תַּנִּין־ם]). The 'whale' of AV has become, in RV, (1) 'sea-monster' (Gen. 1 21 Job 7 12), (2) 'dragon' (Ezek. 32 2); cp the 'jackal' of Lam. 4 3. See DRAGON, JACKAL. In Mt. 12 40, however, RV retains 'whale' (κῆτος) for the 'great fish' (דָּג גָּדוֹל, *dāg gādōl*, κῆτος μέγα) in Jon. 1 17 [2 2], though this is as inappropriate as the rendering 'a whale' in AVmg. of Job 41 1 for 'leviathan.' 'How,' says Hasselquist, 'could he (the author of Job) speak of an animal which never was seen in the place where he wrote, and at a time when he could have no history of Greenland and Spitzbergen?' (*Voyages and Travels*, 1766, p. 440). The same remark applies to the author of Jonah. It may be doubted, however, whether we need trouble ourselves to make these obvious, but superficial criticisms, nor is it more to the point to remark that the Cetacea are represented by numerous species in the Mediterranean, and that Elasmobranchs (including sharks) are also to be found there. What we have to do is to find out to what class of narrative the Book of Jonah belongs, and to interpret the 'great fish' accordingly. See JONAH (BOOK).

WHEAT[2] (חִטָּה, etc.; Dt. 8 8 etc.) has always formed one of the staple products of Palestine. In modern times the districts most suitable for its cultivation are Philistia, Esdraelon, the Mukhneh to the E. of Nāblus, and, above all, Ḥaurān, the granary of Syria, which exports its produce through the markets of Jaffa, Beirūt, Ḥaifâ, etc. In ancient times Galilee was regarded as the most fertile district; but Tyre (or possibly the N. Arabian Muṣri [Che.]) imported corn from Judah in the time of Ezekiel (Ezek. 27 17); cp also Acts 12 20, though here there is express mention of wheat. In the Sidon inscription Dora and Joppa are termed ארצת דגן, *'arṣōth dāgān*, 'lands of grain' (*CIS* i. 3 19), thus testifying, if we adopt this highly probable rendering (cp col. 984 n. 1, and see DOR, § 3), to the early fertility of the S. maritime coast.

WHEEL. 1. Of the words so rendered in EV, אוֹפָן, *ōphan* (√אפן, 'turn'?) is of most frequent occurrence; it is used of chariot wheels (Ex. 14 25, etc.), and of the wheels of threshing wains (Is. 28 27 Prov. 20 26); also in the description of Ezekiel's vision (1 15 *ff.* 10 2 6 12), and in that of the 'bases' of Solomon's lavers (1 K. 7 30 etc.).

The component parts are: (*a*) גַּב, *gab*; νῶτον, νῶτος; AV 'nave' or 'back'; RV 'felloe'; 1 K. 7 33 Ezek. 1 18 10 12. (*b*) חִשֻּׁק, *ḥiššūḳ*; πραγματεία; AV 'felloe,' RV 'spoke'; 1 K. 7 33 (*c*) חִשֻּׁר, *ḥiššūr*, αὐχήν [A]; AV 'spoke,' RV 'nave'; 1 K. 7 33; (*d*) יָד, *yād*; χείρ; EV 'axletree' (AV in Ezek. 10 12 'hand'); 1 K. 7 32 *f.* Ezek. 10 12.

2. גַּלְגַּל, *galgal* (√גלל 'roll'), is applied to the wheel of a war chariot (Is. 5 28 Jer. 47 3) and in Ezek. 23 24 26 10 may perhaps mean 'wagon.' So RV. In Ps. 83 13 for 'like a wheel' render rather 'like stubble' (see THISTLE, end).

3 and 4. For the potter's wheel (אבנים, *obnáyim*; Jer. 18 3†) see POTTERY, § 8, and in Judg. 5 28 (פעמי) read 'steps' (RVmg.)—*i.e.*, 'hoofbeats' (Moore).

Three passages, not yet mentioned, deserve separate notice: (*a*) Eccles. 12 6, (*b*) Ecclus. 36 (33) 5, (*c*) Jas. 3 6. (*a*) 'The wheel (גלגל) breaks down at the pit'—*i.e.*, the 'machinery' of the body (likened to a water-wheel) comes to a stop. (*b*) 'The heart (σπλάγχνα) of a fool is like the wheel (τροχός) of a cart'—*i.e.*, he never continues long in the same mind. (*c*) The tongue is that member which 'sets on fire the wheel of nature' τὸν τροχὸν τῆς γενέσεως—*i.e.*, the whole course of the events of life may be disturbed, ruined, by an unbridled tongue.

In Ps. 77 18 [19] AV ought to have given in marg. 'Heb., wheel,' to justify its very peculiar rendering of גלגל. Its text runs 'The voice of thy thunder was in the heaven' (RV 'in the whirlwind'). This is a development of the sense of 'wheel,' the heavens being regarded as a round arch; it is an exegetical curiosity derived from Ḳimḥi. The variety of explanations of גלגל in this passage may well excuse AV; RV's 'whirlwind' is itself a precarious rendering (see WIND).

The variations in Hab. 3 10 11 15 suggest the probability of corruption. Read probably קוֹל רַעַם בְּמַעְגְּלֶיךָ. God's 'wheels' no one could understand; but the phrase 'God's tracks (or paths)' is plain enough in the description of a theophany.

WHIP (שׁוֹט, *šōṭ*, μάστιξ), Prov. 26 3 1 K. 12 11 14 2 Ch. 10 11 14 Nah. 3 2. Figured in art. CHARIOT, fig. 7. As an Egyptian emblem of royalty, see Erman, *Anc. Eg.* 60, 63. See SCOURGE, SCEPTRE, § 2.

WHIRLING DUST (גַּלְגַּל) Is. 17 13 Ps. 83 13 [14]† RV. See WHEEL, 2, THISTLEDOWN, end.

WHIRLWIND (סְעָרָה, etc.), 2 K. 2 1 etc. See WIND, § 6.

WHITE. For לָבָן, *lābān*, Gen. 30 35 37, and חִוָּר, *ḥiwwār*, Dan. 7 9, see COLOURS, § 9 (*a*); and for צָחֹר, *ṣāḥōr*, Judg. 5 10, § 7. For לבנה, **WHITENESS**, see COLOURS, § 9 (*a*).

WIDOW[1] (ΧΗΡΑ). The earliest mention of widows in the Christian Church is in connection with the daily meal in Jerusalem (Acts 6 1), when the Greek-speaking Jews murmured against the Hebrews because 'their widows were being neglected in the daily ministration.'

[1] [Cp KESITAH, where the 'lambs' of 𝔊 is otherwise accounted for, and the passages where *ḳěsītah* (perhaps a fictitious word) occurs are examined from the point of view of textual criticism. —T. K. C.]

[2] Cp CORN, also FOOD, § 1 (*a*).

[1] For 'widow' in the OT, see MARRIAGE, § 7.

Here the widows come before us at the outset as the pensioners of the Church; but we are told no more about them. In Acts 9 39 41 we catch another brief glimpse of them in connection with the good deeds of Dorcas, who had supplied them with clothing. Peter is here spoken of as 'having called the saints and the widows,' the word being clearly used in a technical sense. In 1 Cor. 7 8 this technical sense is not equally clear; and we hear no more of widows till we come to the regulations regarding them in 1 Tim. 5 3-16. [Cp MINISTRY, § 41.] Here we find that the church of Ephesus was liable to be burdened with pensioners of this kind who had no right to claim public support. Widows who had children or grandchildren should be supported by them and not thrown upon the Church. A Christian woman who had widows—*i.e.* a woman of property with aged dependants—should recognise her individual responsibility to maintain them. 'Widows indeed'—*i.e.*, destitute and worthy of the name—the Church must support; but for admission to the roll various qualifications were necessary—destitution, piety, and prayerfulness, the age of sixty years, besides evidence of purity of life, and a record of good works such as women might be expected to perform for the common benefit. Younger widows were to have no recognition: they were a source of calumny to the Church for their idle and dissolute habits; they were to marry and bear children and rule their families.

No definite duty is assigned to widows, unless it be the service of continual prayer: they were aged pensioners, whose activity of service was past. At a later time more seems to have been expected of them in certain quarters of the Church; and a confusion consequently arose between widows and deaconesses. In the earliest period, however, the two orders were wholly distinct, the one consisting of pensioners, the other of active servants of the Church. This distinction is clearly maintained in the *Apostolic Constitutions* as late as the fourth or fifth century, and indeed never seems to have been lost in the Greek and Syrian churches. In Egypt, however, and in the Latin churches there is no trace of deaconesses, except sporadically, and even so mainly for Gaul: and the work which deaconesses did in the East was done to a large extent by widows. Ultimately both orders were swallowed up by the monastic system.

For details, and for the clearing up of the common confusions on this subject, see *The Ministry of Deaconesses* by Deaconess Cecilia Robinson (1898). J. A. R.

WILD BEAST (זִיז), Ps. 50 11 [12]. See BEAST, 6.

WILD BEAST OF THE REEDS (חַיַּת קָנֶה), Ps. 68 30 [31]. See CROCODILE; REED, col. 4024 *f.*

WILD OX (רְאֵם), Nu. 23 22 RV, AV UNICORN (*q.v.*).

WILD VINE (גֶּפֶן שָׂדֶה), 2 K. 4 39. See GOURDS, WILD.

WILLOW, WILLOWS, occur in EV as the rendering of two Hebrew words. 1. עֲרָבִים, *'ărābīm* (Lev. 23 40

Job 40 22 Ps. 137 2 Is. 15 7 44 4†). In each mention of this tree there is reference to its growing by river banks; and there can be little doubt that either a willow or a poplar closely resembling a willow (such as *Populus euphratica*, Oliv.) is intended.

The various renderings of 𝔊 point in this direction:—ἰτέας καὶ ἄγνου κλάδους Lev. 23 40; κλῶνες ἄγνου [ℵ^c.a A], ἀγροῦ [Bℵ*], Job 40 22; ἰτέαις Ps. 137 2, and ἰτέα Is. 44 4.[1]

The word is found in Arabic as *ġarab* and in Syriac as *'arbĕthā* (MH ערבה). The evidence as to species is conflicting. Thus both *ġarab* and *'arbĕthā* are ordinary renderings of ἰτέα, 'willow' (Löw, 300 *f.*, cp Cels. 1 304 *ff.*), and the Arabic word is so explained by native lexicographers. On the other hand travellers find that in modern Palestine the name is that of *Populus euphratica* (*ZDPV* 2 209), and branches of *ġarab*, brought to Europe and examined, proved to belong to this plant (Wetzstein, *ap.* Del. *Gen.*(4) 568), which is very common in Palestine, being found on the 'banks of the Jordan and all other rivers' (*FFP* 414)—including those streams E. and SE. of the Dead Sea, of which the נַחַל הָעֲרָבִים, *naḥal hā'ărābīm*, of Is. 15 7 (**Brook of the Willows**; see ARABAH ii. and cp JEROBOAM, 2, Che. *Intr. Is.* 84), is believed to be one. Willows are not very characteristic of the oriental region. Boissier gives only two as certainly indigenous in Syria proper:—*Salix fragilis* and *S. alba*, and the former may not improbably have been introduced. On the whole, therefore, there can be little doubt that the Jordan tree is *Populus euphratica*, which often greatly resembles a willow by the length and narrowness of its leaves.

The עֲרָבִים, *'ărābīm* of Ps. 137 2 have been in comparatively modern times identified as weeping willows (*Salix babylonica*)—a tree which is originally a native of Japan and could not have existed in Syria in biblical times. If it be true that it is in Palestine now 'frequently found on the coast overhanging wells and pools' (Tristr. *NHB* 415), it must have been introduced into Syria, as it has been into the Caucasus, at a later time. Here again it is most probable that *Populus euphratica* is meant.[2]

2. צַפְצָפָה, *ṣaphṣāphāh* (ἐπιβλεπόμενον[3] Ezek. 17 5), the Ar. *ṣaphṣāph*,[4] may denote the willow, or more probably the *Populus euphratica* (see above). N. M.—W. T. T.-D.

WIMPLE (obsolete, originally a covering for the neck, chin, and sides of face), AV for מִטְפַּחַת, *miṭpáḥath*, Is. 3 22, RV SHAWL. See MANTLE, § 2 [3]; VAIL.

WIND, WINDS (רוּחַ; ανεμος; πνευμα [in 𝔊, Gen. 8 1 Is. 7 2 Job 30 15 Ps. 104 4 Wisd. 13 2; in NT, only in Jn. 3 8 Heb. 1 7];[5] πνοη [Acts 2 2]; *ventus, aura*,[6] *spiritus*).

1. Hebrew conception.

The four 'ends' of the earth, in the Hebrew mind, correspond to the four 'ends' of the heaven (see EARTH, § 1); and it might equally well be said that the four winds came from the ends of the earth and from the ends of heaven, the earth being a disk surrounded by an ocean, and the heaven a vault overarching that ocean. Hence 'Enoch' tells us (*Enoch*, 76), 'And at the ends of the earth I saw twelve portals opened for all the winds, from which the winds proceed and blow over the earth. . . . Through four of these came winds of blessing and prosperity, and from those eight came

[1] In Is. 15 7 it is taken as a proper name—Ἄραβας.

[2] The text, however, is disputed (see Che. *Ps.*(2), who reads in *v.* 1 עַל־נַחֲלַת יְרַחְמְאֵל and in *v.* 2, עֲרָבִים בְּתוֹכָהּ פִּתְחוּ כנ׳, referring to the N. Arabians). Tristram's identification of the עֲרָבִים with oleanders (*Nerium Oleander*) labours under this difficulty—that *ġarab* is not used in this sense. Winckler's view (*AF* 3 417) that the *'arbhê náḥal* of Lev. 23 40 are synonymous with the *hădas* of Neh. 8 15 ignores the arguments mentioned above.

[3] Implying an erroneous derivation from צפה.

[4] Acc. to Fränkel (143) this is a loan word.

[5] Heb. 1 7 = Ps. 104 4; in Jn. 1 7 πν. is suggested by symbolism. See SPIRIT.

[6] Gen. 3 8, 'ad auram post meridiem'; EV 'in the cool (Heb. wind) of the day.' Cp Cant. 2 17 4 6.

hurtful winds.' This notion (on which cp DEW, RAIN) illustrates a number of biblical passages.

See, *e.g.*, Jer. 10 13=51 16 (cp Ps. 135 7) 'he causes mists to ascend from the ends of the earth, . . . and brings forth the wind out of his store-chambers'; Jer. 49 36, 'I will bring the four winds from the four ends of heaven'; Dan. 7 2, 'the four winds of heaven burst forth upon the sea'; Rev. 7 1, 'I saw four angels standing at the four corners of the earth, holding the four winds of the earth, that no wind should blow on the earth, or on the sea, or on any tree.'

This, then, would seem to be the Hebrew idea—that the winds are stored in chambers at the point where heaven and earth join. For though the circle down to which the vault of heaven reaches is 'marked on the surface of the ocean' (Prov. 8 27; cp Job 26 10), yet ocean and earth are not rigidly separated in the Hebrew mind, as we see from the (probable) fact that the Bab. *apsu*, 'ocean,' has become in Hebrew *'aphsē* in the phrase *'aphsē 'āreṣ*,[1] (ends of the earth'), which has arisen by a process of Hebraising adaptation. The idea in Rev. 7 1 seems to be that the angels placed over the respective store-chambers of the wind keep back the winds which are impetuously pushing forward, somewhat as Ištar is said (IR 29 3 Karppe) to hold together the vault of heaven and earth (so that the upper waters cannot burst forth in excess).

Very different ideas were awakened by the thought of the wind. As 'Enoch' says, the wind might be either a blessing or a curse. Two of its characteristics were specially depressing: (1) its immense power, and (2) its apparent irregularity. (1) The early disciples of Jesus exclaim, 'Who then is this, that even the *wind* and the sea obey him' (Mk. 4 41 cp Ps. 107 29), and a poet, unable to find a worthy name for God, asks, 'Who has gathered (=can gather) the wind in his fists'? (Prov. 30 4). Certainly human power was baffled in presence of the wind. (2) And not less powerless here was human wisdom. Once allow the belief in God's love-directed wisdom to be obscured, and it becomes a most depressing thought that the wind is perpetually 'going toward the south,' or 'turning about to the north,' in a series of revolutions devoid of apparent reason (Eccles. 1 6; cp 11 4). But there are more comforting associations of ideas than these. God 'created the wind' (Am. 4 13), and the cosmogonist who says that all God's works were attested by him to be 'very good' ascribes the growth of order and of life to a 'wind of God' which 'hovered' (the wind is imagined as a mighty bird) over the primeval waters (Gen. 1 2; see CREATION, § 10)—an old myth which has become a symbol of the highest spiritual energy (cp Jn. 3 8), and which was in the mind of Ezekiel when he wrote, 'Come from the four winds (=parts of heaven), O breath (הָרוּחַ), and breathe upon these slain, that they may live' (Ezek. 37 9). See SPIRIT, § 1 *f.* And if the wind ever does harm, it is only at God's command (Is. 29 6 Am. 1 14 Ecclus. 39 28); indeed, 'he makes winds his messengers' (Ps. 104 4; cp 148 8).

2. Terms: north wind. Such compound expressions as 'north-east' (εὐρακύλων; see EUROCLYDON) being impossible in Hebrew, the four great terms for winds had to be used freely. It was not always convenient to take two clauses to express the simple idea that something was occasioned by a NE. or a SE. wind (see Is. 41 25 Ps. 78 26).

In the two following passages, N.=NW., and in the second, S.=SW.: (*a*) 'The north wind bringeth forth rain' (Prov. 25 23 RV); (*b*) 'Awake, O north [wind], and come, thou south [wind],' Cant. 4 16. See below, § 5, and, for parallels, § 3.

The *north wind* proper is called by Josephus (*Ant.* xv. 9 6, § 338) ἀνέμων αἰθριώτατον, 'the wind which most produces clear weather,' as contrasted with the impetuous south winds on the coasts of Palestine which prevent ships from finding commodious anchorage. Still, it could be boisterous without being rainy; mariners passing near Joppa called it μελαμβόρεον 'the black N. wind' (Jos. *BJ* iii. 9 3, § 422). So 𝕲 in Prov. 27 16 gives the emphatic words βορέας σκληρὸς ἄνεμος,[1] and Jerome, describing the wind from many years' acquaintance, calls it *ventus durissimus.*[2]

Jerome was even misled by his local knowledge into a false rendering of תחולל in Prov. 25 23, *dissipat* (pluvias), AV 'driveth away (rain)'. The meaning of 'north' is explained elsewhere (see EARTH AND WORLD). Cold comes from the north star (Job 37 9 emended text)—*i.e.*, from the rough N. wind, which, as Ben Sira tells us, covers water with a 'breastplate' of ice (Ecclus. 43 20). He adds that it 'burns up' the grass; cp Milton (*PL*, 2 595),

. . . . the parching air
Burns fierce, and cold performs the effects of fire.

Ezekiel, in his great vision, speaks of a 'whirlwind (רוּחַ סְעָרָה, *rūaḥ sĕ'ārāh*) coming out of the north' (Ezek. 1 4). This suggests a correction of the Hebrew text of Ecclus. 43 17 *b*, where the Oxford editors render,

'The *hot winds* of the north, the tempest, and the
whirlwind';

but where a reading given in the margin of the MS is surely preferable,

'The *whirlwind*[3] of the north, the hurricane, and the
tempest.'

For though soon after the parching effect of the cold does seem to be referred to (*v.* 20), yet זלעפות, *zil'āphōth*, a word used of the simoom (see below), could hardly be used of the N. or NW. wind, especially in combination with סוּפָה, *sūphāh*, 'hurricane,' and סְעָרָה, *sĕ'ārāh*, 'tempest.'

The parallel to the line with 'the whirlwind of the north' Ecclus. 43 17 should probably be

At his will the south wind blows.[4]

3. South wind. Just so in Job 37 9 the whirlwind is said to come from the 'chambers of the south' (EARTH [FOUR QUARTERS], § 2); cp Is. 21 1 Zech. 9 14. Either the SE. or the SW. (strictly SSW.) wind may be meant; both these winds are called sirocco by travellers in Palestine, though etymologically the term only belongs to the E. wind.[5] In Ps. 78 26 the SE. wind is called first a S., and then an E. wind; in 𝕲 (see Ex. 10 13 14 21 Job 38 24 Ps. 78 26*a* Ezek. 27 26) it becomes νότος or the S. wind. This is because a hot, parching wind analogous to the sirocco blows in Egypt from the S.; it is there called *khamsīn*, because it blows at intervals during a period of fifty days. In Palestine, however, in the south of which the 'sirocco' is very troublesome, it does not often blow directly from the S., so that when in Job (which was hardly written, as Hitzig and Herz have supposed, in Egypt but in Palestine), we find the sultry heat of the 'south wind' described (Job 37 17) in terms appropriate to the 'sirocco,' we must suppose the SE. and the SSW. wind to be meant' Lk. 12 55 ('when ye see the S. wind blow, ye say, καύσων ἔσται), requires a similar explanation. In Babylonia the SW. wind was represented as a ferocious demon, images of which are to be seen in museums. This does not, however, illustrate Is. 21 1, which refers to the S. of Palestine (cp Zech. 9 14).

This wind blows from the Syrian and Arabian desert

1 (The phrase does not happen to occur in our oldest records [cp GEOGRAPHY, § 1], but is evidently archaic.) So Hommel, and Gunkel, *Schöpf.* 46. Halévy (*Recherches*, 228), however, derives Bab. *apsû* from a Semitic root אפס; cp Jensen, *Kosmol.* 244. The original vocalisation of the above Heb. phrase may have been *'a̧phsī' āreṣ*. In course of time *'aphsi* was interpreted as meaning 'ends (of)'=אַפְסֵי, as if syn. with קְצוֹת. But even if אַפְסֵי or קְצוֹת is used in the sense 'ends (of the earth)' the old idea has not entirely gone. 'The creator of the ends (קְצוֹת) of the earth,' (Is. 40 28) means 'the creator, not merely of the most distant countries, but of the confines of earth and heaven, where the storehouses of the winds and the rain are,' unless, indeed, we suppose that the writer does but repeat an old phrase taken from hymns to Yahwè, the sense of which he has forgotten. So Karppe, *J. As.* 9 92 *f.* [1897].

1 𝕲's form of the text, however, was, like MT's, corrupt.

2 The Targ. (Prov. 25 23 27 16) gives the north wind the expressive title גרביתא, the scouring, or sweeping (wind).

3 Reading עַלְעוֹל (see below). 𝕲 καὶ καταιγὶς βορέου.

4 Reading as 𝕲. The text is disarranged (see Lévi and Halévy).

5 Sirocco from Ar. *šarḳiyya* 'easterly.'

(Jer. 4 11 13 24 Hos. 13 15 Is. 21 1, cp Job 1 19), and, as 𝔊's rendering καύσων[1] suggests, brings extreme heat, at any rate when it blows for a length of time in the spring; in the winter, however, it brings agreeable, bright, and warm days between the times of rain. For its parching effect on vegetation, to which 𝔊's name refers, see Gen. 41 6 23 27 Ezek. 17 10 19 12 Jon. 4 8 (where חֲרִישִׁית, *ḥărīšīth*, RV 'sultry,' is obscure; see JONAH [BOOK], § 1 [1], n. 2). It is also commonly found by critics in רוּחַ זִלְעָפוֹת, *rūăḥ zil'āphōth* (AV 'horrible [mg. burning] tempest'; RV 'burning wind') in Ps. 11 6; see *e.g.*, Baethgen, but on the text cp *Ps.*(2) In the Lebanon the E. wind is still used as a simile for anything very disagreeable; there, as in Arabia, it is called the *šamūm* from *šammun* ('poison').

4. East wind.

Its effects are thus described by a traveller in the desert. 'When this wind blows the atmosphere assumes a yellowish appearance, fading into gray, and the sun becomes of a dusky red. The smell is nauseating and sulphureous, the vapour thick and heavy, and, when the heat increases, one is almost suffocated.'[2] See Wetzstein's instructive statement in Del. *Hiob*,(2) 349, n. 1.

This wind, and the NW. wind, are prevalent in Palestine in summer; we have already mentioned the beneficent mists which they bring from the Mediterranean. These are generally known as DEW (*q.v.*); in Prov. 25 23 they are called נְשִׂיאִים, *nĕśī'īm* (so we should read, with Grä., for גֶּשֶׁם; 𝔊 νέφη; cp Prov. 25 14 𝔊). In Cant. 4 16 the bride calls the N. and the S. winds, by which she means the NW. and the SW., to spread abroad the fragrance of her garden.[3] Both winds in summer would be agreeable, and if at times they bring rain (especially the SW., called in Arabic, 'the father of rain'), yet rain is one of God's best gifts (Ps. 104 13 147 8); in Arabian style, it is 'the father of life.' On the 'strong west wind' of Ex. 10 19, see LOCUSTS, RED SEA, and on the relative prevalence of winds throughout the year, see *PEFQSt.* 1900, pp. 296 *f.*

5. West wind.

Reference has already been made to the 'whirlwind' seen by Ezekiel (1 4), and to the 'whirlwind of the north,' as we should probably read in Ecclus. 43 17.

6. Whirlwind.

Ezekiel's word is סערה, *sĕ'ārāh*; Sirach's (if we are correct) עַלְעוֹל, *'al'ūl*, an Aramaic word, used in Targ. for סופה, *sūphāh*, and סערה, *sĕ'ārah*, and read by Perles [*Analekten*, 38], in Job 36 33, for עַל עולה.

We will now survey the use of the Heb. words rendered 'whirlwind.'

1. סופה, *sūphāh*, is in AV rendered 'whirlwind,' in Job 37 9 (𝔊 ὀδύναι) Prov. 1 27 10 25 Is. 5 28 17 13 21 1 66 15 Jer. 4 13 Am. 1 14 (𝔊 συντέλεια, and in Nah. 1 3) Nah. 1 3, but 'storm' in all the other places where it occurs (Job 21 18 Ps. 83 16 𝔊 ὀργή) Is. 29 6 Hos. 8 7 (𝔊 καταστροφή). RV substitutes 'storm' for 'whirlwind' in Job 37 9 Is. 17 13, and 'whirlwind' for 'storm' Is. 29 6.

That the Hebrew word is not always used in the strictly technical meaning of the English expression seems evident (𝔊 uses καταιγίς; also λαῖλαψ, συσσεισμός (?); Vg. *tempestas, turbo*). The whirlwind suggested itself as an apt figure (*a*) for the rapid attack of great conquering powers, like Assyria, Babylonia, and the Syria of the Seleucidæ. Thus, in Am. 1 14 *f.*, the 'day of the whirlwind' is parallel to the 'day of battle,' and the next verse speaks of captivity. In Is. 5 28 Jer. 4 13, the wheels of war-chariots are 'like the whirlwind,' and in Dan. 11 40 'the king of the north' (Syria) comes out 'like a whirlwind' (but cp 𝔊).

(*b*) The whirlwind also symbolises the suddenness of the divine judgments; nor can we forget that Yahwè, in imaginative descriptions, has an affinity to the storm-gods of neighbouring countries. It has in fact become (in no unworthy sense of the term) a commonplace to say that Yahwè moves in the whirlwind (Ps. 18 10 97 2 Nah. 1 3; cp CHERUB, § 4, THEOPHANY, 2). This accounts for passages like Is. 66 15 Zech. 9 14 (see 𝔊), and also, if we look closely, for Is. 17 13 Hos. 8 7 Prov. 10 25 Ps. 58 9, where the 'whirlwind' spoken of certainly means the divine wrath. Prov. 10 25, however, should be understood as in RV; it states that *when* the whirlwind of judgment *has passed* through the land (cp Is. 28 17 30 30), the wicked will be swept away, but the righteous will stand unmoved. And with this we may compare the fine parallelistic similitude which closes the sermon on the Mount (Mt. 7 24-27). The winds that 'blew and fell upon (προσέπεσαν *v.* 25, προσέκοψαν *v.* 27) that house' are the winds of the Messianic judgment.

2. סְעָרָה, *sĕ'ārāh*, is synonymous with *sūphāh* (cp, *e.g.*, Zech. 9 14 סַעֲרוֹת תֵּימָן with Is. 21 1, סוּפוֹת בַּנֶּגֶב), and when it stands alone is usually rendered 'whirlwind' (2 K. 2 1 11 Job 38 1 40 6 Is. 40 24 41 16, etc.), in EV, but sometimes 'storm' (Ps. 107 29 Is. 29 6 [RV whirlwind]); as also in the compound expressions רוּחַ סְעָרָה, *rūaḥ se'ārāh* (Ps. 107 25 148 8 Ezek. 1 4) or ר׳ סְעָרוֹת, *rūaḥ sĕ'ārōth* (Ezek. 13 11 13). סַעֲרַת יהוה in Jer. 23 19 (σεισμός) 30 23 (ὀργή), is rendered 'whirlwind of the Lord' by AV and 'tempest of the Lord' by RV. 𝔊 renders καταιγίς, συσσεισμός, λαῖλαψ [in Job? λαῖλαψ καὶ νέφη(ος) 38 1 νέφος 40 6]; Ecclus. 43 17, συστροφὴ πνεύματος (סופה וסערה); 48 9 λαίλαπι πυρός [סערה]; *tempestas, turbo.*

3. According to RV we have once an expression for 'whirlwind' in the technical sense—viz., סַעַר מִתְחוֹלֵל, Jer. 23 19 (. . . εἰς συνσεισμόν, συστρεφομένη; *tempestas erumpens;* RV 'whirling tempest'; AV wrongly 'grievous tempest'). But the existence of חול, II., though recognised by Ges.-Buhl, is not quite certain. In all the passages where it occurs, the text is doubtful. Here, *e.g.*, it is possible to read מִתְגּוֹרֵר '*sweeping* (tempest)' as in Jer. 23 19 (RV) ὀργὴ συστρεφομένη; Vg. *procella ruens;* if מִתְגּוֹלֵל 'rolling itself along' should not be preferred (so Grä.).

4. שַׂעַר, *śá'ar*, Dan. 11 40 (𝔊 Theod. om.; *quasi tempestas*); cp Ass. *šâru* (Del. *Ass. HWB* 635), Is. 28 2 (שַׂעַר קֶטֶב, 'destroying storm'; βίᾳ καταφερομένη?).

5. גַּלְגַּל, *galgal*, Ps. 77 19 [18] RV (AV 'heaven'). The rendering has some good authority (Ges., Hitz., Del., Kau.). But nowhere else does גלגל mean 'whirlwind'; the Vv. adhere to the sense 'wheel.' See further WHEEL, and THISTLE, *ad fin.*

T. K. C.

WINDOW. The words so rendered are:

1. אֲרֻבָּה, *'arubbah*, Is. 60 8. See LATTICE, § 2, 1, and COAL, § 3.

2. חַלּוֹן, *ḥallōn*, Gen. 26 8. See LATTICE, § 2 2.

3. כַּוִּין, *kawwīn* (pl.), Dan. 6 10 [11]. See LATTICE, § 2, 3. On these three words, cp HOUSE, § 3.

4. צֹהַר, *ṣohar*, Gen. 6 16. See LATTICE, § 2, 7.

On the שֶׁקֶף, *šĕkeph*, and שְׁקֻפִים, *šĕkŭphim*, of 1 K. 6 4 7 4 *f.*, see LATTICE, § 2, 6. On שֶׁמֶשׁ, *šémeš*, in Is. 54 12 see PINNACLE.

WINE AND STRONG DRINK

Terminology (§§ 1-9). Winepress (§§ 11-16). Wine making (§§ 17-24). Varieties (§§ 25-27). Mixing (§§ 28-30). Metaphors (§ 31). Use of wine (§ 32).

In this article it is proposed to examine the terms rendered wine or strong drink in EV,[1] and to discuss the methods adopted by the Hebrews in the preparation of these beverages. For the cultivation of the vine in Palestine reference must be made to the articles VINE, and NEGEB, § 7, and for the various stages in the growth of the fruit to the article GRAPE.

The first place in our study of the relative terminology belongs to יַיִן *yáyin*, οἶνος, apparently a loanword in Semitic (see BDB, *s.v.*, with references there, to which add O. Schrader in Hehn, *Kulturpflanzen u. Hausthiere*,(6) pp. xiv 91 *ff.*, also

1. yáyin; οἶνος.

[1] καύσων or καύσων ἄνεμος in 𝔊 corresponds to three Hebrew words, קָדִים, 'east wind,' שׁרב (Is. 49 10, see MIRAGE), and חֹרֶב (Gen. 31 40 [A]; cp Lk. 12 55).

[2] *Fundgruben des Orients*, 6 396 (Rosenmüller, *Bibl. Geogr. of Asia Minor*, etc., 126). Dr. Geikie illustrates the effects of the sirocco by the story of Jonah.

[3] So Magnus and Grätz. The words are not a summons to the N. and S. winds properly so-called (Del.), nor yet to all the four chief winds, represented by N. and S. (Siegfried).

[1] For a complete list of passages with the renderings of the principal versions (to be used with caution, however) see Lees and Burns, *The Temperance Bible-Commentary*, 412-428 (1868).

Muss-Arnolt, 'Semitic words in Greek and Latin' in *Publications of Amer. Philolog. Ass.* 1892, pp. 142-146). Occurring over 140 times in the traditional text of OT, *yáyin* denotes, like its Greek and Latin congeners, *οἶνος* and *vinum*, the juice of the grape, fermented and matured in appropriate vessels. It is represented as in daily use, whether at the ordinary family meal and the more ambitious banquet (MEALS, § 12), or at the sacrificial feast and in the ritual of the sanctuary (RITUAL, § 2; SACRIFICE, col. 4193 etc.). *Yáyin* is uniformly rendered by 'wine' in EV, by *οἶνος* in 𝔊 (except Job 32 19, where the sense is correctly given by *γλεῦκος* sweet [fermenting] must), and by *vinum* in the Lat. verss. In OT *yáyin* is confined to grape-wine; but in later Hebrew it is extended to include both the freshly-expressed juice or must (see *tīrōš* below) and the fermented juice of various fruits, such as the apple-wine frequently mentioned in the Mishna (see § 26). The corresponding *οἶνος* is found over 30 times in NT, not reckoning its presence in compounds such as *οἰνοπότης* 'winebibber' (Mt. 11 19 Lk. 7 34). In תירוש

2. *tīrōš*. *tīrōš*, we have a word of uncertain etymology,[1] occurring 38 times in OT. A convenient summary of the various qualities predicated of *tīrōš* is given in Driver's *Joel and Amos*, 79 *f.*; for more detailed discussion see A. M. Wilson, *The Wines of the Bible* [1877] 301-339. In 11 places *tīrōš* is associated with corn as a valued product of the soil, and in 19 other passages with corn and fresh oil (*yiṣhār*, the raw, unclarified oil as it flows from the oil press, see OIL). Hence by analogy we ought to regard *tīrōš* as primarily the freshly-expressed and still unfermented grape-juice, technically known as must, the Latin *mustum* (Mic. 6 15 Vg.). It is also applied, however, proleptically to the juice while still in the grape, as in Is. 65 8 ('the new wine is found in the cluster' EV; cp the Latin phrase *vinum pendens*), and by another figure to the grapes in the press-vat (Mic. *l.c.* 'thou shalt tread *tīrōš* [RV the vintage], but shalt not drink the wine' [*yáyin*]). On the other hand it is important, in view of the controversies to which the term *tīrōš* has given rise, to note that in certain passages it clearly denotes the *product of fermentation*, or wine properly so called. Its application in this respect, however, was apparently limited to 'new wine,' as frequently rendered in AV and RV,[2] either while still in the fermenting stage or during the next few months, while the process of maturing was still incomplete. The grounds on which this conclusion is based are these:—

(1) In one passage where *tīrōš* is associated with whoredom and wine (*yáyin*) as 'taking away the understanding' (Hos. 4 11 RV),[3] intoxicating properties are unmistakably assigned to it. (2) *Tīrōš* is repeatedly mentioned as subject to the laws of tithe and of the first fruits (Dt. 12 17 14 23 18 4 Neh. 10 37 *ff.* and elsewhere). Now the later Jewish code specifies the precise moment when the expressed grape-juice becomes subject to the law of tithe: 'Must[4] is tithable from the time that it throws up scum' (*Ma'aser.* 1 7, reading יְקַפֶּה; so evidently Surenhusius' unpointed edition, as shown by the explanations of Maimonides and Bartenora; cp also Levy, *NHWB*, *s.v.* קפא)—*i.e.*, from the moment when it *begins to ferment*. The result is the same if, with later editions, we read the piel יְקַפֶּה and render: 'from the time one begins to skim the froth' (Jost, Sammter; cp also Jastrow, *Dict. of the Targumim, etc.*, *s.v.*). Even the inferior wine made by pouring water on the refuse of the press had to ferment (הֶחֱמִיץ) before becoming subject to tithe (*Ma'ăsēr Sh.* 1 3; cp, for the heave-offering, *Tĕrūm.* 3 1, where the reference is to wine that had passed through the stage of alcoholic fermentation and had become vinegar (acetous fermentation)). Hence when it is said that *tīrōš* shall be drunk in the courts of the sanctuary (Is. 62 8 *f.*), the conclusion is unavoidable that *tīrōš* is not here the unfermented must, but true fermented wine. The wine of the drink-offering (נֶסֶךְ Nu. 15 5, etc.; see under SACRIFICE, § 31 *a*) is never described otherwise than as *yáyin*, except once when it is described as *šēkār* (see below, § 8). The *tīrōš*, finally, which in an early passage (Judg. 9 13) is said to 'cheer God' as a libation, and to exhilarate man in the accompanying sacrificial feast, must be understood, in the light of what has just been said, as a fermented wine. (3) The evidence of the versions in this question must not be overlooked. With two exceptions (Is. 65 8, *ῥώξ* 'grape-stone'; and Hos. 4 11, for which see foot-note above) 𝔊 has uniformly rendered *tīrōš* by *οἶνος*. The Targums and the Peshitta with almost equal uniformity give חַמְרָא חֲמַר fermented wine (see § 4 below), whilst Jerome, with very few exceptions, renders by *vinum*, not as we might expect, by *mustum* (except Mic. 6 15), even where, as in Pr. 3 10 Joel 2 24, the sense seems to require *mustum*.

3. *'āsīs*; γλεῦκος. The word *'āsīs* (עָסִיס) is found five times in OT and is rendered in AV twice by 'new wine,' twice by 'sweet wine' and once (Cant. 8 2) by 'juice.' RV renders uniformly by 'sweet wine' except in the passage cited, where it appears only in the margin.

Derived from the verb עסס, to crush by treading, *'āsīs* is apparently a poetical synonym of *tīrōš*, denoting primarily the freshly-expressed juice of the grape or other fruit (so Am. 9 13; 'sweet wine'; imitated Joel 3 [4] 18). In Joel 1 5 and Is. 49 26, however, the context shows that, like *tīrōš*, *'āsīs* might be an intoxicating beverage, as it doubtless is in Cant. 8 2, where it is made from pomegranates (§ 26). In this passage 𝔊BאA renders by *νᾶμα*, whence EV 'juice'; in Is. 49 26 by *οἶνος νέος*; Am. 9 13 Joel 3 [4] 18 by *γλυκασμός*, which recalls the *γλεῦκος* (EV 'new wine') of Acts 2 13. *Gleukos* is used of the 'sweet' grape juice through all the stages of its passage into fermented wine. Thus the lexicographer Hesychius defines *γλεῦκος* as 'the juice which drops (*τὸ ἀπόσταγμα*) from the grape, before it is trodden' (cp the explanation of Ex. 22 29 [28], § 15 below). Again the word is used of must in the process of fermentation, as Job 32 19 (𝔊B *ἄσκος γλεύκους ζέων*), whilst in the passage before us (Acts 2 13) the reference is clearly to the strongly intoxicating qualities of new and immature wine—in this particular case, wine of the preceding vintage. Here may be taken the reference in Neh. 8 10, to eating the fat and drinking the sweet (מַמְתַקִּים 𝔊 *γλυκάσματα*), evidently a variety or varieties of sweet wine recalling the יַיִן מָתוֹק of *Mĕnāḥ.* 8 5.[1]

4. *ḥémer*, etc. Another poetical designation of wine is *ḥémer* (חֶמֶר) which occurs only in the poem Dt. 32 14; for in Is. 27 2 we must read, for the MT חֶמֶר (AV 'red wine'), with RV^mg. חֶמֶר 'a pleasant vineyard.' In Aramaic, however, as frequently happens, the Hebrew poetical term is the ordinary word for wine; so six times in the Aramaic portions of Ezra (6 9 7 22) and Daniel (5 1 2 4 23). The etymology from חמר, *fervere*, to foam, ferment (cp יַיִן חָמַר Ps. 75 8 [9] 'the wine foameth,' RV) shows that *ḥémer* and its cognates in Aramaic and Arabic specially denote wine as the product of fermentation.

5. *sōbē*. *Sōbé* (סֹבֶא) occurs only in Is. 1 22 (EV 'wine' 𝔊 *οἶνος*), Hos. 4 18 (their drink,' RV^mg. 'their carouse'), and Nah. 1 10 ('their drink'); but the text of the last two passages is very uncertain (BDB *s.v.* and the Comm.). That *sōbē* was some strongly intoxicating beverage the root-word, *sābā*, 'to drink to excess,' abundantly proves (see *e.g.* Pr. 23 20 *f.*). The cognate *sabu*, a synonym of *kurunnu*, denoted in Assyrian a drink from sesame (Del. *Ass. HWB*, *s.v.*).

In a small number of post-exilic passages, we meet

[1] The usual derivation from *yāraš*, 'to take possession of,' though supported in Aramaic by the cognate *mērīth* from *yĕrath*, is not convincing. Recently it has been suggested that *tīrōš* is a loan-word from Sumerian through Assyrian (see Ball and Haupt, *SBOT*, *Gen.*, note on 27 28).

[2] According to *Temp. Bib. Comm.* (*ut supr.* 415) *tīrōš* is translated in AV 26 times by 'wine,' 11 times by 'new wine' . . . and once (Mic. 6 15) by 'sweet wine.' A table of all the occurrences with their renderings is given in Eadie's *Cyclopædia*, *s.v.* 'Wine.' RV adds to these the rendering 'vintage' Nu. 18 12 Mic. *l.c.* and in several other passages in the margin. The American revisers would consistently render by 'new wine' throughout.

[3] It is possible, however, that תִּירוֹשׁ is here a clerical error for שֵׁכָר which the context certainly leads us to expect. 𝔊's rendering *μέθυσμα*, a frequent equivalent of *šēkār*, but not elsewhere of *tīrōš*, supports this view. The other ancient versions follow 𝔊.

[4] The original has יַיִן, *yáyin*, *tīrōš* having now become obsolete.

[1] For the methods adopted to increase the sweetness of wines, see §§ 15 22 below.

with a group of allied terms derived from the verbal root מָסַךְ, to mix (wine) with spices (Pr. 9 2 5), and the cognate מָזַג, which in the Hebrew of the Mishna period signified 'to mix with water'—viz. *mések* מֶסֶךְ (Ps. 75 8 [9] EV 'mixture'),[1] *mimsāk* מִמְסָךְ (Prov. 23 30, EV 'mixed wine,' Is. 65 11 AV 'drink offering,' RV 'mingled wine' [κέρασμα] 'unto Destiny'), and *mézeg*, מֶזֶג (Cant. 7 2, AV 'liquor,' RV 'mingled wine,' 𝔊 κρᾶμα). The nature of the mingling or mixing here implied will be fully discussed later (§ 29).

6. mések, mimsāk, etc.

In Is. 25 6 the word שְׁמָרִים *šĕmārīm*, properly the lees of wine (Ps. 75 8 [9] Jer. 48 11 Zeph. 1 12), is used for the sake of the assonance with *šĕmānīm*, 'fat things,' to signify wine (EV 'wines on the lees') in a figurative sense. For the obscure or perhaps corrupt term אֲשִׁישָׁה which AV, following an erroneous tradition, has rendered a 'flagon of wine' (2 S. 6 19; cp 1 Ch. 16 7 Hos. 3 1 Cant. 2 5) see the discussions under FRUIT (§ 5). In Nu. 6 3 wine and strong drink are both distinguished from the unfermented juice (מִשְׁרָה) (EV 'liquor') of the grape.[2]

7. Miscellaneous and figurative expressions.

Our list of the words rendered wine in EV may close with a reference to three figurative expressions which are met with at very different stages of Hebrew literature. In the early book of the covenant we have the unique expression דֶּמַע (literally 'tear' Ex. 22 28), which includes the first flow of the juice of olives as well as of grapes (for a new suggestion as to the origin of this term see § 15). In the Gospels we find wine designated 'the fruit of the vine' (τὸ γένημα τῆς ἀμπέλου Mt. 26 29 Mk. 14 25 Lk. 22 18), a periphrasis doubtless already current in Jewish speech, since it is found in the time-honoured benediction over the wine-cup in *Bĕrākh.* 6 1 (פְּרִי הַגֶּפֶן—for the words of the blessing see MEALS, § 7, end). In all periods, finally, we find the poetical designation 'blood of the grape' from the red colour of the expressed juice (Is. 63 2) derived from the stalks and skins of the fruit (Gen. 49 11 Dt. 32 14 Ecclus. 39 26 50 15, cp Rev. 14 20 and the Arabic *damu-z-zikk*, blood of the wineskin).

There still remains for examination the important term שֵׁכָר *šēkār* (from the root שׁכר, common to all Semitic dialects, which supplies the Hebrew words for 'drunk,' 'drunkard,' and 'drunkenness'). In 𝔊 the word has assumed the form σίκερα—but occasionally translated μέθυσμα, twice μέθη, and once οἶνος—through the influence of the Aramaic *šikrā*, שִׁכְרָא; and in Jerome, *sicera*. The etymology warrants the inference that *šēkār* is to be regarded as a comprehensive designation for every *sort of intoxicating beverage* from whatever source derived, or, as Jerome has it, 'omne quod inebriare potest' (Vg. Lev. 10 9 Nu. 6 3 1 S. 1 15).

8. šēkār, 'strong drink.'

In one of his letters Jerome expands his definition as follows:—'Sicera hebræo sermone omnis potio, quæ inebriare potest, sive illa quæ frumento conficitur, sive pomorum succo, aut quum favi decoquuntur in dulcem et barbaram potionem, aut palmarum fructus exprimitur in liquorem, coctisque frugibus aqua pinguior coloratur' (Ep. ad Nepotianum, ed. Vallarsi, 1 266).[1]

1 𝔊 has here the apparent contradiction ποτήριον οἴνου ἀκράτου πλῆρες κεράσματος (cp Rev. 10 14 τοῦ κεκρασμένου ἀκράτου), the explanation being that οἶνος ἄκρατος is the usual designation of wine undiluted with water, whilst κέρασμα denotes the addition of aromatic herbs (see § 29).

[2 In Cant. 2 13 etc. Sym. renders סמדר (RV 'in blossom'; Ges., following Syr. authorities, *flos vitis*) by οἰνάνθη. It has been suggested that the 'impossible' שַׁדְמוֹת in Is. 16 8 should be corrected into סמדר (GRAPE, 3), and a special reason for the mention of the vine-blossoms may be found in the use of these blossoms in flavouring new wine (cp Duval, *REJ* 14 277). Such flavoured wine was called οἶνος οἰνάνθινος. Hasselquist thus describes the method employed, viz., 'hanging the powder produced by drying the flowers of the vine in the cask, when the new wine begins to ferment' (*Voyages and Travels*, 1766, pp. 401 *f.*).]

From this specification, it will be noted, wine is apparently excluded, and for this exclusion there is a certain amount of justification. Thus in the priestly legislation affecting the Nazirites (Nu. 6 3 *f.*) vinegar of *yáyin* is distinguished from vinegar of *šēkār*,[2] which shows that by the early post-exilic period, in certain circles at all events, *yáyin* was no longer included in the category of *šēkār* or 'strong drink.' We are not justified in inferring from this, however, that the two categories of wine and strong drink were at all periods mutually exclusive. Thus when the term *šikaru* is first met with on the soil of Palestine, it is used for 'drink' generally, and is repeatedly associated with food, oil, honey, etc. (see the Amarna letters, *KB* 5, index *s.v.*). One has but to recall the enormous number of jars of wine which Thothmes III. received from Syria at an earlier period to see that the *šikari* or 'drinks' of the Amarna letters must have included wine. In the Assyro-Babylonian contract-tablets *šikaru* denotes intoxicating beverages generally, and in particular wine made from dates (Del. *Ass. HWB*, *s.v*; see further, § 25). Indeed it is extremely probable that in prehistoric times, while the Semitic races were still confined to their primitive home in Arabia, the principal, if not the sole, intoxicant was obtained from fermented date-juice.[3] To this first of all the name *šēkār* would be given. When at a later period the Semites spread northward and became acquainted with the vine and its fruit, it is only natural that the term should be extended *to include the fermented juice of the grape*, for which, however, the loanword *yáyin* was by and by adopted to distinguish grape wine from the older date wine or *šēkār* in the strict sense, as well as from the fermented juices of other fruits, such as pomegranates, quinces etc. (see § 26) included under *šēkār* in its wider application

The distinction which has just been drawn between these varying applications of the term *šēkār* receives ample confirmation from a closer study of the OT data. Thus in the many poetical and semi-poetical (prophetical) passages where the word occurs in the parallelism alongside of *yáyin* (Pr. 20 1 31 6 Is. 5 11 22 28 7 etc.) it is unlikely that *šēkār* is more than a synonym of *yáyin*, denoting 'strong,' 'heady' wine or such like. Perhaps also 'spiced wine' (for which see § 29), as stated in Suidas' definition, *s.v.* σίκερα: σκευαστὸν πόμα, καὶ παρ' Ἑβραίοις οὕτω λεγόμενον μέθυσμα, οἶνος συμμιγὴς ἡδύσμασιν. The Targums and the Peshitta frequently render *šēkār* by 'old wine,' whilst the Midrash records the tradition that it denoted wine in the natural state (חַי) as distinguished from *yáyin* or wine diluted with water (מָזוּג); in both cases, however, we have probably nothing more than exegetical guesswork. Of much greater importance for our argument is the fact that in the unique passage, Nu. 28 7, the material of the drink offering is expressly designated *šēkār* (AV 'strong wine,' RV 'strong drink'). Now it is difficult to believe that in the historical period any liquor other than the juice of the grape was accepted for this purpose,[4] and still more difficult to admit that any other liquor than wine was intended in this passage of the Priests' Code. In other legislative passages, such as Nu. 6 3 *f.*, cited above, and Dt. 14 26, *šēkār* must be distinguished (from *yáyin*) in the direction suggested by Jerome, as a general term for all fermented beverages other than *yáyin* and in particular—though of this we have no positive OT evidence—for date wine. A land whose produce of dates was beyond reckoning (*Aristeæ Epist.*, ed Wendland, 112) was certainly not ignorant of the methods of manufacturing wine from their juice, although the name date wine is first met with in the Talmudic period (see further, § 25).

Last of all, mention may be made of one or two more comprehensive terms. From the root שָׁתָה, 'to drink' we have מִשְׁתֶּה, *mišteh*, as a general term for beverages, especially wine. Thus workmen, receiving wages and 'everything found,' have an allowance of 'meat and drink (מִשְׁתֶּה) and oil' (Ezra 3 7; cp the parallel *akalī*, *šikarī*, *šamnī* of *Am. Tab.* 209 12 *f.* and elsewhere; also Dan. 1 10 with *vv.* 5 8 16, where the *mišteh* is said to consist of wine). From the associated root שׁקה, we have both שִׁקּוּי, *šikkūy*, (Hos. 2 5 [7], where bread, oil, and 'drinks' are parallel to the 'corn, oil, and wine' of *v.* 8 [10]; Ps. 102 9 [10], and

9. Some general terms.

1 With this definition of *šēkār* may be compared 'Omar's definition of *ḥamr* as including wine from grapes, dates, honey, wheat, and barley' (Jacob, *Altarab. Beduinenleben*, 97, quoting Buḫāri).

2 The distinction here so clearly drawn between the two kinds of vinegar is fatal to our acceptance of the tradition, represented in Onkelos and approved by Rashi (Comm. *in loc.*), that the *šēkār* is old *wine*.

3 For the importance of the palm among the early Semites see Barton, *A Sketch of Semitic Origins*, 75 *ff.*; cp also PALM, § 1.

4 Date juice was of course accepted in the earliest times; in Babylonia indeed in all periods libations of date wine (*niḳi ša šikari*) were common (see RITUAL, § 2).

figuratively Pr. 3 8) and מַשְׁקֶה, *mašḳeh*. *Mašḳeh* is used comprehensively, as in Lev. 11 34, for 'every drink that may be drunk,' and in the later plural form (מַשְׁקִין) it becomes, in the Mishna, the general term for all sorts of beverages—water, wine, milk, etc. (see *Tĕrūm.* 11 2). Hence מַאֲכָל וּמַשְׁקֶה is Delitzsch's rendering of the Gk. βρῶσις καὶ πόσις (Col. 2 16), whilst their respective plurals represent the βρώματα καὶ πόματα of Heb. 9 10.

The economic use of grapes in ancient, as in modern times, was fourfold. The grapes might be eaten in their natural state (לַחִים, Nu. 6 3, AV 'moist'), or they might be exposed to the sun and used as raisins (FRUIT, § 4), or finally they might be trodden in the press and the juice converted either into grape-syrup or *dibs* (HONEY, § 1 (3)) or into wine. The last of these processes alone concerns us here.

10. Use of grapes.

The ancient winepresses, traces of which are found in every part of Palestine, from Dan to Beersheba, have proved the most permanent memorials of the Hebrew occupation, and show that the land of promise was indeed a 'land of wine and vineyards' (2 K. 18 32). Two adjoining vineyards might have one press in common (*Dĕmai* 6 7). The typical winepress consisted of two troughs of varying dimensions, at different levels, hewn out (חָצַב, Is. 5 3 RV) of the solid rock, the upper of the two having the larger superficial area, the lower the greater depth.[1] In the upper trough, which we shall call the pressvat (גַּת, *gath*, in AV variously rendered press, winepress [sometimes in one word, sometimes in two] and winefat) men and women trod (דָּרַךְ) the grapes, the expressed juice flowing by a channel (צִנּוֹר, *Ma'ăsēr.* 1 7) through the intervening rock into the lower trough or winevat (יֶקֶב, *yéḳeb*; see Schick's diagrams reproduced below). This distinction between the *gath* and the *yéḳeb* is not always observed by the OT writers, *yéḳeb* being occasionally used to denote the pressvat (Is. 16 10 Job 24 11) whilst either may be used by metonymy for the whole winepress, as may be seen from the names of localities now with *gath* (Gath, Gath-hepher, etc.), now with *yéḳeb*, as Zeeb's winepress (Judg. 7 25) and the king's winepresses (Zech. 14 10) in the neighbourhood of Jerusalem. A third term, פּוּרָה, *pūrāh*, which may be rendered winetrough, is used as a synonym both of *gath* (Is. 63 3) and of *yéḳeb* (Hag. 2 16 reading as in AV מִפּוּרָה—the RV rendering 'vessels,' following 𝔊 and Vg., is not an improvement). By NT times *yéḳeb* as the name of the winevat had become almost, if not altogether, obsolete, its place being supplied by בּוֹר, *bōr* (Mishna *passim*)—*gath*, however, remaining for the pressvat. Occasionally, however, we find *gath* used in the Mishna for the winepress as a whole, with the two troughs or vats designated respectively the 'upper' vat (גַּת הָעֶלְיוֹנָה) and the 'lower' vat (גַּת הַתַּחְתּוֹנָה, *Tĕrūm.* 8 9 *Ma'ăsēr.* 1 7 etc.). In 𝔊 the uniform rendering of *gath* is ληνός (also Mt. 21 33 Rev. 14 19 *f.* 19 15), which is also used to represent *yéḳeb* in some passages, whilst in others we find for *yéḳeb* the more exact ὑπολήνιον (Is. 16 10 Joel 3 [4] 13 Hag. 2 17 Zech. 14 10; also Mk. 12 1).

11. Two-trough press.

Whilst a press with two vats seems to have been in general use, several instances are known of an arrangement with three and even four. Thus the late Dr. Schick has given a description (*PEFQ*, 1899, p. 41 *f.*), with plans here reproduced, of an elaborate press discovered by him at 'Ain Kārim, to the SW. of Jerusalem. Here we have a trough *a*, about 7 ft. square, into which the grape-baskets were first emptied. This trough at once recalls the προλήνιον by which 𝔊 renders the *yéḳeb* of Is. 5 2, and is probably the *'abīṭ*, עֲבִיט, of the Mishna (Bāb. *Mĕṣ.* 5 7 [where it occurs alongside of the *ma'ăṭān*, מַעֲטָן, or trough for the olives; see OIL, § 2] *Ṭohŏr.* 10 4 [the grape juice here trickles in drops from the *'ābīṭ* into the *gath*] Jer. *Mō'ēd Ḳāṭ.* 28 1 *a* [grapes trodden in the *'abīṭ*]).

12. Three-trough press.

The *prolēnion*, *a*, is connected by a channel in the rock with the larger trough, *b*, 10 ft. by 8 ft., the floor of which is lower by 3 ft. than that of *a*. From *b*, again, two channels lead into two vats at a still lower level, connected with each other by a third channel; the smaller of the two vats, *c*, is about 3½ ft. square and 4 ft. deep, whereas *d* measures over 5 ft. square and is 6½ ft. deep. In the floor of the larger vat, a circular hollow has been sunk at one side, easily recognisable in the sectional plan, to allow the last drops of the must to be scooped out. This is evidently the 'little vat' (בּוֹר הַקָּטוֹן) of the Mishna. A somewhat similar arrangement of three vats, the floors of which were paved with a mosaic of 'rough white tesseræ set in plaster' was unearthed, with several other presses, in 1889 at Tell-eṣ-Ṣāfi (*PEFQ* 1900, p. 34 with plans, 32 *f.*; see this volume *passim* for numerous vats laid bare by the explorers).

In vineyards where the nature of the ground or other considerations did not permit of rock excavation, pits

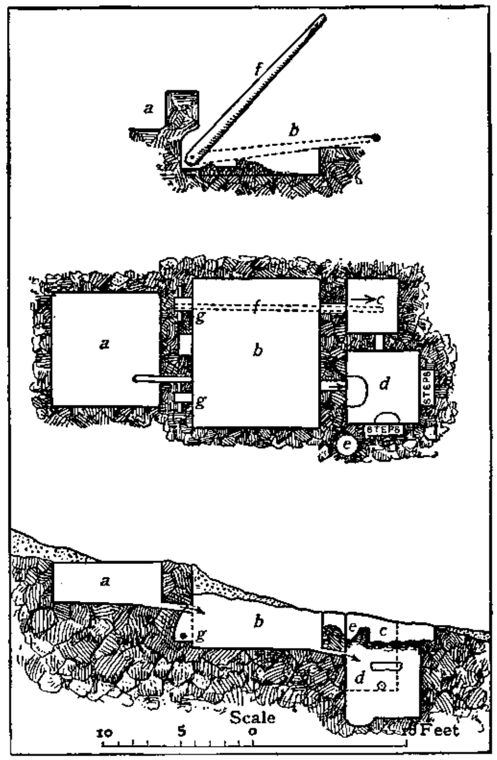

FIG. 1.—Ancient wine-press. (From the Palestine Exploration Fund, *QS*, 1899.)

were dug in the ground (Mk. 12 1 RV, 'a pit for the winepress,' Mt. 21 33),[1] which were then lined with masonry or cement and coated with pitch (see *'Ăbōdāh Zārāh*, 6 11, where the name *gath šel ḥéres*, גַּת שֶׁל חֶרֶס, or cement-vat, is given to this kind of press). An excellent specimen, probably of the thirteenth century B.C., was discovered by Bliss at Tell el-Ḥesy (*A Mound of Many Cities*, 69 *f.*, with illustr.). The vats, of which there were three, were *circular*. The uppermost had a

[1] Of the modern Syrian winepresses it is said that 'if the upper trough be 6 ft. long by 5 broad [and a foot and a half deep] the lower one will be about 4 ft. long by 2 ft. broad, but about 3 ft. deep.' G. M. Mackie, *Bible Manners and Customs*, 1898.

[1] That the ληνός of this parable was not rock-hewn, as is generally assumed, is evident from the context of Mt. 25 18 where the same expression, 'dug the ground,' ὤρυξεν γῆν (so B א) is used.

diameter of 63 ins., walls of mud, and a floor of cement sloping gently towards a cup-like hollow, the 'little vat' described above. The second vat of the series had also a diameter of over 5 ft. and walls of brick with a floor of cement consisting of pebbles imbedded in lime, sloping rapidly towards the outlet into the lowermost of the vats, a small pit lined with rough stones and in the side of which was a stone spout.

A third species of press was used from time immemorial in Egypt, and is attested for Palestine, where

13. Wooden press. it bore the name *gath šel 'ēṣ*, גַּת שֶׁל עֵץ, or wooden press (*'Ăbōd. Zār. l.c.*). As represented by Wilkinson (*op. cit.* 1 385) this was simply a large wooden trough raised considerably above the ground and furnished with spouts through which the must flowed into the receiving-jars. In the particular specimen reproduced by Wilkinson ropes are seen hanging from a wooden roof, by means of which those treading the grapes supported themselves. A modern press of the same type is reproduced in Van Lennep, *Bible Lands* [1875] 118. It is possible that the *yéḳeb* of Is. 5 2 is to be understood not as a whole press, but as a rock-hewn vat (such as vat No. 4 at Tell-eṣ-Ṣâfi, *PEFQ*, 1900, p. 33 *f.*), and the ὑπολήνιον of Mk. 12 1 as a cemented pit, both intended to receive the juice expressed from a wooden press such as that now described.[1]

On the approach of the vintage season (ἡμέραι τρυγητοῦ, Ecclus. 24 27, ὁ καιρὸς τῶν καρπῶν, Mt. 21 34, שְׁעַת הַגִּתּוֹת, *Chăgīgah* 3 4), which corresponded

14. Grape harvest. fairly with our September, whole families repaired to the vineyards for the more expeditious gathering of the fruit, sleeping in booths, and living largely on the ripening grapes. It was the most joyful time of all the Hebrew's year (Is. 16 10). The ripe clusters (אֶשְׁכֹּלוֹת) were either nipped off (קָרַץ, *Pē'ā*, 7 4), or, more usually, cut off (בָּצַר) with a curved knife (מַגָּל, Joel 3 [4] 13, *Ohāl.* 18 1; δρέπανον, Rev. 14 19; EV 'sickle'). Hence is derived the special name for the grape harvest, בָּצִיר, *bāṣīr* (cp בֹּצֵר, the grape-gatherer, Jer. 6 9 49 9; τρυγῶν, Ecclus. 30 25 [33 16]), although קָצִיר, *ḳāṣīr*, strictly the corn-harvest, is sometimes applied to the vintage (Is. 16 9 17 11 18 5 Joel 3 [4] 13, 'put ye in the sickle for the harvest is ripe').[2]

The grapes destined for the manufacture of wine were carried in baskets (סַל, Mishna *passim*, סַלְסִלָּה, Jer.

15. Spreading-place. 6 9 AV, see, however, RV^mg. and art. BASKET) to the press where they were immediately trodden out, or, as is still a common practice in Syria and other wine-producing countries, spread out for some days[3] on the מִשְׁטָח or spreading-place (cp FRUITS, § 4, with footnote), where the grapes were laid either on the bare ground or on vine leaves (*Tohŏr.* 10 4 *f.*). The *miṣṭah* was generally, if not always, close to the press, so that the juice exuding from the grapes under their own pressure might trickle into the vat (נִפַּח לַגַּת, *ib.* 10 5). The object of this proceeding was to increase the amount of sugar and diminish the amount of water in the grapes (see Redding, *A History . . . of Modern Wines*(3) [1851], 55), with a view to the production of a specially sweet wine, like the אִלְיַסְטָן (ἡλιαστόν) of *Mĕnāḥōth* 8 5. An ancient *miśṭāh* or spreading-place with its adjoining vat

[1] Is it possible that *pūrāh* (Is. 63 2; see above) was the special designation for a press of this description?

[2] The unity of the prophet's figure in this verse has hitherto been marred by the commentators taking *ḳāṣīr* in its usual sense of corn harvest, and consequently rendering *maggāl* by 'sickle.' In reality the reference is to the grape harvest and (𝔊 τρυγητός) the gatherer's knife. This view of the passage preserves the unity of the figure and is confirmed by 𝔊 and the author of Revelation (14 19 *f.*), and by the fact that the only other instance of בָּשַׁל, in the sense of 'to be ripe,' refers to the ripening of grapes (Gen. 40 10).

[3] At present from five to seven days, near Hebron even for sixteen days *ZDPV* 11 170.

has, in the writer's opinion, recently been laid bare at Tell eṣ-Ṣâfi (*PEFQ*, 1900, p. 31 *f.* with plans). It consists of 'a floor of rock, roughly rectangular, about 42 ft. long by 16 ft. 8 ins. broad. It has been smoothed level and sunk to a maximum depth of 5 ins. below the surrounding rock outcrop.' The many cups scattered over the floor (cp a similar series of cups at Tell-el-Judeideh, *ib.* 249, with illustrations) were evidently for receiving the juice expressed from the grapes by their own weight. This has always been considered to produce a quality of wine superior to that obtained by treading the grapes, and was termed πρόχυμα by the Greeks, and *protropum* by the Romans (*Geopon.* 6 16, Pliny *HN* 14 85; cp Hesychius' definition of γλεῦκος cited above, § 3).

The many cup-like hollows in the floor of the *miśṭāh* suggest a new explanation of the unique term דֶּמַע (Ex. 22 29 [28] lit. 'thy tear' [דִּמְעֲךָ] EV 'thy liquors,' 𝔊 ἀπαρχὰς ληνοῦ, so Pesh.). The hollows in question may very naturally have been termed the 'eyes' of the *miśṭāh* (cp 'the seven eyes upon one stone' in the difficult passage Zech. 3 9), when the liquid collected in them would as naturally have been called the 'tear.' There are analogies in other languages for this application of the word 'tear,' as in the Arabic *dam'atu-l-karmi* (König, *Stilistik*, etc., 106) and the Spanish *lagrima*, the name for wine made from grape-juice which has exuded without pressure (Redding, *op. cit.* 58).

The treading of the grapes was accompanied by much merry shouting and singing on the part of the treaders (דֹּרְכִים—in later Hebrew דָּרוֹךְ, women treaders דָּרְכוֹת, *Tĕrūm.* 3 4), a proceeding several times referred to in OT. The vintage-shout even received a special name, the *hēdād* (הֵידָד, Is. 16 10 Jer. 25 30 48 33). A snatch of a vintage song is preserved in Is. 65 8: 'Destroy it not, for a blessing is in it.' The Greek translators, as is well known, read the titles of Pss. 8 81 and 84 as עַל הַגִּתּוֹת, which they rendered ὑπὲρ τῶν ληνῶν (Jerome, *pro* [or *in*] *torcularibus*), evidently regarding the Psalms in question as vintage hymns, corresponding to the ὕμνοι ἐπιλήνιοι of the Greeks, a view adopted in recent times by Baethgen (*HK* 16).[1]

The grapes having been trodden as thoroughly as possible with the feet—the juice thus expressed was

16. Qualities of wine. termed by the Romans *mustum lixivum*—a further flow was obtained by piling the husks and stalks in a heap (תַּפּוּחַ, *'Ăb. Zār.* 4 8 etc.) in the middle of the pressvat. Flat stones, or planks of wood, were laid upon the top of the *tappūāḥ*,

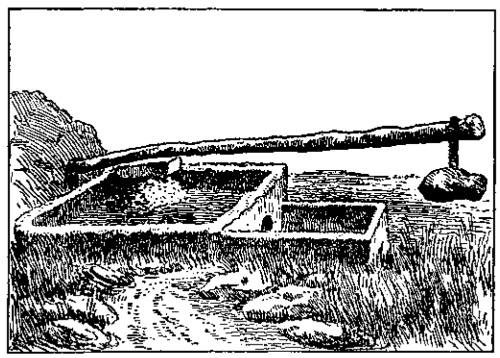

FIG. 2.—Modern contrivance for pressing grapes in Palestine.

and the whole was subjected to pressure by means of a wooden press-beam (עֲנִיל הַגַּת, *Shabb.* 1 9; *Ṭohŏr.* 10 8), one end of which was fixed into a socket in the wall of the pressvat, as shown in Schick's diagram reproduced above, whilst the other end was weighted with stones (see the illustr., fig. 2, of the same procedure at the present day, Mackie, *Bible Manners and Customs*, 45). The

[1] Specimens of modern vintage songs in Arabic are given by Dalman in his *Palestinischer Dîwân* (1901) 28, *ff.*

wine obtained from this second pressing, which produced the *mustum tortivum* of the Romans, was of course much inferior to that obtained from the *mustum lixivum*. Still lower in the scale must be placed the beverage termed תֶּמֶד, *temed* (so pointed by Dalman, *Aram.-Neuhebr. Wörterb.*, *s.v.*, who derives the word from the Latin *temetum*), which was prepared by pouring water upon the skins and stalks after they had been pressed (*Ma'ăsēr.* 54 6), or upon the lees of generous wine (*Shabb.* 20 2) and allowing the whole to ferment (הַחְמִיץ, *Ma'ăs. Sh.* 1 3), precisely as in the manufacture of the *lora* of the Romans. *Temed* was also prepared from grapes that had become atrophied on the vine (*'Orlā* 1 8). Some such wine of poor quality may be intended in some cases by the חֹמֶץ, *ḥōmeṣ*, of the OT (AV 'vinegar'), which like *lora* was the *vinum operarium* or workmen's wine (Ruth 2 14).

17. Fermentation. Proceeding now to the preparation of the ordinary varieties of wine, we are met by the somewhat remarkable fact that of the two hundred or more biblical references to wine, only two or three refer specially to any of the many processes in its fermentation and maturing. We are accordingly dependent on the more numerous and more explicit statements to be found in the Mishna, which apply strictly to the procedure of the second century A.D. But the methods then in use are of so primitive a character that they may safely be used to illustrate the procedure of a much earlier period. In the case of small vineyards, it was perhaps possible to allow the must to ferment in the winevat, fermentation, in the warm climate of Palestine in September, commencing a few hours after the expression of the juice. Thus in *Ābōth* 4 26 the man that learns from a young and immature teacher is compared to one 'that eats unripe grapes and drinks wine from his vat' (יַיִן מִגִּתּוֹ).[1] After the first and most active stage of the fermentation, technically known as the 'tumultuous' fermentation (*Redding, op. cit.* 62), was completed in the vat, the new wine was drawn off (חָשַׂף, Hagg. 2 16, in the Mishna, זָלַף) and transferred to skins (Job 32 19 Mt. 9 17 and ||s, see BOTTLE, § 1) or jars for the so-called 'after-fermentation.' It is impossible that the must could ever have been put into skins to undergo the whole process of fermentation, as is usually stated, the action of the gas given off in the earlier stages of the process being much too violent for any skins to withstand. Where a large quantity of grapes had to be trodden, it was necessary to relieve the winevat by transferring the must immediately to earthenware jars, of which the Jews possessed a large variety (see Krengel, *Das Hausgerät in der Mišnah*, pp. 48 *ff.*). The most frequently mentioned is the חָבִית, *ḥābīth*, corresponding to the Roman *dolium*, a large full-bellied jar with a wide mouth, of the type represented under POTTERY, Fig. 3, No. 1, intermediate in size between the smaller כַּד, *kad* (κάδος) and the larger פִּיטֹס, *pīṭōs* (πίθος). The jars, which had previously been lined with pitch, were placed beneath the spout of the vat if it had one (see the Tell el-Ḥesy vat above described), or were filled—but not to the brim (*Mĕnāḥ.* 8 6)—by means of the *māḥaṣ* (מַחַץ, *Ṭohŏr.* 10 7) or dipper, a bowl-shaped vessel like those used in Egypt for the same purpose (illus. Wilkinson, *op. cit.* 1 387; cp POTTERY, Fig. 2, No. 6). Schick's diagram above shows at *e* a special cavity in which the jar was placed to be filled. The jars were then set aside[2] for the contents to ferment. The active fermentation of the Roman wines lasted about nine days, according to Pliny, whilst the modern red wine of Syria is said to complete its first fermentation in from four to seven days, and to become drinkable after the lapse of from two to four months (*ZDPV* 11 171; see below, § 21).

18. Straining, etc. The scum which was thrown up during the process of fermentation was removed from time to time, the technical term for which was קִפָּה (*Ma'ăsēr.* 1 7 4 1 etc.). The later Jewish legislation decreed that the new wine was not admissible for the drink offering until it had stood for at least forty days in the fermenting-jars (*'Ēdūy.* 6 1; *Bāb. Bath.* 97 *a*; *Targ. Jerus.* 1 [Pseudo-Jonathan] on Nu. 28 7, where after rendering *šēkār* by 'old wine' it adds: 'if old wine cannot be had, let wine forty days old be poured out before the Lord'). On the expiry of this period, then, the wine was assumed to have sufficiently settled to allow of its being racked off into smaller jars (נֶבֶל, קַנְקַן, לָגִין, כַּד, for all which see Krengel, *op. cit.*) corresponding to the Roman amphoræ, and into wine-skins (נֹאד). The skins were preferred to the jars where the question of transport was concerned (Josh. 9 4 1 S. 1 24 Judith 10 5 etc.). In order to purify the new wine from the lees (שְׁמָרִים) or deposit of husks, stalks, etc., that had settled at the bottom of the fermenting jars, it was poured through a strainer (מְשַׁמֶּרֶת שֶׁל יַיִן, *Kēl.* 25 3 and often), which might be of metal, as in the passage cited (see Becker's *Gallus*, Eng. ed. 490, for illust. of a fine metal *colum vinarium*), or of earthenware (*Kēl.* 3 8), or more frequently a plain linen cloth (סוּדָר, *Shabb.* 20 2 = σουδάριον), the Roman *saccus vinarius*. To strain wine was termed זִקֵּק (Is. 25 6 'wines on the lees well strained') and סִנֵּן (Mishna, *passim*), in NT διυλίζω (Mt. 23 24 also 𝔊 of Am. 6 6 τὸν διυλισμένον οἶνον, which suits the parallelism better than the MT).[1] A striking figure employed by Jeremiah to denote the even tenor of Moabite history informs us that it was the custom to 'fine' the new wine by pouring it at intervals from one jar to another. 'Moab has been at ease from his youth, and has settled on his lees [cp the similar figure Zeph. 1 12] and has not been emptied (לֹא הוּרַק) from vessel to vessel, neither has he gone into captivity: therefore his taste remains in him, and his scent [the modern "bouquet"] is not changed. Therefore behold the days come, says Yahwè, when I will send tilters [צֹעִים, from צָעָה, to tilt over a vessel in order to pour out its contents; see RV$^{mg.}$] and they shall tilt him, and they shall empty his vessels and break his jars' (Jer. 48 11 *f.*). Care had to be taken, on the other hand, lest this frequent 'tilting' should set up acetous fermentation and turn wine into vinegar. The frequent

19. No 'old' wines. references to this danger in the Mishna show that the Jewish wines were not calculated to keep for a long period. Indeed wine was already 'old' when a year had passed from the time when it had left the winepress. 'Old wine' (יָשָׁן; cp the similar use of παλαιός absolutely in Lk. 5 39) we read in the Mishna (*Bāb. Bath.* 6 3) 'is wine of the previous year'—*i.e.*, of the vintage last but one —'very old wine (מְיֻשָּׁן) is wine that is three years old,' *i.e.*, according to Jewish reckoning, of the vintage last but two, in other words from two to three years old. 'New wine,' accordingly, would apply only to wine of the immediately preceding vintage. Probably the ordinary custom is reflected in the statement in the book of Jubilees (7 1 *f.*) that Noah prepared the wine of his vineyard in the seventh month, and kept it in a jar until he offered it on the following new year's day; that is to say wine which had begun to ferment, say, on the first of October was considered ready for use about the middle of the following March.

1 Here, and elsewhere in the Mishna, however, *yáyin* may be used instead of the now obsolete *tīrōš* to denote the unfermented must, in which case the aphorism throws an interesting sidelight on the Jewish appreciation of unfermented wine!

2 From *Abōdāh Zārāh* 4 10 we learn that the jars were left open; see מפנה in Strack's glossary to this tractate.

1 Ignatius is fond of the metaphor from straining or filtering; see *ad Rom.*, salutation, 'filtered (ἀποδιυλισμένοις) from every stain'; *ad Philad.* 3.

20. Storage. When the wine had been sufficiently refined and clarified, the mouth of the amphora, which had previously been lined (זִפֵּת) with pitch, was closed with a lid (כִּסּוּי), probably in the shape of a hollow cone (Krengel, *op. cit.* 50, illustr. *ap.* Wilkinson, *op. cit.* 1 387), or, if the jar had a narrow neck, it was corked (פָּקַק) with a stopper (מְגוּפָה; Mishna oft.). Both lids and stoppers were carefully luted with gypsum or clay, pitch, wax, etc. (see the list in *Kel.* 10 2).[1] Wineskins were fastened with a knotted cord (*Shabb.* 15 2; cp ἀσκὸς δεδεμένος, Job 32 9 𝔊). The jars were now ready to be stored in the wine-cellars (אֹצְרוֹת הַיַּיִן, 1 Ch. 27 27, Vg. *cellæ vinariæ*, by which Jerome also renders the בֵּית הַיָּיִן of Cant. 2 4 [AV 'banqueting house']). Wine shops (חֲנוּת, *Bāb. Mĕṣ.* 4 11, *'Āb. Zār.* 5 4) were common in Jerusalem in NT times. Those of Arabia—often kept by Jews, whence the name *ḥānūt*—frequently had displayed a sign or 'bush,' with which some commentators have identified the obscure 'banner' of the 'house of wine' in the passage of Canticles just cited (cp ENSIGNS, § 1 *b*).

21. Modern process. The process of wine-making as above described on the basis of the data of the Mishna may be illustrated by two brief accounts of the modern process in Eastern lands. Writing in 1824 Henderson in his *History of Ancient and Modern Wines* thus describes the method adopted in Persia (264): 'When the grapes are gathered, they are brought to the cellar, and introduced into a vat or cistern, formed of masonry, and lined with plaster, about 8 ft. in length and breadth, and 4 in depth, where they are trodden, and the juice which flows from them is collected in a trough at the bottom, from which it is immediately removed into large earthen jars, to undergo the requisite fermentation. . . . When the fermentation has fairly commenced, the murk is stirred by one of the workmen with his arms bare; and this operation is repeated for eighteen or twenty successive days. The wine is then strained, through coarse sieves, into clean vessels, which are filled to the brim, and covered with light matting. In these it is allowed to remain for thirty or forty days, and when the secondary fermentation is thought to be completed, it is racked into smaller jars or bottles in which it can be conveniently transported.' The following extract applies to the present day. 'In Damascus the Christians use principally red grapes in the manufacture of wine. After the grapes have been trodden, the must is transferred with the husks to large earthenware jars, the mouths of which are closed with pieces of linen. Fourteen days afterwards when the fermentation is completed the wine is poured into smaller jars, stirred daily for two months with a rod to prevent acetous fermentation and then strained through a thick linen cloth. The wine is now drinkable. It is preserved in jars which are stoppered and sent to the cellar' (Anderlind in *ZDPV* 11 171 [1888]).

22. 'Boiled wine.' In what has been said hitherto of the Jewish methods of manufacture, the ordinary quality of wine has been exclusively in view. We have also seen (§ 15) that it was usual to expose some part, at least, of the vintage, to the sun before pressing in order to increase the sweetness and strength of the wine; but with this exception the mode of manufacture was as above described. Another procedure which aims at improving a must that is poor in sugar is still in vogue in Syria and elsewhere.[2] The must is boiled in a caldron for a short time, until it is reduced four or five per cent in volume (see the directions from the geoponic collection *ap.* Henderson, *op. cit.* 41), after which the liquor is set aside to cool and in due time to ferment. This is apparently the 'boiled wine' (יַיִן מְבֻשָּׁל, *Terum.* 26; *Mĕnāḥ.* 8 5) which the context shows to have been inferior to wine made and matured in the ordinary way from the best quality of must. The authorities, however, differed in their attitude to 'boiled wine.' 'It is not permissible to boil the must (יַיִן) of the heave offering, because its bulk is thus diminished. But Rabbi Yĕhūda allows it, because it is thereby improved' (*Tĕrūmōth* 11 1). The process now described must not be confused with the much more elaborate process of the manufacture of grape-syrup, full details of which have been given under HONEY, § 1 (3) (cp also PANNAG).

23. Doctored wine. The 'doctoring' of wines, as it is now called, was not unknown to the Jews, since we read of the lees of a more generous wine being added to a wine of inferior quality to increase its strength (see *Bāb. Mĕṣ* 4 11, where also is mentioned the familiar expedient of combining a strong, harsh [קָשֶׁה] wine with one of a milder [רַךְ] quality). The method of hastening the maturing of wines by fumigation (Henderson, *op. cit.* 54 *ff.*, Wilson, *op. cit.* 96 *ff.*, Smith's *Dict. of Gr. and Rom. Ant.*(3), 2 967 *b*) was also practised; but such 'smoked wine' (יַיִן מְעֻשָּׁן, *Mĕnāḥ.* 8 5) was, like the 'boiled wine,' admitted with a grudge as the material of the drink offering (*Mĕnāḥ. l.c.*). The poet's comparison of himself to 'a bottle in the smoke' (Ps. 119 83) is generally supposed to refer to the fumigation of the wine-skin (so RV$^{mg.}$); but the terms are not sufficiently precise for this special application, and the reference is more probably to any skin-bottle exposed to the smoke of the hearth.

24. Various 'brands.' Of the wines most esteemed in OT times, only two are known to us by name, viz., the wine of Lebanon (Hos. 14 7 [8], but see Nowack, who suspects an error in the text [see further *Crit. Bib.*, and cp LEBANON, § 8]) and the wine of HELBON (Ezek. 27 18), a locality about three hours distant from Damascus, to the NW. Its wine was greatly prized by the Assyrians and is frequently mentioned in the cuneiform literature (with nine other varieties in the list R 4 49-13, Del. *Ass. HWB*, *s.v.* 'karânu'). The Persian kings are said by Strabo (15 735) to have drunk only wine from Helbon, and even at the present day it is held in repute. In the Mishna treatise *Mĕnāḥōth* (8 5) five obscure localities are mentioned by name as supplying the wine most esteemed in the Temple service (see for discussion of these Neubauer, *Géogr. du Talmud*, 84 *f.*).

25. Date-wine. In discussing the signification of the term *šēkār* (§ 8), we found that both etymology and history pointed to its being originally a comprehensive term for intoxicating beverages of all sorts, including wine, but that, with the popularisation at an early period of the word *yáyin* as the exclusive designation for the fermented juice of the grape, the two terms came to be regarded as mutually exclusive. It was further pointed out that of all the intoxicating liquors, other than wine, likely to be known to the early Hebrews as a branch of the Semitic family, date-wine was historically the oldest. It is not till the Talmudic period, however, that we meet with its Hebrew name, יֵין תְּמָרִים, 'wine of dates' or 'date-wine.' This beverage is said by Herodotus (1 194) to have been the principal article of Assyrian commerce and is mentioned times without number in the cuneiform contract-tablets (Del. *Ass. HWB*, *s.v.* 'šikaru'). The greater part of the wine of Arabia Felix in Strabo's time was made from the palm (4 25; see, further, Löw, *Aram. Pflanzennamen*, for the Arabic *sakr*). The dates were first steeped in water—a modius, or peck, of ripe dates to three congii (about 17 pints) of water is Pliny's recipe (*HN* 14 19)—then submitted to the press, after which the juice was allowed to ferment. The wine which Pliny mentions as being made 'from the pods of the Syrian carob' (see HUSKS, FRUIT, § 14) was no doubt prepared in a similar manner.

26. Apple-wine, pomegranate-wine. Repeatedly in the later Jewish literature reference is made to a species of cider known as tappūăḥ-wine (יֵין תַּפּוּחִים, *Tĕrūm.* 11 2; *Nĕd.* 6 9, etc.). In the uncertainty that attaches to the identification of the *tappūăḥ* (see APPLE, and cp FRUIT, § 12) we cannot be sure whether we have to do with true cider-

[1] There is a decided flavour of modernity about the precautions against 'broaching the admiral' or tampering with the wine-jars *in transitu*, as detailed in *'Ăbōdāh Zārāh* 5 3 *f.*

[2] 'In some parts, *e.g.* Portugal, must which is too watery is concentrated by evaporation in a caldron;' Thudicum, *A Treatise on Wines*, 50 (1894); cp Wilson, *The Wines of the Bible*, 110 *ff.*

or apple-wine, or with the *cydoneum* or *cydonites* of the classical writers, which was made from the juice of the quince. In any case the beverage was intoxicating and therefore taboo to those who took a vow of abstinence from wine (see *Nĕdār.* 6₉). From the kindred pomegranate was prepared the only fermented liquor other than wine mentioned by name in the OT (unless we are prepared to render *šēkār* by palm-wine)—viz., the *'āsīs rimmōnīm*, עֲסִיס רִמֹּנִים (so read Cant. 8₂, AV 'juice,' RV 'sweet wine of [pomegranates]).' This beverage is described by Pliny as 'vinum e punicis quod rhoïten vocant' (*HN* 14₁₆), and is the ῥοΐτης οἶνος of Dioscorides (5₃₄). Both these wines were prepared, like the English cider, we may assume, by crushing the fruit, probably in the oil-mill, as described in detail under OIL, § 3, and allowing the juice to ferment.

It is not surprising to find, in the later literature, reference also to various novel beverages either imported from abroad, or made at home in imitation of the imported article.

27. Foreign beverages. Thus in the minute directions for the removal of every trace of leaven in the Mishna treatise on the passovers (*Pĕsāḥīm* 3₁), four foreign liquors are proscribed on the implied ground that fermented grain in some form or other entered into their composition. These are: 'Babylonian *kuttaḥ*, Median *šēkār*, Edomite (*i.e.*, Roman) vinegar, and Egyptian beer' (זיתום, ζῦθος). The *kuttaḥ* is said to have had sour milk for its basis. The Median differed from the Palestinian *šēkār*, in not being pure fermented fruit-juice, but having an admixture of malt. The Roman vinegar was also suspected of containing a similar mixture. The last of the four is the beer for which Egypt had long been famed. Herodotus (2₇₇) is the first Greek writer to refer to the Egyptians' fondness for 'wine made from barley,' whilst Diodorus styles it ζῦθος, declaring that its bouquet was little inferior to that of wine (1₃₄). This preparation, of which the native name was *heḳ*, is said to be as old as the fourth dynasty (Birch, *ap.* Wilk. *op. cit.* 1₃₉₆) and to have been at all times the favourite beverage of the common people. It was made from barley, and flavoured by an infusion of various plants (for further details see the references, especially to modern investigations, in the list of authorities cited by Schürer, *GJV*⁽³⁾, 2₅₇, and for the *būza* of modern Egypt, see J. Death, *The Beer of the Bible*, 1887). The Alexandrian translators found a reference to the manufacture of beer in Egypt in the already corrupt text of Is. 19₁₀*b* (οἱ ποιοῦντες τὸν ζῦθον; see WEAVING, § 5).

It is still an open question whether the Hebrews under the monarchy drank their wine neat or, as was customary among the peoples of classical antiquity, diluted with water (see MEALS, § 12).

28. With water. From the quaint expression used by Isaiah to symbolise the degeneracy of his contemporaries (1₂₂, 'thy silver has become dross, thy wine mixed with water' [מָהוּל, lit. 'circumcised']), it has been inferred that in the eighth century, at least, the addition of water was not the usual practice. That this is the significance of the unique phrase 'circumcised'—the accompanying *bammayim* in the original is probably a gloss—is proved by many analogies both in the Semitic and in the non-Semitic languages, of which Pliny's *castrare vinum* is the most familiar[1] (see Marti's list of parallels in *KHC, in loc.*). In this connection it should be remembered that the ancient wines were not, like the modern, 'doctored' or 'rectified' by the addition of a strong spirit, and the wines of Palestine, in particular, may be assumed on the whole not to have exceeded the strength of an ordinary claret. It may be taken as a result of Hellenic influence that it is in the late post-exilic period that we first meet with a clear reference to the diluting of wine with water. Thus the author of 2 Macc. remarks that 'it is hurtful to drink wine or water alone' whilst 'wine mingled with water (οἶνος ὕδατι συνκερασθεὶς) is pleasant' (15₃₉; cp 𝔊 rendering of Bel, 33). In NT times it may be taken that the Greek custom had become firmly established, since the diluting of wine is assumed to be the usual custom in the Mishna (*Bĕrākh.* 7₅ 8₂; *'Ăbōd. Zār.* 5₅, and oft.). Wine thus diluted was termed יַיִן מָזוּג; undiluted or 'neat' wine, יַיִן חַי (lit. 'living wine'). In *Niddā* 2₇ *māzūg* wine is defined as consisting of 'two parts of water and one part of the wine of Sharon.' In the Gĕmārā and in the Midrash, however, Sharon wine is said to have been weaker than the ordinary sorts, which were usually mixed in the proportion of three parts of water to one of wine (see also the commentaries on *Shabb.* 8₁). These are the proportions recommended by Hesiod for peasants in the dog-days (*Works and Days*, 596).[1] A refinement of this custom consisted in mixing the wine with snow (*Negā.* 1₂), a practice which some have found referred to in Pr. 25₁₃ (see Toy *in loc.* with reff. there). It is further attested that it was a common custom to mix wine with hot water, so perhaps always at the Passover supper (see *Pĕsāḥ.* 7₁₃, where the hot-water apparatus [מֵיחָם] is specially named). Even the must in the vat was drunk mixed with water, either cold (צוֹנֵן) or hot (הַחַמִּין, *Ma'ăsēr.* 4₄). The Arabs also, in the period before Mohammed, mixed their wine with cold water (half and half) or with hot (Jacob, *Altarab. Beduinenleben*, 102).

A study of the OT passages in which reference is made, either explicitly or by implication, to the 'mixing' or 'mingling' of wine shows that the mixing in question was not with water but with various aromatic herbs and spices, for the purpose of heightening the flavour and increasing the strength of the wine.

29. With spices. Thus the 'men of might' denounced by Isaiah (5₂₂) did not, we may be sure, dilute their strong drink with water, but mingled it with appropriate spices. Indeed, we have seen some ground for supposing that *šēkār* itself may have been sometimes used to denote wine when treated in this way (see § 8, and especially the definition of Suidas there quoted). This 'spiced wine' is plainly specified by the name יֵין הָרֶקַח of Cant. 8₂ and by the יַיִן מְבֻשָּׁם of *Bāba Bathrā* 6₃ (cp the special term פִּטֵּם אֶת־הַיַּיִן, to 'spice' the wine, *Ma'ăsēr. Sh.* 2₁). Maspero thus describes the Assyrian practice: 'The wines, even the most delicate, are not drunk in their natural state; they are mixed with aromatics and various drugs, which give them a delicious flavour and add tenfold to their strength. This operation is performed in the hall, under the eyes of the revellers. An eunuch standing before a table pounds in a stone mortar the intoxicating substances, which he moistens from time to time with some essence. His comrades have poured the contents of the amphoræ into immense bowls of chased silver [cp Pr. 9₂, 𝔊 ἐκέρασεν εἰς κρατῆρα τὸν οἶνον] which reach to their chests. As soon as the perfumed paste is ready they put some of it into each bowl and carefully dissolve it. The cupbearers bring the cups, draw out the wine, and serve the guests' (*Ancient Egypt and Assyria*, 370 *ff.*, with illustrs.). This class of beverages is styled *aromatites* by Pliny, who enumerates the various aromatics used in their composition—myrrh, cassia, calamus, etc. (*HN* 14₁₉). The same authority has much to say of the fondness of the Romans for the special beverage known as *myrrhina* or myrrh-wine (*HN* 14₁₅; cp Smith, *Dict.*⁽³⁾, *s.v.* 'Vinum,' 2967*a*), the οἶνος ἐσμυρισμένος of Mk. 15₂₃ (AV 'wine mingled with myrrh'—see CROSS, § 5.

1 [Or we may read מוֹהַל, which in MH means the dark turbid liquor pressed out from grapes. So Barth, Nöldeke, Cheyne (*SBOT*, 'Isaiah,' Heb., 111).]

1 For other proportions recommended by various classical writers see Iwan Müller, *Handb. d. klass. Altertumswiss.* 4443*b*.

and cp ‖ Mt. 27 34), and the אִינוֹמְרִנוֹן of later Jewish literature (*Shīr Rabba* 4 14).

Here also may be classed another popular beverage of the first centuries of our era in Palestine, the foreign

30. With honey. origin of which is betrayed by its name אִינוֹמִילִין[1] (variously pointed = *οἰνόμελι, Ep. Ignat. ad Trall.* 6 2), the favourite *mulsum* of the Romans. As the name also indicates, we have here a mixture of wine and honey (*Tĕrūm.* 11 1), in the proportion of 'four by measure of wine to one of honey,' to which pepper was added as flavouring (*'Ăb. Zār.* 30*a*).

It is a remarkable fact that the plain and literal references in the Bible to wine and strong drink are

31. Metaphors. exceeded in number by the illustrations and figures borrowed from their preparation and use. Only a few typical cases can be here adduced. Passing by the familiar designation of Israel as a vine and as the vineyard of Yahwè, we have in the treading of the winepress a frequent and expressive figure of the divine judgments (Is. 63 2 *f.* Joel 3[4] 13 Lam. 1 15 Rev. 14 19 *f.*). The action of the must under fermentation suggests to a Hebrew poet a novel metaphor to express agony of soul occasioned by the calamities of his country (Lam. 1 20 2 11). The folly of attempting to force the 'new wine' of the gospel into the 'old wine-skins' (Mt. 9 17 and ‖s), the worn-out forms and formulas of Judaism, is illustrated by the familiar figure discussed above (§ 17). We have also seen how the treatment of the wine while maturing in the wine-jars supplied Jeremiah with an image for the easy-going Moab, who had not been 'emptied from vessel to vessel' (48 11 *f.*), but had settled contentedly 'on his lees,' like the callous *insouciant* contemporaries of Zephaniah (1 12). By the superiority of old wine to new (cp Lk. 5 39) ben Sira illustrates his preference for an old and tried friend over one whose friendship has still to mature (*παλαιοῦμαι*; Ecclus. 9 15 [𝔊 10]). Perhaps the boldest metaphor is that in which the intoxicating properties of wine, as contained in Yahwè's 'cup of reeling,' is employed by prophet and poet (Is. 51 17 *ff.* Jer. 25 15 *ff.* Ezek. 23 33 Hab. 2 16 Pss. 60 5 75 8) as 'a frequent symbol for confusion, bewilderment, and distress. . . . Drunkenness may typify spiritual blindness or perplexity (Is. 19 14 Jer. 23 9). It also supplies the figure for sailors of a ship in a storm at sea, who reel about the deck in bewildered witlessness (Ps. 107 27); and finally it is combined with the image of the wind-tossed booth to illustrate the convulsions of the earth upon the Judgment-day' (Is. 24 20).[2]

This symbolism may be said to reach its highest point in the institution of the Eucharist.

With regard to the attitude of OT and NT to the general question of the use of fermented beverages, it is

32. Ideas about drinks. worthy of note that while *tīrōš* in the OT sometimes denotes the unfermented must, there is no trace in Hebrew literature, from the earliest period to the close of the Mishna, of any method of preserving it in the unfermented state. Indeed it has been maintained that 'with the total absence of antiseptic precautions characteristic of Orientals, it would have been impossible to do so' (Prof. Macalister in Hastings' *DB* 2 34*b*, in this agreeing with many modern authorities). Throughout the OT the use of wine as a daily beverage (see MEALS, § 12) appears as an all but universal custom (for the exceptions see NAZIRITE, and RECHABITE;[3] priests also, while on duty, had to abstain from wine

[1] This name, however, may have supplanted an earlier native designation, since honied wine was known to the Assyrians from an early period, see Del. *Ass. HWB*, *s.vv.* 'dašpu' and 'duššupu.'

[2] Quoted from a most suggestive paper, entitled 'A Tentative Catalogue of Biblical Metaphors' by Claude G. Montefiore in *JQR* 3 662.

[3] Schürer (*GJV*(3), 2 569) combats the generally received view that the Essenes also were abstainers.

and strong drink: Lev. 10 9; cp Ezek. 44 21).[1] Even its use to the extent of exhilaration is implicitly approved (Gen. 43 34 Judg. 9 13 Ps. 104 15 Pr. 31 7), whilst the value of alcohol as a stimulant in sickness and distress is explicitly recognised (Pr. 31 6; cp 1 Tim. 5 23). The views of the biblical writers on this subject, in short, may fairly be summed up in the words of Jesus ben Sira (about 180 B.C.): 'Wine drunk in measure and to satisfy is joy of heart and gladness of soul' (Ecclus. 31 28 RV; cp *v.* 27, and for the converse *vv.* 29 *f.*), or in those of a somewhat later, or it may be contemporary, Jewish writer, the Pseudo-Aristeas: *πλὴν ἐν πᾶσι μετριότης καλόν* (in all things [according to the context: eating, drinking, and pleasures] moderation is good; ed. Wendland, 223). Whilst this is so, the opposition of biblical writers to immoderate indulgence in wine and strong drink is too explicit and too well known to require further elaboration here.[2] The problems raised by the very different conditions of the modern world were of course undreamt of by the biblical writers.

WINNOWING (זָרָה; Ruth 3 2 Is. 30 24). See AGRICULTURE, § 9.

WISDOM LITERATURE

Definition (§ 1).	Ethics (§ 9 *f.*).
Early philosophy (§ 2 *f.*).	World-questions (§§ 11-13).
The Sages (§ 4).	Decline (§ 14).
Their teaching (§§ 5-8).	Bibliography (§ 15).

'Wisdom Literature' is the usual designation of those old-Hebrew writings which deal, not with the Israelitish

1. Definition. national law and life, but with universal moral and religious principles of all human life. It is thus sharply distinguished from the PROPHETICAL LITERATURE [*q.v.*] (whose central theme is the obligation to serve Yahwè alone and no other god), from the LAW LITERATURE [*q.v.*] (which is mainly concerned with ritual), and from the Liturgical Literature [see PSALMS, etc.] (which is the expression of religious emotion). As its lower limit we may take the beginning of the Christian era—after this the Jewish thought occupies itself with other things; it may be considered to include all reflective writings before Philo, who forms a new category. 'Inasmuch as it seeks to discover what is permanent and universal in life (which is the aim of philosophy) it may be described as the pre-Philonic Hebrew philosophy. The books and psalms in which it is contained, arranged in what is taken in this article to be the general chronological order, are: Job, certain Psalms (such as 8 19 29 37 49 73 90 92 103 104 107 139 147 148), Proverbs, Ben-Sira (Ecclesiasticus), Ecclesiastes, Wisdom of Solomon, to which may be added the earliest sayings of the heads of schools (reported in *Pirkē Ābōth*). For details the reader is referred to the articles on the several books.

The Israelites, like all other peoples, must have reflected more or less, from the moment when they

2. Early Jewish philosophy; origin. attained a settled civilisation, on general questions of life. The lowest form of such reflection appears in popular proverbs and fables, which express, usually in a one-sided and superficial way, the result of the ordinary common-sense experience and observation; such are Jotham's fable (Judg. 9 8-15), and the proverbs cited in 1 S. 10 12 2 S. 5 8 20 18 Jer. 31 29 (= Ezek. 18 2). Nathan's apologue (2 S. 12 1-4) and the allegories in Is. 5 1 *f.* Ezek. 16 17 23 are of a higher

[1] It has often been remarked that Ezekiel in his ideal sketch of the restored temple worship makes no provision for the use of wine, which had from time immemorial a recognised place in the ritual. [On the daily libation of wine at the morning and evening sacrifice, see SACRIFICE, § 35, and cp Ecclus. 50 15 *f.*]

[2] We may note in particular the deutero-canonical writers (*e.g.*, 1 Esd. 3 4 *ff.*, and the frequent denunciation of excess in Ecclesiasticus): also Philo's treatises 'on the planting of Noah' and 'Drunkenness.' In the latter occurs the fine saying (sect. 32) regarding *ἄκρατον καὶ πᾶν ἀφροσύνης φάρμακον*.

WISDOM LITERATURE

literary and moral character; but they are moral and religious discourses (such as form the staple of the prophetic books) directed against particular cases of sin rather than reflections on life.[1]

In the Pentateuch, the Prophets, and the Historical Books there is frequent mention of 'wisdom' (חָכְמָה, *ḥŏkmāh*) and 'wise men' (חֲכָמִים, *ḥăkāmīm*). In all these cases the connection shows that what is meant by 'wisdom' is either the skill of the magician (Ex. 7 11), or of the artisan (Ex. 28 3 35 10 25 2 Ch. 26 [7] Is. 40 20), or the sagacity of the man of affairs (Gen. 41 33 Dt. 1 13 2 S. 13 3 14 2 Is. 3 3), or, with larger scope, the broad and high-minded intelligence of him who is in sympathy with the divine law of right (Dt. 4 6 Is. 11 2). In the passage Is. 11 2 the term seems to approach very near the meaning it has in Job and Proverbs, and this it might well do if, as is probable, this passage is later than the sixth century B.C.; but here also the context shows that the wisdom of the king is manifested in his equitable administration of affairs, not in his reflection on life. 'Wise men' are spoken of as a class by some of the earlier prophets (Is. 29 14 Jer. 8 8 *f.* 9 11 [12] 22 [23] 18 18, cp Ezek. 7 26);[2] but their wisdom lies in practical acquaintance with the affairs of the state and of life. A fundamental difference between them and the sages of Proverbs appears in the fact that the prophets are hostile to them; they were probably men of experience and practical sagacity whose views of public policy were opposed to those of the prophets, and in this regard they belong in the same category with the 'false prophets' (see Jer. 8 11). The opposition to the great prophets came from various sources—among others, it would seem, from men who rejected the prophet's claim of a divine revelation (Jer. 8 9), and interpreted the existing *tōrāh* in their own way (Jer. 8 8). These may have been patriotic, conscientious, and able men in spite of the denunciations hurled at them by Isaiah and Jeremiah; but their wisdom concerned itself not with universal human life, but with the political, legal, and moral questions of Israelitish policy. Solomon's wisdom, in the only example of it given in OT (1 K. 3 16-28), is administrative; later Jewish legend (see Wünsche, *op. cit.*) represents it as skill in giving and answering riddles. Of the proverbs and songs and sayings about plants and animals ascribed to him in 1 K. 5 9-14 (4 29-34), nothing has survived. His reputation for wisdom rests, no doubt, on some real fact; he was, very likely, a man of sagacity, and may have been the author of some shrewd observations on men and things; afterwards it may have become the custom to ascribe to him all anonymous songs and apophthegms, summed up by the editor of Kings in large round numbers. In a later age, when his fame was established, his name was assumed in certain books (Ps. 72 Pr. Cant. Eccl. W. Sol., Pss. of Sol.) in accordance with a recognised literary habit of the times.

Outside of Israel the centres of wisdom mentioned in OT are Egypt, Edom or the East, Babylon, and perhaps Tyre (1 K. 5 10 *f.* [4 30 *f.*] Ob. 8 Jer. 41 49 7 Is. 44 25 Ezek. 28 3). Egypt, from a remote time, had its moralising sages.[3] Babylon was the home of astrology (Is. 47 10-13), and Tyre was renowned for artistic and commercial skill (Ezek. 27); of Edom we know only its repute (Ob. 8 Jer. 49 7)—from it, at a later time, come apparently the Three Friends in Job. Of all Israel's neighbours it was, so far as we have exact information, only from Egypt that she could have learned gnomic lore in the earlier period, and it is precisely from Egypt (if we may judge from the religious history) that she seems to have received the least intellectual stimulus. It thus appears that the history, as detailed in OT, gives no warrant for supposing that, down to the close of the sixth century B.C., there was in Israel any universal or philosophic treatment of moral and religious problems.

3. Growth. Though there were, however, no systematic discussions of these questions in the pre-exilic and exilic periods, there was the germ of larger thought. The prophetic declaration that God desires men's love, not their sacrifices (Hos. 6 6), the formulation of the principle of individual moral responsibility (Dt. 24 16 Jer. 31 30 Ezek. 18 4), and the announcement of the obligation to love one's neighbour as one's self (Lev. 19 18) contain the substance of what was afterwards developed into a universal religion. To a man of the sixth century B.C. who recognised the significance of these principles it might have seemed that the natural process of national growth would carry Israelitish thought beyond the limits of nationalism to a moral and religious system which would transcend all that was local and temporary. There is, in fact, every reason to believe that the growth of the Israelitish people in ethical and religious thought was sound and continuous. After the heroic period of struggle for a unitary conception of the divine government of the world, in which the fresh spontaneous prophetic feeling played a great part, came a time of quieter reflection, when the nation was obliged to face the question of orderly organisation on the basis of definite written law. The attempt to formulate principles of organisation must have forced the larger problems of life on the attention of the thinkers of the time. How far this process would have gone, and what direction it would have taken, if the Jews had been all massed in their own land under an independent national government it is impossible to say. From the sixth century, however, they were never independent except in a partial way for a century of Maccabæan rule. Moreover, what is of more consequence, the old national isolation vanished for ever; Jews were scattered over the whole area of Western civilisation, and Judæa was a petty province exposed on all sides to the inroads of new ideas. Israelitism was a single fact hemmed in by great peoples, Babylonian, Egyptian, Persian, Greek—it maintained itself, but not without modification. The Jews were persistent and sympathetic, gave and took, wove into their own system what they got from without, and lived in an atmosphere of comparison and adaptation. From Babylonia they seem to have received suggestions of literary work and of a regular liturgical cultus, from Persia the form of an elaborate angelology and demonology and the doctrine of a bodily resurrection, from Egypt and Greece the belief in the ethical immortality of the soul, and from Greece, further, a touch of philosophy. Out of all these influences sprang that attitude of reflection which produced the Wisdom Literature. The experience of the Jews repeated that of many other civilised peoples—they were educated by contact with their neighbours. The post-exilian Jewish thought, whose basis and soul was the native intellectual force of the people, was constantly stimulated and broadened from without, but received its direction from the course of the national fortunes.

In estimating the literature of the post-exilian Jews two features of their social position should be borne in mind: (1) Though, so far as records go, they were not persecuted by their conquerors till the beginning of the second century B.C., their political dependence probably exposed them in some degree to oppression and humiliation on the part of foreigners and apostate fellow-countrymen; (2) While not giving up the agricultural life in Palestine, they came more and more to live in cities—to no small extent in their own land, but especially in foreign countries (see Job 29 7 31 32 and Pr. and Ecclus. *passim*)—and thus had occasion to observe and acquire the virtues and vices of urban life. Hence, in part, the prominence given in the wisdom books to the insolence of the rich, to sexual immorality,

[1] The riddle, which is a mere exercise of ingenuity, does not come into consideration here (see RIDDLE). The same word (חִידָה) it is true, is used for Samson's riddle (Judg. 14 12) and the moralising discourse of Ps. 78; but the different application in the psalm is an indication of the advance of thought. On Hebrew riddles see A. Wünsche, 'Die Räthselweisheit bei den Hebräern' (in *JPT*, 1883).

[2] Hos. 14 10 [9] appears to be a late editorial addition.

[3] For the Egyptian gnomic literature see *Records of the Past*, and Griffith, art. 'Egyptian Literature,' in the *Library of the World's Best Literature*. For Babylonian magical texts and riddles, see *RP*, and Jaeger, in *Beiträge z. Assyriologie*, 1892.

WISDOM LITERATURE

and to the duties and dangers of the business life; and hence, also, came fuller opportunity of contact with the philosophical thought of the time.

The Jewish sages or philosophers formed a distinct class sharply differentiated from prophets (see PROPHET), priests (see PRIEST), and SCRIBES (*q.v.*).

4. The Sages.

The difference between the point of view of the sage and that of the prophet or the priest is obvious, and he is no less distinct from the scribe, if this term is understood to mean 'one learned in the scriptures.' A member of any one of these classes might, it is true, be also a member of any other class: a priest might be a prophet or a scribe or a sage, and so with the others. But in becoming a sage, one assumed a particular attitude toward life, and thought and spoke in accordance with that attitude. The cultivation of learning and thought began with the priesthood, which was the custodian of the *Tōrāh*. The *Tōrāh*, however, had two sides, the ritual or liturgical, and the civil and moral, and the priesthood soon split into two divisions which devoted themselves severally to these two classes of duties. The second class (which soon came to include others than priests), composite in nature, in its turn called for division; one set of men cultivated the study of the national code of law, becoming necessarily expounders of the national scriptures—these were the lawyers or scribes; others were attracted by the study of universal moral truth—these were the sages.

The aim and function of the sage are clearly described by Ben Sira (Ecclus. 39 1-11): the wise man, whilst he meditates on the law of God, will search through the world for knowledge, and will gain honour and renown among all men for his acute sayings and his practical understanding. The sages made the pursuit of wisdom the chief aim of life. For most of them (for all, so far as our knowledge goes, except Kōhéleth and Agur) the basis of wisdom was religious faith. This conception was a necessary one for the devout Jew for two reasons: first, since God was held to be universal and absolute ruler, it followed that he was the bestower of all gifts of learning, including physical and psychological knowledge (Wisd. 7 16-21), and doubtless all the science of the time; and second, so far as wisdom was regarded as the guide to the best life, it must be founded on the divine moral law, which sprang from God's wisdom and was enforced by his power. This religious conception of wisdom, however, did not prevent the widest study of men and things, if we may judge from the examples of Ben Sira and the author of Wisdom of Solomon; there must have been many Jews, certainly from the fourth century B.C. onwards, who went outside of Israelitish learning.[1] There is no reason to doubt the sincerity of such men when they declared that the fear of Yahwè was the beginning of wisdom: they might hold to this central dogma, and at the same time yield to their thirst for the knowledge which was to be found only in foreign lands and books; they might believe that Yahwè was the teacher of foreign sages, or they might follow their bent without troubling themselves to solve the apparent contradiction that whilst Yahwè's revelation of wisdom to his people was complete and all-sufficient, there was also other wisdom which was good. A similar remark holds of the maxims of prudence and shrewdness which abound in Proverbs and Ecclesiasticus; these, though they had no immediate connection with the fear of God, might be considered as a part of the scheme of life which God had ordained; more probably the moralists wrote what they thought desirable, and the question of logical harmony did not occur to them. Philosophic schools, in the full Greek sense, the Jewish sages did not form—they had no speculative philosophy proper. There were, however, theoretical differences among them, especially in regard to the nature of the divine government of the world, and in regard to the dignity and possible happiness of human life. It is probable that a sort of academic life gradually established itself.

Whilst in Job (12 2 15 10 32 7) the wisdom is that of experience and tradition, there is in Proverbs (1 2-6 22 17-21), Ecclesiasticus (38 24—39 10), and Ecclesiastes (12 11) a distinct recognition of professional study and of a body of teaching. In the second century B.C. there existed an incipient University (Antigonus of Soko and his successors), and before this there must have been some form of the higher teaching (cp EDUCATION, § 5). The thought of the great scholars no doubt took a wide range; we have recorded only so much of it as survived the revisions of generations.

There was a stirring intellectual life, of which we find not a few traces in the extant literature.[1] When the Jews began to be influenced by organised bodies of foreign thought it is difficult to say. Of early Persian literary life we unfortunately know nothing, and it is not probable that Jews came into intellectual contact with Greeks before the time of Alexander. Immediately after his death Greek schools of philosophy sprang up abundantly in Egypt and Western Asia, and from them, it seems probable, Jewish sages got ideas which coloured their thought. No doubt they learned something of all the current science; but they have left no full statements of their non-religious opinions (hints in Ecclus. 43, Wisd. 7, etc.). Here we shall be obliged to confine ourselves to the main points of the moral and religious thought, referring, for other ideas, to the commentaries.

Part of the thought of the wisdom books they have in common with preceding and contemporary literature, and this may be dismissed with a brief mention.

5. Teaching of the Sages: the old material.

They inherited the belief in monotheism, and in the practically unlimited character of the divine attributes pertaining to knowledge and power.[2] For them, as for the prophets, God is terrible to those who violate his commands (Job 15 Prov. 1 20-31 Ecclus. 27 29 Wisd. 5), a compassionate, forgiving saviour to those who fear and obey him (Job 5 18 Ps. 103 Ecclus. 2 11 17 29 Wisd. 16 7). They take monogamy for granted,[3] and recognise a well-ordered family-life and all the ordinary virtues. They retain the common view of man as a being made up of body and soul, and possessing conscience and freedom, while, at the same time, he is absolutely controlled by God; with their predecessors (Dt. 24 16 Jer. 31 30 Ezek. 18 4) they reject the old conception of the solidarity of the family and the nation—or, more exactly, they ignore it. They, however, retain the traditional sharp division of men into the two classes of good and bad. Here also should probably be put their silence respecting the miraculous. In the OT, miracles are described or mentioned only in works written long after the events described. There are no miracles between Hezekiah and the Book of Daniel; Nehemiah says nothing of supernatural intervention, and the Maccabæan apparitions and signs are recorded not in 1 Macc., but in 2 Macc. Miracles play no part in the writings of the Prophets or in the Psalms, except as reminiscences (Is. 63 12 Ps. 105 etc.) or vague expectations (Is. 11 Zech. 14 Joel 3). In the Wisdom books they are referred to only as events of the ancient history, and only in Ecclesiasticus (44 48) and Wisdom (10-19). In a word, neither in the gnomic literature nor elsewhere in the OT does the miraculous enter into the texture of the thought.

Proceeding, now, to examine the characteristic thought of the Wisdom books, we have first to note its relatively non-national character: it lays little stress on national institutions, laws, and hopes; but it holds, to some extent, to the moral and religious superiority of Israel over all other nations.

6. Characteristic thought: the ritual.

The sacrificial ritual is referred to a few times as an existing custom (as in Prov. 15 8 Ecclus. 34 18-20 Eccles. 5 1), but rather with the purpose of controlling it by moral considerations, and faithfulness in the payment of tithes (Prov. 3 9) and vows (Eccles. 5 4) is enjoined. The sages (like the prophets and the Gospels) recognise the propriety of observing the custom; but

[1] Cp Plumptre's biography of Koheleth in his *Ecclesiastes* (in *Camb. Bible*, 1881) and the criticism of it by Bois, in his *Origines d. l. Phil. Judéo-Alexandrine*, 1890.

[1] Cp the evidences, in the Talmud, of thought which went outside of the current orthodoxy.

[2] On the apparent polytheistic conception of Pss. 58 82 see the Commentaries.

[3] Israelitish polygamy had probably disappeared by the beginning of the fifth century B.C.

WISDOM LITERATURE

they do not put it in the same category with obedience to moral principle. Such things as circumcision and the Sabbath they take for granted, but find no occasion to mention. It is noteworthy that they do not refer to the private reading of the sacred books, or to synagogal services. It is certain that they were well acquainted with the old literature, and that this had, in their time, a semi-sacred character; but reading was an art confined to the few, instruction was largely oral, and the duty of reading was not a thing that could be insisted on for the masses, and for students it was taken for granted. Synagogues hardly existed before the second century B.C., and attendance on the weekly gatherings was a custom which did not need to be enjoined. Forgiveness of sin is not connected with sacrifice, but with the mercy of God and obedience to him (see, *e.g.*, Job 8 Ecclus. 17 25 *f.* Wisd. 11 23). This, however, is not peculiar to the sages; it is a part of the general Israelitish conception; in the Tōrāh there is no sacrificial atonement except for sins of ignorance.[1] The negative attitude of the Wisdom books towards sacrifices and the Temple ritual in general must be ascribed to the progress of moral and religious thought. All the cultivated world of the time was moving away from this external sort of service. This was notably the case in Greece and Rome, and the same tendency (formulated in the Gospels) is visible in the sayings ascribed (in *Pirḳē Ābōth*) to the early Jewish teachers. The moral side of the relation between man and God was of necessity emphasised.

The silence of the sages respecting Messianic hopes is to be explained partly by their philosophic individualism, partly by the circumstances of the times.

7. The nation.

There are glowing pictures of the future of the nation in prophetic writings as late as the fourth century B.C. (Is. 11 Joel 3 4 Zech. 9-14); but of this there is in Job and Proverbs not a word, in Ecclesiasticus only a general wish (Ecclus. 47 22 50 22-26), in Wisdom only a look to the life to come (Wisd. 5). The sages held that the one thing necessary for all men was individual righteousness; they might thus have been comparatively indifferent to hopes of national independence and glory, they might sympathise with their suffering fellow-countrymen (Wisd. 1-6) without cherishing political dreams. They may also (like the Pharisaic party at a later time) have convinced themselves that resistance to the great military powers was useless, and that the true mission of the Jewish people was to cultivate knowledge. Their attitude towards foreign nations was not hostile, but friendly; they recognised the excellence, in certain regards, of the civilisation of these peoples, utilised them by becoming their pupils in philosophy, and thus, while remaining Jews, became in a measure cosmopolitan, and began the formal fusion of Semitic and Hellenic thought.

On the other hand, the belief remained that Israel stood in a peculiar relation with God, had a special revelation of his will, and was entitled to his special protection (Ecclus. 24 44-50 Wisd. 10-19). On this point there may have been diversity of view; there is no reference to it in Job and Proverbs. In these books the name 'Israel' does not occur, and the national Tōrāh is not mentioned. It is hardly probable that the sages (except Agur and Ḳōhéleth) were wholly without national pride; but their national feeling receded before their philosophic and religious devotion to virtue. It is to be noted that the prominence given in the wisdom books (omitting Eccles.) to national topics increases as time goes on: there is nothing of it in Job, next to nothing in Proverbs, somewhat in Ecclesiasticus, more in Wisdom. This fact is probably to be attributed partly to a change in the condition of the Jewish people, and partly to the personal feeling of the writers. At the time when Job and the greater part of Proverbs were composed (that is, in the 4th and 3rd cents. B.C.) the nation was tranquil—so far as the records go there was no persecution, there was nothing to call forth an expression of national feeling. In Ben Sira's time (about 190 B.C.), the Jews had begun to be involved in the conflict between Egypt and Syria; but his Ode to Heroes (Ecclus. 44-50) seems to have been suggested partly by his patriotic feeling, partly by his admiration for the high priest Simon, then lately deceased. Wisdom was written at a moment (about 50 B.C.) when the memory of scorn, insult, and oppression was fresh. Ḳōhéleth stood so far away from his nation that no reference to its fortunes could be expected from him.

What most particularly characterises the Wisdom Literature is its conception of virtue or righteousness, and its discussion of the moral government of the world. These points we may now proceed to consider.

8. The nature of virtue.

The sages do not enter into any formal investigation of the nature of virtue. They assume, in general, that it is sincere adhesion to the moral law (Job 29-31 Prov. Ecclus. Wisd., *passim*). This definition is not affected by their eudæmonistic theory—one may look to a reward and yet be sincere; nor is its reality destroyed by the maxims of selfish worldly wisdom which are occasionally found in their writings (particularly in Ecclesiasticus). But in Job and Proverbs and the succeeding books we meet a conception of the moral life which, while not without a point of connection with the prophetic thought, still goes far beyond anything in the earlier literature; virtue is practically identified with knowledge. Knowledge, it is true, is a necessary condition of obedience, and is so spoken of in the Prophets (Is. 1 3 6 9 Jer. 4 22 5 4); but the sages treat it as if it were the same thing as obedience. The central fact in the books just named is wisdom, which is made to include all the duties of life from the lowest to the highest. The ideal person, he who stands for the right against and above the wrong, is the wise man. When we recollect that in the Prophets, and to some extent in Job (5 15 37 24), human wisdom is looked on as a thing alien to or opposed to God, it is evident that Jewish thought, in representing wisdom as the one thing needful, has taken a new direction. This was the doctrine of Greek philosophy, and we therefore seem warranted in supposing that it was from the Greeks that it came, in its full form, to the Jews.[1] Instead of the simple demands of earlier times, the sole worship of Yahwè and obedience to his ritual and moral laws, there has now arisen a science of living, in which intellectual insight is the central faculty, it being assumed that he, and only he, who sees will do. Wickedness is folly, the bad man is a fool;[2] the guide to right living is the sage, the duty of the young is to seek his instruction. The moral and religious organisation of the Jews corresponded to this conception of life; there were schools like those of Athens and other Greek centres, and the synagogue was also doubtless a house of instruction. This idea—that life is a moral training—proved to be permanent; the Jews never gave it up—it was, in fact, an essential element in the growth of the world. But a pious Israelite, while he accepted wisdom as the guide of life, could not fail to identify its moral code with the law of God, since he looked on this law as the perfect expression of duty. This identification is accordingly made in Proverbs, Ecclesiasticus, and Wisdom. The terms 'instruction' and 'the law of Yahwè' are used interchangeably, and 'wisdom' itself is said to be the same with 'the fear of Yahwè.'

Freedom of ethical discussion is, however, not

[1] On this point, cp WRS *Rel. Sem.*(2), ch. 11; Smend. *ATliche Rel.-Gesch.* § 21; Montefiore, *Hibb. Lect.* Lect. 9; also SACRIFICE, §§ 48 *ff.*

[1] A similar influence is visible in the stress laid, by Rabbinical Judaism, on knowledge of the Law (Jn. 7 49, *Pirḳ. Āb.* 2 5).

[2] אויל occurs only twice in Job (5 2 *f.*), and כסיל not at all; the two terms are common in the other books.

WISDOM LITERATURE

diminished by this quasi-nationalistic definition of wisdom. The sages do not confine themselves to the Prophets and the Tōrāh, but seek their maxims everywhere, chiefly by observation of actual life, possibly, also, in such Greek and other writings as they had access to.[1] Nevertheless there is no reason to regard their acceptance of the law of Yahwè as a pretence. They were perfectly sincere in treating the divine will as the final standard of right, only they enlarged the definition of the 'law of the Lord,' making it comprehend all the deliverances of their moral consciousness; for those who would be faithful at once to their national traditions and to their own convictions there was no other course. The sages thus represent the ethical ideas and usages of their time, and are in this regard valuable as making a contribution to the history of ethical thought. It is also true that they assume the position of independent moral teachers, with reason and conscience as their guides; they do not lay claim to revelation or inspiration from God, and they appeal only to the good sense of their readers. All this is in accordance with their philosophical point of view; they wrote simply as moralists, never citing the Law as authority, yet by no means setting themselves above revelation—rather they accepted revelation, and believed in the rightness and authority of their own teaching, and saw no incongruity in these two positions.[2] Of their books two (Ecclesiasticus and Wisdom) were excluded from the canon, two (Job and Eccl.) were substantially modified by interpolations and additions, and two (Prov. and Eccl.) reached canonical dignity only after a struggle.

9. Human wisdom.

The human quality of wisdom is sometimes treated as natural intellectual acumen and breadth, sometimes as the direct gift of God; but there is no discrepancy between these views. The latter belongs to the old-Israelitish theocratic faith, according to which all powers of body and mind come immediately from Yahwè. That the gnomic writers regard 'wisdom' (חָכְמָה, *ḥokmāh*) as primarily an intellectual faculty appears from its various synonyms, such as 'understanding' or 'intelligence' (בִּינָה, *bīnāh*), 'shrewdness' (עָרְמָה, *'ōrmāh*), 'sagacity' (מְזִמָּה, *mĕzimmāh*), 'practical ability' (תּוּשִׁיָּה, *tūšiyyāh*). They, in fact, treat it also as a purely natural power, subject to ordinary conditions of training and growth, and to a certain extent under the control of its possessor. They thus collocate the divine and the human points of view. This sort of collocation or combination appears also in the relation, as conceived by the sages, between human wisdom and divine wisdom. Whilst in the Prophets and the Law it is God's apartness, sacredness, or holiness that is put most prominently forward, it is of wisdom that the sages think as his chief attribute. By it he is said to direct the whole course of nature and the whole life of man. As in the beginning the breath of God gave life to man, so the divine wisdom, filling and ordering all things, yet able to choose its own course, enters into the souls of those who fear him, and brings them into unison with his thought. This conception, indicated in Prov. 2 10 Ecclus. 6 22, is more distinctly stated in Wisdom (1 4), as, in fact, it belongs to the more definitely philosophical side of the idea, and is an approach to personification.

Definite personification of Wisdom is found in Job 28 Prov. 8 22-31 Ecclus. 24 Wisd. 7 8 (and also 10-19). In the first passage[3] she is extolled as a most precious thing, known to God alone, but she has no demiurgic function; and, if the last verse of the chapter be genuine, the personification is half given up. In Prov. 8 she is the companion of Yahwè (though his creature) in the primeval work of creation, in which she takes part as sympathetic friend (God's foster-child). Ben Sira represents her as compassing the universe, only however, to take up her abode in Israel. The completest philosophical personification is found in Wisdom, in which she is substantially identical with the Stoic Logos. The progress in the conception is obvious; Wisdom is unspeakably precious (Job), is the companion of the divine creative energy (Proverbs), is an effluence from the divine glory, the all-powerful maker of all things, material, intellectual, spiritual (Wisdom); only Ben Sira appears to interrupt the line of development by practically identifying Wisdom with the Jewish Law. This interruption will disappear if his description be earlier than that in Proverbs; or if the identification of Wisdom with the Law be regarded as showing a completer national assimilation of the conception. However that may be, the general advance in the thought remains unaffected. That its final form is Greek is universally held, and the same origin is probably to be assigned to the earlier forms. In the more distinctively Israelitish parts of the OT (the Prophets and the Tōrāh) there is no personification of a divine attribute,[1] and we here naturally think of foreign influence, Persian or Greek. The Jews may conceivably have got it from the Gathas (or, from the popular ideas therein represented) in which such personification plays so prominent a rôle; but in the Gathas wisdom is not personified, and is not the principal attribute of God, and to none of the Amesha-Spentas are cosmogonic or universal functions assigned.[2] One of the most striking features of the biblical representation is the conception of the world as an orderly unity, a cosmos—a conception found, however, only in the Wisdom Literature (in which certain Psalms are to be included); it is clearly indicated in Job (28 38 39), and expressed more distinctly in Ecclesiasticus (24 42 43), Proverbs (the 'Righteous Order' of the Gathas corresponds to the Jewish kingdom of God on earth, chap. 8), and Wisdom (chap. 7). This conception is hardly Jewish or Persian; it is undoubtedly Greek. With it we must connect the disposition (shown in the passages just cited, and in Pss. 104 107 139) to make wide surveys of natural phenomena. The movement of thought to which it belongs was a scientific one, and rested on a serious contemplation of all the phenomena of the world, including the life and soul of man. It is no doubt to Greek influence that we must ascribe the selection of wisdom (rather than power, kindness, or holiness) as the attribute distinctively representative of God.

10. The ethical motive.

The philosophy of the sages does not include psychology or moral and religious inward experience. They have no theories of free-will, of the genesis of sin, of the way of salvation. Their interest is in practical questions of life, and in the pre-eminence of wisdom as the guide of man. Their theory of the ethical life is simple; every man may do right if he will, and, if he does wrong, he must bear the consequences; men are divided into two classes, the good and the bad—every man must belong to one of these classes, and is to be treated according

[1] For example, the resemblances between the Jewish gnomic books and the Γνῶμαι Μονόστιχοι which go under the name of Menander are many and striking, though the resemblances may often be accidental, and the date of the Menander material is uncertain.

[2] It must be recollected that at this time the full conception of revelation had hardly been formulated.

[3] The chapter, as it stands, appears to be an interpolation. It decidedly interrupts Job's discourse, breaking the connection between 27 6 and 29 2 (27 7-23 does not belong to the speech of Job), and does not accord with Job's words as elsewhere given, or, indeed, with the tone of the rest of the book. For reasons stated above it seems to be earlier than Prov. 8 22-31; it is probably to be put later than the rest of Job. By Bickell, Budde, and others it is regarded as belonging, in part or in whole, to Job's address. This point does not affect the general view taken above.

[1] The partial personification of the 'word' of Yahwè in Is. 55 10 *f.* is not a case in point; the attribution of objective power to the spoken word belongs to the old popular belief (Gen. 27 33 Judg. 17 2 2 S. 21 3).

[2] (See CREATION, § 9, end.) The date of the Gathas can hardly be regarded as fixed with certainty. Cp ZOROASTRIANISM, §§ 7 *ff.*

to his position. This neglect of the shades of men's characters was doubtless to some extent a feature of the times (the nice balancing of qualities and impulses is a comparatively recent mode of thought); but it was due in great part to the judicial nature of the moral teaching of the sages; a man, they appear to have held, must be judged by his deeds—we cannot see his heart, and we must estimate him by the total outcome of his thought, that is, by his act. In the same way we may explain the fact that no account is taken of temptation and struggle—that is the man's own affair, with which the judge has nothing to do. It cannot be denied that this strict external way of judging man has its advantages; weakness is as dangerous as badness, and we must face the facts of life. On the other hand, the gnomic writings lose educational power by their failure to take account (as, for example, Marcus Aurelius does) of men's inward experiences; they press the rule home, but do not come as sympathetic helpers of the inner life; they warn, but do not persuade, the bad man. Their appeal is simply to man's intelligence; if, they say, he does not see, there is no help for him. That they say nothing directly of the sense of duty is characteristic of OT thought in general, and of their point of view in particular.

The Hebrew language contains no specific terms for 'duty' and 'conscience'—a fact which signifies, of course, not that the Israelites did not have these ideas,[1] but only that their ethical point of view did not lead them so to analyse their experience as to create a demand for such terms. These words are lacking also in Wisdom, though the Greek language contained certainly one of them. The sages preferred not to rely on so uncertain a thing as sense of duty; to their exhortations they add a further consideration or motive. Two motives[2] for welldoing are presented in the Wisdom Literature. One is the individual prosperity and happiness which it confers (so the Three Friends in Job, Prov., Ecclus., Eccl., Wisd. 3-5); the other is the beauty of moral perfectness (Wisd. 7); Job himself says nothing of motives, contenting himself with affirming his integrity. The eudæmonism of the first group of books is that of the OT generally.[3] There is a frank appeal to what is held, not without good ground, to be the most powerful motive for the mass of men—the desire for personal wellbeing. As in the Prophets national prosperity, so here individual prosperity, is the reward of a morally pure life. There is no reference to the public good, no recognition of the unity of the world or the solidarity of society, no mention of personal purity as in itself a desirable object of effort. Doubtless the writers of these books were in sympathy with the best practical morality of their time, and had aspirations after perfection; but, as practical moralists, they preferred to omit all that seemed theoretical or out of reach, and to confine themselves to what they thought would be immediately serviceable. The praise of wisdom in Wisd. 7 is Greek rather than Hebrew, and, from its sublimated form, could act as moral stimulus

[1] We may, perhaps, recognise the conception of conscience in Ecclus. 14 2: 'happy is he whose soul (that is, whose self) does not condemn him.' Cp HEART.

[2] All ethical theories are eudæmonistic—they must assign a motive for welldoing, and that motive must be happiness in some form. The important point is whether the eudæmonism is individualistic or universalistic; in the former case the man looks to the satisfaction of his own immediate desires, in the latter case to the happiness of the world, of which he is a part. Under the second head comes the ethical system in which desire to do the will of God is the motive; for such a motive is morally pure only when the will of God is done because it is morally good, that is, because it seeks the happiness of the whole.

[3] The NT system differs from that of the OT and the Apocrypha (except Wisdom) in that the reward offered is eternal salvation, and the obligation is more definitely recognised to bring it within reach of all men, whereby a universalistic character is given to the desire for happiness. The later OT prophets also look to an impartation of Israel's blessedness to all nations.

WISDOM LITERATURE

to very few men; and the author, in the practical part of his work (chaps. 3-5) relies, for his motive, on the rewards and punishments dispensed by God.

11. The moral code.

The mingling of worldly shrewdness and unworldly elevation in the Wisdom books is a natural result of the circumstances. The authors of these books were practical teachers, dealing with all of human life that they knew, and giving the results of their experience, observation, and reflection; and they were independent thinkers, not absolutely bound by any code. Their independence makes them all the more interesting and important, and they must be treated not as a mere mass, but as individuals. Their observations are coloured by their characters and surroundings. Ben Sira's shrewdness sometimes degenerates into meanness or hypocrisy (38 17), and Ḳōhéleth's experience made him one-sided and cynical. But the prominence given to the economic virtues (especially in Proverbs and Ecclus.) is legitimate and necessary. On the other hand, the Wisdom Literature also represents the highest ethical standard of the time. Job's confession of ethical faith (Job 31) leaves little to be desired, and the same may be said of passages in Proverbs (as 10 12 24 17 25 21), Ecclesiasticus (4 9 *f.* 5 10 *f.* 28 2 29 2) and Wisdom (7 23 8 7); only Ḳōhéleth has nothing to say of the self-denying and self-forgetting virtues. This higher standard was that which the world had reached. The process of social and ethical unification, begun by the Babylonian empire, was carried on by the Persian and Greek conquests, and the sages of all lands were at one in inculcating justice and kindness. But no people of pre-Christian antiquity, as far as our records go, made so varied and complete a collection.

The most important and the most interesting questions of the Wisdom-books are those which relate to the divine control of the world. First in time came the general inquiry into the moral government of the world, and then, somewhat later, the question as to the value of human life.

12. Divine control of the world.

The idea of a universal divine control of things appears as early as the first of the writing prophets (Am. 1 *f.* 9 7), but, for a considerable time, no difficulty seems to have arisen in connection therewith; the accepted prophetical theory, down to the middle of the sixth century B.C., was that all things were ordered in the interests of Israel (Is. 10 5 Jer. 1 10 25 14 Ezek. 25 3 *ff.*). A perplexing character was given to the situation by the national disaster of the sixth century, but the theory was not disturbed; and in none of the proposed solutions of the problem of the day (Is. 40 2 Zech. 3 Is. 52 13-53 12) was the divine justice called in question. In the course of time the progress of thought transferred the inquiry from the sphere of the nation to that of the individual; it was no longer 'why does righteous Israel suffer?' but 'why does the good man suffer and the bad man prosper?' The old arguments were discarded,[1] and the philosophers addressed themselves to a candid examination of the facts of life. Before looking at their arguments we may recall the fact that God is regarded by them as the sole agent in the control of the world. The old notion of his local limitation lingered (Ecclus. 24 10, cp Wisd. 3 14), though it is not prominent, and the purely spiritual conception of him seems not to have been reached; he is never called 'a spirit.'[2] Nevertheless he is regarded as supreme and

[1] The 'Satan' of Zechariah appears, in larger form, in the prose introduction to Job (which is a recension of an earlier folk-story), but is not mentioned in the poem, nor, in this connection, in any other Wisdom book.

[2] No formulation of this conception is found in any Jewish writing before the end of the first century of our era (Jn. 4 24), at which time the local idea of God still existed (Jn. 4 20). The doctrine of the immateriality of God (as νοῦς) is as early as Aristotle, and its adoption by Jews and Christians was probably furthered by the influence of the later Platonists and Stoics (as in Philo and the Fourth Gospel). On the position of the Talmud see Weber, *Jüd. Theol.* chap. 11.

WISDOM LITERATURE

in himself sufficient, and the disposition of the sages is to ignore intermediaries between him and the world. The old 'spirit of Yahwè,' which plays so prominent a part in the early narratives, is here not mentioned.[1] Angels appear rarely in Job, Ecclesiasticus, and Wisdom, and not at all in Proverbs and Ecclesiastes; when they are introduced, it is not as messengers sent to protect and guide heroes and prophets, but as attendants on the person of Yahwè.[2] Of the mass of demons of the old popular belief only Satan survives in the Wisdom Literature, and he is there (if we omit the prologue of Job) mentioned only once,[3] and in the latest book of the group (Wisd. 2 24). The rôle ascribed to him in this book is significant. The Hebrew heavenly Satan, the adversary of Israel and the accuser of men, passed gradually, probably under the stimulus and direction of Persian demonology, into the form of an independent Power, at enmity with God and man.[4] Wisdom gives us the earliest extant formulation of the conception (forced on Jewish thinkers by their sense of God's absolute justice) of a demonic author of moral evil. In general, it may be said that the theology of the sages was free from ethically obstructive anthropomorphism. In their system the older apparatus of intermediaries was supplanted by the more refined conception of Wisdom; in Wisd. 10 6 that is ascribed to Wisdom which in Gen. 19 is ascribed to angels.[5]

It was doubtless the Jews' exalted conception of the moral purity of the One God that led them to the discussion of the justness of his government of the world. The Greeks appear not to have gone into this inquiry. They were especially attracted by such problems as the constitution of man, the nature of virtue, the organisation of society. Their conception of God did not force them to hold him responsible for everything; when they considered his nature, they either (like Plato, Aristotle, and the Stoics) contented themselves with assuming his perfect justness, and referring evil to other sources,[6] or (like the Epicureans) rejected or ignored the supposition of a divine oversight of the world. For the Jewish philosopher, however, to whom life was God, it was a necessity to attempt to harmonise God and the world. The historical occasion for the Jewish discussion seems to have been given by the condition of society in the fourth century B.C., when Jews, scattered throughout the already decadent Persian empire, had frequent occasion to note the apparently irrational inequalities of men's fortunes; the question arose: Does a man's lot in this life bear any relation to his moral character?

13. Historical occasion for discussion.

We may distinguish four stages in the progress of the discussion; in the first three the future life is ignored, in the fourth it is considered.

1. In the Book of Job the question is argued from several different points of view,[7] but without reaching a definite conclusion. The indictment of the divine government is put sharply by Job, who appeals to ordinary observation and to his own experience. The traditional defence, in the mouth of the Three, is comparatively monotonous and weak; with the exception of the suggestion of Eliphaz (Job 5 17), that the suffering of good men is disciplinary, their discourse is little more than the assertion of a theory, and Job remains unconvinced (Job 31 35-37). Elihu, besides repeating the orthodox view, expands the suggestion of Eliphaz, and declares that the unsearchableness of God is a sufficient answer to all objections; and this last is the point urged in the Yahwè-speeches.[1] The Book thus practically gives up the general question as insoluble; Job maintains, against the Friends, his sceptical position, and only yields to the representation of the Yahwè-discourse which declares the phenomena of the divine government to be incomprehensible for man; and the explanation of Elihu, since it does not touch on the prosperity of the wicked, ignores half the problem.

The Book of Job is the only serious contribution made by the earliest generations of Jewish philosophers to the problem of a theodicy. It shows that the problem existed and was grappled with. The arguments of the discourses of Elihu and Yahwè were no doubt accepted, by some Jewish thinkers, as satisfactory; but those of Job must have appealed to others. His scepticism appears to be purely Jewish; there is, so far as we know, no outside source, Babylonian, Persian, Egyptian, or Greek, whence it may have come. The man Job was the creation of a Jewish genius, who, not unaffected by the culture of his time, boldly faced the problem presented by the monotheistic faith, but found no adequate solution. For a parallel to his thought in his own age we have to go to India. (Cp JOB [BOOK], §§ 8 15.)

2. The Book of Job had no immediate successor. For some reason it did not appeal to the next following generations.[2] It may be surmised that the practical moralists regarded such speculations as futile, as, indeed, they were not in keeping with the Jewish genius. The authors and compilers of Proverbs and Ecclesiasticus, avoiding discussions of divine justice, assume that the government of the world is righteous, that the compensation, in this life, for virtuous and vicious conduct is moral. It is substantially the pre-exilic view; but it is refined and broadened. The earthly fortune of men is regarded not baldly as the result of an arbitrary divine decree, but as also the product of natural social laws. These laws, it is true, are thought of as made by God, so that all compensation goes back to him; nevertheless man's freedom and the control of natural law are recognised. This position, namely, that God works in and through society, relieves the old theory of much that is difficult. It was the product of deeper reflection on life, induced by the wider social connections of the Jews, under the more or less definite guidance of Greek habits of thought. Thus, for a considerable period the body of Jewish moralists appear to have come to the conclusion that speculations about divine justice were useless, and that the only practical position was the assumption that the world is governed morally.

3. It seems to have been during the second and the first century B.C. that doubt reappeared in Agur and Ḳōhéleth, under the form of philosophic agnosticism. The Book of Job had adduced the incomprehensibility of God as a motive for reverence and trust; Agur and Ḳōhéleth appear to make it a ground of indifference. The isolation and the consequent obscurity of Agur's words (Prov. 30 1-4) make it difficult to define his position with exactness; but he seems to be satirising or protesting against the pretensions of certain theologians who undertook to explain the method of the

---

[1] The expression 'spirit of God,' in which the 'spirit' is part of God's person, occurs rarely (Wisd. 1 7 9 17 12 1 Pr. 1 23, perhaps in Job 32 8; the genuineness of Job 33 4 is doubtful); its anthropomorphic tone may have made it distasteful to the sages.

[2] That they did not vanish from the popular faith is evident from Daniel, Enoch, and the later literature (see ANGELS).

[3] Probably not in Ecclus. 21 27.

[4] This development appears to have occupied several centuries; Satan appears as a great demonic Prince first in the Similitudes of Enoch (53 3 54 6).

[5] The question as to how God created the world is not discussed; the picture of the divine creative act in Job 38 7 (cp 26 7) appears to be to some extent independent of the account in Gen. 1. God is conceived of always as standing outside of and above the world, except perhaps in Wisd. 7. On the use of mythological ideas in the Wisdom books see the Commentaries on these books, and on Isaiah and Psalms, and H. Gunkel, *Schöpfung u. Chaos*. See also CREATION, § 21.

[6] As, for example, to matter and to bad men. Neither of these explanations could be accepted by a pre-Christian Jew who held with firmness to the national faith.

[7] The Book will here be treated simply as a collection of discussions, without inquiry into its composition. The addresses of Elihu and Yahwè may be regarded as appendages to the dialogue; it is immaterial, for our purposes, whether they were added by the author of the dialogue, or by other persons, nor will the bearing of the argument be seriously affected if the man Job be supposed to represent, in whole or in part, the nation Israel [cp JOB ii.].

[1] The Prologue and the Epilogue appear to have nothing to do with the real argument.

[2] The argument of the man Job is ignored in succeeding Jewish literature, except by Ḳōhéleth and Agur. In the NT Job is mentioned only (Jas. 5 11) as an example of endurance.

divine government. Ḳōhéleth similarly sees in the control of natural law the impossibility of coming in contact with God.[1] Job had affirmed this impossibility in the form of an agonising cry after God; these men set it forth coolly as a philosophic thesis. Neither of them directly calls God's justice in question; but Ḳōhéleth, in his sweeping and sardonic survey of the injustices of life, silently assumes that the world is conducted neither rationally nor morally. If he had not been a Jew, he might have passed lightly over the theocratic difficulty; being a monotheist, he was bound to hold the creator responsible for his creation. He may not employ technical philosophic terms; but his whole conception of the world is philosophic. He seems to have been an isolated thinker. His book was too interesting to be ignored; but it was greatly modified before it passed into the hands of the general public [cp ECCLESIASTES, KOHELETH].

4. It is possible that Ḳōhéleth intends to deny and reject definitely the doctrine of ethical immortality which was probably in his time making its way among the Jews. Certainly his affirmations of the emptiness of the future life are many and pointed, and they stand, by their dispassionateness, in marked contrast with the passionate hopelessness of Job. However that may be, Ḳōhéleth is the last of the Jews to ignore the life to come. The new doctrine gained general acceptance, is taken for granted in Wisdom, and its reception closed the discussion of God's justice. In declaring that the future will wipe out the apparent injustice of the present Wisdom virtually affirms, with Job and Ḳōhéleth, that this injustice exists to human sight, and is inexplicable when the present alone is considered. It thus virtually denies the position of Proverbs and Ecclesiasticus.[2]

14. Value of human life. The question of the value of human life was closely connected with that of the divine control, and its discussion followed the same lines. What may be called the healthy natural view—namely, that life may be honourable and happy if it is morally and religiously good—is taken in Proverbs, Ecclesiasticus, and Wisdom, and the gloomier view by Job and Ḳōhéleth. Between these two last there is the difference that is referred to above; one is tortured by the uncertainties and pains of life, the latter calmly affirms its emptiness.[3] This difference is to be ascribed to the philosophic training or to the temperament of Ḳōhéleth, or to both of these causes. The question was substantially solved, as before, by appeal to the life to come. No Wisdom book finds a source of happiness in man's love to God and communion with him. The germ of this conception is expressed by Hosea (Hos. 6 6); but it appears to have been overlaid by the sense of God's majesty. The nearest approach to it is made in Wisdom (7 10 8 2); but there it is not God but wisdom that is loved.

In all this discussion it is physical evil alone that is considered; the sages are at one with other OT writers in not undertaking to deal with the question of the origin of moral evil.[4] They do not purposely avoid the question; rather it did not present itself to them. Man's liability to sin was accepted as an ultimate fact. The problem of the reconciliation of God's goodness with the existence of moral evil was thus left untouched. Here, again, it was doubtless in large measure the overwhelming sense of divine absolute authority which made the Jews intellectually unfriendly to such an inquiry.[1]

15. Decline of the Wisdom-Literature. The phase of Jewish thought represented by the Wisdom books lasted into the first century of our era, ending with Philo of Alexandria. It is, however, to be observed that his expositions take the form of commentaries on the Tōrāh—he thinks it necessary to rest his conclusions on an inspired authority—and that, on the other hand, his system is simply Greek thought in a Jewish dress. The spontaneous philosophical teaching of the Jews reached its culmination in the Wisdom of Solomon (which was probably composed before the beginning of our era). As early as the middle of the second century B.C., the national interest began to turn in other directions—political and legal; the Messianic enthusiasts wrote apocalypses and hymns, and those who were more concerned with the social organisation of the nation developed the jurisprudence. The troublous times which succeeded cramped the creative power of the people. Few of the gnomic sayings of the *Pirḳē Ābōth* can be called philosophical, and later collections, such as the *Alphabet of Ben Sira*, show no originality. The spirit of the Wisdom Literature was not revived till long afterwards, when the Jews began to devote themselves, under different conditions, to the study of Greek, Arabian, and modern European philosophy. The august figure of the creative Wisdom (almost an hypostasis) is not referred to in the NT, and plays little part in later Jewish thought.[2] The philosophy of the earlier time remains a unique and inspiring creation of the Jewish mind.

16. Bibliography. Besides commentaries, articles in dictionaries, and histories of old-Hebrew literature and of old-Hebrew religion, the following works may be mentioned: Gfrörer, *Philo*, 1831; Dähne, *Jüd.-Alex. Religionsphilosophie*, 1834; Bruch, *Weisheitslehre d. Hebräer*, 1851; M. Nicolas, *Doctrines relig. d. Juifs*, 1860; J. Hooykaas, *Gesch. d. beofening v. d. wijsheid onder d. Heb.*, 1862; M. Heinze, *Lehre v. Logos*, 1872; K. Siegfried, *Philo v. Alexandria*, 1875; Derenbourg, *Hist. et géogr. d. l. Palestine*, 1877; J. Drummond, *Philo Judæus*, 1888; C. G. Chavannes, *La Religion dans la Bible*, 1889; H. Bois, *Origines d. l. Phil. Judéo-Alexandrine*, 1890; A. Aall, *Gesch. d. Logosidee*, 1896; T. K. Cheyne, *Job and Solomon*, 1887, and *Jewish Religious Life* (American Lectures), 1898. C. H. T.

Bibliography (§ 23).

WISDOM OF SOLOMON, or simply **Wisdom**, one of the Apocryphal books of the OT (see APOCRYPHA, § 8).

1. Name and plan. The title varies slightly in different MSS of the Septuagint: 𝔊B* *σοφία Σαλωμῶνος*, 𝔊B *σ. Σαλωμών*, 𝔊ℵ *σ. Σαλομῶντος*, 𝔊A *σ. Σολομῶντος*; the Latin has *Liber Sapientiæ*; the Syriac, ed. Lagarde (Mus. Brit. 14,443), 'The great Wisdom of Solomon'; in Walton, 'The book of the great Wisdom of Solomon, son of David,' with the remark, 'concerning which there is doubt whether some other Hebrew sage, writing in the spirit of prophecy, did not compose it in the name of Solomon, and it was so accepted.'

The book appears to have been written to console and instruct the Jews, and to warn their enemies, in a time of severe trial; the author's particular point of view is indicated by the title. The book divides itself, by its subject matter, into two main parts, each of which may be further subdivided. Thus:—I. The part played

1 This is clear when his book is freed from orthodox insertions.

2 Why Wisdom says nothing of a bodily resurrection is not clear; the idea had been accepted by some Jews (Daniel) long before its time. Perhaps the author thought of it as a relatively unimportant incident of the future life, and he might the more easily pass it by if, as is probable, the resurrection was confined in the current belief to Israelites. Possibly he did not accept it. The future which he had in mind concerned the nobler life of the soul, and included Gentiles as well as Jews.

3 Ḳōhéleth (Eccl. 2 24), like Ben Sira (Ecclus. 30 23, Heb. of 40 18), advises enjoyment of the enjoyable things of life.

4 Gen. 2 *f.* describes the first human sin, but not the psychological beginning of evil; and its purpose is not so much to relate the origin of sin as to account for certain great facts of human experience, namely, birth, toil, and death. Wisdom 2 24, though it substitutes the devil for the serpent of Genesis, comes hardly nearer a solution of the question.

1 However, the question stood outside the range of thought of the ancient world in general, unless it be held to form a part of the pantheistic systems of India.

2 The Sophia of the Ḳabbālā is a different conception from the Wisdom of Proverbs and of the Book of Wisdom, though the two doubtless spring in part from the same source, and have some things in common.

by Wisdom in human life (1-9): (1) Her moral demands and her rewards (1-5); (2) Her nature and powers (6-9). II. Illustrations of her power taken from the ancient history of Israel (10-19): (1) The patriarchs and the exodus (10 *f.*); (2) The Canaanites (12); (3) Digression on idolatry (13-15); (4) Contrast between God's dealings with the Israelites and his treatment of the Egyptians (16-19).

2. Outline. The author makes his first section (and so perhaps the whole book is to be considered) an address to kings (1 1 6 1-21), apparently wishing to influence the potentates in whose hands lay the outward fortunes of the Jews; but his discourse is of a general nature, applying to all men. He begins by affirming that unrighteousness is alien to Wisdom and is punished with death by God, though, in truth, God does not desire the destruction of any, but the wicked, against his purpose, call down death on themselves (1); then, passing to the moral question raised by the absence of just compensation in this world, he observes that the wicked (by whom he appears to mean Jewish apostates), because they deny future retribution, give themselves up to sensual enjoyment here, and, because they are reproved by the righteous, hate and persecute them, not knowing that God created man to be immortal (2); whilst, on the other hand, the sufferings of the righteous in this world are only a chastening, their hope is full of immortality, hereafter they shall be honoured and happy, and, in fact, the wicked even in this life are miserable, and their offspring is cursed (3 1-12); he adds (against a current view) that happiness does not consist in children and old age, childless virtue is better than vice with children, and the truly venerable age is wisdom and probity (3 13-4 9); then, resuming the general argument, he observes that the value of righteousness will be demonstrated hereafter, when good men, here scorned by the bad, will be blessed, whilst the bad, crushed by divine wrath, will be forced to acknowledge the folly of their course (4 10-5 23). In view of all this he proceeds to assure kings that they need wisdom in order that they may govern worthily and attain to immortality (6 1-21), and king Solomon (with whom the author here identifies himself) describes his own experience, how he had loved and sought after wisdom, what great things she had taught him, with what wonderful power and beauty she is endowed, she being, indeed, an effluence and image of God, how, therefore, he had desired to dwell with her always as his spouse, and he besought God, who alone could give her, to bestow her on him (6 22-8 21); then follows the prayer in which the young king, acknowledging and pleading human weakness, begs that Wisdom and God's Holy Spirit may be sent down to him from the holy heavens (9). The prayer concludes with the reflection that men of former generations were guided by Wisdom, and thus the author passes naturally to his second division, a review of the old history. Wisdom, he says, preserved and guided the patriarchs, from Adam to Joseph, and, by Moses, led the Israelites victoriously from Egypt (10). The remainder of the book (from chap. 11 1), no longer occupying itself with wisdom, takes the form of an address to God, detailing his special miraculous care of Israel, particularly in the treatment of Egypt, with brief reference to the conquest of Canaan. The author, undertaking to give a religious-philosophical sketch of the history, points out that the Egyptians were punished by means of their animal gods, yet not wholly destroyed, but given space for repentance (11); that the Canaanites also were punished for their sins, but not blotted out at one blow, God doing all things in just measure, and training his own people in righteousness by the spectacle of the castigation of their enemies (12 1-22), and (the main argument being now resumed) that the Egyptians, through the terrible punishment inflicted on them by means of their own gods, were compelled to acknowledge the true God, whom they had before declared that they did not know (12 23-27).

At this point the author pauses in order to explain the nature and origin of idolatry (*i.e.*, polytheism). The least blameworthy (though still an inexcusable) form of idolatry, he says, is the worship of the powers of nature, by whose beauty men were naturally attracted (13 1-9), whilst the worship of beasts and stones and images made by human hands is ridiculous (13 10-19), as, for example, the homage paid by seamen to images (14 1-5), and all idolatry is accursed as having been the source of moral corruption (14 6-12); idolatry originated in a desire to honour dead children and kings, and was helped forward by the skill of artists, who made beautiful images (14 13-21), and so came all the frightful vices of society, for which men will surely be punished (14 22-31), from which idolatry Israel kept free, whilst Israel's enemies fell into this childish absurdity (15). Returning now to the history, the author declares that God did indeed send plagues on his people (in the wilderness), not dealing with them in destructive fury, but chastising them, and further, making nature fight for them (in Egypt), and giving them angels' food, that they might learn to trust in him (16); that the contrast in God's dealing further appears in his appalling the Egyptians with a horror of darkness and monstrous apparitions, while the Israelites had light and guidance and the comfort of a pillar of fire and a friendly sun (17 1-18 4), that it is visible in the remarkable destruction of the Egyptian firstborn (when the almighty Word, a fierce warrior, leaped down from heaven into the doomed land), whilst the plague (in the rebellion of Dathan and Korah), which devastated the Israelites, was subdued by the intervention of Aaron (18 5-25), and finally, that it is to be seen in the overthrow of the Red Sea, when the Egyptians were punished for their treachery to strangers (worse than that of Sodom), whilst the freed Israelites roamed over beautiful pastures, and thus in all things God magnified and glorified his people (19).

3. Unity. Certain features of the book have given rise to doubts as to its complete and unitary character. The abrupt close of the historical sketch, which ends with the entrance of the Israelites into Canaan, has suggested the view that the work is not complete (Calmet), that the continuation of the historical sketch was abandoned by the author as too large an undertaking, or cut short by some accident (Grotius, Hasse, Eichhorn), or that, having been written by him, it was lost by the accidents of time (Heydenreich). This consideration, though not without force, is not decisive; the author may have stopped at this point because he thought the illustrations given from the earliest history sufficient, or because he wished to single out the Egyptians (Ewald), or (Grimm) because he felt that the later history was lacking in picturesque and dramatic character, and that it chronicled chiefly the subjection of the Israelites to their enemies. The question of completeness may be left undecided; but it may be said that the work, in its present form, does not necessarily make the impression that it is a fragment.

Nor, perhaps, is it possible to decide with certainty whether the book is the production of one man. The two main divisions are not very closely connected; the history of the fathers in the second part (which is at once a glorification of Israel, and an attack on idolatry in general and Egyptian idolatry in particular) may appear to be quite distinct from the praise of wisdom in the first part, which is a philosophical consideration of the life of the author's own day; Solomon is not introduced till chap. 6; after 11 1 the narrative does not mention wisdom, but is wholly concerned with the history; and the style changes, being, in the first part, relatively simple and direct, with constant regard to the Hebrew principle of parallelism, whilst, in the second part, it is ambitious, grandiloquent, or turgid, complicated and artificial, often without parallelism. On the other hand, it may be said that a logical unity is recognisable in the fact that the two points of attack in the work, apostasy and idolatry, represent the two great enemies of the later devout Judaism, and that a consciousness of unity is shown in 9 18, which makes the transition from the first part to the second, and has not the appearance of an editorial insertion; that the similarity between 1 1 and 6 1 suggests that the same speaker is intended throughout, that the non-mention of wisdom after 11 1 is due to the fact that the author became so immersed in his historical sketch (which he meant as an indictment of his own contemporaries) that he forgot the philosophical thesis with which he set out, that the change of style is a natural consequence of the change of subject matter, the moral and philosophical discussions falling more easily into the form of the Book of Proverbs, the dramatic scenes of the earlier history readily suggesting legendary touches and highly-coloured language, and that there are marked resemblances of tone and style in the two parts—*e.g.*, the rush of thought of the second part is paralleled in the description of the wicked (5) and of wisdom (7 22-8 1), and the religiously elevated and dignified tone of the first part appears here and there in the second (cp 1 13-15 9 1-6 with 11 23-26 12 19 16 7). On the whole it seems easier to account for the differences of matter and style under the supposition of one single author than to explain the unity under the supposition of two or more authors.

In the last century there were several attempts to ascribe the book to a number of hands.

4. History of criticism. This analysis was begun, according to Bretschneider, by Houbigant, who divided the work into two parts, chaps. 1-9 and chaps. 10-19, and was herein followed by Doederlein; only, whilst Houbigant ascribed the first part (written in Hebrew) to Solomon, and the second (written in Greek) to a later

WISDOM (BOOK)

writer, Doederlein denied the Solomonic authorship; from this analysis Eichhorn dissents only in making the division at 11 2 and regarding the whole book as having been originally written in Greek, and Bertholdt begins the second part with 13. Nachtigal's proposal, to cut the book up into a number of parts and make it an anthology, met with no favour, and Bretschneider contented himself with dividing Eichhorn's first section into two, thus making three sections in the book, of which the first (1 1-6 8), a fragment of a larger work written by a Greek-speaking Jew (who, however, was not imbued with Platonic philosophy), at the time when Antiochus Epiphanes was meditating his assault on the Jewish religion, deals with the 'righteous,' that is, the faithful part of the Jewish people; the second (6 9-10), composed by an Alexandrian Jewish contemporary of Philo, is devoted to wisdom; the third (12-19), of the same period, is the work of a Jewish partisan, and chap. 11 is the insertion of an editor.

The arguments used by these scholars (given at length by Grimm) are substantially those which are mentioned above. No one since Bretschneider's time has advocated such a dismemberment of the book, and at present its unity is generally regarded as certain or probable.

5. Aim. The aim of the work appears from what has been already said. The author is equally concerned to rebuke apostate Jews and idolatrous Gentiles, to console and encourage his suffering fellow-countrymen, and to extol the greatness of his nation. He calls on princes to observe that virtue, though here oppressed, will be rewarded in the next world, that wisdom, which is the source of virtue and the informing spirit of all things good, is the gift of the God of Israel, that in the past she has saved men from great perils, and that God, in ancient times, glorified his people Israel by delivering them from the hands of their enemies; especially that, for their sake, he formerly inflicted terrible punishment on the Egyptians. In a word, he comforts his people (and warns their enemies) by assuring them that God is on their side.

6. Fortunes. The work appears to have been always held in high estimation. From its inclusion in the Septuagint we may probably infer that the Egyptian Jews attached great value to it from the time of its composition, whether or not they regarded it as canonical in the full sense of the term.[1] As to the position assigned to it by early Palestinian Jews, the only evidence is that which may perhaps be derived from its recognition in the NT. There are a number of coincidences of expression which have been held by some scholars to indicate a use of the book by some NT writers; lists of such expressions may be found in Nitzsch, Kern (in the Tübingen *Zeitsch. f. Theologie*, 1835), Stier (*Apokryphen*, 1853), and others. On the other hand, Tholuck, Grimm, Farrar, and other writers regard the resemblances as too general to prove quotation. From the nature of the material it is hardly possible to speak decidedly on this point; but a comparison of certain passages makes it not improbable that the book was known to Paul and some of his followers, and suggested to them certain expressions and lines of thought.

For example, 5 17 *f.* Eph. 6 13 *f.* (πανοπλίαν, θώρακα δικαιοσύνης), 7 25 *f.* Heb. 1 3 (ἀπαύγασμα), 9 15 2 Cor. 5 4 (βαρύνει, βαρούμενοι), 9 16 Jn. 3 12 (comparison of earthly things and heavenly things as to the difficulty of understanding them), 11 15 *f.* 13 1-8 14 24-26 Rom. 1 20-32 (description of the blindness and vices of the Gentile world), 11 23 Acts 17 30 (παροράς, ὑπεριδών, God's overlooking of men's sins), 16 7 1 Tim. 4 10 (God the Saviour of all men).

Be this as it may, it is generally agreed that, from the end of the first century onwards, it was esteemed and used by Christian writers.

Clement of Rome, in 1 Cor. 27, has an almost exact verbal reproduction of 11 22 12 12, and so Irenæus in *Adv. Hær.* 4 38, cp 6 19;[2] the later Patristic writers generally regarded the work as inspired, though Origen, Eusebius, and Augustine denied the Solomonic authorship (see Clem. Al. *Strom.* ed. Potter, 609; Hippolytus, ed. Lagarde, 66; Cyprian, *Exhort. Mart.* 12; Origen, *Cont. Cel.* 3 72; Euseb. *Præp.* 1 11; August. *De Doctr. Christ.* 2 8), and the title ἡ πανάρετος σοφία was given to it, as to Ben Sira (see ECCLESIASTICUS); homilies on it appear to have been composed by the presbyter Bellator (so Rabanus Maurus, *Præf. in libr. Sap.*), and, from Rabanus onwards, there is a continuous line of expository works.

It has, with few exceptions, been regarded by Christian scholars as a work of high value, in spite of its occasional turgid rhetoric and narrow nationalism; so Luther and most writers up to the present time. Pellican held it to be inspired; but in this view he stands almost alone among Protestants. The opinion as to its canonicity has varied greatly. The fathers cited it freely as 'Scripture' or as of divine authority, but apparently without having in mind the question of canonicity. Augustine seems to be the first writer who formally included it in the list of canonical books. It was recognised as canonical by the Roman Church in the decree of the council of Trent, and shared the fortunes of the other Apocryphal books in the controversies between Protestants and Catholics in the seventeenth century, in the movement which banished the books from the publications of the British and Foreign Bible Society, in the German discussions of 1851-1855. We may be content to say that the Palestinian Jews did not accept it as an inspired Scripture (their standard being in some regards local and narrow), that it was so accepted probably by the Egyptian Jews (though it is not cited by Philo), certainly by many Patristic writers, that it is now accepted by the Roman and Anglican churches, and rejected by the various Protestant churches, and that, for the rest, it must stand on its own merits.

7. Ethical and religious ideas. The book assumes the divine oneness, omnipresence (1 7 12 1), omniscience (1 7 7 16), and omnipotence (11 23), and God's providential care of the world (14 3); it calls him (13 1) 'he who is' (cp 𝔊, Ex. 3 14). The world, it says, was created by God (9 9), not out of nothing, but out of formless matter (11 17). It ascribes to him wisdom (see below), justice (12 15), and kindness (1 13 11 23-26 12 13-16 15 1 16 7), and calls him Father (14 3), but, like the Pentateuch, the Prophets, and the Psalms, represents him as the especial friend and guardian of Israel (16 2 18 1 8 19 22): Israel he chastens (12 23), other nations, the enemies of his people, he punishes (12 20), yet with the design of leading them to repentance (12 2-20). But chaps. 11 *f.* clearly express the idea that the enemies of Israel are predestined to be cursed, and this conception is naïvely put by the side of the proclamation of God's universal love. The idea of an all-controlling fate, superior to God, is not found in the book. The ἀνάγκη of 19 4 is the 'destiny' determined by God; the term is Greek, the conception is Hebrew—it is the OT idea of divine predestination.

8. Word, spirit, wisdom, etc. The word of God is simply the utterance of his will (9 1 16 12 26) and never approaches the Philonian Logos, even in the fine passage (18 15) in which the 'almighty word,' a fierce warrior, leaps down from the divine throne into the doomed land of Egypt, or in 9 1, in which 'word' is indeed a parallel to 'wisdom' (*v.* 2), but wisdom is here not a personification, but a simple attribute of God, and the thought of 5 1 is that of Ps. 33 9. The conception of the spirit of the Lord is the same as that in the later (exilian and post-exilian) OT books, the term being equivalent to 'being or person of God'; it is an anthropomorphic expression, based on the assumption that God, like man, has a separate inward principle or true being. This spirit is said to fill the world, to contain all things, to be in all things (1 7 12 1), and is identified with wisdom and with God (1 4-7). It is the holy spirit of God (Is. 63 10 *f.* Ps. 51 11 143 10), which is

---

[1] It is possible that it was through the Christians that the book received its place in the Greek collection of Jewish Scriptures, but to this view there are serious objections; it is not likely that the early Christians would adopt any non-Christian book which did not have some sort of Jewish authority (see CANON, § 58).

[2] In the canon of Melito (in Eus. *HE* 2 24) the expression παροιμίαι καὶ ἡ σοφία should probably be read π. ἡ καὶ σοφία. In the *et sapientia Salomonis* of the Muratorian Fragment Credner reads *ut* instead of *et*, and Grimm doubts whether the reference is not to the canonical Book of Proverbs rather than to our Apocryphal Wisdom.

sent from heaven (as a divine breath or influence) to console men (9 17), and, as a divine teacher, cannot dwell with unrighteousness (1 5). This representation does not reach hypostatisation; but it is a very vigorous personification (cp Rom. 8). A similar remark is to be made of the conception of wisdom regarded as an attribute of God, only the description is here more elaborate, and there is a nearer approach to hypostatisation. Wisdom, it is said, was with God when he made the world (cp Prov. 8 22-31) and knew his will, sits ever by his throne, and is his intimate associate (9 4 9 8 3), she is an effluence from his glory, the mirror of his power, the image of his goodness (7 25 *f.*), she is animated by an acute, vigorous, benevolent spirit, is of perfect beauty, knows, directs, controls all things (7 22-29 11 8 1), transforming the souls of men (7 27), bestowing on them all virtues (8 4-8), and guiding their outward fortunes (10), coming to dwell with them as beloved friend and counsellor (8 2 9), but bestowed only by God, and to be obtained from him by prayer (8 21 9). She is thus, on the one hand, substantially identical with Philo's Logos, and, on the other hand, blends insensibly with the human quality of wisdom.

Other quasi-hypostatical intermediaries between God and the world are recognised by some modern writers (as Bois) in the terms 'power' (1 3), 'justice' (1 8), 'providence' (14 3 17 2), 'mercy' (16 10), 'hand' (11 17), 'hypostasis' (16 21); but this seems to be reading too large a meaning into the terms in question (see WISDOM LITERATURE, § 8); as to the 'hypostasis' or 'substance' of 16 21 it appears to be simply manna.

The conceptions of 'wisdom' and 'spirit' stand midway, in the line of advance toward hypostatisation, between the earlier ideas of the OT and the later ideas of Philo and of the NT.

Of other supernatural beings there is mention of only Gentile deities and the devil. The former are declared, with greater distinctness than is found in the OT, to be nonentities, invented by the folly of men (14 13 *f.*). The existence of the devil is assumed, and he is identified (2 24) with the serpent of Gen. 3. The name for him here used (διάβολος) is probably taken from the Septuagint, which so renders the Hebrew *Satan* in Ps. 109 (108) 6 Job 1 6 *f.*, 2 1 *ff.*, 1 Ch. 21 1 (BA; not L); the identification of the serpent with a supreme evil spirit occurs only here and in Secrets of Enoch (31 3-6) in the extant Jewish pre-Christian literature,[1] and in both books his seduction of Eve is ascribed to his envy. This identification probably sprang from a deepening sense of sin, and from a growing conviction of the necessity of separating God from the moral evil of the world. The author's silence respecting demons and angels (in which he accords with the other wisdom books) is possibly due to the philosophical nature of his thought, in which wisdom takes the place of all other good intermediary agents (see WISDOM LITERATURE, § 11), and the one demon, the devil, is held to be sufficient to account for the evil of the world.

The doctrine of the book concerning man is in part an expansion of the teaching of the OT. There is

9. Man. no trichotomy (body, soul, spirit), only the dichotomy of the inward principle of life (soul, spirit) and its outer casement (body). The soul or spirit the author represents (herein following Gen. 2 7) as breathed into the body by God (15 11), and, at death, received into the other world never to return (cp the avowal of ignorance on this point in Eccles. 3 21). The question of human freedom is not formally discussed, and probably did not present itself to the author's mind as a problem to be solved. Freewill is assumed in some passages, as in 1 16, in which it is said that bad men call down destruction on themselves, and in 5 6 13, in which they attribute their wretchedness to their own folly. On the other hand, man is said (12 10 13 1) to be foolish by nature, unable of himself to know God, and yet (2 23, which gives an interpretation of Gen. 1 27) the image of God's being. Of a control by God of human thought and destiny nothing is said directly.

The work passes beyond the OT and Semitic thought in general in its adoption of the Platonic theory of the pre-existence of souls (8 20, and cp 15 8 16), and this involves a sort of predestination; Solomon says that being good he came into an undefiled body. Still, the author's practical view of moral life does not seem to be materially affected by his philosophical theories; he holds to moral weakness, general divine control of life, and moral responsibility without troubling himself to define the limits of these facts, and he appears to adopt the OT division of men into good and bad, going beyond the later OT books, however, in recognising the possibility of passing from one class to the other.[1] But his horizon is here limited—he has in mind the flagrant sinners of his time, the apostates and the idolaters, and he cannot be said to express a general view of the ethical capacity of man. He holds, however (9 15), that the corruptible body presses down the soul (cp 2 Cor. 5 4).

Sin, disobedience to God's moral law, is represented in one passage (2 24) as having been introduced into the

10. Sin. world by the devil (for death is the result of sin), in another passage (14 27) as the result of idolatry. This apparent discrepancy does not point to two authors, but comes from a shifting of the point of view. Following Gen. 3 the author says that sin, as an historical fact, made its first appearance in the world in the disobedience of Eve, and, like the OT, he does not think of explaining its psychological origin; but, looking at the vices of the society of his own time, he traces them all to idolatry, which is the negation of the knowledge of God; the vagueness of his thought on this point is apparent from the fact that he not only gives no chronological beginning of idolatry, but refers it to an intellectual weakness (13 1 14 14) whose origin he does not explain. He falls back on the teaching of observation that men are by nature morally weak (5 13), and must, in order to be saved from error, be instructed and strengthened by God (15 3 *f.*). This natural moral weakness he (like the OT) does not bring into historical connection with the transgression of Eve or of Adam. The spiritual safeguard against sin, union of heart with God, is finely expressed in 15 2 *f.*: 'even if we sin, we are thine, knowing thy power [that is, submitting ourselves humbly to thy righteous and merciful control]; but we will not sin, knowing that we are accounted thine, for to know thee is perfect righteousness.' Faith (only 3 14) is used in the general sense of acceptance of God's will, and trust in him for protection.

For the wicked, it is said (3 10-12 17 4 3), there is retribution in this life, and men are punished by means

11. Future. of their sins (11 16), but the real and universal recompense of moral conduct comes in the future life. Here the author passes quite beyond the OT thought, in which Shĕōl has no ethical character, and the resurrection (Dan. 12) is confined to Israelites. Hereafter, he declares (3-5), the position of all men will be determined by their moral character—the righteous will have peace and glory, the wicked will be in misery (4 18-20 17 21); passages like 5 14 *f.* in which the transitory hope of the wicked is contrasted with the everlasting hope of the righteous, must be interpreted, from the general thought of the book, to mean not the annihilation of the ungodly, but their endless misery. Possibly the author here has in mind the denial of future retribution in Ecclesiastes, more probably he is opposing a general Sadducean opinion of his time. He makes no reference to purgatorial future punishment or to a bodily resurrection, unless the latter be involved in the 'glorious kingdom' (5 16 6 20) and dominion over the nations (3 8) which the righteous are to receive, and this is not probable, since, if resurrection had been meant, there seems to be no reason

[1] In the Sibylline oracles (1 49) the tempter of Eve is the 'serpent,' and in the Enoch Similitudes (69 6) one of the evil 'angels' (see note of R. H. Charles in his ed. of *Enoch*).

[1] This possibility is assumed in a simple unreflective way in Ezek. 18.

WISDOM (BOOK)

why it should not have been distinctly mentioned. The conditions of the future life are stated in the most general way—there are no details of happiness and torment, only vague mention of light and darkness, with no clear indication of place, no distinct heaven or hell. The author contents himself with emphasising the fundamental fact of moral retribution; his reticence as to details may be due to his philosophical dislike of the crude pictures in such books as Enoch (see ESCHATOLOGY, *index*, *s.vv.* 'Heaven,' 'Hell'). Man, he holds (here again following Gen. 3), was created to be immortal (in this world apparently), and would so have been, but for the entrance of death through the envy of the devil, and the folly of the first human pair. All good ethical human qualities, wisdom and righteousness, are, according to the author, the gift of God, or of God's minister, Wisdom (7 16 8 4 9 4 12).

12. Virtue.

Besides general rightness of conduct he particularises (8 7) the four virtues of Greek philosophy—moderation, practical sense, justice, and courage or fortitude (σωφροσύνη, φρόνησις, δικαιοσύνη, ἀνδρεία)—as things than which there is nothing more profitable in life, and these also he represents as the gift of Wisdom. His more general catalogue of virtues (7 22 *f.*) embraces the gentler quality of 'philanthropy,' and the Hebrew idea of 'holiness,' and, following the OT, he represents the combination of justice and philanthropy (12 19) as something which is taught us by the example of God himself. His ethical code thus offers a happy union of Jewish and Greek elements; of ethical philosophy proper (inquiry into the basis of moral beliefs and conduct) he has nothing. On the other hand, in his ethical attitude toward non-Israelitish peoples he is narrow; like the prophets, he sees nothing good in other civilisations (as, for example, the Egyptian), but, from his national religious point of view, involves them in one sweeping condemnation. He was a pupil of the Greeks; but he does not, by a single word, express sympathy with their thought and life, or betray any suspicion that they have played an important part in the divine education of humanity. He recognises only one true law of life, and this, he says (18 4), is to be given to the world by Israel; this is the view of the exilian and post-exilian prophets, but in our author we expect some modification of the old statement. There is no trace of asceticism in the book; the passage (3 13-4 6) which has been so interpreted is really a protest against what the author regarded as the undue importance attached by some to the possession of children, and a repetition of the OT declaration (Is. 56 4 *f.*) that bodily conditions shall not determine membership in the Israelitish community. It was an old complaint of the pious in Israel that the wicked were often well provided with children (Ps. 17 14), a gift which was supposed to be a special mark of divine favour (Ps. 127 3-5 128 3). Ben Sira had already (16 1-4) protested against the exaggerated form of this view, and our author makes a special application of the protest to the case of illicit unions; it is better, he says, to have no children than to obtain them by immoral unions; the virtuous woman, though barren, shall be blessed in the final divine visitation, and the eunuch, if he be righteous, shall have compensating part in the temple of the Lord (so Is. 56 5), that is, shall be deemed worthy of an honourable position in the public worship. Such an opinion cannot, therefore, be regarded as springing from Therapeutist hostility to marriage. The fine thought that honourable old age is not measured by number of years (4 8 *f.*) which is a correction or revision of Prov. 16 31 Ecclus. 25 4-6, though, according to Philo (*De Vit. contempl.* 8), it expresses a principle of the Therapeutæ, is of too general a nature to be regarded as borrowed from them; it is found in the Stoics (cp Cic. *De Fin.* 3), and looks not to contempt of life, but to emphasising the better side of life.

With all his strong national feeling, he, like the other Ḥokmāh writers (see WISDOM LITERATURE, § 6), lays no stress on the national ritual of worship; he mentions, as historical facts, the offering of sacrifice by the Israelites (18 9) and of incense by Aaron (18 21), puts into Solomon's mouth (9 8) the words 'temple, altar, tabernacle,' and quotes (3 14) a reference to the temple from the OT (Is. 56 5), but otherwise ignores the external cultus. He regards prayer and praise as the highest expression of religious feeling. He draws largely from the Pentateuch and somewhat from Isaiah and the Psalms, but, after the manner of the time, does not name them or other sacred books, or make allusion to the existence of a sacred canon.

13. Worship.

14. Literary form.

The book, in spite of some glaring faults, deserves to be ranked among the masterpieces of reflective verse. If it cannot be called poetry, it is an admirable example of elevated stichometric writing, with not a few really poetical passages.

The number of its *stichoi* is variously stated (in Swete's ed. of the Sept.) at 1124 [B], 1121 [א], and 1092 [A]; the Latin translation has a few lines not found in the Greek.[1] The author employs, not metre, but the Hebrew parallelism, and the Hebrew system of ictus, a certain succession of accented syllables, between which come varying numbers of unaccented syllables; in the passages (such as 10 3 9 21), in which there are suggestions of Greek iambic, dactylic, and asynartete metres, the combinations of syllables are probably either accidental (such as are sometimes found even in modern prose works), or the occasional imitations which a writer acquainted with Greek poetry might permit himself.[2]

15. Structure.

The construction of the book is skilful. After showing men's supreme need of righteousness, the author dramatically introduces the two classes into which mankind is divided, and describes their contrasted fates. On the basis of this picture he appeals to kings to embrace wisdom, as whose exponent and laudator Solomon appears, giving his own experience, and extolling wisdom as the source of all knowledge, physical, moral, and religious, as an effluence from God and his companion and co-worker, and as the teacher and saviour of men of ancient times. In illustration of this last point he gives a sketch of the history of the patriarchs and of the deliverance of the Israelites from Egyptian bondage and their conquest of Canaan. This plan of the work was well fitted to commend it to the author's contemporaries; the *philosophical praise of wisdom is justified by the exhibition* of its practical value, and the whole picture conveys encouragement to the suffering righteous, and a solemn warning to all the enemies, apostate and Gentile, of the chosen people, whose special possession and guardian wisdom is.

16. Style.

The style varies in the different parts. The first part (chaps. 1-9) approaches the evenly balanced aphoristic form of Proverbs, with the distinctive characteristics of the Hebrew parallelism; but it is made up of connected discourses, each of which aims at a definite demonstration or exposition, and the style is far more flowing than that of Proverbs and Ben Sira, in this respect rather resembling Ecclesiastes. In the second part (chaps. 10-19), whilst the stichometry is maintained, with a flavour of parallelism, the nature of the subject matter produces an approach to simple prose, with an inflation born of the desire to make the history impressive. In both parts power of imagination is conspicuous; the pictures of the final overthrow of the wicked (5 17-23) and the terrors of the Egyptians (17 *f.*) have the cumulation and rush in which Ezekiel is a master, and many of the epithets have an Æschylean force and majesty; it is perhaps this torrent-like movement that most impresses the reader in the author's descriptions. Nor is he lacking in something that resembles humour as, in the descrip-

1 See Berger, *Hist. d. l. Vulgate*, etc.

2 On apparent examples of Greek metrical lines see Farrar and Bois.

tion of the manufacture of an idol by the carpenter (13 11-19), which is, however, only a slight expansion of an OT passage (Is. 44 12-17). He is fond of assonance, alliteration, and paronomasia, as well as of comparison and metaphor, has many instances of chiasm (as 3 15 4 2), and in one case (6 17-20) employs the sorites. This last use is taken from Greek logic, of the others there are many examples both in the OT and in Greek writers. Throughout he shows fulness, richness, and vitality of conception, which is constantly in danger of running into exaggeration and bombast. The nature of his material does not call for direct descriptions of external nature; but in a number of passages he shows a fine feeling for colour, form, and movement (see 5 9-12 21-23 11 18 13 2 17 18-21). The author's noteworthy command of Greek suggests that he was well read in Greek poetical and philosophical literature.

His vocabulary is rich and picturesque; he uses a number of uncommon terms, is fond of compounds, and has himself originated compounds or given peculiar significations to existing forms, as *φιλόψυχε* (11 26), 'lover of souls' (so Damasc. 2 31), and perhaps *πρωτόπλαστος* (7 1 10 1). He has taken a number of expressions from the Septuagint, as *πέτρας ἀκροτόμου* (11 4, see Dt. 8 15); *τὸν ὄντα* (13 1, see Ex. 3 14); *φωστῆρας οὐρανοῦ* (13 2, see Gen. 1 14); *σποδὸς ἡ καρδία αὐτοῦ* (15 10, see Is. 44 20). On the other hand, his frequent Hebraisms (most of which occur in chapters 1-9) show that he was deeply imbued with the style of the OT; thus words, as *σκολιοί* (1 3); *σώματι* (1 4); *ἅγιον πνεῦμα* (1 5 9 17); *ἔσχατα* (2 16); *ἐκστήσονται* (5 2); *ζῆλον* (5 17); *μάταιοι* (13 1); modes of expression, such as those in 4 17 16 8 13 (cp 1 S. 2 6); and the use of the connectives *καί, δέ, γάρ* and the like.[1]

The data for the determination of the origin of the book are found in its use of other books, the nature of its ideas, and the historical conditions which it implies.

17. Signs of date: ideas.

A comparison of 4 1 (on childless virtue) with Ecclus. 16 1-4 suggests that our author was acquainted with the latter work. It is generally admitted that he used the Septuagint translation of the Pentateuch and Isaiah; whether he had the Septuagint Psalms is doubtful—in 3 1 he has an allusion to Ps. 31 5 [6], in 15 15 *f.* he gives rather a paraphrase than a citation of Ps. 115 4-7 (=135 15-17), in 16 20 (from Ps. 78 25) he has *ἀγγέλων τροφήν* where 𝔊 has *ἄρτον ἀ.*, and in 10 17 (from Ps. 105 39) he has *εἰς σκέπην ἡμέρας* where our Hebrew has simply 'covering' and the psalm in 𝔊 (Ps. 105 [104] 39) *εἰς σκ. αὐτοῖς*, from which, in view of his fondness for paraphrasing, it cannot be shown that he did or did not have the Psalms in Greek. There is uncertainty also about the relation of 2 24 ('the envy of the devil') to a similar statement in Secrets of Enoch 31 3 (and cp Jos. *Ant.* i. 1 4 *Sanhedrin*, 59). The conception may have been an old one, derived by Wisdom and Secrets of Enoch from a common source, though, as it is not found in Enoch, it probably arose not long before the beginning of our era. The picture of reward and punishment in the future life is similar to that given in the Enoch similitudes. There is no reason to suppose that our author quotes from Philo.

Legendary additions to the OT narrative, so frequent in Wisdom, do not appear in any other book earlier than 2 Macc. (1 19-36 2 1-8).[2] It is only necessary to compare our author's sketch of the early history (10-19) with that of Ecclus. (44-49) to see the great difference between the methods of the two writers; the latter keeps himself strictly to the OT text, the former revels in fanciful embellishments (11 15 16 1 *f.* 9 18 *f.* 21 *f.* 17 6 9 *f.* 15-19 18 12 *f.* 17-19 19 11 *f.* 17 21). This may be accounted for in part by the supposition that the Alexandrian Jews were very free in their dealing with the sacred books; but, as 2 Macc. shows that there was a similar tendency in Palestine, we are led to refer it rather to a natural growth of legend, of which there are many examples in later Apocryphal books and in the Talmud.[3] The allegorising method of interpretation, if found in Wisdom, would doubtless be Alexandrian, but would not give great aid in determining its date, since this method of interpretation was in use long before Philo's time. But it does not seem to be employed by our author.

18. Legendary additions.

[1] For full lexicographical lists see the commentaries of Grimm and Farrar.

[2] The treatment of Gen. 6 2 in Enoch is mythological expansion under Persian stimulus.

[3] Cp also Gal. 3 19 1 Cor. 10 4 2 Tim. 3 8.

WISDOM (BOOK)

The cases cited (by Bois) are not properly allegorising; the pillar of salt (10 7) is a 'monument,' not a symbol, of an unbelieving soul; the pillar of cloud and fire (10 17) is not a 'manifestation' but a creation of Wisdom; the bronze serpent (16 5-7) is not a symbol, it is an instrument and assurance of salvation; the Egyptian darkness (17 21) is an 'image,' a faint physical suggestion, of the darkness of future punishment; on the high-priest's robe (18 24) was the whole cosmos, but only as the glory of the fathers was on the four rows of stones, and the divine majesty on the tiara ('holy to the Lord'). Reuss's remark, that the Egyptians are introduced throughout as a type of pagans in general, and that the history is regarded as a sort of theory, is correct; through the Egyptians the author aimed at his own contemporaries. This, however, is not allegorising; it may be called a first step toward the method so fully developed by Philo, but it has not reached the point of seeing in things and persons merely representations of religious truth.

The author's silence respecting Messianic hopes is a trait which he has in common with other sapiential writers (see WISDOM LITERATURE, § 5 *f.*), and is not an exact indication of date. His picture of the sufferings and future glory of the righteous (2-5), though it may be based on Is. 53 and has been regarded by some expositors as a prediction of the Messiah,[1] presents no individual human deliverer, but, after the manner of the prophets, simply represents pious Israel as destined to be glorified. In part of the late pre-Christian Palestinian literature also (as Dan., Sib.Or., 1 Macc., Pss. of Sol.) it is the nation that is the centre of hope; it is only in the later portions of Enoch (as chap. 46) that a personal Messiah plays a real rôle (see MESSIAH, § 7; ESCHATOLOGY, § 65 *f.*). That Wisdom has a well-developed doctrine of ethical immortality, and yet says nothing of resurrection, may be due to its Egyptian origin. The idea of resurrection was a Palestinian growth, based on Jewish convictions, but shaped under the stimulus of Zoroastrianism, and it may well have lagged behind in Egypt. On the other hand, Alexandria was the meeting-place of old Egyptian and Greek ideas out of which the monotheistic Jews could easily fashion an elevated moral conception of the world to come. Each Jewish centre would thus work out its own favourite idea of the future, and the fusion of the two ideas would take time. This fusion had certainly occurred before the composition of the earliest NT book, and apparently also before the time of the Enoch-section chaps. 91-104, a tract which in some respects resembles our book, the date of which is, however, uncertain, though it may probably be put in the first century B.C. (cp Charles, *Book of Enoch*). Wisdom appears to have been written before the fusion of the two ideas was accomplished in Egypt; but, on the other hand, the author's Hellenising tendency may have led him to discard the notion of a kingdom of the righteous on earth, though such a notion may have been known to him (cp 3 7 with Dan. 12 3). It is difficult to say when the Egyptian Jews began to formulate a doctrine of ethical immortality; it may, perhaps, be surmised that, since the editor of Ben Sira, writing 132 B.C., says nothing of it, it did not appear before the first century B.C.

19. Eschatology.

An indication of date might be obtained if we could determine with exactness the relative development of Greek conceptions in our author and in Philo. It is generally admitted that Wisdom is deeply imbued with Greek philosophical thought; the conceptions of a beautiful and logically arranged cosmos, and of a wisdom which is the divine agent in creation and in the control of the world (besides the minor points referred to above) betray the influence of the Platonists and the Stoics. The same general ideas are found in Philo, as whose contemporary, accordingly, our author is regarded by some expositors. On the other hand, the differences between the two writers are obvious;[2] besides many divergencies

20. Greek conception.

[1] So Tertullian, Cyprian, Hippolytus, Origen, and many interpreters of the Church of Rome; see Westcott's note in Smith, *DB*, art. 'Wisdom of Solomon.'

[2] The two are compared by Grimm, Drummond, Menzel, Farrar, Bois, and others. Siegfried, in Hastings' *DB*, notes differences between the two.

in explanation of particular points (which, however, would not necessarily prove them not contemporaries), there is, for example, the great difference in the employment of the allegorical method of interpretation, which probably, though not certainly, points to the precedence of Wisdom in time. The main point of comparison is the conception of the divine self-manifestation through intermediate agencies, and herein Philo and Wisdom differ in two respects: first, whilst Philo names as chief agent the Logos, and has comparatively little to say of Wisdom, Wisdom gives the first place to Wisdom (not going beyond the OT in his conception of the 'word'), and thus appears to range itself along with those earlier more Hebraistic books (Proverbs and Ben Sira) in which the divine attribute plays the most important rôle, Philo, on the other hand, advancing to the more definitely Stoic idea; and secondly, Philo treats the conception in a more scientific way, undertaking to state with philosophic precision the nature of the relation between God and his personified energy, whilst in Wisdom this relation is assumed without explanation. From this it may probably be inferred that our author had not grasped the Stoic doctrine of the Logos, which, seeing his fondness for Greek ideas, he would hardly have failed to do if he had lived as late as the first half of the first century of our era.

21. Outward conditions.

The historical conditions to be accounted for are: the persecution of faithful Israelites by Gentiles and apostate Jews, and the author's special grudge against the Egyptians. There was a class of apostate Jews from the time of Antiochus Epiphanes, 187 B.C. (Jos. *Ant.* xii. 5) down to the time of Philo (Philo, *Confus. Ling.* 2; *Pœnit.* 2). The account in 3 Macc. of an Egyptian persecution in the time of Ptolemy IV. (221-217 B.C.) being generally admitted to be legendary, the periods of persecution which may come into consideration (see Jos. *Cont. Ap.* 2 5) are the reigns of Ptolemy VII. (145-117 B.C.), Cleopatra (47-30 B.C.), Caligula (38-40 A.D.), and (Jos. *BJ*, ii. 18 7 *f.*) Nero (63 A.D.). There is not much ground for choice among these periods,[1] at most it may be said that the comparatively calm tone of our book (as in 14 16-20) does not favour the seasons of bitterer distress (under Caligula and Nero). But it is not necessary to suppose that the work was composed in the midst of one of the violently hostile movements. The author, even if he lived in a relatively quiet time, would know enough of the general fortunes of his people to paint his pictures of suffering (2-5 14). Nor is his reference to the worship of the statues of kings (14 16-20) chronologically decisive, for divine worship was paid to Ptolemy I., and probably to Antiochus II., as well as to Caligula and other Roman emperors. The author is, in fact, as Grimm remarks, giving a learned account of the origin of idolatry, and it is unnecessary to assume that the deified princes to whom he refers were his contemporaries. There appears to be nothing in the historical situation depicted to prevent our following the literary indications and assigning the work to some time before that of Philo, probably to the first pre-Christian century.

22. Author.

Of the author all that is clear is that he was an Egyptian Jew. His strong Jewish feeling appears on every page of his book, and his Greek training and his hearty dislike of the Egyptians point to Alexandria as his residence. The unsuccessful attempts to identify him with some known person are detailed at length by Grimm and Farrar.

The reference of the work to Solomon,[2] found in early versions (Sept., Syr.), and in a number of Patristic, Rabbinical, Roman Catholic, and Protestant writers (as late as 1858 by the Catholic J. A. Schmid), was rejected by Augustine and Jerome, and is no longer seriously considered. Very early critics thought of Ben Sira as the author (see Aug. *Doct. Chr.* 2, 8; *Retract.* 2, 4), or of the famous Philo (see Jer. *Præf. in Lib. Sal.*), and the latter view was adopted by Luther and a number of other theologians; but the differences between those two writers and our author are so glaring that they absolutely exclude such an identification. Other Jewish names which have been suggested are Zerubbabel (by J. M. Faber), Aristobulus, the friend of Ptolemy Philometor (by Lutterbeck), an older Philo (by Drusius and others) who is said to have written a poem on Jerusalem (cp Jos. *Cont. Ap.* 1 23 where a non-Jewish 'older Philo,' apparently an historian, is mentioned), and Apollos, before his conversion (by Plumptre), on the ground that he wrote the Epistle to the Hebrews, and that the similarity between the epistle and Wisdom is so great as to suggest a common origin. None of these suggestions except the last has any show of probability, and it can hardly be called probable, since the two books, though not without a certain resemblance in style, still have differences, both of style and of manner of thought, too great to be explained even by a writer's change of religion. The author has been held to be a Christian (by C. H. Weisse and others) on such grounds as his supposed reference (3) to the Messiah, his designation of God as 'father' (14 3), his doctrine of future ethical retribution (3-5), and the supposed mention of his book among Christian writings in the Muratorian Fragment (but the last supposition is probably erroneous—see above, § 6, n. 2), and the authorship has been assigned (by Noack) to Apollos, after his conversion to Christianity. But a Christian book without a single distinctively Christian idea (and none of those adduced by Weisse are distinctively Christian) would be an incomprehensible anomaly; the book is intelligible only on the supposition that it was written by a non-Christian Jew. Finally, as has been pointed out above (§ 12), there is no reason for supposing that the author belonged to the sect of the Therapeutæ; he has no trace of their teaching, and it does not seem probable that a member of that sect would have imbibed Greek learning as our author has done.

23. Greek text.

The *Greek* text is given entire in the uncials A (Lond. 1879-1883), B (Rome, 1871), ℵ (St. Petersburg, 1862), in part in C (Leipsic, 1845), entire in the cursives H. P. 23, 55, 68, 106 and 155 (not entire), 157, 248, 253, 254, 261 (not entire), 296; nine MSS collated by Thilo (but not published) are in some passages adduced by him (*Specimen exercc. critt. in Sapient. Sal.*, Halle, 1825) and by Grimm. Swete gives the various readings of ℵAC. The text is well preserved; A in a number of cases offers better readings than B. That the Greek is the original text is now generally believed. Faber's argument to prove a 'Chaldee' (that is Jewish Aramaic) original is successfully rebutted by Hasse; thus in 2 22 the Syr. for Greek γέρας is explained by Faber as coming from a confusion of Aramaic סיופין and סיבין, but it is rather, says Hasse, a misreading of the Greek (γῆρας for γέρας); in 18 16 Syriac 'command' for Greek 'death' comes, according to Faber, from a misunderstanding of דבר (which, however, is not Aramaic but Hebrew), but may be naturally regarded as a scribal erroneous repetition of the preceding 'command.' So also, recently, D. S. Margoliouth,[1] whose examples are not more convincing than those of Faber. In Wisd. 1 12 14 10 the Greek is satisfactory as it stands; and the identity of the expression in 2 12 with that in Is. 3 10 𝔊 (noted by Schleusner) may be understood as a borrowing on the part of the former, or as a very late insertion in the latter. Greek is too free and idiomatic to be taken as a translation; its Hebrew colouring belongs rather to the thought than to the style.[2]

24. Versions.

The Old Latin Version was adopted by Jerome with slight changes; the Clementine text of 1592, with corrections from Vercellone's edition of 1861, is given in the edition of Heyse and Tischendorf (Leipsic, 1873), with the readings of the Codex Amiatinus in the margin; the Cod. Amiat. has been edited by Lagarde (in *Mitteil.* i.). It is in general a literal, faithful, and intelligent translation of the Greek. It occasionally (as in 4 17) inserts an explicitum, and has a number of words and clauses not found in our Greek, as 1 15 (one word, and in some MSS one line) 2 8 (one line) 2 17 (one line) 3 1 (one word) 4 14 (one phrase) 6 1 (one couplet) 6 20 (one word) 8 11 (one line) 10 1 (two words in the Clem. text, but not in Amiat.) 11 5 (one and a half lines) 11 8 (one clause) 17 1 (several words). Some of these additions (as 3 1 4 14 17 1) are explanations of the translator, and none of them commend themselves as probably belonging to the original text; thus in 1 15 the *perpetua* weakens the ἀθάνατος; in 2 8 the line 'let there be no meadow which our jollity does not traverse,' though in itself appropriate and good, mars the couplet-arrangement (three couplets in *vv.* 7-9); the aphorism of 6 1, 'wisdom is better than strength, and a sage man than a strong,' interrupts the connection of thought and is obviously a gloss, as are the insertions in 8 11 10 1 11 5 (two glosses) and 11 8. A certain number of words also are omitted in the Latin, the translator allowing himself some freedom. On the history of the version see Berger, *Hist. d. l. Vulgate*, 1893, and on the MSS, Thielmann, *Bericht*, etc. 1900. On the vocabulary cp Grimm, *Comm. KGH*, pp. 5 *ff.*

[1] Grimm's remark that in the time of Nero the spirit of the Jews was too much broken to produce so talented a book as Wisdom is not convincing; we know too little of the times to make such a judgment.

[2] [Revived by D. S. Margoliouth who holds that there are references to this book in Isaiah.]

[1] In *JRAS*, 1890, and in 'Lines of defence of the biblical revelation,' 1900.

[2] Cp J. Freudenthal in *JQR*, 1891.

The Syriac is made directly from the Greek, following a MS resembling Codex Alex. Whilst in general it renders the ideas and expressions of the original with fidelity, it diverges therefrom far more than the Latin. It adds explicita and other explanatory words, inserts the proper names (Cain, etc.) in chap. 10, transfers a number of Greek words, gives free translations, mistranslates and omits. On the attempt to refer it to an Aramaic original see Hasse. For the Arabic version cp Hasse, for the Armenian cp Welte, and F. H. Reusch, *Liber Sapient. græce*, etc., 1858; these also both come from our Greek.

For general works on the Jewish conception of wisdom see WISDOM LITERATURE, § 15. For lists of critical and expository works up to 1860 see Bretschneider and Grimm. Among these the following may be mentioned: Rabanus Maurus, †856, the earliest extant commentator (in Migne); Grotius, *Annotationes*, 1664; Cornelius a Lapide, *Comment. in libr. Sap.*, 1613; Cappellus, *Comment. . . . in VT*, 1689 (scattered observations); J. M. Faber, *Prolusiones*, 1776-77 and 1786-87; J. G. Hasse, *Salomo's Weisheit*, 1785; J. G. Eichhorn, *Einleitung i. d. Apocr. Schr. d. AT*, 1795; C. G. Bretschneider, *Lib. Sapient.*, 1804; C. L. W. Grimm (in *Kurzgef. exeget. Handbuch z. d. Apokr. d. AT*), 1860 (very full and judicious, supersedes his work of 1837). Since 1860 have appeared commentaries by E. C. Bissell, 1880 (in the volume on the Apocrypha added to the Lange series), F. W. Farrar, 1888 (in Wace's *Apocrypha*), and Siegfried (in Kautzsch's *Apokr.*); articles in Smith's *DB* (by B. F. Westcott); M'Clintock and Strong's *Cyclopædia*; Herzog-Hauck, *RE* (by E. Schürer, see also his *GJV*, etc. = *Hist. of the Jewish People*, etc.); Hastings' *DB* (by Siegfried); and annotated editions by W. J. Deane (*The Book of Wisdom*, 1881), W. R. Churton (in his *Uncanonical and Apocryphal Scriptures*, 1884), and C. J. Ball (in his *Variorum Apocrypha*, 1892). On the ethical ideas see Kübel, 'Die Ethischen Anschauungen d. Weisheit Salomonis,' in *St. Kr.* (1865).

25. Bibliography.

C. H. T.

WISDOM OF JESUS. See ECCLESIASTICUS, SIRACH.

WISE MEN (חֲכָמִים), Gen. 41 8. See MAGIC, § 3, STARS, § 5, ZOROASTRIANISM; cp also WISDOM LITERATURE, § 2.

WITCH (מְכַשֵּׁף), Dt. 18 10, **WITCHCRAFT** (קֶסֶם), 1 S. 15 23. See MAGIC, §§ 2 *b* 3 1 *f.*

WITHES, GREEN, AVmg. 'green [moist] cords,' RVmg. 'new bowstrings' (יְתָרִים לַחִים, *yĕthārīm laḥim*), Judg. 16 7. On the meaning of לַח, *laḥ*, see COLOURS, § 17; for יֶתֶר, *yĕther*, see CORD. Bowstrings of 'green' gut, not yet dried, are probably meant.

WITNESS. The part played by witnesses in Jewish legal procedure has been dealt with in LAW AND JUSTICE, § 10 *ff.*

The Hebrew word is עֵד, *'ēd*, the Aramaic *sāhdā* (סהדא); and in two passages in OT these two terms are treated as synonymous (Gen. 31 47, שָׂהֲדוּתָא ‖ עֵד; Job 16 19, שָׂהֵד ‖ עֵד). The Arabic word is *āhid* or *šāhīd* (cp Palmyr. סהד; see Cook, *Aram. Gloss.*, *s.v.*). The root *šahida* (= Aram. *sehēd*; cp שָׂרִיד with Ar. *šarada*) seems to have meant originally 'to be present' (cp the use of *šuhūd* in Koran, *Sur.* 74 13), and then 'to bear (be present as) witness.' *Šāhid* is both a witness in general, and one who witnesses to the truth of his creed by dying (see *Sur.* 4 71 39 69). The original meaning of the Hebrew root was perhaps (as Gen. 31 47 Job 16 19 suggest) the same as in Arabic.

Gen. 31 44 48 52 describes how a heap of stones was witness (עֵד; was present to remind) of some transaction; Dt. 31 19 21 says that the song of Moses was witness to (עֵד; existed or was present to remind) the Israelites of a great achievement. For other instances of the use of עֵד in a similar sense see BDB, where, however, the idea of the root is taken to be that of 'reiterating, hence emphatically affirming.'

The word used in the NT is *μάρτυς* (*μάρτυρ-*). It was employed by Christians, as by Muhammedans, to describe (1) simply one who witnessed to the truth, and then (2) particularly one who gave evidence of the truth by dying, and so 'a martyr.'

For (1) see Acts 1 22. The word is already used in the second sense (2) in the NT. So in Acts 22 20 (AV; RV 'witness'), καὶ ὅτε ἐξεχεῖτο τὸ αἷμα Στεφάνου τοῦ μάρτυρός σου; Rev. 2 13 (AV, RV 'witness'), Ἀντίπας ὁ μάρτυς μου, ὁ πιστός [μου], ὃς ἀπεκτάνθη παρ' ὑμῖν; Rev. 17 6 (EV), καὶ εἶδον τὴν γυναῖκα μεθύσουσαν ἐκ τοῦ αἵματος τῶν ἁγίων, καὶ ἐκ τοῦ αἵματος τῶν μαρτύρων Ἰησοῦ.

In ancient times the heroes of mankind were commonly represented as being distinguished from other men by (amongst other characteristics) the manner in which they entered and departed life. They were not born in the usual way, or, if so, out of due course; they disappeared from life in a mysterious way, or they showed themselves superior to death by dying cheerfully under painful circumstances. Thus both by their birth and by their death they witnessed to their superiority. This was specially the case with founders of religions. But 'the faithful' were also called upon to bear witness. While, however, the master gave evidence of the truth of his claims by the wonderful words and works of his whole life, 'the faithful' could in most cases only witness to the truth of them by following the master's teaching even unto death. Disciples, therefore, in some cases, sought and actually found martyrdom; in other cases they are represented by tradition as having so suffered, whether they did so or not. The idea of witness by miracle and martyrdom is confined to no single religion. Cp WONDERS. M. A. C.

WIZARD (יִדְּעֹנִי), Lev. 20 27. See MAGIC, § 4, iii.

WOLF (זְאֵב;[1] λυκος; *lupus*). This is the usual word for 'wolf,' though in Is. 13 22 RV renders אִיִּים, *'iyyīm*, and *SBOT* תַּנִּים, *tannīm*, by 'wolves'; see JACKAL, and, on the variety of terms for wild animals, CAT. In Is. 11 6 a notable reference is made to the wolf, which as a type of ferocity is brought into contrast with the lamb.[2] The full force of the phrase employed is that the wolf will, as it were, become a *gēr* or client of the lamb (cp STRANGER).

The wolf (*Canis lupus*) has a very wide range, extending practically throughout North America (N. of Mexico), Europe, and Asia. Many local varieties occur, which have been by various authorities raised to the rank of species. The wolf is still found in Palestine (and Arabia, cp Doughty, *Ar. Des.* 1 327). It is there somewhat lighter in colour and has a stronger and stouter build than in Europe, rarely moves in packs, and prowls, sometimes in pairs, round the sheepfolds at night. By day it frequents the rocky valleys. Naturally it plays a large part in the life of the Israelites, and the references to its boldness and ferocity are frequent (cp Gen. 49 27 Jer. 5 6 Ezek. 22 27 Hab. 1 8 Zeph. 3 3). However, if the cubs be removed at a very early age they are susceptible of training, though they can rarely be trusted with strangers.

The word for 'wolf' is frequently used as a personal and clan name (cp Cook, *Aram. Gloss. s.v.* דאבו, and see ZEEB),[3] and it has accordingly been held that it was a totem-animal among certain communities (at least) of the ancient Semites.[4] For the wolf in Semitic legend and folklore see WRS, *Kinship*, 198, *Rel. Sem.*(2) 88.

A. E. S.

WOMAN (אִשָּׁה), Gen. 2 22. See FAMILY, especially §§ 4-6; MARRIAGE, esp. §§ 4-7; LAW, § 14 *a*; SLAVERY; and cp ADAM, esp. § 3 *b*.

WONDERS. The EV shows some uncertainty as to the translation of the Hebrew and Greek synonyms.

(1) מוֹפֵת, *mōphēth*, is rendered by 'wonder' in Dt. 13 1 [2] 28 46 EV, but in Ex. 7 9 Dt. 29 3 EV by 'miracle.' The meaning of the root is uncertain, but see BDB and cp below under (5).

1 According to Hommel (*Säugethiere*, 303 *ff.*), זְאֵב is the jackal; see on the other hand *ZDMG*, 1880, p. 373, and cp JACKAL. The Ass. cognate *zību* appears to denote also a bird of prey.

2 Compare the contrast in Mt. 10 16, 'sheep in the midst of wolves,' and Acts 20 29, where Paul at Miletus warns the 'flock' against the λύκοι βαρεῖς.

3 The fact that the name 'wolf' is given to a sickly child, 'that their human fragility may take on as it were a temper of the kind of those animals' (cp Doughty, *Ar. Des.* 1 329) does not weaken the above argument, since, in some cases, this name is borne not by individuals but by whole clans (cp *Kin.* 197 *f.*).

4 See Robertson Smith, *J. Phil.* 9 75 *ff.* and cp Frazer, *Pausanias*, 2 195 *f.*

(2) פֶּלֶא, *pele'*; lit. 'wonder,' so EV Is. 29 14; cp Judg. 6 13, *niphlā'oth*, AV 'miracles,' RV 'wondrous works.'

(3) אוֹת, *'ōth*; lit. 'sign,' so commonly in EV, Dt. 13 1 [2] 28 46 etc. In Nu. 14 22 Dt. 11 3, RV 'signs,' AV 'miracles.'

(4) *δύναμις*, lit. 'power.' In Mk. 9 39, AV 'miracle,' RV 'mighty work.' Cp Acts 2 22 'a man, approved by God among you, by miracles (RV 'mighty works'), wonders, and signs,' . . . *δυνάμεσι καὶ τέρασι καὶ σημείοις*—a suggestive passage. In Acts 8 13 19 11 1 Cor. 12 10 28 Gal. 3 5, EV 'miracles'; but in Heb. 2 4, AV 'miracles,' RV 'powers.'

(5) *τέρας*, Acts 2 22 6 8 15 12 Heb. 2 4, EV 'wonders.' Two derivations are noted in Grimm-Thayer (*Lexicon, s.v.*), neither of which can be pronounced very satisfactory. They are: (1) 'apparently akin to the verb *τηρέω*; accordingly something so strange as to cause it to be "watched" or "observed"'; (2) connected 'with *ἀστήρ ἀστραπή*, etc., hence "a sign in the heavens."' If the Heb. *mōphēth* (1, above) be connected with Ar. *'ipha* 'to suffer evil' (see BDB, *s.v.* אפת), we might perhaps compare for *τέρας* the root *τείρω* 'to suffer distress'; the idea would then be 'a calamity or catastrophe = a portent.'

(6) *σημεῖον*, lit. 'sign,' like (3) above. So in Mk. 8 11 *f.* Lk. 11 16 29 *f.* Mt. 12 38 *f.* 16 14 Jn. 2 18 6 30 1 Cor. 1 22 Acts 2 22 Heb. 2 4. But AV 'wonder,' RV 'sign,' Rev. 12 1; EV 'miracle,' Lk. 23 8 Acts 4 16 22; AV 'miracle,' RV 'sign,' Jn. 4 54 10 41 2 11 23 3 2 6 2 26 7 31 9 16 11 47 12 37 Acts 6 8 8 6 15 12 Rev. 13 14 16 14 19 20.

The original idea in the word 'wonder' (Lat. 'miraculum,' Angl. 'miracle') seems to have been that of turning aside through a feeling of fear or awe (see Skeat, *Etymol. Dict., s.v.*). The savage 'ignorant of the very rudiments of science, and trying to get at the meaning of life by what the senses seem to tell' (to quote Tylor, *Anthrop.* 343) would often turn aside when he came face to face with something new, unexpected, or extraordinary.

'The emotion named Wonder is founded on relativity. It is more than simple novelty. One degree beyond novelty is *surprise*, or the shock of what is both novel and unexpected. . . Wonder contains surprise, attended with a new and distinct effect, the effect of contemplating something that rises far above common experience, which elevates us with a feeling of superiority' (Alexander Bain, *The Emotions and the Will*, 85 *f.* [1899]).

'A wonder' then is something which cannot be explained from the ordinary experience of mankind in general at a given time, but, as Hobbes pointed out (*Leviathan*, chap. 27), 'seeing admiration and wonder are consequent to the knowledge wherewith men are endued, some more, some less, it followeth that the same thing may be a miracle to one and not to another.' As regards many of the wonders that surrounded them (the wonder of life, the wonder of creation) primitive men would be very much on a level and would all be satisfied with a fanciful explanation; but with regard to others (the wonder or effect of certain herbs, for instance) some men would soon, at first by chance, attain some measure of knowledge and thereby themselves become relatively wonderful and wonder-workers (medicine-men, obi-men). In the eyes of his admirers, however, the man who is relatively wonderful, soon grows to be very much more than this. Obviously, therefore, there is a very close connection between wonders or miracles and myths; the growth and development of both would go on almost, if not quite, simultaneously. Obviously, too, the wonder is closely connected with exorcism and sorcery.

'Exorcism and sorcery pass insensibly into miracle. . . If the marvellous results are ascribed to a supernatural being at enmity with the observers, the art is sorcery; but if ascribed to a friendly supernatural being, the marvellous results are classed as miracles' (Herbert Spencer, *Principles of Sociology*(3), 1 246).

The very word in English, as we have seen, indicates the way we must take if we wish to understand the meaning of wonders. It is clear that a thorough examination of the subject would involve an investigation into the evolution of ideas in general, into psychology, anthropology, comparative religion and mythology. If Dr. Bacon in his new definition of higher criticism is thinking of the comparative method, such an investigation would indeed come within the province of that science. 'If a new definition of the higher criticism may be permitted so late,' he says, 'we should call it *the study of the origin and development of ideas*' (*Triple Tradition of the Exodus*, xxxiii.).

In any case, in view of the results of the comparative method of study,[1] it is impossible to treat the subject of wonders or miracles on the old lines. Here, however, it need only be pointed out that it is now evident that no religion can be isolated and treated separately; that myths, and wonders, whether natural (cp below) or supernatural, are not peculiar to any one system; and that the ideas of primitive man, or the savage, have left their mark even on the most advanced religions.

Comparative mythology shows that man has given explanations of the universe which indicate that the mind moves everywhere along very similar lines. Comparative religion teaches that even when men had attained to no small degree of general culture they still demanded outward and visible signs of the efficacy of their faith. The sage, or the founder of a religion, who claimed to enlighten his fellows, was expected to produce evidence, apart from his teaching, that he was endowed in a peculiar and extraordinary way. As a witness to his superiority, he was expected to perform wonders (or give a sign, cp [3] and [6] above). And as such a one was in most cases, owing to his superior knowledge, on a higher level than his contemporaries, he was, no doubt, often as a matter of fact able to do things which to them appeared wonderful; he may often have been able to cure diseases, perhaps even to restore to life a body that was to all appearance lifeless; he was, no doubt, often able to exercise a remarkable influence over men's minds, and perhaps to cure certain mental diseases. It is difficult to calculate the effect that such a display of power would have on those who did not understand its nature. It is easy, on the other hand, to understand that such evidence of a power out of the common having been furnished, wonders of a different nature would also be ascribed to the master by his disciples, especially after his decease. His works and his teaching would seem to combine to suggest that he did not belong to the life of the earth; he must be a favourite of one of the deities, or of the Deity, or a son of one of the deities, or of the Deity, or even an actual deity come in the flesh. The wonders with which he would now be accredited would no longer be relative and natural, but absolute and supernatural (*i.e.*, miracles). It would be represented, especially after his decease, that the manner of his appearance in the world, and of his disappearance from it when his mission had been accomplished, were alike remarkable; that if his mother was human, his father was divine, that if he seemed to die like other men, it was not so in reality. He would no longer be described as merely healing diseases, physical and psychical, by natural, but little understood, means. He has become superior to the laws of nature. He walks upon the sea and stills its waves, commands the wind and the storm, cures instantaneously the deaf, the dumb, and the blind, brings to life those who have actually died.

This process went on even in the middle ages. 'Principles of myth-formation, belonging properly to the mental state of the savage, were by its aid [the doctrine of miracles] continued in strong action in the civilised world. Mythic episodes which Europeans would have rejected contemptuously if told of savage deities or heroes, only required to be adapted to appropriate local details, and to be set forth as miracles in the life of some superhuman personage to obtain as of old a place of credit and honour in history' (Tylor, *Primitive Culture*,(3) 1 371 *f.*). Writings in which miracles figure are not historical in the modern and scientific sense of the word.

Many of the OT and NT narratives in which 'wonders' figure have been treated in special articles, and from various points of view. See, for instance, CREATION, DELUGE, DEMONS,

[1] Prof. Cheyne was one of the first critics to apply this method in the case of biblical study. See in *EB*(9), the articles 'Cosmogony' (6 446 *ff.*), 'Deluge' (7 54 *b ff.*), 'Jonah' (13 736 *f.*), also *Th. Rev.* 211-219 (1877). For more recent examples see CREATION, DELUGE, JONAH, PURIM, etc., and cp DEMONS, TEMPTATION. See also S. A. Cook, 'Israel and Totemism,' in *JQR*, April 1902; A. S. Peake, art. 'Unclean,' in Hastings' *DB*.

WOOD (עֵץ), Gen. 6 14. See Forest, and the special articles.

WOOF (עֵרֶב), Lev. 13 48 RVmg. 'knitted stuff.' See Weaving, § 7.

WOOL (צֶמֶר, *ṣémer*; ερiον). The sources of wool available in ancient times to the inhabitants of Palestine were three in number—the sheep, the camel, and the goat;[1] but, except where another animal is distinctly mentioned (Mk. 1 6 Mt. 3 4 1 S. 19 13), we may assume that the wool of the sheep is meant. An Arabic saying (cp Bochart, *Hieroz.* 2 442) declares that the best wool is that of the *naḳad* (see Sheep); it was this wool which Mesha, king of Moab, sent as tribute to the king of Israel (2 K. 3 4 RV). Wool is probably the worst conductor of heat of all the materials used for clothing, and for this reason amongst others has from the earliest times been used as a covering. The finest wool is that cut from the young sheep of about eight months old, and is known as lamb's wool (Prov. 27 23 26); later shearings yield the wether wool, which is either unwashed or washed, the animal in the latter case being washed before submitting to the shears. As is still the case in pastoral countries, the annual sheep-shearing was in ancient times an occasion of great gatherings and rejoicings (1 S. 25 2 2 S. 13 23; see Feasts, § 2 *f.*). The wool is usually cut a few days after the washing, by which time it has dried. A skilful shearer will remove the whole of the fleece in a continuous sheet, which is then sorted according to its quality. The wool-stapler, whilst doing this, removes the larger and more conspicuous impurities, bits of straw, etc. The wool is then carefully washed with soft water and soap, and dried. At this stage it is still in the condition of matted locks as they come from the body of the animal, and before it can be woven it must be teazed, combed and spun into a thread (see Weaving). According to EV the wool of Damascus was especially prized at Tyre (Ezek. 27 18); 𝔊, however, substitutes 'wool from Miletus,' and Davidson says, 'possibly, wool of Zachar.' It is a matter for the textual critic (see Javan, § 1*g*). On the prohibition to wear 'a mingled stuff, wool and linen together' (Lev. 19 19 Dt. 22 11 †), see Linen, 7, n. 2, and *Crit. Bib. ad loc.* A. E. S.

WORD (ο λογος). On 'the Word' see Logos.

WORLD. The words are: (1) אֶרֶץ, *ĕreṣ*, Gen. 1 24; (2) תֵּבֵל, *tēbēl*, 1 S. 2 8; (3) עֹלָם, *'ōlām*, Ps. 73 12; (4) חֶלֶד, *ḥéled*, Ps. 17 14; (5) חֶדֶל, *ḥédel*, Is. 38 11; (6) αἰών, Heb. 1 2; (7) γῆ; (8) κόσμος, Jn. 18 36; (9) οἰκουμένη, Heb. 2 5. See Earth.

WORM. Worm is the rendering of the following Hebrew words:—

1. סָס, *sās* (σής) in Is. 51 8,† where obviously the larva or caterpillar of some clothes-moth is intended. See Moth.

2. תּוֹלָע, *tōlā'* (also תּוֹלֵעָה and תּוֹלַעַת, from a root meaning 'to gnaw' [Del. *Heb. Lang.* 66 *f.*; *Prol.* 115]; cp מְתַלְּעוֹת and מַלְתָּעוֹת as applied to the teeth), and

3. רִמָּה, *rimmāh* (cp Ar. *ramma* 'be rotten,' *rimmatun* 'rottenness'), are the words most commonly employed, and—as in vulgar speech—indicate not so much earth-worms (which indeed are found in Palestine, cp below), as any elongated crawling animal. 𝔊 renders generally by σκώληξ, and in Job σαπρία, and less often σῆψις, Vg. *vermis, putredo, tinea*. The *tōlā'* which was bred in the manna (Ex. 16 20, in *v.* 24 *rimmāh*) means obviously the larva of those flies which breed in organic matter. In hot countries flies breed with extraordinary rapidity, and maggots not uncommonly appear in sores, etc.; whence several allusions are made in the OT and Apocrypha to their parasitical tendencies and especially to their habit of preying upon the dead (Job 7 5 21 26 24 20 but cp 𝔊 Is. 14 11, cp also 1 Macc. 2 62 Ecclus. 10 11 19 3).[1] In this connection we find in pre-Christian times the first reference to the 'fire and worm' which afterwards became popularly connected with the notions of a future punishment (Is. 66 24; cp Ecclus. 7 17 Judith 16 17 and Mk. 9 44 *ff.*).

Death by worms, regarded with special horror by the ancients (Herod. 4 205), is said to have been the fate of Antiochus Epiphanes (2 Macc. 9 5 *ff.*), and of Herod Agrippa (Acts 12 23); but it must not be forgotten that such statements about eminent but unpopular characters were frequently made by their political opponents in order to discredit their memory. Cp Diseases, *ad fin.*, and Herod, § 12, *ad fin.*

The reference to the destruction of vineyards (Dt. 28 39), or of gourds (Jon. 4 7), by a 'worm,' probably indicates some beetle—or rather insect-larva—which injures roots or other parts of plants; but it may refer to certain members of the *Myriapoda* (*Centipedes*), which have similar destructive habits and are very numerous in Palestine. With the former we may compare the Gk. ἴψ, ἴξ and Lat. *convolvulus*, a kind of vine-weevil (cp Pliny, *HN* 22 47).

Wood-worms, the larvæ of wood-boring beetles, though unmentioned in MT, are referred to in Bar. 6 19 [20], in Prov. 12 4 𝔊, where a bad woman is likened to ἐν ξύλῳ σκώληξ (כְּרָקָב בְּעַצְמוֹתָיו), also 25 20*a* 𝔊, ὥσπερ σὴς [ἐν] ἱματίῳ καὶ σκώληξ ξύλῳ οὕτως λύπη ἀνδρὸς βλάπτει καρδίαν, and the Vg. of 2 S. 23 8 (ipse est quasi tenerrimus ligni vermiculus, qui octingentos interfecit impetu uno).

Finally we may note the metaphorical use of 'worm' to denote a man of low estate or in a miserable position, Job 25 6 Ps. 22 6[7] Is. 41 14 [not 𝔊], cp *Il.* 13 654: ὥστε σκώληξ ἐπὶ γαίῃ κεῖτο ταθείς.

4. זֹחֲלֵי אֶרֶץ, *zōḥălē āreṣ*, AV 'worms of the earth' (Mi. 7 17), might possibly refer to true earth-worms (Oligochæta); but the literal meaning is 'crawling things (cp 𝔊 σύροντες γῆν) of the earth,' and it is more likely that serpents are intended (so RV, cp Dt. 32 24).

Of the Oligochæta a dozen species from Palestine have been described, all belonging to the genus *Allolobophora*, to which fourteen out of the nineteen British species belong. Five of the dozen—viz., *A. caliginosa*, *A. chlorotica*, *A. fœtida*, *A. veneta*, and *A. rosea*—are also British. They are not found in the arid and sandy regions, but are by no means uncommon in the more fertile districts. Cp Tola, Colours, § 14.

5. רָקָב, *rāḳāb*, Hos. 5 12 AVmg. (κέντρον [BAQ] = קֹטֶב?). The word properly means 'rottenness' (see BDB); in Prov. 12 4 14 30, however, 𝔊 gives σκώληξ, σής, just as in Job it renders סָס by σαπρία (see above). *rāḳāb* also occurs in the Hebrew of Ecclus. 43 20, where Taylor (*JQR* 10 471; *Wisdom of Ben Sira*, lxii *f.*) adopts the rendering 'skin-bottle,' and refers to Geiger's view of Job 13 28 (ἀσκός, 𝔊), which he apparently favours. The text, however, is most probably corrupt; for כרקב we should read בְּרֵכֹת, *bĕrēkōth*, rendering 'and he congeals ponds by his cold.'

A. E. S.–S. A. C., 1-4; T. K. C., 5.

WORMWOOD (לַעֲנָה Dt. 29 18 [17] Prov. 5 4 Jer. 9 15 [14] 23 15 Lam. 3 15 19 Am. 5 7 6 12;[2] and ἄψινθος Rev.

[1] 'Wool is a modified form of hair, distinguished by its slender, soft, and wavy or curly structure, and by the highly imbricated or serrated surface of its filaments' . . . 'At what point indeed it can be said that an animal fibre ceases to be hair and becomes wool it is impossible to determine, because in every characteristic the one class by imperceptible gradations merges into the other, so that a continuous chain can be formed from the finest and softest merino to the rigid bristles of the wild boar.'—*Ency. Brit.*[9], *s.v.* 'wool.'

[1] In the difficult passage Job 19 26, 'worms destroy this body,' no mention of worms is made by the MT; cp RV, and see Job, § 6, col. 2474.

[2] In this last verse AV has 'hemlock.'

8 11 †). The Hebrew word *la'ănāh* is in 𝔊 variously rendered πικρία Dt. 29 18 [17] Lam. 3 19 Am. 6 12, χολή Prov. 5 4 Lam. 3 15, ἀνάγκαι Jer. 9 15 [14], ὀδύνη Jer. 23 15, and ὕψος Am. 5 7.[1] The word ἄψινθος nowhere occurs in 𝔊; but Aq. had ἀψίνθιον for *la'ănāh* in Prov. 5 4 Jer. 23 15 Lam. 3 19 (?), for *rōš* in Jer. 9 15 [14]. Vg. has *amaritudo* in Dt. 29 18, but everywhere else *absinthium* —a rendering which is also supported by Pesh. and Tg.

The origin of the word *la'ănāh* is obscure, and the references to it in OT are so purely symbolical, that we learn nothing but that it was an edible substance of extreme bitterness; it is usually coupled with רֹאשׁ, *rōš*, or מֵי רֹאשׁ, *mē rōš* (see GALL), and once with מְרוֹרִים *mĕrōrīm* (Lam. 3 15, see BITTER HERBS). But a consensus of ancient tradition is in favour of the identification with wormwood, and it may well denote the product of one or more species of *Artemisia* (perhaps *Artemisia judaica*) of which as many as seven are enumerated by Tristram (*FFP* 331) as found in Palestine.

N. M.—W. T. T.-D.

WORSHIP. See TEMPLE, §§ 34 *ff.*; SACRIFICE; also SYNAGOGUE, PRAYER, and SALUTATIONS.

WORSHIPPER (ΝΕΩΚΟΡΟϹ), RV TEMPLE-KEEPER. See NEOCOROS.

WREATH. 1. גְּדִיל, *gādīl*, 1 K. 7 17.† See FRINGES.

2. לֹיָה, *lōyāh*, 1 K. 7 29 30 36, RV 'wreaths of hanging work'; but the meaning is doubtful and even the reading uncertain. See under LAVER, § 1.

WREATHEN WORK. (1) עֲבֹת, *'ăbōth*, Ex. 28 14, etc. See CORD. (2) שְׂבָכָה, *śĕbākāh*, 1 K. 7 17, etc. See NET, 5.

WRESTLING. It is reasonable to assume that the early Hebrews had wrestling-matches. The story of Jacob wrestling with the *ĕlōhim* or divinity (Gen. 32 24-31) seems to presuppose this. If the cycle of Jacob-narratives were as near to the original folk-tales as the cycle of Samson-narratives, we should perhaps have found Jacob indulging like Samson in sportive exhibitions of his strength, for the ancestors of the Hebrews (not Samson alone) were imagined as endowed with Herculean strength (cp Gen. 29 10 31 45 *f.* 32 26). It is, however, no sport—this wrestling of Jacob with the divine being; it is the conquest of the god of an already conquered people which has to be effected. This is the historical meaning of the story. Penuel was possibly the citadel of SUCCOTH (*q.v.*), and within the precinct of the citadel was the sanctuary (see GIDEON, § 2). The Jacob-tribe had 'contended with men' and had 'prevailed'—*i.e.*, had conquered Succoth and Penuel externally (Judg. 8 16 *f.*); but its admission to full religious privileges had, according to the myth, to be obtained by force. Sargon carried away the deities of conquered places; but the Jacob-tribe meant to remain at Succoth and Penuel, and consequently had to convert a hostile divinity into a friend. Cyrus did the like at Babylon by geniality towards the priesthood (CYRUS, § 6); the Jacob-tribe chose to describe its victory in the symbolic language of mythology. The myth grew pale, and the later writers did not understand it. Hosea thought that Jacob's conduct was blameworthy; a later writer modified the story by the statement that Jacob 'wept and made supplication to him,' and it is this later writer whom modern preachers justifiably follow, for he has shown them how to 'turn dross into gold.'[2]

The word rendered 'wrestled' in Gen. 32 (וַיֵּאָבֵק *v.* 25 [24]; הֵאָבְקוֹ, *v.* 26 [25]) has been connected by some with אָבָק, *'ābāḳ*, 'dust, as if='to dust oneself'; others compare MH אֲבַק, *'ăbaḳ*, 'to entangle.' But probably the word is corrupt (see *Crit. Bib.*).

[1] The translator seems in this last case to have read לְמַעְלָה and in the two cases in Jer. to have wrongly connected the word with root ענה.

[2] Hos. 12 2 *f.* [3 *f.*] belongs to Hosea, who blames Jacob; the continuation is in *vv.* 7-9 [8-10]. *Vv.* 4-6 [5-7] are eulogistic of Jacob. The expression 'turn dross into gold' is from Gunkel, whose treatment of the story shows much insight, though he has missed the probable historical origin of the story.

In Gen. 30 8 the right word is used—viz., נִפְתַּל, prop. 'to be twisted together'; see NAPHTALI, § 3. Cp, further, MANASSEH, § 4.

In the NT πάλη 'wrestling' is used as a figure for a spiritual struggle (Eph. 6 12); we might have expected μάχη (Delitzsch, in his Heb. NT, renders מִלְחָמָה); the Christian's struggle not being against flesh and blood can hardly be called a 'wrestling.' But the word came naturally to his lips. The palæstra was not, it seems, forbidden to Christians; the writer of 2 Macc. 4 12 *ff.* (cp CAP) was naturally more sensitive, and denounces the priests of Jerusalem who, in the Hellenising movement under Antiochus Epiphanes, 'hastened to take part in the unlawful provision for the *palæstra.*' The word is happily adopted by RV, following the precedent of 'synagogue'; primarily it means a wrestling school.

Wrestling was a favourite exercise in ancient Egypt (Wilk. *Anc. Eg.* 2 437 5 292). It is said to have been introduced into the Olympic contests in the eighteenth Olympiad, from which date it continued to form one of the five games of the *pentathlon.* T. K. C.

WRITING. In the study of writing it is important to remember that the word has several meanings, which must be carefully distinguished. In its widest sense, it includes both *ideographic* and *phonetic* writing. Ideographic writing consists in the use of symbols to represent visible objects or the ideas which are associated with those objects; by phonetic writing is meant the use of symbols to represent the sounds or combinations of sounds, which constitute some particular language. When each symbol denotes a single sound, the writing is said to be *alphabetic;* when each symbol denotes a syllable, the writing is called *syllabic.* It is probable that writing was at first purely ideographic; but the oldest systems of writing known to us, namely, the hieroglyphic writing of Egypt and the cuneiform writing of Babylonia, consist of ideographic and phonetic symbols combined in various ways. Both in Egypt and in Babylonia the art of writing was practised considerably more than three thousand years before the Christian era. With these systems, however, we are not at present concerned, since there is no reason to believe that they were at any time in use among the ancient Hebrews, who, like their neighbours, the Moabites, the Phœnicians, and the Aramæans, employed a purely alphabetic system, consisting of twenty-two letters, usually known as the *Semitic alphabet.* From the Phœnicians this alphabet was borrowed, with certain important modifications, by the Greeks; from the Greeks it passed on to the other nations of Europe, so that in popular language the term 'writing' is confined to alphabetic writing. When we speak of the writing of Egypt and Babylonia, we are liable to forget that in this case 'writing' means something quite different from that which we ordinarily understand by it.

1. The alphabet.

The origin of the Semitic alphabet is extremely obscure. In the ancient world the invention was commonly ascribed to the Phœnicians,[1] sometimes to the Aramæans[2] or the Egyptians;[3] but these theories seem to have been based upon mere conjecture, as was the case with so many other beliefs current among the ancients respecting the origin of arts, institutions, and the like.[4] In modern times also the theory of the Phœnician origin of the alphabet has been frequently maintained, and many scholars have endeavoured to show that the Phœnicians simply adapted to their own use certain of the

2. Origin.

[1] Plin. *Nat. Hist.* 5 12 [13] (see also 7 57); Lucan, *Pharsal.* 3 220.

[2] Diod. Sic. 5 74, Clem. Alex. *Stromateis*, 1 16.

[3] Plato, *Phædrus*, 58, 274 D; Cicero, *De nat. deor.* 3 22.

[4] That any genuine tradition about the origin of the alphabet should have survived must appear highly improbable when we consider that the inventors of the vowel-points were completely forgotten, although they lived in a much later and a far more civilised age.

phonetic signs employed in Egyptian writing.[1] Others have supposed that the alphabet was developed out of the Babylonian cuneiform character.[2] But, as Winckler has recently observed, the arguments for attributing the invention of the alphabet to the Phœnicians are far from satisfactory.[3] We have, it is true, no right to maintain, with Winckler, that the hypothesis is improbable in itself, for mere generalisations, such as the statement that mercantile peoples are deficient in creative power, prove nothing at all. Nor is much to be said in favour of the rival theory put forward by him, namely, that the alphabet was invented in Babylonia, since the Babylonians, so far as we can ascertain at present, never made use of it for writing their own language. The inscriptions in the Semitic character which appear on some Babylonian and Assyrian weights and contract-tablets prove, indeed, that the alphabet was known in Babylonia; but as these inscriptions are in the Aramaic language it would seem that the Semitic character was introduced into Babylonia by Aramæans. The arguments which Winckler derives from the shapes of the letters are likewise very precarious. From the fact that *'Ayin* is represented by a circle he argues that this letter was not originally included in the alphabet and that the Semitic character must therefore have been invented by a people to whom the sound of *'Ayin* was unknown. But the circular form of *'Ayin* may be explained by the obvious supposition that it is meant to represent an 'eye' (Heb. *'áyin*), precisely as every other letter seems to have been originally a rude portrait of some well-known object, the name of which happened to begin with the sound intended. In some cases both the shape and the name of the letter clearly indicate the object chosen, and this serves to show that the inventors of the alphabet spoke a Semitic language. But whether they were Phœnicians, Aramæans, or members of some other Semitic people it is at present impossible to decide.[4]

We are not to suppose that the inventors of the alphabet endeavoured to distinguish the sounds of their language with scientific precision. It would appear that when two or more consonantal sounds bore a certain resemblance to one another they were sometimes represented by a single letter; thus the ancient Semitic alphabet had only one sign for the two sibilants which were afterwards known as *Sīn* and *Shīn* and distinguished by a diacritical point (שׂ, שׁ). In this case the distinction of sound must have existed from the beginning (as is proved by comparative philology), and became even more marked in later times; we may therefore assume that it existed likewise in the intermediate period, when the alphabet was invented. Since the inventors of the alphabet ignored this distinction, they may have ignored others also, and accordingly the fact that the ancient Semitic character does not discriminate between certain sounds which are expressed by different letters in Arabic (*e.g.*, ح and خ, ع and غ) is no proof that the alphabet originated among a people who in pronunciation assimilated these sounds to one another.

3. Antiquity. Of all known inscriptions in the Semitic character the oldest which can be dated with certainty, namely the inscription of Mesha' king of Moab, belongs to the earlier half of the ninth century B.C. See MESHA. The inscription of Panammū, king of Ya'dī, in the extreme N. of Syria, appears to have been set up about the beginning of the eighth century; it is written in a peculiar Aramaic dialect.[5]

WRITING

Some Phœnician and Aramaic inscriptions are perhaps rather older than these two; but there is no clear evidence to show how long before the ninth century the Semitic alphabet was invented. Nöldeke has observed that the style of the inscription of Mesha' seems to imply the existence of a historical literature among the Moabites of the period, and what we know of the Moabites would lead us to suppose that their civilisation was decidedly less advanced than that of their neighbours to the W. Thus we may conclude with certainty that at the time of Mesha' the Semitic alphabet was not a very recent invention. On the other hand, the fact that in the ninth century B.C. the shapes of the letters were almost identical in regions so far apart as Moab and Ya'dī does not favour the view that the alphabet had been for many centuries in common use, for in that case local types would have tended to diverge more widely, as is shown by the later history of Semitic writing. Moreover, the tablets discovered at Tell-el-Amarna in 1887 prove that about 1400 B.C. the Canaanite princes conducted their official correspondence with the Egyptian court in the Babylonian language and character. It would be very rash to conclude from this that the cuneiform character was then commonly employed by the natives of Canaan, for documents written in a foreign language and in an extremely difficult character can have been intelligible only to a small class of professional scribes, most of them, perhaps, slaves imported from other countries.[1] But it is evident that if the Canaanite princes employed, in their correspondence with Egypt, a language which was neither that of Canaan nor that of Egypt, we may with some plausibility conjecture that the Canaanites at that period had no writing of their own.

The OT does not supply us with the means of discovering how or when the alphabet became known to the Israelites. In Genesis, as has often been remarked, there is no allusion to writing of any kind, whereas Moses is represented, even in the older parts of Exodus (JE), as practising the art (Ex. 24 4). But from this we cannot safely conclude more than that writing had been in use among the Israelites for some time before the period of the narrator, who probably lived in the ninth century B.C. Nor does Judg. 5 14 throw any light on the question; whatever the phrase שֵׁבֶט סֹפֵר may mean, it cannot be explained as 'the pen of the scribe,' since שֵׁבֶט never has this sense either in Hebrew or Aramaic. It is remarkable that the ordinary Hebrew noun for 'writing,' namely סֵפֶר, from which סֹפֵר 'a scribe' is derived, has no etymological connection with any of the verbs which signify 'to write' (כתב, חקק, רשם), and this fact tends to support the theory that סֵפֶר is a foreign word; whether it was borrowed from the Assyrian, as some scholars suppose, is uncertain.

The name of the old Canaanite city קִרְיַת־סֵפֶר (Josh. 15 15 *f.* Judg. 1 11 *f.*) might suggest that the word סֵפֶר, in the sense of 'writing,' was known already to the Canaanites before the Israelite invasion; but since the root ספר[2] has a variety of meanings (in Hebrew 'to count,' 'to relate,' in Aramaic 'to shave the hair'), it is altogether illegitimate to found any argument upon the name in question. Cp KIRJATH-SEPHER.

4. Types. In the days of the later kings of Judah, the art of writing must have been very extensively employed, to judge by the frequent allusions to it in the Prophets, especially Isaiah. The oldest extant specimens of Israelite writing, namely the Siloam inscription[3] and a number of engraved seals and gems,

[1] Even in Babylonia itself, where the language of the Tell-el-Amarna tablets was actually spoken, the knowledge of the cuneiform character was, in all probability, confined to a small proportion of the inhabitants.

[2] It is possible that סֵפֶר in קִרְיַת־סֵפֶר has no connection with the Heb. root ספר, since Phœn. ס may correspond to Heb. ז, *e.g.*, Phœn. סכר = Heb. זכר. The existence of a root זפר may be inferred from the name of the place זפרן (זִפְרֹנָה, 'to Ziphron,' Nu. 34 9).

[3] See Dr. *TBS* pp. xiv-xvii.

seem to belong to this period. Here the shapes of the letters closely resemble those in the inscription of king Mesha'. One of the oldest Phœnician inscriptions, that which is found on the fragments of a bronze bowl dedicated to the Baal of Lebanon (*CIS* i. no. 5, see PHŒNICIA, § 18), exhibits much the same type. But the ordinary Phœnician writing has a decidedly more modern appearance; the down-strokes become elongated, so as to present to the eye a series of parallel lines, and the letters thus acquire an air of uniformity which is lacking in the older style. Another type is offered by the Aramaic inscriptions and papyri of the Persian and Macedonian period. The distinctive feature of these is that certain letters (ב, ד, ע, ר) have open tops, as though their upper portion had been cut off. A further development of this Aramaic writing appears in the Nabatæan and Palmyrene inscriptions, of the first century B.C. and onwards, which are specially remarkable for their frequent ligatures or joining of the letters, a feature common to all the later styles of Aramaic writing in use among Christians. As the Aramaic language gradually superseded Hebrew and the kindred dialects spoken in Palestine, the Aramaic letters became more and more familiar to the Jews. The coins of the Hasmonæan dynasty and those struck during the two Jewish revolts (66-70 and 132-135 A.D.) bear legends in the old Hebrew character; but some Jewish inscriptions of about the time of Christ are in the Aramaic writing, though the language is Hebrew. The particular variety of the Aramaic character which came into use at this period was called by the Jews *kěthāb měrubbā'* (כְּתָב מְרֻבָּע), 'square writing,' or *kěthāb aššūrī* (כְּתָב אַשּׁוּרִי), 'Assyrian writing,' a name probably due to the fact that it was employed by the peoples of NE. Syria. One of the most ancient specimens of the square writing is the inscription over the sepulchre of the *Běnē Ḥēzīr* (בְּנֵי חֵזִיר), a Jewish family, near Jerusalem;[1] the character bears much resemblance to the Nabatæan, but the lines are straighter and the ligatures less frequent. In the fully developed form of the square character the ligatures disappear altogether. There is reason to believe that at the time when the text of the OT was definitely fixed—*i.e.*, about the beginning of the second century after Christ—the square character was generally, if not invariably, employed in MSS of the OT.[2] Since that period it has continued in use among the Jews with very little modification. Strangely enough, the Samaritans alone remained faithful to the old Hebrew writing, though in their attempt to adorn it they gave it a somewhat fantastic appearance.[3]

At a period which it is impossible to determine accurately, but in any case several centuries before the Christian era, the Semitic alphabet was introduced into Arabia and employed for writing various Arabian dialects, as is proved by many inscriptions which have been discovered in that country. Some of these were, until lately, known by the incorrect name Himyaritic. The alphabet in which they are written is evidently derived from that of the northern Semites; but it contains several additional consonants, invented for the purpose of expressing certain Arabic sounds which were not represented in the older Semitic writing. The so-called Himyaritic inscriptions fall into two classes, according to dialect—those in Sabæan and those in Minæan. Both dialects seem to have been spoken in S. Arabia at about the same period, and to have been carried northwards by mercantile colonists. Among these inscriptions there are very few of which the date can be ascertained even approximately. The theory of Glaser, Hommel, Sayce, and others, that the Minæan inscriptions are of enormous antiquity and that the latest of them were set up about 1000 B.C., has been completely overthrown by the discovery of a Minæan inscription which is dated from 'the twenty-second year of king Ptolemy,' so that it cannot be older than the third century B.C.[1] The dialect of the so-called Thamūdæan[2] inscriptions, recently discovered at Al-Ulā, about 150 m. NNW. of Medina, differs greatly both from the Sabæan and the Minæan; but the writing is nearly the same. Whether D. H. Müller be right in considering the Thamūdæan character an earlier form of the Sabæan is uncertain. By the beginning of the seventh century of our era both the Thamūdæan and the Sabæan writing had become obsolete in Arabia, for the alphabet employed by the Arabs at that time—the parent of the Arabic character now in use—was derived from the Nabatæan. In Eastern Africa, however, the Sabæan alphabet left a descendant, namely the very peculiar character known as the Æthiopic.

5. Names of the letters.

The names by which the letters of the alphabet were known among the Jews appear for the first time in the LXX text of Lam. 1-4. Here the MSS, it is true, vary to a considerable extent; but there can be no doubt that the names are substantially identical with those which were used by the Jews in the Middle Ages. It would seem, however, that in very early times certain of these names were pronounced otherwise, since the names of the Greek letters, which were borrowed from the Phœnicians, sometimes diverge notably from the ordinary Jewish forms; thus Γάμμα (for Γαμλα) and Ῥῶ (cp Heb. ראשׁ, 'head') appear to have a more primitive vocalisation than גִּימֶל (𝔊 γιμελ or γιμλ) and רֵישׁ (𝔊 ρηχς or ρης). Accordingly the fact that רֵישׁ is not a Hebrew but an Aramaic form cannot be regarded as proving anything with respect to the ultimate origin of the names. That the names were liable to undergo great change in various times and places is shown, moreover, by the Æthiopic alphabet, in which several of the names are quite different. We must not therefore be surprised to find that among the Jewish names of the letters there are some of which the meaning is altogether obscure, namely, הֵא, זַיִן, חֵית, טֵית, צָדֵי, קוֹף, and תָּו.

6. Order of the alphabet.

The order in which the letters were arranged is shown by the acrostich poems in the OT (Pss. 25 34 37 111 *f.* 119 145 Prov. 31 10-31 Lam. 1). In Lam. 2-4 the order is slightly different, since פ precedes ע.[3] Among the Phœnicians the arrangement of the letters seems to have been the same as among the Jews, for the Greek alphabet in its primitive form corresponded to the Hebrew. By what principle the order was originally fixed it is impossible to discover.

7. Direction of the writing, punctuation, etc.

Ancient inscriptions in the Semitic alphabet, like the oldest inscriptions in Greek, are written from right to left. The sole exceptions to this rule are found among the Sabæan inscriptions, a few of which are written βουστροφηδόν—*i.e.*, in

[1] See Chwolson, *Corpus Inscr. Heb.* no. 6 (St. Petersburg, 1882).

[2] In the recently discovered fragments of Aquila's Greek translation of the OT (ed. F. C. Burkitt, Cambridge, 1897) the Divine name *y-h-w-h* is written in a corrupt form of the *old* Hebrew alphabet, not, as we might have expected, in the square character. But it does not necessarily follow that the Hebrew MSS used by Aquila were written in the old alphabet *throughout*; the Divine Name, which, it must be remembered, was not pronounced by the reader, may still have been written in the ancient style after the rest of the text had been modernised.

[3] Tables showing the forms of the letters used by the N. Semitic nations at different periods are found in Stade's *Lehrbuch der hebräischen Grammatik* (1879) and Nöldeke's *Kurzgefasste syrische Grammatik* (1880, (2)1898), but far fuller information may be obtained from the magnificent table by Euting in Chwolson's *Corpus Inscr. Heb.* See also P. Berger, *Histoire de l'écriture dans l'antiquité* (Paris, 1891).

[1] See the papers by DHM in the Vienna Oriental Journ. (*Die Wiener Zeitschr. für die Kunde des Morgenlandes*) 8 1-19 161-166 (1894).

[2] Named after the *Thamūd* (Gk. οἱ Θαμουδηνοί), an Arabian tribe who inhabited those parts about the fourth century after Christ. The authors of these inscriptions, however, call themselves not *Thamūd*, but *Liḥyān* (לחין); see DHM *Epig. Denk. aus Arabien* (Vienna, 1889).

[3] See LAMENTATIONS.

lines running alternately from right to left and from left to right, a fashion common among the Greeks in the sixth century B.C.[1] In the inscription of King Mesha' a dot is placed after each word and a vertical stroke at the end of each sentence. Similar dots are found in the Siloam inscription and in some others; but whether they were used by ordinary Hebrew writers may be doubted. In any case the OT contains very many textual corruptions which are due simply to wrong divisions of words.[2] Such mistakes were greatly facilitated by the absence of special forms for final letters, like those used in the writing of the later Jews, Syrians, and Arabs. In Hebrew, Phœnician, and Aramaic inscriptions a line frequently ends in the middle of a word; but in the later Jewish style this is not allowed, and in order to fill up a line the scribes are accustomed to 'expand' certain letters, especially א, ה, ל, ת, and ם.

The letters of the Semitic alphabet were originally used as consonants only, the vowels being unexpressed.

8. Orthography. Such a system must, of course, give rise to endless ambiguities, for in the Semitic languages some of the most important grammatical distinctions (*e.g.*, the difference between an active and a passive verb) often depend solely on the vowels. The reason which led the Semites to content themselves with this imperfect method seems to have been that writing was at first employed only for short and well-known formulæ, such as votive inscriptions, funereal inscriptions, and the like, not for literary works properly so-called. At length certain of the consonants (א, ה, ו, and י) came to be used also as vowels; but this modification was introduced very slowly. In Phœnician inscriptions the vowels are never expressed save in a few cases at the end of a word. In the inscription of King Mesha' and the Siloam inscription the vowel-letters are inserted somewhat more freely, but very much less freely than in the present text of the OT.[3] Among the Israelites, before the exile, the general rule seems to have been that no vowels were expressed in writing except the diphthongs *au* and *ai* (which were represented by ו and י respectively), and most of the long vowels at the end of words. The use of vowel letters for *ū*, *ō*, and *ī* in the middle of words—which is frequent in the MT—apparently came into fashion at a very late period, as a careful examination of 𝔊 shows.[4] The orthography of the present Jewish OT is probably the result of a revision (or of several revisions) by the scribes, for in all parts of the OT the use of the vowel-letters (or, as they are often called, *matres lectionis*) is approximately the same, that is to say, the oldest books do not, in this respect, differ materially from the latest. But though we find a general uniformity of spelling throughout the whole of the OT, there are numberless inconsistencies in matters of detail, and it often happens that within the space of a few verses the same word is spelt in two or more different ways. In no case, therefore, have we any guarantee that the vowel-letters in our text go back to the time of the author, and to base historical arguments on the spelling is quite illegitimate.[5] Even

[1] The Æthiopic writing, as is well known, always runs from left to right; the oldest extant specimens of this writing, namely, two inscriptions at Aksūm in Abyssinia, probably belong to the sixth century after Christ.

[2] See Dr. *TBS* xxx-xxxii.

[3] Thus the Siloam inscription has אש (thrice) for אִישׁ, and החצבם (twice) for החצבים.

[4] Dr. *TBS* p. xxxiii *f.* It must be remembered that many words which the later Jews pronounced with *ō* or *ū* originally had the diphthong *au*. Thus when we find עוד and מוצא in the Siloam inscription, we are not to reckon these as cases in which *ō* was expressed by ו.

[5] Thus the well-known fact that the form הוא is sometimes employed in MT instead of the fem. היא proves nothing as to the usage of the ancient Hebrew, since the ו in this case was probably inserted by late scribes (cp Dr. *Deut.* Introd. p. lxxxviii). In Moabite the masc. form is written הא, and in Phœnician inscriptions we find הא for masc. and fem. alike, the pronunciation of course varying according to the gender.

in the Middle Ages, long after the text had been fixed, there was still a considerable amount of divergence between the MSS as to the insertion of the vowel-letters in particular passages.[1] In MSS of the Mishnah and other post-biblical Jewish writings, the vowel-letters are employed much more frequently than in the OT; thus ו and י often stand for the short vowels *ŭ* and *ĭ*, which is very rarely the case in copies of the OT.

Though the insertion of vowel-letters doubtless excluded certain ambiguities, the writing was still very far

9. Vowel-points, etc. from being an adequate representation of the language. Not only many of the vowels but also the doubling of consonants and other important phonetic distinctions remained unexpressed. At length, several centuries after the Christian era, systematic efforts were made by the Jews, the Syrians, and the Arabs to remove this practical inconvenience. It cannot be a mere accident that among all three nations the introduction of the so-called vowel-points took place about the same period; but how and where the idea originated is quite uncertain. As early as the fifth century after Christ Syrian scribes had adopted the practice of distinguishing certain words, which, though spelt alike, were pronounced differently, by means of a dot placed above or below; and it has been conjectured by Ewald and others that this was the origin both of the Syrian and of the Jewish systems of vocalisation. In any case, it would seem that at the beginning of the fifth century the vowel-points were unknown to the Jews, and that by the end of the eighth century they had been in use for some time. The Jewish scholars who introduced these signs into the text of the OT are commonly known as the *Massoretes*—*i.e.*, traditionalists, from the late Heb. word *massōreth* (מַסֹּרֶת), 'tradition.' Respecting their names and dates history is altogether silent. Though their work was of enormous importance, it must be remembered that among the Jews, as among the Syrians and Arabs, the vowel-points have never been regarded as an essential part of the writing; in particular the MSS of the Law and the Prophets, from which lessons were read in the synagogues, appear to have been generally, if not always, written without points, down to the present day. Those MSS of the Hebrew OT which are 'pointed' fall into two principal classes, according to the method of vocalisation employed. The great majority exhibit the so-called Palestinian[2] system, whilst others, of which the best-known example is the St. Petersburg Codex of the Prophets written in 916 A.D. (published in facsimile by Strack in 1876), have the Babylonian (or superlinear) vowel-points. These two systems possess so much in common that they must necessarily be derived from the same original; but the precise relationship between them is still disputed. Both represent a very late stage in the pronunciation of the Hebrew language, or rather they express the language, not as it was actually spoken, but as it was chanted in the synagogues of the period.[3] The most important difference between the Palestinian and the Babylonian systems is, that the Palestinian alone has a special sign for the short vowel *e* (Sĕghōl). The Babylonian system underwent considerable change in course of time, as is shown by the different forms which it assumes in our MSS; but it was ignored altogether by the great Jewish commentators and grammarians of the Middle Ages, and at length sank into oblivion, until it

[1] See, *e.g.*, Co. *Das Buch des Propheten Ezechiel*, 1886, p. 7.

[2] Also called 'Tiberian,' from the fact that the city of Tiberias was one of the principal seats of Jewish learning from the second century onwards.

[3] The pronunciation of Hebrew words given in the NT and other Greek sources is often more primitive than the pronunciation expressed by the vowel-points. It should also be noticed that the consonant text and the vocalisation are frequently at variance with one another, since the former presupposes a more ancient pronunciation than the latter. Thus in the very first word of the Hebrew OT, בְּרֵאשִׁית, the א must originally have been pronounced as a consonant, but is treated by the Massoretes as mute.

became known to European Hebraists in the nineteenth century.

Both the Palestinian and the Babylonian systems of vocalisation are combined with an extremely elaborate system of *accents*, which were intended to indicate not only the place of the accent in individual words, but also the musical intonation adopted in chanting, and hence the greater or less degree of connection between the different parts of sentences.[1] A special method of accentuation is employed in the poetical books of the OT—*i.e.*, Psalms, Proverbs, and Job.[2] It is scarcely necessary to observe that for us the value of the accents consists in the light which they throw, not upon the real meaning of the text, but upon the manner in which the text was understood by the Massoretes. YEAR (שָׁנָה, *šānāh*). Day, month, and year are all indicated by nature itself as means for the measurement of time. These three units are quite independent, however, and stand in no direct or simple relationship to each other, and wherever an artificial reduction of the larger unit to terms of either of the two smaller is attempted in the absence of exact astronomical knowledge, inaccuracies and dislocations become inevitable. These are not so great when the largest of the three units—the year—is measured in terms of the smallest—the day; but they become serious when the middle unit—the month—is taken as the basis for establishing a ratio.

1. In Egypt. The former course (making the day the unit) was taken by the Egyptians; they had observed that after about 365 days the sun returns to the same position in the celestial sphere, and accordingly fixed their year as being 365 days. They altogether left out of account any reference to the course of the moon, although some reminiscence of it may be preserved in their division of the year into twelve equal parts of thirty days each, to which were added the five remaining days as supernumerary (the so-called *epagomenai*). Even thus, however, it was an artificial product that had been manufactured from the natural year which contains 5 hours 48 minutes and 48 seconds more than 365 complete days; and the Egyptian year, which on every fourth anniversary began a day too soon, was still a vague year, although it was only after the lapse of 1461 Egyptian years—a so-called Sothis period (see CHRONOLOGY, § 19)—that the difference amounted to a year too many.

2. In Islam. The second course (making the month the unit) was chosen by Mohammed, whose intention in prohibiting the occasional insertion of an intercalary month was to frame a rational calendar, but who thereby only succeeded in creating another artificial product completely differing from the natural year, namely the so-called purely lunar year which with its twelve lunar months (354 to 355 days) annually begins the new year some ten or eleven days too soon.

3. In Israel. The calendar of Israel and the Jews avoided both the extremes just indicated, which are the necessary consequences of a too exclusive regard either to the day or to the month in determining the length of the year. With the Israelites the method to be followed was decided by practice, unhampered by any dominating theory about the natural year. This of course did not exclude modifications as time advanced, and ultimately the modifications led in the case of the Jewish calendar to a product much more complicated than is exhibited either in the Egyptian or in the Mohammedan; it has, however, this advantage over both, that the Hebrews, at least in their reckoning of the years, though not always in their delimitation of them, remained in agreement with the number of the natural years.

4. A solar year. With the ancient Israelites, as probably at the outset with all peoples, the year was a solar one, that is to say, a natural year which was sufficiently defined for practical purposes by the regular recurrence of the seasons. To this also the Hebrew word for year seems to have reference; for in שָׁנָה, *šānāh*, at least, as in ἐνιαυτός [ἔνος, ἕνος], *annus* [annulus], *jahr*, *year* (cp Gk. γυροῦν), it seems permissible to conjecture some sort of reference to a return to a starting-point, a repetition of the same circular course. The solar character of the Hebrew year, however, is demonstrated beyond all doubt by the ancient determinations of time according to the seasons of the year and the agricultural operations dependent on these. Thus, for example, the annually recurring harvest festival or feast of weeks, dated by the harvest (Ex. 23 16*a* 34 22 Dt. 16 9), the feast of tabernacles, dated by the ingathering (Dt. 16 13). It is proved also by indications which clearly show that stated religious or political actions—dependent in fact on the period of the year—always occurred at the same time of the year. Thus for example the autumn festival falls at the end of the year (Ex. 23 16*b* 34 22); the going forth of the king to battle at the return of the year (2 S. 11 1 1 K. 20 22 26 1 Ch. 20 1 2 Ch. 36 10). Lastly it is shown by the ancient names of months which are unmistakably connected with the regular recurrence of phenomena of the seasons (see MONTH, § 2).

5. Its length. The length of the year was hardly so accurately determined as to render impossible all uncertainty in its measurement. Probably its limits to some extent depended on weather-conditions and the labours necessitated by these. At least, we have no indication from the earlier times which would point to any exact definition of the year by any precise number of days. Not till post-exilic time does P seem to betray acquaintance with the fact that the year consists of 365 days, when he so states the number of the years of Enoch's life (Gen. 5 23; see ENOCH, § 6) or when he represents the Flood, which began on the seventeenth day of the second month, as coming to an end on the twenty-seventh day of the second month of the following year (Gen. 7 11 8 14). This last procedure is certainly to be taken as showing

[1] As to the points in which the Babylonian accentuation differs from the Palestinian, see Wickes' *Treatise on the Accentuation of the Twenty-one so-called Prose Books of the OT*, Oxford, 1887, pp. 142-150. It should be mentioned that Dr. Wickes regards the term 'Babylonian' as a misnomer.

[2] See Wickes, *A Treatise on the Accentuation of the Three so-called Poetical Books*, Oxford, 1881.

that, assuming as he did for primitive times an accurate dating according to lunar months of which twelve made an ordinary year of 355 days, he wished by adding on ten days more to bring the year, thus reckoned, up to the full length of a natural year of 365 days. Whether also the feast of the New Year (for which we have evidence from the exilic period; Ezek. 40 1, cp Lev. 25 9), which was observed, not on the first but on the tenth day of the seventh month, is based on a similar reckoning, can hardly be made out. At all events, whatever may have been the freedom allowed in the measurement of any particular year, there are certain facts which show that the real length of the actual year was by no means altogether obscure even in the pre-exilic period.

According to the reckoning in use then (in the pre-exilic period) the change of the year took place in

6. Beginning.

autumn, when all the fruits of the earth had been gathered in and the former rain (מוֹרֶה, *mōreh*) was preparing the fields for fresh tillage and a renewal of the yearly cycle. The autumn festival, or feast of the ingathering (חַג הָאָסִיף, *ḥag hā'āsīph*), with which the yearly round of feasts was closed, was observed 'at the outgoing of the year' (בְּצֵאת הַשָּׁנָה, *bĕṣēth haššānāh*—Ex. 23 16) or 'at the year's revolution' (תְּקוּפַת הַשָּׁנָה, *tĕḳūphath haššānāh*—Ex. 34 22). These definitions of the oldest legislation are so clear and distinct as to make further proof unnecessary.

If any further proof were requisite, it might be urged that the passover could not have been observed in accordance with the precept of the newly-found law unless the new year was in autumn in the eighteenth year of Josiah (2 K. 23 23; cp 22 3), and that on no other assumption can the fourth year of Jehoiakim be made to synchronise with the first year of Nebuchadrezzar (Jer. 25 1) and with the year of the battle of Carchemish (Jer. 46 2). Such inferential arguments are needless. Besides, the text of these passages (cp 𝔊) is not in a satisfactory condition.

It is wholly unwarranted, however, to regard the autumn as marking the change of the economic year, and to set over against this, as the ordinary calendar year, a civil year that had its commencement in spring. There is absolutely no evidence for any such system of double accounts before the exile.

The expression 'at the return of the year' (לִתְשׁוּבַת הַשָּׁנָה; 2 S. 11 1 1 K. 20 22 26), which is used more than once with reference to campaigns beginning in spring, does not speak of a beginning of the year, but is couched in such general terms as to contain a definite date only when one knows that the spring is the time for campaigns to begin, and in itself means nothing more than 'in the following year.'

There is all the less reason for this postulating of a beginning of the year in spring—in the interests of the late P (Ex. 12 2), and in contradiction to the terms of the oldest legislation (Ex. 23 16 34 22)—inasmuch as the period of the exile itself bears witness to the observance of the New Year festival in autumn, and in the end the old custom once more triumphed over the later innovation which for a time had held the year to begin in spring. See NEW YEAR, § 1.

The question as to the relation of the months to the year is more difficult. For the earlier ages it is im-

7. Relation of year to months.

possible to say anything with certainty. Probably the months and the years simply ran a parallel course, without any attempt being made to fix a point of coincidence at which the year and the monthly cycle might take a common beginning. The fact that in the exile the New Year festival was held on the tenth day of a month without any sense of strangeness (Ezek. 40 1, cp Lev. 25 9) seems to point to this. When necessity arose, doubtless no difficulty was felt in making a thirteenth month follow upon the ordinary twelve within the same year; but there was not as yet any definite rule, and the text of 1 K. 4 7-20, which speaks of the division of Solomon's kingdom into twelve districts, each of which was called upon to maintain the expenses of the royal household for a month, has unfortunately reached us in such an imperfect state of preservation that we are unable to see in it clear evidence of a year of twelve months; it is possible even that Judah may have been thought of as the thirteenth district, with this as its special privilege that it became liable to the tax only in intercalary months. In substance, then, what we are able to say is this: In the pre-exilic period it was natural years that regulated the chronology, the change of the year fell in autumn, and the months, which followed the moon, were allowed to take their own way, without concerning themselves much about the year.

As in so many other things, the exile brought profound changes into the Jewish Calendar. Away

8. Exilic changes.

from their native soil, with which their worship had stood in such intimate connection—a connection which Deuteronomy indeed had already been recently seeking to sever—they were now all the readier to take over the Babylonian calendar, which they had learned to recognise as the more scientifically regulated one. This change announces itself in a new terminology for the months and in a transference of the beginning of the year. Down to the exile the months had been designated by their ancient names (so even in Deuteronomy); in the exile comes in the custom of distinguishing the months from each other by numbers, and also of placing the first month in spring (cp, to begin with, the exilic redactors of Jeremiah and Kings, Ezekiel, Haggai, and Zechariah, then P and the final redactor of the Hexateuch [*e.g.*, Dt. 1 3], and also Chronicles). In course of time even the foreign Babylonian names for the months began to come in; but except in Ezra 6 15 (in an Aramaic passage) and in Neh. (1 1 2 1 6 15) their ordinal numbers are also at the same time given (so in Esther and in Macc.).[1] The transference of the beginning of the year to the spring is already witnessed to by the numbering of the months beginning, as in the Babylonian Calendar, with the spring month; but we have, besides, express evidence in the ordinance of P in Ex. 12 2 'This [the current, Passover] month shall be unto you the beginning of months: it shall be the first month of the year to you.' The evidence here supplied does not lose in weight even if the verse should prove to be due to a later editor. For in any case the change of the era is carried back to a divine command, given of old to Moses and Aaron while still in the land of Egypt. But this of itself proves that the Israelites had once made use of another era (that beginning in autumn), and that its place was taken by the spring era only at a later date.

In P's account of the deluge a further proof of this author's knowledge of the earlier employment of an autumn era is obtained, only if we hold ourselves shut up to the conclusion that he considered the flood to have begun in autumn. But in that case P has not only carried back the later designations of the months to that patriarchal period, but has also adapted these in academic fashion to the autumn era by designating, in accordance with this latter era, as the second month, that which by the spring era was the eighth (cp Gen. 7 11 8 4 *f.* 13 *f.*).

At what date this change came in cannot be gathered from the passage before us; but the whole manner of P, which is to carry back all the ordinances of the post-exilic community to Moses, renders it probable that in this ordinance also we see the sanctioning of an innovation that had been introduced at the time of the exile, and the date of which admits of being definitely fixed by means of the new designations the months then received.

The memory of the older custom of beginning the year in autumn was still vivid during the exile and took concrete shape in an ecclesiastical New Year's festival (Ezek. 40 1 Lev. 25 9 Nu. 29 1; cp Lev. 23 24). In this way from henceforward there was observed, alongside of the official civil New Year in spring, an ecclesiastical New Year in autumn, which was held by the ancient pre-exilic custom. The beginning of the civil year fell thus on the first day of the first month (or Nisan, corresponding to what had formerly been known as Abib).

[1] In Zech. 1 7 7 1 the names of the months are a later insertion.

The ecclesiastical New Year on the other hand did not remain unaltered. At first it was, as already stated, observed according to Ezek. 40 1 (cp Lev. 25 9) on the tenth of the seventh month (Tishri); but afterwards it was transferred to the 1st of Tishri (Lev. 23 24 Nu. 29 1 [P]).

The day, in the passages last cited, indeed is called no longer רֹאשׁ הַשָּׁנָה, *rōš haššānāh*, as is the day of the new year in Ezek. 40 1, but יוֹם תְּרוּעָה, *yōm tĕrū'āh*, 'day of blowing of trumpets' (Nu. 29 1; cp זִכְרוֹן תְּרוּעָה, *zikrōn tĕrū'āh*, 'a memorial of blowing of trumpets,' Lev. 23 24); but Lev. 25 8 *ff.* leaves no room for doubt that the 'trumpet-blowing' must be taken as the characteristic feature of the New Year's day, and that the exilic New Year festival had to give up its place to the day of atonement (יוֹם כִּפֻּרִים, *yōm kippūrīm*, Lev. 23 27 *f.*; cp NEW YEAR) now transferred to 10th of Tishri.

How the insertion of a thirteenth month which from time to time was necessary was arranged, we have no means of knowing, the OT being silent on the subject. The fact, however, that such insertion was actually made in order to keep the beginning of the year in approximate coincidence with the vernal equinox, does not admit of doubt; it was the practice of the Babylonians from whom the entire new calendar was borrowed.

The arrangement thus made was not disturbed till long afterwards, and even then probably only on account of the Seleucidan calendar which made the beginning of the year in autumn. At the same time it remains a question whether any such alteration in the manner of reckoning time can be proved from 1 Macc., for there are two opposing views as to the interpretation of the dates there given. Wellhausen (*IJG* 208) maintains that in 1 Macc. also the Seleucidan autumnal era is followed. On the other side range themselves, amongst others, Cornill (*Die siebzig Jahrwochen Daniels*, 20 *f.*, 1889) and Schürer with convincing reasons for concluding that 1 Macc. in its dates follows the Babylonian vernal era taken over by the Jews during the exile.

9. Seleucidan calendar.

They urge: (1) the dates would not fit the events to which they are assigned, if the Seleucidan era be assumed. To take a simple example, the events related in 1 Macc. 10 1-21 imperatively demand a longer space than the fourteen days which are all that can be given them on the view adopted by Wellhausen. (2) The designation of the months by ordinal numbers, of which the first is given to the month that occurs in spring, would be very strange if the year were held to begin in autumn, for in that case the seventh to the twelfth month of a given year would fall in point of time before the first to the sixth of the same year (cp 1 Macc. 4 52 where the ninth month is Chislev, 10 21 where the seventh is the month of the feast of tabernacles [Tishri], and 16 14 where the eleventh month is Shebat).[1] (3) Similar modifications of the Seleucidan era in accordance with the requirements of local calendars can be shown to have occurred elsewhere. In fact for the city of Damascus the use of exactly the same era can be proved (Schürer).

We may conclude that in the first century B.C. (as is to be inferred for the second at any rate from Est. 3 7) the official era began the year in the spring (on the 1st of Nisan); for it, accordingly, the spring of 312 B.C. marked the beginning of the first year of the Seleucidan era. Nor is it necessary to assume any other mode of reckoning in 1 Macc., as a mere discrepancy about a single date is not reason enough for postulating a special era for the book.

When we come to the first century of our own era, however, the case is different. For Josephus confines the year that has its beginning in spring to religious affairs only; for buying and selling and all manner of secular business, on the other hand, the beginning of the year is in autumn (*Ant.* i. 3 3).[2] In full agreement with this are the regulations of the Mishnah which (*Rōsh hashshānā*, 1 1) distinguishes four commencements of the year, of which the 1st of Elul, the new year for the tithing of cattle, and the 1st of Shebat, the new year for the fruit of fruit-trees, may be left out of account, as being merely the terms with reference to which accurate reckoning of sacred dues was fixed. What is important to notice here is that the 1st of Nisan is there given as the new year for kings and for the sacred feasts (that is, as in Josephus, for religious affairs), whilst the 1st of Tishri is the new year for the years, for the Sabbatical years, for the years of Jubilee, for tree-plantings and vegetables (and so for the enumeration of the years). Hence the rabbinical formula explains itself: "Nisan is the first of the months of the year, but Tishri is the beginning of the year."[1] From that day to the present the 1st of Tishri has continued to be New Year's Day, and thus it is correct to say that the reckoning of the year according to the vernal era, which was adopted by the Jews in the exile from the Babylonians and afterwards received the sanction of P, was only an episode—a large one it is true, from the sixth to the last century B.C.—in the history of the Hebrew and Jewish Calendar.

Throughout all these changes the year had remained solar. Owing to the very absence of any definite inflexible rule,[2]—which, had it existed in the early times, must necessarily have been incomplete and inaccurate—for the insertion of the intercalary months, the year was saved from becoming a vague year. This great advantage was purchased, it is true, at some cost; it made the year of variable length, according as a month had been inserted or not, and according to the number of months of twenty-nine days and thirty days respectively contained in it;[3] and the 1st of Nisan, like New Year's Day, the 1st of Tishri, did not always occur at precisely the same point of time but varied within a limited period, just as the yearly Christian festivals now (Easter, Ascension, Whitsunday) are not fixed but movable feasts.

The same peculiarities are still displayed by the Jewish year even after the adoption of a special rule for intercalation. Even at as late a date as the beginning of the Christian era it was the part of the Sanhedrin in each individual case to decide on the ground of direct observation whether the insertion of a thirteenth month was required or not, just as also the visibility of the crescent moon decided whether or not the month had ended on the twenty-ninth day. The intercalary month was introduced after Adar and before Nisan, and the decision as to the insertion (עִבּוּר) of a month and the conversion of the year into an intercalary year (שָׁנָה מְעֻבֶּרֶת),[4] was effected in the course of the year itself, often not till the month Adar, and even then sometimes not till after the feast of Purim,—in other words hardly fourteen days before the beginning of the intercalary month, which also bore the name of Adar (אֲדָר הַשֵּׁנִי, וַאֲדָר, or אֲדָר בַּתְרָאָה).

---

1 If in the present text of Neh. 1 1 2 1, Chislev precedes Nisan of the same year (the year that is described as the twentieth) the case is somewhat different from that referred to in the text, their respective designations as 'the ninth' and 'the first' month being avoided. But too much stress ought not to be laid upon these passages, inasmuch as in Neh. 1 1 the name of the king is not given where certainly it might have been expected, and thus the accuracy of the tradition as a whole becomes open to question.

2 The passage runs: 'But Moses appointed Nisan which is Xanthicus as the first month for their festivals, leading forth the Hebrews from Egypt in this month; he also made the year to begin from it as regards all the solemnities of divine worship, though as to buying and selling and all other affairs he preserved the ancient order' (Μωυσῆς δὲ τὸν Νισᾶν, ὅς ἐστι Ξανθικός, μῆνα πρῶτον ἐπὶ ταῖς ἑορταῖς ὥρισε κατὰ τοῦτον ἐξ Αἰγύπτου τοὺς Ἑβραίους προαγαγών. Οὗτος δ' αὐτῷ καὶ πρὸς ἁπάσας τὰς εἰς τὸ θεῖον τιμὰς ἦρχεν, ἐπὶ μέντοι γε πράσεις καὶ ὠνὰς καὶ τὴν ἄλλην διοίκησιν τὸν πρῶτον κόσμον διεφύλαξε).

1 ניסן הוא ראשון לחרשי השנה ותשרי הוא ראשית השנה.

2 No such rule can be found, as Klostermann has supposed, in the institution of the year of jubilee. As any evidence that the precepts regarding it were ever observed is wholly wanting, the best theory—supposing, what is not very probable, that *yōbēl* means intercalation—is that the idea was, by means of an artificial expedient, introduced as an afterthought, to bring into conformity with the solar year the old year which was erroneously assumed to have been lunar. What P has to tell about the year of jubilee is learned theory merely, that was never realised in practice.

3 The rule, naturally, was that each year ought to have six months of twenty-nine days and six months of thirty days (cp Bk. of Enoch 78 15 *f.*); it is, however, assumed to be possible, in the Mishnah (*'Arākhin* 2 2) that a year may have as few as four months, or on the other hand as many as eight months, of thirty days each. The length of the year thus varied from 352 to 356 days, an intercalary year from 382 to 386 days.

4 An ordinary year was called שָׁנָה פְּשׁוּטָה.

Jewish tradition hands down a number of criteria whereby to decide whether a month requires to be inserted or not; but in all cases the decisive consideration is this, that the passover, which has to be celebrated at full moon in Nisan (14th Nisan), must not come before the vernal equinox, but must be celebrated when the sun is in Aries (ἐν κριῷ τοῦ ἡλίου καθεστῶτος; Jos. *Ant.* iii. 10 5). Of course the Jews of that period had arrived by practice, if they had not already learned it from the Greeks who had long been acquainted with the eight-years' cycle (the ὀκταετηρίς), at the generalisation that, broadly speaking, an intercalary month became necessary thrice every eight years. But ultimately, when regulating their calendar in the fourth century, they adopted from the Greeks the nineteen-years' cycle (ἐννεακαιδεκαετηρίς), dating from the Athenian astronomer Meton in the fifth century B.C., in accordance with which seven out of every nineteen years (the 3rd, 6th, 8th, 11th, 14th, 17th, and 19th) require an intercalary month. When this rule is followed, the difference in nineteen years amounts only to a little over two hours. The Jews of the present day still adhere to this Metonic calendar.

Alongside of the division of the year into months, immemorial usage sanctioned a division by the seasons also, and events were dated in accordance with the characteristic occupations of the successive periods of the year (thus, barley harvest in 2 S. 21 9 Ruth 1 22 Judith 8 2; wheat harvest Gen. 30 14 Judg. 15 1 Ruth 2 23; the ingathering of green crops, Am. 7 1 [see Wellh. *ad loc.*]; the ripening of the earliest clusters of grapes, Nu. 13 20).

Usually only two seasons of the year were formally distinguished—'summer and winter' [autumn] (קַיִץ וָחֹרֶף, Gen. 8 22 Ps. 74 17 Zech. 14 8, cp Is. 18 6) or 'winter and harvest time' (חֹרֶף וְקָצִיר, Am. 3 15 Prov. 20 4), or 'cold and heat' (קֹר וָחֹם, Gen. 8 22), or 'sowing and reaping' (זֶרַע וְקָצִיר, Gen. 8 22), or 'ploughing and reaping' (חָרִישׁ וְקָצִיר, Gen. 45 6 Ex. 34 21). Winter also (סְתָו, Cant. 2 11) is specially mentioned.

Z

ZAANAIM, THE PLAIN OF, AV, with **Zaanannim** in mg. and RV text—mg. BEZAANANNIM [*q.v.*]—(אֵלוֹן בצענים [Kt.], א׳ בְּצַעֲנַנִּים [Ḳr.], translated πλεονεκτούντων [B], ἀναπαυομένων [AL], ܐܝܟ ܒܟܠܡ [Pesh.], *Sennim* [Vg.]).

The nomadic journeys of Heber the Kenite extended to 'the plain of Zaanaim,' or—the only correct rendering so far as אלון is concerned—'the oak (or, sacred tree?) of Bezaanannim,' Judg. 4 11 (cp MOREH, THE PLAIN OF). It is against AV's interpretation that according to rule אלון ('oak') would require the article; on the other hand, such a name as BEZAANANNIM (*q.v.*) is against all analogy. See *Crit. Bib.* T. K. C.

ZAANAN (צַאֲנָן), Mi. 1 11 †; see ZENAN.

ZAANANNIM, THE OAK IN ([מֵ]אֵלוֹן בְּצַעֲנַנִּים; μωλα καὶ βεσεμιειν [B], μηλων κ. βεσενανιμ [A], but ωλαμ σεενανειμ [L], Pesh. *vemen ṣan'am* [Pesh.]; *Saananim* [Vg.]), RV Josh. 19 33 (also in Judg. 4 11); AV (Josh. *l.c.*), arbitrarily, '[from] Allon to Zaanannim,' RVmg. (*ll.cc.*) 'the oak (or terebinth) of Bezaanannim'; mentioned in the definition of the W. boundary of Naphtali, Josh. 19 33 (cp ADAMI-NEKEB). See BEZAANANNIM.

ZAAVAN (זַעֲוָן, in Sam. זועז; ΖΟΥΚΑΜ [BADEL]), b. Ezer, b. Seir the Horite, Gen. 36 27; 1 Ch. 1 42 (AV ZAVAN; ΑΖΟΥΚΑΝ [A], ΖΑΥΑΝ [L]).

ZABAD (זָבָד, abbrev. for זְבַדְיָהוּ; see NAMES, § 50, ZEBADIAH; ΖΑΒΑΔ [ℵAL]). 1. A Judahite, descended from the Egyptian or Miṣrite JARHA (*q.v.*), 1 Ch. 2 36 *f.* (ζαβεδ [BA]). Under the designation 'Zabad ben Ahlai' he appears in 1 Ch. 11 41 as the first of the sixteen additional names in the Chronicler's list of David's heroes, as compared with 2 S. 23 8-39 (ζαβετ [Bℵ], ζαβατ [A]). See AHLAI, and note that אהלי, like ירח, occurs as a corruption of ירחמאל (Che.). Perhaps ברד in *v.* 20 should be זבד. A southern clan-name is expected (see SHUTHELAH).

2. Mentioned among the b'nē EPHRAIM (§ 12) 1 Ch. 7 21 (ζαβεδ [BA], om. L?).

3. One of the assassins who slew Joash (2 Ch. 24 26; ζαβελ [B], ζαβεθ [A], ζαβαθ [L]); see JOZACHAR and JEHOZABAD.

4-6. In list of those with foreign wives (see EZRA i. § 5 end), viz.—4. One of the b'nē ZATTU (*q.v.*), Ezra 10 27 (ζαβαδαβ [B]) = 1 Esd. 9 28 SABATUS, RV SABATHUS (σαβαθος [BA]). 5. One of the b'nē HASHUM, Ezra 10 33 (ζαβελ [Bℵ], ζαβδαι [L]) = 1 Esd. 9 33 BANNAIA, RV SABANNEUS (σαβανναιους [B], βαν. [A], ζαβδια [L]). 6. One of the b'nē NEBO (*q.v.*) Ezra 10 43 (σεδεμ [Bℵ] om. A) = 1 Esd. 9 35, **Zabadaias**, RV **Zabadeas** (ζαβαδαιας [BA]).

ZABADEANS, RV **Zabadæans,** an Arabian tribe, living near Damascus, which was attacked and spoiled by Jonathan (1 Macc. 12 31; ΖΑΒΑΔΑΙΟΥϹ [VA], -ΕΟΥϹ [ℵ]; *zĕbīdāyē* [Pesh.]). Josephus (*Ant.* xiii. 5 10), by a very natural confusion, calls them Nabatæans. In the *Mĕgillath Ta'ănīth*, § 33, it is said that 'on the seventeenth day of Adār the heathen rose up against the remnant of the scribes, in the city of Chalchis and בית זבראי (in J. *Ta'ănīth*, 2 13, זבדין); but there was deliverance to the house of Israel.'[1] This is referred to the incident in 1 Macc. by Derenbourg (*Hist. Pal.* 99 *f.*) and Wellhausen (*Phar. u. Sad.* 58); but not by Schürer (*GJV* 1 187). Chalchis (כלקים, etc.) is the modern '*Anjara*; about 7 m. due E. of it is ez-Zebedāni, a town and district 6¾ hrs. NW. of Damascus on the way to Ba'albek, and on the W. slope of the Anti-libanus (cp ABANA). It is therefore extremely probable that in the modern ez-Zebedāni we have a trace of the former existence of an Arabian tribe of Zabadeans in that district. The name occurs not unfrequently in this region, for there is a Kefr Zebād a short distance NW. of ez-Zebedāni, and forms of the same name are often met with on inscriptions from Tadmor and its environs.[2] S. A. C.

ZABBAI (זַבַּי, either miswritten for ZACCAI, or from Zabdai or ZEBADIAH; see § 52, and cp perhaps זבי in Palm. [de Vogüé, *Syr. Centr.* 28]; ΖΑΒΟΥ [BℵA]).

1. One of the b'nē BEBAI [*q.v.*], Ezra 10 28 (ζαβουθ [L]) = 1 Esd. 9 29 JOSABAD, RV JOZABDUS (ζαβδος [B], ωζαβαδος [A], ζαβουθ [L]).

2. Father of Baruch, who helped to repair the city wall (Neh. 3 20, ζαβρου [ℵ], ραββαι [L]). The reading of the Ḳr. is ZACCAI (זכי), which is supported by Pesh. and Vg. (ZACHAI).

ZABBUD (זבוד, Kt.), Ezra 8 14, EV. See ZABUD, 2.

ZABDEUS (ΖΑΒΔΑΙΟϹ [BA]), 1 Esd. 9 21 = Ezra 10 20, ZEBADIAH, 9.

ZABDI (זַבְדִּי, either a gentilic, of which there are two expanded forms ZABDIEL and ZEBADIAH, or, if these names have a religious reference, a shortened form, produced by omitting אל or יה; note that Zabdi, 1, is

[1] See Dalman, *Aram. Dialektproben*, 334 (Leipsic, 1896).

[2] On a Greek inscription (Waddington, 2597) mention is made of οἱ ἐκ γενοῦς ζαβδιβωλεων, a family whose name was a compound of Zabdi and the Palmyrene deity Bōl.

a Zarhite (Che.). Cp the Syr. *Zabdai* in NT for Zebedee; ζαβδ[ε]ι [BAL]).

1. b. Zerah of Judah, an ancestor of ACHAN (Josh. 7 1 17 *f.*, ζαμβρ[ε]ι[1] [BF], ζαβρι [A]); in 1 Ch. 2 6 his name appears as ZIMRI (*q.v.*).

2. Of BENJAMIN (§ 9), assigned to the b'nē SHIMEI (*q.v.*); 1 Ch. 8 19 (ζεβδι [L]).

3. The SHIPHMITE (1 Ch. 27 27; הַשִּׁפְמִי, ζαχρει ὁ τοῦ σεφνει [B], ζαβδι . . . σεφνι [A], ζαβδι . . . σαφαμι [L]), who was over the vineyard produce in David's time, perhaps a native of SHEPHAM (*q.v.*).

4. b. Asaph, an ancestor of MATTANIAH (Neh. 11 17, om. BN*A, ζεχρ[ε]ι [N c.a mg. sup. L]) see ZICHRI (no. 11).

ZABDIEL (זַבְדִּיאֵל, either an expansion of the gentilic ZABDI [*q.v.*], or a religious name = 'gift of God,' §§ 21, 27; the attribution of Jashobeam [see 1] to the b'nē Perez—*i.e.*, probably [see PEREZ] to the Zarephathites—and the designation of Zabdiel, 2, as 'son of the [southern] Gileadites' [see below], and of Zabdiel, 3, as an Arabian, together with many plausible parallels, favour the former view [Che.]; ζαβδ[ε]ιηλ [BAL]).

1. Father of JASHOBEAM (1 Ch. 27 2).

2. 'Overseer' of the priests, temp. Nehemiah (Neh. 11 14). He is designated (at first sight very strangely) בֶּן־הַגְּדוֹלִים (RV 'the son of HAGGEDOLIM,' RVmg. 'one of the great men'; AV 'the son of [one of] the great men'; βαδιηλ [B], βαζιηλ [N*], ζεχριηλ υἱὸς τῶν μεγάλων [N c.a mg. L], ζοχριηλ [A]).

It can, however, be shown (cp SHAPHAT, 3) that there was a Gilead in the Negeb, and the case of גדליה ('Gedaliah'), from גלדיה—*i.e.*, גלדי, 'the Gileadite'—justifies us in reading בן־הגלעדים, 'son of the Gileadites' (for parallels in Neh. 3 8, see PERFUMER). See *Crit. Bib.* (Che.).

3. 'The Arabian,' who took off the head of Alexander Balas and sent it to Ptolemy (1 Macc. 11 17: ζαβδιηλ ὁ αραψ [ANV], זיבאיל [Pesh.];[2] Jos. *Ant.* xiii. 4 8; ζαβειλος). Possibly the Diocles of Diod. (Fr. xxxii. 10 1), see IMALCUE.

ZABUD (זָבוּד, a name belonging to the same group as Zabdi, Zabdiel, Zebadiah, and in its origin therefore most probably a clan-name [Che.], but probably understood in later times as meaning 'given [by God]'; cp § 56; the fem. form is ZEBUDAH. The correct reading, however, both of 1 and of 2 may be ZACCUR).[3]

1. b. Nathan, priest (AV 'principal officer'; cp 2 S. 8 18, AV 'chief rulers') and 'friend' (*i.e.*, 'chief courtier'), of king Solomon, 1 K. 4 5† (ζαβουθ [B], ζαββ. [A], ζαχουρ [L]—*i.e.*, זַכּוּר which is the reading of some MSS; cp ܙܟܘܪ). 𝔊, however (except A, which adds ἱερεύς), omits 'priest.' Probably 'friend' (רֵעֶה; on the pointing see HUSHAI, n. 1) is a gloss on כֹּהֵן, or, as we should rather read, סֹכֵן (see MINISTER [CHIEF]); cp the paraphrastic substitute for כהנים (rather סכנים) as applied to sons of David, in 1 Ch. 18 17. The whole passage (1 K. 4 5*b* 6*a*) is thus read by Klostermann, 'And Zabud, son of Nathan, the king's friend [רעה; or "adjutant" = סֹכֵן?], his (*i.e.*, Azariah's) brother, was chief of the palace'; see AHISHAR, but cp *Crit. Bib.* for another explanation of אחישחר (אשחור). T. K. C.

2. A Jew belonging to the b'nē Bigvai, who came with Ezra from Babylon, Ezra 8 14 (EV ZABBUD, following the consonants of the Kt. זָבוּד [Bä. Ginsb.] and the vowels of the Kr. זכור; ζαβουδ [A]; om. B; ζακχουρ [L]; cp L in no. 1) = 1 Esd. 8 40†, where for 'and Zabud' we read 'the [son] of ISTALCURUS' [EV] (ισтακαλκου [B], ὁ τοῦ ισταλκουρου [A], but καὶ ζακχουρ [L]), a monstrous name made up of 'Iztal' (a misreading of וזכר, 'and Zabud') and 'ZACCUR' (זכור), the reading of the Kr. and EVmg. in Ezra.

[1] The β is to be explained in the same way as in JAMBRI, μεσημβρία, etc., the confusion of ב and מ is phonetic, of ר and ד graphic (cp *SBOT*, 'Chron.' *ad loc.*, and see Dr. *TBS* p. lxviii).

[2] Cp perhaps with this the Palm. name זיבל (Mordt. *Beitr. z. Kund. Palm.* no. 69).

[3] Zabud, 1, is the 'καχουρ son of Nathan ὁ σύμβουλος' mentioned in 1 K. 2 46 *h* (B) where 82, 93, 108 etc. read ζακχουρ, 52, 55, etc., ζάχουρ. Note that in 4 5 *f.* ζαχουρ is read by 82, 108, and ζακχουρ by 93. See COUNSELLOR.

ZABULON (ζαβουλων [Ti. WH]), Mt. 4 13 15 AV, RV ZEBULON.

ZACCAI (זַכַּי written זַכָּי; abbrev. from ZACHARIAH, § 52, cp HAGGAI), the name of a post-exilic family; Ezra 2 9 (ζακχου [B], -χαν [Avid.], -χαιου [L]), Neh. 7 14 (ζαθου [BN], ζακχουρ [A], ζακχαιου [L]). In 1 Esd. 5 12 it is [AV] CORBE, or [RV] CHORBE (χορβε [BA], ζακχαι [L]). Zaccai is the Ḳr. also in Neh. 3 20, where Ktb. has ZABBAI (*q.v.*).

ZACCHÆUS (ζακχαιος [AV; Ti. WH], see ZACCAI).

1. AV **Zaccheus**, an officer belonging to Judas the Maccabee (2 Macc. 10 19), identified by some with the Zacharias of 1 Macc. 5 56.

2. A chief publican (ἀρχιτελώνης) who received Jesus on his entry into Jericho (Lk. 19 1-10). There is much picturesqueness in the narrative; even if only a reflection of the more historical story in Lk. 5 27-32, no one would wish to lose the beautiful picture of the care of Jesus for the meanest and most despised. The improbabilities can hardly be denied. The only complete parallel to Lk. 19 5 is in Jn. 1 47,[1] which occurs in the ill-attested narrative of Nathanael. Nor is the crowd of curious followers (*v.* 3) natural; it was the object of Jesus on this journey to avoid observation. Zacchæus's solemn act of atonement for injustice is also very abruptly introduced, nor can one easily believe that Jesus, in his present circumstances, would have openly announced his intention of lodging with a publican (see PUBLICAN). Zacchæus's name, too (= pure, innocent), as Keim (*Jesu von Naz.* 3 49) points out, is suspiciously prophetic of his act of repentance. To identify him either with NATHANAEL (*q.v.*) or with Paul (the little) does not help us at all. On Lk. 19 4, see SYCOMORE.

A late tradition (*Clem. Rec.*) makes Zacchæus a comrade of Peter. T. K. C.

ZACCUR (זַכּוּר, see NAMES, §§ 32, 52; but, the names with which Zaccur and ZICHRI [*q.v.*] are grouped being originally ethnics, it is plain that Zaccur and Zichri, too, are ethnics which have been converted into personal names; cp ZACHER, ZECHARIAH, and see below; ζακχουρ [BNAL]).

1. Father of SHAMMUA (= Shimei), of REUBEN (§ 11 *f.*); Nu. 13 4 [P] (ζακχυρ [B], ζαχρου [A], ζα. χουρ [F], ζαγχουρ [L]).

2. AV **Zacchur**, a Simeonite, brother of Hammuel = Jeraḥmeel, and Shimei = Shimeoni; 1 Ch. 4 26 (om. B, ζαχουρ [L]).

3. A Merarite Levite, brother of SHOHAM = Mōšē, and 'Ibri = 'Arābī—*i.e.*, N. Arabian (1 Ch. 24 27).

4. An Asaphite Levite, brother of Nethaniah = Ethani, and Asharelah = Jizreeli or 'Jezreelite' (1 Ch. 25 2 10; σακχους, ζαχχουθ [B]); see ZICHRI, 11.

5. Ezra 8 14 EVmg. (ζακχουρ [L]). See ZABUD, 2.

6. b. Imri (= Amariah = Jerahmeel) in list of wall-builders (see NEHEMIAH, § 1 *f.*; EZRA ii., §§ 16 [1], 15 *d*), Neh. 3 2 (ζαβαουρ [B], ζαχχουρ [N]).

7. Levite signatory to the covenant, grouped with SHEREBIAH and SHEBANIAH, both ethnics (see EZRA i., § 7); Neh. 10 12 [13] (ζαχωρ [B], ζακχωρ [A], ζαχχωρ [N?]).

8. b. Mattaniah (*i.e.*, Ethani or Temani), and father of HANAN (*q.v.*); Neh. 13 13 (σακχουρ [L]).

A writer in *PSBA* has suggested that Zechariah and the related names may be connected with Zakkara, the name (of uncertain pronunciation) of allies of the Purusati (= Pelištim?—see PHILISTINES, § 3). But if so, why do we not find any of these names given to Israelites of central Palestine (see DOR, § 2)? It is more probable that Zacher (Zecher), Zaccur, and Zichri with Zechariah were originally the clan-names Zeraḥ and Zarḥi respectively. Cp ZERAH. T. K. C.

ZACHARIAH (זְכַרְיָה). 1. 2 K. 14 29 15 8-12 (זְכַרְיָהוּ), and (2) 2 K. 18 2; see ZECHARIAH, 2, 3.

3. (ζαχαριας) Mt. 23 35 Lk. 11 51 in RV, AV ZACHARIAS, 9.

ZACHARIAS, in NT RV **Zachariah** (ζαχαριας [BAL; Ti. WH]).

1. A priest (1 Esd. 1 8). See ZECHARIAH, 19.

2. The name in 1 Esd. 1 15 corresponding to HEMAN in the ∥ passage 2 Ch. 35 15 (𝔊L αιμαν = Heman).

3. RV ZARAIAS (*q.v.*) in 1 Esd. 5 8 (ζαραιου [B], ζαρεου [A],

[1] Plummer, indeed (*St. Luke*, 434), thinks that 'there is no need to suppose that Jesus had supernatural knowledge of the name. . . . Jesus might hear the people calling to Zacchæus, or might inquire.' So Weiss (*Leben Jesu*, 2 437), 'Jesus easily learned the name and character of the notorious man.' But this is hardly in accordance with the intention of the evangelist, or with the natural impression of readers.

σαραιου [L]). AV, following the Geneva Bible, gives ZACHARIAS. See SERAIAH, 8.

4. 1 Esd. 6 1 7 3, see ZECHARIAH, 1.

5. 1 Esd. 8 30 44. 6. *ib. v.* 37 (ζαχαριαι [B]). 7. 1 Esd. 9 27; see ZECHARIAH, 20, 21, 22.

8. Father of JOSEPH (temp. Judas Maccabæus), 1 Macc. 5 18 56-62.

9. Son of Barachias; according to Mt. 23 35, the last Jewish martyr of the pre-Christian period. All the innocent blood shed on the land (ἐπὶ τῆς γῆς) from that of Abel to that of Zacharias, son of Barachias ('whom ye slew between the sanctuary and the altar,' see RV) is to be visited, says Jesus, 'on this generation.' Lk., however (11 51), is without 'son of Barachias,' and Jerome says that 'in the Gospel used by the Nazarenes [the Gospel according to the Hebrews], instead of *son of Barachias* we find written *son of Joiada*' (in *l.c.* Mt.). We may, therefore, disregard the artificial Gnostic and patristic legends, which state (see *Protevang. Jac.* 23 *f.*, and cp Keim, *Jesus of Nazara*, 2 209) that Herod, who supposed John to be the Messiah, murdered Zacharias the father of John the Baptist in the temple by the altar of sacrifice (see 10); and not less the hypothesis that Jesus refers prophetically to Zacharias the son of Baruch (but Niese has Βαρεις), who was killed 'in the middle of the temple' in the first Roman war (Jos. *BJ* iv. 5 4). It is possible, however, that 'Barachias' means the father of Zechariah the well-known prophet, and that it is a mere clerical error for 'Joiada';[1] possible, too, that the whole passage has been filled out by a later writer who knew of the horrible murder mentioned by Josephus. This assumes that Jesus really meant Zechariah b. Jehoiada (ZECHARIAH, 15). But the reason given for the phrase 'from Abel to Zechariah b. Jehoiada' (that Chronicles is the last book in the Jewish Canon) seems very inadequate (see GOSPELS, § 150). According to N. Schmidt (*JBL* 19 22, n. 1), Mt. 23 35 once formed part of an 'Apocalypse of Jesus' (cp Mt. 24) which cannot have been written long before the end of the first century (cp We. *IJG*(3) 366; *Skizzen*, 6 [1899] 20 *ff.*). If so, the reference to Zechariah b. Baruch was full of significance to the original readers.

10. The father of JOHN THE BAPTIST (*q.v.*), mentioned only in Lk. 1 5 8-23 39-79 3 2. He was of the course of Abijah (see Schür., *Hist.* ii. 1 216 *ff.*), and his home was in an unnamed 'city of Judah.' According to a comparatively early tradition the 'city' is 'Ain Kārim (see BETH-HACCEREM), and *Mar Zakaryā* is the precise spot where Zacharias dwelt; even recently Schick has spoken a word for this tradition (*ZDPV* 22 [1899] 90 *ff.*). But the fact that no name is given most probably indicates that the narrative in Lk. 1 had but recently arisen when it was admitted by Lk. into his Gospel; the narrator hoped to be able to supply the name later (cp an analogous case in 1 S. 13 1, if H. P. Smith's view is correct). Though JUTTAH (*q.v.*) is philologically and otherwise improbable, 'Ain Kārim (Schick) and Hebron (Ew., Keim) are also baseless fancies. From Lk. 1 80 we should expect some city near the desert to be meant. It was in the temple, however, that Zacharias is said to have received a divine announcement of the birth of a son; the announcement is made in terms partly resembling those used to Manoah's wife in Judg. 13 5 *f.* Zacharias craved a sign, and is punished by dumbness until the fulfilment of the promise. When the child is born, the father names him John (cp Jos. *Ant.* xiv. 1 3). The *Protev. Jac.* seeks to improve upon this by making Zacharias the high priest: he enters the Holy of Holies in his sacred attire. We are not told that it was merely 'a voice' (*Bath ḳōl;* cp Mt. 3 17) that Zacharias heard; the parallel of the oracle given to John Hyrcanus, the high priest, as he was offering incense alone in the temple (Jos. *Ant.* xiii. 10 3), is therefore imperfect. The long stay of Zacharias in the temple, and the surprise which it produced (Lk. 1 21), may, however, be paralleled by the long stay of Simon the Righteous in the temple on the Day of Atonement, when he prayed that the sanctuary might not be destroyed (Talm. Jer. *Yoma*, 5 2). Cp INCENSE, § 7, n. On the legendary death of Zacharias, see above, 9. Cp JOHN THE BAPTIST. T. K. C.

1 Cp the inaccuracy of the Tg. on Lam. 2 20 (ZECHARIAH, 15)

ZACHER, or, as RV, ZECHER (זֶכֶר; ΖΑΧΟΥΡ [B], ζακχ. [A], ζεχρι [L]), 1 Ch. 8 31†, called, in 1 Ch. 9 37 ZECHARIAH (*q.v.*, 6). On the possible ethnic character of Zecher see ZACCUR.

ZADOK (צָדוֹק, once צָדֹק, 1 K. 1 26; 'just,' § 56 *f.*; cp JEHOZADAK, and see SADDUCEES.[1] Similar in meaning is the form Zadduk [צַדּוּק], which is not unfrequent in post-biblical times, cp *Āböth*, 4 56; Strack, *ad loc.*; Lag. *Nom.* 225 *ff.* Ṣaddūḳ is the form generally presupposed by 𝔊BNAL [σαδδουκ]; σαδωκ, 𝔊BℵA in nos. 2-5 [and BA in 2 S. with exception of 2 S. 8 17 B 1 Ch. 29 22 A], is somewhat less common. Other variations are σααδουκ, Ezra 7 2 [A]; σαδδουχ, Ezek. 40 46 [A]; σαδδοκ, Neh. 11 11 [L], and σαδδωκ, 2 S. 15 24-27 [L]; σαδουκ, 2 S. 8 17 1 Ch. 6 38 [53] 15 11 [L], Neh. 11 11 [ℵ], 1 K. 4 4 [B], -χ, 2 S. 8 17 [A]; ιαβοκ, 2 S. 15 27 [A]. SADDUC, RV SADDUK (1 Esd. 8 2; σαδδουκου [A]); SADOC (4 Esd. 1 1).

1. The Zadok of David.

1. Zadok the son of Ahitub, a priest who held a prominent place at David's court and played a great part in securing the throne for David's successor. We know nothing of his real origin, nor can we say when or how he became priest in the royal sanctuary at Jerusalem. We learn, however, from 2 S. 8 17 *ff.* (cp 20 23-26, and see Bu. *Ri. Sa.* 247, 254) that he was associated with Abiathar (for the correct reading see Driver, *TBS ad loc.*) and with some of David's own sons in the priestly office at Jerusalem. Like Abiathar he was true to his sovereign during Absalom's revolt; like him he bore the ark of Yahwè when David was fleeing eastward from the royal city; at David's request he with Abiathar bore the palladium of Israel back to the capital, and there with Abiathar did the work of a spy and supplied the king with information about the designs of Absalom and the other rebels. So far Zadok had been closely associated with that older and greater priest who represented the ancient family of the b'nē Eli and that sanctuary at Shiloh in which they had ministered. In the end he supplanted Abiathar altogether. For Zadok joined Nathan the prophet, and Benaiah, captain of the foreign guards, in the harem intrigue which set aside Adonijah the legitimate heir, and placed Solomon the son of Bath-sheba on the throne. Abiathar, on the contrary, stood by Joab, the royal princes, except of course Solomon, and the rest of the more conservative party. Naturally, therefore, when Solomon became king, it was Zadok who anointed him; Abiathar, on the other hand, was banished to Anathoth; the family of Eli forfeited the priesthood, and the chief care of the royal chapel or temple at Jerusalem was entrusted to Zadok and his descendants.

2. Zadok and Eli.

In their hands it remained down to the time of the exile; but we have in 1 S. 2 35 *f.* interesting evidence that the prior claims of the b'nē Eli and their eminence long before Zadok had been heard of, were not forgotten. The author of the passage in question probably belonged to the period of the Deuteronomic reform. Like Jeremiah (7 12 26 6) he regarded the temple at Shiloh as the precursor of the temple at Jerusalem. He felt, therefore, that some reason must be given for the fact that the family of Eli which had officiated so long in Shiloh did not continue to do so in Jerusalem. Political grounds and the authority of the king to regulate the service in his own

1 [There is another view as to the origin of Zadok—viz., that it is a modification of a gentilic name. This seems to be favoured by an examination of the names with which this name is associated in Chron. and Neh. It will, however, be permissible to hold that the Zidḳites (originally, it would appear, settled in the Negeb) may have derived their name from צדק, a secondary title of the god worshipped in primitive times by this clan; also that cultivated Israelites in later times interpreted 'Zadok' as meaning 'just, righteous' (cp ZEDEKIAH, § 1).—T. K. C.]

chapel had satisfied the religious ideas of a simpler age, but did not by any means appear sufficient to one who had imbibed the ideas of Deuteronomy and regarded the priesthood as directly subject to divine regulation. Accordingly he puts into the mouth of an anonymous prophet the prediction that Eli's indulgence of his depraved sons was to be visited upon his descendants by the loss of the priesthood. Instead of the b'nē Eli Yahwè was to raise up a new priestly race, and they were to perform priestly functions before the anointed king of Judah. The new family of priests was to share in the perpetual endurance of the royal house. In contrast with the Zadokites, the b'nē Eli were to sink into obscurity and want. They were to petition their rivals for the most subordinate offices of the priesthood. Here perhaps the writer is thinking of the priests at the high places who had been driven by Josiah from their occupation, and had to depend for the future on the grace of the priests at Jerusalem. True, the Deuteronomical code had given the country Levites right to sacrifice at Jerusalem (Dt. 18 7 *f.*); but though some provision was made for them, the generous rate of D proved impracticable. See ELI.

It is in any case certain that Ezekiel during the exile, in a prophecy which was written about 573 B.C., vindicated the sole right of the Zadokites to the priesthood. He draws the sharpest line of demarcation between the sons of Zadok and other Levites. In D all Levites form an ideal unity, all have in theory equal rights. Ezekiel, on the contrary, passes sentence on the mere Levites, holding them responsible for that worship on the high places which was to him no better than idolatrous. In time to come they are, he says, to be debarred from 'approaching' Yahwè in priestly service. They are to be content with menial work, such as the slaughter of victims and cooking their flesh, keeping guard over the temple doors, etc.; only such Levites as were sons of Zadok might presume to lay the fat and blood on the altar (Ezek. 44 15 *f.*).

3. Zadok and Ezekiel.

Two changes were yet to be made in the position of the sons of Zadok, one enhancing their prestige, the other modifying the exclusiveness of their claims. First, whereas Ezekiel frankly took for granted the novelty of those unique rights which he claimed for the Zadokites, the 'Priestly Code' somewhat later put the divine election of the priestly house back to the very dawn of Israel's history, back to the time when Yahwè chose Aaron as his priest. Hence the Chronicler (1 Ch. 6 53) was obliged to trace the genealogy of Zadok to Eleazar the son of Aaron. In the next place the ideal of Ezekiel was not perfectly realised. No doubt few Levites of inferior family, in proportion to the Zadokite priests, returned under Zerubbabel and later under Ezra and Nehemiah (Neh. 7 39 *f.* Ezra 8 2 *f.*). Thus the Zadokites cannot have had serious difficulty in securing that pre-eminence which Ezekiel claimed for them. Nevertheless it seems that a certain Daniel of the sons of Ithamar (Ezra 8 2; see DANIEL, 3) accompanied Ezra and, owing perhaps to the wealth and consideration which his family enjoyed, contrived to share in those priestly privileges which D had assigned to all the Levites. Such, at least, is the ingenious theory of Kautzsch (*St. Kr.*, 1890, p. 778 *f.*), and we may in any case be sure that some Levites who did not claim origin from Zadok were priests in the second temple. In their favour, then, the theory of descent was modified. It was said that Aaron had two sons who left issue: Eleazar, father of that line to which legitimate high priests belonged, and Ithamar, the ancestor of legitimate priests but not of legitimate high priests (so P in Ex. 6 23 Lev. 10 6 Nu. 4 28, so also 1 Ch. 24 6). The Chronicler assigns sixteen classes to the sons of Eleazar—*i.e.*, the Zadokites—and half that number to the descendants of Ithamar (1 Ch. 24 4). In this way also he is able partially to reconcile the double priesthood of Zadok and Abiathar with the notions of his own time, since, as descendants of Ithamar, the b'nē Eli were often lawful priests, though not high priests. See ELEAZAR, ELI, ITHAMAR, and cp, further, SADDUCEES.

4. Zadok in P.

2. Father of JERUSHA [*q.v.*] (2 K. 15 33 2 Ch. 27 1, *σαδωρ* [B]).

3. b. Baana, in list of wall-builders (see NEHEMIAH, § 1 *f.*, EZRA ii., §§ 16 [1] 15 *d*), Neh. 3 4 (*σαδουκ* [א]); he is doubtless the signatory to the covenant (see EZRA i., § 7) mentioned in Neh. 10 21 [22] (*σαδουκ* [A], *σαδδουκ* [Bא], *εδδωκ* [L]). In both cases the name occurs together with Meshezabeel.

4. b. IMMER [*q.v.*] (Neh. 3 29, *σαδουχ* [א]).

5. A scribe, temp. Ezra (Neh. 13 13, *σαδδουκ* [B]).

W. E. A.

ZAHAM (זָהַם; ροολλαμ [B], ζαλαμ [A], ζααμ [L]), a son of Rehoboam (2 Ch. 11 19). Perhaps from רחם=ירחמאל; note 𝔊^{BA} and cp RAHAM (Che.).

ZAIR (in locative צָעִירָה; εις σειωρ [B]; om. A; εκ σιωρ [L]), a place on the way to Edom, where Jehoram, king of Judah, 'rose up by night and smote the Edomites who had surrounded him' (2 K. 8 21). See JEHORAM, 2. It is strange to find that he also smote 'the captains of the chariots,' and we are in doubt as to the true reference of the following clause, 'and the people fled to their tents.' According to Benzinger and Kittel, after *v.* 21*a*, the original narrative must have stated how Jehoram was surrounded in Zair (?) by the Edomites; *v.* 21*b* (beginning וַיְהִי־הוּא קָם לַיְלָה, EV 'and he rose [up] by night') must relate a defeat of Jehoram which nearly issued in the death or captivity of the king. The people who fled can only be the men of Judah. Stade, in *ZATW* 21 337-340 (1901), once more examines the passage, 2 K. 8 21-24, reaffirming his conclusion in *GVI* 1 537, n. 1, so far as regards taking אֱרוֹם as the subject of קָם, and הוּא as an intentional alteration or correction.

Instead of ואת שרי הרכב, Benzinger and Kittel would read something like (or אִתּוֹ) וּשׂרי הר' עִמּוֹ. Both, however, hesitate to identify Zair. Ewald thought of Zoar (צֹעַר); it is objected that this place-name in 𝔊 is *σηγωρ* or *σιγωρ* (implying צ=غ), whereas Zair is *σειωρ*, *σιωρ* (*i.e.*, צ=ع); see Buhl, *Edomiter*, 65. The case, however, becomes entirely altered, if אר[ו]ם has been miswritten (as in other passages) for אֲרָם. It is a plausible theory that the passages relative to Edom in 2 Samuel and Kings (most, if not all of them) in their original form referred to 'Aram'—*i.e.*, Jerahmeel, rather than to Edom (cp SAUL, § 3; JOKTHEEL, 2; REZIN; SALT, VALLEY OF; ZOBAH). 2 K. 8 21 now becomes plain. Emending the text in accordance with numerous analogies we get, 'And Joram passed over to Miṣṣur, and all the chariots with him, and [Aram] the Jerahmeelites smote him and the captains of the chariots; and the people fled to their tents.' Miṣṣur was presumably a N. Arabian town, so called from the region of Miṣṣur or Miṣrim (see MIZRAIM). It may have been originally intended in the list given in Josh. 15 52-54 by ZIOR (*q.v.*).

Mühlau (Riehm, *HWB*, 1813) thinks Conder's identification of Zair with the pass ez-Zuwêret, in the SW. of the Dead Sea, worth consideration; Buhl, however (*Edomiter*, 65, n. 2), finds it inconsistent with ויעבר (but 𝔊 has *ἀνέβη*, וַיַּעַל, which may be right).

T. K. C.

ZALAPH (צָלָף; σελε [B], σαλεφ [א], -σελ [AL]), father of Hanun (Neh. 3 30).

ZALMON (צַלְמוֹן, see § 4). The name occurs twice in the OT, more frequently in the Talmud, but without topographical data (Neub. *Géog.* 275).

1. (*ερμων* [BAL], *αερμων* [𝔊^M in Moore], *σελμων* [Eus. *OS* 295 73, without indication of site]). The name given in MT to a mountain near Shechem[1] (Judg. 9 48†).

In the underlying story, however, the scene of the doings of Abimelech seems to have been placed in the Negeb, in and near a place called Cusham; Jerahmeel-Cusham may also (but cp SHECHEM, TOWER OF) be referred to. It is probably, therefore, some mountain of a Jerahmeelite range, and 𝔊^M's reading may

[1] One might naturally think of Gerizim; the argument offered for connecting the name with the southern peak of Hermon is perfectly absurd (see Moore, *Judges*, 265).

be taken to confirm this. For חרמון (αερμων) is probably a popular corruption of ירחמאל,[1] and we shall see (see ZALMON, ii.) that צלמון is not improbably a popular corruption of ישמעאל; now 'Jerahmeel' and 'Ishmael' are repeatedly used as synonyms so that in one form of the original story Mt. Jerahmeel may have been spoken of, and in another Mt. Ishmael. The corruptions 'Hermon' and 'Zalmon' may of course have been made very early. The equation, Hermon = Jerahmeel, illustrates Enoch 6 6 where the fallen angels are said to have descended on Mt. Hermon. Probably Mt. Jerahmeel was meant in the original story; six of the names of the fallen angels are clearly corrupt forms of Jerahmeel. The early legends may all have a Jerahmeelite or N. Arabian setting. Cp ZALMONAH.

2. AV SALMON (σελμων [Bℵ]; σελμω [R[a]]), according to most, a mountain or mountain-range (Ps. 68 14 [15]†), the dark rocks of which (as if צלמון meant 'dark-coloured,' from √צלם; cp צלמות) set off the brilliance of the snow, when, as in the depth of winter, snow-falls occurred. The psalmist is thought to compare the dead bodies, or perhaps the glistening arms or ornaments, of slain warriors to snow on Zalmon. Wetzstein (*Abh.* appended to Del. *Hiob*, and elsewhere) compares the ασαλμανος of Ptol. 5 15 (*var. lect.* αλσαλαμος, αλσαδαμος) which is a name for the Ḥaurān mountain range (alluding to the dark volcanic rocks). This is thought to be confirmed by reference to the *Jebel Ḥaurān* in *v.* 15 [16], where Wetzstein regards the phrase הר גבננים as a picturesque description of the crater-formation of this highly-volcanic region (so Che. *Ps.*[(1)]; Guthe, *ZDPV*, 1889, p. 231; Buhl, cautiously, *Pal.* 118; but not GASm. *HG* 550).

The whole passage, however, seems to be corrupt, and an adequate restoration can only be hoped for by a searching re-examination of the whole passage (see Che. *Ps.*[(2)]). Among the current emendations of צלמון, Krochmal's צַלְמוּת (derived from Tg.) is the most plausible. Duhm's בְּשֶׁלֶג and Lagarde's בָּהָר הַשֶּׁלֶג leave צלמון in all its unexpected and unlikely prominence.
T. K. C.

ZALMON (צַלְמוֹן), the Ahohite, one of David's heroes; 2 S. 23 28† (ελλων—*i.e.*, עלון [B], σελλωμ [A], ελιμαν [L]; Pesh. *ṣalmun*, Vg. *selmon*) = 1 Ch. 11 29† (ILAI, עִילַי; ηλει [Bℵ], ηλι [sup ras A[a]], ηλα [L]; Pesh. *'alī; 'ilai*). See NAMES, § 4.

Inferring from the reading of 𝔊BL in 2 S. that the form in 𝔐 is original, Kittel ('Chron.' in *SBOT*) would read עַלְיָמָן, 'Alīmān, and Marquart compares ALEMETH (*q.v.*) = ALMON (but both these names are probably corruptions of 'Jerahmeel'). The name צלמון, however, is in itself highly probable. The three names צלמון, צלמנע, and צלמנה all point to the Negeb—all are N. Arabian, and all are (or spring from) popular corruptions of ישמעאל—a synonym, be it observed, of ירחמאל. Cp Nu. 14 9, if the view (*Crit. Bib.*) is correct which makes לחמנו הם סר צלם מעליהם, an editorial attempt to make sense of the badly-written words of a gloss on 'the people of the land,' viz., ירחמאלים ישמעאלים ירחמאלים ('Jerahmeelites, Ishmaelites, Jerahmeelites'), for which numerous parallels can be offered (see *Crit. Bib*). 'They are our bread' and 'their shadow has departed from them' are clearly impossible. There is indeed another theory, which would be tempting, if we were to look at these names by themselves, and not in the light of convergent text-critical arguments—viz., to find in צלמון a trace of the god צלם (ṢLM) worshipped at Teima (see ZALMUNNA). But in similar cases a better solution is generally forthcoming. Certainly one of David's heroes might well have a name corrupted from 'Ishmael' or 'Jerahmeel.'
T. K. C.

ZALMONAH (צַלְמֹנָה; σελμωνα [BAL]), a stage in the wandering in the wilderness (Nu. 33 41 *f.*).

The preceding station is Mt. Hor—*i.e.*, according to the theory which best accounts for a multitude of facts, Mt. Jerahmeel (see MOSES, §§ 14-18, with n. 2, col. 3217). Another name of some part of the chief Jerahmeelite mountain-range was probably Zalmon—*i.e.*, Ishmael (a synonym of Jerahmeel).

It is reasonable to think that the name 'Zalmonah' is only a doublet of 'Hor,' and that in reality the same mountain district is meant by both names. See, however, WANDERINGS, WILDERNESS OF.
T. K. C.

ZALMUNNA (צַלְמֻנָּע; σαλμανα [ℵAR[a]TL], σαλμαν [R*], but σελμανα [B]), a Midianite prince always mentioned with ZEBAH [*q.v.*] (Judg. 8 4 *ff.*, Ps. 83 11). His name (the pointing of which seems designed to suggest the interpretation 'protection refused') is very probably compounded with that of the old deity צלם[1] (see TEMA). For the second part of the name we may compare the OT יִמְנָע, חִמְנָע, and perhaps also מנעת on a Nabatæan inscription from Hegra (cp Moore, *Judges*, 220), or the first part of the place-name נעיאל (Josh. 19 27; cp הַנֵּעָה, *v.* 13, and see Neubauer, *Athenæum*, 28th Feb. 1885; Baethg. *Beitr.* 80 *f*).
S. A. C.

ZAMBRI, 1. (ζαμβρει [B], -ρις [A]) 1 Esd. 9 34 RV (AV **Zambis**) = Ezra 10 42 AMARIAH, 3.

2. (ζαμβρ[ε]ι [AℵV]) 1 Macc. 2 26, RV ZIMRI, *q.v.*

ZAMOTH (ζαμοθ [BA]), 1 Esd. 9 28 = Ezra 10 27, ZATTU.

ZAMZUMMIM (זַמְזֻמִּים; ζοχομειν [B], -μμειν [B[a.b]], ζομζομμειν [A], ζομμειν [FL]), a branch of the REPHAIM (*q.v.*), so called by the Ammonites (Dt. 2 20)†. Some compare Ar. *zamzama*, 'a distant rustling sound,' and *zīzīm*, 'the hissing, whistling sound made by the *jinn* of the desert in the night' (so Schwally, *ZATW*, 1898, p. 138, and W. R. Smith, *ap.* Dr. *Deut.* 40).

But these early names are so liable to corruption that the view given elsewhere of the probable variant ZUZIM (*q.v.*) is perhaps more probable.
T. K. C.

ZANOAH (זָנוֹחַ), probably an expanded Jerahmeelite clan-name [cp Shelaḥ and Sha'ul], and, if so, presumably to be added to the group[2] containing Jaazaniah, Jezaniah, Aznoth-tabor, Uzzen-sheerah; the superficially obvious meaning 'stench,' though defensible [NAMES, § 106], is hardly plausible, and the parallels for such a name are all textually suspicious—see, *e.g.*, MADMEN, OPHNI, ZIPHRON; ζανω [BℵAL]).

1. The name of a personified clan together with its chief centre, 1 Ch. 4 18 (ζαμων [BA], ζανωε [L]).

The reputed father is Jekuthiel, a name which, like Joktheel and Eltekeh, is most probably one of the many current corruptions of Jerahmeel.[3] The clan referred to was therefore of the Negeb (see closing paragraph).

2. A city in the SHEPHELAH (*q.v.*), Josh. 15 34 (τανω [B]). Also (Ges.-Bu.) mentioned in Neh. 3 13 (ζανων [L]) and 11 30 (om. BℵA, ζανωε [ℵ[c.a mg. inf.]]). Robinson (*BR* 2 343) identifies with *Zānū'*, a ruin 2½ m. S. from 'Ain Shems (see BETH-SHEMESH). In the preceding and following groups of names in Josh. 15 34 occur Zorah and Soco, which apparently suits the proposed identification. In *OS* 258 38 159 12 Zanoah is stated to be in the district of Eleutheropolis.

3. A city in the hill-country of Judah, Josh. 15 56 (ζακαναειμ, taking in הקין from *v.* 57 [B], ζανου [L]). Van de Velde and Robinson identify with *Za'nūṭa*, a ruin SW. of Yuṭṭā (Jutta, mentioned in the preceding group in Josh.), though, being nearly as far S. as esh-Shuweike (Socoh), it might seem more plausible to connect the name with 2.

There is, however, an element of uncertainty in these identifications, owing to the transference of names, and to the geographical mistakes of redactors (see SOCOH). The original Zanoah, like the original Socoh, was most probably in the Negeb. In *Neh.* 11 30 'Adullam,' which follows 'Zanoah,' was very probably a Jerahmeelite city in the Negeb, and 'Lachish' has arisen out of 'Eshcol' (see NEGEB, § 7).
T. K. C.

ZAPHNATH-PAANEAH, RV **Zaphenath-paneah**

[1] Note that in the MT of Ps. 42 7 [6] ירחמאלים (Jeraḥmeelim) has become חרמונים. See MIZAR, THE HILL OF.

[1] So Nöldeke and Clermont-Ganneau, Neubauer (*Athenæum*, *l.c.*) suggests that the same divine name should be read in Nu. 14 9; צֶלֶם (not צִלָּם, 'their shadow'!) has departed from them, but Yahwè is with us.' 𝔊BAFL's ὁ καιρός must have arisen out of ὁ κύριος which a few MSS and the Arm. actually have (cp Neub. *l.c.*). The MT, however, makes a very satisfactory sense. In folk-lore the shadow is often identified with the object itself (cp Frazer, *Golden Bough*,[(2)] 1 287), and the loss of the shadow is regarded as the loss of life itself. [Note, however, the solution of the text-critical problem given elsewhere (ZALMON, 2).]

[2] See SHAPHAN, UZZEN-SHEERAH.

[3] See NEGEB, § 7, and cp JOKTHEEL.

(צָפְנַת פַּעְנֵחַ; ψονθομφανηχ [AE], ψομθ. [L]; ζαμφανη, ασαμφανη, σαφαμφανη [Aq.], σαφαθφανη [Sym.]), the Egyptian name reported to have been given to Joseph by the Pharaoh (Gen. 41 45). For the older explanations see below. It has now become customary to seek explanations of the name from ancient Egyptian. Lenormant compares the title of *Ka-mose*, a king of the seventeenth dynasty, '*zaf-n-to*,' 'nourisher of the world' (*Hist. anc. de l'Or.*, 1869, 1 363); this, he holds, explains Zaphnath. Since the time of Lepsius (*Einl. in d. Chronologie der Ägypten*, 1 382) most scholars have explained פענח by the Egyptian *pa-'anḫ* (*das Leben, la vie*, life). Brugsch (*Gesch. Äg.*, 1877, p. 248) formerly interpreted the whole name, 'governor of the district of the place of life' (*i.e.*, of the Sethroitic nome); but in 1891 (*Die Aegyptologie*, 240) he adopted Steindorff's explanation (see *ZA* 27 42), which is also given by Crum in Hastings' *DB* 1 665*b*, as the only admissible one, under the form *jephnoute fônch* (*ze*[*d*]-*p-nûte*[*r*]-[*e*]*f-'onḫ*), 'God speaks (and) he lives,' Lieblein, however ('Mots Égyptiens dans la Bible,' *PSBA*, May 1898, pp. 202 *ff.*), criticises this, and proposes the form *cfnti pa-anḫ*, 'he who gives the nourishment of life.' Finally, Marquart ('Chronol. Untersuch.,' *Philologus*, 7 676 *f.*) thinks that נת (=תן) indicates that Joseph was a worshipper of Iten, the solar disk, the god honoured by Amenhotep IV.; [פ]ענח is misplaced, and belongs to the name of Joseph's wife (אנתם). The present writer held out as long as he could for an Egyptian explanation, regarding צפנת as a corruption of פענח, and explaining the latter in Lepsius' way; he inclined to read Joseph's Egyptian name as *Pa-'anḫ*, or rather Pianḫi, which is the name of a famous king of the twenty-fifth dynasty; this might mark the date of the Joseph narrative in its present form; see EGYPT, § 65 *f.*, JOSEPH ii., §§ 4, 11. It is of course possible that the redactor of the beautiful Joseph-story may have had such a name as Pianḫi in his mind. But it can be made highly probable that underneath our Joseph-story there was another, the scene of which was laid in the Negeb and in the land of Miṣrim. If we accept this, we may reasonably suppose that צפנת is a corruption or alteration of צרפת, and פענח of פנחס. The marriages of Joseph and of Eleazar b. Aharon are plainly parallel. Eleazar (Ex. 6 25) marries a daughter of PUTIEL (=Zarephathi), and has a son named PHINEHAS (=Jerahmeel); Joseph marries a daughter of Potiphera (=Zarephathi), and his own name is called Zarephath-jerahmeel. The marriage of Moses will also be remembered; his wife's name was Zipporah, which (see MOSES, §§ 2, 4) is most probably a modification or distortion of the place-name Zarephath.

The plausibility of Egyptological explanations must be admitted, even if we hold that the original narrators had a N. Arabian, not an Egyptian horizon. Already Jerome says, 'Interpretatur sermone Ægyptio . . . salvator mundi, eo quod orbem terræ ab imminente famis excidio liberavit.' Onk. gives, 'The man to whom mysteries are revealed'; ps.-Jon., 'the man who reveals mysteries.' Similarly Jos. *Ant.* ii.6 1, Pesh., Saad. See also Harkavy, *Journ. As.* 15 (1870) 178 *ff.*; Wiedemann, *Sammlung altäg. Wörter*, 21; Levesque, *Rev. Bibl.*, 1899, pp. 412 *ff.* T. K. C.

ZAPHON (צָפוֹן, cp Ṣapuna in the Amarna Tablets 174 16, a S. Pal. city [see *KAT*(3) 479], and BAAL-ZEPHON), a Gadite city—cp the Gadite names צפון and צִפְיוֹן—lying 'in the valley'—*i.e.*, of the Jordan (Josh. 13 27 σαφαν [B], -ων [AL]), and again, according to RVmg., in the account of the quarrel of the Ephraimites with Jephthah (Judg. 12 1 צָפוֹנָה RVmg. 'to ZAPHON'; κεφεινα [A], σεφηνα [L]; 'northwards' EV and 𝔊B); but others question the text (see JEPHTHAH, § 3, n. 1). It is mentioned after Beth-nimrah and Succoth. The Jer. Talm. (*Sheb.* 9 2 fol. 38 *d*) identifies it with עמתו, the later 'Amathō, Amathus, and mod. *'Amateh*, a little to the N. of the Zerḳā (Jabbok) on the E. bank of the Jordan, and at the mouth of the Wādy er-Rugeib;[1] but Buhl considers this doubtful (*Pal.* 259; Ges.-Bu. *s.v.*). Josephus (*Ant.* xiii. 12 5) mentions Ἀσωφων (Schlatter, *ZDPV* 19 224, Ασαφων) 'not far from the river Jordan' (οὐ πόρρωθεν τοῦ Ἰορδάνου ποταμοῦ).

1. The traditional facts.

The occurrence of Ṣapuna as a S. Palestinian place-name and of Baal-zephon in the account of the Exodus may well make us somewhat critical towards the statements of the traditional text respecting a trans-Jordanic Zaphon. There is also strong reason to think that when Jeremiah gives prophetic warning of an invasion of Jewish territory *from the north* (*e.g.*, Jer. 1 14 *f.* 46 6 1) it is not of the Scythians nor of any modern people that he is thinking, but of a people inhabiting a land called Zaphon or Zaphan (cp ZEPHANIAH). So in Joel 2 20 'the northern [army],' as EV renders, should rather be 'the Zephonite,' and in Ezek. 38 6 it is from the land of Zaphon, *in N. Arabia*, that the terrible hordes of Gog are to appear. In Jer. 15 12 too, 'iron from the north' should not improbably be 'iron from Zaphon'; the following words 'and brass' remind us that TUBAL-CAIN—*i.e.*, the Kenite Tubal according to the general view—was, '[the father of] every artificer of brass and iron'; and that Rehoboth was in David's time richly supplied with brass (see TEBAH).

2. Later researches.

It would take too much space to show what a bright light this theory (in connection with the larger historical theory of the relations between Israel-Judah and Jerahmeel) throws on many passages. But it may be well to point out (referring for details to *Crit. Bib.*) that underlying the story of the Gileadite Jephthah there is an earlier story of a Jephthah in the Negeb, and that the troublesome word צָפוֹנָה (EV northward) in Judg. 12 1 should probably be rendered 'to Zaphon'; the original narrative meant a locality in the Jerahmeelite Negeb. Also that in Josh. 13 27 the mention of Succoth and Zaphon is followed by 'the rest of the kingdom of Sihon king of Heshbon.' It appears as if P had access to early lists of names, the geographical reference of which he did not always understand. T. K. C.

ZARA (ζαρα [Ti. WH]), Mt. 1 3 AV, RV ZERAH, 1.

ZARACES, RV **Zarakes** (ζαριον [B], ζαρακην [AL]), in 1 Esd. 1 38 represents the JEHOAHAZ (*q.v.*) of the corresponding passage 2 Ch. 36 4. According to 2 Ch. Jehoahaz was taken by Necho to Egypt; but in the 1 Esd. passage he is brought by Joakim out of Egypt. This and other differences seem to be due to the fact that the author of 1 Esd. was copying from a corrupt or illegible *Hebrew* MS.

ZARAH (זֶרַח), Gen. 38 30 AV, RV ZERAH, 1.

ZARAIAS (ζαραιου [B]). (1) 1 Esd. 5 8 = Ezra 2 2 SERAIAH, 7. (2) 1 Esd. 8 2 (ζαραιου [A]); see ZERAHIAH (1). (3) 1 Esd. 8 31 (ζαραιου [BAL]); see ZERAHIAH (2). (4) 1 Esd. 8 34 (ζαραιας [BA]); see ZEBADIAH (3).

ZARDEUS (ζαρδαιας [A]), 1 Esd. 9 28 = Ezra 10 27 AZIZA.

ZAREAH (צָרְעָה), Neh. 11 29 AV, **Zareathites** (הַצָּרְעָתִי), 1 Ch. 2 53 AV. See ZORAH.

ZAREPHATH (צָרְפַת;[2] σαρεπτα [BAL]), a place on the high-road between Tyre and Sidon (cp Jer. *OS* 154 4), where, according to the traditional text, Elijah resided with a widow after leaving the brook Cherith (1 K. 17 9 *f.* σεφθα [A in *v.* 9]; cp Lk. 4 26 σαρεπτα της σιδωνιας; RV 'Zarephath, in the land of Sidon').

But the difficulty of supposing that this Phœnician woman was a worshipper of Yahwè is very great, and since (1) CHERITH (*q.v.*) must certainly be Rehoboth, and (2) even the traditional text elsewhere makes Elijah seek out a refuge in N. Arabia (1 K. 19; see MIZRAIM), we are compelled to suppose corruption of the text, and to read in 1 K. 17 9, 'Arise, get thee to Zarephath,

[1] For Amathus, cp Burckh. *Syr.* 346, Buhl, *Pal.* 259, and Schür. *GJV* 1 221 *f.* It is often mentioned by Jos. (cp *Ant.* xiii. 8 3 xiv. 5 4 *BJ* i. 8 5), and is placed by him on the Jordan. Eus., on the contrary, makes it 21 R. m. from Pella (*OS* 219 76).

[2] Lagarde (*Übers.* 84, note *) finds the vocalisation strange; in Palestine we should expect צְרָפַת.

which belongeth to Muṣur' (אֲשֶׁר לְמִצּוֹר). Zarephath is also mentioned as a border-city of Canaan in Obad. 20 (*σαρεφθων* [Qa]), not, however, on the north, but on the south (see NEGEB, § 3; SEPHARAD). A district of the Negeb, in the far S. of Palestine, was called after the Zarephathites[1] (1 S. 30 16), and David's bodyguard was partly composed of Zarephathites. It is true, 'Pelethites,' not 'Zarephathites,' is the traditional reading in 2 S. 8 18 etc.; but *pĕlēthī* and also *peleth* in 1 Ch. 2 33 (Nu. 16 1) are corrupt, and ought probably to be read *ṣārĕphāthī* and *ṣārĕphath* respectively (see PELETH, PELETHITES, and cp PALTI, 1).

It is also highly probable that the Zarephathites are the foes referred to in 2 S. 21 15-22. The nature of the war with the Philistines here referred to has surprised many readers; it contrasts strongly with the warfare described in 1 S. 31. If, however, *Pĕlištīm* should rather be *Ṣārephāthīm* (as certainly in 1 S. 30 16), we can much more easily understand the narrative. That 'Gath' and 'Gob' should rather be 'Rehoboth' is pointed out elsewhere (REHOBOTH). It was the warriors of Muṣri (see MIZRAIM, § 2 *b*), famous in later tradition for their unusual stature, who at the time referred to gave David so much trouble. Muṣri may originally have included Zarephath and Rehoboth (see below, on Gen. 10 13 *f.*). Not improbably 2 S. 21 15 *ff.* is properly the sequel of 2 S. 5 17-25. There is considerable reason to suppose that David conquered Rehoboth (miswritten in 2 S. 21 18 *ff.* Gob and Gath)—one of the chief cities of his foes—and fetched the ark of Yahwè from the house of OBED-EDOM the Rehobothite (not 'the Gittite'). A series of important corrections also becomes highly probable in 2 S. 5 17-25. 'Philistines' should probably be 'Zarephathites' (צרפתים); 'the valley of Rephaim' should be 'the valley of the Jerahmeelites'; 'over against the mulberry trees' should be 'over against [Perez of] the Jerahmeelites'; 'in the tops of the mulberry trees' should be 'in Perez of the Jerahmeelites.' Perez, be it noted here again, is surely a corruption of Ṣarefath (Zarephath); see PEREZ. Consequently 'Baal-perazim' may well come from 'Baal-ṣarefath (or -ṣārĕfāthīm).' Lastly, in the descriptive phrase 'from Geba as far as the approach to Gezer' (*v.* 25) the proper names should be 'Rehoboth' and 'Gadesh' = 'Kadesh' respectively. It also becomes probable that 'Perez-uzzah' in 2 S. 6 8 has arisen out of 'Ṣarefath-azzah' (strong-Zarephath). Cp PERAZIM, PEREZ-UZZA. This involves parallel corrections in 2 S. 23 8-23. The 'Philistines' should very probably be 'the Zarephathites,' just as in *v.* 21 'Egyptian' should doubtless be 'Miṣrite' (see MIZRAIM, § 2 *b*). David and his *gibbōrīm* are fighting in the region which adjoins their own homes (cp HARARITE, JEKABZEEL, ZIKLAG), to maintain their hold on the 'cities of the Jerahmeelites' (see 1 S. 30 29). The 'Valley of Rephaim' should again be the 'Valley of the Jerahmeelites,' and 'Bethlehem' (*vv.* 14-16) is an early corruption (like Ir hammelah) of Beth-jerahmeel. It may be added that it is probably the 'Zarephathites,' not the 'Philistines,' who fight against Keilah in the true text of 1 S. 23 1-5. Thus in the story of David, not less than in that of Jacob, there are traces of a more ancient and in some respects very different underlying narrative. Cp also SAUL.

It is moreover in a high degree probable that the 'En-mishpat' of Gen. 14 7, which is loosely identified in an inserted gloss with 'Kadesh,' should be corrected into 'En- (or rather 'Ir-) Zarephath'—*i.e.* 'fountain (rather, city) of Zarephath.' Certainly this helps to produce a consistent story; Kadesh and Zarephath will be found (see SODOM) to be both mentioned in the more ancient narrative which underlies our Gen. 14, as, according to the view proposed above, both names occur in the story which underlies 2 S. 5 17-25. And the only plausible explanation of 'Hassophereth' or 'Sophereth' in Ezra 2 55 Neh. 7 57 is that it is a corruption of the same ancient place-name Zarephath.

This latter correction points the way to another of much greater importance—viz. צרפתים (Ṣārĕfāthīm) for פַּתְרֻסִים in Gen. 10 14 (see PATHRUSIM). That Miṣrim, not Mizraim, was the son of Ham (Jeraḥmeel), is a view which sheds a bright light on a series of obscure names (cp *Crit. Bib.*). And no one can fail to see at once how easily Zarephath might be miswritten as PUT (Gen 10 6) and as ZEPHATH (*qq.v.*). The difficulties of the narrative in Judg. 1 17 are considered elsewhere (HORMAH). It may, however, be pointed out again that the starting-point of the Judahites was Kadesh-'barnea' (see JERICHO, § 2). There is a place on the way to Hormah, or rather Raḥamah (see HORMAH), which they would naturally attack in passing; it is *Ṣebaita*[2] (24 m. NNE. of 'Ain Ḳadis). The ruins (of the Byzantine period) are imposing; doubtless they stand on the site of much older cities. At the entrance of the only pass by which Ṣebaita can be approached is a ruined fort on the top of a hill; this was probably an appendage of the ancient Zephath, which in spite of the imperfect phonetic correspondence of the names must be the Zephath or Zarephath of the OT.[3] We can now fully understand the journey of Elijah related in 1 K. 17 9.

[1] See NEGEB, § 2. 1. The commentators treat the difficulty of 'the land of the Philistines' too lightly. The view here adopted is that by an error of the scribe צרפ has become פלש.

[2] We might also think of Mesraifeh, N. of Ṣebaita, but this is geographically less plausible. Least probable of all sites is the Naḳb eṣ-Ṣafā, SE. of Kurnub, though this commended itself to Robinson (*BR*(2) 2 181). See Trumbull, *Kadesh-Barnea*.

[3] See Palmer, *Desert of the Exodus*, 371 *ff.*; Rowlands, the discoverer of the site, took the same view (G. Williams, *Holy City*, 1 464); also Furrer (Riehm, *HWB*(2) 654 *f.*).

It is an easy day's journey from Ruḥeibeh (REHOBOTH, MT's 'Cherith') to Ṣebaita, though Palmer was accidentally delayed.

Possibly the name Zarephath, as applied to a Phœnician town, appears under the disguise of MISREPHOTH-MAIM in Josh. 11 8 13 6.

The Phœnician Zarephath is the Zarputa of the Egyptian Pap. Anast. 1 (*RP*(1) 2 110), and the Sariptu of the Taylor inscription of Sennacherib (*KB* 2 90). Mühlau (*HWB*(2), 1814) supposes glass-manufacture to have flourished at Zarephath; Masius (in Poole's *Syn.*) thought of the smelting of metals. The modern name of Zarephath is *Ṣarafend*, which is now about a mile from the coast, but was on the shore in the time of the Crusaders. See Rob. *BR* 2 475; Thomson, *L. and B.* 160 *ff.* Cp PHŒNICIA, §§ 4, 6.

In 2 S. 8 3 12 10 6 8 we hear of a 'Hadad-ezer, . . . king of Zobah,' whose realm we must suppose to have been either in Syria or in N. Palestine (see ZOBAH). It is however, somewhat more probable that צובה (Zobah) is a mutilated and corrupt form of צָרְפַת, Ṣārefath. The name Hadad-ezer for a N. Arabian king is perfectly credible. The 'images' of the Zarephathites (not 'Philistines') are spoken of in 2 S. 5 21 (an old narrative).

An obscure passage in Judg. 17 7 becomes more significant if we suppose a reference to Zarephath. The young Levite there spoken of is described as 'out of Bethlehem-judah, of the family of Judah.' As Budde rightly sees, there is something wrong here; he would correct 'Judah' into 'Moses' (cp 18 30). More plausibly we may read 'from Beth-jerahmeel, from Zarephath of Judah' (ירחמאל for לחם יהודה, and מצרפת for כמשפחת; cp משרפות for צרפית in Josh.). Tradition seems to connect the Levites with Kadesh, which was not far from Zarephath. For other supposed disguises of Zephath or Zarephath, see SHAPHAT, TISHBEH; cp also MICAH, BOOK OF, § 4 (*f.*); MEARAH; MISREPHOTH-MAIM, TIRZAH, ZARETHAN. T. K. C.

ZARETHAN, RV of (*a*) Josh. 3 16 (*b*) 1 K. 4 12 (*c*) 7 46. The same name is clearly represented by ZEREDAH (*d*) 2 Ch. 4 17 and (*e*) 1 K. 11 26, probably also by ZERERAH (*f*) Judg. 7 22. In (*a*) and (*c*) MT has צָרְתָן; in (*b*) צָרְתָנָה (locative), AV ZARTHANAH; in (*d*) צְרֵדָתָה (locative); in (*e*) הַצְּרֵדָה. 𝔊 in (*a*) gives *καθιαιρειν* [B], *καριαθιαρ*[ε]*ιμ* [AFL], which Hollenberg[1] takes to be a development of *σαρθαν*; (*b*) *σεσαθαν* [B], *εσλιανθαν* [A], *σαρθαν* [L]; in (*c*) *σειρα* [B], *σιαραμ* [A], *σαρθαν* [L]; in (*d*) *σιρδαθαι* [B], *σαδαθα* [A], *σαριδαθα* [L]; in (*e*) *ἡ σαρειρα* [BL], *ἡ σαριδα* [A], and in the long additional passage 𝔊BL twice has *σαρειρα*.

Let us assume provisionally the correctness of the textual readings, and consider the geographical bearings of (*a*) (*d*) and (*f*). From (*d*), which corresponds with (*c*), it is plain that the Chronicler, or the compiler from whom he drew, identified Zarethan and Zeredah. From (*f*) we may at least infer that Zererah (?) lay to the S. of Abel-meholah. A more definite result is gained from (*c*), where (if the text is in the main correct) it is stated that Zarethan was situated near Succoth in the Jordan valley. From (*b*) no inference is possible in the present state of the text.

1. Josh. 3 16 etc.

A still more important passage is Josh. 3 16 (*a*). We learn from it that Zarethan lay beside the city called Adam or Adamah (see ADAM, i.). Between Adam or Adamah and Succoth this passage (see JERICHO, § 4), together with 1 K. 7 46, suggests that there was a ford by which the main road crossed the Jordan, and such a ford there is near the Jisr ed-Dāmieh, at the confluence of the Jabbok and the JORDAN (*q.v.*, § 7). We must therefore at any rate reject all forms of the theory that Zarethan, which lay 'beside' that city, was in the vicinity of Beth-shean.[2] More acceptable geographically is the view of Van de Velde, who connects Zarethan with the lofty Ḳarn Ṣarṭabeh (the סרטבא of the Mishna),[3] the great landmark of the Jordan valley, W. of Jisr ed-Dāmieh. To this we shall return presently.

We pass on to the difficult passage marked above as

[1] *Der Char. der Alex. Uebers. des B. Jos.*, 17.

[2] In *PEFQ*, 1874, p. 182, Conder finds a trace of the name in the 'Ain Zahrah and the Tulūl Zahrah, 3 m. W. of Beisān. At this point the opposite cliffs approach so closely that a blockage of the river (such as a shock of earthquake might occasion) would leave its bed temporarily dry. Tyrwhitt Drake (*PEFQ*, 1875, p. 31) thought of Tell Sarēm, 3 m. S. of Beisān; but he relied on 𝔊A's corrupt reading *σιαραμ* in 1 K. 7 46.

[3] *Rōsh ha-Shānah*, 2 3; cp Neubauer, *Géog. du Talm.* p. 42

(*e*). It is plausible to infer from the fact that 𝔊^L places Jeroboam's residence at the time of his son's illness at σαρειρα, whilst MT gives the name as Tirzah (1 K. 14 17), that the true name of Jeroboam's city was Tirzah. It is very possible, however, that both Zererah and TIRZAH (*q.v.*) conceal some other name, and if our view of Solomon's reign and of the extraction of Jeroboam is correct (see SOLOMON), the name underlying them is ZAREPHATH (*q.v.*). This would not, however, justify us in substituting at once Zarephath for Zarethan in (*a*), (*b*), (*c*), (*d*), and (*f*.). The text of these passages urgently needs to be examined with a more searching criticism. The claims of the Ḳarn Ṣarṭabeh deserve at least a hearing (cp JERICHO, § 2), and if this site be adopted Abel-meholah will probably be the oasis of Ḳarāwa, N. of Ṣarṭabeh. See JERICHO, § 2. It is not necessary to assume that Ṣarṭabeh and Ṣarethan are connected as names. The question is purely geographical.

2. 1 K. 11 26 etc.

Ḳarn Ṣarṭabeh is thus described,

3. Ḳarn Ṣarṭabeh.

'The top of the mountain is a cone, artificially shaped, and some 270 ft. high. On all sides but the west this is practically unapproachable; on the west a trench has been cut, and the saddle thus made lower.' 'The ruins on the summit consist of a central structure with a surrounding wall, and of an aqueduct with cisterns. An old road leads up from the south, with rock-cut steps in one place.' 'The general appearance of the place is that of a fortress.' (*PEFM* 3 396 *f.*)

We must not, however, treat this as more than a provisional and (in spirit) conservative conjecture, and it may be permissible to refer in advance to the treatment of passages containing Zererah in *Crit. Bib.* See also SUCCOTH, and cp Buhl, *Pal.* 181.

T. K. C.

ZARETH-SHAHAR (צֶרֶת הַשַּׁחַר), Josh. 13 19 AV, RV ZERETH-SHAHAR (*q.v.*).

ZARHITES (הַזַּרְחִי), Nu. 26 13 AV. See ZERAH, 1.

ZARTANAH (צָרְתָנָה), 1 K. 4 12 AV, RV ZARETHAN (*q.v.*).

ZARTHAN (צָרְתָן), 1 K. 7 46 AV, RV ZARETHAN (*q.v.*).

ZATHOE, RV **Zathoes** (ΖΑΘΟΗϹ [BA]), 1 Esd. 8 32 = Ezra 8 5. See JAHAZIEL, 5; SHECHANIAH, 3; ZATTU.

ZATTU (זַתּוּא; ΖΑΘΘΟΥΑ [AL], ΖΑΘΟΥΙΑ [Bℵ]).

The b'nē Zattu, a family in great post-exilic list (see EZRA ii. § 9, § 8 *c*), Ezra 2 8 (reckoned at 945; ζαθουα [B]) = Neh. 7 13 (reckoned at 845 [840 B]; ζαθθουεια [ℵ]) = 1 Esd. 5 12, **Zathui** (ζατου [B], ζαθθουι [A]); represented among the signatories to the covenant (see EZRA i. § 7), Neh. 10 14 [15], AV **Zatthu** (ζαθθουια [A], -θθαιας [L]), and in the list of those with foreign wives (see EZRA i. § 5 end), Ezra 10 27 (ζαθουα [A]) = 1 Esd. 9 28, ZAMOTH (ζαμοθ [BA]). The name is to be restored in the list of families in Ezra's caravan; see JAHAZIEL, 5.

ZAVAN (זַעֲוָן), 1 Ch. 1 42 AV = Gen. 36 27, ZAAVAN.

ZAZA (זָזָא, § 58; abbrev., cp ZIZA; ΟΖΑΜ [B], οζαζα, ? ὁ ζαζα [A], ζηιζα [L]), b. Jonathan, a Jerahmeelite (1 Ch. 2 33†). See JERAHMEEL, § 2 (*c*).

ZEALOT (Ο ΖΗΛΩΤΗϹ), the Greek equivalent of the Semitic Ο ΚΑΝΑΝΑΙΟϹ (see CANANÆAN). Apart from the use of the word in a theological sense (cp *e.g.* 1 Cor. 14 12, ζηλωταὶ πνευμάτων [= πνευματικῶν], zealous, or emulous, of spirits [= spiritual gifts]; and the OT use of קַנָּא, *kannā*, of God's zeal for the keeping of the law, etc., Ex. 20 5 34 14), it is applied distinctively to a sect whose tenets are virtually identical with those of the ASSASSINS (*q.v.*), of whom they are indeed the forerunners. As such it occurs only twice in the NT (Lk. 6 15 Acts 1 13, AV ZELOTES) with reference to SIMON (*q.v.* no. 5]). For Καναναῖος see Mt. 10 4 Mk. 3 18.

Of this sect JUDAS of Galilee was at one time a leader. Against the view that the author of the *Assumptio Mosis* was a zealot (Schür. *GVI* 2635), see APOCALYPTIC LITERATURE, § 65.

ZEBADIAH (זְבַדְיָה, זְבַדְיָהוּ), properly an expanded N. Arabian clan-name [Che., see ZABDI, and cp ZABDIEL], though susceptible of the religious explanation, 'Yahwè has bestowed,' cp Jehozabad, § 27; ζαβαδια [BℵAL])

1, 2. Assigned to the Benjamite (see BENJAMIN, § 9) clan BERIAH (1 Ch. 8 15, αζαβαβια [B], . . . δια [A]), but in *v.* 17 to ELPAAL. The context probably refers to the Negeb. The names are very nearly all unmistakably Jerahmeelite; 'Gath,' as often, may have grown out of a mutilation of 'Rehoboth' (Che.).

3. b. Jeroham of Gedor, one of David's warriors (1 Ch. 12 7, ζαβιδια [B]). See DAVID, § 11 (*a*) iii.

4. b. Asahel, one of David's captains (1 Ch. 27 7, αβδειας [B], ζαβδιας [A], -δαιας [L]). See DAVID, § 11 (*c*) i.

5. b. Ishmael, ruler of house of Judah (2 Ch. 19 11, ζαβδ[ε]ιας [BA], ζαβαδιας [L]). Possibly originally the same as

6. The Levite who with others was sent to the cities of Judah with the book of the תורת יהוה (2 Ch. 17 8, ζαβδ[ε]ιας [BAL]). The neighbouring names suggest connection with the Negeb (Che.).

7. b. Meshelemiah, a Korhite (1 Ch. 26 2, ζαβαδιας [AL], ζαχαριας [B]).

8. b. Michael, one of the b'nē Shephatiah, a post-exilic family, Ezra 8 8 (ζαβδεια [B], -διας [A], -διου [L]); in 1 Esd. 8 34 ZARAIAS (ζαραιας [B] om. A, ζαβδιας [L]).

9. b. IMMER [*q.v.*] (Ezra 10 20, ζαβδ[ε]ια [BℵA], -διας [L], in 1 Esd. 9 21 ZABDEUS (ζαβδαιος [BA], αβασιας [L]).

ZEBAH (זֶבַח, ΖΕΒΕΕ [BℵARTL]; 'victima, sive hostia,' Jer. *OS* 49 9) a Midianite king or chieftain, mentioned with Zalmunna in the story of Gideon (Judg. 8 5-21; cp Ps. 83 11 [12]). Just as Zalmunna corresponds to Oreb (the vowels in both names are unoriginal) in the parallel narrative, so Zebah corresponds to Zeeb.

The originals of the two former names are probably Ishmael and 'Arāb; the common original of the two latter may be Zebīb 'the long-haired.' See GIDEON, OREB, ZALMON, 2, ZALMUNNA.

T. K. C.

ZEBAIM (הַצְּבָיִים), for 'Pochereth of Zebaim,' Ezra 2 57 AV. RV has POCHERETH-HAZZEBAIM (*q.v.*).

ZEBEDEE (ΖΕΒΕΔΑΙΟϹ [Ti. WH], § 52;—*i.e.* זבדי, see ZEBADIAH), of Galilee, the father of James and John (Mt. 4 21 etc.).

ZEBIDAH (זְבִידָה, Kt.), 2 K. 23 36 RV, AV ZEBUDAH (*q.v.*).

ZEBINA (זְבִינָא, as if 'bought,' from Aram. זבן, § 83, cp Palm. מזבנא,[1] but perhaps really a popular corruption of ישמעאל [the ל in which name is often corrupted in the mouth of the people into ן (Che.)]; cp also Ass.-Aram. זבנא; Hilprecht gives the Jewish name Zabīnā from Nippur, fifth century; ζαυβινα [B], ζαμβεινα [ℵ], om. A, ζεβεννει [L]), one of the b'ne Nebo (*i.e.* Nadabu?—see NEBO iii. 2) who joined in the league against alien marriages; Ezra 10 43.†

ZEBOIIM or **Zeboim** (צבאים, צביים, צבים, Kt.; צְבוֹיִם Kr. always) Gen. 10 14 Dt. 29 Hos. 11.† See ADMAH AND ZEBOIM.

ZEBOIM. 1. The valley of Zeboim (גֵּי הַצְּבֹעִים; ΓΑΙ ΤΗΝ ΣΑΜΕΙΝ [B]; om. A; ΓΑΙΑΝ ΤΗΝ ΣΑΒΑΙΝ [L]), a locality, apparently E. of Michmash, mentioned in the description of the path taken by one of the plundering bands of the Philistines (1 S. 13 18). The passage should perhaps read thus, 'another band took the direction of the Gilgal[2] which looks down upon the valley of Zeboim toward the wilderness.' The 'wilderness' is thought to consist of the summits and precipitous sides of the mountains between the central district of Benjamin and the Jordan valley. There Grove, in 1858, found a wild gorge bearing the name of *Shaḳḳ-ed-Ḍabā'*—*i.e.*, 'ravine of hyænas,' which exactly corresponds to the Hebrew name. Up this gorge, which is N. of the point at which the *Wādy el-Ḳelt* enters the Jordan valley, runs the path by which Grove was conducted from Jericho to *Mukhmās* (Smith's *DB*(1) iii. 1819). Marti however (*ZDPV* 7 125 *ff.*), thinks of the *Wādy Abu Ḍabā'*, a lateral valley which joins the *Wādy el-Ḳelt*

[1] See Cook, *Aram. Gloss.* 71, who also quotes the Gk. form μεζαββανας. The initial מ may remind us of the initial מ in משלם and משלמיה (see MESHULLAM, MESHELEMIAH).

[2] MT has הַגְּבוּל 'the border,' but this does not suit the following participle. Hence some (We., Dr., Ki., Bu.) read הַגֶּבַע, rendering 'the hill,' and with doubtful justice claiming to follow 𝔊. But can גבע be so rendered? H. P. Sm. reads הגבעה (γαβεε [B], την γαβαα [L]), but הנשקף is masc. הגבול probably comes from הגלגל (1 S. 13 4 15), which is itself most probably a corruption of ירחמאל. See RACHEL'S SEPULCHRE.

from the S., and makes the plausible suggestion that in ancient times the present *Wâdy el-Kelt* bore the appellation 'Valley of hyænas,' which now survives only in smaller gorges. Cp G. A. Smith, *HG*, 291; Buhl, *Pal.* 98.

2. A Benjamite town or village, Neh. 11 34† (צְבֹעִים; om. BℵA; σεβοειμ [ℵca. mg. inf.]; σεβωειν [L]), mentioned between Hadid and Neballat. T. K. C.

ZEBUDAH (זְבוּדָּה, Kr.; 'given [by God],' § 56), as AV, or ZEBIDAH (זְבִידָּה, Kt. which Vg. and Pesh. follow), as RV, mother of Jehoiakim, 2 K. 23 36† (ιελλα [B]; ειελλαδαφ [A]—*i.e.*, JIDLAPH [*q.v.*]; αμιταλ [L]—*i.e.*, HAMUTAL [*q.v.*]; in 2 Ch. 36 5, however, 𝔊BA gives the name as זְכוּרָה = Zaccurah ζε[κ]χωρα; αμιταλ [L]).

Hilprecht quotes a Jewish name Zabūda on a tablet from Nippur (5th cent. B.C.). It is tempting to explain the name 'one given [by God].'

Some, however, of the names of this form (§ 56) clearly have a gentilic meaning, and Jehoiakim's mother (like several other queen-mothers) came from the Negeb (see RUMAH). T. K. C.

ZEBUL (זְבֻל, ζεβουλ [BAL]), a Shechemite, the 'ruler' (שַׂר) of the city in the time of Abimelech, represented in the artful speech of Gaal as a mere officer (פָּקִיד) of the king, Judg. 9 28 *ff.* See ABIMELECH, GAAL, and cp We. *IJG*, 27.

See also SHECHEM, § 2; 'Zebul' is a possible corruption of 'Ishmael.'

ZEBULUN, but ZABULON in AV of Mt. 4 13 15 and Rev. 7 8 (זְבֻלוּן, Zĕbūlûn, eighteen times, especially in

1. Name: application.

Ch. Is. Ps.; זְבוּלֻן, Zĕbûlūn, twenty-six times; זְבוּלוּן, Zĕbûlûn, Judg. 1 30†; ζαβουλων [BAL]; Josephus also της ζαβουλης [*Ant.* v. 7 14, § 272], ζαβουλου [gen., ix. 13 2, § 267]; gentilic זְבוּלֹנִי, ζαβουλων[ε]ιτης [BAL Jos.], **Zebulunite**, Nu. 26 27, but **Zebulonite**, Judg. 12 11 *f.*). A late writer adds the name of Zebulun in his reference (Is. 8 23 *b*) to the deportation of Tiglath-pileser described in 2 K. 15 29 (see NAPHTALI, § 3). The 'land of Zebulun,' he says, had shared the dark fate of the 'land of Naphtali.' Only in one other place, however, do we hear of a land of Zebulun (see § 7). The real territorial name may have been Naphtali (see NAPHTALI, §§ 2, end, 4). One of the sources of Josh., indeed, seems to have known of twelve towns (Josh. 19 15 *b*)[1] which were regarded as Zebulunite. Whether, purposely, however, or accidentally, only five of the names have been preserved (see § 9 i.).

Even the form of the name is rather uncertain. In the Hebrew consonantal text it is spelled in three ways

2. Form.

(traditionally vocalised Zĕbūlûn, Zĕbûlūn and Zĕbûlûn: see above, § 1, begin.), the first of which would suggest a form Ziblôn like Shim'ôn, SIMEON (*q.v.* § 8). MT, however, vocalises them alike, with a full vowel between the last two radicals: zĕbūl.

i. The word *zebul* (Ba. *NB* 129) without the nominal termination, is always written זְבֻל, zĕbul (without ו), like יְסַר נְאֻם, whereas גְּבוּל as constantly has the ו. The *scriptio defectiva* may, however, be simply because zebul was an archaic word. Even if the old pronunciation was zĕbul (not zĕbūl), which would according to traditional pronunciation have given zĕbōl (like סְגֹר etc.), the addition of the termination to zĕbōl would give zĕbūl-, just as mānōs becomes mĕnūsāh. On the other hand, if the second vowel was *o*, the name might be from zubāl; cp Zubāla, a place in lat. 29½, 18 *mils* from el-Ḳā' in the Jauf (D. H. Müller, *Hamdâni's Geog. Südarabiens*, 183 24 *f.*).

ii. Names ending in *-ōn* are common (see SIMEON, § 8, and cp ZION). Not so names in *-ūn*. Jĕshūrūn and Jĕdūthūn are no doubt exactly parallel; but till the literary history of those words is more firmly established they afford no sure basis for comparison.[2]

Unless the -ōn of the Greek Zaboulōn is due to assimilation to the Greek termination of that form, which is unlikely, since the *o* is preserved in the Greek form of the gentilics (see § 1, begin.), the name must in the second century B.C. have been pronounced Zabūlōn. It should be noted, however, that Josephus twice gives the name without the termination *-on* (see above, § 1, begin.). Moreover, would not an original ôn have become ēn (cp REUBEN, § 9 i.)?

If the name was pronounced at all like Zĕbūlōn it is difficult not to connect it with the divine name Baal-

3. Meaning.

zebul (see Skipwith, *JQR* 11 242 [1899], and cp BAALZEBUB, § 3); cp the Punic name (fem.) בעלאזבל (*CIS* i. 158 1 *f.*, from Tharrus), and שמזבל (inscription from Citium, l. 4: Nöld. *ZA* 9 400-405), and see below, § 6. If the noun ZBL designates a lofty mansion, especially for a god (see § 4), it is difficult not to think of the mountain referred to in Dt. 33 19 (see § 6), especially as the mountain names Lebanon, Sirion, Hermon all end in -ōn (cp Jebel Ḥaurān and Zion). Zebulun would then be, in a modified sense, a geographical name, like Ephraim and, perhaps, Naphtali.[1] Of course there is no suggestion of that kind in Gen. There we seem to have, as often,

4. OT explanations.

two 'explanations' of the name (Gen. 30 20). Yahwè had presented Leah (29 *a* α) with a noble gift (*zĕbed*, as if the name were Zĕbūdōn [E?]); or her husband (*bá'al*), in consideration of Leah's having presented him with a sixth son, would act (29 *a* β) in a certain way: MT יזבלני (transliterated by Jerome *iezbuleni*), the meaning of which is uncertain, as the verb occurs nowhere else.

𝔊 gives αἱρετιεῖ (which usually renders בחר, 'choose,' but sometimes חמל, 'spare,' חפץ, 'delight in'), of which Jerome says: LXX interpretati sunt *diliget me*; cp Eth. *yāfaḳerani*, 'will love me'; Josephus, 'one born as a pledge of benevolence to me' (ἠνεχυρασμένον εὐνοίᾳ τῇ πρὸς αὐτήν: *Ant.* i. 19 7, § 308). Aquila, however, has συνοικήσει μοι, which is followed by Jerome himself, 'habitabit mecum'; cp Pesh. *nethnakkeph lī*. 'will adhere to me.'

EV, following Vg., renders 'will dwell with me'; and this rendering is retained silently by Gunkel (*Gen.*(2) [1902] *ad loc.*), also by Ball (*SBOT ad loc.* [1896]). Other recent writers,[2] however, have adopted the suggestion of Guyard (*J. As.* 1878, *b*, pp. 220-5), that יזבלני is to be explained by Ass. *zabâlu*, which usually means 'carry,' 'bring' (cp Ar. *zabala*, Syr. *sĕbal*), but sometimes apparently lift up.[3]

If *zabal* meant 'lift up' in Hebrew, יזבלני in Gen. 30 20 would mean 'will honour me.' The person indeed, writer or copyist, to whom we owe the present text of Gen. 49 13 seems to have given ZBL its now traditional meaning of 'dwell' (cp ישכן); on the other hand לסבל in *v.* 15 (Issachar) suggests the Assyr. zabâlu (see next §, mid.).

The history of the district inhabited by Zebulun was eventful enough (cp NAPHTALI, § 3, ISSACHAR, §§ 4-6,

5. References.

GALILEE, § 2, JIPHTAH-EL). It felt the heavy tread of Thothmes III. (see the list of places, above, col. 3546), and became a part of the Egyptian empire. Burna-Buryaš, the Babylonian king (about 1400), regarded the district as in the Pharaoh's (Amenhotep IV.) land, and complained to him that his agents had been maltreated at Ḫi-in-na-tu-ni (see HANNATHON); and letter 196 tells that its governor had rescued Lapaya and sent him home (31 *f.*).

1 So MT and 𝔊L; 𝔊BA avoids the resulting discrepancy by omitting the clause.

2 Hommel finds names in *-ūn*, apart from such names as Haldūn, in S. Arabia: Ḳaidūn, Saywūn (Glaser: Hommel, *Auf. u. Abhandl.* 99), but only from √y roots.

1 For Land's explanation of a confessedly difficult name see below.

2 For example Cheyne (*Isa.* 2 160 *f.* [1882]), Delitzsch (*Heb. Lang.* 38 *f.* [1883] = *Prol.* 62 *f.* [1886]), Schrader (*KAT*(2) *ad loc.* [1882]).

3 Delitzsch cites 5 R 42 *a-b* 43 *zubbulu ša* GAB (= *irtu*), 'the lifting up of the breast.' Moreover the 'lofty temple' of Marduk at BABYLON (*q.v.*, § 5) was called E-sag-ila, of which SAG-IL is equated on the one hand to the Assyrian phrases *ri-ša-an e-la-tum* (2 R 30 14 *gh* [cp Br. 6146]), 'high points'; *na-šû-ú ša ri-e-ši* (2 R 26 59 *c* [cp Br. 6148]), 'lifting up the head,' *ša-ḳu-u ša ri-ši* (2 R 30 3 *a* [cp Br. 3614]), and on the other hand to *zabal* in the phrase *i-na za-bal ra-ma-ni-šu* (2 R 15 45 *e* [Brün. 3415]). Muss-Arnolt compares 2 R 47 *a-b* 13 where *ma-ḫir da-'-tu*, 'receiver of a bribe,' is equated with *šarru za-ab-bi-lu*: see *Beitr. z. Ass.* 2 280. Guyard's suggestion was contested by Halévy (*REJ*, 1885, *a*, p. 299, 1887, *a*, p. 148); cp also Nöldeke, *ZDMG* 40 729.

What elements were united in the population of the district in the times referred to in the earliest notices in the OT we cannot say. On a famous occasion they are said to have manifested a noble valour (Judg. 5 20) led by their leaders (*v.* 14*b*).[1] Cp also 46 10, and see NAPHTALI, § 3. According to J (Judg. 1 30) Zebulun was not able to expel the Canaanites from Kitron and Nahalol (§ 9 i.); but they had to join the labour gangs.[2] It should be noted, however, that whilst a similar statement is made about the Naphtalite Canaanites in *v.* 33, in Gen. 49 15 the subject of the sentence is an Israelite tribe (cp below, n. 3): it is the Issacharites themselves that join the gangs. Or should the last couplet of *v.* 15 (Issachar) belong to *v.* 14 (Zebulun)? לסבל 'to bear' (or should we read לזבל) would then be a play on the name Zebulun, if זבל in Hebrew really meant 'to carry' (cp above, § 4, end). Moreover it is not at all certain that the subjects to the various verbs in Judg. 1 27-36 are original; they may in some cases be incorrectly supplied.[3] We cannot tell how the newcomers came to terms with those who were already in possession. According to the 'Blessing of Jacob' indeed Zebulun plants himself on the sea coast (Gen. 49 13). At a much later time, too, 'the way of the sea' (דרך הים) is a synonym for Zebulun or Naphtali. In Judg. 5 17 the saying is transferred to Asher (cp Gunkel, *Gen.*(2) 425). The ideas which underlay these statements are lost to us.[4] The transit traffic was no doubt important. On the *via maris* from Damascus across the upper Jordan at Jisr el-banāt and down through Galilee to the coast see Schumacher, *Jaulan*, 55, and *PEFQ*, Ap. 1889, p. 78 *f.*, GASm. *HG* 425-30. This same overland traffic may be what is referred to in the grandiloquent terms of the saying in the 'Blessing of Moses' (Dt. 33 18 *f.*):

'The abundance of the seas do they suck
And the hidden things of the sand. . . .'[5]

No doubt the *Testament* of Zebulun has much to tell about successful fishing, and Targ. Onk. speaks even of subduing provinces with ships,[6] whilst Talm. *Shabb.* 26, refers to the wealth derived from traffic in purple dyes (cp the Issacharite TOLA and PUAH: see ISSACHAR § 7), to which Targ. pseudo-Jon. adds the making of glass. The view suggested above, however, is perhaps more historical. Stucken, accepting the references to maritime life, connects Zebulun with the sign Capricornus (*MVG*, 1902, p. 189).

Dt. 33 19*a*, on the other hand, contains a couplet (see next §) which suggests that the population was mixed. The Aramæan element must have become strong. There would no doubt, however, be a strong Israelite party. It seems to have been able to make its voice heard (see JONAH, GATH-HEPHER). On the possibility that 'a greater than Jonah' also came from a Zebulunite town see NARARETH. The connection of Galilee with Judæa in later times (see GALILEE, § 3, NAPHTALI, § 3) seems to be reflected in Ps. 68 27 [28] (chiefs of Zebulun, chiefs of Naphtali).[7] On Zebulunite 'judges' see below, § 7.

How Dt. 33 19*a* was meant to be read is uncertain; but it appears to tell of comings of many to some mountain[1] where sacrifices were offered. If there was a religious fair, not at all an unlikely thing,[2] it would explain the inflow of wealth. What the mountain referred to is it is impossible to guess (cp ISSACHAR, § 2):[3] we may only be sure that it was not, as the Targum imagined, Zion. It must have been some mountain not far from Esdraelon. Was it perhaps the mountain where in the Elijah story the sacrifices were offered? Was the Baal whose defeat was witnessed by Ahab known as Baal-zebul? Ahab's wife is said to have been called Jezebel. His son, too, when ill sent to inquire of Baal-zebul. No doubt, as the story now reads, Baal-zebul was the god (𝔊L + προσόχθισμα = שִׁקּוּץ) of Ekron. That, however, may be a gloss (or does Ekron come from Jokneam, on the edge of Carmel?): we have no knowledge anywhere else of such a god at Ekron. The embellished tale of Elijah calling down fire on the messengers may be a very late accretion (Be. Ki.); but the mountain on which the prophet (originally Elisha?) was said to have been found sitting by the messengers of the oracle-seeking king must surely have been some well-known sacred eminence. May it not have been the height of Baal-zebul? And may that not have been the mountain of Zebulun of Dt. 33 19*a*?

6. Cults.

Baal-zebul would then naturally suggest the Baal-lebanon of *CIS* 1 5, which Jensen identifies with the god Amurru, 'lord of the mountain' (*bêl Šadi*: *ZA* 11 305)—the Aramæans expressly say that Ahab's god is a 'god of the mountains' (אלהי הרים)—a west-Semitic form of the storm-god Rammân. Rammân, in fact, shares with Šamaš the title of *bel-biri* (5 R 63 2, 35*b*), 'oracle-god,' and as 'god of the storm-flood' (*bêl abûbi*) he wields both the lightning (1 K. 18 38) and the axe (cp 2 K. 6 4-7 ?) (Zimmern, *KAT*(3) 433 447 *f.*). When Elisha is hard pressed by the Aramæans it is 'the mountain'[4] that is seen to be full of chariots of fire (2 K. 6 17). Was it, in the original form of the story, earth from that sacred mountain that the Rimmon-worshipper wanted (2 K. 5 17) to insure his success (2 K. 5 1 αβ)? That the holy mountain was identified locally need not prevent the prevalence of a less concrete, more mythological, idea (SINAI, CONGREGATION [MOUNT OF], BAAL-ZEBUB).

Of the place-names connected with Zebulun Rimmon is not the only one to suggest a religious cult. On a possible connection of Bethlehem[5] with Laḫamu, see ELHANAN (§ 2, end). On suggested traces of 'Athè and Ḳaṣin see ETH-KAZIN. Cp von Gall, *Altisrael. Kultstätten*, 124-126.

How much significance, if any, is to be attached to the fact that Zebulun is classed with Issachar as a Leah tribe whilst Naphtali goes with Dan as a Bilhah-Rachel tribe, is disputed (see RACHEL, § 1, ZILPAH, § 2 *f.*, and cp TRIBES, §§ 11 *ff.*). The Bilhites, Naphtali and Dan, may have been regarded as farther from the centre; they were not in historical times of any importance. Zebulun, indeed, is not much more prominent. None of the great actors in the Palestinian drama is assigned to the tribe (see, however, § 5 end). Its brother tribe, however, may have played some part in the history of Israel (see ISSACHAR, § 4): it is mentioned before Zebulun not only in the story of Jacob's family but also in most of the lists of the tribes. It is rather remarkable, therefore, that the order is reversed in five more important passages: the three poetical pieces (Judg. 5 Gen. 49 Dt. 33), and the two places dealing with the partition of Canaan (Nu. 34 19-29

7. A Leah-tribe.

1 Credit is given them for a share in another struggle (Gideon-Jerubbaal) in the present text of Judg. 6 35*b*, but not in 7 23.

2 מס is the gang of the corvée, not the labour. Cp conversely the Assyr. idiom *amêl za-bi-il ku-du-ri* used of the corvée, not the gang.

3 Cp for example how Targ. Jer. has inverted the saying in Gen. 49 15*b* referred to above.

4 Gen. 49 13 has been emended and will be emended again and again. It seems to contain doublets. וְהוּא is hardly possible.

5 Bertholet suggests that וּשְׂפֻנֵי represents a verb, preserved in 𝔊's κατοικούντων = שֹׁכְנֵי, viz., the verb כנש = כנס, 'gather.' Ball had suggested ושפכו ('pour out') or וימצו ('drain'). What 𝔊's ἐμπόρια (for טְמוּנֵי) represents is not clear; Cheyne (*Exp. T* 10 238 *f.*) suggested רְכֻלַּת (wrongly for רכל, whence MT חול). He restored: 'And the treasures of merchants shall they suck.'

6 Pesh. finds ships mentioned in Gen. 49, and Ball there (*PSBA* 17 167 *f.* [1895]) and in Dt. 33 (*PSBA* 18 129 *f.* [1896]).

7 The flattering account of the tribal eponym in Test. 12 Patr. (Zebulun) is remarkable.

1 For הר 𝔊 reads ἐξολοθρεύσουσιν—*i.e.*, either הדף (Josh. 23 5 †) or החרם (often), or (Ball) הריש—but the Greek text is not to be preferred.

2 Cp C. H. Graf, *Der Segen Moses*, 46; on religious fairs cp Sprenger, *Alte Geog. Arab.* 223 *f.* Unfortunately we have little direct information about the visitations of sanctuaries at a distance. There was probably a good deal of it. Cp 'Dan to Beersheba,' *Expositor*, 5th ser., 8 411-421 (1898).

3 It may be noted, however, that the boundaries of Zebulun, Naphtali, and Issachar are represented as having met at Tabor (cp TABOR, § 2). Cp Hos. 5 1, and see v. Gall, *Altisraelitische Kultstätten*, 124 *f.*

4 The scene seems in the present text to be laid at Dothan.

5 Dodo the Bethlehemite can hardly be supposed to belong to N. Palestine; otherwise the Zebulunite Bethlehem might be referred to in connection with the suggestion in ISSACHAR, § 2.

Josh. 19).[1] Cp ISSACHAR, § 1, end; TRIBES, § 10, iii.

On the assumption of the early arrival of Issachar and Zebulun, their being nevertheless 'younger' than the more southern tribes has been explained by Steuernagel as due to their arriving later at their final seat (*Einwanderung*, 33, *c*).[2] In fact he thinks he has found evidence that the Zebulunites settled in mid-Palestine for a time before moving northwards. The 'judge' Elon (Judg. 12 11 *f.*) is obviously the eponym of a city or clan (or both) Elon. In any case he is said to have been buried in a city the name of which is vocalised in MT as AIJALON (*q.v.*, 2), but should perhaps be ELON (*q.v.*, 2). No such town being assigned to Zebulun in Josh. 19 10-16, Steuernagel supposes that the Elon meant is the Elon assigned in 19 43 to Dan, and that the words 'in the land of Zebulun' were added to 'Elon' in Judg. 12 12 by a copyist who wished to exclude this very identification, which seemed to him obviously incorrect. Steuernagel, on the contrary, thinks that the excluded interpretation is correct, and therefore holds that Zebulun, like NAPHTALI (*q.v.*, § 1), halted in central Palestine for a time. He admits, however, that the identification he assumes is precarious. It is; moreover, the assertion that no town Elon is assigned to Zebulun in Josh. must be qualified by reference to the incompleteness of the list of towns (see below, § 9 *i*).

It has been customary to assign to Zebulun the 'judge' Ibzan on the ground of his being called a Bethlehemite. Winckler, however, holds that the Bethlehem intended is the southern town, which at that time would be a part of 'Benjamin' (see above, col. 2583 n. 1). On the other hand it is difficult to dissociate Ibzan (אבצן) from Ebez (אבץ : Josh. 19 20), a town assigned to Issachar (cp ABEZ),[3] between which and Zebulun there was probably no clear demarcation.

8. Genealogical.

P's genealogy of Zebulun is slight:[4] it contains three names[5]—Sered (or Seded?) and Jahleel, which we can hardly venture to distinguish from the towns Sarid and Nahalal of Josh. 19 10 15, in spite of the differences in the spelling,[6] and Elon, on which see above (preceding §). Gaddiel, too, the Zebulunite 'spy,' was perhaps assigned to one of these three (Sodi, סודי = סר(י)ד : Nu. 13 10).

Is Parnach, פרנך, the 'father' of Elizur the Zebulunite delegate to survey W. Palestine (Nu 34 25), a corruption of the same name? Helon (חלן) the 'father' of the Zebulunite census-delegate (Nu. 1 9 2 7 7 24 29 10 16) may come from Elon.

9. Geographical.

i. *Towns.*—Of the five towns remaining out of the list of twelve originally given as we have seen (§ 1) in Josh. 19 (*v.* 15), the only one that can be identified with certainty is BETHLEHEM (*q.v.*: *Bēt-Laḥm*, 7 m. NW of Nazareth). On the other four, of which Nahalal has been referred to (§ 8), and Shimron is of interest in connection with the Sa-me-na of Esarhaddon (see SIMEON, § 6 iii.), see KATTATH, NAHALAL, SHIMRON, and IDALAH. As often, two of the five (Kattath and Nahalal, called Nahalol) are probably the towns which J tells us Zebulun did *not* secure (Judg. 1 30). P adds the information that of forty-eight cities assigned to the Levites four were Zebulunite (Josh. 21 35): the Nahalal just mentioned, two of the towns to be referred to immediately (Jokneam, which, according to Josh. 19 11, did *not* belong to Zebulun, and Dimnah = Rimmonah) and KARTAH (Kartan in Josh. 21 32 is Naphtalite).

ii. *Boundary.*—According to Josephus (*Ant.* v. 1 22, § 84) the Zebulunites were settled as far as Gennesaret (μέχρι Γεννησαρίδος) and about Carmel and the sea. The delimitation of territory in Josh. 19 10-14 cannot be really made out. The line is given first westwards (*v.* 10 *f.*), and then eastwards (12 *f.*), of a place already referred to (§ 8) called Sarid in MT, which may be *Tell Shadūd* (see SARID). Westward the line is drawn past 'Dabbesheth' (see MARALAH, DABBESHETH) to the wādy that is before Jokneam (*Tell Kaimūn*). Eastward it is drawn to CHISLOTH-TABOR (*Iksāl*) and on to DABERATH (*Debūriyeh*), which belonged, according to 21 28, to Issachar, thence, if the text is sound and we do not suppose a fusion of two accounts, turning sharp W. to JAPHIA (*Yāfā*), only to recover a position N. of Iksāl but W. of Debūriyeh at GATH-HEPHER (*el-Meshhed*), and continue a course due N. (see ETH-KAZIN) to RIMMON [RV; 𝔊L om.] (Rummāneh) on the S. margin of the plain of Buṭṭauf, across which it continues (see NEAH, HANNATHON) to the 'valley of JIPHTAH-EL' (*q.v.*), somewhere near Tell Jafāt, due E. of Ḥaifa. The intention appears to be to give the southern and eastern boundary.[1] Real definite frontiers there cannot have been, as the discrepant data show (cp also ISSACHAR, NAPHTALI, ASHER). Generally, Zebulun must have lain NW. of Issachar, W. of the southern part of Naphtali, and S(E). of Asher. On the exuberant fertility and busy life of the country, see GASm. *HG* chap. 20, and cp GALILEE, § 4.

H. W. H.

[1] The accidental omission of Zebulun in 1 Ch. 2-9 and of Issachar in Judg. 1 27-36 may be in some way connected with this change of order.

[2] Land, on the other hand, speaking of the name Zebulun, 'the most difficult to explain,' says (assuming that *zābal* means 'dwell'), 'Can the tribe at some time or other have been so named by its neighbours or kindred because it had a fixed abode earlier than they?' (*De Gids*, Oct. 1871, p. 21, n. 1).

[3] Similarly Kartan is assigned in Josh. 21 32 to Naphtali, Kartah in *v.* 34 to Zebulun.

[4] On its omission in 1 Ch. 2-9 see above, n. 1.

[5] In Jubilees 34 20 Zebulun's wife is Nī'īmân [Eth.], Adni [Syr.]; the Bk. of Jashar gives Marusa (cp Charles, *Jub.* 206).

[6] For Nahalal = Jahleel cp Jemuel = Nemuel in REUBEN (§ 12).

[1] Is the omission of a western boundary to be connected in some way with the references to the sea in Gen. 49 14 Dt. 33 18 *f.*?

ZECHARIAH (זְכַרְיָהוּ, more often זְכַרְיָה, as if 'Yahwè remembers' [§§ 32, 52]; but the original form of Zechariah was probably Zichri, which (see ZICHRI) is a clan-name. A study of the names with which 'Zechariah' is grouped (*e.g.*, Meshelemiah, from Ishme'eli) strongly confirms this [Che.]; ζαχαρια[ς] [BℵAQL], whence the Græcised form ZACHARIAS [*q.v.*]).

1. b. Berechiah, b. Iddo (also loosely, b. Iddo), a prophet who, together with Haggai, is our best authority for the religious state of the early post-exilic community at Jerusalem, and is the author of Zech. 1-8. To these prophets the rebuilding of the temple is largely due (Ezra 5 1 6 14). It is probably this Zechariah who is mentioned as a *priest* in Neh. 12 16 (cp no. 11).

2. Son of Jeroboam II., king of Israel, and the fifth and last king of the house of JEHU (2 K. 14 29 15 8-12; AV ZACHARIAH, αζαριας [B in 14 29, A]). He reigned but six months, and was then slain by Shallum b. Jabesh in IBLEAM (*q.v.*). On the date of his accession, see CHRONOLOGY, § 34.

3. The father of Abi or Abijah, the mother of Hezekiah (2 K. 18 2, AV ZACHARIAH, ζαχχαιου [A]; 2 Ch. 29 1).

4. A chief of REUBEN (§ 13), 1 Ch. 5 7.

5. b. Meshelemiah a Korhite Levite, praised for his 'discreet counsel' (1 Ch. 9 21 26 2 14).

6. b. JEHIEL, of BENJAMIN (§ 9 ii. β), 1 Ch. 9 37, (ζαχχουρ [A], ζεχρει [L]), who in 1 Ch. 8 31 is called ZACHER, RV **Zecher** (זָכֶר in pause, ζαχουρ [B], ζακχουρ [A], ζεχρι [L]).

7. A Levite, a temple musician (1 Ch. 15 18 20 16 5), perhaps the same as (5).

8. A priest (1 Ch. 15 24).

9. b. Isshiah, a Levite (1 Ch. 24 25).

10. b. Hosah, a Merarite Levite (1 Ch. 26 11).

11. Father of Iddo, a Manassite (1 Ch. 27 21, ζαβδ[ε]ιου [BA]).

12. One of Jehoshaphat's commissioners for teaching the Law (2 Ch. 17 7). See BEN-HAIL.

13. An Asaphite Levite (2 Ch. 20 14). [=26, see MATTHANIAH.]

14. A son of Jehoshaphat (2 Ch. 21 2).

15. b. Jehoiada, a reforming chief priest in the reign

of Joash, who was stoned to death in the temple court, at the king's command (2 Ch. 24 20 *ff.*, αζαριας [BA] Jos. *Ant.* ix. 8 6; cp references in Jer. Talm. *Taanith*, 69 1 2, Bab. Talm. *Sanhedrīn*, 96 2, Lightfoot, *Temple-Service*, 36). It was a Jewish saying that the blood-stains were never washed away until the temple was burnt at the captivity. The Targ. on Lam. 2 20 ('Shall the priest and the prophet be slain in the sanctuary of Yahwè?') refers this especially to Zechariah, but through a confusion calls him the son of Iddo. On the possible reference to Zechariah's death in Mt. 23 35 Lk. 11 51, see ZACHARIAS (9).

16. A prophet who, according to the Chronicler, was as influential with Uzziah as the priest Jehoiada had been with Joash (2 Ch. 26 5). Probably 'in the vision of God' (*l.c.*) should rather be 'in the fear of God' (see RV$^{mg.}$)—*i.e.* for בִּרְאוֹת we should read בְּיִרְאַת (𝔊, Tg., Pesh., Ar., and some MSS). According to Hitzig the author of Zech. 9-11.

17. An Asaphite Levite (2 Ch. 29 13, αζαριας [B]).
18. A Kohathite Levite (2 Ch. 34 12).
19. A 'ruler of the temple' in the time of Josiah (2 Ch. 35 8); according to Bertheau, 'priest of the second order,' cp 2 K. 25 18 Jer. 52 24. In 1 Esd. 1 8, ZACHARIAS.

Among the lists of the exiles who returned in Ezra-Neh. we find seven men of this name:
20. One of the b'nē Parosh (Ezra 8 3 16 Neh. 8 4, cp 1 Esd. 8 30 44).
21. One of the b'nē Bebai (Ezra 8 11, αζαριας [B], cp 1 Esd. 8 37, ζαχαριαι [B]).
22. One of the b'nē Elam (Ezra 10 26, cp 1 Esd. 9 27).
23. A Judahite, ancestor of Athaiah (Neh. 11 4).
24. A Shilonite (Neh. 11 5, θηζεια [B], θηδεια [א]).
25. One of the b'nē Pashhur (Neh. 11 12, ζαχαρεια [B]).
26. An Asaphite (Neh. 12 35 41 [om. BN*A) [=13].

27. b. Jeberechiah, a contemporary of Isaiah (8 2), who served with Uriah the priest, as a 'trustworthy witness' in connection with the sign Mahēr-shālāl-hashbaz. Some identify him with the father of Abijah, 3; others, with the Levite, 17. Hitzig makes him the author of the anonymous chaps. 12-14 of Zechariah, Bertholdt, the author of chaps. 9-11. Observe that the name of his father is essentially the same as that of the father of the well-known prophet [1].

ZECHARIAH, BOOK OF. Zechariah, son of Berechiah, son of Iddo, or by contraction son of Iddo (see ZECHARIAH, 1), appeared as a prophet in Jerusalem along with HAGGAI (*q.v.*), in the second year of Darius Hystaspis (520 B.C.), to warn and encourage the Jews to address themselves at length to the restoration of the temple, which then still lay in ruins. Supported by the prophets, Zerubbabel, the governor of Judah, and Joshua, the high priest, set about the work, and the elders of Judah built and the work went forward (Ezra 5 1 *f.* 6 14). The first eight chapters of the book of Zechariah exactly fit into this historical setting. They are divided by precise chronological headings into three sections—(*a*) 1 1-6, in the eighth month of the second year of Darius; (*b*) 1 7-6 15, on the twenty-fourth day of the eleventh month of the same year; (*c*) 7-8, on the fourth day of the ninth month of the fourth year of Darius. The first section is a preface containing exhortation in general terms.

1. Chaps. 1-8: contents.

The main section is the second (*b*), containing a series of night visions, the significant features of which are pointed out by an angel who stands by the prophet and answers his questions:

1 7-17. The divine chariots and horses that make the round of the world by Yahwè's orders return to the heavenly palace and report that there is still no movement among the nations, no sign of the Messianic crisis. Seventy years have passed, and Zion and the cities of Judah still mourn. Sad news! but Yahwè gives a comfortable assurance of his gracious return to Jerusalem and the rebuilding of his temple.

1 18-21 [2 1-4]. Four horns, representing the hostile world-power that oppresses Israel and Jerusalem, are routed by four smiths.

2 1-13 [5-17]. The new Jerusalem is laid out with the measuring line. It is to have no walls, that its population may not be limited, and it needs none, for Yahwè is its protection. The catastrophe of Babel (the land of the north) is near to come; then the exiles of Zion shall stream back from all quarters, the converted heathen shall join them, Yahwè himself will dwell in the midst of them; even now he stirs himself from his holy habitation.

3 1-10. The high priest Joshua is accused before Yahwè by Satan, but is acquitted and given rule in Yahwè's house and courts, with the right of access to Yahwè in priestly intercession. The restoration of the temple and its service is a pledge of still higher things. The promised 'branch' (or 'shoot,' צמח), the Messiah, will come; the national kingdom is to be restored; and a time of general felicity dawns, when every man shall sit happy under his vine and under his fig tree. As by rights the Messianic kingdom should follow immediately on the exile, it is probable that the prophet designs to hint in a guarded way that Zerubbabel, who in all other places is mentioned along with Joshua, is on the point of ascending the throne of his ancestor David. The jewel with seven facets is already there, only the inscription has still to be engraved on it (3 9). The charges brought against the high priest consist simply in the obstacles that have hitherto hindered the restoration of the temple and its service; and in like manner the guilt of the land (3 9) is simply the still continuing domination of foreigners.

4 1-14. Beside a lighted golden candlestick of seven branches stand two olive trees—Zerubbabel and Joshua, the two anointed ones—specially watched over by him whose seven eyes run through the whole earth. This explanation of the vision is separated from the description by an animated dialogue, not quite clear in its expression, in which it is said that the mountain of obstacles shall disappear before Zerubbabel, and that, having begun the building of the temple, he shall also bring it to an end in spite of those who now mock at the day of small beginnings.

5 1-4. A written roll flies over the Holy Land; this is a concrete representation of the curse which in future will fall of itself on all crime, so that, *e.g.*, no man who has suffered theft will have occasion himself to pronounce a curse against the thief (cp Judg. 17 2).

5 5-11. Guilt, personified as a woman, is cast into an ephah-measure with a heavy lid and carried from Judah to Chaldæa, where it is to have its home for the future.

6 1-8. The divine teams, four in number, again traverse the world toward the four winds, to execute Yahwè's commands. That which goes northward is charged to wreak his anger on the N. country. The series of visions has now reached its close, returning to its starting-point in 1 7 *ff.* [On the 'mountains of brass' see BRASS; and on the colour of the horses see COLOURS.]

An appendix follows (6 9-15). Jews from Babylon have brought gold and silver to Jerusalem; of these the prophet must make a crown designed for the 'branch' who is to build Yahwè's house and sit king on the throne, but retain a good understanding with the high priest. Zerubbabel is certainly meant here, and, if the received text names Joshua instead of him (6 11), this is only a correction, made for reasons easy to understand, which breaks the context and destroys the sense and the reference of 'them both' in *v.* 13.

The third section (7 *f.*), dated from the fourth year of Darius, contains an inquiry whether the fast days that arose in the captivity are still to be observed, with a comforting and encouraging reply of the prophet.

Kosters (*Herstel van Israel*, 1894) laid stress upon the fact that neither in Haggai nor in Zechariah do we find the Jews in Jerusalem represented as consisting of returned exiles. The fact is as stated; but it does not preclude us from supposing that the return of a band of exiles may have marked the starting-point of a new era of Jewish history. Few in number they indeed were, and they did not assume an exclusive attitude towards the vastly more numerous class of Jews who had remained behind in Judæa, whom, rather, on the contrary, they sought to win over to their own view, and urged to congregate in and around Jerusalem, so as to make the desolate ruins once more the focus of a new theocracy. Stade thinks that the buoyancy and joyous hopefulness which we perceive in Haggai and Zechariah may have been due to the revolt of Smerdis.[1] But such a shaking of the Persian empire after the death of Cambyses could not possibly have been predicted as still future (Hag. 2 6) two years after its occurrence, and at a time when it had already been almost recovered from, and, moreover, the Jews could hardly have rejoiced so heartily over it, their feelings towards the Persians being friendly. It seems more likely that the Jews heard with gladness of the conquest of Babylon—that is to say, the second—under Darius Hystaspis. The vengeance on Babylon, which Cyrus had not fully

2. Their historical background.

1 [*GVI* 2 113. The revolt of Nidintu-Bel in 521 has also been suggested (Che. *Jew. Rel. Life*, 14).]

carried out, now at last seemed to be accomplished and the wrath of Yahwè against the land of the North to fulfil itself (Zech. 6 8 26 [10] *f.*). Thereby also was quickened the more general Messianic expectation that all nations would at last acknowledge the supremacy of Yahwè.

Throughout the first eight chapters the scene is Jerusalem in the early part of the reign of Darius. Zerubbabel and Joshua, the prince and the priest, are the leaders of the community. The great concern of the time and the chief practical theme of these chapters is the building of the temple; but its restoration is only the earnest of greater things to follow—viz., the glorious restoration of David's kingdom. The horizon of these prophecies is everywhere limited by the narrow conditions of the time, and their aim is clearly seen. The visions hardly veil the thought, and the mode of expression is usually simple, except in the Messianic passages, where the tortuousness and obscurity are perhaps intentional. Noteworthy is the affinity between some notions evidently not framed by the prophet himself and the prologue to Job,—the heavenly hosts that wander through the earth and bring back their report to Yahwè's throne, the figure of Satan, the idea that suffering and calamity are evidences of guilt and of accusations presented before God.

Passing from chaps. 1-3 to chaps. 9 *ff.*, we at once feel ourselves transported into a different world.

3. Chaps. 9-14: contents.

Yahwè's word is accomplished on Syria-Phœnicia and Philistia (HADRACH [*q.v.*] and Damascus are first mentioned); and then the Messianic kingdom begins in Zion, and the Israelites detained among the heathen, Judah and Ephraim combined, receive a part in it. The might of the sons of Javan is broken in battle against this kingdom (chap. 9). After an intermezzo of three verses (10 1-3: 'Ask rain of Yahwè, not of the diviners') a second and quite analogous Messianic prophecy follows. The foreign tyrants fall; the lordship of Assyria and Egypt has an end; the autonomy and martial power of the nation are restored. The scattered exiles return as citizens of the new theocracy, all obstacles in their way parting asunder as when the waves of the Red Sea gave passage to Israel at the founding of the old theocracy (10 3-12). Again there is an interlude of three verses (11 1-3): fire seizes the cedars of Lebanon and the oaks of Bashan. This is followed by the difficult passage about the shepherds. The shepherds (rulers) of the nation make their flock an article of trade and treat the sheep as sheep for the shambles. Therefore, the inhabited world shall fall a sacrifice to the tyranny of its kings, whilst Israel is delivered to a shepherd who feeds the sheep for those who make a trade of the flock (כְּנַעֲנֵי הַצֹּאן, 11 7 11 = 'they that sell them,' *v.* 5) and enters on his office with two staves, 'Favour' and 'Union.' He destroys 'the three shepherds' in one month, but is soon weary of his flock and the flock of him. He breaks the staff 'Favour'—*i.e.*, the covenant of peace with the nations—and asks the traders for his hire. Receiving thirty pieces of silver, he casts it into the temple treasury and breaks the staff 'Union'—*i.e.*, the brotherhood between Judah and Israel. He is succeeded by a foolish shepherd, who neglects his flock and lets it go to ruin. At length Yahwè intervenes; the foolish shepherd falls by the sword; two-thirds of the people perish with him in the Messianic crisis, but the remnant of one-third forms the seed of the new theocracy (11 4-17 taken with 13 7-9, according to the necessary transposition proposed by Ewald). All this must be an allegory of past events, the time present to the author and his hopes for the future beginning only at 11 17 13 7-9.

Chap. 12 presents a third variation on the Messianic promise. All heathendom is gathered together against Jerusalem and perishes there. Yahwè first gives victory to the countryfolk of Judah and then they rescue the capital. After this triumph the noblest houses of Jerusalem hold, each by itself, a great lamentation over a martyr 'whom they have pierced' (or 'whom men have pierced'). It is taken for granted that the readers will know who the martyr is, and the exegesis of the church applies the passage to Christ [cp HADAD-RIMMON]. Chap. 13 1-6 is a continuation of chap. 12; the dawn of the day of salvation is accompanied by a general purging away of idolatry and the enthusiasm of false prophets. Yet a fourth variation of the picture of the incoming of the Messianic deliverance is given in chap. 14. The heathen gather against Jerusalem and take the city, but do not utterly destroy the inhabitants. Then Yahwè, at a time known only to himself, shall appear with all his saints on Mount Olivet and destroy the heathen in battle, while the men of Jerusalem take refuge in their terror in the great cleft that opens where Yahwè sets his foot. Now the new era begins, and even the heathen do homage to Yahwè by bringing due tribute to the annual feast of tabernacles. All in Jerusalem is holy down to the bells on the horses and the cooking-pots [cp *Crit. Bib.*].

ZECHARIAH, BOOK OF

4. Character.

There is a striking contrast between chaps. 1-8 and chaps. 9-14. The prophecy 1-8 is closely tied to the situation and the wants of the community of Jerusalem in the second year of Darius I., and all that it aims at is the restoration of the temple and perhaps the elevation of Zerubbabel to the throne of David. Chapters 9 *ff.* contain no trace of this historical situation and deal with quite other matters. They are more obscure and more fantastic. There are corresponding differences in style and speech; and it is particularly to be noted that, whilst the superscriptions in chaps. 1-8 name the author and give the date of each oracle with precision, those in the second part (9 1 12 1) are without name or date. That both parts do not belong to the same author must be admitted.

Most recent critics make the second part the older. Chaps. 9-11 are ascribed to a contemporary of Amos and Hosea, about the middle of the eighth century B.C., because Ephraim is mentioned as well as Judah, and Assyria along with Egypt (10 10), whilst the neighbours of Israel appear in 9 1 *f.* in the same way as in Amos 1-2. That chaps. 12-14 are also pre-exilic is held to appear especially in the attack on idolatry and lying prophecy (13 1-6); but, as this prophecy speaks only of Judah and Jerusalem, it is dated after the fall of Samaria, and is assigned to the last days of the Judæan kingdom on the strength of 12 11, where an allusion is seen to the mourning for King Josiah, slain in battle at Megiddo.

5. Probably later.

It is more likely that chaps. 9-14 all together are of much later date. These predictions have no affinity either with the prophecies of Amos, Hosea, and Isaiah, or with that of Jeremiah. The kind of eschatology which we find in Zech. 9-14 was introduced by Ezekiel, who in particular is the author of the conception that the time of deliverance is to be preceded by a joint attack of all nations on Jerusalem, in which they come to final overthrow. The importance attached to the temple service, even in Messianic times (Zech. 14), implies an author who lived in the ideas of the religious commonwealth of post-exilic times. So also the use of 'Zion' as a name for the theocracy. The diaspora and the cessation of prophecy (13 1-6) are presupposed. A future king is hoped for; but in the present there is no Davidic king, only a Davidic family standing on the same level with other noble families in Jerusalem (12 7 12). The 'bastard' (mixed race) of Ashdod reminds us of Neh. 13 23 *ff.*; and the words of 9 12 ('to-day, also, do I declare that I will render double unto thee') have no sense unless they refer back to the deliverance from Babylonian exile.

Whilst chaps. 9-14, are thus all later than chaps. 1-8, they are not themselves homogeneous; they fall into two well-marked divisions—9-11 and 12-14.

6. Composite.

The latter division [12-14] contains two prophecies which are little more than a standing dogmatic formula of eschatology filled up with concrete details, and can be understood well enough (if need be) without our knowing the historical setting. The actual situation at the time of composition discloses itself only in one or two features, as, for example, when the country of Judah is contrasted with the city of Jerusalem, and the deliverance of the city comes from the country—a feature which seems to indicate the Maccabæan period.

The former division (9-11), on the other hand—which again falls into two sections, 9 1-11 3 and 11 4-17 + 13 7-9—is much more concrete and cannot be understood at all if the date of its composition is not known. In 9 1-11 3 we find that it is the Greeks (9 13; cp JAVAN) who are the heathen power, the enemy of God, which must be overthrown before the Messiah's kingdom can come. Assyria and Egypt, which take the place of Javan in chap. 10, are the kingdom of the Seleucidæ and the Ptolemies. The region of HADRACH (*q.v.*), Damascus, and Hamath, against which the wrath of Yahwè is, in the first instance, directed (9 1 *f.*), is the seat, not of the old Assyrians, but of the Seleucidæ.

And inasmuch as Assyria here takes precedence of Egypt we are able to fix the date of the present section more precisely as falling somewhere within the first third of the second century B.C., for it was not till the beginning of that century that the Seleucidæ became masters of Judæa (SELEUCIDÆ, § 7 *f.*). The second section (11 4-17 + 13 7-9) will also be of this date; for a right understanding of it a correct apprehension of the historical situation is still more indispensable, though, indeed, rendered very difficult not only by the bad state of the text, but also by our defective knowledge of this period of Jewish history. By the owners of the sheep who traffic in them we are to understand the Seleucid sovereigns who carried on a remunerative business in farming out their flocks to the shepherds. The shepherds are the high priests and ethnarchs of the Jews; by the rapid and violent changes of the shepherds the events which preceded and led up to the Maccabæan revolt are denoted. They were all of them worthless whether they traced their descent from Zadok or from Tobias. At last the measure of iniquity was filled up by Menelaus, who may very well be meant by the last cruel shepherd who is to bring on the catastrophe and the judgment (11 15 *ff.*). The prominent man, who is an exception to the rest, and does not come into the series, who takes upon him the office of shepherd in the interests of the flock, but gives it up when he sees that the flock is unworthy of his care, might be Hyrcanus the son of Tobias. According to the (legendary) accounts we have of him he was a man of proud disposition and lofty plans who lived in undisguised enmity with his brethren the Tobiadæ, overcame them and put two of them to death, and yet was unable to hold his own in Jerusalem (Jos. *Ant.* xii. 4 9 [§ 222], ed. Niese). In any case he was a person of quite a different sort from the ordinary Jewish aristocrat. It is natural to ask how we are to suppose that at his departure he obtained his reward for having been shepherd. For, as a rule, the order was reversed and shepherds paid for the right of feeding the sheep. But this trait in the picture is more easily understood in the case of Hyrcanus, whose position was quite exceptional, than in that of the other shepherds. Perhaps his adherents may in the end have given him money to leave Jerusalem when the good understanding between them had come to an end and various external dangers were threatening. It is worth noticing that the reward received by the shepherd is cast by him into the temple-treasury (11 13); according to 2 Macc. 3 11, Hyrcanus, the son of Tobias, had a deposit there.

7. Date.

Literature.—The literature of the book is cited by C. H. H. Wright, *Zechariah and his Prophecies*,(2) 1879. See also Stade, 'Deuterozacharia' (*ZATW*, 1881-2); and Wellhausen and Nowack's editions of the Minor Prophets. [Cp also G. A. Smith, *Twelve Prophets*, vol. ii., and PROPHECY, § 47.]

J. W.

ZECHER (זֶכֶר), 1 Ch. 8 31, RV. See ZECHARIAH, i. 6.

ZECHRIAS (ζεχριου [B] εζεριου [A]), 1 Esd. 8 1, RV = Ezra 7 1, AZARIAH, 3.

ZEDAD (צְדָד; only in acc. צְדָדָה; צרדה [Sam.]; σαραδακ [BL], σαδαλδακ [A], σαδδακ [F], *Aradath* [It.]), one of the points in the ideal northern frontier of Canaan according to P or the later redactor (Nu. 34 8), and also mentioned in the ‖ passage of Ezekiel (47 15; for 𝔊 see later). Robinson (*BR* 3 461 n.), Wetzstein (*Reisebericht*, 88), Furrer (*ZDPV* 8 27), Mühlau, and Socin, identify it with the the large village *Ṣadad*, between Riblah and Palmyra (long. 37° E.); but this is too far E. if it is considered that both Hamath and Damascus are meant to be excluded. It is also an objection, that the implied view of the northern frontier assumes a large part of the Lebanon district to be included within the Israelitish border. Many besides Buhl (*Pal.* 66) will think that this carries idealisation beyond what is probable (cp HOR, MOUNT).

Van Kasteren (*Rev. bibl.*, 1895, p. 30) adopts the reading Zerad, and plausibly identifies with *Khirbet Serādā*, between Merj 'Ayūn (where he places 'the entrance of Hamath') and Hermon, to the S. of Kh. Sanbarīyeh (see SIBRAIM).

With regard to the second passage: Cornill thinks that the original reading (see 𝔊) must have been simply 'to the entrance of Hamath' and that 'Zedadah' (*i.e.*, 'to Zedad') was interpolated after 'Hamath' from Nu. 34 8. '(To) Hamath' before 'Zedadah' was thus rendered useless, and so the two names changed places (see MT). The original 𝔊 of Ezek. did not, it is assumed, contain the interpolation. The scribe who altered it simply made an insertion; hence the existing MSS of 𝔊 represent 'Hamath' not only after but also before 'Zedadah' (*ημασελδαμμα* [B], *ημαθ'ελ.* [A], *ημασαιλααμ'μα* [Q], *αδαλααιμαθ'* [Qmg.]).

According to the view of the geographical definitions in Nu. 34 and Ezek. 47 13 *ff.* advocated elsewhere (see RIBLAH, SIBRAIM) the region referred to in the original text may have been, not the land of Canaan, but the Negeb. In that case, Mt. Hor = Mt. Jerahmeel, Hamath = Maacath, Zedad or Zerad probably = Miṣṣur, and Ziphron or Sibraim (to be identified) = Zarephath. Cp ZEROR.

T. K. C.

ZEDECHIAS, RV **Sedekias** (σεδεκιας [BA]) 1 Esd. 1 46. See ZEDEKIAH i.

ZEDEKIAH (צִדְקִיָּהוּ, also צִדְקִיָּה, see 1, 2, 5, σεδεκια[c]; cp Ṣidḳâ, the name of a king of Ashkelon, temp. Sennacherib [*KAT*(2) 165]).

1. The last king of Judah (597-586), a son of JOSIAH (2 K. 24 *f.* 2 Ch. 36 10 *ff.*; in 1 Ch. 3 15[1] Jer. 27 12 28 1 29 3 49 34 צדקיה). According to 2 K. 24 17, his original name was Mattaniah; the king of 'Babel' (בבל) 'changed his name' to Zedekiah (Ṣidḳiyah) when he raised this uncle of the deposed king to the throne of Judah. This act of sovereignty is in itself probable; cp the new name imposed by Ašur-bani-pal on Necho I.[2] (Limir-išakku-Ašur, 'let Ašur's viceroy see.')

1. Name.

The special appropriateness of the name selected is not obvious. Parallel names suggest that 'Zedekiah' (Ṣidḳiyah) means properly 'Zidkite,' and even if we suppose (rationally enough) that, when borne by the king, it acquired the new meaning 'righteousness of Yahwè,'[3] that is by no means a clear expression of Zedekiah's relation to his suzerain. No fully satisfactory explanation of this has been offered; and yet Hebrew onomatology cannot afford to confess itself baffled. The theory that in many passages 'Babel' (בבל) = ירחמאל suggests an explanation. Since יהוה is in some OT passages probably miswritten for 'ירח, it follows that this great race-name may possibly be represented by 'יהו.[4] Now *Ṣidḳiyāhu*, 'righteousness of Jerahmeel,' is a name that might conceivably be given to a royal vassal of Jerahmeel, after he had sworn fidelity (Ezek. 17 13) to his suzerain.

Zedekiah was only twenty-one at his accession and it is probable that the queen-mother Hamutal made up by her own energy for the weakness of her son. This certainly seems to be implied by what Ezekiel says of her in one of his striking similitudes[5] (Ezek. 19 5). Whether it was so or not, there was on the part of the rulers no just political insight. Fidelity to the suzerain, and a strict maintenance of the old moral traditions of Israel, would have insured a peaceful though inglorious existence for king and people (cp Ezek. 17 6 14). But the deportation of a large part of the upper class brought wealth and political power to those who had had none of the necessary training. These 'new men' soon displayed in an intensified degree the vices of the worst of their predecessors (Ezek. 22 25 27 24 6), and, with an obstinacy which it is difficult for us moderns to understand, cherished the hope of quickly throwing off the foreign yoke. Meantime those who had gone into exile with

2. Dangers.

1 On the strange insertion of Zedekiah in *v.* 16 among the sons of Jehoiakim, see Benzinger, who thinks that the author of the text may really have supposed Zedekiah to have been the son of Jehoiakim, but does not mention the possibility that the scribe may have misread the text before him. זכריה (Zechariah) would be a very possible name.

2 Tiele, *BAG* 356.

3 Cp NAMES, § 36, and note also Ṣidḳi-ilu, the name of an Ass. eponym (Del. *Ass. HWB* 564 *a*).

4 Cp TEBALIAH. The same explanation applies to all the names ending in or beginning with 'יהו.

5 See Kraetzschmar, *ad loc.*

ZEDEKIAH

Jehoiachin looked on at a distance with mingled contempt and indignation (Ezek. 11 15 14 22 *f.*), and Jeremiah, not less than Ezekiel, recognised the moral incapacity of the new lords of Jerusalem.

Whether, or how far, Nebuchadrezzar, king of Babylon, interfered in the affairs of Judah, remains obscure. The redactors of the narrative and prophetical writings certainly believed that the power which broke up the national existence was the Babylonian.

When we look beneath the surface, however, we suspect that there has been a great misunderstanding, and that, according to the extant fragments of the old Hebrew records, when restored to something not unlike their original purity, it was the king of Jerahmeel in N. Arabia who invaded Jewish territory, who besieged and took Jerusalem, and once and again carried away its inhabitants. We do not know enough of the political condition of N. Arabia to say what nation is represented by the archaising name Jerahmeel, but assume that there must have been some power capable of enforcing his will on S. Palestine. It is possible, of course, that the rôle of the N. Arabians was subordinate to that of the Babylonians (cp OBADIAH [BOOK], § 7); but this is only a hypothesis. All that we know is that N. Arabia was for a long time regarded as the great oppressor of Israel. There is to some extent a similar problem with regard to the captivity of the northern Israelites and the subsequent invasion (or invasions) of Judah in the time of Hezekiah. We are, however, in a worse position with regard to the captivities of Judah, for we have as yet no cuneiform records of Babylonian interference with Judah at the reported times of those captivities.

Another troublesome N. Arabian potentate was the king of Miṣrim; here again the name is an archaism.[1] According to our revised text of 2 K. 24 2 'bands' of Miṣrites had already brought Judah very low in the reign of Jehoiakim; it is to such incursions, we believe, that the so-called Scythian prophecies of Jeremiah really refer (see PROPHET, § 26, end). But, according to Jer. 27 1 *ff.* (substituting for the introductory verse the passage which now appears as 28 1),[2] the king of Aram (*i.e.*, not the great king of Jerahmeel, but some inferior king on the border of Jewish territory) and the king of Miṣṣur[3] sent ambassadors to Zedekiah, to concert a revolt. Evidently a change of circumstances had occurred, and the Miṣrites were now no longer anxious for the destruction or weakening of Judah. This king of Miṣṣur is no doubt the personage miscalled Pharaoh Hophra in the common text of Jer. 44 30.[4] For a time the siege of Jerusalem by the Jerahmeelites (which we refer to by anticipation) was interrupted by a friendly diversion on the part of a Miṣrite army.

3. The Miṣrites.

It appears to be a trustworthy tradition that the prophet Jeremiah exhorted the rulers and people of Judah to abstain from any act of rebellion, and that in doing so he was diametrically opposed to prophets of an inferior order (see JEREMIAH, § 2; PROPHET, §§ 24-26). We have also records of embassies of Zedekiah to the great king of בבל.[5]

4. Jeremiah, Zedekiah, and the war-party.

What messages were carried by these embassies, we cannot of course say; the embassies had for their primary object the conveyance of the annual tribute of Judah,[6] until the fatal year when Zedekiah rebelled.

According to Winckler (*KAT*(3), 278 *ff.*), who holds that Zedekiah's suzerain was the king of Babylon,[7] the embassies had another most important object, viz., the bringing about of the restoration of the cultus of Yahwè in the temple, which, he thinks, was in abeyance throughout the reign of Zedekiah owing to the destruction, or at any rate the removal, of the sacred vessels. He does not, however, say that the official worship of

1 Cp Winckler, *KAT*(3) 141.

2 See Duhm's commentary.

3 Only two kings are meant. 'Edom' and 'Moab' should be 'Aram' (Jerahmeel) and Miṣṣur. 'B'ne Ammon,' 'Tyre,' 'Zidon' are also wrong; read 'B'ne Jerahmeel' and 'Miṣṣur' (see *Crit. Bib.*).

4 חפרע is a dittographed פרעה, and this springs out of פראו Pir'u.

5 *I.e.*, Jerahmeel (Jer. 29 3 51 59, where, following 𝔊, we read מאת instead of את—*i.e.*, 'from' instead of 'with' Zedekiah). Guthe, however (*GVI*, 223), thinks that Zedekiah went in person on the occasion referred to. Certainly Manasseh, when summoned by Esar-haddon to his durbar, was careful to obey. But the theory adopted in the text is safer.

6 In 51 59 read שַׂר מִנְחָה (𝔊 ἄρχων δώρων; see SERAIAH).

7 Winckler's theory, however, could of course be accommodated to the view that the real suzerain of Judah at this time was the king of Jerahmeel.

Marduk and Nabû was introduced into the temple, or that Zedekiah's accession to the throne was without the sanctions of Yahwism. He thinks that it was only the 'orthodox, monotheistic Yahwè-cultus' which was abolished; the 'ordinary Canaanitish forms of cultus' ('no doubt partly identical with those of Zedekiah') were either allowed to remain, or, as the case might be, set up anew. And when Jeremiah (27 17) urges the people to 'serve the king of בבל' that they might 'live,' he means, 'give up the hope of the restoration of the cultus in the sense of Josiah and of orthodoxy, and be content with what is left.' 'This,' Winckler adds, 'is the precise opposite of the demands of the Yahwè-party, to which Jeremiah, as a pro-Babylonian, is absolutely opposed.' This scholar's view of Jeremiah's attitude is altogether original, and the hypothesis of the abolition of Yahwè-worship is difficult to work out. For instance, why should Zedekiah have given his support (as Winckler's interpretation of Jer. 29 3 implies that he did) to a request for milder treatment by the Babylonians, when one of the chief objects of the party in favour of this request was the restoration of Jeconiah or Jehoiachin? And is there any trace in Jeremiah or in Ezekiel of the supposed fact that the Yahwè-cult in the temple had been violently closed, or in the records of the life of Jeremiah that this enthusiast for Yahwè was 'content with what was left' after this catastrophe had occurred? Cp SHESHBAZZAR.

It is true, the popular cults, chief among which was the imported Jerahmeelite cult of Baal (*i.e.*, the sun-god), and the great 'Cushite' or 'Ishmaelitish' goddess (*i.e.*, either the moon, or less probably the planet Venus),[1] attracted the majority more than that of Yahwè (as exhibited in Deuteronomy). Not only Jeremiah but also Ezekiel[2] expresses the utmost horror at this apostasy, as they regard it. Both prophets are fully conscious of the connection between a low type of religion and immorality. It also appears that even those who professed fidelity to Yahwism had extremely callous consciences. Of this we have a striking evidence in Jer. 34 8-22. Certain rich citizens of Jerusalem, we are told, emancipated their Hebrew slaves at the beginning of the siege (according to the prescriptions of Ex. 21 1-4 Dt. 15 12), but after the temporary raising of the siege resumed possession of them. The motive which induced the masters temporarily to liberate their slaves was probably, not humanity, but the desire to increase the number of the available defenders of the walls of Jerusalem.

5. Religion and morality.

It was in the ninth year of his reign that Zedekiah finally gave way to the war-party and rebelled against his suzerain, first, however, taking the precaution of 'sending his ambassadors to מִצְרַיִם (*i.e.*, Miṣrim, not Miṣraim), that they might give him horses and many warriors'[3] (Ezek. 17 15). A striking picture is drawn by Ezekiel (21 21 [26] *f.*) of the king of בבל (Jerahmeel) standing where the ways divide, and shuffling the arrows before the teraphim, and then inspecting the liver of a sacrificed animal—two forms of divination, the first of which is specially characteristic of Arabia, not of Babylonia.[4] There was a chance that he might have led his army against Rabbath-bnê-ammon, or, as we should most probably read, Rehoboth-bne-jerahmeel, by which is meant the capital of Miṣrim. But the oracle decided him on going to Jerusalem. So the Jerahmeelite army encamped against that strongly fortified city. On his side, the king of Miṣrim was not idle. In the spring of 587 a Miṣrite army advanced towards Judah, or perhaps towards Riblah—*i.e.*, not the northern Riblah, on the E. bank of the Orontes, but a southern Riblah, or rather Jerahmeel, in the

6. Rebellion.

1 Read הכשת for the improbable הבשת in Jer. 3 24; ישמעאלית for מולת in 2 K. 23 5; and מלכת ישמעאל ('Ishmael's Queen') for מלכת השמים in Jer. 7 18 44 17 *ff.* (but cp QUEEN OF HEAVEN). So too אלהים אחרים in Jer. 1 16 7 18 19 4 44 3 8 probably comes from אלהי ירחמאל, 'the gods of Jerahmeel.' Cp also *Crit. Bib.* on Zeph. 1 5.

2 Ezek. 8 seems to have been much misunderstood by commentators. See *Crit. Bib.*, and cp TAMMUZ.

3 Winckler, it is true, supposes this to refer to Sheshbazzar.

4 See DIVINATION, § 2, and cp Lyall, ***Ancient Arabic Poetry***, 106.

southern Hamath or Maacath (see RIBLAH). It was a futile attempt; flushed by victory the Cushite invaders returned, and on the ninth day of the fourth month of Zedekiah's eleventh year, the city was taken. Zedekiah and his most faithful warriors took to flight. He was caught, however, and brought to Riblah. There his sons were put to death before his eyes; he himself was blinded (cp Ezek. 12 13), and carried in chains to the city of his foes.[1] How Ezekiel regarded his fate, we know from a fiery denunciation (Ezek. 21 25 [30] *f.*). Cp ISRAEL, §§ 41 *f.*, JEREMIAH, § 2.

2. b. Chenaanah, a leading prophet among those consulted by Ahab as to the success of his proposed expedition against Ramoth-gilead. By means of iron horns the prophet symbolically announced that Yahwè would grant Ahab successive victories over Aram. The dispute with MICAIAH (*q.v.*) is told in 1 K. 22 11 *ff.* (צדקיה), 2 Ch. 18 10 *ff.* The passage not only throws light on the differences among the prophets, but also is important for the question of the origin of the prophethood.

See PROPHET, § 7, where it is maintained that the original *nĕbī'īm* came from N. Arabia, and that the Aramæans with whom Israel contended were, mainly at any rate, those of the southern Aram—*i.e.*, the Jeraḥmeelite border-land. For 'Ben Chenaanah' we should probably read 'Ben Kenizzi'; cp 'Elisha, ben Shaphat'—*i.e.*, 'Elisha, ben Ṣephāthī.' Elisha was known as a Zarephathite, Zedekiah as a Kenizzite (or Kenite?).

3. b. Maaseiah, one who 'prophesied a lie' in the time of Jeremiah, Jer. 29 21 *ff.* See SEDECIAS, 1.

The passage has been much misunderstood. For 'roasted in the fire' (קלם באש) we should read קְטָלָם בְּאַשּׁוּר 'killed in Asshur,' Asshur is a synonym for Jerahmeel—the name of the N. Arabian land whither (see ZEDEKIAH, 1) the Jews were carried into exile. What follows יען אשר is an interpolation (down to רעיהם), on which see AHAB, 2.

4. b. Hananiah, a high officer, temp. Jehoiakim, Jer. 36 12.

5. AV ZIDKIJAH. Signatory to the covenant (see EZRA i., § 7); Neh. 10 1 [2] (צִדְקִיָּה; *σεδεκιας* [BℵA], *υιος σαραια*). He is placed together with Nehemiah, the Tirshatha, before the list of priestly families. Was he Nehemiah's secretary (Ryssel)? or president of the council of the elders (E. Meyer, *Entst.* 136)? See TIRSHATHA.

L's reading is שכניה (*σεχενιας*), Shecheniah; in *v.* 4 we find שבניה, Shebaniah. T. K. C.

ZEEB (זְאֵב), Judg. 7 25. See OREB.

ZELAH (צֵלַע *Ṣēla'*), a city of Benjamin, grouped by P (see TARALAH, KIRJATH-JEARIM) with 'the Jebusite, the same is Jerusalem,' and Gibeah or Kirjath (Josh. 18 28; om. B, σηλα [A], σελα [L]), also referred to as containing the sepulchre of Kish (2 S. 21 14; ΕΝ ΤΗ πλευρα [BAL], RV here **Zela**).

We cannot avoid utilising the results of our criticism of the text. In the list of cities of Benjamin (as well as in some of the accompanying tribal lists) there seems to have been serious geographical confusion. The Gibeonite cities, for instance—Gibeon, Beeroth (from Rehoboth), Chephirah (a doublet to Beeroth), and Kirjath-jearim (as later inquiry suggests, Kirjath-jeraḥmeel)—were originally represented as in the Negeb. So too the Zela of Josh. 18 28 was probably in the Negeb. It is, however, hardly possible to transfer the family of Saul from the territory usually known as Benjamite to the Negeb; the relations between Saul and David forbid this. Some of the names of the Negeb, however, appear to have been carried northward by the clans when they left the Negeb. This may well have been the case with Zela, or rather—the name, like so many other names in Josh. 18 and in the story of Saul's personal history, being evidently corrupt—Shalisha. See LAISHAH, and SAUL, § 4, where it is pointed out that, according to what is supposed to be the true text of 1 S. 31 11-13, the bones of Saul and Jonathan were brought by the men of Beth-gilgal (in Benjamin) to the sacred tree at Beth-gilgal, and there buried. From 1 S. 25 44 it appears that Laish, or rather Shalishah, was either identical with, or near, Beth-gilgal (see GALLIM, LAISHAH, PALTI). The same name seems to underlie '[Bar-]zillai' in 2 S. 17 27 (see MEPHIBOSHETH, § 2), 21 8 (see MERAB), and should be restored in Josh. 18 28, 2 S. 21 14. Cp ZELEK.

Some (*e.g.*, Petrie) identify the Zelah (Sela') of Josh. with the Zilu of the Amarna Tablets (181 41 45), a place which, like Lachish, threw off the Egyptian authority. T. K. C.

ZELEK (צֶלֶק), an Ammonite, one of David's heroes (2 S. 23 37 [36], *ελειε* [B], *σβλεγι* [A], *ὁ α[μ]μαν[ε]ίτη* [BA], *σαλααδ ὁ αναμι* [L]; 1 Ch. 11 39, *σελη* [Bℵ], *σελληκ* [AL], *ὁ αμμων[ε]ι* [BA], . . . *-ειμ* [ℵ], *ὁ αμμανι* [L]).

[1] Josephus cleverly works out the narrative (*Ant.* x. 8 2).

עַמּוֹנִי (Ammonite) is probably here, as in some other passages (*e.g.*, 1 S. 11 2 S. 10 *f.*, see REHOBOTH, SAUL, § 1 *f.*), a corruption of ירחמאלי (Jerahmeelite)—*i.e.*, 'Zelek' came from the Jeraḥmeelite Negeb. There are two place-names with which צלק may be compared: (1) סלכה (SALECAH), the name of one of the 'cities of the kingdom of Og in Cushan' (כֻּשָׁן, not, as MT and 𝔊, בָּשָׁן; see OG, and (2) צקלג (ZIKLAG), for a time David's city, a name which may be a corruption of חֲלֻצָה (Ḥalūṣah). It is safest to choose the latter. צלק may be miswritten for חלץ (Ḥillez) which we know to be a Paltite[1]—*i.e.*, Zarephathite—(2 S. 23 26 *f.*) and Jerahmeelite (1 Ch. 2 39) name, and may indicate a connection with the city of Ḥaluṣah. Marquart (*Fund.* 22), it is true, connects צלק (cp 𝔊B and 𝔊L) with צֶלַע, but we do not expect David to have a connection with the centre of Saul's clan (see ZELA). T. K. C.

ZELOPHEHAD (צְלָפְחָד; σαλπααδ [BAL, but σαλφ. A, in Josh., σαπφ. B, in Ch.], which suggests צַלְפַּחַד, Ṣalpaḥad—*i.e.*, perhaps 'protection [צֵל, "shadow"] from terror,' § 43, or [Paterson, *SBOT*, on Nu. 27], 'the Dread One is shadowed';[2] see, however, below). Zelopheḥad (Zalpaḥad?) is variously represented as the second son of Manasseh (1 Ch. 7 15; see ASRIEL), and as b. Hepher, b. Gilead, b. Machir, b. Manasseh (Josh. 17 3).[3] He is said to have had no sons, but five daughters—viz., Mahlah, Noah, Hoglah, Milcah, Tirzah (Nu. 26 33 27 1 36 11 Josh. 17 3). These daughters are said (Nu. 27 1-4) to have approached Moses, Eleazar, the princes, and all the congregation with a petition to be allowed to receive an inheritance as representing their father,[4] who died in the wilderness, and had no sons. A favourable answer was given (*vv.* 7-11); but the decision was supplemented later (Nu. 36) by an order that heiresses should marry within their own tribe. Accordingly Zelophehad's daughters are said to have married their father's brothers' sons.

That P had access to old lists, is undeniable; but he not unfrequently represents corrupt forms of the same name as independent members of genealogies. It is therefore not impossible that in the list of six, formed by Zelophehad and his daughters, the same name in different forms may occur several times. There is plausibility in the view that the name which underlies Zelopheḥad, Maḥlah, and Milcah is Ṣalḥad, which, as has been shown elsewhere (GALEED, § 1), may underlie Sahadutha in Gen. 31 47, and appears in Dt. 3 10 and elsewhere as SALECAH (*q.v.*). It is indeed probable that in one form of the patriarchal story Ḥaurān was much referred to (cp HARAN). The objection that Ṣalḥad was on the E. side of the Jordan, whereas it appears that P did not recognise Manasseh as having inheritances in Gilead,[5] is not as important as it seems, for the tradition that Zelophehad was 'son of Hepher, son of Gilead,' cannot be annulled by bracketing 'son of Gilead,' etc., in Josh. 17 3. In determining the sense of Zelophehad and the other names, we cannot ignore the asserted connection of Zelophehad with Gilead.[6] But further inquiry seems to be bringing out these results—that the school of writers represented by P had access to lists in which several tribes, including Manasseh, were located in the Negeb, that Og's traditional kingdom was, not in Bashan, but in Cushan, and hence that Salecah is not the original name in Dt. 3 10, etc., but some Negeb name such as Ḥaluṣah.

This being the case, the name of Machir's sister הַמֹּלֶכֶת (HAMMOLECHETH) will be miswritten, not for Salecah, but for Jerahmeel[ith], and those of her sons Ishhod (cp HODESH), and Mahlah will stand for Ashḥur and Jeraḥmeel respectively. So, too, of the five daughters of Zelopheḥad, the first, the fourth,

[1] PELETH (*q.v.*) in 1 Ch. 2 33 is a 'son' of Jeraḥmeel—*i.e.*, Zarephath was the centre of a subdivision of the Jeraḥmeelites.

[2] For another suggestion see MANASSEH i., § 9 [i.].

[3] On the analysis of Josh. 17 1-6 see *Oxf. Hex.* 2 17; Steuernagel, *HK Josh.* 217; Kuenen, *Th. T* 11 487

[4] This passage is inconsistent with Josh. 17 6, which implies that each of Zelophehad's daughters received a 'part.'

[5] This is Steuernagel's view (*HK Josh.* 215, foot).

[6] Cp MANASSEH i., §§ 5, 9.

and possibly the third will represent Jerahmeel, the fifth (Tirzah) will come from Zarephath, the second (Noah) from some form of Manahath (b. Shobal), and Zelophehad will presumably be a compound of two ethnic or tribal names, and since these names have to be Negeb names, the most probable explanation of the name is Ishmael-ḥadad (cp צלף with שלף [SHELEPH], and זלפה [ZILPAH], which almost certainly come from ישמעאל). Hadad appears in Gen. 25 15 as the eighth son of Ishmael. Ḥepher and Gilead, with which Zelophehad is also genealogically connected, are Negeb names.[1]

The meaning of the statement that Zelophehad had five daughters, of course is that there were five minor clans dependent on the great central clan called Zalp-ḥad, or Ishmael-ḥadad. T. K. C.

ZELOTES (ζηλωτης), Lk. 6 15 AV, RV ZEALOT (*q.v.*).

ZELZAH (צֶלְצַח), 1 S. 10 2. See RACHEL'S SEPULCHRE.

ZEMARAIM (צְמָרַיִם; see Kittel, *SBOT*, Heb., on 2 Ch. 13 4, and on termination see NAMES, § 107). 1. The name of a city of Benjamin, grouped with Beth-arabah and Bethel (Josh. 18 22; *σαρα* [B], *σεμριμ* [A], *σαμαρειμ* [L]).

2. The name of a mountain 'in the hill-country of Ephraim,' from the top of which ABIJAH delivered an address to Jeroboam and the Israelitish army (2 Ch. 13 4; *σομορων* [BAL], *σαμαρων* [Niese], or *σεμαρων* [Naber], Jos. *Ant.* viii. 11 2 = § 274). See Bertheau. Both 1 and 2 suggest most interesting problems.

Conder (*PEF*, 1877, p. 26), following Van de Velde and Robinson, identifies 1. with the ruin es-Samra, 2-3 m. W. from the Jordan and 15-16 m. in a direct line E. from Bethel, and points out that there are two ruins close together bearing the same name (Samra). Buhl (*Pal.* 180) inclines to accept this combination. Those, however, who take this line must, at any rate, separate the city from the mountain called Zemaraim, for a situation overlooking the Jordan valley will hardly suit the Chronicler's narrative; *v.* 19 suggests that the spot was not far from Bethel. The matter needs reconsideration.

We have now to indicate the new position of the questions resulting from our criticism of the text, and first of that relating to 2. We have seen (JEROBOAM, 1; REHOBOAM; SHECHEM; SHILOH) that the scene of the narratives respecting Jeroboam and Rehoboam (and of course Abijah) was placed by the original writers in the Negeb, the possession of which was coveted both by Jeroboam and by Rehoboam, as well as by the Jerahmeelites, because it was the 'Holy Land' of Israel and of Jerahmeel, containing the most ancient sacred spots of both sections of Israel and of the closely related people of Jerahmeel. 'Ephraim' is as much a southern as a northern name, and, whatever be its origin (cp REPHAIM), is a synonym of 'Jeraḥmeel.' At the present time, Bethel (perhaps = Dan—*i.e.*, Ḥaluṣah, see LUZ; PROPHET, § 10; SHECHEM), Jeshanah (perhaps misread for שׁוּנֵם, the southern Shunem, cp SHEN, SHUNEM), and Ephron (probably near the place miscalled Shechem, but really named Cusham-jerahmeel, see SHECHEM, 2; MACHPELAH), were in the hands of Jeroboam. According to the Chronicler (2 Ch. 13 19), Rehoboam took these cities from Jeroboam.

Turning now to 1, we have seen that P, as a geographer, often works on lists which properly belong to an ancient geographical survey of the Negeb. This is the case, not only with the name-lists of Judah, Issachar, Asher, and Naphtali, but also with that of Benjamin (cp ZELA). The names Jericho, Beth-hoglah, and Emek-keziz in Josh. 18 21 probably come from Jeraḥmeel, Beth-meholah (= Beth-jeraḥmeel), and Maacath-cush, places in the Negeb; whilst the Beth-arabah and Zemaraim in *v.* 22 probably come from Beth-'arab and Ṣimrīm or Ṣimrām. To say where these places stood, except that one of them is presumably REHOBOTH (*q.v.*), is beyond our power. It is possible (though Gen. 10 18 confirms *ṣm*) that har-ṣimrim is the same as har-šimron in Am. 3 9 (?) 4 1 6 1 (see PROPHET, § 35; SHIMRON). Perhaps Šimron was in the hands of Abijah (according to the Chronicler's authority), and Jeroboam had come with the object of besieging it. There is, at any rate, no reason why 1. and 2. should not be identified. Cp ZEMARITE. T. K. C.

ZEMARITE (צְמָרִי), Gen. 10 18 1 Ch. 1 16. See GEOGRAPHY, § 16, 4.

ZEMIRA, RV **Zemirah** (זְמִירָה, αμαριας [B], ζαμ. [A], ζαμαρια [L]), b. Becher in a genealogy of BENJAMIN (*q.v.*, § 9, ii. *a*), 1 Ch. 7 8, cp ZIMRI (8 36).

[1] For the southern Gilead cp RAMOTH-GILEAD, and *Crit. Bib.* on Jer. 8 22.

ZENAN (צְנָן), a place (as the text stands) in the SHEPHELAH, mentioned with Hadashah and Migdal-gad (σεννα [B], -μ [A], σεναμ [L]), Josh. 15 37†; presumably identical with the ZAANAN (צַאֲנָן) of Mic. 1 11 (σαιναν [Ald. and some MSS], σενναν [some MSS, Syro-Hex.], σενναaρ [B$^{a.b}$AQ*], —aaν [Q^{a}]).

The probability is, however, that there is a mistake, and that neither the Zenan of Joshua nor the Zaanan of Micah was in the Shĕphēlah. As in the case of other lists of tribal place-names, P seems to have been indebted in Josh. 15 33 *ff.* to lists of place-names belonging to different parts of the Negeb (see WARS OF THE LORD [BOOK OF]). Among the names which, critically considered, are specially favourable to this view, are Eshtaol, Zorah, En-gannim, Tappuah, Jarmuth, Adullam, Socoh, Mizpeh, Joktheel, Lachish, and we may now add Zenan, Hadashah, and Migdal-gad, which are grouped together in *v.* 37. That Zenan may be presumed to be identical with the Zaanan of Micah, is obvious. Now, if Mic. 1 be criticised in combination with other prophecies relative to an invasion of Judah, it will appear that the invaders are more probably Jerahmeelites from the S. than Assyrians from the N., and, if we grant this, it will at once appear doubly probable that the place which has a melancholy precedence in Mic. 1 among those which suffer from the invasion is, not שֹׁמְרוֹן (Samaria), but שִׁמְרוֹן (SHIMRON) in the Negeb. See PROPHET, § 38. צאנן will therefore presumably be = צֹעַן (Zoan), and צִן (Zin), both of which forms appear to have been connected geographically with the famous Kadesh (cp PARADISE, § 6; SODOM). The original form, therefore, of the names in Josh. 15 37 was not improbably 'Zoan, Kadesh, Jerahmeel-gad [or simply Jerahmeel],' and in Mic. 1 11, besides Shaphir (Shamir?), and Beth-ezel—the latter of which is clearly a Negeb name—we may recognise Jerahmeel (ישבת ירחמאל=עריה-בשת לא) and Zoan. It is probable, however, that Zoan or Zaanan (Zenan), like ZIN (*q.v.*), comes from the widely-spread race-name Ishmael through the intermediate form Zibeon (צבעון). See ZIBEON, and cp *Crit. Bib.* T. K. C.

ZENAS (ζηνας [Ti. WH], abbrev. from Zenodorus; cp ARTEMAS, OLYMPAS, and NAMES, § 86, end), a lawyer (*νομικος*), is thus alluded to in Tit. 3 13: 'Be zealous in helping Zenas the lawyer and Apollos on their way, that they want for nothing.' Whether he was a Jewish lawyer or a Roman jurisconsult is uncertain; but the non-Hebrew name and the short criticism of *νομικοί* in Tit. 3 9 (cp Zahn, *Einl.* 1 435) make for the latter, and the association with Apollos suggests that he was possibly of Alexandrian origin.

In the lists of the 'seventy' compiled by the Pseudo-Dorotheus and Pseudo-Hippolytus he is made bishop of Diospolis, and he is mentioned in *Menæa* of the Greek church as author of the (no longer extant) *Acts of Titus*.

ZEPHANIAH (צְפַנְיָה, 'whom Yahwè hides,' or 'defends,' § 30, to which add the references *CIS* i. 1 207, etc.; Lidzbarski, *Handb.* 359 [cp also below, 2-4]; σοφονιας). 1. Son of Cushi, the ninth, according to the order of his book, among the twelve minor prophets, flourished in the reign of Josiah of Judah, and apparently before the great reformation in the eighteenth year of that king (621 B.C.).

1. Name and date.

For various forms of idolatry put down in that year (2 K. 23 4 *f.* 12) are spoken of by Zephaniah as still prevalent in Judah (1 4 *f.*), and are specified in such a connection as to imply that they were not the secret sins of individuals, but held the first place among the national backslidings that could, as the prophet teaches, be removed only by a sweeping judgment on the state. Of the person of Zephaniah nothing is known; but inasmuch as his genealogy, contrary to the usual practice in the case of the prophets (see Is. 1 1 Jer. 1 1 Ezek. 1 3 Hos. 1 1 Joel 1 1) is carried back four generations, it has been conjectured that his great-great-grandfather Hezekiah (1 1) is the king of that name, and if so he will have belonged to the highest class of Judæan society.

2. Genuineness and integrity.

The genuineness and integrity of the short prophecy ascribed to Zephaniah do not seem to be open to reasonable doubt. Stade (*GI* 1 644) suspects (on account of the ideas expressed in them) 2 1-3 11 and 3; and it is true, if 3 were a distinct oracle, there would be

no cogent reason to ascribe it to the author of the two chapters that precede; for the book of the minor prophets is made up of short pieces, some bearing a name and some anonymous, and it is only old usage that ascribes the anonymous pieces to the last preceding prophet whose name is prefixed to his prophecy. But, though the sequence of thought in the book of Zephaniah is not so smooth as a western reader may desire, a single leading motive runs through the whole, and the first two chapters would be incomplete without the third, which, moreover, is certainly pre-exilic (*vv.* 1-4) and presents specific points of contact with what precedes as well as a general agreement in style and idea [see further § 6].

The prophecy may be divided into three parts: (i.) the menace (1); (ii.) the admonition (2 1-3 7); (iii.) the promise (3 8-20).

3. Outline of contents.

The dominating motive of the whole is the approach of a sweeping and world-wide judgment, which the prophet announces as near at hand, and interprets, on the lines laid down by Isaiah in his prophecies about Israel and Assyria, as designed to destroy the wicked and prepare the way for the visible sovereignty of the righteous God of Israel (1 2 *f.* 7 14-18). As regards Judah, which forms the subject of the first and third chapters, the effect of the judgment will be to sift out the idolaters, the men of violence and wrong, the false prophets and profane priests, the hardened men of the world to whom all religion is alike ('the men that are thickened on their lees,' 1 12), and who deem that Yahwè will do neither good nor evil (1 4 6 8 *f.* 12 3 3 *f.*). The men who seek meekness and righteousness will be left, a poor and lowly people, trusting in Yahwè's name and eschewing falsehood (2 3 3 12). To them a future of gladness is reserved, a peaceful life under Yahwè's immediate kingship and loving protection (3 13-17). Such an ideal necessarily implies that they shall no longer be threatened by hostility from without, and this condition is satisfied by the prophet's view of the effect of the impending judgment on the ancient enemies of his nation. The destruction of the Philistines on the W. and of Moab and Ammon on the E. (2 4-10) will enable the Hebrews to extend their settlements from the Mediterranean to the Syrian desert; and their remoter oppressors, the Ethiopians and the Assyrians, shall also perish (2 12-15). That Ethiopia appears instead of Egypt is in accordance with the conditions of the time. It was with Ethiopic dynasts holding sway in Egypt that Assyria had to contend during the seventh century B.C., when the petty kingdoms of Palestine were so often crushed between the collision of the two great powers, and even Psammetichus, the contemporary of Josiah, and the restorer of a truly Egyptian kingdom, was nominally the heir of the great Ethiopian sovereigns.

Zephaniah's conceptions are closely modelled on the scheme of Yahwè's righteous purpose worked out by Isaiah a century before, when Judah first felt the weight of the Assyrian rod; and they afford the most conclusive evidence of the depth and permanence of that great prophet's influence. But in one point there is an important divergence. In Isaiah's view, Assyria is the rod of God's anger; and, when the work of judgment is complete, and Yahwè returns to the remnant of his people, the theodicea is completed by the fall of the unconscious instrument of the divine decrees before the inviolable walls of the holy mountain. Zephaniah, in like manner, looks to an all-conquering nation as the instrument of divine judgment on Judah and the rest of the known world. He represents the day of Yahwè, according to the old meaning of that phrase (WRS, *Proph.*(2) 397 *f.*), as a day of battle (not an assize day); he speaks of the guests invited to Yahwè's sacrifice (*i.e.*, to a great slaughter), of alarm against fenced cities, of blood poured out as dust, of pillage and desolation at the hand of an enemy (1 7 13 16-18). Beyond this, however, all is vague; we hear neither who the sword of Yahwè (2 12) is, nor what is to become of him when his work is completed. Isaiah's construction has in all its parts a definite reference to present political facts, and is worked out to a complete conclusion; Zephaniah borrows the ideas of his predecessor without attaining to his clearness of political conception, and so his picture is incomplete. The foreign conqueror, by whom Judah is to be chastised and Nineveh and Ethiopia destroyed, is brought on to the stage, but never taken off it. It is safe to conclude that the principal actor in the prophetic

4. World-judgment.

ZEPHANIAH

drama, who is thus strangely forgotten at the last, was not as real and prominent a figure in Zephaniah's political horizon as Assyria was in the horizon of Isaiah. At the same time, it is reasonable to think that so complete a reproduction of Isaiah's ideas in the picture of a new world-judgment was not formed without some stimulus from without; and this stimulus has been found, with much plausibility, in the Scythian invasion of western Asia, to which some of Jeremiah's earlier prophecies (as 5 15-17 6 1-6 22-25) also appear to refer (see ISRAEL, § 39, col. 2246).

Be that as it may, the comparison between Isaiah and Zephaniah affords an instructive example of the difference between original and reproductive prophecy. All the prophets have certain fundamental ideas in common, and each has learned something from his predecessors. If Zephaniah draws from Isaiah, Isaiah himself drew from Amos and Hosea. Isaiah, however, goes to his predecessors for general principles, and shapes the application of these principles to the conditions of his own time in a manner altogether fresh and independent. Zephaniah, on the other hand, goes to his predecessor for details; he does not clearly distinguish between the form and the substance of the prophetic ideas, and looks for a final consummation of the divine purpose, not only in accordance with the principles of Isaiah, but on the very lines which that prophet had laid down. These lines, however, were drawn on the assumption that the Assyrian judgment was final and would be directly followed by the reign of righteousness. The assumption was not justified by the event; the deliverance and reformation were incomplete, and the inbringing of the reign of righteousness was again deferred. Zephaniah sees this, but fails to draw the true inference. He postulates a new crisis in history similar to the Assyrian crisis of which Isaiah wrote, and assumes that it will run such a course as to fulfil Isaiah's unfulfilled predictions. But the movements of history do not repeat themselves; and the workings of God's righteous providence take fresh shape in each new scene of the world's life, so that a prediction not fulfilled under the conditions for which it was given can never again be fulfilled in *detail*. As it is an essential feature of prophecy that all ideas are not only presented but thought out in concrete form, and with reference to present historical conditions, the distinction between the temporary form and the permanent religious truth embodied in that form is also essential. The tendency to confound the two—to ascribe absolute truth to what is mere embodiment, and therefore to regard unfulfilled predictions as simply deferred, even where the form of the prediction is obviously dependent on mere temporary conditions of the prophet's own time—gained ground from the time of Zephaniah onwards, and culminated in the Apocalyptic literature. As it grew, the eternal ideas of the great prophets fell into the background, and were at length entirely lost in the crass Jewish conception of a Messianic age, which is little more than an apotheosis of national particularism and self-righteousness.

5. Contrast with Isaiah.

Zephaniah's eschatology is not open to this charge: with him, as with Isaiah, the doctrine of the salvation of the remnant of Israel is inspired by spiritual convictions and instinct with ethical force. The emphasis still lies (3 11-13) on the moral idea of the remnant, not on the physical conception Israel. He does not yield to Amos or Isaiah in the courage with which he denounces sin in high places, and he is akin to Hosea in his firm hold of the principle that the divine governance is rooted not only in righteousness but in love, and that the triumph of love is the end of Yahwè's working (3 17). Yet even here we see the difference between the first and the second generation of prophecy. The persuasion to which Hosea attains only through an intense inward struggle, which lends a peculiar pathos to his book, appears in

Zephaniah, as it were, ready made. There is no mental conflict before he can pass through the anticipation of devastating judgment to the assurance of the victory of divine love; and the sharp transitions that characterise the book are not, as with Hosea, due to sudden revulsion of feeling, but only mark the passage to some new topic in the circle of received prophetic truth.

The finest thing in the book—in spite of certain obscurities, which may be partly due to corruptions of the text—is the closing passage; but the description of the day of Yahwè, the *dies iræ dies illa* of 1 15, which furnishes the text of the most striking of mediæval hymns, has perhaps taken firmer hold of the religious imagination. Least satisfactory is the treatment of the judgment on heathen nations, and of their subsequent conversion to Yahwè (3 8-10). In the scheme of Isaiah it is made clear that the fall of the power that shatters the nations cannot fail to be recognised as Yahwè's work, for Assyria falls *before Jerusalem* as soon as it seeks to go beyond the limits of the divine commission, and thus the doctrine 'With *us* is God' is openly vindicated before the nations. Zephaniah, on the other hand, assumes that the convulsions of history are Yahwè's work, and specially designed for the instruction and amendment of Israel (3 6 *f.*), and neglects to show how this conviction, which he himself derives from Isaiah, is to be brought home by the coming judgment to the heart of heathen nations. Their own gods, indeed, will prove helpless (2 11); but that is not enough to turn their eyes toward Yahwè. Here, therefore, there is in his eschatology a sensible lacuna, from which Isaiah's construction is free, and a commencement of the tendency to look at things from a merely Israelite standpoint, which is so notable a feature of the later Apocalyptic. W. R. S.

It has seemed best to the present writer to leave the preceding interesting and suggestive article substantially as it stood in 1888; and to append in a supplement such additions as seem to be now required.

The integrity of the prophecy has been much more seriously questioned than it was in 1888.

6. Recent criticism. Kuenen (§ 78, 5-8) in 1889, whilst defending 2 1-3 11 against Stade, allowed—on account, chiefly, of the great contrast between the denunciation of 1 2 1 3 1-7 and the promises of 3 14-20—that 3 14-20 was a supplement, dating probably from shortly after the restoration in B.C. 536. Schwally (*ZATW*, 1890, 218 *ff.*, 238 240) ascribes to Zephaniah only 1 2 13-15, and possibly 2 1-4 (doubting this passage on account of ענו and ענוה 2 3); 2 5-12 he treats as exilic (chiefly on account of the 'remnant' 2 7 9), and 3 as post-exilic: the 'single leading motive' appealed to above by Robertson Smith, he considers to be evidence only of unity of *redaction*, not of unity of *author*. Wellhausen (1892, (3)1898) is suspicious of 2 3, and rejects 2 7*a*,*c*, 8-11; he treats 3 as an appendix, added subsequently in two stages, first 3 1-7 (cp Mic. 7 1-6), and then 3 8-20 (cp Mic. 7 7-20)—3 8-20 being separated from 3 1-7 on account of the sudden change of tone and subject, consolations and promises following immediately upon censure and rebuke, and the heathen, not the Jews, being threatened with punishment. Budde (*St. Kr.*, 1893, pp. 393 *ff.*) would admit 2 1-3 3 1-5 7 8 6 [in this order] 11-13 as in harmony with the pre-exilic period, and a suitable sequel to 1; 2 4-15 he rejects, as inconsistent with 1 (Israel no longer, as in 1, the perpetrator of wrong, but the victim of wrong, which is now [*v.* 9 end] to be avenged); 3 9 *f.* is excluded as breaking the connection betwen 3 8 and 3 11; and 3 14-20 is a later lyrical epilogue to 3 11-13. Cornill (*Einl.*, (3)1896, § 35, 3) agrees with Budde. Davidson (1896) defends (99 *ff.*) 2 as a whole, admitting only that 2 4-15 may in parts have been expanded (the *ķīnā*-rhythm seems intended to predominate in these verses; but in some places, especially 2 5 7, it can be restored only by considerable textual alterations, and 2 8-11 do not conform to it at all); in 3 he feels doubtful only about 3 10 (which is textually obscure and uncertain) and about the 'extremely beautiful passage' 3 14-20, which seems to him to spring from a time when the judgments have already fallen upon Israel (*v.* 15), and by its jubilant tone contrasts strangely with the dark picture of guilt 3 1-3 7, and even with the more sombre hopes of 3 11-13. Nowack (1897) in 2 agrees closely with Wellhausen, only rejecting 2 15 as well as 2 7 *a*,*c* 8-11; in 3, however, he rejects only (like Budde) 3 9 *f.* in addition to 3 14-20. G. A. Smith (1898) accepts (2 42-45) the whole of 2 except 2 8-11; in 3 he regards 3 9 *f.* as 'obviously a later insertion,' and 3 14-20 as clearly an epilogue of peace and hope added at the close of the exile or after the return (44 *f.*). Baudissin (*Einl.* 1901, p. 553 *ff.*) denies to Zephaniah only 2 7*a*, *c*, 8-11 and 3 14-20; he thinks 3 1-13 also to be an addition to the original prophecy (which will have ended with 2 12-15), but not necessarily by another hand than that of Zephaniah himself.

Of the passages which have been thus questioned, 2 1-3 may be accepted as Zephaniah's without any scruple: it forms for a prophet the almost necessary counterpart to 1. In 2 4-7 the only suspicious part is the clause 2 7 *c* (cp the remarks below on 3 18-20), which may be a gloss (Wellhausen, Nowack); and 2 13-15 is far more likely to have been written before the destruction of Nineveh in 607 than after it (cp also § 3). Against 3 1-8 11-13 no reasonable objection can be urged: as Budde (396) says, we are here in the pre-exilic Jerusalem, without any trace of the exile and its experiences. Davidson remarks in particular that 3 1-7 is characterised generally by the same moral earnestness as 1 2-2 3, and that the terms of 3 1-4 are such as are not likely to have been applied to Jerusalem, except in the pre-exilic period: 3 11-13 describes the Jerusalem of the future, purified by judgment, and naturally therefore differs in tone from 3 1-7. Schwally's main argument (231 *ff.*) for rejecting 3 8 cannot be sustained: there is no sufficient reason for supposing that the nations are there gathered together *against* Israel (as in Ez. 38 *f.* and post-exilic passages); they are assembled for punishment, and Israel is included among them. There is, however, a greater consensus against Zephaniah's authorship of 2 8-11 3 9 *f.* and 3 14-20. It is objected to 2 8-10 (the oracle of Moab and Ammon) that there is no sufficient motive for the mention of these countries about 625 B.C. (the Philistines, 2 5-7, would be on the line of march of the Scythians towards Egypt; indeed, Herodotus expressly says that they passed by Ashkelon, 1 105), that the reproaches of 2 8 10 presuppose the destruction of Jerusalem, which gave occasion for them (Ezek. 25 3 6 8), that (see Budde above) the attitude of the prophet towards Judah is here the exact opposite of that taken by him in 1, and that the elegiac measure, which at least predominates in 2 4-7 12-15, does not appear in 2 8-10. It may, however, be doubted whether the terms of 2 8 10 necessarily refer to the events of B.C. 586, and also whether our knowledge of the times is sufficient to justify us in declaring that no adequate motive then existed for the unfavourable mention of these arrogant and encroaching (Is. 16 6 Am. 1 13) nations (Davidson compares Dt. 23 3 6); if Ezekiel, in spite of his uncompromising sense of Judah's sin (1-24), nevertheless resents strongly (25 1-11) the unfriendly attitude of Moab and Ammon, why may not Zephaniah have done the same? The argument derived from the change of rhythm possesses weight; but it implies that we are right in emending the context (2 5 7 12) so as to restore the *ķīnā*-rhythm, and also that we have valid grounds for supposing that Zephaniah would desire to preserve rhythmical uniformity throughout the entire passage (2 8 'I have heard' is an evident reminiscence of Is. 16 6). 2 11, however, connects imperfectly both with 2 10 and with 2 12 (observe 'ye *also*'); and may therefore be the addition of a reader, who desiderated here the two thoughts which the verse contains; and 3 9 *f.* (the *conversion* of the nations)[1] connects extremely badly (notice *v.* 9 'for then') with 3 8 (the *judgment* on the nations—if not, indeed, their *destruction*, 1 2 *f.*). As regards 3 14-20, it is, no doubt, possible that it is, in G. A. Smith's words (73), a 'new song from God,' which came to some prophet, shortly after the return, and expressed for the remnant that survived, the 'afflicted and poor' people of *v.* 12, the brighter hopes which the restoration fostered. The picture which the verses delineate is, however, upon any view of their origin, an ideal one; and the question remains whether it is more than a lyrical development of the thought of *vv.* 11-13, such as Zephaniah, realising vividly in spirit the blissful future, might have con-

[1] There is manifestly some corruption in 3 10; but the homage of the nations is more consonant with the context than the homage of the exiled Jews.

structed himself. Undoubtedly the terms of *vv.* 18-20 presuppose exile, whilst *vv.* 11-13 suggest nothing more than the purification of Judah in its own home; but both exile, and restoration from exile, are contemplated by Jeremiah, and Zephaniah might have added the closing verses of his book many years after 3 11-13 was written, at a time when exile was seen more clearly to be looming in the future. It is, however, true that 3 18-20 is more open to suspicion than 3 14-17. A final decision on the entire question will hardly be arrived at on the basis of Zephaniah alone: it will depend on the conclusion formed by the critic on passages of similar import found in many of the other prophets (cp *Introd.*(7) 229 *f.* 273 306 *f.* 318 330 334; and Cheyne, Pref. to WRS, *Proph.*(2) xv *ff.*).

7. Text. The text of Zephaniah, while on the whole well preserved, is in several passages open to grave suspicion, and in some unquestionably corrupt. Many of these have, however, been corrected, especially by Wellhausen, chiefly on the basis of 𝔊.

A full discussion of the text belongs to a commentary (see esp. We., Now., and GASm.); but a few of the more notable passages may be briefly noticed here: 1 3, 'and the stumbling blocks with the wicked,' is incongruous with the context, and prob. (We. Now.) a late gloss; 1 5*b* omit prob. הַנִּשְׁבָּעִים and the ו after לַיהוה (reading then, 'and the worshippers of Yahwè, who swear by their king' ['Molech']); 2 1 הִתְבּוֹשְׁשׁוּ וָבֹשׁוּ (Che. Bu.) 'get you shame, and be ye ashamed, O nation unabashed,' is on the whole most prob. (קוֹשֵׁשׁ means 'to gather stubble'); 2 2 for the first two clauses (to *chaff*) read with Wellhausen (nearly as 𝔊) 'before *ye become as chaff that passeth away*' (בְּטֶרֶם לֹא־תִהְיוּ כְּמֹץ עֹבֵר); 2 6*a* read probably (𝔊 We.) 'and Chĕrēth shall be an habitation for shepherds' (וְהָיְתָה כְּרֵת נְוֵה רֹעִים: 'with cottages'—or even 'with caves'—'for' is an impossible rendering of the existing Heb.); 2 7 read (𝔊 We.) 'and the coast *of the sea* (חֶבֶל הַיָּם), and (We.) 'by the sea' for 'thereupon' (עַל הַיָּם for עֲלֵיהֶם); 2 11 at least רִזָּה, 'make lean' (cp Is 10 16 17 4, though the word is here strange) for רָזָה; 2 14 כָּל־חַיְתוֹ־גוֹי cannot be right ('all the beasts of the nations' is no translation of it); then for קוֹל '(their) voice' read probably (We.) כּוֹס, 'the owl' (Ps. 102 7), and for חֹרֶב, 'desolation,' עֹרֵב, 'the raven' (𝔊 Ew. We.: cp Is. 34 11); 3 3 גָּרְמוּ ('leave,' lit. *cut off*, hence *reserve* (?); or 'gnaw the bones,' denom. from גֶּרֶם) is very suspicious; 3 7 read with 𝔊 We., for 'so . . . concerning her,' 'and all that I have commanded her shall never be cut off from her eyes' (only מֵעֵינֶיהָ for מְעוֹנָהּ); 3 8 for לְעַד, 'to the prey' read prob., with 𝔊 Pesh., Hitz., Bu., We., Now., GASm., לְעֵד, 'for a witness'; 3 10 עֲתָרַי בַּת פּוּצַי ('my suppliants, the daughter of my dispersed'?) is extremely suspicious; 3 15 read, with 𝔊 Pesh. and nearly all moderns, תִּרְאִי, 'see,' for תִּירְאִי, 'fear'; 3 17 Buhl (*ZATW*, 1885, p. 183) for יַחֲרִישׁ proposes plausibly יְחַדֵּשׁ, 'will *renew* (Ew. § 282 *d*) his love'; 3 18*a* 'for' (RV) is less probable than 'away from'; 3 18*b* is suspicious, though the clause might be rendered (better than in RV), 'upon whom [referring to 'thee'] reproach is a burden'; 3 20 'and at that time I will gather thee' yields an excellent sense, but it cannot be extracted from the existing text.

8. Religious teaching. As has been remarked already (§§ 3-5), Zephaniah, in his prophetic ideals, follows largely in the steps of Isaiah. With Zephaniah as with Isaiah, the central idea is that of a *judgment*, to be executed by Yahwè upon Judah, which will sweep away from it the proud, the religiously indifferent, the scoffers, the men who abuse their privileges and their position (3 3 *f.*), and the impenitent, who will not listen to 'correction' (3 2 7), but which will leave behind a meek and pious 'remnant,' who trust simply in their God (2 3 3 12 *f.*; cp Is. 14 32, and contrast Is. 2 11 12 17: Zephaniah, it is to be noted, emphasises more strongly than Isaiah does the particular virtues of 'meekness' and 'humility'). With Zephaniah, however, the judgment, more distinctly than in Isaiah (3 13), is a *world*-judgment: it embraces *all* nations (1 2 *f.* 3 8), not only Israel (1 4 *ff.*). The figure of Yahwè's 'Day' is doubtless suggested by Is. 2 12 *ff.*; but the imagery of war and invasion, under which its approach is pictured (1 14-18), is Zephaniah's own, though found in Isaiah in other connections (*e.g.* 5 26-30). The great and abiding religious value of the book consists in the profoundly earnest moral tone which pervades it, and in the prophet's deep sense of the sin of his people, and of the stern need which impels Yahwè, who would only too gladly rejoice over his people, if it would permit him to do so (3 17), to visit it with a discipline such as will purge away its unworthy members. Zephaniah's gospel has been described as 'simple and austere.' It is true, he goes back to and insists with pathetic eloquence on the most primary and rudimentary of religious duties, earnestness and sincerity of life, justice and integrity, humility and a simple trust in God. 'A thorough purgation, the removal of the wicked, the sparing of the honest and the meek; insistence only upon the rudiments of morality and religion; faith in its simplest form of trust in a righteous God, and character in its basal elements of meekness and truth—these alone survive the judgment' (GASm., 71). He does not, as other prophets commonly do, call the wicked to repent, or dwell upon the divine grace which is ever ready to forgive the penitent: it may be that the doom seemed to him to be too imminent; the time for pleading was past; there remained only the separation of the evil from the good. But he recognises and teaches clearly the moral qualities which have a value in Yahwè's eyes, and will not be swept away when the judgment comes (cp Is. 33 14-16). Another point which is worthy of notice is Zephaniah's comprehensive view of history. Yahwè's hand guides the movement of the nations; and by them he accomplishes his purposes of discipline, purgation, and salvation (cp Is. 10 5 *ff.*). His ultimate purpose is that not only Israel (3 11-13), but also the nations (2 11*b* 3 9 *f.*, —whether these verses be Zephaniah's or not), shall become the loyal and faithful servants of God.

9. Literature. Ewald, *Prophets*, 3 14 *ff.*; the Commentaries on the Minor Prophets in general (Hitz., Keil, Pusey, Wellh., Nowack, GASm.); A. B. Davidson in the *Camb. Bible* (1896); Duhm, *Theol. der Proph.* (1875), pp. 222-5; Kirkpatrick, *Doctr. of the Prophets*, 253 *ff.*; J. A. Selbie's art. in Hastings' *DB*; and the discussions of Kuenen, Schwally, etc., which have been already mentioned. An apocryphal prophecy ascribed to Zephaniah ('And the spirit took me, and carried me up into the fifth heaven, and I saw angels called lords,' etc.) is quoted by Clem. Alex. *Strom.* 5 11, § 77; some other fragments, preserved in a Coptic version, have also been discovered and published lately: see APOCRYPHA, § 21, Schürer, *TLZ*, 1899, col. 8 (who agrees that Steindorff's 'unknown' Apoc. is probably that of Zeph.), *GJV*(3) 3 271 *f.* [See also PROPHETIC LITERATURE, § 40, and SCYTHIANS, § 6, on Zephaniah and Jeremiah, with reference to the prophecies on 'the Scythians.']

W. R. S., §§ 1-5, 9 (partly);
S. R. D., §§ 6-8, 9 (partly).

2. A Kohathite (1 Ch. 6 21 [36], σαφανια [BL], -ιου [A]).

3. *b.* MAASEIAH (1), a priest temp. Zedekiah; Jer. 21 1 29 25 29 37 3 52 24 (B𝔑A om.) 2 K. 25 18 (σαφονιαν [L]).

4. Father of JOSIAH (2); Zech. 6 10 14.

[All these 'Zephaniahs' have directly or indirectly a historical interest, and even if it be contended that the prophet Zephaniah must have given his name a religious interpretation (cp the statement in Is. 8 18), and have considered himself a guardian of the truth (cp 2 3, though to be sure Schwally and Wellhausen question Zephaniah's authorship of this passage) that the faithful will be protected in the day of Yahwè's anger, yet it is at any rate conceivable, and, if we consider the mass of evidence arising from parallel names, even probable, that the 'Zephaniahs' in general belonged to families of near or remote Jerahmeelite—*i.e.*, N. Arabian—affinities,[1] and the view is capable of being defended that all the names with which 'Zephaniah' is combined in the OT (passing over Zeph. 1 1, in spite of the suggestion 'Cushi') are most easily and naturally explained as names of the Negeb. From this point of view, 'Zephaniah' (cp Elizaphan and SHAPHAN; also *Crit. Bib.* on Jer. 20 1) is an expansion of Ṣaphan or Ṣaphon, the name of a N. Arabian district—cp ZAPHON; and a parallel to the confusion which may seem to have arisen can be found in the name Eliahba (אליחבא), if this

[1] It is worth noticing that there is a well-known Israelite gem (Brit. Mus., No. 1032), with this legend, לשחרחר בן צפניהו, where, even if שחרחר be rendered 'blackish' or 'brownish' (so Clermont-Ganneau, *PEFQ*, 1902, p. 267), we must at any rate suppose that it is a fantastic variation of אשחור=שַׁחֹר, so that both father and son have names which originally belonged to districts of N. Arabia.

is really a modification of ירחמאל[ר]י, as maintained in *Crit. Bib.* on 2 S. 13 32. This has a distinct bearing on the history of Israelite religion. The third Zephaniah held a high office in the temple. In Jer. 29 26 he appears as the successor of 'the priest Jehoiada,' and as having the right of granting or refusing access to the temple. It was held to be his duty to expel prophetic enthusiasts; nevertheless he abstained from hindering Jeremiah. In 2 K. 25 18 (and Jer. 52 24?) he is represented as second priest (see PRIEST, § 5, end). The fourth Zephaniah was father of a certain Josiah, into whose house the bearers of rich offerings from בבל entered (temp. Zerubbabel). See ZERUBBABEL, and cp HEN. T. K. C.]

ZEPHATH (צְפַת; § 20; сєфєк[1] [BL], сєфєр [A]), a Canaanite city taken by the men of SIMEON (§ 4) and Judah (Judg. 1 17). Probably a corruption of ZAREPHATH (*q.v.*) [Che.]. For a northern Zephath see PALESTINE, § 15, col. 3546, no. 116.

ZEPHATHAH (צְפָתָה, Jos. *Ant.* viii. 12 1, сαβαθα), a valley 'by MARESHAH' (*q.v.*), where Asa defeated Zerah the Cushite, 2 Ch. 14 10. If the Mareshah referred to is the Mer'aš S. of Bēt-jibrīn, it is simplest to read צפונה, Ṣāphōnāh, with Hitzig, Grätz, Köhler, Buhl, Benzinger, following 𝔊[BAL], κατὰ βορρᾶν (Pesh. omits).

It is possible, however, that there was a Mareshah in the Negeb, near Zephath or Zarephath, and that Asa's fight with Zerah was to defend Judahite possessions in the Negeb. The mention of Gerar (*v.* 14) somewhat favours this view (see GERAR). This affects the question as to the birthplace of Micah, and the geography of Mic. 1 10 *ff.* T. K. C.

ZEPHO (צְפוֹ; сωφαρ [ADEL]), b. Eliphaz, an Edomite chieftain or rather, reading אַלֻּף, clan (Gen. 36 11 15). In 1 Ch. 1 36 his name appears as **Zephi** (צְפִי, σωφαρ [BA], σεπφουη [L], a secondary form from σεπφουρ]). After 𝔊 (except L in 1 Ch.) we may read צוֹפַר. See ZOPHAR.

ZEPHON (צְפוֹן), b. Gad, whence the family of the ZEPHONITES (הַצְּפוֹנִי): Nu. 26 15 (𝔊, *v.* 24, сαφωɴ [BL], om. A; сαφωɴ[є]ι [BAL]). In Gen. 46 16 the name appears as ZIPHION (צִפְיוֹן, σαφων [ADL]).

Cp ZAPHON, which may with much plausibility be taken as the name of a district in N. Arabia (see *Crit. Bib.* on Is. 14 13 Jer. 1 13 *ff.* 6 1 Ezek. 32 30 38 6 etc.).

The Gadite clans had Jerahmeelite names (*e.g.*, Shuni, Areli), perhaps recording a sojourn in the Negeb. But cp GAD, § 11.

ZER (צֵר; τγροс [BAL]) an unknown 'fenced city' of Naphtali mentioned between ZIDDIM and HAMMATH (Josh. 19 35). It is probable that the text has become confused and amplified through the recurrence of צר(מב) and (צד)ים, and that צר should be omitted.

ZERAH (זֶרַח, if primarily a personal name [cp § 11] may be equivalent to אזרח [§ 50], or to the Sab. n. pr. דרחן דרח 'magnificent'; cp ZERAHIAH, also JACOB, col. 2311; ζαρα [BADEFL]).

1. Twin-brother of Perez (Gen. 38 30 [J], 46 12 [P] AV in both ZARAH, Nu. 26 20 [P], Mt. 1 3, AV ZARA); see JUDAH, § 2 *f.*, PEREZ. In the only other passage prior to P, he appears as the ancestor of ACHAN (Josh. 7 18 24 [JE], cp 7 1 22 20 [P]). According to 1 Ch. 2 6 his sons were Zimri, Ethan, Heman, Calcol, and Dara (see ETHAN). The B'ne Zerah were a family[2] living in Jerusalem in post-exilic times (1 Ch. 9 6 ζηρα [L]), a member of which was the royal commissary for Jewish affairs, Pethahiah (Neh. 11 24; om. BN*A, ζαρε [N^c.a]).

The patronymic, ZARHITE, RV **Zerahite** (Nu. 26 20 הַזַּרְחִי; ὁ ζαρα[ε]ι [BAFL]) is used of Achan (Josh. 7 17 [ὁ] ζαρα[ε]ι [BAFL]), Sibbecai (1 Ch. 27 11 τῷ ζαρια [B], τῷ ζαραιτη [L], om. A), and of Maharai (*ib. v.* 13 τῳ ζαρει [B], τῷ -ραι [AL]); and occurs also in EV under the form IZRAHITE (הַיִּזְרָח, rather הַזַּרְחִי) applied to Shamhuth, 1 Ch. 27 8. Here Marquart, *Fund.* 19, would read ש הַ(חֲרוֹרִי לְ) זַרְחִי, see SHAMMAH, § 5.

2. A Gershonite Levite (1 Ch. 6 21 [6] 41 [26], ιααρα, ζααραι [B], αζαριου [A in *v.* 41]), whose son is named Ethni (*v.* 41)—a combination which resembles Ethan b. Zerah (*v. sup.*); see ETHAN, 3.

---

[1] For the final κ, cp σαφεκ, 1 S. 30 29 (B); σαραδακ Nu. 34 8. In each case κ (of και) follows.

[2] See Bertheau's commentary, but note the (less probable) alternative view offered in Ryle, *Ezra-Neh.* 283.

3. b. Reuel [from Jerahmeel?], an Edomite clan (pointing אַלֻּף for אַלּוּף, EV's 'duke'), Gen. 36 13 17 [P], (ζαρε [ADEL], ζερε [D *v.* 17]), 1 Ch. 1 37 (ζαρες [B], ζαρε [B^a.b AL]), represented as the father of JOBAB [*q.v.*] (Gen. 36 33 [om. E] 1 Ch. 1 44).

4. b. SIMEON (§ 9), Nu. 26 13 [P]; 1 Ch. 4 24 (ζαρες [B], ζαραε [A]), also called ZOHAR (צֹחַר; σααρ; Gen. 46 10 [σααλ D], Ex. 6 15). From him is derived the patronymic ZARHITE, RV ZERAHITE; cp 1 *supra.*

5. Zerah the Cushite, (הַכּוּשִׁי; ζαρε ὁ Αἰθιοψ; Jos. *Ant.* 8 12 1 ζαραιος), defeated by Asa, king of Judah (2 Ch. 14 9-15 [8-14]). The overwhelming defeat which Asa is said to have inflicted upon Zerah, in spite of his relatively small force, is a detail peculiar to the Chronicler. To take the story as it stands is impossible (see CHRONICLES, § 8 *f.*). What Asa's power really amounted to we know from 1 K. 15 16-22; of Zerah the Cushite nothing is reported elsewhere. It is true, many OT critics (incl. Ewald and Graf) have adopted Champollion's view that Osorkon I. (22nd dyn.) is intended; others (incl. Sayce, *Crit. Mon.* 363 *ff.*) have preferred Osorkon II. But why either king should be called a Cushite has not been explained[1] (see the suggestions described in Kohler, *Bibl. Gesch.* 3 321 *ff.*), and without this it is useless to show that Osorkon II. made a campaign against Syria and Palestine (Naville, Bubastis [*EEF*], 1891, p. 51). Other scholars (incl. Kuenen, Stade, Wellh.) have therefore rejected the narrative altogether. Winckler, however, has pointed out that, as probably in the case of the captivity of MANASSEH [*q.v.*], there may be a historical element in the statements of the Chronicler, and suggested that כושי should perhaps be כַּשִּׁי Kaššite (= Chaldæan), and that the invasion came from Babylonia (*AT Unters.* 160 *ff.*). More satisfactory is his later view (*KAT*(3) 144) that Zerah was a 'Cushite,' in the sense that he was a ruler of S. Arabia (Ma'in). Hommel, on the other hand, points out that several of the oldest princes of Saba bore the title דרח (= זרח; see *ad init.*), and thinks that a Sabæan invasion is intended.[2] The evidence of the Hebrew texts, however, points rather to N. than to S. Arabia as indicated by Cush, and in the Ass. texts 'Kuši and Meluḫḫa' is the ordinary designation of N. Arabia.

That Zerah is a 'Jerahmeelite' name is beyond question, and 'Cushite' and 'Miṣrite' are so nearly equivalent that 'Zerah the Cushite' may have meant much the same as Zerah the Miṣrite. Cp 'Cushi, king of Miṣrim,' if we may so read in 2 Ch. 12 2.[3] This view seems to be confirmed by the description of Asa's success in 2 Ch. 14 13-15. The 'cities about Gerar' are surely the cities of the Cushites. Now the 'Gerar' referred to is not Umm el-Jerār, 5 m. S. of Gaza, but in the Wādy Jerūr, SW of 'Ain Gadīs (see GERAR). In *v.* 15 moreover, underlying the present corrupt text, is the statement that Asa and his men smote and carried captive the Jerahmeelites.[4] Clearly 'Jerahmeelites' and 'Cushites' are synonymous terms. Add to this that in 16 8 the allies of the Cushites are called the Lubim. 'Lubim' is miswritten for 'Ludim'—*i.e.*, not the Lydian mercenaries of Egypt, but 'the Gil'adim'—*i.e.*, the men of the southern Gilead (in the Negeb), the same people who are mentioned in 2 Ch. 12 3 as the allies of 'Cushi, king of Miṣrim.'

It may be objected (cp GASm. *Twelve Prophets*, 2 153, n. 6) that the mention of Mareshah (2 Ch. 14 9 *f.*) favours the theory of an Egyptian invasion, and at any rate is adverse to the view that the southern Gerar is referred to. But the mention of the valley of Zephathah (*v.* 10) suggests that a Mareshah in the Negeb is intended, and this suggestion accords with the other phenomena pointing to a Cushite—*i.e.*, N. Arabian, invader. See ZEPHATHAH. It is probable that the feud between the Israelites and the Jerahmeelites, Cushites, and Miṣrites was long anterior to the fall of the kingdom of Judah. T. K. C.

---

[1] Sayce, 364, frankly calls it a mistake of the Chronicler. In fact, the kings of the twenty-second dynasty bear for the most part Libyan names (see EGYPT, § 64).

[2] *Exp.T* 8 378, cp 431 *f.*; *AHT* 315, note 1.

[3] We assume that שישק is miswritten for כושי. See SHISHAK, § 2.

[4] Read וגם ירחמאלים הִכּוּ וַיִּשְׁבּוּ ישמעאלים וירחמאלים. Hommel, it is true, emends differently (*Exp.T*, as above). 𝔊 has σκηνὰς κτήσεων [κτηνῶν], τοὺς ἀμαζον[ι]εῖς (cp 22 1 αλ[ε]ιμαζονεῖς [BA], αμαζονιειμ [L], where MT has לַמַּחֲנֶה) ἐξέκοψαν; Pesh. 'tents of the Arabs.' But אהלי and מקנה are both corrupt fragments of ירחמאל.

ZERAHIAH (זְרַחְיָה 'Yahwè has dawned,' § 35, cp IZRAHIAH, unless both these names are modifications of ethnics, see ZERAH, and note that the whole body of names in the genealogical scheme connecting Eleazar b. Aaron with Ezra, etc., and the names of Izrahiah's five sons in 1 Ch. 7 3, and that of Zerahiah's son in Ezra 8 4, admit of being regarded as modified ethnics [so Che.]; *ζαραια* [BAL]).

1. b. Uzzi, father of Meraioth (1 Ch. 6 6 [5 32] [*ζαραιᾱ, ζαριας* A] 51 [36], Ezra 7 4 = 4 Esd. 1 2 ARNA). In 1 Esd. 8 2 he is called ZARAIAS (*ζαραιου* [AL], om. B).

2. Father of ELIEHOENAI (= Ishmael?), of the b'ne Pahath-moab—*i.e.*, (most probably) Nephtoah-miṣṣur—a district in the Negeb, Ezra 8 4 (*ζαρεια* [B]) = 1 Esd. 8 31 ZARAIAS (*ζαραιου* [BAL]). See *Crit. Bib.*

ZERED, THE VALLEY OF, or **BROOK OF** (נַחַל זֶרֶד; Nu. φαραγγα ζαρετ [B], ζαρε [A], ζαρεθ [L]; Dt. φ. ζαρετ [BAL, but ζαρε A^a? once], ζαρεθ [F]; *torrentem Zared*), named in E's itinerary in Nu. 21 12, also in Dt. 2 13 *f.*† The prevailing tendency is to identify it with the Wādy Kerak (Dillmann, Driver, Steuernagel, A. T. Chapman), a deep and narrow gorge running past Kerak in a NW. direction to the Dead Sea. In the upper part of its course it is called the Wādy 'Ain el-Franji.

There is, however, reason to think that the document in Nu. 21 has come down to us, especially so far as relates to geography, in a very distorted form. See NAHALIEL, WARS OF THE LORD, BOOK OF. Upon this theory, which demands close examination, 'Zered' should be some place-name in the E. of the Negeb, and the name 'Zered' is most easily accounted for as a corruption of Jizreel (JEZREEL, 2). T. K. C.

ZEREDA, RV **Zeredah** (צְרֵדָה), 1 Ki. 11 26 and **Zeredathah** (צְרֵדָתָה) AV, 2 Ch. 4 17. See ZARETHAN.

ZERERATH, RV **Zererah** (צְרֵרָה; γαραγαθα [B], *καὶ* [*ἦν*] *συνηγμένη* [AL]), a place towards which the Midianites fled, in the story of Gideon (Judg. 7 22). See GIDEON, ZARETHAN.

ZERESH (זֶרֶשׁ; ζωσαρα [BℵL*αβ*], σ. [A]), wife of Haman the Agagite, Esth. 5 10 14 6 13.†

The importance attached by Haman to her counsel favours the view that she was originally a representative of some place or clan. Comparing ZETHAR (*q.v.*), and assuming that the scene of the story of Esther was originally laid in the Negeb, we may perhaps see in Zeresh (Zereth?) a mutilated form of Zarephath. Earlier critics explained it as 'golden' (Pers. *ser*, 'gold'). For another view see Jensen, *WZKM*, 1892, p. 64. Cp also PURIM, § 7, ESTHER, § 3. T. K. C.

ZERETH (צֶרֶת), b. Helah, a Judahite name, 1 Ch. 4 7 (*αρεθ* [B], *σαρεθ* [A], *σαρηθ* [L]). Perhaps a corrupt form of צָרְפַת (Che.).

ZERETH-SHAHAR, or (AV), **Zareth-shahar** (צֶרֶת־הַשַּׁחַר; σεραδα και σ[ε]ιων εν τω ορει εναβ [B], σαρθ και σιωρ ε. τ. ο. ενακ [A], σαρθ ε. τ. ο. εμακ [L]), a Reubenite city of doubtful name (see below), situated 'on a mountain of the valley' (Josh. 13 19)—*i.e.*, on one of the mountains E. of the Jordan valley (cp *v.* 27), and not impossibly on that described at length in Jos. *BJ* vii. 6 1-3 (see MACHÆRUS). To the NW. of this mountain is the *Wādy eṣ-Ṣara*, with a hot spring called '*Ain eṣ-Ṣara* (*ZDPV* 2 221 244; cp Tristram, *Land of Moab*, 257 *ff.*), in which name Buhl (*Pal.* 268) finds an echo of צרת, Ṣereth.

The name Zereth-hašsahar, however, seems to become clearer from the point of view adopted in the article SIHON. השחר should represent אשחור 'Ashḥur' (cp 1 Ch. 4 5), and צרת should come from צרפת, 'Zarephath.' Josh. 13 16-20, as it now stands, may not correctly represent the original document. T. K. C.

ZERI (צְרִי), 1 Ch. 25 3. In 1 Ch. 25 11 IZRI.

ZEROR (צְרוֹר; αρεδ [BA], σαρα [L]), a Benjamite, ancestor of Kish (1 S. 9 1†); in 1 Ch. 8 30 ZUR. Marquart (*Fund.* 15) prefers צרד. מצור might be possible (cp ZEDAD).

ZERUAH (צְרוּעָה; σαρουα [A], on BL see col. 2404, n. 2), mother of Jeroboam I. (1 K. 11 26). The name is probably a corruption of מִצְרִיָּה, 'a Miṣrite (N. Arabian) woman.' See JEROBOAM, 1, and cp ZERUIAH. T. K. C.

ZERUBBABEL (זְרֻבָּבֶל, ζοροβαβελ, commonly explained as = זְרֻעַ בָּבֶל [cp Kön. 2 481, *l.* 2], 'begotten in Babylon.' The name may plausibly be brought into connection with a name found on two Babylonian contract tablets (marked V. A. Th. 81 and V. A. Th. 143 respectively, in Peiser's *Bab. Verträge* [1890]), ZER-TIN-TIR-KI, which is usually read Zêr- or Zîr-Babili, though as a matter of fact the phonetic reading Zârubabil is found. The meaning of this name, in its full form, according to C. H. W. Johns, is probably 'Marduk preserves the rightful seed [heir] to Babylon.' This assumes that the name is a contraction from Marduk-zâru-Babili-lišir; see, however, below).

1. Data.

The facts of the history of Zerubbabel are much disputed, and the OT references still appear to await some fresh illumination. These references (excluding the manifest interpolations[1] in 1 Esd. 4 13 5 6) are: Hag. 1 1 12 14 2 2 4 21 23 Zech. 4 6 1 Ch. 3 19 Ezra 2 2 3 2 5 2 Neh. 7 7 1 Esd. 5 8 56 70 6 2 18 27 29†. Authorities agree in stating that he was son of Shealtiel (or, as thrice in Haggai, Shaltiel), except Zechariah, who is silent as to his parentage, and the Chronicler, who makes him the son of Pedaiah, and the nephew of Shealtiel. The Chronicler represents him as a descendant of David. In the other passages this is not stated. Haggai four times appends to his name the title '*peḥah* (see GOVERNOR, 1) of Judah,' and Zechariah implies that he occupies the highest position among the Jews at home. In Ezra 2 2 = Neh. 7 7 he is represented as the leader of a band of captives who returned to Judah. Haggai, by the title 'my (= Yahwè's) servant' (Hag. 2 23; cp Zech. 3 8), indicates that Zerubbabel has received a special mission from God, and both Haggai and Zechariah (cp also Ezra 5 1 *f.*) represent Zerubbabel and Jeshua or Joshua, the high priest, as having been instigated by them to rebuild the temple. The most remarkable reference of all remains. It is in the same passage of Haggai which contains the address to Zerubbabel as 'my servant,' and consists of an emphatic statement that when the great overthrow of the powers (or power?) hostile to Israel occurs, Zerubbabel will receive the highest proofs of the divine favour and protection. These are the few dry, bare facts which find expression in the MT. The earlier tradition, however, was certainly not so meagre, and traces of the fuller record can, in all probability, yet be discerned. It is only because the points to be examined are so new that there is still considerable divergence of opinion.

A provisional view, which probably contains some historical truth, is as follows. The family of David was not altogether ruined by the catastrophe of the exile. There is a tradition that even Jehoiachin benefited by a change of feeling towards him on the part of Nebuchadrezzar's son and successor, EVIL-MERODACH (*q.v.*). It is also stated that SHESHBAZZAR (*q.v.*), the 'prince' (נשיא) or 'governor' (פֶּחָה), received the sacred vessels from Nebuchadrezzar, and went with a royal commission to rebuild the temple, that he did actually lay the foundation-stone, but that the building was soon afterwards interrupted. This Sheshbazzar has been identified with the Shenazzar of 1 Ch. 3 18, who is represented as a son of Jeconiah. It is supposed that Zerubbabel had succeeded his uncle in the governorship by the year 520 B.C., when Haggai and Zechariah stirred up the people to resume the building of the temple, and that the breaking out of revolts in different parts of the Persian empire may have stimulated hopes of the revival of an independent

2. Provisional view.

[1] On these see EZRA (THE GREEK), § 6, and cp Guthe's notes in Kau. *Apokr.* (1898). That the *νεάνισκος* of 1 Esd. 4 58 was originally Zerubbabel (cp Jos. *Ant.* xi. 3 1) is plainly impossible, even if Zerubbabel was not the same person as Sheshbazzar or Sanabassar, and was not the leader of the first migration of the Jews to Palestine. According to Howorth, however, the theory respecting Zerubbabel here referred to was 'a sufficient reason, and the only one, for the erasion of this particularly edifying passage from the canonical Ezra, and in consequence its exclusion from the canon' ('Some Unconventional Views on the Text of the Bible,' *PSBA* 23 316).

kingdom under the Davidic prince Zerubbabel. It is also held by some that there is evidence of this in the OT itself. Zechariah (6 10) mentions the arrival at Jerusalem of four Jews from Babylon, who brought gifts of silver and gold. Wellhausen thinks that in Zech. 6 11 the text has been deliberately tampered with. The crown referred to must surely have been for Zerubbabel. This must either have been expressly stated or implied. Wellhausen himself is content with omitting the words relative to the high priest, Joshua, as inserted at a time when the high priest was virtually a crowned king; but it may also be held that the name Joshua has displaced the name Zerubbabel.[1] However this may be, the sudden disappearance of Zerubbabel from the theatre of political history is remarkable.[2] It has been suggested that he may have been recalled or even put to death by the Persians, and that the attempt of Tattenai (see TATNAI) the satrap of Syria to stop the building of the temple may have some connection with this, or may at any rate imply a suspicion of the disloyalty of the Jews. Later, we find Sanballat professing that there is a report that Nehemiah aims at the crown (Neh. 6 7). This report was doubtless erroneous; but it may plausibly be supposed to be based on the fact that a Jewish pretender had really come forward in the past.[3]

For the further development of similar ideas see Sellin, *Serubbabel* (1898), where it is supposed that Zerubbabel is the martyr referred to (many think) in Is. 53, and the same writer's *Studien zur Entstehungsgesch. der jüd. Gemeinde nach dem bab. Exil*, 2 (1901), where some retractations are made, and the theory is placed on what appears to the writer a more secure basis. Sellin still holds that Zerubbabel came to a violent end, but no longer rests this on Is. 53 or on any other passage of the OT. Winckler, however, is bolder. He thinks that both Sheshbazzar and Zerubbabel were set aside by acts of the Persian authorities, and that, whilst Sheshbazzar was treated gently, Zerubbabel suffered the punishment of impalement; the eulogium of Zerubbabel is to be found in Is. 53.[4]

Stade (*GVI* 2 127 [1888]) speaks more vaguely. 'If the supreme Persian power heard of the hopes attaching to the Persian governor Zerubbabel, we cannot wonder that it did not accommodate itself to the rôle of a tree undergoing the embrace of ivy.'

It is possible, however, that these theories need to be revised in the light of a more thorough criticism of the text of the OT narratives.

3. A new suggested theory.

The story underlying Ezra, Nehemiah, and the early part of Daniel refers, it may be held, to a N. Arabian captivity of the Jews and to a subsequent change in their relations to their captors. It is unsafe to place any reliance on the proper names in their present form. זרבבל (for the common explanations of which little can be said[5]) may, like איזבל and זבול, be a corruption (manipulated by the redactor) of ישמעאל (Ishmael). This has the advantage of according with the theory, which appears to be well supported, that the names given in 1 Ch. 3 19 to the sons of 'Zerubbabel,' beginning with Meshullam (=Ishmael), are all corruptions of gentilics or ethnics belonging to the Negeb. That 'Zerubbabel' was really a descendant of David is possible, but by no means certain,[1] and the same may of course be said of Sheshbazzar.[2] Even that they were returned exiles is doubtful.[3] This is not the place to rewrite the history of this period—or rather to collect the fragments of its history—from the new point of view. But we may at any rate suggest that critics of Zechariah may have erred in supposing that the donors of the silver and gold mentioned in Zech. 6 9 *ff.* were 'Babylonian Jews.' These persons appear rather to have been foreigners such as are referred to in Is. 60 13, and their gifts are such מנחות ('offerings') as Haggai most probably refers to in the famous prophecy in Hag. 2 7. It may still, however, be held that the name of 'Joshua ben Jehozadak' has been substituted for that of 'Zerubbabel' (Ishmael?), and the view that a movement arose among the Jews in favour of 'Zerubbabel' as Messianic king still appears to have a considerable degree of probability.

Rothstein (*Die Genealogie des Königs Jojachin u. seiner nachkommen in geschichtl. Beleuchtung*, 1902) assumes the present form of the names in 1 Ch. 3 17-24 to be fairly correct. Such an emendation as that of 'Ohel' into 'Jehaiel' (85) is at any rate exceptional, and even here the author assumes a view of the formation of the name 'Jehaiel' such as the latest editor of Chronicles might not have disowned. The theory that 'Zerubbabel' was the son of Pedaiah is supported by some new historical hypotheses, the basis of which, however, needs careful testing. T. K. C.

ZERUIAH (צְרוּיָה ; צְרֻיָה, 'one who is perfumed with storax'? § 71; ϲαρογια [BAL]), sister of David (1 Ch. 2 16), and mother of JOAB, ABISHAI, and ASAHEL.

So at least the Chronicler represents; 2 S. 17 25 will be considered presently. It would be strange, however, that in the list of David's high officers in 2 S. 8 16-18 Joab should be the only one whose mother's name was substituted for his father's. We have met with many cases in which the ethnic origin of a name has been disguised by the addition of ה to the gentilic ending י. It is therefore not improbable that Zeruiah is an expansion of an ethnic name, and if so we cannot for a moment doubt what that name is—it is מִצְרִי. צור and צר are several times given by an error for מָצוֹר—*i.e.*, Muṣri in N. Arabia (see MIZRAIM, § 2 *b*), and Jeroboam's mother is, by a similar error, called ZERUAH (*q.v.*), instead of Miṣriyah. In 2 S. 2 32 the sepulchre of Asahel's father is said to have been in Bethlehem. Bethlehem probably comes from Beth-jerahmeel, and there was doubtless a Beth-jerahmeel in the Jerahmeelite Negeb; cp MICAH, 1. It was from this Beth-jerahmeel that Joab probably came, and if so we can easily believe that his father might be called (especially by those who dwelt outside the Negeb) Miṣri, or 'Miṣrite,' 'Jerahmeelite' and 'Miṣrite' being almost, though not quite, synonymous. In 1 Ch. 2 54 (RV) we meet with a place Atroth(ephrath)-beth-joab, whose people were 'sons of Salma' (*i.e.*, connected with the Salmæans—see SALMAH). This indirectly confirms the view here taken. It would be a serious objection to this if the text of 2 S. 17 25 were correct. The obscurity of the passage, however (see NAHASH), suggests a doubt. Elsewhere (see *Crit. Bib.*) it is proposed to read, 'Now Amasa was the son of Ithra an Ishmaelite, who went in unto Abigail, the daughter of Achish, a Miṣrite.'

We can now understand better the exclamation ascribed to David in 2 S. 3 39, 'these men the sons of Miṣri—*i.e.*, fierce Miṣrites by extraction (MT Zeruiah)—are harsher than I.' The alternative is to connect צריה with צֳרִי MASTIC (*q.v.*), comparing זִלְפָּה, Zilpah, 'dropping'; see NAMES, § 71. It is true, Zilpah too admits of another explanation (cp ZILPAH). What can have led Josephus to say (*Ant.* vii. 1 3) that Joab's father was named σουρι, Suri, it is difficult to say, unless it be that in 1 Ch. 4 14 Joab, 'the father of Geharashim' (a corruption of Geshurim), is called Seraiah (see SERAIAH, beg.). T. K. C.

ZETHAM (זֵתָם, explain as ZETHAN, ζεθομ [B], ζαιθ., ζοθ. [A], ζηθαν [L]), a Gershonite Levite; 1 Ch. 23 8 26 22.

[1] So *Jew. Rel. Life*, 15, n. Hitzig supposes a mere ordinary accident. He would insert the words 'of Zerubbabel and of,' thus accounting for the plural 'crowns.' So also Marti (in Kau. *HS*).

[2] For another view see Guthe, *GVI* 248 (Darius's division of the empire into twenty satrapies, making the post at Jerusalem superfluous).

[3] So *Jew. Rel. Life*, 13-16, which was written independently of Sellin's *Serubbabel* (published in the same year 1898).

[4] See SERVANT OF THE LORD. Winckler's theories, as given in *AOF* and *KAT*(3), have passed through several phases. There is a convenient summary of his present conclusions in the latter work, pp. 291 *ff.*

[5] 'Sown in Babylon' surely cannot mean 'begotten in Babylon.' Rothstein (*Genealogie*, 65) thinks that the name was given to his son by Pedaiah (=Sheshbazzar) to commemorate the happy turn in the fortunes of Israel, and that the return of Jewish exiles was already as good as certain when the child called Zerubbabel was born. Marquart (*Fund.* 55), however, supports the view that Zerubbabel (Zarubabili?) is a Babylonian name. But the name, as explained above by Johns, does not seem at all a likely one to have been selected for a Jewish governor.

[1] Cp Kosters, *Herstel*, 47 *f.*

[2] According to the theory here advocated, 'Sheshbazzar' is an alteration of a name with N. Arabian affinities. The first part may, in accordance with sound method, be identified with כוש. Again and again in the MT we find שוש and סוס written in error for כּוּשׁ. The second part may perhaps be a corruption of מָצוֹר.

[3] Cp EZRA-NEHEMIAH, § 8; ISRAEL, § 51; and cp *Intr. Is.* Prologue, p. xxxviii; *Jew. Rel. Life*, 6; Kent, *Hist. of the Jewish People* (Babylonian Period, etc.), 132 *f.*

ZETHAN (זֵיתָן, as if 'olive' [§ 69], but the neighbourhood of Bilhan [if it be ultimately from 'Jerahmeel'], and of Tarshish and Aḥishaḥar, both probably from Ashḥur, suggests צרפת as the original of [זיתן] or Zethan, ΖΑΙΘΑΝ [B], ΗΘΑΝ [A], ΖΗΘΑ [L]). b. BILHAN in a genealogy of BENJAMIN (*q.v.*, §§ 3, 9 ii. *α*), 1 Ch. 7 10†.

How deceptive apparent tree-names may be, appears from Birzaith (ברזית, Ges. 'well of an olive'), the name of a son of Malchiel (from 'Jerahmeel'). Malchiel's brother is Heber (cp Judg. 4 11), among whose sons (all probably bearing Negeb names) is Japhlet (cp Peleth, b. Jerahmeel, 1 Ch. 2 33), which may ultimately come from ZAREPHATH (*q.v.*). T. K. C.

ZETHAR (זֵתַר, ΑΒΑΤΑΖΑ [BℵAL^B]), a chamberlain of Ahasuerus, Esth. 1 10†.

Gesenius, 'perhaps "star" Pers. *sitar*.' But if Mehuman = Heman, Harbona = Hebron (Rehoboth), and Carcar = Jerahmeel, Zethar as probably = Zarephath. Cp VASHTI, ZERESH, and see otherwise Marq. *Fund.* 71. T. K. C.

ZIA (זִיעַ; ΖΟΥΕ [BA], ΖΕΑ [L]), 1 Ch. 5 13, a name in the genealogy of GAD (*q.v.*, i., § 13)

ZIBA (צִיבָא, and צִבָא; on origin, see below; 2 S. 16 4, Σ[Ε]ΙΒΑ [BAL], ΣΙΒΒΑ [A sometimes], ΣΙΒΑΣ [Josh. *Ant.* vii. 5 5]). 'Servant of the house of Saul,' and, after Saul's death, of Mephibosheth or Meribaal. On the obscure story of his treatment of Saul's son see MEPHIBOSHETH, § 2. Ziba seems to have founded an important family; he had 'fifteen sons and twenty servants.' He himself had no recorded father or tribe.

Although other views have been suggested [cp NAMES, §§ 51 68], we can hardly doubt that ציבא or צבא is a worn down form of צִבְעֹנִי (Ṣib'ōnī) or שִׁמְעֹנִי (Šim'ōnī) = ישמעאלי (Ishme'eli). Ziba, like Doeg (see SAUL, § 2 *a*), was apparently a N. Arabian (2 S. 9 2-12 16 1-4 19 17 29). T. K. C.

ZIBEON (צִבְעוֹן, 'hyæna'? § 68; see below; ΣΕΒΕΓΩΝ[1]), a Hivite (*v.* 2) or rather (see *v.* 20) Horite, in the genealogy of the Esau-tribe (Gen. 36 2 20, ΣΕΓΕΓΩΝ [E], 24 29; 1 Ch. 1 38, ΣΕΒΕΤΩΝ [A], 40). In *v.* 29 he is a clan-chieftain (אַלּוּף) or clan (אֶלֶף, see SS, *s.v.* אלוף).

In *v.* 24, underneath the strange, Midrash-like text of the redactor, lie, apparently, the words, 'it is the Anah who went out from the Jerahmeelites in the desert'; 'as he fed the asses' is woven out of a marginal gloss חמומים, which is one of the current distortions of ירחמאלים (cp SHECHEM, 2). Another popular corruption of the same word is probably חרי (Ḥorite). In *v.* 20 Zibeon is reckoned among the sons of 'the Ḥorite,' and as a comment on חרי (Ḥorite), there still lies, under the superfluous phrase ישבי הארץ (RV, 'the inhabitants of the land'), the gloss[2] ישמעאלי (Ishmaelite); ישבי (like יבוסי) being one of the corruptions of 'ישמ. We are now prepared to consider the origin of the name Zibeon, which is scarcely = 'hyæna,' as WRS (*J. Phil.* 9 90), Gray (*HPN* 95), and other scholars have supposed, but is rather a corruption of שמעון (Sime'on), used as an equivalent of 'ישמ (Išmael), unless indeed it comes directly from ישמעין, a corruption of 'ישמ, for which parallels can be adduced. Cp ZIBA, ZIN. T. K. C.

ZIBIA (צִבְיָא, 'gazelle,' cp ΤΑΒΙΘΑ [Acts 9 36]; ΙΕΒΙΑ [B], ΣΕΒ· [A], ΣΑΒ· [L]), in a genealogy of BENJAMIN (*q.v.*, § 9, ii. *β*), 1 Ch. 8 9.

ZIBIAH (צִבְיָה, § 68) of Beer-sheba, the mother of King Joash (2 K. 12 1 2 Ch. 24 1: ΑΒΙΑ [L, in Ch. ΣΑΒΙΑ], ܨܒܝܐ [Pesh.], *sebia* [Vg]).

The usual explanation 'gazelle' (cp צְבִיָּה) for Zibiah and Zibia is in itself plausible, in spite of the pointing. But though such an interpretation may possibly be ancient, the theory that early Hebrew personal names were derived from animals has become so questionable that we must look in each case for some other more probable explanation.

[1] The representation of ע (=Ar. غ) by γ is not uncommon; cp Wr. *Comp. Sem. Gr.* 42 *f.*, and see BERIAH, n. 1.

[2] חרי is probably a fragment of ירחמאל, of which tribal name ישמעאל is used as a synonym.

Now Zibia (צביא) in 1 Ch. 8 9 is grouped with Jobab, Mesha, and Malcam. Judging from numerous analogies it can hardly be doubted that of these three names (*a*) and (*c*) come from 'Jeraḥmeel' and (*b*) from 'Ishmael,' while the names of the father and mother (Shaharaim and Hodesh) are both distortions of 'Ashḥur' (a synonym of Jeraḥmeel); naturally enough they dwell in the 'field (highland) of Miṣṣur,' מואב, as often, being altered from Miṣṣur (see MOAB, §§ 1, n. 1, 14)—*i.e.*, in the N. Arabian border-land. It now becomes probable that both צביא and צביה, together with ציבא (ZIBA) and צבעים (ZEBOIM), are popular corruptions of ישמעאל (Ishmael). T. K. C.

ZICHRI (זִכְרִי, see NAMES, §§ 32, 52, but cp ZACCUR, where it is suggested that this must be a clan-name; note the ethnic affinities of the related names; ΖΕΧΡ[Ε]Ι [BℵAFL]).

1-3. in a genealogy of BENJAMIN (*q.v.* § 9 ii. *β*), 1 Ch. 8, where observe that SHIMEI, SHASHAK (probably), and JEROHAM are ethnics.

1. b. Shimei (*v.* 19: ζαχρει [B]).
2. b. Shashak (*v.* 23; ζοχρι [A]).
3. b. Jeroham (*v.* 27: ζαχρει [B]).
4. 'Father' of Joel (one of the developments of 'Jeraḥmeel'?), in list of Benjamite inhabitants of Jerusalem (EZRA ii., § 5 [*b*], § 15 [1] *a*): Neh. 11 9.
5. Of REUBEN (§ 13, end), 1 Ch. 27 16. The name stands close to the 'Jerahmeelite' names, Shephatiah, Maacah, Kemuel, Elihu, etc.
6. A Judahite, father of AMASIAH (2 Ch. 17 16: ζαρει [B], ζαχρι [A]). Amasiah, like Amasa and Amasai, comes ultimately from 'Ishme'eli.
7. An Ephraimite warrior (2 Ch. 28 7: εζεκρ[ε]ι [BA], ζαχαριας [L]).
8. Father of ELISHAPHAT, 2 Ch. 23 1 (ζαχαρια [B], -ιου [A]). Elishaphat is a variant to SHEPHATIAH (*q.v.*).
9. b. Izhar, a Kohathite Levite (Ex. 6 21 [P]). Izhar, evidently a clan-name, may come from Mizri (Miṣri).
10. A Levite overseer, b. Eliezer, b. Mošè—*i.e.*, of N. Arabian origin (1 Ch. 26 25).
11. An Asaphite Levite in list of inhabitants of Jerusalem (EZRA ii., § 5 [*b*], § 15 [1] *a*), 1 Ch. 9 15, in ‖ Neh. 11 17 called ZABDI; see ZACCUR (4). Brother of Micha (from Jerahmeel), and son of Asaph (perhaps from Ṣarephath).
12. A priest of the course of Abijah, temp. Joiakim (EZRA ii., § 6 *b*, § 11) Neh. 12 17 Bℵ*A, (om. ζαχαριας [L]). The predominant type of these priestly names is probably ethnic; MESHULLAM (*q.v.*) precedes Zichri, PILTAI (*q.v.*) follows. Zichri must surely be a clan-name from the Negeb. T. K. C.

ZIDDIM (הַצִּדִּים as if 'the sides'), more correctly HAZZIDDIM, a fortified city of Naphtali (Josh. 19 35; *assedim* [Vg.]; ΑΣΕΔΔΕΙΜ [Eus. *OS*(2) 224 95]). The Jer. Talm. (*Meg.* 1 1) represents Hazziddim to be Kephar Ḥitja, which perhaps = Ḥaṭṭīn, NW. of Tiberias (Neub. *Géogr.* 207; Buhl, *Pal.* 219). Some MSS read הצרים (so 𝔊^BAL τῶν Τυρίων). See ZER.

[It is very possible that P's work is based here upon a geographical survey of the Negeb, which included the cities of the Naphṭuhim (see *Crit. Bib.* on Gen. 10 13). Several of the names in *vv.* 35-38 have the appearance of being names of the Negeb. הַצִּדִּים might be explained in the same way as הַשִּׂדִּים (see SIDDIM).—T. K. C.]

ZIDKIJAH (צִדְקִיָּה), Neh. 10 1 AV, RV ZEDEKIAH (*q.v.*, 5).

ZIDON (צִידוֹן), Gen. 10 15, etc. **Zidonians** (צִידֹנִים), Ezek. 32 30. See SIDON, PHŒNICIA, §§ 4 [7], 12, 21 *f.*

ZIF, RV ZIV (זִו), 1 K. 6 1 37. See MONTH, § 2.

ZIHA (צִיחָא, § 51). The family name of some post-exilic NETHINIM; Ezra 2 43 (σουθια [B], σουαα [A], σουδδαει [L]) = Neh. 7 46 (σηα [Bℵ], σιαα [A^vid.] σουλαι [L] = 1 Esd. 5 29 (ησαυ [BA], σουδαει [L], ESAU [EV]); Neh. 11 21 (σιαλ [ℵ^c.a mg. inf.] om. Bℵ*A, σιααν [L]).

ZIIM (צִיִּים), Is. 13 21, etc. AV^mg.. See CAT.

ZIKLAG (צִקְלַג; in pause and in 2 S. 1 צִקְלָג; in 1 Ch. 12 1 20 [21 Bä., Ginsb.] צִיקְלַג; usually σεκελακ [B], σικελαγ [A], σεκ. [L]; but with the following variants σικελακ [B], σικελεγ, σεκελα[και], σικελα [A], σικελετ' [ℵ^c.a mg. inf.], σικελεθ [L]; while in Ch. B has ωκλα, σωκλα, σωγλαμ; and ℵ σωκλα, σωκαγ; and in 1 S. 30 1 [first time] B and L read κεειλα; Jos. *Ant.* vi. 13 10 σικελλα; *Siceleg*; *zenaḳlag*, *zenḳalag*).

We first hear of Ziklag as in the possession of Achish, king of Gath, by whom it was given as a residence to

his vassal David (1 S. 27 6 *f.*; cp 30 14 26 2 S. 1 1 4 10 1 Ch. 12 1 20). Ziklag also appears with other places in the far S. in Neh. 11 28. In Josh. 15 31 (P) it is enumerated among the more remote towns of Judah, but in Josh. 19 5 (P) is assigned to Simeon. Conder's identification of Ziklag with *Zuḥeilīḳa* a site 11 m. E. by S. of Gaza, and 19 m. SW. from Beit-Jibrīn or Eleutheropolis (*PEFQ*, 1878, pp. 12 *ff.*), has been generally but too hastily accepted.

The name is certainly corrupt, but not so far as entirely to obscure the true name. The two names identified by Conder begin with a different sibilant, and zuḥeilīḳa reminds us of Ar. *zaḥālīku*, 'declivities,' a name which applies well to the three small hills, nearly a mile apart, on which (see Conder) the ruins called Zuḥeilika stand. Ziklag is as corrupt as Abishag or the צקלון (see SACK) of 2 K. 4 42. It is best to read חֲלֻצָה or חֲלָצָה (cp Ass. *ḫalsu*, 'fortress'), an ancient and famous city (see BERED), represented by the mod. *Ḥalaṣa*, in the Wādy 'Aslūj, about 12 m. S. of Beersheba, on the way to Ruḥeibeh or Rehoboth (see map of NEGEB, A 2, after col. 3376). In Josh. 19 56 Ziklag is grouped with Beth-marcaboth which should be read Beth-rehoboth (see MARCABOTH). This fits in perfectly with the story of David's raids while at Ziklag. The name Ḥalūsah or Ḥalāṣah is also not impossibly concealed under Jekabzeel or KABZEEL (*q.v.*); the lists of P and of the Chronicler often contain corrupt variants of the same name, given as names of distinct places or persons. This accords with the view that 2 S. 21 15-22 23 8-23 relates to a war of David with the Rehobothites and the Zarephathites (see REHOBOTH, ZAREPHATH); the original text was misunderstood and wrongly edited. Very possibly the 'hold' (מְצוּדָה) to which David 'fled' (read וַיִּבְרַח for וַיֵּרֶד in 2 S. 5 17) and where he was when he longed for water from the cistern of Bethlehem—*i.e.*, probably a 'Bethlehem' in the Negeb—was that of Ḥalūṣah, which was not far from the valley of Ṣarephath (text, 'Rephaim'), where the Zarephathites (text, Pelištīm) were arrayed against *him*. Ḥalūṣah may likewise be the original of HAZZELEL[PONI] in 1 Ch. 4 3 (unless Hazzelel presupposes Ḥalaṣ'el; see BEZALEEL), of Ahuzzath in Gen. 26 26, and (of course) of Chellus in Judith 1 9. Possibly Ḥalūṣah was originally the centre of the cult of the hero ISAAC (*q.v.*, § 1).

The above view was formed long before the appearance of Winckler's *Gesch.* 2, where (185) it is held that Ziklag is the capital of the Krethi or Cherethites; cp 1 S. 30 14.

Perhaps 'Ziklaggim' (or Ḥaluṣathim) may underlie the difficult 'Casluhim' in Gen. 10 14. See MIZRAIM, col. 3164, n. 1.

T. K. C.

ZILLAH (צִלָּה; ζελλα [AEL]; *SELLA*), Gen. 4 19-23†. See CAINITES, § 9.

ZILPAH (זִלְפָּה, ζελφα [ADEL]), the mother of the tribes GAD and ASHER (Gen. 30 10-13, J; 35 26 P); also represented as the maid of Leah (29 24 35 26 P) and the concubine of Jacob (30 9 J; 37 2 46 18 P).

1. Name. If any explanations of the name Zilpah were current in early Israel, the editors of the Genesis narratives have not preserved them. It is hardly possible, as it perhaps is in the case of Bilhah (see *SBOT* on Gen. 30 3), to guess what they might have said.[1] The nearest approach to a narrative bearing on Zilpah is Gen. 37 2. That verse seems to represent a version of the Joseph-story in which the enmity against Joseph was confined to the sons of Bilhah and Zilpah.[2] Such a story may be a late invention to remove the reproach from the sons of Leah (Gunkel, *ad loc.*), in particular from Judah; but P may have found it in sources which had more to say on the subject. The name Zilpah cannot be explained from the vocabulary of the remains of Hebrew literature. We cannot be sure, however, that Genesis as we now read it regards Zilpah as Hebrew. Her mistress is a daughter of Laban (cp RACHEL, § 1 *b*).

According to *Test. XII. Patr.*, Naph. 1, indeed, Zilpah and Bilhah, who are sisters (cp Jubilees, 28 9), are daughters of a *maid* (παιδίσκη) of Laban (Αινα) and of Rotheos 'of the stock of Abraham,' who was carried captive from a place called Zelpha (whence the name of his first-born). Elsewhere, however, the sisters are daughters of Laban himself by a concubine (Ps.-Jon. on Gen. 29 24 29, *Gen. rabba* 74, *Pirḳê Rab. El.* 36; cp Charles, *Bk. of Jub.* 170).

The name Zilpah has accordingly been explained from the Aramæan (Holzinger, *KHC* on Gen. 30 9; Baethgen, *Beitr.* 160).

In Aram. √ *zlp* means 'to drip, trickle,'[1] in Syriac 'to defile'; in Assyrian, where, however, there is the natural uncertainty as to whether the first radical is *z* or *ṣ*, it occurs as *za-lip-ti*—*e.g.*, in the recurring phrase [*da-bi-ib*] *za-lip-ti*, '[planning] hostility.'

If the theory of Aramæan extraction was a modification of an older story (cp below), the name may have been earlier Dilpah (cp Jidlaph, the 'uncle' of Rebekah; Gen. 22 22), the root of which does occur in Hebrew. On the assumption that the name has been modified, C. Niebuhr (*Gesch.* 1 253) connected it with Zelophehad (צלפחד; for a suggestion as to the real origin of which strange name, however, see MANASSEH, § 9 *i*), whilst Cheyne formerly connected both Zilpah and Zelophehad with 'Ṣalḥad' (above, col. 2309 near foot). This suggestion he regards as still tenable; but his present view is different.[2]

2. Zilpah tribes. It has always seemed strange that such widely separated communities as Gad and Asher should be grouped as Zilpah tribes. Their agreement in bearing names of deities apparently distinct from Yahwè has been noted elsewhere (ASHER, § 1 n.; GAD, § 2), as also their Aramæan elements (ASHER, § 3, GAD, § 2). Whether they once lived together is uncertain. It has been thought that traces of an early stay of Asher can be detected S. of the plain of Megiddo (cp ASHER, §§ 1 3). The presence of Beria and of Heber and Malchiel as father and sons in the Asher list (Nu. 26 44 *ff.*) and the same three names (if Michael is for Malchiel) in nearly the same relation in Benjamin lists (1 Ch. 8 13 *ff.* 16 *f.*) and of a clan Beria in an Ephraim list would be a not unnatural result if Ephraim and Benjamin's territory had been earlier occupied by Asherites (so Steuernagel, *Einwand.* 30 *f.*). If the sons of Zilpah are meant in Genesis to be regarded as older than Joseph the seniority would be a natural way of representing an earlier occupation of the Ephraim highlands which must be assumed if we suppose that Asher really entered Palestine from the E. We might suppose that a Zilpah tribe was settled in E. Palestine, that part of it crossed the Jordan, and after staying a while in Ephraim moved northwards and took the name of Asher (from the older inhabitants in the N.? see ASHER, §§ 1 3), whilst the portion of the Zilpah tribe which remained came to be known as Gad. On the other hand it is uncertain when we are meant to place the birth of the sons of Zilpah. Even the editor need not have intended to suggest that both Gad and Asher fall between Naphtali and Issachar and between Naphtali and Joseph (cp RACHEL, § 1 *c*). The sons' births may have been grouped artificially to facilitate the narrative (cp TRIBES, § 9 *f.*). Steuernagel, indeed, pleads strongly for the historical trustworthiness of the

[1] For a late example see *Test. XII. Patr.*, Naph. 1, quoted below.

[2] It is against the sons of Bilhah and Zilpah that Joseph speaks to Jacob in *Test. XII. Patr.*, Gad, 1.

[1] In Arabic 'to draw near,' but *zilf* a garden; in Ethiopic *zelfat*=reproof. Yāḳūt gives a water on the way to Mekka, *Zulfatu*, ii. 939 10 *f.* (cp ii. 955 19 *f.*).

[2] [When Steuernagel (*Einwand.* 47) concludes that the clans derived from Zilpah, like those derived from Bilhah, were regarded as not so fully Israelitish as the Leah and Rachel tribes because they were of heathen origin, he does not allow for the possibility that Leah and her maid Zilpah are only doubles of Rachel and her maid Bilhah—or, etymologically, that Leah, Rachel, and Bilhah are all corrupt fragments of Jeraḥmeel (JACOB, § 3), and that Zilpah (with which Mr. Hogg compares Jidlaph, most appropriately from the present point of view, for among his brothers are Kemuel = Jeraḥmeel, and Chesed = Cush) is an equally corrupt fragment of a name virtually synonymous with Jeraḥmeel—viz., Ishmael. Nor can the possibility be denied that 'Asher' may be connected with 'Asshur' or 'Ashḥur,' one of the ethnic names of the Negeb, and Dan with Adan or Adon—another of these names (cp PARADISE, § 7, end, and see *Crit. Bib.*). And only a very close examination of the texts can assure us that Gad and Asher were not originally located in the Negeb. That the tradition made some of the clans which were fused with the Jacob or Israel tribe heathenish (*i.e.*, worshippers of gods other than Yahwè), will, however, be universally admitted. The most important passages for the textual critic are perhaps Gen. 29 1 (on which see JACOB, § 3) and 31 23 *ff.* 46 *ff.* (on which see GALEED, GILEAD, but note that there seems to have been a southern Gilead, referred to, *e.g.*, in Jer. 8 22 [see *Crit. Bib.*], and the probable original of the much-disputed Lud, Ludim).—T.K.C.]

Hebrew traditions, and the case can be made very plausible. Who are the 'brothers' whom Jacob finds in E. Palestine when he comes with Rachel (and Bilhah) from Laban (Gen. 31 32 37 46 54)? Must they not be brother tribes who had remained there when Jacob moved off? And, since Gad is the tribe most firmly settled there, may not these 'brothers' be represented by the name Zilpah? Steuernagel supposes that several tribes (Zilpah, etc.) accompanied Jacob on its journey up from its settlement S. of Palestine. The representation of the Zilpah tribes as younger than the four Leah tribes, but older than Issachar and Zebulun, may represent a theory as to the time of their reaching their several seats; and the theory may be correct. There are great difficulties, however. The effect of system may indeed be far-reaching. If Asher arrived somewhat early W. of Jordan, and Gad somewhat late E. of Jordan (GAD, § 8), it is difficult to see how the grouping of them as Zilpah tribes can be anything but artificial. See, further, TRIBES.

3. Zilpah and Leah. Nor is it easy to see why Zilpah is connected with Leah. There is no obvious link between Gad or Asher and Judah or the other Leah tribes. Nor is the relation of Zilpah to Leah even in the story parallel with that of Bilhah to Rachel, or Hagar to Sarah. In the cases of Bilhah and Hagar the maid's children are born before her mistress's and because the mistress has no children (cp RACHEL, § 1 *b*). In the case of Zilpah, on the contrary, Leah has no less than four children before the maid is called in. Is it possible that Leah represents two figures, the second being the mother of Zebulun and Issachar? These two sons were born after Zilpah's, and a connection among the four is more easily thinkable than in the case of the other Leah tribes. Issachar may have possessed part of the highlands of Ephraim at one time (cp ISSACHAR, § 4, n. 2, and Steuernagel, *Einwand.* 12 *f.*), and the same may have been true at an early date even of ZEBULUN (*q.v.*, § 7).

On the other hand, the same possibilities are not excluded in the case of the other four Leah tribes (see SIMEON, § 4). It is conceivable that Asher crossed the Jordan into Ephraim before Jacob-Rachel came to occupy the place of the older Leah tribes (so Steuernagel). H. W. H.

ZILTHAI, RV **Zillethai** (צִלְּתַי).

1. b. SHIMEI (*q.v.*) in a genealogy of BENJAMIN (*q.v.*, 9 ii. β), 1 Ch. 8 20 (σαλθει [B], σαλει [A], σελαθι [L]).

2. One of David's warriors, 1 Ch. 12 20 (σεμαθει [BN], γαλαθι [A], σιλαθα [L]). See DAVID, § 11 n. *c*.

ZIMMAH (זִמָּה; ζεμμα [BL]), a Gershonite (Levitical) name; 1 Ch. 6 20 [5] (ζαμμα [A]), 42 [27] (ζαμμαμ [B], -μα [A]), 2 Ch. 29 12 (ζεμμαθ [BA]).

ZIMRAN (זִמְרָן; Sam. זמרון; plausibly connected with זֶמֶר, 'antelope' [see WRS, *J. Phil.* 9 92], but cp ZIMRI), the eldest of Abraham's 'sons' by Keturah (Gen. 25 2 1 Ch. 1 32; ζεβραν [A*E], ζεμρ. [A], ζεμβρ. [A^a B], ζομβρ. [D^sil.] ζεμβρ., ζεμραμ [L]). The Zamareni, a tribe of the interior of Arabia (Plin. *NH* 6 32, Grotius), and Zabram, the royal town of the κιναιδοκολπῖται, W. of Mecca, on the Red Sea (Ptol. vi. 7 5, Knobel) have been supposed to represent Zimran. But whether we ought to go so far from the Keturite centre—*i.e.*, the ארץ קדם (see EAST, CHILDREN OF; REKEM)—is very doubtful.

In Jer. 25 25 we find a people called 'Zimri' (Pesh. 'Zimran') mentioned with Arabia (*i.e.*, N. Arabia), Elam and Madai (read 'Jerahmeel'), and SAPHON (on the N. Arabian border). Tuch disputes the connection between 'Zimran' and 'Zimri,' but, from our present point of view, wrongly. Both in Gen. 25 2 and in Jer. 25 25 a N. Arabian people is required. See ZIMRI.

T. K. C.

ZIMRI (זִמְרִי, a shortened form?—cp the name Zimrida in Am. Tab. [of governors of Sidon and of Lachish], also in an early Bab. text, *BM Cuneif. Texts*, Pt. iv., which also mentions Zimri-ḫanımu, Zimri-ḫanata the Amorite [Pinches]; Hommel, comparing Old Arab. compound names, interprets 'protection' [*AHT* 85, cp 88, 230]; but cp ZIMRI, 2; ζαμβρ[ε]ι [BNAFL]).

1. One of the sons of Zerah b. Judah (1 Ch. 2 6), in Josh. 7 1 called ZABDI.

2. A descendant of Saul mentioned in a genealogy of BENJAMIN (*q.v.*, § 9, ii. β), 1 Ch. 8 36 (ζαμρι [A]= 9 42). Cp ZEMIRA.

3. 'Captain of the chariots,' who conspired against Elah king of Israel and killed him, and to secure his own position on the throne exterminated all the remnant of the family of Baasha. After a seven days' reign in Tirzah he was besieged by Omri the general, whereupon like Sardanapalus he burnt the palace over his head and perished in the ruins (1 K. 16 9-20). In 𝔊 the names Zambri and Omri are much confused.

4. b. SALU (*q.v.*), a Simeonite chief, the name given to the central figure in P's narrative of the sin of the b'ne Israel with Midian (Nu. 25 6-18 P). Zimri had brought a Midianitess named COZBI to the camp, and Phinehas, moved to indignation, slew them both, in the 'tent' (קֻבָּה);[1] see We. *Prol.*(4) 363, ET 356. See PHINEHAS, and cp DIBRI. S. A. C.

ZIMRI (זִמְרִי; om. 𝔊; Pesh. *'Amran;* Vg. *Zambri*), one of the tribes or peoples threatened with judgment by Jeremiah (or by a supplementer who assumes Jeremiah's mantle), Jer. 25 25.

A revision of the text of *vv.* 19-26 places it beyond all reasonable doubt that a N. Arabian people is meant. See ZIMRAN, SHESHACH.

A land called Zimri, whose king was allied to the kings of Babylon and Elam (Sir H. Rawlinson, G. Smith, etc.), does not exist; the right reading of the text is 'Namri' (see *KB* 1 140 186; Schr. *KGF* 170). But to emend Jeremiah's 'Zimri' into 'Namri' with Winckler (*AOF* 1 292), or 'Gomeri' or 'Gimirri' (see GOMER) with Rost (*Untersuch.* 103 [1897]) and Peiser (*ZATW* 17 350 [1897]), is hardly possible if we duly criticise the text of MT. T. K. C.

ZIN (צִן, σ[ε]ιν, σινα, σενα; in Nu. 34 4 εννακ [B; και follows], σεεννακ [AF], ενακ [L], in Josh. 15 3, εννακ [B], σεννακ [B^a.b], σενα [A], σινα [L]; Eus. *Jer.* εννα *enna* [*OS*, 253 37 118 10]; see below). The wilderness N. of that of PARAN (*q.v.*); the most important place in it was Kadesh-barnea in its oasis (Nu. 13 21 20 1 27 14 33 36 34 3 *f.* Dt. 32 51 Josh. 15 1 [σεμ A] 3). More precisely, it was the wild mountain-region (Jos. *Ant.* iv. 4 6, speaks of a *mountain* called Sin) rising in successive slopes from the 'Arābah in one direction and et-Tih in another, which now bears the name of the 'Azāzimeh Arabs who inhabit it. See WANDERINGS, WILDERNESS OF. It has been suggested[2] that Ṣīn may mean the 'wall' of rock within which the wilderness of Zin lies (cp ZION).

The existence of √צון 'to protect' however, is very questionable, and the name looks as if it had been worn down in course of ages. Analogy favours the view that צן (Zin), צען (ZOAN), צנן (ZENAN), and צאנן (ZAANAN), have all come, through צבעון (ZIBEON), from ישמעאל (Ishmael).

Lagarde, however, with much learning and plausibility, suggests a derivation from חצין, which in Aram. and Ass. means 'axe,' in Ethiopic 'iron' (*Mittheil.* 2 361 *ff.*; cp G. Hoffm. *ZDMG* 32 753). Tg. Jer. gives in Nu. 34 4 (for צין) טור ברולא, 'the iron mountain,' presupposing חצין, and 𝔊's form εννα[κ] may ultimately come from the same reading.

This reading, if correct, might illustrate a number of references to iron in narratives or prophecies which, as the criticism of the text seems to show, relate to the Negeb. See Dt. 3 11 (cp OG); 4 20 ('an iron furnace' ‖ 'Miṣrim'); 8 9 ('whose stones are iron'); Josh. 17 16 18 Judg. 1 19 4 3 13 (Kenizzites, chariots of iron); 1 K. 22 11 (Zedekiah the Kenizzite [see ZEDEKIAH, 2], 'horns of iron'); 2 K. 6 6 (swimming iron; see PROPHET, § 7); Jer. 15 12 ('iron of ZAPHON); Ezek. 27 12 19 (Tarshish [Asshur?] and Javan [Jerahmeel?] trafficking with iron); Am. 1 3 (the

[1] On קֻבָּה (whence 'alcove'), which is used to denote a princely tent, as well as the bridal pavilion, see WRS, *Kinship*, 171, 292; PAVILION, 2; TENT, § 4 n.

[2] Wetzstein, in Del. *Gen.*,(4) 578.

[southern] Arammites thresh [the southern] Gilead with instruments of iron). Still the method of grouping names before seeking to account for them seems to favour the preceding explanation. The *εννα[κ]* in 𝔊B and the ברזלא in Tg. Jer. are at any rate exceptional. T. K. C.

ZINA (זִינָא), b. Shimei, a Gershonite Levite (1 Ch. 23 10). In *v.* 11 the name becomes ZIZAH (זיזה). 𝔊BAL reads ζιζα in both places.

ZION (צִיּוֹן, c[ε]ιωn). The designation, properly, of the 'Jebusite' stronghold at Jerusalem, which after its capture by David received the name 'David's burg,' 2 S. 5 7 9. Various explanations of the name have been given. Gesenius (*Thes.* 1164) and Lagarde (*Übers.* 84, n.*) derive from √צהה 'to be dry,' cp Syr. ܨܗܝܘܢ, which Lag. regards as the older form. Delitzsch (*Psalmen*,(3) 170) makes the primary form צַוֹּן, from צְוָה 'to set up.' Wetzstein (in Del. *Gen.*(4) 578) derives from √צין 'to protect,' so that the name would mean '*arx*, citadel'; cp ZIN.

It may be better, however, to add ציון to the group Zin, Zenan, Zaanan, and Zoan, and to suppose Zion to be a descendant of the race-name 'Ishmael' through the intermediate form צבעון (ZIBEON). Another corruption of the same name is probably שלם (see SHALEM), and this most plausibly accounts for a much-disputed name ירושלם. That the first part of this name means 'city,' Sayce (see col. 2409, top) and Nestle (*Philologia Sacra*, 17) have independently seen. We must now add that שלם is probably = ישמעאל, and that this is a type of corruption which occurs frequently in the OT. Jerusalem, then, according to this explanation, was originally one of the many Ishmaelite or Jerahmeelite settlements in Palestine, a view which is supported by the fact that Isaiah (29 1) calls the city of David 'Jerahmeel' [corrupted into 'Ariel'], and by the equally significant statement of the historian that after taking the stronghold David 'built round about Jerahmeel and within.'[1] See *Crit. Bib.* It is true, David is said (2 S. 5 6) to have 'gone against the Jebusites,' but the Jebusites apparently owe their existence in the text to corruption, and in an earlier form of the text this seems to have been indicated by the scribe himself. As in Gen. 36 20 [see ZIBEON] and elsewhere, the corrupt reading ישבי הארץ (EV 'the inhabitants of the land') has grown out of ישמעאלי (Ishmaelites), הארץ being an editor's insertion to make the corrupt ישבי intelligible. The earlier text appears to have said in *v.* 6, 'And the king and his men went to Jerusalem against the Ishmaelites'; 'Ishmaelites' here is a synonym of 'Jerahmeelites.' To this we must add that the 'lame' and the 'blind' spoken of in the MT (and in 𝔊) of 2 S. 5 6 8 are as imaginary as the tribal name 'Jebusite'; עורים and פסחים both being corrupt fragments of ירחמאלים (see *Crit. Bib.*, and cp MEPHIBOSHETH, PHINEHAS).

This is no digression; it had to be shown that names so closely connected as Zion and (Jeru-)salem had the same origin, and if in the course of doing so we have been enabled to show that the early historians at any rate did not 'infer incorrectly' from the tribal name Jebusite the existence of a city called Jebus[2] (of which the Amarna correspondence appears to have known nothing), this is perhaps at any rate a boon for future students. It is possible that the error יבוסי for ישמעאלי is really a somewhat ancient one (see, *e.g.*, Zech. 9 7). But Ezekiel (16 3 45) is still aware that Amorites (or Arammites = Jerahmeelites) and Hittites (rather Rehobothites) formed the pre-Israelitish population of the city of Jerusalem. Cp OG.

The term 'Zion' (we retain the term, as, even if a corruption, yet an ancient and a popular one) belongs properly, as shown elsewhere (JERUSALEM, §§ 17-20), to the southern part of the eastern hill, where the 'burg of David' stood. Above the 'burg' rose the temple, and in usage 'Zion' represents the temple hill (2 K. 19 31; Is. 24 23; cp 10 32). Even more commonly, however, we find it a term for the whole of Jerusalem, whether in parallelism with Jerusalem (Is. 4 3 30 19 Am. 1 2 Mic. 3 10 12 Ps. 102 22) or alone (Is. 1 27 28 16 Jer. 3 14 Lam. 5 11). Often it is personified (Is. 40 9 41 27 51 3 52 1 *f.* 7 59 20 60 14 66 8 Zeph. 3 16 Zech. 1 17) though here an idealisation has taken place, the 'Zion' intended being really the company of those residents in the Holy City in the period of the Second Isaiah and of Ezra who, in the orthodox sense of the phrase, 'feared Yahwè.' The phrase בַּת צִיּוֹן, literally 'the daughter Zion,' is an idiomatic expression for the people of Jerusalem, Is. 1 8 52 2 Jer. 4 31, etc. (see DAUGHTER, 3). It remains to be added that 'Zion,' in 1 Macc. everywhere means the temple hill (see 4 37 60 5 54 6 48 62 7 33 10 11 14 27). For a Hebrew writer, who formed his style on classical models, this was natural. Josephus, writing in Greek, does not use the name. In the NT it occurs only in quotations from the OT, except in Heb. 12 22 (a fine rhetorical passage) and in Rev. 14 1.

How fond the later Jews became of the name Zion appears most clearly from the Psalms. See especially Ps. 87 5, if, with Wellhausen, we may follow 𝔊's μήτηρ Σ[έ]ιών, ἐρεῖ ἄνθρωπος), and render,

But every one calls Zion his mother,
And of it is every one native;
He himself, the Most High, keeps it.[1]

T. K. C.

ZIOR (צִיעֹר; cωρθ [B], cωραιθ [B^ab vid.; superscr. αι], cιωρ [AL]), a place in the hill-country of Judah (Josh. 15 54†). It is mentioned with Arab, Beth-tappuah, Humtah, Kirjath-arba ('the same is Hebron').

The names Arab and Kirjath-arba (surely from Kirjath-'arâb) point to the Jerahmeelite border. So also does Ḥumṭah (*i.e.*, Hamath = Maacah) and perhaps Beth-tappuah (see NAPHTUHIM). 'Hebron' in the gloss on 'Kirjath-arba' is probably (as in some other cases) a corruption of 'Rehoboth'; P may already have found this corruption in the written list which he seems to have used. 'Zior,' then, is probably a corruption of the name of some Jerahmeelite place near Rehoboth. One cannot help thinking of Miṣṣur, properly the name of a region (see MIZRAIM, § 2 *b*), but possibly also of a town (cp Cusham-jerahmeel [SHECHEM]). The reading of 𝔊AL may suggest an identification with ZAIR (*q.v.*).

Van de Velde and Conder, however, identify Zior with Sa'ir or (*PEFM* 3 309) Si'air, 4½ m. N. from Hebron, where a tomb of Esau is shown. Eusebius (*OS* 293 19) mentions a village Sior between Ælia and Eleutheropolis. T. K. C.

ZIPH (זִיף; z[ε]ιφ [BAL]), whence the gentilic **Ziphites**, or, incorrectly [see Ps. 54], **Ziphims** (זִיפִים; z[ε]ιφαιοι, 1 S. 23 19 26 1 Ps. 54 title ζιφεογc T]).

1. An unidentified town belonging to Judah, situated towards the border of Edom (Josh. 15 24 [? B]). On the new theory which makes David carve out for himself at first a principality in the Negeb, this more southern Ziph may have a claim to be that intended in the early tradition. See 2, end.

2. A town in the hill-country of Judah (Josh. 15 55; οζειβ [B]), mentioned together with Maon, Carmel, and Jutah. Its connection with the clan of Caleb, which at one time had its seat about Hebron (but see below), is expressed in genealogical form in 1 Ch. 2 42,[2] and again in 1 Ch. 4 16, where **Ziph** and **Ziphah** (זִיף וְזִיפָה; ζαφα και ζαιρα [B], ζιφαι κ. ζαιφα [A], ζιφ κ. ζιφα [L]) are 'sons' of (the unknown) JEHALELEEL (*q.v.*). Ziph and that part of the wilderness of Judah to which it gave its name are mentioned in the account of David's outlawry (1 S. 23 14 *ff.*), and the surrounding hill country with its many caves supplied admirable 'lurking places' and 'strongholds' (1 S. 23 14 19, and cp 1 Macc. 2 31). See Conder's description of the fantastic cones and knife-like ridges of the hills of Ziph (*PEFQ*, 1875, p. 43).

Ziph existed in the time of Jerome, who places it 8 R. m. from Hebron (*OS*(2) 159 14; cp 258 40 *ff.*). This is too much by nearly half. The true site was found by Robinson at *Tell Zif*, a conspicuous mound, 2882 ft. above sea-level, and 8-9 m. SE. of Hebron, with no trace of buildings at the present day, but with some cisterns. A little to the E., on a low hill or ridge, there are broken walls and foundations; but these do not represent the city fortified by Rehoboam (2 Ch. 11 8; see below). Conder endeavours to show that there

[1] That מִלּוֹא and הַמִּלּוֹא, wherever they occur, are mispointed, can hardly be doubted. They are corrupt fragments of ירחמאל (see MILLO). In 2 S. 5 9 the מן prefixed to המלוא has arisen in this way. The scribe began to write מלוא without the initial ה, and left מל uncancelled. Afterwards, מל was 'corrected' into מן.

[2] So Driver, in Hastings, *DB* 2 554*a*, expressing the common opinion.

[1] Furness's translation (*Psalms*, *SBOT*). But cp Che. *Ps.*,(2) and Bertholet, *Stellung*, 182.

[2] μαρ[ε]ισα[ς] [BA] (MT, MESHA [*q.v.*]), the father' of Ziph, is in 2 Ch. 11 8 mentioned along with Ziph (ζειβ[B]).

never was a 'wood' in the district of Ziph (see 1 S. 23 15, EV, and see below). 'The country is emphatically a dry land, looking down on the barren wastes which lie above the Dead Sea between Masada and Engedi. There is no moisture capable of supporting vegetable growth' (*PEFQ*, 1875, p. 45). G. A. Smith (*HG* 306 n., 307 n.) substantially agrees.

Among the many difficult points connected with the Hebrew traditions is this—Was the chief Calebite city Hebron or REHOBOTH (*q.v.*)? If the latter, then the Ziph of 1 Ch. 2 42 may be that mentioned in Josh. 15 24. And another is this—Was David's Ziph the first or the second place so called? The חרש (HORESH) of 1 S. 23 15 may very well be a corruption of אשחור (Ashḥur) which seems to have been a name nearly equivalent to Jerahmeel. We may also doubt about Rehoboam's Ziph, as well as about the other names in 2 Ch. 11 6-10 (see REHOBOAM).

T. K. C.

ZIPHION (צִפְיוֹן), Gen. 46 16 = Nu. 26 15, ZEPHON (*q.v.*).

ZIPHRON (זִפְרוֹן, scarcely 'stench,' see ZANOAH, but cp NAMES, § 106, n. 1; ΔΕΦΡΩΝΑ [B], ΕΦ. [B^ab]; ΖΕΦ. [AL]), a point on the N. frontier of Canaan, Nu. 34 9†. According to Furrer (*ZDPV* 8 28) and Socin (Baed.[2] 395), the mod. *Zaferāneh*[1] (Rob. gives *ez-Zaʿferāneh*), ESE. of *er-Restān*. This, however, does not suit Furrer's own view of the frontier, for *Ṣadad* (his Zedad) is SSE. of *Zaferāneh*, whereas it should lie to the N. Hence Mühlau, in Riehm's *HWB*, following Wetz. (*Reiseber.* 88), prefers the ruins called *Zifrān*, fourteen hours NE. of Damascus.

There is reason to think, however, that the description originally referred to the Negeb (see ZEDAD), that Ziphron corresponds to the SIBRAIM of Ezekiel, and that both names are corruptions of Zarephath. See ZEDAD. T. K. C.

ZIPPOR (צִפֹּר, צִפּוֹר; ϹΕΠΦΩΡ [BAFL]). BALAK (*q.v.*), king of Moab, is called 'son of Zippor' (Nu. 22 2 4 10 16 23 18 Josh. 24 9 Judg. 11 25), *i.e.*, either son of a person called Zippor ('bird'), or 'native of Zarephath,' the Zarephathites being a section of the N. Arabian Miṣrites (see ZAREPHATH, MIZRAIM, § 2 *b*). It is probable that just as the Edomite king Shaul (AV Saul) was a Miṣrite of Rehoboth (see BELA), so the Moabite king Balak was a Miṣrite of Zarephath (unless indeed Balak was king of Muṣri; see MOSES, § 17). The Cushite wife of Moses bore the startlingly similar name ZIPPORAH (*q.v.*). See, however, NAMES, § 68. T. K. C.

ZIPPORAH (צִפֹּרָה; ϹΕΠΦΩΡΑ [BAFL]), daughter of Hobab or Jethro, 'priest of Midian,' and wife of Moses (Ex. 2 21, J; 4 25, J; 18 2, E).

In Nu. 12 1 *b* she is called a 'Cushite woman'; 'Miṣrite' would perhaps have been more accurate, but Miṣṣur (= Muṣri) and Cush in N. Arabia were contiguous (see CUSH, 2). On the significance of her name (probably a distortion of Zarephath), and of her connection with Moses, see MOSES, §§ 4, 7, and cp CIRCUMCISION, § 2; ZAREPHATH; ZIPPOR.

In its present form the name means 'bird'; cp NAMES, § 68. There is an Aramaic proper name צפרא in *CIS* (10 1) 11 2 12 2; the Greek equivalent being σεφφερα (S. A. Cook, *Aram. Gloss.* 102, who refers to Cl.-Gan. *Rec. d'archéol.* 1885, p. 23). The name Zippor (*not* Zipporah) occurs as a woman's name in Talm. Jer. *Gittin*, 5 3. T. K. C.

ZITHRI, RV **Sithri** (סִתְרִי; for origin see SETHUR), b. Uzziel, a (Kohathite) Levite, Ex. 6 22 (σεγρει [B], σεθρει [A], σετρι [FL]).

ZIV (זִו), 1 K. 6 1 37 RV, AV ZIF. See MONTH, § 2 (2).

ZIZ, GOING UP OF (מַעֲלֵה הַצִּיץ), a pass in the S. of Palestine, 2 Ch. 20 16 (ΤΗΝ ΑΝΑΒΑϹΙΝ ΑϹΑΕ [BA], Τ. Α. ΤΗϹ ΕΞΟΧΗϹ ΑϹΙϹΑ [L]). The name looks suspicious; but the ordinary view that the Wādy Ḥaṣāṣa, by which the old Roman road leads from En-gedi to Jerusalem, is meant, is plausible.

The mention of HAZAZON-TAMAR (*q.v.*) in *v.* 2, however, introduces a perplexing element into the geography. For a way out of the difficulty, see NEGEB, § 7. T. K. C.

ZIZA (זִיזָא, perhaps abbrev., § 58, cp ZAZA, ZUZIM).

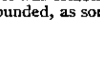
1. A prince of SIMEON (§ 5 [ii.]), temp. Hezekiah; 1 Ch. 4 37 (αωσαλ [B?], ζουζα [A], ζιφα [L]).

2. One of Rehoboam's children by Maacah; 2 Ch. 11 20 (ζ[ε]ιζα [BAL]).

[1] For a southern Zaferāneh (cp Rob. *BR* 2 185) see ASPHAR.

ZIZAH (זִיזָה), 1 Ch. 23 11. See ZINA.

ZOAN (צֹעַן; ΤΑΝΙϹ [BℵA]), an Egyptian city. 𝔊, Vg., and Tg. identify it with Tanis, certainly correctly. The city had the name *Ṣʿnt*,[1] in Coptic times, *Dja(a)nē* (also *Djaane*, *Djani*). The Greeks called it Τάνις (thus 𝔊). The modern Arabic name is *Ṣān*. Consequently, the name must have been pronounced *Ṣaʿne*, *Ṣaʿni*, by the Hebrews (following the later habit of dropping the feminine termination [t]).



The city, the capital of the 14th nomos of Lower Egypt, near the NE. edge of the Delta, was situated on the right bank of the Tanitic branch of the Nile, in a plain which is at present, in summer, a marshy prolongation of the Menzaleh lake, in winter a salt-desert. The modern village of Ṣān is inhabited mostly by fishermen. The adjoining mound, *Ṣān el-ḥaǵar*, 'stone Ṣān,' was excavated first in part by Mariette in 1860, then completely by Petrie (in 1883-84, see *Tanis* 1 and 2, 1885). There were found many statues, sphinxes, obelisks, etc., belonging to a large temple, begun (it would seem) by kings of the sixth dynasty, continued in the twelfth dynasty, and completed by the greatest builder among the Pharaohs, Rameses II. See, on the fragments of the largest monolithic colossus known, EGYPT, § 37. The temple seems to have had a length of about 1000 ft. King Psusennes of the twenty-first dynasty built a huge wall of bricks around it. The importance of the city is shown by the fact that Rameses II. seems to have resided there and that the twenty-first dynasty originated from the city. In Esarhaddon's and Ašur-bani-pal's time, *Ṣaʾnu* or *Ṣiʾnu* was the seat of a prince; on its sack by the Assyrians see TIRHAKAH. In Strabo (802) it still figures as a considerable place. Of its ultimate downfall not much is known.

The biblical mentions are as follows. In Is. 19 11 13, the princes of Zoan represent Egypt (13 ‖ with Noph-Memphis). In 30 4, the Israelites are blamed for sending embassies to Zoan; the passage looks as if the Pharaohs were still residing at Zoan at times. In Ezek. 30 14, Zoan stands parallel with the old capital of Upper Egypt, No, which shows that in Lower Egypt only Memphis can have rivalled Tanis in importance. Perhaps it is thus to be explained that Ps. 78 (12 43) speaks of the wonders done 'in the land of Egypt, in the field of Zoan' in Moses' time. Zoan-Tanis seems to have been considered as the capital of Egypt, or at least of the Delta, in the time of the psalmist. The inference that Zoan was the residence of Pharaoh in Moses' time and that 'fields of Zoan' and Goshen were equivalent expressions has often been drawn by scholars, especially by Brugsch, who tried to show the identity of Rameses and Zoan.[2] Brugsch's arguments however, are fallacious (although Rameses II. may have resided here, see above); certainly Goshen cannot have extended to the surroundings of Tanis.

The curious remark Nu. 13 22 (Hebron was built seven years before Zoan in Egypt) seems to imply that the writer considered Tanis as one of the oldest cities of Egypt. Indeed, we can trace it to the sixth dynasty (see above); as capital of the nome it may belong to prehistoric times. Chronological conclusions about the date of Hebron's foundation cannot, of course, be drawn from the biblical remark, whether taken literally or not.[3]

W. M. M.

ZOAR (צֹעַר, in Gen. 19 22 30 צוֹעַר; ϹΗΓΩΡ

[1] 

[2] See RAMESES, § 3, on Brugsch's argument (followed by Ebers, *Durch Gosen*, 498), and EXODUS, § 10.

[3] A stele of the time of Rameses II., found at Tanis, was curiously dated 'year 400 of king Set.' If this date has a historical basis, it must mean that about 1700 B.C. the cult of Set was established (by Hyksos-kings?), not that Tanis was then founded, as some scholars have assumed.

[BℵADEFQ]; σιγ. [L]; in Gen. 13 10 ζογορα [ADEL]; in Jer. 48 34 ζογορ [BℵA]; Vg. *Segor*), a locality mentioned in Gen. 13 10 14 2 8. 19 22 *f.* 30 Dt. 34 3 Is. 15 5 Jer. 48 34†. It is commonly placed to the SE. of the Dead Sea, which may be correct so far as Is. 15 5 and Jer. 48 34 are concerned, but hardly for Gen. and Dt. (*ll.cc.*).

There is in fact a considerable body of evidence for the view that the chief seat of the southern Israelitish legends was the Jerahmeelite territory, bordering on Muṣri and Edom. See ISAAC, JACOB, and especially SODOM AND GOMORRAH. The play on the meaning of 'Zoar' in Gen. 19 20 22 is only accounted for, if the true name of the city was מִצְעָר, or rather מִצּוּר—*i.e.*, Miṣṣur (Muṣri). The 'Zoar' of legend was really 'Miṣṣur'; it was one of the cities of Muṣri in N. Arabia, towards S. Palestine. Cp MISRAIM, § 2 (*b*). Upon the new theory, Gen. 13 10, where 'Zoar' appears to be distinctly placed in the Jordan valley, originally ran thus, 'And Lot lifted up his eyes, and saw that the whole of Jerahmeel (כִּכַּר הַיַּרְדֵּן, a primitive corruption of ירחמאל) was well-watered, [before Yahwè destroyed Sodom and Gomorrah] like the garden of Yahwè, like the land of Miṣrim, in the direction of Miṣṣur.' Here, however, it is probable that Miṣṣur really means the *land* of Miṣṣur; כְּאֶרֶץ מִצְרַיִם may be omitted as an unintelligent alteration of בֹּאֲכָה מִצּוּר. Ball (cp GARDEN, § 4, n.) prefers reading צֹעַן 'Zoan' (Pesh.?). But surely 'like the land of Egypt' was clear enough, without a limiting or explanatory appendage. 'Egypt,' however, is not to be expected in this context, and the Hebrew traditions centre (as new evidence appears to show) in the Negeb and the N. Arabian border. For the later traditional view of Zoar see MOAB, and on the whole question of the original Zoar cp SODOM. T. K. C.

ZOBAH (צוֹבָה, σουβα [BAL]), or more fully ARAM-ZOBAH (אֲרַם צוֹבָה, Ps. 60 heading, σωβαλ [BℵR]), or ARAM-ZOBA (אֲ׳ צוֹבָא, 2 S. 10 6 8, but RV ARAM-ZOBAH), the home of one of David's 'thirty' (2 S. 23 36; δυναμεως [BA], μασσαβα [L]),[1] also the name of an Aramæan state, whose king Hadadezer was defeated by David (2 S. 8 1-14 10 15 *ff.*). In 1 S. 14 47 'the kings of Zobah' are said to have been defeated by Saul,[2] and in 2 Ch. 8 3 Solomon is asserted to have taken Hamath-zobah (*βαισωβα* [B], *αιμαθ' σουβα* [A], *εμαθσ.* [L]); the latter designation is thought to imply the same (erroneous?) conception of the importance of Zobah which is found in (*a*) 2 S. 8 3 8 10 15-19*a*, but not in the narrative (*b*) which contains 2 S. 10 1-14 19*b*. This at least is clear, that in the respective strata of narrative different views of the position of the kingdom of Zobah are suggested. If the view implied in the former stratum (*a*) is correct, the idea that David was one of the mightiest monarchs of his time is not an extravagant one, for here the kingdom of Zobah under Hadadezer is represented as dominating the whole of Syria, whereas in the latter stratum (*b*) Zobah appears with BETH-REHOB, MAACAH, and ISHTOB or TOB, as an ally of the Ammonites. This difference of view has been explained by the supposition that two different Zobahs have been confounded (see DAVID, § 9, with n. 2, where references are given for the evidence). One, to the N. of Damascus and Hamath, rich in copper (2 S. 8 8), was conceivably the mât Nuhašši[3] of the Am. Tablets (37 5 45 22, etc.), if Nuhašši means 'copper' (נְחשֶׁת), according to Halévy's theory (*REJ* 20 219; cp COPPER, § 3). The other Zobah corresponds to the 'districts of Ṣubitu,' referred to by Ašur-bani-pal (*KB* 2 217), and was S. of Damascus, perhaps (so Wi. *AOF* 1 467) between Ḥaurān and the Sea of Galilee. Two cities of the former Zobah (as we may provisionally say) are named in 2 S. 8 8, viz., Betah and Berothai (on these see TEBAH, BEROTHAI, BEROTHAH).

1. The prevalent theory.

[1] Marquart's suggestion (see JOEL, 3) to read הַמִּצְפָּה is only a step towards the right solution (see § 2).

[2] This, however, is probably due to a partisan of Saul, who wishes his favourite to vie with David (SAUL, § 3).

[3] Halévy supports this by the conjecture that צובה is a contraction of צְהוֹבָה, 'bright yellow,' and compares *Χαλκίς* from *χαλκός*, 'copper.' Chalcis was on the slopes of Antilibanus (cp Wi. *AT Unters.* 180). On the situation of Nuhašši, cp Flinders Petrie, *Syria and Egypt*, 179.

The preceding theory assumes the general accuracy of the MT of the passage of 2 S. referred to. There is grave reason, however, to hold that this assumption is erroneous. The Aram with which David had relations was, according to the still discoverable earlier form of the traditions, not the northern but a southern Aram—*i.e.*, the Jerahmeelites of the Negeb, and, if we use the many parallels and analogies of other restored passages, it is not difficult to recover the probable originals of names of places miswritten by the redactor. It should, however, first of all, be noticed to the credit of Winckler that, noticing the combination of Beth-rehob and Zobah, and the designation of Hadad-ezer, king of Zobah, as Beth-rehob, he has suggested that both names represent one and the same state (*GI* 1 141 *f.*). This is, in fact, very near the truth. The statement in 2 S. 8 3 should probably run thus, 'And David smote Hadad [. . . .], a native of Rehoboth, king of Zarephath,[1] when he went to turn him [David] back from the river [of Muṣri].'[2] Verse 8 in its original form probably spoke only of one royal city, viz., Rehoboth; of this Beṭah gives one and Berothai another corruption.[3] In 10 6 the allies of the b'ne Ammon were probably given as Aram-rehoboth (to which Aram-zoba is probably a gloss),[4] Maacah (the southern Maacah), and Tubal; Helam in *vv.* 16 *f.* represents Jerahmeel (place-name). In 1 S. 14 47 מלכי צובה ('the kings of Zobah') is miswritten for ירחמאל צרפת (Jerahmeel-zarephath); see SAUL, § 3. In 2 S. 23 36 we need not question the reading, 'Igal, b. Nathan, of Zobah,' for 'Zobah' here too represents 'Zarephath,' while 'Igal' (like 'Joel' and 'Gaal') is a popular corruption of 'Jerahmeel.' That 'Zarephath' should sometimes be used comprehensively, sometimes with a narrower reference, affords no ground for surprise. 'Zarephathites' is constantly used widely, and yet primarily, of course, it merely meant the people of the city of Zarephath. On 'Hamath-zobah' (Maacath-zarephath), 2 Ch. 8 3 see SOLOMON, § 7.

2. New theory.

Nöldeke (*BL* 1 232) places Zobah 'nearly in the region of Emesa.' Elsewhere (see MEROM) it is suggested that Merom (Josh. 11 5 7) may be the second or more southerly Zobah.

T. K. C.

ZOBEBAH (הַצֹּבֵבָה), with 'Anub' and the 'families of Aharhel, the son of Harum,' is (perhaps) connected genealogically with Tekoa (MT Coz [*q.v.*]), 1 Ch. 4 8 (σαβαθα [B], σωβηβα [A], σαβ. [L]). See TEKOA.

ZODIAC (מַזָּרוֹת), Job 38 32 RVmg., EV MAZZAROTH (*q.v.*). See also STARS, § 3 (*d*).

ZOHAR (צֹחַר, § 66; 'reddish-white?' see COLOURS, § 7; σααρ [BADEL]).

1. Probably the name of the clan to which Ephron the Hittite (from Rehobothite [?], see REHOBOTH) belonged (Gen. 23 8 25 9). Possibly we should read זֶרַח, ZERAH.

2. b. SIMEON (§ 9); see Zerah (4).

3. b. Ashḥur, a Judahite (1 Ch. 4 7; Ḳr. וְצֹחַר, 'and Zohar.' RVmg.; Kt. יצחר, see IZHAR, 2; *καὶ σ.* [BA], *καὶ εισαρ* [L]).

ZOHELETH, STONE OF (אֶבֶן הַזֹּחֶלֶת, 'Serpent's Stone' [BDB], but see below). This stone was evidently sacred, like the fountain En-rogel beside which it stood, and in the building which enclosed it Adonijah, as claimant of the crown of Israel, probably held his sacrificial feast (1 K. 1 9).

Gk. readings are: *λίθον τοῦ ζωελεθ* [A], . . . *τὸν ἐν ζεαλαθ* [L], *αιθη τοῦ ζωελεθει* [B]; cp *παρὰ τὴν πηγὴν τὴν ἐν τῷ βασιλικῷ παραδείσῳ*, Jos. *Ant.* vii. 14 4.

There must have been something remarkable about it. Very possibly it was overlaid with a 'brilliant' metal called זחלת, *zōḥéleth*, and corresponding to the Ass. *zaḫalū*.[5] There were two brazen pillars before the temple at Jerusalem (1 K. 4 17 21). The 'stone of Zoheleth' may have been a ruder pillar of the same sort. Some writers would place Zoheleth in the rocky way near the village of Silwān (Siloah) called Zaḥweleh. 1 K. 1 41 implies that those who were with Adonijah could see what went on in the valley of Kedron; this, however, would have been quite easy from Zaḥweleh (see Buhl, *Pal.* 94; Baed.(4) 100).

Wellhausen (*Heid.*(2) 146) suggests a connection with the 'brilliant' planet Saturn (cp the Ar. proper name Zuḥal).

[1] The vague notice in 2 S. 8 1 (where פלשתים represents צרפתים) probably comes from another source.

[2] Read, with Winckler, לְהָשִׁיב אתו מִנָּהָר.

[3] In Ezek. 47 16 the names should probably be Maacath, Rehoboth, Zarephath (see SIBRAIM and *Crit. Bib.*)

[4] Note that no extra number of warriors is put down for Beth-rehob.

[5] Cp the passages cited by Del. *Ass. HWB*, *s.v.* 'zaḫalū.'

Others (*e.g.* WRS, *RS*(2) 172, and Benzinger, *Kön.* 4) doubtfully connect the sacred fountain and stone with the Dragon's Well of Neh. 2 13 (see DRAGON). Zoheleth might mean 'serpent.' T. K. C.

ZOHETH (זוֹחֵת) and BEN-ZOHETH (*q.v.*), sons of Ishi, a descendant of Judah, 1 Ch. 4 20 (ζωαν [B], ζωχαθ [A], ζαωθ [L]).

ZOPHAH (צוֹפַח; σωχαθ, σωφας [B] -φαρ, -φα [A]), *σουφα* [L]), a name in a genealogy of ASHER (*q.v.*, § 4 2), 1 Ch. 7 35 *f.*†

ZOPHAI (צוֹפַי), 1 Ch. 6 26 [11], see ZUPH.

ZOPHAR (צ[ו]וֹפַר; σωφαρ [BℵAC]), one of Job's friends, a Naamathite (Job 2 11 11 1 20 1 42 9 [and 17 *e* 𝔊]†). NAAMAH (*q.v.*) was in SW. Judah; but the clan which settled there was doubtless of Calebite and therefore of Edomite extraction (cp 'Naam,' 1 Ch. 4 15). The poet must have reckoned 'Zophar' as an Edomite.

Probably the writer took the name from the notices in Gen. 36 11 15 1 Ch. 1 36, where צפו (Gen.) or צפי (Ch.)—both forms miswritten for צופר (see 𝔊)—occurs among the sons of Eliphaz, son of Esau. (See ZEPHO.) Still, 'Naamathite' is hardly the name we expect. Possibly נעמתי may have come from נימתי, and this, by transposition, from תימני. Zophar, then, like Eliphaz would be called a Temanite.

Dozy's correction (see Di., 20), רעמתי, 'a man of RAAMAH' (*q.v.*), and Hommel's, מעיני, 'Minæan' (cp 𝔊, ὁ Μ[ε]ιναῖος and, 2 11 42 17*e*, ὁ Μ[ε]ιναίων βασιλεύς), seem less plausible. T. K. C.

ZOPHIM (צֹפִים, σκοπιαν [BAFL]), apparently a mountain-district (שׂדה, see FIELD, 1), where was the 'height of the Pisgah,' Nu. 23 14. Dillmann, but not Kautzsch (*HS*), renders 'שְׂדֵה צ 'the field of watchers,' and supposes that there in times of danger watchers were stationed, or else that there diviners were wont to scan the heavens or the flight of birds for omens.

In Nu. 21 20, however, 'the height of the Pisgah' is said to be 'in the highland of Moab,' or rather (see MOAB, § 14) 'of Miṣṣur.' This suggests that צֹפִים is a corrupt or mutilated form of the name of a region or a clan—*i.e.*, either of מִצּוּר or of צָרְפָתִים. It was in fact probably a mountain not far from Zarephath that was meant in the original story. See further NEBO i., § 2. T. K. C.

ZOPHIM, RAMATHAIM. See RAMATHAIM.

ZORAH (צָרְעָה, as if 'hornet'; cp צִרְעָה; σαραα). A city repeatedly mentioned, but not easy so to locate as to suit all the textual phenomena. It was closely connected with the story of Samson; but the scene of this story seems to have been differently viewed at different times (see SAMSON). It was Danite—of that there can be no doubt (Judg. 13 2, *σαραλ* [B]; Josh. 19 41, *σαραθ* [B]).

Zorah is included in the same group with Eshtaol and Ashna, among the cities of the Shĕphēlah (Josh. 15 33, AV ZOREAH, *ραα* [B]): but the kernel of the name Eshtaol (Shaol or Saul) is probably Jerahmeelite. It is also mentioned in Neh. 11 29 (AV ZAREAH, om. Bℵ*A, *σαρα* [L]) and in 2 Ch. 11 10 as fortified by Rehoboam; but in both passages there seems upon critical grounds to be reason to think that the original text referred to places in the Negeb. In 1 Ch. 2 53 we find the ZORATHITES (AV ZAREATHITES, הַצָּרְעָתִי, *σαραθαῖοι* [BA], *σαραaθι* [L] among the families of Kirjath-jearim, cp 1 Ch. 4 2 (*αραθει* [B], *σαραθι* [A], *σαλαθιηλ* [L]); also in 2 54 where the ZORITES (הַצָּרְעִי, *ησαρει* [B] . . . *ραει* [A], *σαραθι* [L]), together with the MANAHETHITES (*q.v.*, and cp MANOAH) are sons of Salma the 'father' of Beth-lehem. But the genealogy is Calebite; jearim in Kirjath-jearim may represent 'Jerahmeel'; SHOBAL and SALMA are N. Arabian names, and Beth-lehem certainly represents Beth-jerahmeel, a name which, in such a context, we naturally assign to the Negeb. Ephrath too is primarily a name of the Negeb. It would seem therefore that in spite of the assignment of Zorah to the Shephelah in Josh. 15 33, and its combination with Aijalon in Josh. 19 41 *f.*, we must admit that a confusion has been made by the redactors of the OT texts between a Zorah in the Shĕphēlāh and a place of a similar name (probably צֹעַר Zoar, or צור Zur, or even מִצּוּר Miṣṣur), and of equal strategic importance, in the Negeb, not far from Beth-jerahmeel (confounded by redactors sometimes with Beth-lehem in Judah, sometimes with Aijalon).

The Zorah of the Shĕphēlāh would be the modern *Ṣar'a*, which stands on an eminence on the N. side of the Wādy Ṣarār, opposite Beth-shemesh and 14 m. W. from Jerusalem. On the importance of the situation see GASm. *HG* 218 *ff.* The Zoar (?) of the Negeb we cannot venture to locate. T. K. C.

ZOROBABEL (ζοροβαβελ [Ti. WH]), Mt. 1 12 *f.* AV, RV ZERUBBABEL. See GENEALOGIES, ii., § 2 (*c*).

Literature (§ 26, end).

Of Mazdaism, the religion of the Perso-Iranians, Zoroaster is regarded as the prophet; hence the religion is often called Zoroastrianism.

1. Names for Persian religion. Western writers, however, more usually speak of the doctrine of the Magi. It is not easy to say with certainty whether or not we are entitled to interchange the three terms, Mazdaism, Zoroastrianism, and Magism, as if they were synonymous.

2. Early obscurity. Positive information regarding the religious condition of Western Iran during the oldest historical period is almost entirely wanting. It is not absolutely certain, for example, of what faith Cyrus the Great was an adherent. With reference, moreover, to the antecedent conditions in Eastern Iran, which must have played an important rôle in the early development of the Persian religion, our sources are very scanty throughout. Our oldest positive witnesses for the belief in Mazda are the comprehensive inscriptions of Darius I., through which runs a strong vein of faith and pious devotion. Darius never wearies of glorifying the just and good guidance of the supreme god, Aüramazda (Ormazd). The other gods are mentioned only incidentally. Religious matters are often spoken of quite in the style of the later Avesta. The greatest evil is falsehood. The spirit of falsehood, the adversary (cp 'Satan') of Mazda, is not mentioned by any name. We are therefore confronted by the question,—Is the mere name of Mazda itself a positive proof of the Zoroastrian origin of the early Persian religion, or must the dualism be explicitly present as the essential mark of the prophet's teaching? Herodotus, moreover, our oldest authority, says nothing of Ahriman in his account of the religion of the Persians, nor does he mention the name of Zoroaster. Accordingly, C. de Harlez disputes the view that the Persians under the first Achæmenians were Zoroastrians. He also lays stress on the fact that the burial rites of the Persians, as pictured by Herodotus (1 140), are directly opposed to the Zoroastrian injunctions. Darmesteter rightly objects that it is not the intention of Darius to publish a creed or articles of faith. Herodotus, in a well-known passage (1 131-140), describes only the religious usages of the Persians, and expressly states that he does not know the whole truth regarding their customs connected with the disposal of the bodies of the dead. Darmesteter therefore comes to the conclusion that the Zoroastrian religion was in force in Persia at the time of Darius I. In practice, however, it was only the priestly caste of the Magi that was bound to rigid observance of the rule. Among the laity the religious prescriptions and usages did not have so binding a force nor so wide a scope as they had later at the time of the Sassanians. Windischmann had already expressed the conviction that Darius and his successors were genuine Zoroastrians, the name Aüramazda being as inseparable from the religion of Zoroaster as the name of Christ was from Christianity. This supposition would become a certainty if West is right in his conclusion that the Persian calendar, which is distinctly Zoroastrian in its naming of months and

ZOROASTRIANISM

days, had been introduced at the time of Darius, about 505 B.C. The entire question as to the Achæmenians being Zoroastrians is still under discussion. We know, at least, that Artaxerxes I. and his successors were Zoroastrians.

For references consult C. de Harlez, *Avesta*,(2) 1881, Introd. x, xvii, ccx; Darmesteter, *SBE* 4 (1880), Introd. xliv (2nd ed. 1895); *Le Zend-Avesta* (3 vols., 1893), vol. 3, Introd. lxx; Windischmann, *Zoroastrische Studien* (1863), 121; West, *SBE* 47 (1897), Introd. xliv.

According to Herodotus (1 132) no Persian could sacrifice without a Magian priest. This indirectly proves that there was a religious connection between the Persians and the Magians.

3. Greeks on Magi.

Everything implied in the statements of the Greeks regarding the usages and the doctrines of the Magi is genuinely Zoroastrian. The Magi allowed the bodies of their dead to be torn by dogs and birds of prey. They regarded it as a laudable act to kill as many ants, snakes, and other vermin as possible, whilst they held the life of a dog as sacred as the life of a man (Herod. 1 146). Marriage of near relations was with them a pious custom (Strabo, 15 20). All these things are treated with some fulness in the Avesta. Plutarch (*de Is. et Os.* 46) explains the Magian zeal for destroying all unclean animal life on the ground of the Zoroastrian theology, and quite in accordance with the Avesta, as follows: 'Among plants, they attribute the one to the Good Divinity, the other to the Evil Genius; similarly with regard to animals; the dog,[1] birds, and the hedgehog belong to the Good Divinity; the water-rat belongs to the Evil One. On this account they esteem him fortunate who has killed the most of these beasts.' Plutarch (*l.c.*) gives a sketch of the doctrines of the Magian Zoroaster and of the mythology of the Magians. He clearly develops the outlines of the dualistic system; the two primeval spirits and their incessant warfare; creation and counter-creation; the division of the universe; its limited existence; the end of the evil principle; the regeneration and purification of the world (*de Is.* 47; partly drawn from Theopompus).

Areimanios was mentioned for the first time beside Oromazdes in a lost work of Aristotle, according to Diogenes Laertius (procem. 8). The name of Zoroaster occurs earlier in a fragment (29) of Xanthos, and in Plato (*Alcib.* 1 122), who calls him the son of Oromazdes. For Western writers Zoroaster is always the Magus or the founder of Magianism (Plut., *l.c.*; Plato, *l.c.*; Diog. Laert., procem. 2; other passages in de Harlez, *op. cit.*, 189; Max Duncker, *GA*(4) 4 50). The ancients also give some details as to the childhood of Zoroaster and his hermit life (Pliny, *HN* 30 2; Plutarch, *Numa*, 4; Dio Chrysostom, 2 60). They call him sometimes a Bactrian, sometimes a Median or Persian (cp Jackson in *Jour. Amer. Or. Soc.* 15 222). No reliance can be placed on their references to his extreme antiquity. Hermippus of Smyrna placed him 5000 years before the Trojan War; Xanthos, 6000 years before Xerxes; Aristotle assigned him a similar antiquity (Pliny, *HN* 30 1 2; Diog. Laert. procem. 2; cp Jackson, *Jour. Am. Or. Soc.* 17 3, and *Zoroaster*, 150-178). Agathias (2 24) rightly remarks that it is no longer possible to determine with any certainty when he lived and legislated. 'The Persians,' he adds, 'say that Zoroaster lived under Hystaspes, but do not make clear whether by this name is meant the father of Darius or another Hystaspes.'

What the Greeks regard as the doctrines of the Magi the Iranians themselves call the doctrines of Zoroaster.

4. Iranians on Zoroaster.

The native accounts bring the personality of Zoroaster into the foreground. To him alone Mazda vouchsafed the Law and the Holy Faith, and ordained him as the teacher of men. The Avesta, or Zoroastrian bible, makes only occasional reference to the external circumstances of Zoroaster's life, for the part of the Avesta which was specially devoted to the story of his life, the so-called Spend-Nask, is lost. Its contents, however, have been worked into the Pahlavi literature, which in three places gives a description of his life. These interesting accounts, two of which occur in the fifth and seventh books of the Dīnkard and one in the Zartūsht-nāmak,[2] have been translated by E. W. West under the title, 'Marvels of Zoroastrianism,' in *SBE* 47 (1897).

These narratives have a mythical tinge that is quite oriental; they are not histories, they are legends. Already in the Avesta Zoroaster appears for the most part as a legendary personality.

He stands in personal intercourse with the divinity. At his appearing all nature rejoices (*Yasht*, 13 93); he enters into conflict with the demons and rids the earth of their presence (*Yasht*, 17 19); Satan approaches him as tempter to make him renounce his faith (*Vendidad*, 19 6). The history of his life is a succession of marvels. The divine powers themselves initiate him into his high calling, and during the whole of his prophetic career they stand by him with their counsel.

Many scholars therefore have regarded the personality of the prophet as purely mythical (Darmesteter; Kern, according to Tiele, *Kompendium*, § 99). This is certainly going too far. There is no reason to doubt the existence of the religious founder, Zoroaster; he lives too strongly in tradition. The legend of Zoroaster is not one to be deprived of all historical foundation.

Zoroaster's real name is Zarathushtra, Modern Persian, Zardusht; it seems to mean, 'Possessor of old camels.'

5. Traditional data.

His father was Pourushaspa, of the noble family of the Spitāmas, his mother Dughdhōvā. Regarding his native place there is a double tradition. According to one, the house of his father was situated in Airyana Vaējo upon a hill of the river Dareja (the modern Darya, in northern Azerbaijān), and Zoroaster was born there. According to the other tradition he came from Ragha (Rai; see RAGES) in Media proper. In Sassanian times, Ragha as well as Atropatene was an important seat of the priesthood. In Ragha resided the Zarathushtrotema, the supreme head of the church. The riddle of the contradiction has been solved by Jackson. According to a statement of Shahrastānī, Azerbaijān was the home of Zoroaster's father, whilst his mother was by birth from Rai (Jackson, *Jour. Am. Or. Soc.* 15 228; Darmesteter, *SBE* 4 Introd. xlvii).

The most important traditional data of Zoroaster's life are as follows. When he was thirty years old, in a vision upon the bank of the river Dāitya, the archangel Vohumano appeared to him and invited him to a conference with Mazda. This first meeting, which is recorded also in the Avesta (*Yasna*, 43), is to be regarded as the coming of the new religion and as the beginning of a new era of the world. Seven other conferences followed in the next ten years. In the first two years, at the command of the Lord, Zoroaster preached the new doctrine to the Kavis and Karpans—*i.e.*, the ruling idolatrous priests of the land—in the presence of the prince of the region, a Turanian; but without effect. The injunction of 'next of kin' marriage shocked them. He then betook himself to Seistān, to Parshatgāu, who allowed himself to be converted, but not in public. It was only Zoroaster's own cousin, Maidyōi-māongha, who first openly professed himself his disciple, so that the prophet disheartened cries out: 'In ten years I have won only a single man!' Mazda now sent him to the court of King Vīshtāspa. There he had first to undergo cruel imprisonment; but after two years he finally overcame the opposition of the idolatrous priests and converted the king. At this time also the brother of the king, Zairivairi, as well as the king's son, Spentōdāta, and both the Vizirs, namely, the brothers Frashaoshtra and Jāmāspa, became wholly devoted to him. Zoroaster lived to see the great religious war with King Arejataspa, who invaded Iran with the Hyaonas and was defeated, but met his death by the hand of a Turanian, it is said, at the age of 77 years and 40 days. The Avesta does not definitely express itself regarding the home of King Vīshtāspa; it is only the latest tradition that locates the seat of the king, and also the scene where Zoroaster successfully taught, in the E. and especially towards Bactria.

If there is anything historical in these notices it is the

[1] Contrast Is. 66 3 (see DOG, § 3).
[2] This forms part of the *Selections of Zād-sparam.*

figure of the royal patron and protector Vīshtāspa, 'who with his weapon broke a path for the truth, and became the arm and support of the Zoroastrian religion, and freed it from the chains in which it had lain bound, and raised it to power and spread it abroad' (*Yasht*, 13 99-100). His influential consort Hutaosā appears to have led the way by good example. Zoroaster found strong support at the court, moreover, in the two brothers, Frashaoshtra and Jāmāspa. The Gāthās never mention the name of the king without mentioning with praise his two zealous and faithful counsellors. To both of these Zoroaster was related by marriage; he married Hvogvī the daughter of Frashaoshtra; and Jāmāspa married Zoroaster's daughter, Pouruchistā.

As to the era of Zoroaster, the extravagant dates given by the Greeks have no value. Modern investigation avoids mere guesses and places more reliance on the native statements.

6. Date.

We have two dates given by tradition. The one makes a period of 272 years intervene between the beginning of the religion (see above, § 5) and the death of Alexander the Great (323 B.C.); whilst according to the other, the religion had existed in purity for about 300 years before the invasion of Alexander. According to the first statement, Zoroaster would have lived from 625 B.C. to 548 B.C. West makes the second statement the basis of his reckoning, and taking account of a slight omission in the traditional chronology makes the dates 660-583 B.C. (cp *SBE* 47, Introd. xxvii and xxxviii). These numbers fall within historical times, and the former comes near the era of the historical Vīshtāspa (Hystaspes), the father of Darius I. With this Hystaspes, who was satrap in Parthia, it was formerly usual to identify the Vishtaspa of the Avesta. This identification, however, falls to the ground, at least for the present, because of the totally different ancestry of the historical Hystaspes and of the Vīshtāspa of the legend.

The chief source of information regarding the teaching of Zoroaster is the Avesta. This was redacted in the time of the Sassanidæ; it is drawn, however, in part at least, from older sources and tradition.

7. Teaching: sources.

To the oldest tradition belonged the so-called Gāthās. They contain remnants of the addresses and sermons, delivered before the assembled court, and put by tradition into the mouth of the prophet, who is conceived of as teaching, exhorting, and seeking to win recruits for his cause. The Gāthās themselves are distinguished in two respects from the 'younger (later) Avesta.'

First, the person of Zoroaster appears much less legendary in the Gāthās. The scenes of his activity and teaching are placed much more vividly before our eyes. His relation to his patrons is much more close and real. The Gāthās are marked by many personal allusions and references which are unknown to the younger Avesta. Secondly, the celestial world is much more predominantly abstract. Material and naturalistic divinities like Mithra are foreign to the Gāthās. The external cult and ritual sink almost entirely into the background. The holy drink, the Haoma, is not mentioned.

These two considerations, however, are not enough to enable us to distinguish sharply between the Gāthā Zoroastrianism as the pure and original doctrine on the one hand, and the later Zoroastrianism as systematically developed and corrupted by the older popular faith on the other. The Gāthās are really not properly dogmatic and doctrinal sermons; they are rather prophetic sayings, promises, and injunctions intended specially for the narrower community of the faithful and initiated; they represent the esoteric side of Zoroaster's teaching in its ideal bearing rather than its outward rules and statutes. The Gāthās are rather the philosophy of Zoroastrianism; the younger Avesta is rather its theology together with the systematic elaboration of the Zoroastrian doctrine.

The supreme God is Ahurō Mazdāo (Anc. Per., *Aŭramazda*, Mod. Per., *Hormazd* or *Ormazd*), 'the wise lord.' He is called also Spentō Mainyush—*i.e.*, 'the holy (lit., weal-bringing) spirit'—and he is the creator and regent of the world. His sovereignty over the universe, however, is contested by his foe, the fiend primeval, Angrō Mainyush—*i.e.*, 'the destructive spirit.'

8. Zoroastrianism: Ormazd, Ahriman.

In the beginning of things these twin spirits existed independently of each other; they became aware of their opposing character (*Yasna*, 30 3) and swore an eternal feud (cp *Yasna*, 45 2 and *Bundahish*, i. 14). Both spirits possess creative power, which manifests itself in the one positively and in the other negatively. Ormazd is light, life, and activity, the soul of all that is pure and good; in the ethical world he is law, order, and truth. His antithesis, Ahriman, is darkness, filth, death, and reaction; all that is evil in the world; lawlessness and lies spring from him. Ormazd has his throne in the 'endless light' of heaven, in Paradise; Ahriman rules in the cold north, in the endless darkness of Hell, from which he breaks forth from time to time. Ormazd alone possesses omniscience and prescience; Ahriman's wisdom is backward knowledge (*Bundahish*, i. 9); he is always coming too late, and has to look at events after they are past. For the time being the two spirits counterbalance one another. The complete sovereignty of Ormazd is to come to pass in the future existence. The ultimate triumph of the good spirit is an ethical demand of the religious conscience and the quintessence of Zoroaster's revelation. His doctrine is dualistic in so far as it sets up two opposing primeval powers; it is not, however, quite consistent; the two principles are not endowed with equal power. The dualism of Zoroaster is only an episode in the existence of Ormazd, who is the supreme and only god from the beginning of the world, and remains so to eternity.

In the realm of light, Ormazd is the sovereign lord. As a spirit, it is true, he is invisible to men; but he is not immaterial. A flaming, firm, exalted, and beautiful body is attributed to him. The heaven is his robe. In his exalted majesty he is the ideal figure of an oriental king. The other divine powers and genii are his creation, helpers, overseers, and servants, his instruments and his leaders in the war against evil.

Next to him in rank stand six archangels, the Amesha Spentas, 'the Immortal Holy Ones'; he himself is often counted with them as the seventh. They resemble the ministers of some autocratic sovereign. They sit round about Ormazd, and he holds counsel with them.

9. The Amesha Spentas.

According to their names they are pure abstractions, although in the Gāthās they are already represented as persons. They have been developed partly out of the ethical ideas of the old Aryan belief. As a whole, however, they are a true product of Zoroaster's conception. They form the necessary constituents of the kingdom of Mazda which is to be perfected, and in them the tendency of Zoroastrianism to personify abstract ideas takes its origin. In everything the Amesha Spentas are the truest fellow-workers of Ormazd. The care and guardianship of creation is entrusted to them, and they are regarded as tutelary divinities over the separate kingdoms of nature.

The names of the Amesha Spentas are: (1) Vohu Manō (Plut. *εὔνοια*), Good Mind—*i.e.*, the good principle, the idea of the good, the principle that works in man inclining him to what is good; this divinity acts also as genius of the flocks. (2) Ashem, or generally Ashem Vahishtem (ἀλήθεια), corresponding to all that is true, good, and right—ideas which, to Zoroaster, are practically identical—upright law and rule, also the genius presiding over fire. (3) Khshathrem, generally called Khshathrem Vairīm (εὐνομία), the power and kingdom of Ormazd, also the genius of metals. (4) Ārmaiti (σοφία), or the spirit of docility and obedience, early represented as the genius of the earth. (5) Haurvatāt (πλοῦτος), holiness, perfect health, the genius of the health-giving waters. (6) Ameretatāt, immortality, the genius of plants.

The other good spirits of Ormazd are comprised under the name Yazata (Izeds), 'angels.' These are partly religious and ethical abstractions of Zoroastrianism like Rashnu (Uprightness) or Ashi Vanuhī (the good

Reward of Piety). In part they are the unforgotten forms of Aryan mythology, such as Mithra and Verethraghna (the genius of Victory, the Iranian counterpart of the Indian Indra Vrtrahan), or they are the familiar personifications of natural phenomena such as the sun, the moon, fire, wind (cp Herod. 1 131). In the Gāthās most of the Yazatas are not mentioned—even such as hold quite an important place in the later system and ritual, like Mithra. It is only Sraosha (holy obedience) and Atar, the fire, the son of Ormazd, that play a more important rôle. For the younger Avesta, special mention must also be made of Anāhita, goddess of the waters, and of the Fravashis (Fervers), the spiritual prototypes of men and of the good creation and at the same time the guardian spirits of the pious.

10. Other good spirits.

Ahriman also has his infernal hosts which he created for the conflict with Ormazd.

11. Other evil spirits.

These are endowed with less individuality, however, than those of the kingdom of light. The Druj (Lie, Falsehood), for example, is opposed to Asha; Akem Manō (Bad Thought) to Vohu Mano; and Ārmaiti to Tarōmaiti (Pride or Presumption). In the Gāthās, the Druj is mentioned more often than Ahriman himself. In the later texts, the word Druj signifies a special class of female demons. The most familiar of these is Nasu, the corpse spirit. The schematic system of later times has also given Ahrimanian counterparts to each of the other Ameshā Spentās. Myriads of demons, Daēvas (Devs), make up the mighty horde of Ahriman. They embody all the disturbing elements in nature and the baser instincts in man. Of most of them we know only the names. The best-known among them is Aeshma, the demon of Wrath (see ASMODEUS).

As soon as the two spirits encounter each other their active or creative, and at the same time permanent, conflict begins. The history of this conflict is the history of the world. Every move of Ormazd is met by a counter-move (*paityāra*) of Ahriman.

12. The conflict.

Whatever the good spirit creates, the evil spirit sullies, or, as the text says, 'just like a fly he rushed out upon the whole creation' (*Bundahish*, iii. 17). No sooner has Ormazd created the world than Ahriman brings upon the earth distress in the form of plague and noxious creatures. Ormazd brings into existence the primeval bull (prototype of all animals); Ahriman tortures it to death with hunger, sickness, and blows, and its soul (Geush Urva) complains before the throne of Ormazd about the violence it has had to suffer. Ormazd comforts the soul of the creature with the assurance of the future coming of Zoroaster (*Yasna*, 29; *Bundahish*, 4). Ormazd creates the first man (Gaya Maretan); Ahriman incites against this man Astō-Vidhōtu, the demon of death, and thus sets death in opposition to life.[1]

A great cleft runs through the entire world and divides it into two great camps—the kingdom of light and the realm of darkness. All creation is divided into that which is Ahura's and that which is Ahriman's. This division extends even to the language. Whenever mention is made of face, ears, hands, and feet, of activity, speaking, going, striving, a sharp distinction is made in the expression between good and evil beings. The two spirits do not carry on the struggle in person. They leave it to be fought out by their respective creations and by creatures which they send into the field. The field of battle is the present world.

In the centre of the battle is man; his soul is the object of the war. Man is a creation of Ormazd, who therefore has the right to call him to account. Ormazd, however, created him free in all his decisions and in his actions, wherefore he is accessible to the influences of the evil powers. This freedom of the will is clearly expressed in *Yasna*, 31 11: 'Since thou, O Mazda, didst at the first create our being and our souls in accordance with thy mind, and didst create our understanding and our life together with the body, and works and words in which man according to his own will can frame his confession, the liar and the truth-speaker alike lay hold of the word, the knowing and the ignorant each after his own heart and understanding. Armaiti searches, following thy spirit, where errors are found.' Man takes part in this conflict by all his life and activity in the world. By a true confession of faith, by every good deed, by continually keeping pure his body and his soul, he impairs the power of Ahriman and strengthens the power of goodness, and establishes a claim for reward upon Ormazd; by false confession, by every evil deed and defilement, he increases the evil and renders service to Ahriman.

[1] This story is by some wrongly connected with the story of Adam in Genesis.

The life of man falls into two parts—its earthly portion and that which is lived beyond the grave. The lot assigned to him after death is the result and consequence of his life upon earth. No religion has so clearly grasped the ideas of guilt and merit. A strict reckoning of the works of men here below will be kept in heaven. After death, at the end of the third night, the soul arrives at the head of the Cinvatō-Peretu, or Accountant's Bridge, over which lies the way to heaven.[1] Here takes place the revealing and disclosure of all its past life, the *judicium particulare.* The angel Mithra and the angel Rashnu make up the account and reckoning (*SBE* 24 258), or Rashnu the Just weighs the good and the evil deeds over against each other in the impartial balance that does not vary a hair's breadth in favour of any man, not even a monarch (*SBE* 24 18).

13. Man, here and hereafter.

14. Judicium particulare.

Perhaps in ancient times the bridge itself was conceived of as a sort of automatic scale. In the case of the soul of the just whose good deeds outweigh his evil acts, the bridge becomes wide and easy of crossing; and at this moment his own religion comes to meet him in the shape of a beautiful maiden, and accompanies him to Paradise (Garōdemānem), where Vohu Mano receives him (*Vend.* 19 30-31). In the case of the soul of the wicked, however, the bridge becomes as narrow as the edge of a razor, and when he reaches the middle of it he falls off and is plunged headlong into hell (*SBE* 17 48).

Should the evil and the good be equally balanced, the soul passes into an intermediate stage of existence (the Hamēstakān), and its final lot is not decided until the last judgment.

Man, however, has been smitten with blindness and ignorance; he knows neither the eternal law nor the things that await him after death. He allows himself only too easily to be ensnared by the craft of the evil powers who seek to ruin his future existence. He worships and serves false gods, being unable to distinguish between truth and lies. Thus it came about that Ormazd graciously determined to open the eyes of mankind by sending a prophet to show them the right way of salvation. According to the later legend (*Vend.* 2 1), Ormazd at first wished to entrust this task to Yima (Jemshid), the ideal of an Iranian king; but Yima, the secular man, felt himself unfitted for it and declined the office. He contented himself therefore with establishing by order of the Lord in his paradise (*vara*) a heavenly kingdom in miniature, to serve at the same time as a pattern for the heavenly kingdom that was to come. Zoroaster at last was found fit for the mission. It was not without special reason, the Gāthās believe, that the calling of a prophet should have taken place precisely when it did. It was, they held, the final appeal of Ormazd to mankind at large. Like John the Baptist and the apostles of Jesus, Zoroaster believed that the fulness of time was near, that the kingdom of heaven was at hand. Through the whole of the Gāthās runs the pious hope that the end of the present world is not far off. Zoroaster himself hopes along with his followers to live to see the decisive turn of things, the dawn of the new and better æon. Ormazd will summon together all his forces for a final decisive struggle, and break the power of evil for ever; by his help the faithful will achieve the victory over their detested enemies, the *daēva* worshippers, and render them powerless. Then the great act (*yāh*) will be accomplished. Ormazd will institute a universal world-judgment (*judicium universale*).

15. Judicium universale.

[1] For parallels see Che. *OPs.* 438, note ee.

By means of an ordeal of fire and molten metal he will separate the good from the wicked and will judge strictly according to justice, punish the wicked, and assign to the good the hoped-for reward. Ahriman will be cast, along with all those who have been delivered over to him to suffer the pains of hell, into the abyss, where he will thenceforward lie powerless.

Forthwith begins the one undivided kingdom of God in heaven and on earth. This is called, sometimes the good kingdom, sometimes simply the kingdom. Here the sun will for ever shine, and all the pious and faithful will live a happy life that no evil power can disturb, in the fellowship of Ormazd and his angels for ever.

In one respect with regard to this, there has come about in the later writings a change that is easy to understand. In them the catastrophe and renovation of the world are placed in a far distant future. Whereas in the Gāthās Zoroaster himself is more or less clearly designated as the Saoshyant—*i.e.*, the predestined saviour of the world—the later writings look for the appearance of this Saoshyant only at the end of the present æon.

The Avesta does not contain any definite statement as to the division of time in the existence of the universe (yet cp Fragm. *Vend.* 2 24).

According to the *Bundehesh*, the duration of this world is 12,000 years divided into periods of 3000 years each (cp Plut., *de Is.* 47). In the first 3000 years Ormazd creates his creation in its spiritual form or prototype, without Ahriman being aware of it. At the beginning of the second period Ahriman raises himself from hell into the light and perceives the start which Ormazd has obtained. In this period both spirits create their material creation. At the beginning of the third era Ahriman invades the creation of Ormazd, and during this period good and evil counterbalance each other. At the beginning of the tenth millennium, Zoroaster appears, and a new prophet is to spring from his seed after each of the three remaining millennia. As the last of these Messiahs the real Saoshyant shall appear.

The Saoshyant with his helpers will accomplish the renovation of the world (frashō-kereti). Ormazd will raise the dead and the Saoshyant will assemble them all in one place. Everyone must descend into the great flood of molten metal. To the pious this lake will seem like a flood of warm milk; but to the wicked it will feel as if they were wading in molten metal. Then, in the name of Mazda, the Saoshyant will distribute unto everyone a reward according to his works. Ormazd will hurl Ahriman powerless back into hell, which is filled up with the molten metal, and the world will become purified for ever and for aye (*Bund.* 30). The younger (later) Avesta speaks of the end of the world and of the last things only in brief allusions. The idea of the resurrection of the dead is quite familiar to it and seems to be referred to several times even in the Gāthās.

16. Ethics.

The moral and ethical teachings of Zoroastrianism are sound and consistent. The moral code is summed up in the three words; 'good thoughts, good words, good deeds.' Man must enlist in the service of Ormazd and devote himself to the good cause with his whole being, and he must do every injury possible to Ahriman. This fundamental principle dominates the entire religious code and all the ecclesiastical legislation. Because of the general utility of its precepts this code represents a high standard of civilisation when we consider the early times to which it belongs. It imposed upon the faithful the duty of worshipping Ormazd and his spirits, of prayer, sacrifice, the inviolability of his creatures, the sacred respect for the cow (emphasised especially in the Gāthās), attention to agriculture and arboriculture, irrigation of dry lands, extermination of noxious animals, charity toward one's co-religionists, and the observance of absolute truthfulness. Above all stands the law of chastity. The faithful shall preserve purity, both of body and of soul. The soul must be kept pure from heretical doctrines and the influences of the Devs, the body must be kept from coming into contact with unclean persons, with corpses, filth, or other Ahrimanian objects. Man also must not in any way defile the pure elements of Ormazd such as fire, water, and earth. This love of purity, which as a principle is already proclaimed in the Gāthās (*Yasna*, 48 5), has led to the adoption of the most scrupulous washings and lustrations and elaborate ceremonies of purification, as well as of many strange customs, such as the exposing of corpses on the Towers of Silence (Dakhmas). According to strict logic, offences against the precepts of the law cannot be undone; but in the heavenly account they can be counterbalanced by a surplus of good works. The elaborately developed system of Zoroastrianism fixed the doctrine of equivalents with mathematical precision, and definitely assigned certain useful and pious works as acts of penance for certain sins. But corporal chastisements also were prescribed; these, in the main, were for the purpose of driving out the Devs that had taken possession of the sinner's body. In later times, however, matters were made easier for the sinner. For corporal punishment monetary fines could be substituted, and absolution from sin became more and more a means of grace to be had only at the hands of the church. Confession to the high priest, sincere repentance and reform, remove every sin from the body (*SBE* 24 95 and *Vend.* 3 71). For such a confession it was obligatory to recite one of the confessional formulas (Patets), in which the later literature abounds.

17. Worship. The Magi.

The cult of the Zoroastrian religion was without pomp. The sacrifice is described by Strabo (732). The sacred fire formed the central point. The sacrificial gifts which were offered were meat and milk, and more especially the sacred drink Haoma. The main stress was laid upon prayer and the ascription of glory to God.

The systematic development of the teachings of Zoroaster and of the Zoroastrian law is undoubtedly the work of the priesthood which through their strict exclusiveness became an hereditary caste. In the W. they were called Magi; in the language of the Avesta they are termed Āthravan; but even in the sacred texts the word Magi occurs in a few instances. The Āthravans were the privileged guardians of the religion and the leaders of worship. They alone could perform the sacrifices (Herod. 1 132), and carry out the ecclesiastical punishments and penances; they alone could interpret the law. They exercised a sort of spiritual guardianship over the laity. Every young man, after his reception into the community of the faithful, or Mazdayasnians, had to select a spiritual guide, a father-confessor (Ratu). The priesthood never attained political power—or never even claimed it.

18. History of Zoroastrianism.

After the fall of the Achæmenidæ (331 B.C.) Zoroastrianism lost greatly in power and dignity. It was subsequently rehabilitated, however, by the Sassanians, under whom it reached its highest prosperity. It was at this epoch that the clergy advanced to a firmly-constituted hierarchy, and Zoroastrianism became the official religion of the state, favoured and protected by the government. The formation of sects was at this period not infrequent (cp 'Manichæism' in *EB*(9)). The Zervanites flourished under Yazdegard II. (438-457 A.D.). They represented Ormazd and Ahriman as twin sons proceeding from the fundamental principle of all, the limitless time (*Zrvan akarana*). The Mohammedan invasion (636 A.D.), with the terrible persecution of the following centuries, was a deathblow to Zoroastrianism. In Persia itself only a few followers of Zoroaster are now found (in Kirman and Yazd). The Parsees in and around Bombay hold to Zoroaster as their prophet and adhere to the ancient usages; but their doctrine has reached the stage of a pure monotheism (see PARSEES in *EB*(9)).

19. Origin.

If we inquire into the origin of the Zoroastrian religion we must not lose sight of the fact that everything which is written on this point must necessarily rest upon mere conjecture. Tradition has obliterated every trace of the actual process by which the faith came into existence, and of the particular factors which were active in its formation. As far as tradition is concerned the complete doctrine was revealed by Ormazd in its entirety. Already in the Gāthās the belief in inspiration predominates; nevertheless they allow us to read between the lines other things as well.

We are denied, however, a clear insight into the popular religion before Zoroaster and into the ancient doctrines of the Magi, to whom Zoroaster must have had certain relation, whatever the exact extent of that relation may have been.

The Mazda-religion is distinguished from the nature-religion of kindred peoples by its dogmatic character and by the unity of its structure. There is a fundamental idea in it which is developed with absolute logic. It is the fundamental dogma of the two spirits, a tenet which contains both the problem of the world and the solution of its enigma. This doctrine, not only in its beginning and foundation, but also, in part at least, in its detailed structure, is the product of a single creative personality; and that personality was Zoroaster. It was a new religion that Zoroaster taught. This must not be taken, however, to mean that everything in Zoroastrianism is absolutely new. Zoroaster himself says that his desire was to purify the religion (*Yasna*, 44 9). In its fundamental teaching as well as in its completely elaborate system Zoroastrianism shows unmistakable traces of the old Aryan religion.

In common with the people of India, Zoroastrianism has the cult of fire and of Haoma; it has also in common with India the name of the chief sacrificial priest Zaota (Sk. *hōtā*), of the gods Mithra and Verethraghna, and the enforcement of minute purificatory precepts. The Zoroastrian doctrine of the weighing of good and bad deeds in the balance, which determines the fate of the soul after death, has its faithful counterpart in the Indian doctrine of *karman* and in the balancing of *dharma* and *adharma* in *Manu*, 12 20 *f.* It is only with Zoroaster, however, that this doctrine is developed in its most practical and, if one may say so, business-like form. Already in Šatapatha Brāhmaṇa (11 2 7 33) we meet with the conception of the scale in heaven, on which good and evil deeds are weighed. The threefold division according to thoughts, words, and deeds, is as familiar to the Hindus as to Zoroaster.

It has been believed that foreign influences even are traceable in Zoroastrianism; but this remains a quite obscure point. The isolated analogies with Turanian, Assyro-Babylonian, and Hebraic conceptions cannot be accepted as giving convincing proof of actual borrowing on the part of Zoroastrianism (cp C. de Harlez, *Des Origines des Zoroastrisme;* Z. A. Ragozin, *The story of Media, Babylon, and Persia* (1888), p. 147; Tiele, *Kompendium*, par. 109; Darmesteter, *Le Zend-Avesta*, 3, Introd. lxxiv and lvii). The hypothesis of Darmesteter that the doctrine of the Gāthās was influenced by Gnosticism, has hardly found any adherents.

The dualistic idea of Zoroaster is not adequately explained by conceiving it as a remodelling of the old mythological opposition between gods and demons, influenced and favoured by the sharp contrasts in nature in the Iranian land (Duncker, 102; Darmesteter, *Ormazd et Ahriman*, 88 271; Ed. Meyer, *GA* 1 531 *f.*). Such an account still leaves unexplained the transformation and radical change of the Aryan *devas* (gods) into the Zoroastrian *daēvas* (devils). Just as the fiendish demons, *daēvas*, are opposed to the good god Ahura in Zoroastrianism, so the *devas* and *asuras* have been placed in opposition in India from the earliest times. In the oldest literature this opposition is not as yet one of pronounced hostility; but it soon becomes so. The *devas* remain gods, the *asuras* become demons. Between these two phenomena of contrasted meanings there must be a connection of cause and effect. They point to an old opposition in the Aryan world of the gods, expressed by the words *deva*, *asura*, which grew to be more and more distinct and sharp with both races, but in exactly opposite directions. In Iran the contrast seems to have led at first to two distinct cults, to an Ahura cult and to that of the Daevas. This seems to have been the religious condition of affairs in Iran when Zoroaster appeared. We meet with hints in the Gāthās which show us that the people were divided between these two opposing cults. The opposing parties are not separated by distance in space or by difference of race; they are found side by side. 'Hard by the believer in Ahura dwells the worshipper of the *daevas*,' complains Zoroaster. Not two cults, but two stages of culture, are struggling for the primacy; the Ahura worshippers represent the higher phase; they are breeders of cattle, and in their eyes the cow is a sacred animal; the worshippers of the *daēvas* on the other hand maltreat the cow and slaughter it in their sacrifices. From this religious difference and dissension Zoroaster seems to have received his first impulse for appearing in public. As an adherent of Ahura whose attribute is 'The Wise One,' and as prophet, he will warn men against false teachers and priests; and amidst the differences of creeds and beliefs he will guide them to the wiser choice in order to save their souls. What the other party worship as gods under the name of *daēva* are in reality powers by whom unwitting mankind is led to its destruction—evil powers, false gods, devils. Such is the position from which all his teaching starts; and thus the change in the conception of *daēva* was a natural development. From the *daēvas* proceeds all the evil in the world. But Zoroaster's speculation does not stop here. The *daēvas* themselves anon become manifest to him as being but the instruments of a higher principle, that is the spiritual enemy, Ahriman. This Ahriman or evil principle is the most characteristic product of Zoroastrian speculation. From the schism or religious dualism of his time he derived the idea of the dualistic scheme of the universe which has impressed its character upon the whole of the religion called by his name.

The literature of the subject has been cited in the course of the article. Consult especially Tiele, *Kompendium der Religionsgesch.*, or (best of all) Ed. Meyer, *GA* 530-573 (1884). On Zoroaster's life, A. V. Williams Jackson's *Zoroaster, the Prophet of Ancient Iran* (New York, 1898) may be specially recommended. See also the references in Cheyne, *OPs.* (see below).

K. F. G.

The question of the influence of Zoroastrianism on Jewish religion can only relate to *post-exilic* Jewish religion.

20. No early influence on Israel.

There is no evidence of any Persian influence on Jewish belief before the exile; the reference which has been supposed in Ezek. 8 16 to a Persian custom is based on a mistake (see *Crit. Bib.*). During the Babylonian exile, though contact with Persians was doubtless possible, it was the religion of Babylonia that naturally exercised more influence than any other on the Jews. In the Babylonian hymns we find a near approach to the Jewish conception of God, and to the Jewish view of sin, whilst the Babylonian view of the divine creatorship is surpassed in grandeur only by the Zoroastrian.

In the period which we may conventionally call post-exilic, Persian influence, or, more definitely, the influence of Mazdaism can more easily be supposed.

21. Post-exilic.

The Jews in Palestine cannot have been subject to much direct influence of this kind. It was rather indirectly, through the large Jewish colonies E. of the Euphrates and the Tigris, that Palestinian Judaism was affected by Persia. These colonies, as we know, kept up an intercourse with the community in Judæa. It is very possible that the idea of bringing what Artaxerxes is represented as calling 'the wisdom of Ezra's God which is in his hand' (Ezra 7 25) in book form to Jerusalem was, if not suggested, yet strengthened by the existence of a book-religion in Persia, and it would be unreasonable not to suppose that Jews in and near Persia gained some acquaintance with the Zoroastrian religion, and were influenced by it. The high moral tone of the best Persians (see the inscriptions of Darius) and of their religion could not but attract the best Jews (cp Mal. 1 11), and the Persian folk-lore would be equally attractive to Jews of a less spiritual turn of mind. We need not, of course, suppose an acquaintance on the part of the Jews with Zoroastrian *literature;* the ideas of book-religions are not propagated exclusively by the sacred writings. Eschatological and demonological ideas, in particular,

were likely to be communicated by word of mouth, and it is in the field of eschatology, angelology, and demonology that Persian influence on Judaism may most surely be recognised.

Early post-exilic Persian or Zoroastrian influence is not easy to prove. Jewish scribes and editors had other objects than that of enlightening the historical students of to-day, and official religious writers were doubtless anxious to check foreign influences, and to conceal the tokens of their existence. Even the protests of official writers, however, are useful to the historical student. The belief in Satan, as we find it in the OT, is thoroughly Jewish, and yet it would hardly have assumed its actual form without the indirect influence of the belief in Ahriman against which it became a protest (see SATAN). So too the ancient benediction called *yōṣēr ōr* must have had a polemical intention, and yet the custom of reciting it at dawn was no doubt influenced by a similar Zoroastrian usage.

It would somewhat strengthen the case for Persian influence on the Jews if we had other *linguistic* proofs besides the supposed derivation of ASMODEUS (*q.v.*) from Aēshma-daēva.

22. Later. Such proofs, however, are wanting, nor can the generally accepted Zend etymology of Asmodeus be called quite certain, owing to the imperfect correspondence of the qualities of the two demons. The question needs examination in connection with the story of Tobit (may we refer in advance to a new explanation of Asmodeus in *Crit. Bib.* ?), which seems to have passed through several phases. It is clear, however, that, as time went on, Persian and Babylonian influences in combination were more and more felt by the Jews. Hence it is difficult to say whether the seven evil spirits of Mt. 12 45 are to be traced to Babylon or to Persia, and whether the Book of Revelation (a Jewish even more than a Christian work) strikes us more by its Persian or by its Babylonian affinities.[1] Such a competent authority as E. W. West can see hardly any difference between the Devil of this book and the Zoroastrian Ahriman, whilst the eschatology of the later Zoroastrian books has a most striking resemblance to that of Revelation. The contest of Michael and his angels with the dragon and his angels is closely parallel to the contest between Vohumanō 'Good Mind' and the powers of evil, and to the 1000 years' conflict with Azhi Dahāka (the destructive serpent). Nor is the awful 'lake of fire' wanting in the later Zoroastrian books.

The seven 'men,' *i.e.*, angels, in Ezek. 9 2, together with the seven archangels of Tobit may supply evidence of an earlier date for Persian influence, though (without here raising the question as to the original setting of the story of Tobit) it may be admitted that the Persian Amshaspands developed out of Babylonian germs. In fact, it is becoming more and more clear that we cannot always draw a sharp distinction between original and imported Persian beliefs. The influence of Babylonia upon Persia must have begun earlier than used to be supposed. The religion of Aüra-mazda, in spite of its primitive Aryan roots, must have been influenced, like the religion of Yahwè, by that of Babylonia. For instance, both the seven chief good spirits and the seven chief evil spirits of Zoroastrianism have indisputable Babylonian affinities. Probably, however, it would be correct to say that Gabriel and Michael and their companions are more directly akin to the Zoroastrian Amesha Ṣpentas or Amshaspands (whose names are not less significant) than to the Igigi, or friendly genii, of the Babylonians. But the seven Amshaspands, even if borrowed, were modified Hebraistically, Yahwè not being (as analogy would have required) one of the seven.[2] Cp ANGELS, § 4, n. 1.

1 Gunkel in his able work (*Schöpf. u. Chaos*) has unduly ignored the Persian elements.

2 Cp Mills, 'Zendavesta' (*SBE*), 3 145.

ZOROASTRIANISM

It is also not improbable that the belief in guardian angels (Mt. 18 10 Acts 12 15) was promoted by the Zoroastrian doctrine of *fravashis* (which may also illustrate the Jewish belief in the angelic hosts)—a doctrine which has its roots in primitive Sumerian beliefs.

'That the fravashis originally meant the spirits of the dead (Lat. *manes*) is certain; but that this conception early mingled with another—that of the heavenly prototypes of all beings of the good creation, which were objectified and regarded as the Sabaoth or heavenly hosts even by the Jews is equally certain. The conception of prototypes seems to be of Sumero-Accadian origin; "my god" or "my goddess" in the Babylonian penitential hymns is to be understood of a guardian spirit, equivalent to the worshipper's "better-self," or in other words, "of a fravashi"' (*OPs.* 499 *f.*). Cp Tiele, *BAG* 554; de Harlez, *Avesta*, Introd. cxix, etc.; Mills, *Zendavesta* (*SBE*), 3 279; Casartelli, *Philosophy of the Mazdayasnian Religion under the Sassanids*, 137 *ff.*; Spiegel, *Eran. Alterthumskunde*, 2 93; Che. *OPs.* 282, 335, 420.

23. Resurrection. How early the resurrection-idea appeared among the Jews, is uncertain (cp ESCHATOLOGY, index). The possibility of escaping death is certainly implied in the story of Enoch; but this story was, even if not unknown, not popular before the post-exilic period. It appears to have a Babylonian origin (see ENOCH). We are on much safer ground when we connect the Jewish belief in the resurrection with Zoroastrianism. Zoroastrian eschatology had a profoundly moral import which must have been congenial to the Jews. The leaders of Jewish religion no doubt adopted the resurrection doctrine long after it had been grasped by individuals. They adopted it cautiously, so cautiously that we might easily suppose that it arose quite naturally out of the necessities felt in their own spiritual life. This was certainly not the case, unless Jewish religion is to be viewed as a quite exceptional product. In course of time, it was felt that the caution of the earlier leaders was unnecessary. The resurrection might safely be made general, and the retribution of the wicked be made as conspicuous as that of the righteous. Nay, the awards of the righteous would only then acquire their full attractiveness when the punishment of the wicked had been made as complete as possible. As time went on, the indebtedness of Jewish to Persian belief became still greater, and it is possible that the Messiah's function of raising the dead (Jn. 5 25 28) is an unconscious copy of the function assigned to the hero Saoshyant (the Beneficent One) in the Avesta.[1]

The Zoroastrian origin of the doctrine of the resurrection and of the renovation of the world is in itself probable. It is raised almost to a certainty when we have proved the late origin of Is. 65 *f.*, which clearly expresses the hope of the new heavens and the new earth[2] (65 17 66 22), and of Is. 24-27, in which occurs not only the promise of the abolition of death (25 8*a*, if the text be correct, see *Crit. Bib. ad loc.*), but also a distinct anticipation of the resurrection of deceased Israelites[3] (26 19). This limitation of the hope to Israelites we may, as suggested above, ascribe to the caution of the religious leaders of the Jews.

1 'Whose name will be the victorious Saoshyant, and whose name will be Astvat-ereta. He will be Saoshyant, because he will benefit the whole bodily world; he will be Astvat-ereta (he who makes the bodily creatures rise up), because as a bodily creature and as a living creature, he will stand against the destruction of the bodily creatures, to withstand the Druj (the Lie-Demon) of the two-footed brood' (*Yast*, 13 129, Darmesteter's transl.). The *Bundahesh*, which is an expansion of genuine old Zoroastrian elements, is much more explicit (see ch. 30).

2 Dr. Charles seems too bold in pronouncing the expression of this hope an interpolation, perhaps from Mazdean sources (*Eschatology*, 122 *f.*). The reference in Is. 51 16 to a reconstitution of the heavens and the earth, has been commonly taken to be merely figurative. This is probable, if 51 15 *f.* is to be regarded as a part of the Second Isaiah's work. If, however, chaps. 49-55 were appended to chaps. 40-48 in the time of Ezra there is fairly good reason for not minimising the force of the language.

3 𝔊 perhaps gives the hope a wider scope; it renders 26 19, ἀναστήσονται οἱ νεκροί, καὶ ἐγερθήσονται οἱ ἐν τοῖς μνημείοις. See *SBOT*, 'Isa.' Heb. 172.

The results here arrived at are not affected by Darmesteter's later views on the Avesta, for (1) these views are extremely difficult to justify, and (2) Darmesteter in 1893 admitted[1] that the defeat of Ahriman, the resurrection, and the renovation of the world, were already dogmatically fixed in the time of the Achæmenidæ.

It is much less certain, and yet far from improbable, that the interest of the later Jews in 'Wisdom' was stimulated by a kindred phenomenon in Zoroastrianism.

24. 'Wisdom.'

The stress laid in the Avesta and elsewhere on the two kinds of Wisdom[2] (heavenly and earthly) reminds us of the references to two kinds of Wisdom in Job and Proverbs. In later times the Jews identified the heavenly Wisdom with the Law; they took up, it seems, with enthusiasm the Zoroastrian idea of the pre-existence in heaven of the personified divine Law. It is also just conceivable that the comparatively high morality of the pre-Maccabæan Judaism may be partly due to the influence of the morality of Zoroastrianism. Certainly the Zoroastrian phrase, 'good thoughts, good words, good deeds,' might have been taken as a motto by the Jewish wise men and psalmists, and if the received text of Pss. 16 17 49 73 is correct, it will be reasonable to compare the expressions of the hope of immortality and resurrection which that text may be held to contain, with expressions of the same hope in the Gāthās. It may justly be questioned, however, whether the received text *is* correct. There are phenomena which no grammatical or exegetical subtlety can explain away, which seem to compel us to assume corruption of the text. But for this, we should certainly not be greatly surprised to find the hope of a future life emerging in any part of the Psalter, this book in all its parts being certainly a work of the Persian and Greek periods.

It has also been conjectured that the early myths of Genesis have a Zoroastrian origin. This view, however, was possible only before the wonderful discoveries in the libraries of Assyria.

25. Late Judaism.

The ultimate sources of these early myths are probably N. Arabian and Babylonian, whilst the second Fargard of the Zoroastrian writing called the Vendidad, in its present form, may even have been influenced by the narratives in Genesis.[3] It is true, the Talmudic and Midrashic statements on the First Man exhibit strong Persian elements. But this is only what might be expected in the *later* Judaism. It is remarkable that under the Sassanid kings Zoroastrianism appears to have been in some degree affected by Jewish influences[4]—a slight compensation for the long-continued indebtedness of Jewish to Zoroastrian belief.

Here this brief survey must close. A full exegetical treatment of the Biblical passages would have unduly extended this article. Enough if the close resemblance between Judaism and Zoroastrianism has been brought home to the reader. Elsewhere a parallel between Zoroaster and John the Baptist has been suggested. But, if we may follow the most respected authorities, this comparison does not go far enough. Indeed, there is no figure equal in interest to Zoroaster's: he is a prophet, reformer, sacred poet all in one, and has left an abiding impress on a faith which is as strongly moral as the Jewish, and without some acquaintance with which neither the later Judaism nor the later Christianity can be adequately appreciated.

An attempt to reconsider the relation of Judaism to Zoroastrianism on the basis of the sacred texts and of the most modern authorities is to be found in Cheyne's

26. Literature.

Origin of the Psalter (1891), pp. 357, 394-409, 433-440; 'Possible Zoroastrian Influences on the Religion of Ancient Israel,' *Expos. Times*, June, July, August 1891; 'The Book of Psalms, its origin and relation to Zoroastrianism,' *Semitic Studies in memory of A. Kohut*, 1897, pp. 111-119; *Jew. Rel. Life after the Exile*, 74, 81, 151, 157, 210, 251, 258 *ff.* See also Moulton, *Expos. Times*, May 1898, pp. 352 *ff.* (essay by a Zend scholar, putting forward the same general view and the same leading facts as the first-named work); Stave, *Ueber d. Einfluss d. Parsismus auf d. Judenthum*, 1898; Söderblom, *La Vie future d'après le Mazdéisme* (1901); Böklen, *Verwandtschaft der jüdisch-christl. mit der persischen Eschatologie* (1902). Oldenberg (*ZDMG* 50 43-68 [1896]) gives fresh reason for believing in close relations at an early date between Iranian and Babylonian religion. Hommel too (*PSBA* 21 137 *ff.* [1899]) points out that the foreign-looking divine name Assaramazas, in an Assyrian list of gods, is really Ahura-mazda; also that the divine names Mitra and Marun, found in Assyrian religious texts, are the same as the Vedic Mitra and Varuna. These names were borrowed by the Assyrians, according to Hommel, in the Kassite period (1700-1200 B.C.). Zimmern, too (*KAT*(3) 346 n. 1), points out, in harmony with the present article, that the relation of Parsism to Babylon needs to be more closely examined. K. F. G., §§ 1-19; T. K. C., §§ 20-26.

4 Darmesteter, *Une prière judéo-persane*, Paris, 1891.

ZORZELLEUS (ζορζελλεου [A]), 1 Esd. 5 38. See BARZILLAI, 2.

ZUAR (צוּעָר; σωγαρ [BAFL]), an Issacharite (Nu. 1 8 [P]).

ZUPH (סוּף), Dt. 1 1, AVmg., RV SUPH (*q.v.*).

ZUPH (צוּף, as if 'honeycomb'). The 'land of Zuph' (1 S. 9 5, σειφ [BA], σιφα [L]) is the district about the unnamed city where Samuel and Saul met. In 1 S. 1 1 (νασειβ [B], σουα [A], σωφ [L]; and 1 Ch. 6 35 [20], Kr. σουφ [BA], σουφι [L]) the descent of Elkanah is apparently traced back to an ancestor Zuph; 1 Ch. 6 26 [11], however, gives the name as Zophai, or as we might vocalise, Zuphi—*i.e.*, 'the Zuphite' (σουφ[ε]ι [BAL]).

Most critics also find צופי (a Zuphite) in 1 S. 1 1, on which בֶּן־צוּף at the end of the verse may, it is thought, be a gloss. If, therefore, 'Zuph' in 1 S. 9 5 is the same as 'Zuph' in 1 S. 1 1, etc., the 'land of Zuph' will mean probably the district held by the clan Zuph.

It appears, however (see RAMATHAIM-ZOPHIM), that the MT of 1 S. 1 1 (on which 1 Ch. 6 35 [20] depends) is very corrupt, and that no use can be made of צוף, or Zuph, which is probably incorrect. The case is the same with 'Zuph' in the phrase 'the land of Zuph.' Of a Zuph in Mount Ephraim (commonly so called) we know nothing, and the supposed reference to such a land throws the geography of Saul's journey into great confusion. צוף or (see 𝔊) צִיף in 1 S. 9 5 is very possibly a corrupt fragment of מִצְפָּה, Mizpah; it is the Mizpah referred to in 1 S. 7 5 *ff.* and 10 17, and, as 7 16 shows, specially connected with Samuel. See MIZPAH, 1.

Winckler indeed has suggested (*GI* 2) that the land of Zuph (cp Ramathaim-zophim) was in the territory of Benjamin before the reduction of its limits by David (who, according to Winckler, conquered Benjamin and excluded from it 'the hill country of Ephraim'). There is also the possibility that 'the hill-country of Ephraim' spoken of was in the Negeb, and that צוף, as well as סוף, comes from צרפת. There does appear to have been a southern Ephraim, and though to find it in 1 S. 9 4 would subvert all our theories, yet we must leave the question open whether the home of Saul may not have been in the Negeb, improbable as this may seem.

ציף is also supported by 1 Ch. 6 20 Ktb. On the form צופי (1 Ch. 6 11) cp Kittel, *SBOT*, 'Chron.' *ad loc.* In 1 S 1 1 Wellhausen, Klostermann, Marquart, read צוף אפרים, 'Zuph of Ephraim.' T. K. C.

ZUR (and its possible compounds). We find צוּר, Zur (ṣur), used as a synonym for God or as an element in a compound title descriptive of God as the Mighty One, in Is. 17 10, and in many late exilic and post-exilic passages.

See Dt. 32 4 15 18 30 31 [*bis*], 37 1 S. 2 2 2 S. 22 [=Ps. 18] 3 32 47 [*bis*] 23 3 Ps. 19 15 [14] 28 1 31 3 [2] 62 3 7 8 [2 6 7] 71 3 73 26 78 35 89 27 [26] 92 16 [15] 94 22 95 1 144 1 [also 75 6, 𝔊] Is. 26 4 30 29 44 8 Hab. 1 12.[1]

Among these passages Dt. 32 4 18 30 *f.*, 1 S. 2 2 Is. 44 8 Hab. 1 12 are specially important, because here צור, 'Rock,' appears to have become altogether a synonym for 'God.'[2] To these we may perhaps add Josh. 15 58, where BETH-ZUR (*q.v.*) may mean 'house of Zur' = 'house of God.'[3] Are we to suppose that phrases like

1 Is. 30 29 and Hab. 1 12*b* are probably late; see the commentaries of Marti and Nowack.
2 In Ps. 75 6 we should probably read neither בצואר nor בצור, but בַּצַּדִּיק (cp 31 19 [18]).
3 Hommel (*AHT* 320, cp 300) also compares the royal name ברצר (Bir-ṣur) in the inscription of Panammu, king of Šam'al (8th cent.), and the S. Arabian woman's name Zuri-'addana.

'rock of my salvation' are suggested by an early divine title צור, Zur ('rock')? If so, the author of Dt. 32 and those who followed him did but revert to an ancient usage when they employed Zur and Yahwè synonymously. And if this early divine title existed among the Hebrews, we may, not without some plausibility, regard the four personal names ELIZUR, PEDAHZUR, ZURIEL, and ZURISHADDAI (all in P) as ancient names preserved by the late Priestly Writing.

The literary evidence, however, is not favourable to this view; and on the sole ground of the place-name Bethzur (which can quite well be explained 'rock-house' or 'rock-place') we cannot venture to regard as beyond all doubt the early existence of a divine name Zur. If, therefore, the four names referred to really contain the (late) divine name Zur, they must be artificial coinages of P. But it is an objection to this view that P never employs the title צור of God. Are we to suppose, then, that P derived the names from some other late, post-deuteronomic writer?

The difficulty can only be removed by a keener criticism of the MT. As the result of this we have found elsewhere that the four names are probably corruptions of ethnics or gentilics. The corruptions in the proper names of P are so numerous that this theory has to be seriously considered. See PEDAHZUR, ZURIEL, ZURISHADDAI. Cp also PASHHUR; if this word be a corruption of Pedahzur, we get another set of references to this name. The date of Jer. 20 (Pashhur chapter), however, is questioned (see JEREMIAH ii, § 6).

On the biblical passages, cp Gray, *HPN* 195 *ff.*, and on Jewish views of the meaning of Zur see Wiegand, *ZATW* 10 85 *ff.* ('90). T. K. C.

ZUR (צוּר, abbrev., perhaps from מִצּוּר, Miṣṣur in N. Arabia [see MIZRAIM, § 2*b*] cp Rekem=Jerahmeel, Reba='Arāb; COYP [BAFL]). 1. A Midianitish chief, Nu. 25 15 31 8 Josh. 13 21.

2. A name in a genealogy of BENJAMIN (*q.v.*, § 9 ii. *β*), cp ZEROR (1 Ch. 8 30 *ισουρ* [A] = 9 36 *ισειρ* [BℵA]). His mother bears the Jerahmeelite name MAACAH (Che.). See *JQR* 11 110-113, §§ 10 *ff.*

ZURIEL (צוּרִיאֵל, as if 'my rock is El,' but see below; COYPIHΛ [BAFL]), b. Abihail, 'prince' of the families of Merari (Nu. 3 35)†.

The name taken by itself might be a combination of two names of God (cp ZUR). But if Abihail is a (popular) corruption of 'Jerahmeel' (see MAHALATH, and cp אביחיל, if correct, in 1 Ch. 2 29) and if 'Mahli' is a corruption of 'Jerahme'eli' and 'Merari' of 'Miṣri' (*i.e.*, 'belonging to Muṣur or Muṣri [on the S. Palestinian border]'), or from some other ethnic (cp MERAB), it is probable that אל is simply an afformative, and that צורי implies a clan-name צור, possibly from צופר, and ultimately from צרפת. Cp ספרת (SOPHERETH). T. K. C.

ZURISHADDAI (צוּרִישַׁדַּי, § 43, as if 'my rock is Shaddai,' but see below; COYP[Є]ICAΔΑΙ [BAF], and COYPICAΔЄ [L]), father of the Simeonite prince Shelumiel, Nu. 1 6 (2 12, COYPICAΔΑЄΙ [F]; 7 36 41 10 19†). Under the form SALASADAI he is mentioned along with his son SHELUMIEL (*q.v.*) in the compiled genealogy of Judith (8 1, *σαρασαδαι* [B], *σαλα.* [A], *σαρι.* [ℵ]). See GENEALOGIES i., col. 1662, n. 1.

צור (Zur) and שַׁדַּי (Shaddai?) may both be names of God (see ZUR, SHADDAI). But names (especially in P) being so often corrupt, it is not improbable that both were originally ethnics, and ultimately come respectively from צרפת (Zarephath) and ישמעאל (Ishmael). See ZURIEL and SHADDAI. Asshur=the southern Geshur, with which the Simeonites may have been connected. Possibly, too, the Danite name, AMMISHADDAI (*q.v.*), may be a distorted form of Ishmael, and SHELUMIEL (*q.v*). may also have a tribal reference. T. K. C.

ZUZIM (זוּזִים), a people on the E. of the Jordan, Gen. 14 5† (cp HAM). Sym. *ζοιζομμειν*, 𝔊AEL *ἔθνη ἰσχυρά*, perhaps reading either עִזּוּזִים (Klo. *Gesch.* 107) or עֲצֻמִים (cp Pesh. עשינא, 'the mighty ones,' and the form זמזמים, ZAMZUMMIM. See EMIM). At any rate, we cannot venture to connect the name with that of the Roman military station Zîza, SE. of Heshbon. Sayce's theory (*Crit. Mon.* 160 *f.*) is also too hazardous. Probably the Zuzim are to be identified with the ZAMZUMMIM (*q.v.*), and are a branch of the Rephaim—*i.e.*, probably of the Ṣārephāthīm. זוזים may in fact have come from פרזים (Perizzites (though the plur. of פרזי does not actually occur); פרזי itself may be a corruption of צרפתי. See PERIZZITE, REPHAIM. T. K. C.
